Editor's Choice

Nutritional and Metabolic Diseases and Conditions - Obesity. Data from Affiliated Hospital Advance Knowledge in Obesity (Maternal obesity in mice not only affects fresh embryo quality but also aggravates injury due to vitrification) ... p.666

Nutritional and Metabolic Diseases and Conditions - Obesity. Data on Obesity Detailed by Researchers at National Taiwan University (Piceatannol Exerts Anti-Obesity Effects in C57BL/6 Mice through Modulating Adipogenic Proteins and Gut Microbiota) ... p.667

Nutritional and Metabolic Diseases and Conditions - Obesity. Data on Obesity Reported by Researchers at Massey University (Efficacy of Exercise Intervention for Weight Loss in Overweight and Obese Adolescents: Meta-Analysis and Implications) ... p.668

Fitnescity. FITNECITY Unveils its Wellness Management Program of the Future ... p.669

Heart Disorders and Diseases - Heart Attack. Findings from G. Geri et al Update Understanding of Heart Attack (Influence of body mass index on the prognosis of patients successfully resuscitated from out-of-hospital cardiac arrest treated by therapeutic hypothermia) ... p.670

Expanded Reporting

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from Ghent University Hospital Yields New Findings on Obesity (Reduced Expression of Chemerin in Visceral Adipose Tissue Associates with Hepatic Steatosis in Patients with Obesity) ... p.672

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from J. Furlanetto and Co-Authors Update Knowledge of Obesity [Higher rate of severe toxicities in obese patients receiving dose-dense (dd) chemotherapy according to unadjusted body surface area: results of the prospectively randomized ...] ... p.673

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from University of Ottawa Reveals New Findings on Obesity (The mediating role of energy intake on the relationship between screen time behaviour and body mass index in adolescents with obesity: The HEARTY study) ... p.674

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from University of Palermo Broaden Understanding of Type 2 Diabetes (Baseline metabolic disturbances and the twenty-five years risk of incident cancer in a Mediterranean population) ... p.675

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from University of Queensland Yields New Findings on Obesity (Effect of Obesity on the Population Pharmacokinetics of Fluconazole in Critically Ill Patients) ... p.676
January 14, 2017

Dental Diseases and Conditions - Tooth Wear. Findings from University of Sao Paulo Yields New Data on Tooth Wear (Nutritional status, tooth wear and quality of life in Brazilian schoolchildren) … p.678

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from Washington State University Yields New Data on Obesity (Emotion regulation strategies and childhood obesity in high risk preschoolers) … p.679

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from Washington University Yields New Data on Obesity (Obesity Epidemiology Worldwide) … p.680

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings on Obesity Described by Researchers at California State University [Adolescent Obesity Risk Knowledge (AORK): Let the Discussion Begin] … p.681

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators at Griffith University Zero in on Obesity [ADDing negative PRESSure to improve healing (the DRESSING trial): a RCT protocol] … p.682

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators at Medical University Report Findings in Obesity (Nutritional interventions or exposures in infants and children aged up to 3 years and their effects on subsequent risk of overweight, obesity and body fat: a systematic review of ...) … p.683

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators at National Institute on Alcohol Abuse and Alcoholism Report New Data on Type 2 Diabetes (Endocannabinoid regulation of b-cell functions: implications for glycaemic control and diabetes) … p.684

Health and Medicine - Diet and Nutrition. Investigators at University of Bath Describe Findings in Diet and Nutrition (Is breakfast the most important meal of the day?) … p.685

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators at University of North Carolina Report Findings in Obesity (The interaction between physical activity and obesity gene variants in association with BMI: Does the obesogenic environment matter?) … p.686

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from Indiana University School of Medicine Have Reported New Data on Obesity (Does Body Mass Index Modify Memory, Reasoning, and Speed of Processing Training Effects in Older Adults) … p.688

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from Research Hospital Have Reported New Data on Obesity (The assessment of maternal and umbilical cord homocysteine levels in obese pregnant women) … p.689
Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from Soonchunhyang University Hospital Release New Data on Obesity (Association between obesity and lower urinary tract symptoms: propensity score matching study between healthy controls and obese patients seeking bariatric surgery) ... p.690

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from University of California Report New Data on Obesity (The Effects of Patient Obesity on Early Postoperative Complications After Shoulder Arthroscopy) ... p.691

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from University of Medicine and Dentistry of New Jersey (UMDNJ) Release New Data on Obesity (Early postnatal amylin treatment enhances hypothalamic leptin signaling and neural development in the selectively bred diet-induced obese ...) ... p.692

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from University of North Carolina Zero in on Obesity (Child and youth participatory interventions for addressing lifestyle–related childhood obesity: a systematic review) ... p.693

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from University of Queensland Release New Data on Obesity (The fractions of cancer attributable to modifiable factors: A global review) ... p.694

Nutritional and Metabolic Diseases and Conditions - Obesity. Johns Hopkins University Details Findings in Obesity (Microvascular Endothelial Dysfunction in Sedentary, Obese Humans Is Mediated by NADPH Oxidase Influence of Exercise Training) ... p.695

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings Reported from University College Describe Advances in Obesity (Perceived Weight Discrimination and Chronic Biochemical Stress: A Population–Based Study Using Cortisol in Scalp Hair) ... p.696

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from Bioprocessing Technology Institute Describe Advances in Obesity (Loss of Fas apoptosis inhibitory molecule leads to spontaneous obesity and hepatosteatosis) ... p.697

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from Boston University Update Understanding of Obesity (WNT5A–JNK regulation of vascular insulin resistance in human obesity) ... p.698

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from Federal University in the Area of Obesity Described (Thyroid Function in Human Obesity: Underlying Mechanisms) ... p.699

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from NHS Foundation Trust in the Area of Obesity Reported (Physical Activity to Reduce Systemic Inflammation Associated With Chronic Pain and Obesity: A Narrative Review) ... p.700

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings in Obesity Described from Nestle Research Center (Chrono–nutrition: a review of current evidence from observational studies on global trends in time–of–day of energy intake and its association with obesity) ... p.701

Gram-Positive Bacteria - Clostridium difficile. New Findings on Clostridium difficile from Einstein Medical Center Summarized (Body mass index greater than 35 is associated with severe Clostridium difficile infection) ... p.702
January 14, 2017

Mental Health Diseases and Conditions - Schizophrenia. New Findings on Schizophrenia from University of California Summarized (Weight change during long–term treatment with lurasidone: pooled analysis of studies in patients with schizophrenia) … p.703

Inflammation. New Inflammation Study Results Reported from University of Toronto (Diet–induced cellular neuroinflammation in the hypothalamus: Mechanistic insights from investigation of neurons and microglia) … p.704

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity FindingsHas Been Reported by Researchers at Garvan Institute of Medical Research (Skeletal muscle and plasma lipidomic signatures of insulin resistance and overweight/obesity in humans) … p.705

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity FindingsDescribed (Serum Amyloid A3 Gene Expression in Adipocytes is an Indicator of the Interaction with Macrophages) … p.706

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from L. Everaere and Co–Authors Described (Innate lymphoid cells contribute to allergic airway disease exacerbation by obesity) … p.707

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from University of Picardie Described (Does sleeve gastrectomy improve the gait parameters of obese patients?) … p.708

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from Wayne State University Reported (Gender dimorphism in adipose tissue response to stress conditions: A plausible mechanism to explain the conflicting data regarding trauma and obesity) … p.709

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Have Been Reported by Investigators at Children’s Hospital (Family Factors that Characterize Adolescents with Severe Obesity and Their Role in Weight Loss Surgery Outcomes) … p.710

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Recently Were Reported by Researchers at Albert Einstein College of Medicine (Hidden Obesity in Dialysis Patients: Clinical Implications) … p.711

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Recently Were Reported by Researchers at University of California (Maternal Western diet increases adiposity even in male offspring of obesity–resistant rat dams: early endocrine risk markers) … p.713

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Recently Were Reported by Researchers at University of Texas Southwestern Medical Center (Brain imaging demonstrates a reduced neural impact of eating in obesity) … p.714

Peptide Proteins - Proinsulin. New Proinsulin Study Findings Recently Were Reported by Researchers at University of Helsinki Central Hospital (Mitochondria–related transcriptional signature is downregulated in adipocytes in obesity: a study of young healthy MZ twins) … p.715
Wellness. New Wellness Study Findings Have Been Reported from University of Colorado (Health at hand: A systematic review of smart watch uses for health and wellness) ... p.717

Oncology - Acute Myeloid Leukemia. Obesity–associated protein could be linked to leukemia development ... p.718

Nutritional and Metabolic Diseases and Conditions - Obesity. Recent Findings by W.T. Garvey and Colleagues in Obesity Provides New Insights (Patient–centered Care Of The Patient With Obesity) ... p.719

Pregnancy Complications - Cephalopelvic Disproportion. Recent Findings from Hospital Center Has Provided New Information about Cephalopelvic Disproportion (Indications for primary cesarean delivery relative to body mass index) ... p.720

Peptide Proteins - Proinsulin. Recent Findings from University of Oklahoma Provides New Insights into Proinsulin (Enhanced GLUT4–Dependent Glucose Transport Relieves Nutrient Stress in Obese Mice Through Changes in Lipid and Amino Acid Metabolism) ... p.721

Nutritional and Metabolic Diseases and Conditions - Obesity. Report Summarizes Obesity Study Findings from University of California (Effects of a mindfulness–based weight loss intervention in adults with obesity: A randomized clinical trial) ... p.723

Swiss 3T3 Cells. Reports on Swiss 3T3 Cells from Kyoto University Provide New Insights (13–Methylberberine, a berberine analogue with stronger anti–adipogenic effects on mouse 3T3–L1 cells) ... p.730
Nutritional and Metabolic Diseases and Conditions - Obesity. Research Conducted at Laval University Has Updated Our Knowledge about Obesity (Association between nesfatin–1 levels and metabolic improvements in severely obese patients who underwent biliopancreatic derivation with duodenal switch) ... p.731

Nutritional and Metabolic Diseases and Conditions - Obesity. Research Data from University of Pennsylvania Update Understanding of Obesity (Future Therapies in Obesity) ... p.732

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at Austin Health Release New Data on Obesity (The effect of body mass and sex on the accuracy of respiratory magnetometers for measurement of end–expiratory lung volumes) ... p.732

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at University Hospital Target Obesity (Obesity services: how best to develop a coherent way forward) ... p.734

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at University of Antwerp Target Obesity (CNV analysis and mutation screening indicate an important role for the NPY4R gene in human obesity) ... p.735

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at University of KwaZulu–Natal Release New Data on Obesity (microRNA–27a rs895819 is associated with obesity in HIV infected preeclamptic Black South African women on HAART) ... p.736

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at University of Oulu Report New Data on Obesity (Fto–Deficiency Affects the Gene and MicroRNA Expression Involved in Brown Adipogenesis and Browning of White Adipose Tissue in Mice) ... p.737

Wellness. Researchers from Mt. Sinai Hospital Report Recent Findings in Wellness (Healthy and productive workers: using intervention mapping to design a workplace health promotion and wellness program to improve presenteeism) ... p.741

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from Nanjing Agricultural University Report Details of New Studies and Findings in the Area of Obesity (Both diet and gene mutation induced obesity affect oocyte quality in mice) ... p.742

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from State University of New York Report Findings in Obesity (Do environmental pollutants increase obesity risk in humans?) ... p.743
Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from Texas Technical University Discuss Findings in Obesity (Physical activity and obesity: what we know and what we need to know) … p.744

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies Conducted at University of Chile on Obesity Recently Reported [Impact of a school–based intervention on nutritional education and physical activity in primary public schools in Chile (KIND) programme study protocol: cluster randomised …] … p.745

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from Harvard School of Medicine in the Area of Obesity Reported (Respiratory Management of Perioperative Obese Patients) … p.747

Propiophenones. Studies from University of Arizona Add New Findings in the Area of Propiophenones (BMI changes in adolescents treated with bupropion SR for smoking cessation) … p.748

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings from Chapman University Provide New Insights into Obesity (Cortisol in Human Milk Predicts Child BMI) … p.749

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings on Obesity Are Outlined in Reports from Sheffield Hallam University ('I just don’t want to get bullied anymore, then I can lead a normal life'; Insights into life as an obese adolescent and their views on obesity treatment) … p.751

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings on Obesity Are Outlined in Reports from University of Washington (Safety of Outpatient Surgical Abortion for Obese Patients in the First and Second Trimesters) … p.752

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Results from National Autonomous University Update Understanding of Obesity (Hepatic miR–33a/miR–144 and their target gene ABCA1 are associated with steatohepatitis in morbidly obese subjects) … p.753

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Results from Pennsylvania State University Update Understanding of Obesity (Application of the multiphase optimization strategy to a pilot study: an empirical example targeting obesity among children of low–income mothers) … p.754

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Results from Sapienza–University Update Understanding of Obesity (Circulating SIRT1 inversely correlates with epicardial fat thickness in patients with obesity) … p.755

January 14, 2017

**Nutritional and Metabolic Diseases and Conditions - Obesity.** Study Results from University Medical Center Provide New Insights into Obesity (Macrosomia, Obesity, and Macrocephaly as First Clinical Presentation of PHP1b Caused by STX16 Deletion) … p.757

**Peptide Proteins - Proinsulin.** Study Results from University of Missouri Update Understanding of Proinsulin (Transcriptomic differences in intra–abdominal adipose tissue in extremely obese adolescents with different stages of NAFLD) … p.758

**Musculoskeletal Diseases and Conditions - Osteoarthritis.** Findings from French National Institute of Health and Medical Research (INSERM) Has Provided New Data on Osteoarthritis [Ceftriaxone–Resistant Neisseria gonorrhoeae Isolates (2010 to 2014) in France Characterized by Using Whole–Genome Sequencing] … p.760

**Nanotechnology - Molecular Imaging.** Researchers from Harvard School of Medicine Provide Details of New Studies and Findings in the Area of Molecular Imaging (Sites With Small Impedance Decrease During Catheter Ablation for Atrial Fibrillation Are Associated With Recovery of ...) … p.762

**Digestive System Diseases and Conditions - Colonic Polyps.** Researchers from University of Barcelona Report Details of New Studies and Findings in the Area of Colonic Polyps (Prognostic Value of Left Atrial Strain in Outpatients with De Novo Heart Failure) … p.763

**Statistical Mechanics.** Researchers from University of Cagliari Provide Details of New Studies and Findings in the Area of Statistical Mechanics (Altered Aortic Upper Wall TDI Velocity Is Inversely Related with Left Ventricular Diastolic Function in Operated Tetralogy ...) … p.764

**Aromatic Amino Acids.** Researchers from University of North Carolina Report Details of New Studies and Findings in the Area of Aromatic Amino Acids (Co–delivery of polymeric metformin and cisplatin by self–assembled core–membrane nanoparticles to treat non–small cell ...) … p.765

**Biomedical Engineering - Tissue Engineering.** Researchers from University of Pittsburgh Provide Details of New Studies and Findings in the Area of Tissue Engineering (Early Whole Blood Transcriptional Signatures Are Associated with Severity of Lung Inflammation in Gynomolgus Macaques with ...) … p.766

**Global Views - South Asia.** Researchers from University of Wisconsin Report Details of New Studies and Findings in the Area of South Asia (BMP1–like proteinases are essential to the structure and wound healing of skin) … p.768

**Health and Medicine - Cardiology.** Study Data from Johns Hopkins University Provide New Insights into Cardiology (Cardiac Index Declines During Long–Term Left Ventricular Device Support) … p.769

Pharmaceutical Companies. ALEXION
ALXN ALERT: Johnson & Weaver, LLP Announces Filing of Class Action Complaint Against Alexion Pharmaceuticals, Inc.; Encourages all Investors to Contact the Firm for Information … p.770

Neurodegenerative Diseases and Conditions - Motor Neuron Disease. ALS and Alzheimer's Disease Bioinformatics Reports Confirm GM6's Role as Regulator of Disease-Relevant Pathways … p.770

Women's Health - Reproductive Health. Abortion care in the UK is 'heading towards a crisis,' warns expert … p.771

Lung Diseases and Conditions - Cystic Fibrosis. Alder Hey Children's NHS Foundation Trust Details Findings in Cystic Fibrosis (Pneumococcal vaccines for cystic fibrosis) … p.772

Drugs and Therapies - Behavioural Pharmacology. American University Reports Findings in Behavioural Pharmacology (Cocaine cues retain silent traces of an excitatory history after conversion into conditioned inhibitors: 'the ghost in the addict') … p.773

EurekAlert!. Animal biology, human health dominate 2016 EurekAlert! trending news list … p.774

Drugs and Therapies - Antibiotics. Antibiotic resistance just became more complex … p.776

Oncology - Breast Cancer. Aromatase inhibitors for breast cancer: Advantages over tamoxifen in early-stage disease … p.777

Base Pair Biotechnologies, Inc. Base Pair Biotechnologies, Inc. and Nexmos, Inc. Create the First DNA Aptamers that Inhibit Vitamin C Oxidation … p.779

Virus Integration. Baylor University College of Medicine Reports Findings in Virus Integration (Clonal Dynamics In Vivo of Virus Integration Sites of T Cells Expressing a Safety Switch) … p.780

Biophysical Society. Biophysical Society announces winners of 2017 CPOW Travel Awards … p.781

BlueCross BlueShield of Tennessee, Inc. BlueCross Online Wellness Portal Adds Capabilities … p.782

Biotechnology - Genomics. CHA University Reports Findings in Genomics (Next generation sequencing identifies abnormal Y chromosome and candidate causal variants in premature ovarian failure patients) … p.783

Inflammation. Capital Medical University Reports Findings in Inflammation (14,15-Epoxycosatrienoic acid suppresses cigarette smoke condensate–induced inflammation in lung epithelial cells by inhibiting autophagy) … p.784

Oncology - Liver Cancer. Capital Medical University Reports Findings in Liver Cancer (Worse or better?–Cirrhosis with hepatocellular carcinoma) … p.785

Oncology - Non-Small Cell Lung Cancer. Central South University Details Findings in Non–Small Cell Lung Cancer (Resveratrol inhibits Hexokinases II mediated glycolysis in non–small cell lung cancer via targeting Akt signaling pathway) … p.786

Immunology - Antigens. China Three Gorges University Reports Findings in Antigens (Tumor–associated antigens: Tn antigen, sTn antigen, and T antigen) … p.787

Platinum Compounds. Chosun University Reports Findings in Platinum Compounds (Protective Effect of Tempol against Cisplatin–Induced Ototoxicity) … p.788
January 14, 2017

Drugs and Therapies - Pharmacy
College of Pharmacy Details
Findings in Pharmacy Practice (Valued characteristics of community pharmacy residency applicants) ... p.789

Biocept, Inc. Columbia University Medical Center Sponsors Clinical Study Using Biocept's Liquid Biopsy Platform to Evaluate Cerebrospinal Fluid of Breast Cancer Patients for Metastatic Biomarkers ... p.790

Gram-Positive Bacteria - Staphylococcus aureus. Connolly Hospital Details Findings in Staphylococcus aureus (Eradication of Staphylococcus aureus Catheter–Related Biofilm Infections Using ML:8 and Citrox) ... p.791

Corporate Whistleblower Center. Corporate Whistleblower Now Urges Physicians to Call About Potential Huge Rewards If They Can Prove a Medical Device or Drug Company Is Involved in Selling Non–FDA Approved Products ... p.792

Mycobacterium Infections - Tuberculosis. Data from All India Institute of Medical Sciences Advance Knowledge in Tuberculosis (DevS/DosS sensor is bifunctional and its phosphatase activity precludes aerobic DevR/DosR regulon expression in Mycobacterium tuberculosis) ... p.794

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Data from Anhui Medical University Provide New Insights into Chronic Hepatitis B Virus (Prediction model for sustained hepatitis B e antigen seroconversion to peginterferon alfa–2a in chronic hepatitis B) ... p.795

www.NewsRx.com

Oncology - Esophageal Cancer. Data from Anhui Medical University Provide New Insights into Esophageal Cancer (Insights into the potential use of microRNAs as a novel class of biomarkers in esophageal cancer) ... p.796

Drugs and Therapies - Drug Resistance. Data from Assaf Harofe Medical Center Provide New Insights into Drug Resistance (Multidrug–Resistant Gram–Negative Bacilli: Infection Control Implications) ... p.797

Drugs and Therapies - Antifungals. Data from Astellas Pharma Global Development Inc. Provide New Insights into Antifungals [Population Pharmacokinetics of Isavuconazole from Phase 1 and Phase 3 (SECURE) Trials in Adults and Target Attainment in Patients with Invasive Infections ...] ... p.798

Drugs and Therapies - Antiinfectives. Data from B. VanScoy et al Provide New Insights into Antiinfectives (Relationship between Fosfomycin Exposure and Amplification of Escherichia coli Subpopulations with Reduced Susceptibility in a Hollow–Fiber Infection Model) ... p.799

Surgery - Cardiovascular and Thoracic Surgery. Data from Baylor University College of Medicine Advance Knowledge in Cardiovascular and Thoracic Surgery (Decision analysis to define the optimal management of athletes with anomalous aortic origin of a coronary artery) ... p.800

Clinical Research - Clinical Trials and Studies. Data from Beijing Hospital Advance Knowledge in Clinical Trials and Studies (Efficacy and safety of the Chaihuguizhiganjiang–suanzaoren granule on primary insomnia: study protocol for a randomised controlled trial) ... p.801
Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Data from Ben–Gurion University of the Negev Provide New Insights into Type 1 Diabetes Mellitus (Exploration of alpha 1–Antitrypsin Treatment Protocol for Islet Transplantation: Dosing Plan and Route of Administration) ... p.802

Cardiovascular Diseases and Conditions - Hypertension. Data from Bezmialem Vakif University Provide New Insights into Hypertension (Adropin levels and target organ damage secondary to high blood pressure in the ED) ... p.803

Heart Disorders and Diseases - Heart Attack. Data from Brigham and Women's Hospital Provide New Insights into Heart Attack (Continuous EEG monitoring enhances multimodal outcome prediction in hypoxic–ischemic brain injury) ... p.804

Stem Cell Research - Hematopoietic Stem Cells. Data from British Heart Foundation Provide New Insights into Hematopoietic Stem Cells (DNA Methylation Dynamics of Human Hematopoietic Stem Cell Differentiation) ... p.805

Oncology - Rectal Cancer. Data from C. Hardie et al Provide New Insights into Rectal Cancer (Effect of statin and aspirin use on toxicity and pathological complete response rate of neo–adjuvant chemo radiation for rectal cancer) ... p.806

Oncology - Colon Cancer. Data from Cancer Institute Advance Knowledge in Colon Cancer [Subgroup analysis in RAISE: a randomized, double–blind phase III study of irinotecan, folinic acid, and 5–fluorouracil (FOLFIRI) plus ramucirumab or placebo in patients with ...] ... p.807

Cerebrovascular Diseases and Conditions - Vascular Dementia. Data from Capital Medical University Provide New Insights into Vascular Dementia (Efficacy of Cholinesterase Inhibitors in Vascular Dementia: An Updated Meta–Analysis) ... p.809

Heart Disorders and Diseases - Atrial Fibrillation. Data from Central South University Advance Knowledge in Atrial Fibrillation (Association Between the Left Atrial and Left Atrial Appendages Systole Strain Rate in Patients with Atrial Fibrillation) ... p.810

Gastroenterology - Kidney Function. Data from Chimerix Provide New Insights into Kidney Function (Brincidofovir Is Not a Substrate for the Human Organic Anion Transporter 1: A Mechanistic Explanation for the Lack of Nephrotoxicity Observed in Clinical Studies) ... p.811

Blood Pressure. Data from China University of Science and Technology Advance Knowledge in Blood Pressure [Protective role of ACE2–Ang–(1–7)–Mas in myocardial fibrosis by downregulating K(Ca)3.1 channel via ERK1/2 pathway] ... p.812

Apoptosis. Data from Chungnam National University Advance Knowledge in Apoptosis (Mutational analysis of metacaspase CaMca1 and decapping activator Edc3 in the pathogenicity of Candida albicans) ... p.813

Arrhythmia. Data from Columbia University Advance Knowledge in Arrhythmia (Validation of electromechanical wave imaging in a canine model during pacing and sinus rhythm) ... p.814

Drugs and Therapies - Diclofenac Therapy. Data from D. Mladsi and Colleagues Advance Knowledge in Diclofenac Therapy (Cost–effectiveness of Low–dose Submicron Diclofenac Compared With Generic Diclofenac) ... p.815
January 14, 2017

Digestive System Diseases and Conditions - Colorectal Neoplasms. Data from Department of Internal Medicine Provide New Insights into Colorectal Neoplasms (Associations between amount of smoking and alcohol intake and risk of colorectal neoplasm) ... p.816

Drugs and Therapies - Chemotherapy. Data from Department of Research Provide New Insights into Chemotherapy [Reference data of the European Organisation for Research and Treatment of Cancer (EORTC) QLQ–CIPN20 Questionnaire in the general Dutch population] ... p.817

Nutritional and Metabolic Diseases and Conditions - Obesity. Data from Drexel University Advance Knowledge in Obesity (From last supper to self-initiated weight loss: Pretreatment weight change may be more important than previously thought) ... p.818

Alcohols. Data from E.E. Caamal–Fuentes and Colleagues Advance Knowledge in Alcohols (Anti–giardia activity and acute toxicity of a methanol extract of Senna racemosa bark) ... p.819

Oncology - Multiple Myeloma. Data from Eberhard–Karls University Advance Knowledge in Multiple Myeloma (Simplified response monitoring criteria for multiple myeloma in patients undergoing therapy with novel agents using computed tomography) ... p.820

Nutritional and Metabolic Diseases and Conditions - Anorexia. Data from Ehime University Graduate School of Medicine Provide New Insights into Anorexia (Association between high serum carcinoembryonic antigen and clinical state of male anorexia nervosa: A case report) ... p.822

Drugs and Therapies - Antineoplastics. Data from Erasmus University Medical Center Advance Knowledge in Antineoplastics (Fasting protects against the side effects of irinotecan treatment but does not affect anti–tumour activity in mice) ... p.823

Oncology - Cancer Genetics. Data from Federal University Advance Knowledge in Cancer Genetics (Prevalence of Hispanic BRCA1 and BRCA2 mutations among hereditary breast and ovarian cancer patients from Brazil reveals differences among Latin American populations) ... p.824

Central Nervous System Diseases and Conditions - Epilepsy. Data from Federal University Provide New Insights into Epilepsy (Effects of different physical exercise programs on susceptibility to pilocarpine–induced seizures in female rats) ... p.825

Proteins - Extracellular Matrix Proteins. Data from Fourth Military Medical University Provide New Insights into Extracellular Matrix Proteins (Mutations in COL1A1 Gene Change Dentin Nanostructure) ... p.826

Oncology - Gastric Cancer. Data from Fudan University Advance Knowledge in Gastric Cancer (Non–curative surgery for patients with gastric cancer with local peritoneal metastasis A retrospective cohort study) ... p.827

Oncology - Gastric Cancer. Data from Fujian Normal University Provide New Insights into Gastric Cancer (Real–time optical diagnosis of gastric cancer with serosal invasion using multiphoton imaging) ... p.828

Aortic Dissection. Data from Fujita Health University Provide New Insights into Aortic Dissection (Early and Late Outcomes of Surgical Repair for Stanford A Acute Aortic Dissection in Octogenarians) ... p.829
Drugs and Therapies - Toxicology and Pharmacology. Data from Gradient Advance Knowledge in Toxicology and Pharmacology (Weight–of–evidence evaluation of associations between particulate matter exposure and biomarkers of lung cancer) … p.830

Lymphadenopathy. Data from H.L. Gaddey et al Provide New Insights into Lymphadenopathy (Unexplained Lymphadenopathy: Evaluation and Differential Diagnosis) … p.831

Lung Diseases and Conditions - Interstitial Lung Disease. Data from Hannover School of Medicine Provide New Insights into Interstitial Lung Disease (Pulmonary Hypertension in Patients with Chronic Fibrosing Idiopathic Interstitial Pneumonias) … p.831

Cardiovascular Research. Data from Harvard School of Medicine Provide New Insights into Cardiovascular Research (The association of lean and fat mass with all–cause mortality in older adults: The Cardiovascular Health Study) … p.833

Adenocarcinomas. Data from Hebei Medical University Provide New Insights into Adenocarcinomas (Decreased Expression and Frequent Promoter Hypermethylation of RASSF2 and RASSF6 Correlate With Malignant Progression and Poor Prognosis of Gastric Cardia …) … p.835

Oncology - Carcinomas. Data from Hebei Medical University Provide New Insights into Carcinomas (Enhancement of Drug Sensitivity by Knockdown of HIF–1α in Gastric Carcinoma Cells) … p.836

Musculoskeletal Diseases and Conditions - Osteoporosis. Data from Helen Hayes Hospital Provide New Insights into Osteoporosis (A Longitudinal Study of Skeletal Histomorphometry at 6 and 24 Months Across Four Bone Envelopes in Postmenopausal Women With Osteoporosis Receiving Teriparatide or …) … p.837

Nephrology. Data from Huazhong University of Science and Technology Advance Knowledge in Nephrology (Blocking protein phosphatase 2A signaling prevents endothelial–to–mesenchymal transition and renal fibrosis: a peptide–based drug therapy) … p.838

Cardiology. Data from Institute of Anesthesiology Advance Knowledge in Cardiology (Evaluation of a New Sonoclot Device for Heparin Management in Cardiac Surgery) … p.839

Heart Disorders and Diseases - Heart Failure. Data from Institute of Environmental Medicine Advance Knowledge in Heart Failure (Adherence to a Mediterranean diet is associated with reduced risk of heart failure in men) … p.840

Heart Disorders and Diseases - Atrial Fibrillation. Data from Jagiellonian University Provide New Insights into Atrial Fibrillation (A comparison of minimally invasive and standard aortic valve replacement) … p.841

Oncology - Gastric Cancer. Data from Jilin University Advance Knowledge in Gastric Cancer [microRNA–520f suppresses growth of gastric carcinoma cells by target ATPase family AAA domain–containing protein 2 (ATAD2)] … p.842

Pharmacokinetics. Data from Jilin University Advance Knowledge in Pharmacokinetics (Simultaneous Determination of Formononetin, Calycosin and Rhamnocitrin from Astragalus Complanatus by UHPLC–MS–MS in Rat Plasma:
January 14, 2017

Application to a Pharmacokinetic Study) … p.843

Drugs and Therapies - Small Molecule Inhibitors. Data from Johns Hopkins University Advance Knowledge in Small Molecule Inhibitors (Small Molecule Inhibitor of NRF2 Selectively Intervenes Therapeutic Resistance in KEAP1–Deficient NSCLC Tumors) … p.844

Biogenic Amines. Data from Kameda Medical Center Provide New Insights into Biogenic Amines (Moderate vasomotor response to acetylcholine provocation test as an indicator of long–term prognosis) … p.845

Hematologic Diseases and Conditions - Anemia. Data from Kaohsiung Medical University Advance Knowledge in Anemia (Protective effects of the roots of Angelica sinensis on strenuous exercise–induced sports anemia in rats) … p.846

Nephrology. Data from Keimyung University Provide New Insights into Nephrology (Fyn deficiency attenuates renal fibrosis by inhibition of phospho–STAT3) … p.847

Developmental Diseases and Conditions - Intellectual Disability. Data from King Abdul–Aziz University Provide New Insights into Intellectual Disability (A novel mutation in PGAP2 gene causes developmental delay, intellectual disability, epilepsy and microcephaly in consanguineous Saudi family) … p.848

Life Science Research. Data from King's College Provide New Insights into Life Science Research (The Association between Chronic Widespread Musculoskeletal Pain, Depression and Fatigue Is Genetically Mediated) … p.849

Heart Disorders and Diseases - Heart Failure. Data from Kyushu University Provide New Insights into Heart Failure (Deep and future insights into neuromodulation therapies for heart failure) … p.850

Connective Tissue Diseases and Conditions - Ehlers-Danlos Syndrome. Data from L. Mackenroth and Colleagues Advance Knowledge in Ehlers–Danlos Syndrome (An overlapping phenotype of Osteogenesis imperfecta and Ehlers–Danlos syndrome due to a heterozygous missense mutation in COL1A1 and biallelic missense variants in TNXB ...) … p.851

Gram-Negative Bacteria - Citrobacter freundii. Data from Laval University Advance Knowledge in Citrobacter freundii [Genome and Plasmid Analysis of bla(IMP–4)–Carrying Citrobacter freundii B38] … p.853

Drugs and Therapies - Imidazole Therapy. Data from Loma Linda University School of Medicine Provide New Insights into Imidazole Therapy (Flavonol and imidazole derivatives block HPV16 E6 activities and reactivate apoptotic pathways in HPV&#8314;cells) … p.854

Non-Steroidal Anti-Inflammatory Agents. Data from M. Mezzelani and Colleagues Advance Knowledge in Non–Steroidal Anti–Inflammatory Agents [Transcriptional and cellular effects of Non–Steroidal Anti–Inflammatory Drugs (NSAIDs) in experimentally exposed mussels, Mytilus ...] … p.855
Oncology - Colon Cancer. Data from Masaryk University Provide New Insights into Colon Cancer (Activation of autophagy and PPAR gamma protect colon cancer cells against apoptosis induced by interactive effects of butyrate and DHA in a cell type–dependent manner: The ...) … p.856

Congenital Diseases and Conditions - Congenital Heart Disease. Data from Medical College of Wisconsin Provide New Insights into Congenital Heart Disease (Impact of MYH6 variants in hypoplastic left heart syndrome) … p.857

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data from Mexican Institute of Social Security Advance Knowledge in Type 2 Diabetes (Adaptation and validation of the Distress Scale for Mexican patients with type 2 diabetes and hypertension: a cross–sectional survey) … p.858

Drugs and Therapies - Cancer Therapy. Data from NN Blokhin Russian Cancer Research Center Advance Knowledge in Cancer Therapy (Discovery of Compound A—a selective activator of the glucocorticoid receptor with anti–inflammatory and anti–cancer activity) … p.859

Drugs and Therapies - Genitourinary Tract Agents. Data from National Autonomous University Advance Knowledge in Genitourinary Tract Agents (The potential role of serotonergic mechanisms in the spinal oxytocin–induced antinociception) … p.860

Liver Diseases and Conditions - Hepatitis. Data from National Chiao Tung University Advance Knowledge in Hepatitis (DeF–GPU: Efficient and effective deletions finding in hepatitis B viral genomic DNA using a GPU architecture) … p.861

Ebola Virus. Data from National Institutes of Health Advance Knowledge in Ebola Virus (FAM134B, the Selective Autophagy Receptor for Endoplasmic Reticulum Turnover, Inhibits Replication of Ebola Virus Strains Makona and Mayinga) … p.863

Penile Diseases and Conditions - Priapism. Data from Near East University Advance Knowledge in Priapism (Autologous blood clot embolisation in posttraumatic high–flow priapism) … p.864

Oncology - Colon Cancer. Data from Northwestern University Advance Knowledge in Colon Cancer (New Developments in Interventional Oncology Liver Metastases From Colorectal Cancer) … p.864

Oncology - Bladder Cancer. Data from Nottingham University Hospital NHS Trust Provide New Insights into Bladder Cancer (Closing the Gender Gap: Can We Improve Bladder Cancer Survival in Women? – A Systematic Review of Diagnosis, Treatment and Outcomes) … p.865

Oncology - Non-Small Cell Lung Cancer. Data from Okayama University Hospital Provide New Insights into Non–Small Cell Lung Cancer (Induction S–1 +Concurrent Radiotherapy Followed by Surgical Resection of Locally Advanced Non–small–cell Lung Cancer in an Elderly Patient) … p.866

Oncology. Data from P.J. Pitts et al Provide New Insights into Oncology (21st century pharmacovigilance: efforts, roles, and responsibilities) … p.867

January 14, 2017

Bioscience. Data from Queensland University of Technology Advance Knowledge in Bioscience (Advancing student nurse knowledge of the biomedical sciences: A mixed methods study) … p.869

Drugs and Therapies - Immunotherapy. Data from R. Rosell et al Provide New Insights into Immunotherapy (Pathway Targeted Immunotherapy: Rationale and Evidence of Durable Clinical Responses with a Novel, EGF-directed Agent for Advanced NSCLC) … p.870

Pharmacokinetics. Data from R.H. Budhraja et al Provide New Insights into Pharmacokinetics (LC–MS/MS Validation Analysis of Trastuzumab Using dSIL Approach for Evaluating Pharmacokinetics) … p.871

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Data from Radboud University Provide New Insights into Type 1 Diabetes Mellitus (Enterovirus Exposure Uniquely Discriminates Type 1 Diabetes Patients with a Homozygous from a Heterozygous Melanoma Differentiation–Associated Protein 5/Interferon ...) … p.872

Drugs and Therapies - Cysteamine Therapy. Data from Rhodes University Provide New Insights into Cysteamine Therapy [Photophysicochemical properties of nanoconjugates of zinc(II) 2(3)–mono–2–(4–oxy)phenoxy)acetic acid phthalocyanine with cysteamine capped silver and silver–gold ...] … p.873

Drugs and Therapies - Antifungals. Data from S.E. Morales–Lopez et al Provide New Insights into Antifungals (Candida glabrata species complex prevalence and antifungal susceptibility testing in a culture collection: First description of Candida nivariensis in Argentina) … p.874

www.NewsRx.com

Human Herpesvirus Diseases and Conditions - Human Herpesvirus 8. Data from Saitama Medical University Provide New Insights into Human Herpesvirus 8 (Clinical response to liposomal doxorubicin and rituximab in HHV–8–associated multicentric Castleman's disease in an HIV–positive patient) … p.875

Oncology - Solid Cancer. Data from Sarah Cannon Research Institute Provide New Insights into Solid Cancer [A Phase I Study of the Cyclin–Dependent Kinase 4/6 Inhibitor Ribociclib (LEE011) in Patients with Advanced Solid Tumors and Lymphomas] … p.876

Membrane Proteins - Immunologic Receptors. Data from School of Biology Advance Knowledge in Immunologic Receptors (Outside–in integrin signalling regulates haematopoietic stem cell function via Periostin–Itgav axis) … p.877

Aortic Stenosis. Data from School of Medicine Provide New Insights into Aortic Stenosis (Patient–defined goals for the treatment of severe aortic stenosis: a qualitative analysis) … p.878

Lung Diseases and Conditions - Pulmonary Tuberculosis. Data from School of Public Health Advance Knowledge in Pulmonary Tuberculosis (Adjuvant Efficacy of Nutrition Support During Pulmonary Tuberculosis Treating Course: Systematic Review and Meta–analysis) … p.879

Respiratory Tract Diseases and Conditions - Pleural Effusion. Data from Sichuan University Provide New Insights into Pleural Effusion (Primary Intestinal Lymphangiectasia Manifested as Unusual Edemas and Effusions: A Case Report) … p.880
January 14, 2017

Minerals. Data from South China University of Technology Provide New Insights into Minerals (Biofunctionalization of Selenium Nanoparticle with Dictyophora Indusiata Polysaccharide and Its Antiproliferative Activity through Death–Receptor and ...) ... p.881

Mental Health Diseases and Conditions - Bipolar Disorders. Data from Stanford University Advance Knowledge in Bipolar Disorders (Long–term safety and tolerability of asenapine: A double–blind, uncontrolled, long–term extension trial in adults with an acute manic or mixed episode associated with bipolar ...) ... p.882

Macrolides. Data from State University Advance Knowledge in Macrolides (Synergistic effect of pedalitin and amphotericin B against Cryptococcus neoformans by in vitro and in vivo evaluation) ... p.883

Immune System Diseases and Conditions - Hypersensitivity. Data from Sun Yat Sen University Provide New Insights into Hypersensitivity (Serum IFN–gamma–inducible chemokines CXCL9 and CXCL10 are elevated in non–immediate drug hypersensitivity reactions) ... p.885

Drugs and Therapies - Radiation Therapy. Data from Sunnybrook Health Sciences Center Provide New Insights into Radiation Therapy (Implementation of a volumetric modulated arc therapy treatment planning solution for kidney and adrenal stereotactic body radiation therapy) ... p.886

Biomedical Engineering - Tissue Engineering. Data from Tabriz University of Medical Sciences Advance Knowledge in Tissue Engineering (Bacterial–derived biopolymers: Advanced natural nanomaterials for drug delivery and tissue engineering) ... p.887

Peptides - Cyclic Peptides. Data from Tehran University of Medical Sciences Provide New Insights into Cyclic Peptides (Inhibition of Octreotide Acylation Inside PLGA Microspheres by Derivatization of the Amines of the Peptide with a Self–Immolative Protecting Group) ... p.888

Oncology - Cholangiocarcinoma. Data from Third Military Medical University Advance Knowledge in Cholangiocarcinoma [A polysaccharide from Pinellia ternata inhibits cell proliferation and metastasis in human cholangiocarcinoma cells by targeting of Cdc42 and 67 kDa Laminin ...] ... p.889

Mosquito-Borne Diseases - Malaria. Data from Tomsk State University Advance Knowledge in Malaria [On the ecology and range of Anopheles beklemishevi (Diptera: Culicidae) with reference to the taxonomy of An. lewisi] ... p.890

Nephrology. Data from University Hospital Provide New Insights into Nephrology (The Microphthalmia–Associated Transcription Factor p.E318K Mutation Does Not Play a Major Role in Sporadic Renal Cell Tumors from Caucasian Patients) ... p.891

Lung Diseases and Conditions - Acute Lung Injury. Data from University of Alabama Provide New Insights into Acute Lung Injury (Protective effect of suppressing STAT3 activity in LPS–induced acute lung injury) ... p.892

Biotechnology. Data from University of Alabama Provide New Insights into Biotechnology (Evaluating the toxicity of bDtBPP on CHO–K1 cells for testing of single–use bioprocessing systems considering media selection, cell culture volume, mixing, and exposure ...) ... p.893
Eye Diseases and Conditions - Retinal Vein Occlusion. Data from University of Alexandria Provide New Insights into Retinal Vein Occlusion (Central retinal vein occlusion: modifying current treatment protocols) … p.894

Drugs and Therapies - Antifungals. Data from University of Athens Provide New Insights into Antifungals (In vitro evaluation of the impact of gastrointestinal transfer on luminal performance of commercially available products of posaconazole and itraconazole using BioGIT) … p.895

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. Data from University of Bologna Provide New Insights into Antineoplastic Monoclonal Antibodies (Low-dose radiotherapy and concurrent FOLFIRI–bevacizumab: a Phase II study) … p.896

Oncology - Breast Cancer. Data from University of British Columbia Provide New Insights into Breast Cancer (Differentiating the Causes of Spontaneous Rib Fracture After Breast Cancer) … p.897

Intracellular Space. Data from University of Calgary Advance Knowledge in Intracellular Space (The Cytoplasmic Region of Inner Helix S6 Is an Important Determinant of Cardiac Ryanodine Receptor Channel Gating) … p.898

Nutritional and Metabolic Diseases and Conditions - Hypercalcemia. Data from University of California Advance Knowledge in Hypercalcemia (A Young Woman With Recurrent Gestational Hypercalcemia and Acute Pancreatitis Caused by CYP24A1 Deficiency) … p.899

Diet and Nutrition. Data from University of Coimbra Provide New Insights into Diet and Nutrition (Ketogenic diets: from cancer to mitochondrial diseases and beyond) … p.900

Oncology - Thyroid Cancer. Data from University of Edinburgh Advance Knowledge in Thyroid Cancer (Management of Invasive Differentiated Thyroid Cancer) … p.901

Gram-Positive Bacteria - Staphylococcus aureus. Data from University of Edinburgh Provide New Insights into Staphylococcus aureus (IL–1 beta–Induced Protection of Keratinocytes against Staphylococcus aureus–Secreted Proteases Is Mediated by Human beta–Defensin 2) … p.902

Microcirculation. Data from University of Illinois Advance Knowledge in Microcirculation (The capillary bed offers the largest hemodynamic resistance to the cortical blood supply) … p.903

Biotechnology - Molecular Pharmaceutics. Data from University of Innsbruck Provide New Insights into Molecular Pharmaceutics (Structural Properties, Order–Disorder Phenomena, and Phase Stability of Orotic Acid Crystal Forms) … p.904

Nutritional and Metabolic Diseases and Conditions - Obesity. Data from University of Kebangsaan Advance Knowledge in Obesity (Tumour biology of obesity–related cancers: understanding the molecular concept for better diagnosis and treatment) … p.905

Cardiology. Data from University of Kentucky Provide New Insights into Cardiology (Coronary artery calcification in CKD–5D patients is tied to adverse cardiac function and increased mortality) … p.906

Oncology - Solid Cancer. Data from University of Lodz Advance Knowledge in Solid Cancer (Identification of the key pathway of oxazolinoanthracyclines mechanism of action in cells derived from human solid tumors) … p.907
Musculoskeletal Diseases and Conditions
- Chronic Pain. Data from University of Miami Provide New Insights into Chronic Pain (Analgesic Effect of Recombinant GABAergic Cells in a Model of Peripheral Neuropathic Pain) … p.908

Nervous System Diseases and Conditions
- Nervous System Paraneoplastic Syndrome. Data from University of Michigan Advance Knowledge in Nervous System Paraneoplastic Syndrome (Opsoclonus–Myoclonus Syndrome in Primary Central Nervous System Lymphoma) … p.909

Drugs and Therapies - Central Nervous System Agents. Data from University of Michigan School of Medicine Advance Knowledge in Central Nervous System Agents (Effects of sex and remifentanil dose on rats’ acquisition of responding for a remifentanil–conditioned reinforcer) … p.910

Gram-Negative Bacteria - Escherichia coli. Data from University of Milan Advance Knowledge in Escherichia coli [Interplay of the modified nucleotide phosphoadenosine 5′–phosphosulfate (PAPS) with global regulatory proteins in Escherichia coli: modulation of cyclic AMP (cAMP)–dependent …] … p.911

Uterine Diseases and Conditions - Uterine Prolapse. Data from University of Naples Federico II Provide New Insights into Uterine Prolapse (Recurrence of vaginal prolapse after total vaginal hysterectomy with concurrent vaginal uterosacral ligament suspension: comparison between normal–weight and …) … p.912

Oncology - Soft Tissue Sarcomas. Data from University of New South Wales Advance Knowledge in Soft Tissue Sarcomas (Overcoming resistance of targeted EGFR monotherapy by inhibition of STAT3 escape pathway in soft tissue sarcoma) … p.913

www.NewsRx.com

Clinical Research - Clinical Trials and Studies. Data from University of Queensland Advance Knowledge in Clinical Trials and Studies (Educational interventions for the management of cancer–related fatigue in adults) … p.914

Oncology - Cervical Cancer. Data from University of Texas Advance Knowledge in Cervical Cancer (Patterns of recurrence and survival in neuroendocrine cervical cancer) … p.917

Eye Research - Experimental Eye Research. Data from University of Texas Southwestern Advance Knowledge in Experimental Eye Research (Mapping wild–type and R345W fibulin–3 intracellular interactomes) … p.918

Lupus. Data from University of Tokyo Provide New Insights into Lupus (Egr2 and Egr3 in regulatory T cells cooperatively control systemic autoimmunity through Ltbpc3–mediated TGF–beta 3 production) … p.919

Oncology - Vestibular Schwannoma. Data from University of Virginia Advance Knowledge in Vestibular Schwannoma (Unilateral vestibular schwannoma in a patient with schwannomatosis in the absence of LZTR1 mutation) … p.921

Oncology - Colon Cancer. Data from University of Virginia Provide New Insights into Colon Cancer [Oral perfluorooctane sulfonate (PFOS) lessens tumor development in the APC (min) mouse model of spontaneous familial adenomatous polyposis] … p.922
Gastroenterology - Colorectal Research. Data from University of Wisconsin Advance Knowledge in Colorectal Research [Indeterminate but Likely Unimportant Extracolonic Findings at Screening CT Colonography (C–RADS Category E3): Incidence and Outcomes Data From a Clinical Screening ...] ... p.923

Life Science Research - Genetics. Data from University of Wisconsin Advance Knowledge in Genetics (A Variable Genetic Architecture of Melanic Evolution in Drosophila melanogaster) ... p.924

Central Nervous System Diseases and Conditions - Meningeal Neoplasms. Data from Vrije University Provide New Insights into Meningeal Neoplasms (Meningiomas in three male–to–female transgender subjects using oestrogens/progestogens and review of the literature) ... p.925

Oncology - Esophageal Cancer. Data from Washington University Provide New Insights into Esophageal Cancer (Neoadjuvant Chemotherapy versus Chemoradiation Prior to Esophagectomy: Impact on Rate of Complete Pathologic Response and Survival in Esophageal Cancer Patients) ... p.926

Drugs and Therapies - Vancomycin Resistance. Data from Wayne State University Provide New Insights into Vancomycin Resistance (Postfumycin Enhances the Activity of Daptomycin against Vancomycin–Resistant Enterococci in an In Vitro Pharmacokinetic–Pharmacodynamic Model) ... p.927

Oncology - Non-Small-Cell Lung Cancer. Data from X.M. Yu and Colleagues Advance Knowledge in Non–Small–Cell Lung Cancer (Cell–Free RNA Content in Peripheral Blood as Potential Biomarkers for Detecting Circulating Tumor Cells in Non–Small Cell Lung Carcinoma) ... p.928

Liver Diseases and Conditions - Hepatomas. Data from Xinjiang Technical Institute of Physics and Chemistry Advance Knowledge in Hepatomas (MiR–107 suppresses proliferation of hepatoma cells through targeting HMGA2 mRNA 3 ′ UTR) ... p.929

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data from Zagazig University Provide New Insights into Type 2 Diabetes (Combination of Sitagliptin and Insulin against Type 2 Diabetes Mellitus with Neuropathy in Rats: Neuroprotection and Role of Oxidative and Inflammation Stress) ... p.930

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Data on Abdominal Aortic Aneurysm Discussed by Researchers at University of Turin (Acute kidney injury after open and endovascular elective repair for infrarenal abdominal aortic aneurysms) ... p.931

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Data on Abdominal Aortic Aneurysm Reported by Researchers at Galway–Mayo Institute of Technology (A computational assessment of the hemodynamic effects of crossed and non–crossed bifurcated stent–graft devices for the treatment of abdominal ...) ... p.932

Drugs and Therapies - Acetaminophen Therapy. Data on Acetaminophen Therapy Described by Researchers at Virginia Commonwealth University (Severe necrosis of the palate and nasal septum resulting from intranasal abuse of acetaminophen) ... p.933

Gastroenterology - Achalasia. Data on Achalasia Described by Researchers at Washington University (The learning curve for interpretation of oesophageal high–resolution manometry: a prospective interventional cohort study) ... p.934
Heart Disorders and Diseases - Acute Coronary Syndrome. Data on Acute Coronary Syndrome Detailed by Researchers at Geisinger Medical Center (Thrombus aspiration: Suck it up and keep looking for a niche) ... p.935

Oncology - Acute Myeloid Leukemia. Data on Acute Myeloid Leukemia Detailed by Researchers at Columbia University (DNMT3A mutations promote anthracycline resistance in acute myeloid leukemia via impaired nucleosome remodeling) ... p.936

Oncology - Acute Myeloid Leukemia. Data on Acute Myeloid Leukemia Reported by Researchers at University Hospital (T–lymphoid progenitors – we know what they are, but know not what they may be) ... p.937

Drugs and Therapies - Adrenal Cortical Steroids. Data on Adrenal Cortical Steroids Described by Researchers at Sichuan University (LHD–Modified Mechanism–Based Liposome Coencapsulation of Mitoxantrone and Prednisolone Using Novel Lipid Bilayer Fusion for Tissue–Specific Colocalization and ...) ... p.938

Eye Diseases and Conditions - Age-Related Macular Degeneration. Data on Age–Related Macular Degeneration Detailed by Researchers at National Institutes of Health (Longitudinal Structural Changes In Late–onset Retinal Degeneration) ... p.939

Enzymes and Coenzymes - Alcohol Oxidoreductases. Data on Alcohol Oxidoreductases Described by Researchers at Department of Pharmaceutical Chemistry [Development of 2–(Substituted Benzylamino)–4–Methyl–1, 3–Thiazole–5–Carboxylic Acid Derivatives as Xanthine Oxidase Inhibitors and Free Radical ...] ... p.940

Immune System Diseases and Conditions - Allergies. Data on Allergies Described by Researchers at Odense University Hospital (SQ grass sublingual allergy immunotherapy tablet for disease–modifying treatment of grass pollen allergic rhinoconjunctivitis) ... p.941

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Data on Alzheimer Disease Described by Researchers at University of South Carolina School of Medicine (Molecular Signaling Mechanisms of Natural and Synthetic Retinoids for Inhibition of Pathogenesis in Alzheimer's Disease) ... p.942

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Data on Alzheimer Disease Discussed by Researchers at University of Kentucky (Differential Effects of Structural Modifications on the Competition of Chalcones for the PIB Amyloid Imaging Ligand–Binding Site in Alzheimer's Disease Brain and ...) ... p.943

Enzymes and Coenzymes - Amidohydrolases. Data on Amidohydrolases Discussed by Researchers at Kirchberg Hospital [Natural Compound Histone Deacetylase Inhibitors (HDACi): Synergy with Inflammatory Signaling Pathway Modulators and Clinical Applications in Cancer] ... p.944

Amino Acids. Data on Amino Acids Reported by Researchers at Fred Hutchinson Cancer Research Center (Quantitative Method to Investigate the Balance between Metabolism and Proteome Biomass: Starting from Glycine) ... p.945

Drugs and Therapies - Ampicillins. Data on Ampicillins Detailed by Researchers at China University of Science and Technology (Facile synthesis of Ag/Ag3PO4/AMB composite with improved photocatalytic performance)
January 14, 2017

Amyotrophic Lateral Sclerosis. Data on Amyotrophic Lateral Sclerosis Reported by Researchers at Cedars–Sinai Medical Center (A model of recurrent concussion that leads to long-term motor deficits, CTE–like tauopathy and exacerbation of an ALS phenotype) … p.947

Hematologic Diseases and Conditions - Anemia. Data on Anemia Detailed by Researchers at University Hospital (Fetal Intra–Peritoneal Transfusion for the Management of Very Early Spontaneous Twin Anemia–Polycythemia Sequence in an Obese Patient With a Whole Anterior Placenta) … p.948

Hematologic Diseases and Conditions - Anemia. Data on Anemia Discussed by Researchers at Yang Ming National University (What Constitutes Normal Hemoglobin Concentrations in Community–Dwelling Older Adults?) … p.949

Anesthesia. Data on Anesthesia Discussed by Researchers at Copenhagen University Hospital (Lack of national consensus in preoperative airway assessment) … p.951

Angiography. Data on Angiography Reported by Researchers at University of Texas Southwestern Medical Center (Noninvasive intraoperative angiography for reconstruction of head and neck defects) … p.952

Ankylosing Spondylitis. Data on Ankylosing Spondylitis Discussed by Researchers at University Health Network (IL–7 primes IL–17 in mucosal–associated invariant T (MAIT) cells, which contribute to the Th17–axis in ankylosing spondylitis) … p.953

Drugs and Therapies - Antibiotics. Data on Antibiotics Described by Researchers at University of Manitoba (The Cardioprotective Role of N–Acetyl Cysteine Amide in the Prevention of Doxorubicin and Trastuzumab–Mediated Cardiac Dysfunction) … p.954

Drugs and Therapies - Antibiotics. Data on Antibiotics Detailed by Researchers at sojo University (Pronounced Cellular Uptake of Pirarubicin versus That of Other Anthracyclines: Comparison of HPMA Copolymer Conjugates of Pirarubicin and Doxorubicin) … p.955

Drugs and Therapies - Antibiotics. Data on Antibiotics Reported by Researchers at Technical University (Thioxylated cyclosporin A for studying protein–drug interactions) … p.956

Drugs and Therapies - Antibiotics. Data on Antibiotics Reported by Researchers at Vanderbilt University (Contribution of Organic Anion–Transporting Polypeptides 1A/1B to Doxorubicin Uptake and Clearance) … p.957

Drugs and Therapies - Antifungals. Data on Antifungals Reported by Researchers at Federal University (Miltefosine inhibits Candida albicans and non–albicans Candida spp. biofilms and impairs the dispersion of infectious cells) … p.958

Drugs and Therapies - Antifungals. Data on Antifungals Reported by Researchers at University of Science and Technology (Ketoconazole encapsulated in chitosan–gellan gum nanocomplexes exhibits prolonged antifungal activity) … p.959

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. Data on Antineoplastic Monoclonal Antibodies Detailed by Researchers at Children's Hospital (Ofatumumab in two pediatric nephrotic syndrome patients allergic to rituximab) … p.960
January 14, 2017

Antioxidants. Data on Antioxidants Reported by Researchers at School of Chemistry (Selective and Sensitive Monitoring of Cerebral Antioxidants Based on the Dye–Labeled DNA/Polydopamine Conjugates) … p.961

Drugs and Therapies - Antiretrovirals. Data on Antiretrovirals Reported by Researchers at University of Torino (Clinical pharmacology of tenofovir clearance: a pharmacokinetic/pharmacogenetic study on plasma and urines) … p.962

Drugs and Therapies - Antiretrovirals. Data on Antiretrovirals Reported by S. Llabres and Co–Researchers (Mechanism of the Pseudoirreversible Binding of Amantadine to the M2 Proton Channel) … p.963

Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Data on Arteriovenous Fistula Reported by Researchers at University of Alabama (Safety and Efficacy of En Bloc Renal Hilar Vascular Staple Ligation: A Meta–Analysis) … p.964

Musculoskeletal Diseases and Conditions - Arthralgia. Data on Arthralgia Reported by Researchers at Research Hospital (Alendronate– and risedronate–induced acute polyarthritis) … p.965

Biomedical Engineering - Artificial Saliva. Data on Artificial Saliva Reported by Researchers at University of Sindh (Vortex–assisted ionic liquid–based dispersive liquid–liquid microextraction for assessment of chromium species in artificial saliva extract of different chewing tobacco ...) … p.966

Cardiovascular Diseases and Conditions - Atherosclerosis. Data on Atherosclerosis Reported by Researchers at Albert Einstein Israelite Hospital (Epicardial fat is associated with severity of subclinical coronary atherosclerosis in familial hypercholesterolemia) … p.967

www.NewsRx.com

Skin Diseases and Conditions - Atopic Dermatitis. Data on Atopic Dermatitis Reported by Researchers at Central South University (The Genetics and Epigenetics of Atopic Dermatitis–Filaggrin and Other Polymorphisms) … p.969

Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Detailed by Researchers at AHEPA University Hospital (Left atrial appendage occlusion for stroke prevention in atrial fibrillation: multicentre experience with the AMPLATZER Cardiac Plug) … p.970

Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Detailed by Researchers at Fairleigh Dickinson University [Atrial Electrocardiography in Obesity and Hypertension: Clinical Insights from the Polish–Norwegian Study (PONS)] … p.971

Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Detailed by Researchers at Tomsk Polytechnic University (Assessment of radiological techniques application possibility for non–invasive diagnostics of latent inflammatory processes in myocardium in patients with ...) … p.972

Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Discussed by Researchers at Kanazawa University (Inflammation of left atrial epicardial adipose tissue is associated with paroxysmal atrial fibrillation) … p.973

Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Reported by Researchers at Tokyo Women's Medical University (Enlarged left atrium and sudden death risk in hypertrophic cardiomyopathy patients with or without atrial fibrillation) … p.974
Heart Disorders and Diseases - Atrial Fibrillation. Data on Atrial Fibrillation Reported by Researchers at Uppsala University (Performance and Validation of a Novel Biomarker–Based Stroke Risk Score for Atrial Fibrillation) … p.975

Aurothioglucose. Data on Aurothioglucose Reported by Researchers at Purdue University (Antibacterial activity and mechanism of action of auranofin against multi–drug resistant bacterial pathogens) … p.976

Biological Factors - Autacoids. Data on Autacoids Reported by Researchers at Center for Disease Control and Prevention (Drug interactions between hormonal contraceptives and psychotropic drugs: a systematic review) … p.977

Developmental Diseases and Conditions - Autism Spectrum Disorders. Data on Autism Spectrum Disorders Detailed by Researchers at St. Louis University School of Medicine (Therapeutic Effect of a Synthetic RORa/g Agonist in an Animal Model of Autism) … p.978

Autoimmune Diseases and Conditions. Data on Autoimmune Diseases and Conditions Described by Researchers at University of California (Germinal centers and autoimmune disease in humans and mice) … p.979

Oncology - B-Cell Lymphoma. Data on B–Cell Lymphoma Detailed by Researchers at Chinese Academy of Medical Sciences (Cerebrospinal Fluid IL–10 and IL–10/IL–6 as Accurate Diagnostic Biomarkers for Primary Central Nervous System Large B–cell Lymphoma) … p.980

Oncology - B-Cell Lymphoma. Data on B–Cell Lymphoma Detailed by Researchers at European Institute of Oncology (miR–17–92 fine–tunes MYC expression and function to ensure optimal B cell lymphoma growth) … p.981

www.NewsRx.com

Bicuspid Aortic Valves. Data on Bicuspid Aortic Valves Reported by Researchers at University of Birmingham (Hemodynamics through the congenitally bicuspid aortic valve: a computational fluid dynamics comparison of opening orifice area and leaflet orientation) … p.982

Biguanides. Data on Biguanides Reported by Researchers at Duke University (Metformin Targets Central Carbon Metabolism and Reveals Mitochondrial Requirements in Human Cancers) … p.983

Mental Health Diseases and Conditions - Bipolar Disorders. Data on Bipolar Disorders Detailed by Researchers at University of California (Factor analysis of temperament and personality traits in bipolar patients: Correlates with comorbidity and disorder severity) … p.984

Oncology - Bladder Cancer. Data on Bladder Cancer Detailed by Researchers at Affiliated Hospital (Bladder cancer cells re–educate TAMs through lactate shuttling in the microfluidic cancer microenvironment) … p.985

Oncology - Bladder Cancer. Data on Bladder Cancer Discussed by Researchers at Pennsylvania State University (FOXA1, GATA3 and PPAR gamma Cooperate to Drive Luminal Subtype in Bladder Cancer: A Molecular Analysis of Established Human Cell Lines) … p.986

Cell Research - Bone Marrow Cells. Data on Bone Marrow Cells Detailed by Researchers at Dana–Farber Cancer Institute (Variation in the use of granulocyte–colony stimulating factor for dose dense paclitaxel: A single institution retrospective study) … p.987
Heart Disorders and Diseases - Bradycardia. Data on Bradycardia Reported by Researchers at Johns Hopkins University (Bradycardia and hypotension after synthetic cannabinoid use: a case series) … p.988

Heart Disorders and Diseases - Bradycardia. Data on Bradycardia Reported by Researchers at Sheba Medical Center (The Utilization of an Insertable Cardiac Monitor in a Child With Pallid Breath–Holding Spells) … p.989

Central Nervous System Diseases and Conditions - Brain Neoplasms. Data on Brain Neoplasms Detailed by Researchers at Institute Rotary Cancer Hospital (Role of adjuvant radiation in the management of central neurocytoma: Experience from a tertiary cancer care center of India) … p.990

Oncology - Breast Cancer. Data on Breast Cancer Described by Researchers at Charles University (Characterization of acquired paclitaxel resistance of breast cancer cells and involvement of ABC transporters) … p.991

Oncology - Breast Cancer. Data on Breast Cancer Detailed by Researchers at Institute for Biology Research (ErbB–2 nuclear function in breast cancer growth, metastasis and resistance to therapy) … p.992

Oncology - Breast Cancer. Data on Breast Cancer Detailed by X.J. Huang and Co–Authors (High expressions of LDHA and AMPK as prognostic biomarkers for breast cancer) … p.993

Oncology - Breast Cancer. Data on Breast Cancer Discussed by Researchers at University of Turin (Predictive Diagnostic Pathology in the Target Therapy Era in Breast Cancer) … p.994

Oncology - Breast Cancer. Data on Breast Cancer Reported by Researchers at Tabriz University of Medical Sciences (Tumor microenvironment–mediated chemoresistance in breast cancer) … p.995

Oncology - Breast Cancer. Data on Breast Cancer Reported by Z. Yang and Colleagues (Downregulation of long non–coding RNA MALAT1 induces tumor progression of human breast cancer through regulating CCND1 expression) … p.996

Lung Diseases and Conditions - Bronchopulmonary Dysplasia. Data on Bronchopulmonary Dysplasia Reported by Researchers at Mercy Hospital for Women (BNP, troponin I, and YKL–40 as screening markers in extremely preterm infants at risk for pulmonary hypertension associated with bronchopulmonary dysplasia) … p.996

Dental Diseases and Conditions - Bruxism. Data on Bruxism Reported by Researchers at Federal University (Association between sleep bruxism and alcohol, caffeine, tobacco, and drug abuse A systematic review) … p.998

Oncology - Cancer Care. Data on Cancer Care Discussed by T. Cooksley and Colleagues (Emergency oncology: development, current position and future direction in the USA and UK) … p.999

Oncology - Cancer Risk. Data on Cancer Risk Described by Researchers at St. James University Hospital (Clinical relevance of endoscopic assessment of inflammation in ulcerative colitis: Can endoscopic evaluation predict outcomes?) … p.999

Oncology - Cancer Risk. Data on Cancer Risk Discussed by M. Ward and Colleagues (Genetic Testing After Previous BRCA Testing: A Case Study) … p.1000
January 14, 2017

Drugs and Therapies - Cancer Therapy. Data on Cancer Therapy Discussed by Researchers at Faculty of Pharmacy (Betulinic Acid: Recent Advances in Chemical Modifications, Effective Delivery, and Molecular Mechanisms of a Promising Anticancer Therapy) ... p.1001

Drugs and Therapies - Cancer Therapy. Data on Cancer Therapy Reported by Researchers at Nanjing University [Paclitaxel-Loaded b-Cyclodextrin-Modified Poly(Acrylic Acid) Nanoparticles through Multivalent Inclusion for Anticancer Therapy] ... p.1002

Drugs and Therapies - Cancer Therapy. Data on Cancer Therapy Reported by Researchers at University of Washington (Preloading of Hydrophobic Anticancer Drug into Multifunctional Nanocarrier for Multimodal Imaging, NIR-Responsive Drug Release, and Synergistic Therapy) ... p.1003

Oncology - Carcinomas. Data on Carcinomas Discussed by Researchers at SDM College of Dental Sciences and Hospital (Carcinoma of buccal mucosa: A site specific clinical audit) ... p.1004

Oncology - Carcinomas. Data on Carcinomas Reported by Researchers at Chungbuk National University (Impact of Young Age at Diagnosis on Survival in Patients with Surgically Treated Renal Cell Carcinoma: A Multicenter Study) ... p.1005

Oncology - Carcinomas. Data on Carcinomas Reported by Researchers at Hannover Veterinary and Medical University (The effect of dichloroacetate in canine prostate adenocarcinomas and transitional cell carcinomas in vitro) ... p.1006

Drugs and Therapies - Cardiac Stressing Agents. Data on Cardiac Stressing Agents Discussed by Researchers at University of Cairo (y Simultaneous Determination of Aspirin, Dipyridamole and Two of Their Related Impurities in Capsules by Validated TLC–Densitometric and HPLC Methods) ... p.1007

Cardiology. Data on Cardiology Described by Researchers at Institute for Clinical Evaluative Sciences (Baseline risk has greater influence over behavioral attrition on the real–world clinical effectiveness of cardiac rehabilitation) ... p.1008

Cardiology. Data on Cardiology Discussed by Researchers at Wake Forest University (A TASER conducted electrical weapon with cardiac biomonitoring capability: Proof of concept and initial human trial) ... p.1009

Cardiology. Data on Cardiology Reported by Researchers at Cedars–Sinai Heart Institute (Cardiac magnetic resonance imaging for myocardial perfusion and diastolic function–reference control values for women) ... p.1010

Cardiology. Data on Cardiology Reported by Researchers at University of Wisconsin (Inhibition of late sodium current attenuates ionic arrhythmia mechanism in ventricular myocytes expressing LaminA–N195K mutation) ... p.1011

Heart Disorders and Diseases - Cardiomyopathies. Data on Cardiomyopathies Described by S.R. Roof et al (Insulin–like growth factor 1 prevents diastolic and systolic dysfunction associated with cardiomyopathy and preserves adrenergic sensitivity) ... p.1012

Heart Disorders and Diseases - Cardiomyopathies. Data on Cardiomyopathies Reported by Researchers at University of Naples Federico II (Functional Studies and In Silico Analyses to Evaluate Non–Coding Variants in Inherited Cardiomyopathies) ... p.1013
January 14, 2017

Drugs and Therapies - Cardiovascular Agents. Data on Cardiovascular Agents Reported by Researchers at Barnes–Jewish Hospital (Effects Of Ambulation And Nondependent Transfers On Vital Signs In Patients Receiving Norepinephrine) … p.1014

Cardiovascular Diseases. Data on Cardiovascular Diseases Described by Researchers at New York University (Recommendations for cardiovascular disease research with lesbian, gay and bisexual adults) … p.1015

Medical Imaging - Cardiovascular Imaging. Data on Cardiovascular Imaging Discussed by M.C. Turner and Colleagues (High–risk plaque in patients with near normal coronary angiograms) … p.1016

Cardiovascular Research. Data on Cardiovascular Research Detailed by Researchers at Federal University (Functional topography of cardiovascular regulation along the rostrocaudal axis of the rat posterior insular cortex) … p.1017

Cardiovascular Research. Data on Cardiovascular Research Detailed by Researchers at University of Ontario [The Science of Salt: A Regularly Updated Systematic Review of Salt and Health Outcomes (August to November 2015)] … p.1018

Life Science Research - Cell Biology. Data on Cell Biology Detailed by Researchers at University of California (The Hippo Pathway Kinases LATS1/2 Suppress Cancer Immunity) … p.1019

Cell Differentiation. Data on Cell Differentiation Discussed by Researchers at Ningbo University (Characterization of microRNAs by deep sequencing in red claw crayfish Cherax quadricarinatus haematopoietic tissue cells after white spot syndrome virus infection) … p.1020

www.NewsRx.com

Cell Proliferation. Data on Cell Proliferation Reported by Researchers at Indiana University School of Medicine (Critical role of PPARg in myeloid–derived suppressor cell–stimulated cancer cell proliferation and metastasis) … p.1021

Science - Cell Science. Data on Cell Science Discussed by Researchers at European Molecular Biology Laboratory (PRL–3 disrupts epithelial architecture by altering the post–mitotic midbody position) … p.1022

Drugs and Therapies - Chemical Biology and Drug Design. Data on Chemical Biology and Drug Design Detailed by Researchers at School of Pharmaceutical Science (Synthesis and Evaluation of Biological and Antitumor Activities of Tetrahydrobenzothieno [2,3–d]Pyrimidine Derivatives as Novel Inhibitors of ...) … p.1025

Drugs and Therapies - Chemical Biology and Drug Design. Data on Chemical Biology and Drug Design Reported by Researchers at A.E. Arbuzov Institute of Organic and Physical Chemistry (Synthesis of New 'Hybrid' Compounds Based on Benzofuroxans and Aminoalkynaphthalamides) … p.1026
Drugs and Therapies - Chemotherapy.
Data on Chemotherapy Described by Researchers at Flinders University
(Motility patterns in mouse colon: gastrointestinal dysfunction induced by anticancer chemotherapy) ... p.1027

Drugs and Therapies - Chemotherapy.
Data on Chemotherapy Reported by Researchers at Department of Hematology (A preclinical acute GVHD mouse model based on chemotherapy conditioning and MHC–matched transplantation) ... p.1028

Chromosome Structures. Data on Chromosome Structures Described by Researchers at Kumamoto University
[HDAC9 regulates the alternative lengthening of telomere (ALT) pathway via the formation of ALT–associated PML bodies] ... p.1029

Oncology - Chronic Myeloid Leukemia. Data on Chronic Myeloid Leukemia Reported by A. Gratwohl and Co–Researchers (Long–term outcome of patients with newly diagnosed chronic myeloid leukemia: a randomized comparison of stem cell transplantation with drug treatment) ... p.1030

Clinical Research - Clinical Trials and Studies. Data on Clinical Trials and Studies Described by L.L. Winkler et al
(Substituting sugar confectionery with fruit and healthy snacks at checkout – a win–win strategy for consumers and food stores? a study on consumer attitudes and sales effects ...) ... p.1031

Clinical Research - Clinical Trials and Studies. Data on Clinical Trials and Studies Described by Researchers at Chung Ang University Hospital
(Comparative study of the effects of bupropion and escitalopram on Internet gaming disorder) ... p.1032

Clinical Research - Clinical Trials and Studies. Data on Clinical Trials and Studies Described by Researchers at University of Leipzig
(Standardising analgesic administration for nurses: a prospective intervention study) ... p.1033

Clinical Research - Clinical Trials and Studies. Data on Clinical Trials and Studies Reported by Researchers at University of Paris
(Randomized controlled trial of the NS5A inhibitor daclatasvir plus pegylated interferon and ribavirin for HCV genotype–4
(COMMAND–4)) ... p.1034

Clinical Research - Clinical Trials and Studies. Data on Clinical Trials and Studies Reported by Researchers at University of Texas
(Incidence of Atypical Femur Fractures in Cancer Patients: The MD Anderson Cancer Center Experience) ... p.1035

Drugs and Therapies - Coagulation Modifiers. Data on Coagulation Modifiers Detailed by Researchers at Seoul National University
(End–Site–Specific Conjugation of Enoxaparin and Tetradecahydrate Acid Using Nonenzymatic Glycosylation for Oral Delivery) ... p.1036

Oncology - Colon Cancer. Data on Colon Cancer Detailed by Researchers at Fujian Medical University
(Overexpression of KISS–1 reduces colorectal cancer cell invasion by downregulating MMP–9 via blocking PI3K/Akt/NF–kB signal pathway) ... p.1037

Oncology - Colon Cancer. Data on Colon Cancer Reported by Researchers at China Medical University and Hospital
(Dysregulation of MicroRNA–543 expression in colorectal cancer promotes tumor migration and invasion) ... p.1038
January 14, 2017

Congenital Diseases and Conditions -
Congenital Heart Disease. Data on
Congenital Heart Disease Described by
Researchers at Cleveland Clinic (Use of
dofetilide in adult patients with atrial
arrhythmias and congenital heart
disease: A PACES collaborative study) … p.1039

Intracellular Signaling Peptides and
Proteins - Cyclin G. Data on Cyclin G
Reported by Researchers at Osaka
University (Comprehensive phenotypic
analysis of knockout mice deficient in
cyclin G1 and cyclin G2) … p.1040

Enzymes and Coenzymes - Cysteine
Endopeptidases. Data on Cysteine
Endopeptidases Reported by
Researchers at RIKEN (Calpain
research for drug discovery: challenges
and potential) … p.1041

Cystic Fibrosis. Data on Cystic Fibrosis
Reported by Researchers at School of
Medicine (Molecular Epidemiology of
Mutations in Antimicrobial Resistance
Loci of Pseudomonas aeruginosa
Isolates from Airways of Cystic Fibrosis
Patients) … p.1042

Herpesvirus Diseases and Conditions -
Cytomegalovirus. Data on
Cytomegalovirus Reported by B.
Pignoloni and Co–Researchers (Distinct
Roles for Human Cytomegalovirus
Immediate Early Proteins IE1 and IE2 in
the Transcriptional Regulation of MICA
and PVR/CD155 Expression) … p.1043

Cytoplasmic Vesicles. Data on Cytoplasmic
Vesicles Detailed by Researchers at
China University of Science and
Technology (Giant Cellular Vacuoles
Induced by Rare Earth Oxide
Nanoparticles are Abnormally Enlarged
Endo/Lysosomes and Promote
mTOR–Dependent TFEB Nucleus ...) … p.1044

DNA Research. Data on DNA Research
Reported by Researchers at Seoul
National University [BioVLAB–mCpG–SNP–EXPRESS: A
system for multi–level and multi
perspective analysis and exploration of
DNA methylation, sequence variation
(SNPs), and gene expression from ...) … p.1045

Proteins - DNA-Binding Proteins. Data on
DNA–Binding Proteins Described by
Researchers at Jiangsu Province
Academy of Traditional Chinese
Medicine (Icariside II inhibits the EMT of
NSCLC cells in inflammatory
microenvironment via down–regulation
of Akt/NF–kappa B signaling ...) … p.1046

Neurodegenerative Diseases and
Conditions - Dementia. Data on
Dementia Reported by Researchers at
Tokyo Women's Medical University
(Serum high–molecular–weight
adiponectin level and incident dementia
in patients with vascular risk factors) … p.1047

Diabetes. Data on Diabetes Described by
Researchers at Michigan State
University (Improving Coordination of
Care Among Healthcare Professionals
and Patients With Diabetes and Cancer)
… p.1048

Diabetes. Data on Diabetes Discussed by
Researchers at Niigata University of
Pharmacy and Applied Life Sciences
(Attenuation of Endoplasmic Reticulum
Stress–Mediated Liver Damage by
Mulberry Leaf Diet in
Streptozotocin–Induced Diabetic Rats)
… p.1049

Nutritional and Metabolic Diseases and
Conditions - Diabetes Mellitus. Data
on Diabetes Mellitus Discussed by
Researchers at Chinese University of
Hong Kong (Birth weight in live births
and stillbirths) … p.1050
Drugs and Therapies - Diclofenac Therapy. Data on Diclofenac Therapy Discussed by Researchers at Tsinghua University (Enhanced adsorption of diclofenac sodium on the carbon nanotubes–polytetrafluorethylene electrode and subsequent degradation by electro–peroxone treatment) ... p.1051

Disease Attributes - Disease Progression. Data on Disease Progression Discussed by C.B. Saw and Colleagues (Dose planning management of patients undergoing salvage whole brain radiation therapy after radiosurgery) ... p.1052

Digestive System Diseases and Conditions - Dysphagia. Data on Dysphagia Discussed by H. Larsson and Colleagues (Grade of eosinophilia versus symptoms in patients with dysphagia and esophageal eosinophilia) ... p.1053

Ebola Virus. Data on Ebola Virus Discussed by Researchers at Emory University (Implementation of an educational program for nursing students amidst the Ebola virus disease epidemic) ... p.1054

Biological Factors - Eicosanoids. Data on Eicosanoids Described by Researchers at Robert–Debre University Hospital (Cyclooxygenase–2–Derived Prostaglandins Mediate Cerebral Microcirculation in a Juvenile Ischemic Rat Model) ... p.1055

Embryo Transfer. Data on Embryo Transfer Reported by Researchers at Harvard School of Medicine (Building a model to increase live birth rate through patient–specific optimization of embryo transfer day) ... p.1056

Heart Disorders and Diseases - Endocarditis. Data on Endocarditis Reported by O. Kumpf and Co–Researchers (Rapid molecular diagnosis of infective aortic valve endocarditis caused by Coxiella burnetii) ... p.1057

Oncology - Endometrial Cancer. Data on Endometrial Cancer Discussed by Researchers at Eskisehir Osmangazi University (Ovarian endometrioid carcinoma with yolk sac tumor component in a postmenopausal woman) ... p.1058

Environmental Health - Environmental Research and Public Health. Data on Environmental Research and Public Health Reported by Researchers at Deakin University (Impact of an 8–Month Trial Using Height–Adjustable Desks on Children's Classroom Sitting Patterns and Markers of Cardio–Metabolic and Musculoskeletal ...) ... p.1059

Central Nervous System Diseases and Conditions - Epilepsy. Data on Epilepsy Described by Researchers at Monash University (Temporal patterns of epileptiform discharges in genetic generalized epilepsies) ... p.1060

Central Nervous System Diseases and Conditions - Epilepsy. Data on Epilepsy Discussed by Researchers at Temple University (Clinical features and postoperative seizure outcome in patients with drug–resistant gelastic seizures without hypothalamic hamartoma) ... p.1061

Gram–Negative Bacteria - Escherichia coli. Data on Escherichia coli Reported by Researchers at Nankai University (Directed Evolution of Dunaliella salina Ds–26–16 and Salt–Tolerant Response in Escherichia coli) ... p.1062

Essential Amino Acids. Data on Essential Amino Acids Described by Researchers at University of Kansas (Charge Type, Charge Spacing, and Hydrophobicity of Arginine–Rich Cell–Penetrating Peptides Dictate Gene Transfection) ... p.1063
January 14, 2017

Drugs and Therapies - Ethnopharmacology. Data on Ethnopharmacology Detailed by Researchers at University of Mauritius (A quantitative ethnobotanical survey of phytocosmetics used in the tropical island of Mauritius) … p.1064

Drugs and Therapies - Ethnopharmacology. Data on Ethnopharmacology Discussed by Researchers at Prince Songkla University (A survey of herbal weeds for treating skin disorders from Southern Thailand: Songkhla and Krabi Province) … p.1065

Enzymes and Coenzymes - Flavins. Data on Flavins Reported by Researchers at University of Central Florida (Gene bb0318 Is Critical for the Oxidative Stress Response and Infectivity of Borrelia burgdorferi) … p.1067

Digestive System Diseases and Conditions - Functional Dyspepsia. Data on Functional Dyspepsia Described by Researchers at Dongguk University Ilsan Hospital (Visceral adiposity is associated with an increased risk of functional dyspepsia) … p.1068

Fuzzy Logic. Data on Fuzzy Logic Discussed by Researchers at University of Coimbra (Automated fluence map optimization based on fuzzy inference systems) … p.1069

Membrane Proteins - G-Protein-Coupled Receptors. Data on G–Protein–Coupled Receptors Described by N.T Zaveri et al [Nociceptin Opioid Receptor (NOP) as a Therapeutic Target: Progress in Translation from Preclinical Research to Clinical Utility] … p.1070

Oncology - Gastric Cancer. Data on Gastric Cancer Reported by Researchers at Shanghai Jiao–Tong University (Bone marrow–derived mesenchymal stem cells increase drug resistance in CD133–expressing gastric cancer cells by regulating the PI3K/AKT pathway) … p.1071

Gastroenterology. Data on Gastroenterology Reported by Researchers at Cedars–Sinai Medical Center (Prohibitin 1 Regulates the H19–Igf2 Axis and Proliferation in Hepatocytes) … p.1072

Hormones - Gastrointestinal Hormones. Data on Gastrointestinal Hormones Discussed by Researchers at Uppsala University (PET imaging of epidermal growth factor receptor expression in tumours using 89Zr–labelled ZEGFR:2377 affibody molecules) … p.1074

Genetics. Data on Genetics Described by Researchers at National Cancer Center Research Institute (IER5 generates a novel hypo–phosphorylated active form of HSF1 and contributes to tumorigenesis) … p.1075

Oncology - Glioblastomas. Data on Glioblastomas Discussed by Researchers at Capital Medical University [LncRNA and mRNA expression profiles of glioblastoma multiforme (GBM) reveal the potential roles of lncRNAs in GBM pathogenesis] … p.1076

Oncology - Glioblastomas. Data on Glioblastomas Discussed by Researchers at Sungkyunkwan University (WNT signaling in glioblastoma and therapeutic opportunities) … p.1077

Gliosarcomas. Data on Gliosarcomas Reported by Researchers at All India Institute of Medical Sciences (Clinical outcome of patients with primary gliosarcoma treated with concomitant and adjuvant temozolomide: A single
www.NewsRx.com

Heart Disorders and Diseases - Heart Disease. Data on Heart Disease Discussed by Researchers at University of Amsterdam (Prenatal Undernutrition and Autonomic Function in Adulthood) … p.1085

Heart Disorders and Diseases - Heart Disease. Data on Heart Disease Reported by Researchers at University of New Mexico (Hyponatremia, Cognitive Function, and Mobility in an Outpatient Heart Failure Population) … p.1089

Heart Function Tests. Data on Heart Function Tests Detailed by Researchers at Medical University (Electrocardiography in Rats: a Comparison to Human) … p.1090

Gram-Negative Bacteria - Helicobacter pylori. Data on Helicobacter pylori Described by Researchers at Yonsei University (Activation of NF-κB and AP-1 Mediates Hyperproliferation by Inducing b-Catenin and c-Myc in Helicobacter pylori–Infected Gastric Epithelial Cells) … p.1091

Nervous System Diseases and Conditions - Headache and Migraine. Data on Headache and Migraine Reported by Researchers at University of Iowa (Higher augmentation index is associated with tension-type headache and migraine in middle-aged/older humans with obesity) … p.1082

Heart Disorders and Diseases - Heart Attack. Data on Heart Attack Discussed by Researchers at University of Amsterdam (Extracorporeal life support during cardiac arrest and cardiogenic shock: a systematic review and meta-analysis) … p.1083

Heart Disorders and Diseases - Heart Disease. Data on Heart Disease Described by Researchers at Tabriz University of Medical Sciences (Predictors of health-promoting behaviors in patients with coronary artery disease in the Iranian population) … p.1084

Immune System Diseases and Conditions - HIV/AIDS. Data on HIV/AIDS Reported by Researchers at University of Stellenbosch (Point–of–Care Cepheid Xpert HIV–1 Viral Load Test in Rural African Communities Is Feasible and Reliable) … p.1081

Heart Disorders and Diseases - Heart Failure. Data on Heart Failure Described by Researchers at University of Glasgow (The incremental prognostic and clinical value of multiple novel biomarkers in heart failure) … p.1087

Heart Disorders and Diseases - Heart Failure. Data on Heart Failure Reported by Researchers at University of New Mexico (Sleep–disordered breathing, impaired cardiac adrenergic innervation and prognosis in heart failure) … p.1088

Heart Disorders and Diseases - Heart Failure. Data on Heart Failure Reported by Researchers at University of Amsterdam (Extracorporeal life support during cardiac arrest and cardiogenic shock: a systematic review and meta–analysis) … p.1083

Heart Disorders and Diseases - Heart Failure. Data on Heart Failure Described by Researchers at University of Amsterdam (Prenatal Undernutrition and Autonomic Function in Adulthood) … p.1085

Heart Disorders and Diseases - Heart Disease. Data on Heart Disease Discussed by Researchers at Janssen Infectious Diseases–Diagnostics B.V.B.A. (Assessment of etravirine resistance in HIV–1–infected paediatric patients using population and deep sequencing: final results of the PIANO study) … p.1078

Nervous System Diseases and Conditions - Headache and Migraine. Data on Headache and Migraine Reported by Researchers at University of Iowa (Higher augmentation index is associated with tension–type headache and migraine in middle–aged/older humans with obesity) … p.1082
Hematopoietic. Data on Hematopoietic
Detailed by Researchers at Capital
Medical University (New strategies of
DLI in the management of relapse of
hematological malignancies after
allogeneic hematopoietic SCT)
... p.1092

Stem Cell Research - Hematopoietic Stem
Cells. Data on Hematopoietic Stem
Cells Reported by Researchers at
Peking University People's Hospital
(Causes of mortality after haploidentical
hematopoietic stem cell transplantation
and the comparison with HLA–identical
sibling hematopoietic stem...)
... p.1093

Liver Diseases and Conditions - Hepatitis
B Virus. Data on Hepatitis B Virus
Detailed by A. Ducancelle and
Co–Authors (Different precore/core
mutations of hepatitis B interact with,
limit, or favor liver fibrosis severity)
... p.1094

Liver Diseases and Conditions - Hepatitis
C Virus. Data on Hepatitis C Virus
Reported by Researchers at Walgreen
Co. [New all oral therapy for chronic
hepatitis C virus (HCV): a novel
long–term cost comparison]
... p.1095

Liver Diseases and Conditions - Hepatomegaly. Data on
Hepatomegaly Discussed by
Researchers at Philipps University
(Altered glycogen metabolism causes
hepatomegaly following an Atg7
deletion)
... p.1096

Hereditary Angioedema. Data on Hereditary
Angioedema Reported by Researchers
at Semmelweis University (Risk of
thromboembolism in patients with
hereditary angioedema treated with
plasma–derived C1–inhibitor)
... p.1097

Hormones. Data on Hormones Described by
Researchers at Marmara University
School of Medicine (The neuroprotective
and anti–apoptotic effects of melatonin
on hemolytic hyperbilirubinemia–induced
oxidative brain damage)
... p.1098

Genetics - Human Genetics. Data on
Human Genetics Described by
Researchers at Osaka City University
(Twin's Birth–Order Differences in
Height and Body Mass Index From Birth
to Old Age: A Pooled Study of 26 Twin
Cohorts Participating in the CODATwins
Project)
... p.1099

Neurodegenerative Diseases and
Conditions - Huntington Disease.
Data on Huntington Disease Reported
by Researchers at Institute of
Neuroscience (Hereditary chorea – what
else to consider when the Huntington’s
disease genetics test is negative?)
... p.100

Musculoskeletal Diseases and Conditions -
Hyperostosis. Data on Hyperostosis
Reported by Researchers at National
Institutes of Health (Phenotypic and
Genotypic Characterization and
Treatment of a Cohort With Familial
Tumoral Calcinos/Hyperostosis–Hyperphosphat
emia Syndrome)
... p.1101

Cardiovascular Diseases and Conditions -
Hypertension. Data on Hypertension
Described by Researchers at University
of Florida (Vascular Smooth Muscle
Cells From Hypertensive
Patient–Derived Induced Pluripotent
Stem Cells to Advance Hypertension
Pharmacogenomics)
... p.1102

Cardiovascular Diseases and Conditions -
Hypertension. Data on Hypertension
Described by Researchers at University
of Groningen (No influence of
antihypertensive agents on plasma free
metanephrines)
... p.1103

Cardiovascular Diseases and Conditions -
Hypertension. Data on Hypertension
Detailed by G.M. Keating and
Co–Authors (Macitentan: A Review in
Pulmonary Arterial Hypertension)
... p.1105
Cardiovascular Diseases and Conditions - Hypertension. Data on Hypertension Discussed by Researchers at University of Heidelberg (Safety, Tolerability and Clinical Effects of a Rapid Dose Titration of Subcutaneous Treprostinil Therapy in Pulmonary Arterial Hypertension: A Prospective Multi-Centre ...) … p.1105

Cardiovascular Diseases and Conditions - Hypertension. Data on Hypertension Reported by Researchers at University of Pittsburgh (Human epithelial Na+ channel missense variants identified in the GenSalt study alter channel activity) … p.1106

Immunology - Immunoglobulins. Data on Immunoglobulins Discussed by Researchers at Technical University [Balancing Selectivity and Efficacy of Bispecific Epidermal Growth Factor Receptor (EGFR) X c–MET Antibodies and Antibody–Drug Conjugates] … p.1109

Immunology - Immunoglobulins. Data on Immunoglobulins Reported by Researchers at Singapore National University (DNA Nanostructures Carrying Stoichiometrically Definable Antibodies) … p.1110

Immunology - Immunoglobulins. Data on Immunoglobulins Reported by Researchers at University of Delaware (Identifying a robust design space for glycosylation during monoclonal antibody production) … p.1110

Endocrine System Diseases and Conditions - Insulin Resistance. Data on Insulin Resistance Described by Researchers at NIIST (Symplocos cochinchinensis enhances insulin sensitivity via the down regulation of lipogenesis and insulin resistance in high energy diet rat model) … p.1113

Cardiovascular Diseases and Conditions - Intermittent Claudication. Data on Intermittent Claudication Reported by Researchers at University of Heidelberg (Results of common femoral artery thromboendarterectomy evaluation of a traditional surgical management in the endovascular era) … p.1116

Central Nervous System Diseases and Conditions - Intracranial Hypertension. Data on Intracranial Hypertension Reported by Researchers at King Saud University (Idiopathic Intracranial Hypertension Induced by Topical Application of Vitamin A) … p.1117
Ketones. Data on Ketones Discussed by Researchers at Institute of Statistical Science (Genome–Wide Pharmacogenomic Study on Methadone Maintenance Treatment Identifies SNP rs17180299 and Multiple Haplotypes on CYP2B6, SPON1, and GSG1L Associated with ... … p.1118

Oncology - Laryngeal Cancer. Data on Laryngeal Cancer Detailed by Researchers at University Hospital [Use of concurrent chemoradiation in advanced staged (T4) laryngeal cancer] … p.1119

Lipopolysaccharides. Data on Lipopolysaccharides Discussed by Researchers at National Cancer Institute (Secreted Thrombospondin–1 Regulates Macrophage Interleukin–1β Production and Activation through CD47) … p.1120

Membrane Proteins - Lipoprotein Receptors. Data on Lipoprotein Receptors Reported by Researchers at University of Maryland [Evidence That Factor VIII Forms a Bivalent Complex with the Low Density Lipoprotein (LDL) Receptor–related Protein 1 (LRP1) IDENTIFICATION OF CLUSTER IV ON LRP1 AS ...] … p.1121

Biotechnology - Liposomes. Data on Liposomes Discussed by Researchers at Graduate School (Real–time characterization of fibrillization process of amyloid–β on phospholipid membrane using a new label–free detection technique based on a cantilever–based liposome ...) … p.1122

Oncology - Liver Cancer. Data on Liver Cancer Detailed by Researchers at University Hospital (Oncological Evaluation by Positron–emission Tomography, Circulating Tumor Cells and Alpha Fetoprotein in Patients With Hepatocellular Carcinoma on the Waiting List for Liver ...) … p.1123

Oncology - Liver Cancer. Data on Liver Cancer Discussed by Researchers at National Cheng Kung University (Sp1–mediated ectopic expression of T–cell lymphoma invasion and metastasis 2 in hepatocellular carcinoma) … p.1124

Oncology - Liver Cancer. Data on Liver Cancer Discussed by Researchers at University Hospital (Combination of the oral histone deacetylase inhibitor resminostat with oncolytic measles vaccine virus as a new option for epi–virotherapeutic treatment of hepatocellular ...) … p.1125

Oncology - Liver Cancer. Data on Liver Cancer Reported by Researchers at Fourth Military Medical University (Functional and clinical evidence that TAZ is a candidate oncogene in hepatocellular carcinoma) … p.1126

Oncology - Liver Cancer. Data on Liver Cancer Reported by Researchers at Shandong Cancer Hospital (Oxaliplatin–rapamycin combination was superior to mono–drug in treatment of hepatocellular carcinoma both in vitro and in vivo) … p.1127

Oncology - Liver Cancer. Data on Liver Cancer Reported by Researchers at Shandong University School of Medicine (Functional and clinical evidence that TAZ is a candidate oncogene in hepatocellular carcinoma) … p.1128

Oncology - Lung Cancer. Data on Lung Cancer Detailed by Researchers at University of Niigata (Autocrine Semaphorin3A signaling is essential for the maintenance of stem–like cells in lung cancer) … p.1131

Kidney Diseases and Conditions - Lupus Nephritis. Data on Lupus Nephritis Reported by Researchers at Addenbrooke’s Hospital (Con: The use of calcineurin inhibitors in the treatment of lupus nephritis) … p.1132

Autoimmune Diseases and Conditions - Lupus. Data on Lupus Reported by Researchers at King’s College (Sifalimumab, an anti–interferon–a monoclonal antibody, in moderate to severe systemic lupus erythematosus: a randomised, double–blind, placebo–controlled study) … p.1133

Immune System Diseases and Conditions - Lymphoproliferative Disorders. Data on Lymphoproliferative Disorders Detailed by Researchers at University of Auvergne (Usefulness of EUS–guided fine needle aspiration biopsy in the diagnosis of suspected or recurring lymphoproliferative disorders) … p.1134

Mosquito-Borne Diseases - Malaria. Data on Malaria Detailed by Researchers at International Center for Genetic Engineering and Biotechnology (Compartmentalized Metabolic Engineering for Artemisinin Biosynthesis and Effective Malaria Treatment by Oral Delivery of Plant Cells) … p.1135

Oncology - Malignant Mesothelioma. Data on Malignant Mesothelioma Reported by Researchers at Tokushima University (Downregulation of thymidylate synthase by RNAi molecules enhances the antitumor effect of pemetrexed in an orthotopic malignant mesothelioma xenograft mouse model) … p.1136

Health and Medicine - Medical Physics. Data on Medical Physics Reported by Researchers at DKFZ (Accelerated iterative beam angle selection in IMRT) … p.1137

Health and Medicine - Medical Research. Data on Medical Research Discussed by Researchers at Hamadan University (Effect of a high fat diet on ovary morphology, in vitro development, in vitro fertilisation rate and oocyte quality in mice) … p.1138

Health and Medicine - Medical Research. Data on Medical Research Reported by Researchers at Chinese People’s Liberation Army General Hospital (Identification of Two Disease–causing Genes TJP2 and GJB2 in a Chinese Family with Unconditional Autosomal Dominant Nonsyndromic Hereditary …) … p.1139

Oncology - Melanoma. Data on Melanoma Detailed by Researchers at Institute of Molecular Cell Biology (Activation of mutant TERT promoter by RAS–ERK signaling is a key step in malignant progression of BRAF–mutant human melanomas) … p.1140

Oncology - Melanoma. Data on Melanoma Reported by Researchers at University of Sydney (Public preferences for communicating personal genomic risk information: a focus group study) … p.1141

Stem Cell Research - Mesenchymal Stem Cells. Data on Mesenchymal Stem Cells Reported by Researchers at Affiliated Hospital 1 (Low–magnitude, high–frequency vibration promotes the adhesion and the osteogenic differentiation of bone marrow–derived mesenchymal stem cells cultured on a …) … p.1142
Stem Cell Research - Mesenchymal Stem Cells. Data on Mesenchymal Stem Cells Reported by Researchers at New Jersey Institute of Technology (Sodium Tungstate for Promoting Mesenchymal Stem Cell Chondrogenesis) ... p.1143

Microcirculation. Data on Microcirculation Reported by Researchers at Department of Anesthesiology (Sidestream dark field imaging of the serosal microcirculation during gastrointestinal surgery) ... p.1144

Oncology - Molecular Cancer and Carcinogenesis. Data on Molecular Cancer and Carcinogenesis Discussed by Researchers at University of Minnesota (Functional activation of PPAR in human upper aerodigestive cancer cell lines) ... p.1145

Molecular Research. Data on Molecular Research Detailed by Researchers at Konkuk University (Effects of Ganodermanondiol, a New Melanogenesis Inhibitor from the Medicinal Mushroom Ganoderma lucidum) ... p.1146

Life Science Research - Molecular and Cellular Biology. Data on Molecular and Cellular Biology Discussed by Researchers at Zhongshan Ophthalmic Center (TRIM14 Inhibits cGAS Degradation Mediated by Selective Autophagy Receptor p62 to Promote Innate Immune Responses) ... p.1147

Oncology - Multiple Myeloma. Data on Multiple Myeloma Detailed by Researchers at Jagiellonian University (Characteristics and outcomes of patients with multiple myeloma aged 21–40 years versus 41–60 years: a multi–institutional case–control study) ... p.1148

Musculoskeletal Diseases and Conditions - Muscular Dystrophy. Data on Muscular Dystrophy Described by Researchers at Tokyo Women's Medical University (Target resequencing of neuromuscular disease–related genes using next–generation sequencing for patients with undiagnosed early–onset neuromuscular ...) ... p.1149

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Data on Myelodysplastic Syndromes Reported by Researchers at Soochow University (Monosomal karyotype of chromosome 5/7 was an independent poor prognostic factor for Chinese myelodysplastic syndrome patients) ... p.1150

Myeloid Cells. Data on Myeloid Cells Detailed by Researchers at Sejong University (Diverse macrophages polarization in tumor microenvironment) ... p.1151

Nanotechnology - Nanocomplexes. Data on Nanocomplexes Discussed by Researchers at Ben–Gurion University of the Negev (Mechanisms of cellular uptake and endosomal escape of calcium–siRNA nanocomplexes) ... p.1152

Nanotechnology - Nanomaterials. Data on Nanomaterials Reported by Researchers at Joint Research Center (The JRC Nanomaterials Repository: A unique facility providing representative test materials for nanoEHS research) ... p.1153

Nanotechnology - Nanoparticles. Data on Nanoparticles Described by Researchers at Colorado School of Mines (Surface Modification of Gd Nanoparticles with pH–Responsive Block Copolymers for Use As Smart MRI Contrast Agents) ... p.1154

Nanotechnology. Data on Nanotechnology Detailed by Researchers at Purdue University (Optical Clearing Delivers Ultrasensitive Hyperspectral Dark–Field Imaging for Single–Cell Evaluation) ... p.1155
January 14, 2017

Oncology - Nasopharyngeal Carcinoma. Data on Nasopharyngeal Carcinoma Reported by Researchers at Cancer Hospital (Therapeutic effect of TMZ–POH on human nasopharyngeal carcinoma depends on reactive oxygen species accumulation) … p.1156

Oncology - Nasopharyngeal Carcinoma. Data on Nasopharyngeal Carcinoma Reported by Researchers at Wenzhou Medical University (MiR–17–5p promotes cancer cell proliferation and tumorigenesis in nasopharyngeal carcinoma by targeting p21) … p.1157

Natural Language Processing. Data on Natural Language Processing Discussed by Researchers at University of Utah (The use of natural language processing on narrative medication schedules to compute average weekly dose) … p.1158

Surgery - Nephrectomy. Data on Nephrectomy Described by Researchers at Fox Chase Cancer Center (Perioperative Outcomes Following Partial Nephrectomy Performed on Patients Remaining on Antiplatelet Therapy) … p.1159

Nephrology. Data on Nephrology Described by Researchers at Baylor University College of Medicine (Neonatal extracorporeal renal replacement therapy–a routine renal support modality?) … p.1160

Intercellular Signaling Peptides and Proteins - Nerve Growth Factors. Data on Nerve Growth Factors Detailed by Researchers at University of Torino (Neuregulin1 alpha activates migration of neuronal progenitors expressing ErbB4) … p.1161

Oncology - Neuroendocrine Cancer. Data on Neuroendocrine Cancer Reported by Researchers at Harris Health System (Management of neuroendocrine tumors) … p.1163

Neurons. Data on Neurons Discussed by Researchers at Chongqing Medical University (beta–Caryophyllene protects in vitro neurovascular unit against oxygen–glucose deprivation and re–oxygenation–induced injury) … p.1164

Oncology - Non-Hodgkin Lymphoma. Data on Non–Hodgkin Lymphoma Detailed by Researchers at Beijing University (Molecular genetics related to non–Hodgkin lymphoma) … p.1165

Oncology - Non-Small Cell Lung Cancer. Data on Non–Small Cell Lung Cancer Reported by Researchers at Gunma University (Dosimetric comparison of carbon ion and X–ray radiotherapy for Stage IIIA non–small cell lung cancer) … p.1166

Non-Steroidal Anti-Inflammatory Agents. Data on Non–Steroidal Anti–Inflammatory Agents Detailed by Researchers at University of Lyon (Encapsulation of NSAIDs for inflammation management: Overview, progress, challenges and prospects) … p.1167

Engineering - Nuclear Engineering. Data on Nuclear Engineering Discussed by Researchers at Istanbul University (Do F–18–FDG PET/CT findings have a relationship with histopathological and immunohistochemical factors of breast cancer in men?) … p.1168

Nutritional and Metabolic Diseases and Conditions - Obesity. Data on Obesity Described by Researchers at Purdue University (Almond Consumption during Energy Restriction Lowers Truncal Fat and Blood Pressure in Compliant Overweight or Obese Adults) … p.1169
Nutritional and Metabolic Diseases and Conditions - Obesity. Data on Obesity Reported by M.F. Pino and Colleagues (Active Individuals have High Mitochondrial Content and Oxidative Markers in Their Abdominal Subcutaneous Adipose Tissue) … p.1170

Obesity, Fitness and Wellness. Data on Obesity, Fitness and Wellness Discussed by Researchers at Alfaisal University (Characterizing the morbid genome of ciliopathies) … p.1171

Peptides - Oligopeptides. Data on Oligopeptides Reported by Researchers at Mossakowski Medical Research Center (Protective Effects of Selol Against Sodium Nitroprusside–Induced Cell Death and Oxidative Stress in PC12 Cells) … p.1172

Oncology. Data on Oncology Reported by Researchers at University of Kashmir (Emerging tale of UPR and cancer: an essentiality for malignancy) … p.1173

Oncology - Oral Cancer. Data on Oral Cancer Described by Researchers at Grigore T. Popa University of Medicine and Pharmacy (Study of Biochemical Level for Mg and Ca–Mg Imbalance in Patients with Oral Cancer and Potentially Malignant Disorder and their Prostetical and ...) … p.1174

Transplant Medicine - Organ Preservation. Data on Organ Preservation Reported by Researchers at Seoul National University Hospital (Induction chemotherapy in head and neck squamous cell carcinoma of the paranasal sinus and nasal cavity: a role in organ preservation) … p.1176

www.NewsRx.com

Oxides. Data on Oxides Reported by C.de A. Mendes and Colleagues (Carbon dioxide contrast medium for endovascular treatment of ilio–femoral occlusive disease) … p.1177

Enzymes and Coenzymes - Oxidoreductases. Data on Oxidoreductases Described by Researchers at Monsanto (Safety assessment of dicamba mono–oxygenases that confer dicamba tolerance to various crops) … p.1178

Gastroenterology - Pancreas Research. Data on Pancreas Research Reported by Researchers at University of Minnesota (Intrapancreatic Splenule in a Pancreas Allograft: Case Report) … p.1179

Digestive System Diseases and Conditions - Pancreatitis. Data on Pancreatitis Discussed by Researchers at University of Valencia (Epigenetic Regulation of Early– and Late–Response Genes in Acute Pancreatitis) … p.1180

Perfusion. Data on Perfusion Reported by M. De Sousa Mendes and Colleagues (Prediction of human fetal pharmacokinetics using ex vivo human placenta perfusion studies and physiologically based models) … p.1181

Education - Pharmaceutical Education. Data on Pharmaceutical Education Reported by Researchers at University of Houston (Effect of Communication Style on Perceptions of Medication Side Effect Risk among Pharmacy Students) … p.1182

Biotechnology - Pharmaceutical and Biomedical Analysis. Data on Pharmaceutical and Biomedical Analysis Discussed by Researchers at Wenzhou Medical University (An UPLC–MS/MS method for the quantitation of alectinib in rat plasma) … p.1183
Pharmacokinetics. Data on Pharmacokinetics Detailed by Researchers at Wenzhou Medical University (Determination of Arbutin in Rat Plasma Using Liquid Chromatography–Tandem Mass Spectrometry: Application to a Pharmacokinetic Study After Oral Administration of the ...) … p.1184

Pharmacology. Data on Pharmacology Described by Researchers at Seoul National University (Pharmacological and Mechanical Thromboprophylaxis in Critically Ill Patients: a Network Meta–Analysis of 12 Trials) … p.1185

Pharmacology. Data on Pharmacology Detailed by Researchers at University of Cologne (Person–directed, non–pharmacological interventions for sleepiness at work and sleep disturbances caused by shift work) … p.1186

Pharmacology. Data on Pharmacology Reported by Researchers at UNC Eshelman School of Pharmacy (Optimizing Medication Outcomes in Neurocritical Care: Focus on Clinical Pharmacology) … p.1187

Drugs and Therapies - Pharmacy Practice. Data on Pharmacy Practice Detailed by Researchers at University of British Columbia (The impact of medication reviews by community pharmacists) … p.1188

Drugs and Therapies - Pharmacy and Pharmacology. Data on Pharmacy and Pharmacology Detailed by Researchers at School of Pharmaceutical Science (Preparation, in–vitro and in–vivo characterisation of CoQ10 microparticles: electrospraying–enhanced bioavailability) … p.1189

Hematology - Plasma. Data on Plasma Discussed by Researchers at University of Otago (Collection tubes containing citrate stabiliser over–estimate plasma glucose, when compared to other samples undergoing immediate plasma separation) … p.1190

Respiratory Tract Diseases and Conditions - Pneumothorax. Data on Pneumothorax Reported by Researchers at Princess Alexandra Hospital (Venous cutdown versus the Seldinger technique for placement of totally implantable venous access ports) … p.1191

Membrane Proteins - Porins. Data on Porins Discussed by Researchers at Kyungpook National University (Molecular mechanisms regulating aquaporin–2 in kidney collecting duct) … p.1193

Post–Operative Complications. Data on Post–Operative Complications Detailed by Researchers at University of Miami (Free Versus Pedicled TRAM Flaps: Cost Utilization and Complications) … p.1194

Propiophenones. Data on Propiophenones Detailed by Researchers at University of Michigan (Identification of non–reported bupropion metabolites in human plasma) … p.1195

Oncology - Prostate Cancer. Data on Prostate Cancer Detailed by Researchers at International Agency for Research on Cancer (Prostate cancer burden in Central and South America) … p.1196

Oncology - Prostate Cancer. Data on Prostate Cancer Detailed by Researchers at University Health Network (Technical Note: Method to correlate whole–specimen histopathology of radical prostatectomy with diagnostic MR imaging) … p.1197
January 14, 2017

Oncology - Prostate Cancer. Data on Prostate Cancer Discussed by Researchers at Cleveland State University (Effects of interferons and double–stranded RNA on human prostate cancer cell apoptosis) … p.1198

Oncology - Prostate Cancer. Data on Prostate Cancer Discussed by Researchers at University of Alcala (The pepper's natural ingredient capsaicin induces autophagy blockage in prostate cancer cells) … p.1199

Oncology - Prostate Cancer. Data on Prostate Cancer Discussed by Researchers at Western University (Pathological, Oncologic and Functional Outcomes of a Prospective Registry of Salvage High Intensity Focused Ultrasound Ablation for Radiorecurrent Prostate Cancer) … p.1200

Oncology - Prostate Cancer. Data on Prostate Cancer Reported by Researchers at Mayo Clinic (Predictors of Time to Metastasis in Castration–resistant Prostate Cancer) … p.1201

Oncology - Prostate Cancer. Data on Prostate Cancer Reported by X. Filella and Colleagues [Prostate Cancer Detection and Prognosis: From Prostate Specific Antigen (PSA) to Exosomal Biomarkers] … p.1202

Skin Diseases and Conditions - Psoriasis. Data on Psoriasis Detailed by M. Ammar and Co–Authors (CARD14 alterations in Tunisian patients with psoriasis and further characterization in European cohorts) … p.1204

www.NewsRx.com

Lung Diseases and Conditions - Pulmonary Hypertension. Data on Pulmonary Hypertension Detailed by Researchers at University of California (Fenestrated Transcatheter ASD Closure in Adults with Diastolic Dysfunction and/or Pulmonary Hypertension: Case Series and Review of the Literature) … p.1205

Nanotechnology - Quantum Dots. Data on Quantum Dots Detailed by Researchers at University of Algarve (Environmental behaviour and ecotoxicity of quantum dots at various trophic levels: A review) … p.1207

Rare Diseases. Data on Rare Diseases Reported by Researchers at Yonsei University (Rare high–impact disease variants: properties and identifications) … p.1208

Eye Diseases and Conditions - Retinitis Pigmentosa. Data on Retinitis Pigmentosa Described by Researchers at Institute of Ophthalmology (Mutations in REEP6 Cause Autosomal–Recessive Retinitis Pigmentosa) … p.1209

Eye Diseases and Conditions - Retinopathy of Prematurity. Data on Retinopathy of Prematurity Detailed by Researchers at University of Adelaide (Adverse effects of red blood cell transfusions in neonates: a systematic review and meta–analysis) … p.1210

Oncology - Rhabdomyosarcomas. Data on Rhabdomyosarcomas Reported by Researchers at University of Virginia (Fusion transcriptome profiling provides insights into alveolar rhabdomyosarcoma) … p.1211

Health and Medicine - Rural Health. Data on Rural Health Discussed by M.J. Rogers and Colleagues (Cancer diagnosed in the Emergency Department of a Regional Health Service) … p.1212
Salicylic Acids. Data on Salicylic Acids
Reported by F. Gengo and Colleagues
(Platelet response to increased aspirin
dose in patients with persistent platelet
aggregation while treated with aspirin 81
mg) … p.1213

Science. Data on Science Detailed by
Researchers at Ajou University (A
structural insight into the negative
effects of opioids in analgesia by
modulating the TLR4 signaling: An in
silico approach) … p.1214

Science. Data on Science Detailed by
Researchers at University of Leicester
(Structural basis of N–Myc binding by
Aurora–A and its destabilization by
kinase inhibitors) … p.1215

Science. Data on Science Reported by
Researchers at Mahidol University
(Undiluted Serum Eye Drops for the
Treatment of Persistent Corneal
Epithelial Defects) … p.1216

Digestive System Diseases and
Conditions - Sclerosing Cholangitis.
Data on Sclerosing Cholangitis
Reported by Researchers at
Friedrich–Alexander–University [Impact
of Microbes on the Pathogenesis of
Primary Biliary Cirrhosis (PBC) and
Primary Sclerosing Cholangitis (PSC)]
… p.1216

Enzymes and Coenzymes - Serine
Endopeptidases. Data on Serine
Endopeptidases Detailed by
Researchers at School of Medicine
(Prediction of cardiovascular events with
levels of proprotein convertase
subtilisin/kexin type 9: A systematic
review and meta–analysis) … p.1217

Oncology - Skin Cancer. Data on Skin
Cancer Described by Researchers at
King's College (The impact of skin
colour on human photobiological
responses) … p.1218

Small Interference RNAs (siRNAs). Data
on Small Interference RNAs (siRNAs)
Detailed by Researchers at Chongqing
University (Stimuli–responsive hybrid
nanocarriers developed by controllable
integration of hyperbranched PEI with
mesoporous silica nanoparticles for
sustained ...) … p.1219

Health and Medicine - Spinal Research.
Data on Spinal Research Reported by
Researchers at Department of
Orthopedic Surgery (The role of
preoperative vascular embolization in
surgery for metastatic spinal tumours)
… p.1220

Neurodegenerative Diseases and
Conditions - Spinocerebellar
Ataxias. Data on Spinocerebellar
Ataxias Described by Researchers at
Complutense University (Dysregulation
Of The Endocannabinoid Signaling
System In The Cerebellum And
Brainstem In A Transgenic Mouse
Model Of Spinocerebellar Ataxia
Type–3) … p.1222

Neurodegenerative Diseases and
Conditions - Spinocerebellar
Ataxias. Data on Spinocerebellar
Ataxias Reported by Researchers at
Taipei Medical University (Depression
as the Primary Cause of Insomnia and
Excessive Daytime Sleepiness in a
Family with Multiple Cases of
Spinocerebellar Ataxia) … p.1223

Oncology - Squamous Cell Carcinoma.
Data on Squamous Cell Carcinoma
Discussed by Researchers at Chiba
University (Regulation of MMPI3 by
antitumor microRNA–375 markedly
inhibits cancer cell migration and
invasion in esophageal squamous cell
carcinoma) … p.1224

Oncology - Squamous Cell Carcinoma.
Data on Squamous Cell Carcinoma
Reported by Researchers at
Birmingham Women's NHS Foundation
Trust (Over–expression of DNMT3A
predicts the risk of recurrent vulvar
squamous cell carcinomas) … p.1225
Gram-Positive Bacteria - Staphylococcus aureus. Data on Staphylococcus aureus Described by Researchers at University of Texas (In Vitro Assessment of the Antimicrobial Efficacy of Optimized Nitroglycerin–Citrate–Ethanol as a Nonantibiotic, Antimicrobial Catheter Lock Solution for Prevention ...) ... p.1226

Stem Cell Research. Data on Stem Cell Research Detailed by Researchers at University of Michigan (Nanomedicine strategies for sustained, controlled and targeted treatment of cancer stem cells) ... p.1227

Cardiovascular Diseases and Conditions - Subclavian Steal Syndrome. Data on Subclavian Steal Syndrome Reported by Researchers at Department of Surgery (Eversion Subclavian Endarterectomy and Transposition for Coronary–Subclavian Steal Syndrome in a Patient with Refractory Angina Pectoris) ... p.1229

Sulfonamides. Data on Sulfonamides Described by Researchers at University of Silesia (Amorphous Protonic Ionic Systems as Promising Active Pharmaceutical Ingredients: The Case of the Sumatriptan Succinate Drug) ... p.1230

Heart Disorders and Diseases - Systolic Heart Failure. Data on Systolic Heart Failure Described by Researchers at National University (Combined analysis of cross–reacting antibodies anti–beta 1AR and anti–B13 in advanced stages of Chagas heart disease) ... p.1231

Surgical Procedures - Thoracoscopy. Data on Thoracoscopy Detailed by Researchers at Sichuan University (Undiagnosed pulmonary sequestration results in an unexplained hemorrhagic shock in thoracoscopic pulmonary lobectomy) ... p.1232

Cardiovascular Diseases and Conditions - Thrombosis. Data on Thrombosis Detailed by Researchers at Catholic University (Coulomb nanoradiator–mediated, site–specific thrombolytic proton treatment with a traversing pristine Bragg peak) ... p.1232

Cardiovascular Diseases and Conditions - Thrombosis. Data on Thrombosis Discussed by Researchers at King’s College Hospital (Anti–Coagulation and Deep Brain Stimulation: Never the Twain Shall Meet) ... p.1233

Cardiovascular Diseases and Conditions - Thrombosis. Data on Thrombosis Discussed by Researchers at University of Helsinki [Decreased maximum clot firmness in rotational thromboelastometry (ROTEM (R)) is associated with bleeding during extracorporeal mechanical circulatory support] ... p.1234

Cardiovascular Diseases and Conditions - Thrombosis. Data on Thrombosis Reported by Researchers at University of Oviedo (Collateral Development in Thrombosis of the Hepatic Artery After Transplantation) ... p.1235

Oncology - Thyroid Cancer. Data on Thyroid Cancer Detailed by Researchers at Medical University (Papillary Thyroid Carcinoma: Association Between Germline DNA Variant Markers and Clinical Parameters) ... p.1236
January 14, 2017

Biomedical Engineering - Tissue Engineering. Data on Tissue Engineering Discussed by Researchers at Texas A&M University (Cold Plasma Reticulation of Shape Memory Embolic Tissue Scaffolds) … p.1237

Skin Diseases and Conditions - Toxic Epidermal Necrolysis. Data on Toxic Epidermal Necrolysis Reported by Researchers at Royal Adelaide Hospital (Early toxic epidermal necrolysis syndrome post–intra–cranial tumor resection) … p.1238

Drugs and Therapies - Toxicology and Pharmacology. Data on Toxicology and Pharmacology Reported by Researchers at Merck & Company (Role of chronic toxicity studies in revealing new toxicities) … p.1239

Proteins - Transcription Factors. Data on Transcription Factors Reported by L.M. Williams and Colleagues [The transcription factor, Nuclear factor, erythroid 2 (Nfe2), is a regulator of the oxidative stress response during Danio rerio development] … p.1241

Mycobacterium Infections - Tuberculosis. Data on Tuberculosis Discussed by Researchers at University of Oviedo (Comparison of isothermal helicase–dependent amplification and PCR for the detection of Mycobacterium tuberculosis by an electrochemical genomagnetic assay) … p.1243

Mycobacterium Infections - Tuberculosis. Data on Tuberculosis Reported by Researchers at University of Leicester (Development of an In Vitro Assay for Detection of Drug–Induced Resuscitation–Promoting–Factor–Dependent Mycobacteria) … p.1244

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data on Type 2 Diabetes Described by Y. Kimura et al (Clinical Significance of Determining Plasma MicroRNA33b in Type 2 Diabetic Patients with Dyslipidemia) … p.1245

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data on Type 2 Diabetes Reported by Researchers at Gunma University (Fibroblast growth factor 23 inhibits osteoblastic gene expression and induces osteoprotegerin in vascular smooth muscle cells) … p.1246

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data on Type 2 Diabetes Reported by Researchers at University of Ottawa (Reactive Oxygen Species and Oxidative Stress in Obesity–Recent Findings and Empirical Approaches) … p.1247

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Data on Type 2 Diabetes Reported by Y. Lu and Co–Researchers (Astragalus polysaccharide modulates ER stress response in an OVA–LPS induced murine model of severe asthma) … p.1248

Inflammatory Bowel Diseases and Conditions - Ulcerative Colitis. Data on Ulcerative Colitis Reported by Researchers at Tianjin University (Colon targeted oral drug delivery system based on alginate–chitosan microspheres loaded with icariin in the treatment of ulcerative colitis) … p.1249

Health and Medicine - Urology. Data on Urology Reported by Researchers at Shanghai Jiao–Tong University (Etiology and Management of Male Iatrogenic Urethral Stricture: Retrospective Analysis of 172 Cases in a Single Medical Center) … p.1250
Oncology - Urothelial Cancer. Data on Urothelial Cancer Described by Researchers at University of Texas Southwestern (Comparing Changes in Renal Function After Radical Surgery for Upper Tract Urothelial Carcinoma and Renal Cell Carcinoma) … p.1251

Oncology - Urothelial Cancer. Data on Urothelial Cancer Detailed by Researchers at Chang Gung University (Adjuvant radiotherapy for locally advanced upper tract urothelial carcinoma) … p.1252

Immunization - Vaccines. Data on Vaccines Reported by A. De Beuckelaer and Colleagues (Type I Interferons Interfere with the Capacity of mRNA Lipoplex Vaccines to Elicit Cytolytic T Cell Responses) … p.1253

Vinyl Compounds. Data on Vinyl Compounds Detailed by Researchers at Hokkaido University [Difference in the Dissolution Behaviors of Tablets Containing Polyvinylpolypyrrolidone (PVPP) Depending on Pharmaceutical Formulation After Storage Under High Temperature …] … p.1254

Nutritional and Metabolic Diseases and Conditions - Vitamin D Deficiency. Data on Vitamin D Deficiency Described by Researchers at King George Medical University (Vitamin D status, vitamin D receptor and toll like receptor–2 polymorphisms in tuberculous meningitis: a case–control study) … p.1255

Proteins - Cytoskeletal Proteins. Davis Heart and Lung Research Institute Details Findings in Cytoskeletal Proteins (CRISPR–mediated Genome Editing Restores Dystrophin Expression and Function in mdx Mice) … p.1256

Heart Disorders and Diseases - Tachycardia. Department of Cardiology Describes Findings in Tachycardia (The Lewis Lead for Detection of Ventriculoatrial Conduction Type) … p.1257

Cardiovascular Diseases and Conditions - Transient Ischemic Attack. Department of Medicine Details Findings in Transient Ischemic Attack (Prolonged Cardiac Monitoring to Detect Atrial Fibrillation after Cryptogenic Stroke or Transient Ischemic Attack: A Meta–Analysis of Randomized Controlled Trials) … p.1258

Hematology - Laboratory Hematology. Department of Pathology and Laboratory Medicine Details Findings in Laboratory Hematology (Verifying the performance characteristics of the TEG5000 thromboelastogram in the clinical laboratory) … p.1259

Bacterial Infections and Mycoses - Bacteremia. Division of Nephrology Details Findings in Bacteremia (Organism–specific bacteremia by hemodialysis access) … p.1260

DNA Research. Duke University Reports Findings in DNA Research (Integrative modelling of tumour DNA methylation quantifies the contribution of metabolism) … p.1261

Oncology - Endometrial Cancer. Endometrial cancer driver mutations detectable in uterine lavage fluid … p.1262

Oncology - Breast Cancer. Erasmus University Medical Center Describes Findings in Breast Cancer (Annexin–A1 and caldesmon are associated with resistance to tamoxifen in estrogen receptor positive recurrent breast cancer) … p.1263

Cholesterol. FH and other findings from Geisinger–Regeneron genomics studies … p.1264
Oncology - Lung Cancer. Faculty of Medicine Reports Findings in Lung Cancer (Case report: Durable response to afatinib in a patient with lung cancer harboring two uncommon mutations of EGFR and a KRAS mutation) … p.1266

Lymphatic Diseases and Conditions - Lymphedema. Fat fuels the road to cancer cell spread … p.1267

Neoplasms. Federal University Reports Findings in Neoplasms (The prevalence of CALR mutations in a cohort of patients with myeloproliferative neoplasms) … p.1268

Hematology - Laboratory Hematology. Findings from A. Albitar and Co–Authors in the Area of Laboratory Hematology Reported (Positive selection and high sensitivity test for MYD88 mutations using locked nucleic acid) … p.1269

Membrane Proteins - Immunologic Receptors. Findings from A. Elbediwy and Co–Authors Update Knowledge of Immunologic Receptors (Integrin signalling regulates YAP and TAZ to control skin homeostasis) … p.1271

Bone Research. Findings from A. Gobbi and Co–Authors Provide New Insights into Bone Research (One–Stage Cartilage Repair Using a Hyaluronic Acid–Based Scaffold With Activated Bone Marrow–Derived Mesenchymal Stem Cells Compared With Microfracture Five–Year ...) … p.1272

Mycobacterium Infections - Tuberculosis. Findings from A. Nusrath Unissa and Co–Authors Provides New Data about Tuberculosis (A Note on Derivatives of Isoniazid, Rifampicin, and Pyrazinamide Showing Activity Against Resistant Mycobacterium tuberculosis) … p.1273

Skin Diseases and Conditions - Mastocytosis. Findings from A. Payerols et al Has Provided New Information about Mastocytosis (Exophthalmos, Diplopia, and Bilateral Eyelid Edema: Symptoms of Ocular Mastocytosis) … p.1274

Proteomics. Findings from AGH University of Science and Technology in Proteomics Reported (MYTHBUSTERS: a universal procedure for sample preparation for mass spectrometry) … p.1276

Oncology - B-Cell Lymphoma. Findings from Aalborg University Hospital Provides New Data on B–Cell Lymphoma (Uterine, but not ovarian, female reproductive organ involvement at presentation by diffuse large B–cell lymphoma is associated with poor outcomes and a high ...) … p.1277

Immunology - Immunoglobulins. Findings from Academic Medical Center Provide New Insights into Immunoglobulins [Safety and efficacy of LY3015014, a monoclonal antibody to proprotein convertase subtilisin/kexin type 9 (PCSK9): a randomized, placebo–controlled Phase 2 study] … p.1278

Oncology - Cancer Risk. Findings from Academic Medical Center in the Area of Cancer Risk Reported (Phenotype, Cancer Risk, and Surveillance in Beckwith–Wiedemann Syndrome Depending on Molecular Genetic Subgroups) … p.1279

Drugs and Therapies - Coumarins and Indandiones. Findings from Academic Medical Center in the Area of Coumarins and Indandiones Reported (Quantitative Method for Simultaneous Analysis of a 5–Probe Cocktail for Cytochrome P450 Enzymes) … p.1280
Central Nervous System Diseases and Conditions - Subdural Hematoma. Findings from Aga Khan University Hospital Yields New Findings on Subdural Hematoma (Comparison of Irrigation versus No Irrigation during Burr Hole Evacuation of Chronic Subdural Hematoma) … p.1281

Antioxidants. Findings from Ahmedabad University Update Knowledge of Antioxidants (Can CuO nanoparticles lead to epigenetic regulation of antioxidant enzyme system?) … p.1282

Oncology - Lymphoma. Findings from Aichi Medical University Broaden Understanding of Lymphoma (Synergistic activity of Card11 mutant and Bcl6 in the development of diffuse large B–cell lymphoma in a mouse model) … p.1283

Lung Diseases and Conditions - Pneumonia. Findings from Aichi Medical University in the Area of Pneumonia Reported (Case–control study of pneumonia patients with Streptococcus anginosus group bacteria in their sputum) … p.1284

Oncology - Acute Leukemia. Findings from Ain Shams University Provides New Data on Acute Leukemia (Stanniocalcin1 gene expression in patients with acute leukemia: impact on response to therapy and disease outcome) … p.1285

Oncology - Lung Cancer. Findings from Ajou University Reveals New Findings on Lung Cancer (Baseline neutrophil–lymphocyte ratio is associated with baseline and subsequent presence of brain metastases in advanced non–smallcell lung cancer) … p.1286

DNA Research. Findings from Ajou University School of Medicine Broaden Understanding of DNA Research (Significance of the DNA–Histone Complex Level as a Predictor of Major Adverse Cardiovascular Events in Hemodialysis Patients: The Effect of Uremic Toxin on …) … p.1287

Drugs and Therapies - Pharmacoepidemiology. Findings from Ajou University School of Medicine Has Provided New Information about Pharmacoepidemiology (A normalization method for combination of laboratory test results from different electronic healthcare databases in a distributed research ...) … p.1288

Drugs and Therapies - Pharmaceutical Research. Findings from Ajou University Update Understanding of Pharmaceutical Research (Dual release and molecular mechanism of bilayered aceclofenac tablet using polymer mixture) … p.1289

Hormones. Findings from Akershus University Hospital in the Area of Hormones Reported (A systematic comparison of copy number alterations in four types of female cancer) … p.1290

Environmental Health - Environmental Research and Public Health. Findings from Al Zaytoonah University Reveals New Findings on Environmental Research and Public Health (Activity Pattern of Urban Adult Students in an Eastern Mediterranean Society) … p.1291

Intercellular Signaling Peptides and Proteins - Fibroblast Growth Factors. Findings from Albert Einstein College of Medicine Reveals New Findings on Fibroblast Growth Factors (Association of inflammatory, lipid and mineral markers with cardiac calcification in older adults) … p.1292

Lipid Research. Findings from Albert Einstein College of Medicine in Lipid Research Reported [Lipoprotein (a) level, apolipoprotein (a) size, and risk of unexplained ischemic stroke in young and middle–aged adults] … p.1293

Musculoskeletal Diseases and Conditions - Noonan Syndrome. Findings from Alfred I DuPont Hospital for Children Broaden Understanding of Noonan Syndrome (A Novel Rasopathy Caused by Recurrent De Novo Missense Mutations in PPP1CB Closely Resembles Noonan Syndrome with Loose Anagen Hair) … p.1295

Oncology - Colon Cancer. Findings from American Cancer Society in the Area of Colon Cancer Reported (Common variants in the obesity–associated genes FTO and MC4R are not associated with risk of colorectal cancer) … p.1297

Drugs and Therapies - Toxicology and Pharmacology. Findings from Amgen Has Provided New Data on Toxicology and Pharmacology (Carcinogenicity risk assessment of romosozumab: A review of scientific weight–of–evidence and findings in a rat lifetime pharmacology study) … p.1298

Life Science Research - Biological Macromolecules. Findings from Amirkabir University of Technology Update Knowledge of Biological Macromolecules (Encapsulation of Aloe Vera extract into natural Tragacanth Gum as a novel green wound healing product) … p.1299

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Findings from Anhui Medical University Yields New Findings on Chronic Hepatitis B Virus [NKp30(+)] NK cells are associated with HBV control during pegylated–interferon–alpha–2b therapy of chronic hepatitis B] … p.1300

Heart Disorders and Diseases - Heart Attack. Findings from Anjo–Kosei Hospital in the Area of Heart Attack Reported [Lipoprotein(a) levels predict adverse vascular events after acute myocardial infarction] … p.1301

Oncology - Cervical Cancer. Findings from Aristotle University Yields New Data on Cervical Cancer (Genetic polymorphisms of FAS and EVER genes in a Greek population and their susceptibility to cervical cancer: a case control study) … p.1302

Oncology - Prostate Cancer. Findings from Arizona State University Provides New Data about Prostate Cancer (Mathematical Models of Androgen Resistance in Prostate Cancer Patients under Intermittent Androgen Suppression Therapy) … p.1303

Oncology - Small Cell Lung Cancer. Findings from Arnaud de Villeneuve Hospital in the Area of Small Cell Lung Cancer Reported (Safety and Immunogenicity of the PRAME Cancer Immunotherapeutic in Patients with Resected Non–Small Cell Lung Cancer: A Phase I Dose Escalation Study) … p.1303

Chemical Research - Chemical Biology. Findings from Astex Pharmaceuticals Provides New Data on Chemical Biology (Structure of the Epigenetic Oncogene MMSET and Inhibition by N–Alkyl Sinefungin Derivatives) … p.1305

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Attikon University Hospital Provides New Data on Atrial Fibrillation (Acute effects of unilateral temporary stellate ganglion block on human atrial electrophysiological properties and atrial fibrillation inducibility) … p.1306
January 14, 2017

www.NewsRx.com

Lung Diseases and Conditions - Asthma. Findings from Benaroya Research Institute Broaden Understanding of Asthma (STAT6 Regulates the Development of Eosinophilic versus Neutrophilic Asthma in Response to Alternaria alternata) … p.1313

Autoimmune Diseases and Conditions - Multiple Sclerosis. Findings from Bezmiamek University Provides New Data about Multiple Sclerosis (Could Heterozygous Beta Thalassemia Provide Protection Against Multiple Sclerosis?) … p.1314

Drugs and Therapies - Toxicology and Pharmacology. Findings from Bharati Vidyapeeth Deemed University Provide New Insights into Toxicology and Pharmacology [Acute and repeated doses (28 days) oral toxicity study of Vicenin–1, a flavonoid glycoside isolated from fenugreek seeds in laboratory mice] … p.1315

Oncology - Myelogenous Leukemia. Findings from Binzhou Medical University Provide New Insights into Myelogenous Leukemia (HOXB4 knockdown reverses multidrug resistance of human myelogenous leukemia K562/ADM cells by downregulating P–gp, MRP1 and BCRP expression via PI3K/Akt ...) … p.1316

January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from Boston University Reveals New Findings on Obesity (Validating a summary measure of weight history for modeling the health consequences of obesity) … p.1319

Cysts. Findings from Boston University in the Area of Cysts Reported (Loss of Zeb2 in mesenchyme–derived nephrons causes primary glomerulocystic disease) … p.1320

Drugs and Therapies - Protease Inhibitors. Findings from Brussels Free University Provide New Insights into Protease Inhibitors [Limited HIV–1 Reactivation in Resting CD4(+) T cells from Aviremic Patients under Protease Inhibitors] … p.1321

Oncology - Breast Cancer. Findings from C. Chamizo and Co–Researchers Advance Knowledge in Breast Cancer (Determination of True ERBB2 Gene Amplification in Breast Cancer by Quantitative PCR Using a Reference and a Novel Control Gene) … p.1322

Gram-Positive Bacteria - Streptococcus. Findings from C. Das and Co–Authors Update Knowledge of Streptococcus (In silico dissection of Type VII Secretion System components across bacteria: New directions towards functional characterization) … p.1323

Drugs and Therapies - Immunotherapy. Findings from C. Gerard and Colleagues Provides New Insights into Immunotherapy (A Comprehensive Preclinical Model Evaluating the Recombinant PRAME Antigen Combined With the AS15 Immunostimulant to Fight Against PRAME–expressing Tumors) … p.1324

Gram-Negative Bacteria - Enterobacteriaceae. Findings from C. Pelat and Colleagues Update Understanding of Enterobacteriaceae (Hand Hygiene, Cohorting, or Antibiotic Restriction to Control Outbreaks of Multidrug–Resistant Enterobacteriaceae) … p.1325

Clinical Research - Clinical Trials and Studies. Findings from C. Reyes and Colleagues Provides New Insights into Clinical Trials and Studies (Risks and Benefits of Bisphosphonate Therapies) … p.1326

Proteins - Cytoskeletal Proteins. Findings from C. Sitzia and Co–Authors in the Area of Cytoskeletal Proteins Reported (Adaptive Immune Response Impairs the Efficacy of Autologous Transplantation of Engineered Stem Cells in Dystrophic Dogs) … p.1327

Heart Disorders and Diseases - Atrial Fibrillation. Findings from C.A. McHorney et al in Atrial Fibrillation Reported (Comparison of Adherence to Rivaroxaban Versus Apixaban Among Patients With Atrial Fibrillation) … p.1328

Liver Diseases and Conditions - Hepatitis C Virus. Findings from C.M. Owens and Co–Authors Update Knowledge of Hepatitis C Virus (Preclinical Profile and Clinical Efficacy of a Novel Hepatitis C Virus NS5A Inhibitor, EDP–239) … p.1329

DNA Research. Findings from CREST Research Project Update Knowledge of DNA Research (DNA recovery from a single bacterial cell using charge–reversible magnetic nanoparticles) … p.1331

Nephrology. Findings from Cambridge Institute for Medical Research Broadens Understanding of Nephrology (HIF prolyl hydroxylase inhibitors for the treatment of renal anaemia and beyond) … p.1331
January 14, 2017

Oncology - Prostate Cancer. Findings from Cambridge University Hospitals NHS Trust Broaden Understanding of Prostate Cancer (Cancer Specific Mortality in Men Diagnosed with Prostate Cancer before Age 50 Years: A Nationwide Population Based Study) ... p.1332

Nutritional and Metabolic Diseases and Conditions - Hyperglycemia. Findings from Cancer Institute in Hyperglycemia Reported [Management of hyperglycemia from epidermal growth factor receptor (EGFR) tyrosine kinase inhibitors (TKIs) targeting T790M-mediated resistance] ... p.1333

Digestive System Diseases and Conditions - Colitis. Findings from Capital Medical University Broaden Understanding of Colitis (Increased CD4 (+)CD45RA(−)FoxP3(low) cells alter the balance between Treg and Th17 cells in colitis mice) ... p.1334

Proteins - DNA-Binding Proteins. Findings from Capital Medical University in DNA–Binding Proteins Reported (Zinc–Doped Copper Oxide Nanocomposites Inhibit the Growth of Human Cancer Cells through Reactive Oxygen Species–Mediated NF–kappa B Activations) ... p.1335

Oncology - Multiple Myeloma. Findings from Capital Medical University in Multiple Myeloma Reported (Bortezomib–based treatment for multiple myeloma patients with renal impairment A systematic review and meta–analysis of observational studies) ... p.1336

Gram-Negative Bacteria - Helicobacter pylori. Findings from Capital Medical University in the Area of Helicobacter pylori Described (High antibiotic resistance rate: A difficult issue for Helicobacter pylori eradication treatment) ... p.1338

www.NewsRx.com

Atrial Septal Defects. Findings from Cardiology Clinic Broaden Understanding of Atrial Septal Defects (Percutaneous closure of isolated ostium secundum–type atrial septal defect in a patient with Mayer–Rokitansky–Kuster–Hauser syndrome) ... p.1339

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Catholic University of Korea Provide New Insights into Type 2 Diabetes (The Paradoxical Effects of AMPK on Insulin Gene Expression and Glucose–Induced Insulin Secretion) ... p.1339

Oncology - Bladder Cancer. Findings from Catholic University of Leuven in the Area of Bladder Cancer Reported (Phase III randomised chemoprevention study with selenium on the recurrence of non–invasive urothelial carcinoma. The SELEnium and BLAdder cancer Trial) ... p.1340

Nervous System Diseases and Conditions - Narcolepsy. Findings from Center for Integrative Genomics Provide New Insights into Narcolepsy (Narcolepsy–Associated HLA Class I Alleles Implicate Cell–Mediated Cytotoxicity) ... p.1342

Oncology - Esophageal Cancer. Findings from Central South University in the Area of Esophageal Cancer Reported (Using aptamers to elucidate esophageal cancer clinical samples) ... p.1343

Nephrology. Findings from Chaim Sheba Medical Center Yields New Data on Nephrology (Acute renal artery occlusion: Presentation, treatment, and outcome) ... p.1344

Musculoskeletal Diseases and Conditions - Necrotizing Fasciitis. Findings from Chang Gung University Provides New Data about Necrotizing Fasciitis (Synchronous multifocal necrotizing fasciitis prognostic factors: a retrospective case series study in a
January 14, 2017

Heart Disorders and Diseases - Cardiogenic Shock. Findings from Chang Gung University Update Understanding of Cardiogenic Shock (Associations with 30–day survival following extracorporeal membrane oxygenation in patients with acute ST segment elevation myocardial infarction and profound ...) ... p.1346

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Findings from Charite University Hospital and School of Medicine Update Knowledge of Diabetic Angiopathies (The TetO rat as a new translational model for type 2 diabetic retinopathy by inducible insulin receptor knockdown) ... p.1347

Liver Diseases and Conditions - Hepatitis C Virus. Findings from Charite University Hospital and School of Medicine Yields New Data on Hepatitis C Virus (Apolipoprotein E allele frequencies in chronic and self–limited hepatitis C suggest a protective effect of APOE4 in the course of hepatitis C ...) ... p.1348

Heart Disorders and Diseases - Heart Disease. Findings from Chengde Medical College Provides New Data about Heart Disease (Elevated serum uric acid and risk of cardiovascular or all–cause mortality in people with suspected or definite coronary artery disease: A meta–analysis) ... p.1349

Bacterial Infections and Mycoses - Bacteremia. Findings from Chiba University Broaden Understanding of Bacteremia (Clinical and bacteriological analyses of bacteremia due to Corynebacterium striatum) ... p.1350

Cardiovascular Diseases and Conditions - Hyperemia. Findings from Chiba University Update Understanding of Hyperemia (Efficacy of combined administration of intracoronary papaverine plus intravenous adenosine 5 ‘–triphosphate in assessment of fractional flow reserve) ... p.1351

Pediatrics. Findings from Children's Hospital Broaden Understanding of Pediatrics (Fifteen–minute consultation: the agar plates your microbiology colleagues want you to be scared about) ... p.1352

Oncology - Non–Small Cell Lung Cancer. Findings from Children's Hospital Provides New Data on Non–Small Cell Lung Cancer (miR–543 is up–regulated in gefitinib–resistant non–small cell lung cancer and promotes cell proliferation and invasion via phosphatase and tensin homolog) ... p.1353

Biotechnology - Pharmacogenomics. Findings from Children's Hospital Update Understanding of Pharmacogenomics (Statin–induced expression change of INSIG1 in lymphoblastoid cell lines correlates with plasma triglyceride statin response in a sex–specific manner) ... p.1354

Vascular Diseases. Findings from Children's Hospital Yields New Data on Vascular Diseases (The effect of physical activity on cardiometabolic health and inflammation in treated HIV infection) ... p.1355

Heart Valves. Findings from Children's Hospital Yields New Findings on Heart Valves (Hybrid pulmonary artery plication followed by transcatheter pulmonary valve replacement: Comparison with surgical PVR) ... p.1356

Cardiovascular Diseases and Conditions - Venous Thrombosis. Findings from Children's Hospital in Venous Thrombosis Reported (Neutrophil elastase–deficient mice form neutrophil extracellular traps in an experimental model of deep vein thrombosis) ... p.1357

www.NewsRx.com
Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Findings from Children's Hospital in the Area of Obstructive Sleep Apnea Described (Sleep Architecture Linked to Airway Obstruction and Intracranial Hypertension in Children with Syndromic Craniosynostosis) … p.1358

Cyclohexanes. Findings from China Medical University and Hospital Yields New Findings on Cyclohexanes (Changes in hippocampal AMPA receptors and cognitive impairments in chronic ketamine addiction models: another understanding of ketamine CNS toxicity) … p.1361

Oncology - Prostate Cancer. Findings from China Medical University and Hospital in the Area of Prostate Cancer Reported (BAP18 coactivates androgen receptor action and promotes prostate cancer progression) … p.1362

Oncology - Lung Cancer. Findings from Chinese Academy of Medical Sciences Provide New Insights into Lung Cancer (A Matched Comparison Study of Uniportal Versus Triportal Thoracoscopic Lobectomy and Sublobectomy for Early–stage Nonsmall Cell Lung Cancer) … p.1363

Chemistry. Findings from Chinese Academy of Sciences Update Knowledge of Chemistry (Toward High–Efficient Red Emissive Carbon Dots: Facile Preparation, Unique Properties, and Applications as Multifunctional Theranostic Agents) … p.1364

Chemistry. Findings from Chinese Academy of Sciences Yields New Findings on Chemistry [Near–Infrared (NIR) –Absorbing Conjugated Polymer Dots as Highly Effective Photothermal Materials for In Vivo Cancer Therapy] … p.1365

Oncology - Acute Myeloid Leukemia. Findings from Chinese People's Liberation Army General Hospital Provides New Data on Acute Myeloid Leukemia (Overexpression of ATP1B1 predicts an adverse prognosis in cytogenetically normal acute myeloid leukemia) … p.1366

Hematology - Plasma. Findings from Chinese University of Hong Kong Reveals New Findings on Plasma (Cell–free DNA in maternal plasma and serum: A comparison of quantity, quality and tissue origin using genomic and epigenomic approaches) … p.1367

Women's Health - Obstetrics and Gynecology. Findings from Chinese University of Hong Kong in the Area of Obstetrics and Gynecology Described (Noninvasive prenatal testing beyond genomic analysis: what the future holds) … p.1368

Oncology - Gliomas. Findings from Chongqing Medical University Broaden Understanding of Gliomas (Downregulation of Nitrogen Permease Regulator Like–2 Activates PDk1–Akl1 and Contributes to the Malignant Growth of Glioma Cells) … p.1369

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). Findings from Chung Ang University in the Area of Phosphotransferases (Alcohol Group Acceptor) Reported (Y–27632, a Rho–Associated Protein Kinase Inhibitor, Inhibits Voltage–Dependent K plus Channels in Rabbit Coronary Arterial Smooth Muscle …) … p.1370

Heart Disorders and Diseases - Ebstein Anomaly. Findings from College of Nursing in Ebstein Anomaly Reported (Restoration of Tricuspid Valve Mechanism at the Level of Displaced Septal and Posterior Leaflets in Ebstein's Anomaly) … p.1372

Enzymes and Coenzymes - Carboxylic Ester Hydrolases. Findings from College of Pharmacy Provides New Data about Carboxylic Ester Hydrolases (Phospholipase A2 Isoforms as Novel Targets for Prevention and Treatment of Inflammatory and Oncologic Diseases) … p.1373

Mycobacterium Infections - Tuberculosis. Findings from Colorado State University Broaden Understanding of Tuberculosis (Therapeutic Potential of the Mycobacterium tuberculosis Mycolic Acid Transporter, MmpL3) … p.1374

Hyperplasia. Findings from Columbia University Update Understanding of Hyperplasia (Targeting of Ras–mediated FGF signaling suppresses Pten–deficient skin tumor) … p.1375

DNA Research. Findings from Commonwealth Scientific and Industrial Research Organisation (CSIRO) Has Provided New Data on DNA Research (Co–localized genomic regulation of miRNA and mRNA via DNA methylation affects survival in multiple tumor types) … p.1376

Autoimmune Diseases and Conditions - Multiple Sclerosis. Findings from Complutense University Yields New Data on Multiple Sclerosis (Analysis of the Relationship between the Month of Birth and Risk of Multiple Sclerosis in a Spanish Population) … p.1377

Liver Diseases and Conditions - Hepatitis. Findings from Croix Rousse Hospital Update Understanding of Hepatitis (Efficiency and Safety of an Early Dose Adjustment of Ribavirin in Patients Infected With Hepatitis C Underexposed to the Drug and Treated With Peginterferon Ribavirin) … p.1378

Life Science Research - Botany. Findings from Curtin University Update Knowledge of Botany (Differential effector gene expression underpins epistasis in a plant fungal disease) … p.1379

Oncology - Neuroblastomas. Findings from D. Di Paolo and Co–Authors Broaden Understanding of Neuroblastomas (New therapeutic strategies in neuroblastoma: combined targeting of a novel tyrosine kinase inhibitor and liposomal siRNAs against ALK) … p.1380

Oncology - Lung Cancer. Findings from D.M. Jiao and Colleagues Update Understanding of Lung Cancer (Curcumin inhibited HGF–induced EMT and angiogenesis through regulating c–Met dependent PI3K/Akt/mTOR signaling pathways in lung cancer) … p.1382

Cardiovascular Research. Findings from Dalhousie University Broaden Understanding of Cardiovascular Research (Quality of Care for Percutaneous Coronary Intervention: Development of Canadian Cardiovascular Society Quality Indicators) … p.1383
Oncology - Ovarian Cancer. Findings from Dalhousie University Broaden Understanding of Ovarian Cancer (Contribution of reactive oxygen species to ovarian cancer cell growth arrest and killing by the anti–malarial drug artemunate) … p.1384

Immunization - Vaccines. Findings from Dalhousie University Broaden Understanding of Vaccines (Respiratory macrophages regulate CD4 T memory responses to mucosal immunization with recombinant adenovirus–based vaccines) … p.1385

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Findings from Dalhousie University Update Knowledge of Alzheimer Disease (Reduced fibrillar beta–amyloid in subcortical structures in a butyrylcholinesterase–knockout Alzheimer disease mouse model) … p.1386

Oncology - Carcinomas. Findings from Dalian Medical University Has Provided New Data on Carcinomas (The expression and significance of WT1 in xenotransplanted ovarian carcinoma treated by paclitaxel) … p.1387

Phenethylamines. Findings from Dalian Medical University Update Understanding of Phenethylamines (Effects of P–glycoprotein on the intestine and blood–brain barrier transport of YZG–331, a promising sedative–hypnotic compound) … p.1388

Amyotrophic Lateral Sclerosis. Findings from Dana–Farber Cancer Institute Provide New Insights into Amyotrophic Lateral Sclerosis (Two familial ALS proteins function in prevention/repair of transcription–associated DNA damage) … p.1389

Hematologic Diseases and Conditions - Thrombocytopenia. Findings from Dana–Farber Cancer Institute in the Area of Thrombocytopenia Described (Aminocaproic acid use in hospitalized patients with hematological malignancy: a case series) … p.1390

DNA Research. Findings from Dankook University College of Medicine in DNA Research Reported (Early Prediction of Hypertensive Disorders of Pregnancy Using Cell–Free Fetal DNA, Cell–Free Total DNA, and Biochemical Markers) … p.1391

Heart Disorders and Diseases - Heart Attack. Findings from Department of Cardiology Broaden Understanding of Heart Attack (Association of ADAMTS–7 Levels with Cardiac Function in a Rat Model of Acute Myocardial Infarction) … p.1392

Oncology - Thyroid Cancer. Findings from Department of Endocrinology Broaden Understanding of Thyroid Cancer (Time course of Graves' orbitopathy after total thyroidectomy and radioiodine therapy for thyroid cancer) … p.1393

Oncology - Gastric Cancer. Findings from Department of Gastroenterology Broadens Understanding of Gastric Cancer (Clinicopathological Outcomes of Patients with Early Gastric Cancer after Non–Curative Endoscopic Submucosal Dissection) … p.1394

Oncology - Gastric Cancer. Findings from Department of General Surgery in the Area of Gastric Cancer Described (TRIM25 blockade by RNA interference inhibited migration and invasion of gastric cancer cells through TGF–b signaling) … p.1395

Lymphoid Tissue. Findings from Department of Medical Genetics Has Provided New Data on Lymphoid Tissue (Spleen hypoplasia leads to abnormal stress hematopoiesis in mice with loss of Pbx homeoproteins in splenic mesenchyme) … p.1396
Drugs and Therapies - Flumazenil Therapy. Findings from Department of Neurology Update Knowledge of Flumazenil Therapy (Flumazenil for the Treatment of Refractory Hypersomnolence: Clinical Experience with 153 Patients) … p.1397

Hemorrhage. Findings from Department of Neurology Yields New Data on Hemorrhage (Temporal kinetics of organ damage in copper toxicity: A histopathological correlation in rat model) … p.1398

Central Nervous System Diseases and Conditions - Subdural Hematoma. Findings from Department of Neurosurgery Yields New Findings on Subdural Hematoma (Optimal perioperative management of antithrombotic agents in patients with chronic subdural hematoma) … p.1399

Oncology - Acute Myeloid Leukemia. Findings from Department of Pathology in the Area of Acute Myeloid Leukemia Reported (Improved Minimal Residual Disease Detection by Targeted Quantitative Polymerase Chain Reaction in Nucleophosmin 1 Type a Mutated Acute Myeloid Leukemia) … p.1400

Drugs and Therapies - Cell Therapy. Findings from Department of Pediatrics Reveals New Findings on Cell Therapy (Toxicity and management in CAR T–cell therapy) … p.1401

Salicylic Acids. Findings from Department of Pharmacology Yields New Data on Salicylic Acids (Aspirin prevents bone loss with little mechanical improvement in high–fat–fed ovariectomized rats) … p.1402

Hematologic Diseases and Conditions - Sickle Cell Anemia. Findings from Department of Pharmacology Yields New Findings on Sickle Cell Anemia (Neonates with sickle cell disease are vulnerable to blue light phototherapy–induced oxidative stress and proinflammatory cytokine elevations) … p.1403

Health and Medicine - Urology. Findings from Department of Urology Provide New Insights into Urology (Bladder Preservation Therapy: A Review of the Literature and Future Directions) … p.1404

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Diabetes Center Provides New Data on Type 2 Diabetes (How much is too much? Outcomes in patients using high–dose insulin glargine) … p.1405

Liver Diseases and Conditions - Fatty Liver. Findings from Diabetes Institute Yields New Data on Fatty Liver (Serum uric acid is independently and linearly associated with risk of nonalcoholic fatty liver disease in obese Chinese adults) … p.1406

Stem Cell Research. Findings from Dongguk University Ilsan Hospital in Stem Cell Research Reported (Endogenous Cartilage Repair by Recruitment of Stem Cells) … p.1407

Heart Disorders and Diseases - Heart Attack. Findings from Dongyang University in the Area of Heart Attack Reported (Plant–based foods containing cell wall polysaccharides rich in specific active monosaccharides protect against myocardial injury in rat myocardial infarction models) … p.1408

Agrochemicals. Findings from Dow Chemical in the Area of Agrochemicals Described [Tiered application of the neutral red release and EpiOcular (TM) assays for evaluating the eye irritation potential of agrochemical formulations] … p.1409

Hematologic Diseases and Conditions - Sickle Cell Anemia. Findings from Drexel University Provide New Insights into Sickle Cell Anemia (Sickle cell disease: Its molecular mechanism and the one drug that treats it) … p.1410
January 14, 2017

Nursing - Oncology Nursing. Findings from Duke Cancer Institute Broaden Understanding of Oncology Nursing (Radon Exposure: Using the Spectrum of Prevention Framework to Increase Healthcare Provider Awareness) … p.1411

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Duke Clinical Research Institute Update Understanding of Atrial Fibrillation (Off–Label Dosing of Non–Vitamin K Antagonist Oral Anticoagulants and Adverse Outcomes The ORBIT–AF II Registry) … p.1412

Infectious Diseases and Conditions. Findings from Duke University Broaden Understanding of Infectious Diseases and Conditions (Surgical Site Infections An Update) … p.1413

Coagulation. Findings from Duke University Provides New Data about Coagulation (Discontinuation and management of direct–acting anticoagulants for emergency procedures) … p.1413

Gender and Health. Findings from Duke University Update Knowledge of Gender and Health (Statin Adherence: Does Gender Matter?) … p.1414

DNA Research. Findings from Duke University in the Area of DNA Research Reported (Global analysis of genomic instability caused by DNA replication stress in Saccharomyces cerevisiae) … p.1415

Lung Diseases and Conditions - Asthma. Findings from Durban University of Technology Broaden Understanding of Asthma [Tumour necrosis factor alpha polymorphism (TNF–308 alpha G/A) in association with asthma related phenotypes and air pollutants among children in KwaZulu–Natal] … p.1416

www.NewsRx.com

Prothrombin. Findings from E. Bernardi et al Update Understanding of Prothrombin (Management Strategies for Vitamin K Antagonists Reversal in Patients With Major Bleeding: A Survey of Italian Emergency Departments) … p.1417

Oncology - Acute Myeloid Leukemia. Findings from E. Ma and Co–Authors Update Knowledge of Acute Myeloid Leukemia (An Evaluation of Treatment Patterns and Outcomes in Elderly Patients Newly Diagnosed With Acute Myeloid Leukemia: A Retrospective Analysis of Electronic Medical ...) … p.1418

Enzymes and Coenzymes. Findings from East China University of Science and Technology Provides New Data about Enzymes and Coenzymes (Highly Selective Fluorescent Turn–On Probe for Protein Thiols in Biotin Receptor–Positive Cancer Cells) … p.1420

Coagulation. Findings from Eberhard–Karls University in Coagulation Reported (Safety of transesophageal echocardiography during extracorporeal life support) … p.1421

Oncology - Bladder Cancer. Findings from Eberhard–Karls University in the Area of Bladder Cancer Reported (Ten Years of Complete Remission of Pulmonary Metastasis after Post–Cystectomy Palliative Cisplatin–Gemcitabine Chemotherapy with Gefitinib for Muscle Invasive ...) … p.1422

Drugs and Therapies - Pharmacy and Pharmaceutical Sciences. Findings from Eli Lilly Provides New Data on Pharmacy and Pharmaceutical Sciences (Evaluation and Optimization of Blood Micro-Sampling Methods: Serial Sampling in a Cross-Over Design from an Individual Mouse) ... p.1424

Autoimmune Diseases and Conditions - Multiple Sclerosis. Findings from Eli Lilly Yields New Findings on Multiple Sclerosis (Pharmacological Characterization of a Potent Inhibitor of Autotaxin in Animal Models of Inflammatory Bowel Disease and Multiple Sclerosis) ... p.1425

Biological Factors - Metalloporphyrins. Findings from Emory University Broaden Understanding of Metalloporphyrins [Oxygen and Bis(3',5')-cyclic Dimeric Guanosine Monophosphate Binding Control Oligomerization State Equilibria of Diguanylate Cyclase-Containing Globin Coupled Sensors] ... p.1426

Drugs and Therapies - Antiretrovirals. Findings from Emory University Provides New Data on Antiretrovirals [CD8(+) Lymphocytes Are Required for Maintaining Viral Suppression in SIV-Infected Macaques Treated with Short-Term Antiretroviral Therapy] ... p.1427

Cardiovascular Research. Findings from Erasmus University Medical Center Provide New Insights into Cardiovascular Research (Reasons to Participate or not to Participate in Cardiovascular Health Checks: A Review of the Literature) ... p.1428

Bone Research. Findings from Eunice Kennedy Shriver National Institute of Child Health and Human Development Provides New Data about Bone Research [Bone Abnormalities in Mice with Protein Kinase A (PKA) Defects Reveal a Role of Cyclic AMP Signaling in Bone ...] ... p.1429

Musculoskeletal Diseases and Conditions - Osteogenesis Imperfecta. Findings from Eunice Kennedy Shriver National Institute of Child Health and Human Development Yields New Data on Osteogenesis Imperfecta [Osteoblast Malfunction Caused by Cell Stress Response to Procollagen Misfolding in alpha 2(I)-G610C Mouse ...] ... p.1430

Oncology - Peripheral T-Cell Lymphoma. Findings from European Institute of Oncology Broaden Understanding of Peripheral T-Cell Lymphoma (Molecular investigation of coexistent chronic myeloid leukaemia and peripheral T-cell lymphoma – a case report) ... p.1431

Nosocomial Diseases and Conditions - Ventilator-Associated Pneumonia. Findings from F. Sbrana and Colleagues Update Understanding of Ventilator-Associated Pneumonia (Risk factors for ventilator associated pneumonia due to carbapenemase-producing Klebsiella pneumoniae in mechanically ventilated patients with ...) ... p.1432

Oncology - Cancer Care. Findings from F.M. van Nuenen et al Has Provided New Information about Cancer Care (Feasibility of implementing the 'Screening for Distress and Referral Need' process in 23 Dutch hospitals) ... p.1433

Genetics - Medical Genetics. Findings from Faculty of Medicine Update Knowledge of Medical Genetics (Associated anomalies in cases with anotia and microtia) ... p.1434

Oncology - Cancer Epidemiology. Findings from Faculty of Medicine Yields New Findings on Cancer Epidemiology (The burden of oesophageal cancer in Central and South America) ... p.1435
Oncology - Head and Neck Cancer. Findings from Faculty of Medicine in Head and Neck Cancer Reported (Quality of life impairment in patients with head and neck cancer and their caregivers: a comparative study) … p.1436

Drugs and Therapies - Cancer Therapy. Findings from Federal University Update Understanding of Cancer Therapy (Roles of OCT4 in tumorigenesis, cancer therapy resistance and prognosis) … p.1438

Peptide Proteins - Proinsulin. Findings from Federal University Yields New Findings on Proinsulin (L–Arginine supplementation improves insulin sensitivity and beta cell function in the offspring of diabetic rats through AKT and PDX–1 activation) … p.1439

Musculoskeletal Diseases and Conditions - Osteopetrosis. Findings from Federal University in the Area of Osteopetrosis Described (Bone Mineral Density and Microarchitecture in Patients With Autosomal Dominant Osteopetrosis: A Report of Two Cases) … p.1440

Oncology - Colon Cancer. Findings from First Affiliated Hospital in the Area of Colon Cancer Reported (5–Fluorouracil induces apoptosis of colorectal cancer cells) … p.1441

Oncology - Breast Cancer. Findings from First Hospital Provide New Insights into Breast Cancer (Juglone loaded poloxamer 188/phospholipid mixed micelles evaluated in vitro and in vivo in breast cancer) … p.1442

Liver Diseases and Conditions - Hepatitis B Virus. Findings from First Hospital of Jilin University Provide New Insights into Hepatitis B Virus (Association between hepatitis B virus infection and risk of multiple myeloma: a systematic review and meta–analysis) … p.1443

Drugs and Therapies - Antivirals. Findings from Florida State University in Antivirals Provides New Insights (Differential Binding of Rimantadine Enantiomers to Influenza A M2 Proton Channel) … p.1444

Hormones. Findings from Fourth Military Medical University in the Area of Hormones Reported (Snapshot: implications for melatonin in endoplasmic reticulum homeostasis) … p.1445

Inflammation. Findings from French National Institute of Health and Medical Research (INSERM) Broaden Understanding of Inflammation (Western diet induces a shift in microbiota composition enhancing susceptibility to Adherent–Invasive E. coli infection and ...) … p.1445

Eye Diseases and Conditions - Retinal Vein Occlusion. Findings from French National Institute of Health and Medical Research (INSERM) Provide New Insights into Retinal Vein Occlusion (Two–year, prospective, multicenter study of the use of dexamethasone intravitreal implant for treatment of macular ...) … p.1446

Drugs and Therapies - Antiretrovirals. Findings from French National Institute of Health and Medical Research (INSERM) in Antiretrovirals Reported (Efficacy and safety of a switch to rilpivirine–based regimens in treatment–experienced HIV–1–infected patients: a cohort study) … p.1448
January 14, 2017

Drugs and Therapies - Fundamental and Clinical Pharmacology. Findings from French National Institute of Health and Medical Research (INSERM) in the Area of Fundamental and Clinical Pharmacology Described (Illicit drugs or medicines taken by parachuting) … p.1449

Transplant Medicine - Liver Transplants. Findings from French National Institute of Health and Medical Research (INSERM) in the Area of Liver Transplant Reported (A high performance liquid chromatography tandem mass spectrometry for the quantification of tacrolimus in human bile in ...) … p.1450

Oncology - Gastric Cancer. Findings from Fudan University Update Understanding of Gastric Cancer (Glycoprotein 130 is associated with adverse postoperative clinical outcomes of patients with late-stage non-metastatic gastric cancer) … p.1451

Cardiovascular Diseases and Conditions - Aneurysm. Findings from Fukuoka University in Aneurysm Reported (Assessment of intracranial aneurysm rupture based on morphology parameters and anatomical locations) … p.1452

Oncology - Carcinomas. Findings from Fudan University in the Area of Carcinomas Reported (Depletion of the triggering receptor expressed on myeloid cells 2 inhibits progression of renal cell carcinoma via regulating related protein expression and PTEN–PI3K/Akt pathway) … p.1453

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Gachon University in the Area of Atrial Fibrillation Described (Circadian variations in laboratory measurements of coagulation assays after administration of rivaroxaban or warfarin in patients with nonvalvular atrial fibrillation) … p.1454

www.NewsRx.com

Oncology - Esophageal Cancer. Findings from G. Lin et al in Esophageal Cancer Reported (Increasing the interval between neoadjuvant chemoradiotherapy and surgery in esophageal cancer: a meta-analysis of published studies) … p.1455

Gram-Negative Bacteria - Escherichia coli. Findings from G. Mourand et al in Escherichia coli Reported (Rare Spontaneous Loss of Multiresistance Gene Carrying IncI/ST12 Plasmid in Escherichia coli in Pig Microbiota) … p.1456

Hydrocarbons. Findings from G.M. Rusch and Co–Authors Broaden Understanding of Hydrocarbons (An approach for the development of emergency response levels for halogenated hydrocarbons) … p.1458

Nutritional and Metabolic Diseases and Conditions - Morbid Obesity. Findings from GNS Science Yields New Findings on Morbid Obesity (Morbid Obesity in Disasters: Bringing the “Conspicuously Invisible” into Focus) … p.1459

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Findings from Gachon University Yields New Findings on Inflammatory Bowel Disease (MicroRNA–132 and microRNA–223 control positive feedback circuit by regulating FOXO3a in inflammatory bowel disease) … p.1460
Oncology - Leukemia. Findings from General Hospital Provides New Data about Leukemia (Sulforaphane–induced apoptosis in human leukemia HL–60 cells through extrinsic and intrinsic signal pathways and altering associated genes expression assayed by cDNA microarray) … p.1461

Transplant Medicine - Organ Transplants. Findings from Georges Pompidou European Hospital in the Area of Organ Transplants Reported (Early Identification of Patients With Out–of–Hospital Cardiac Arrest With No Chance of Survival and Consideration for Organ Donation) … p.1462

Hematology - Plasma. Findings from Georgetown University Has Provided New Data on Plasma (The enigma of continual plasma volume expansion in pregnancy: critical role of the renin–angiotensin–aldosterone system) … p.1463

Mosquito-Borne Diseases - Malaria. Findings from Georgetown University Reveals New Findings on Malaria (Endoperoxide Drug Cross–Resistance Patterns for Plasmodium falciparum Exhibiting an Artemisinin Delayed–Clearance Phenotype) … p.1464

Inflammation. Findings from Georgetown University in the Area of Inflammation Described (Rac1–Mediated DNA Damage and Inflammation Promote Nf2 Tumorigenesis but Also Limit Cell–Cycle Progression) … p.1465

Immunology - CD Antigens. Findings from Georgia Institute of Technology Yields New Data on CD Antigens [Local Cellular and Cytokine Cues in the Spleen Regulate In Situ T Cell Receptor Affinity, Function, and Fate of CD8(+) T Cells] … p.1466

Drugs and Therapies - Antihyperuricemic Agents. Findings from Ghent University Has Provided New Data on Antihyperuricemic Agents (Sampling on ice will not yield reliable uric acid monitoring in rasburicase–treated patients) … p.1467

Cardiovascular Diseases and Conditions - Venous Thrombosis. Findings from Gil Medical Center Broaden Understanding of Venous Thrombosis (Living Donor Liver Transplantation in a Patient With Extensive Portomesenteric Venous Thrombosis: Case Report) … p.1468

Pharmacology. Findings from GlaxoSmithKline Reveals New Findings on Pharmacology (Apneic events – A proposed new target for respiratory safety pharmacology) … p.1470

Stem Cell Research - Hematopoietic Stem Cells. Findings from Goethe–University in Hematopoietic Stem Cells Provides New Insights (DNA–damage response gene GADD45A induces differentiation in hematopoietic stem cells without inhibiting cell cycle or survival) … p.1471

Oncology - Cancer Risk. Findings from Government Medical College Update Understanding of Cancer Risk (Cytochrome P450 1A1 genetic polymorphisms as cancer biomarkers) … p.1472

Reactive Oxygen Species. Findings from Grigore T. Popa University of Medicine and Pharmacy Has Provided New Data on Reactive Oxygen Species (In vitro Evaluation of Morphological Integrity of Dental Enamel Exposed to Carbamide Peroxide–based Bleaching Agent) … p.1473
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from H. Naik and Co–Researchers in the Area of Type 2 Diabetes Described (Application of pharmacometric approaches to evaluate effect of weight and renal function on pharmacokinetics of alogliptin) ... p.1474

Stem Cell Research. Findings from H. Patel et al Update Understanding of Stem Cell Research (Testicular Stem Cells Express Follicle–Stimulating Hormone Receptors and Are Directly Modulated by FSH) ... p.1475

Oncology - Liver Cancer. Findings from H.G. Lu et al in Liver Cancer Reported (Novel substituted aminothiazoles as potent and selective anti–hepatocellular carcinoma agents) ... p.1476

Oncology - Breast Cancer. Findings from Harbin Medical University Provides New Data on Breast Cancer [Initial experience of automated breast volume scanning (ABVS) and ultrasound elastography in predicting breast cancer subtypes and staging] ... p.1478

Biological Factors - Metalloporphyrins. Findings from Harbin Medical University Update Understanding of Metalloporphyrins (Enhancement of DEN–induced liver tumorigenesis in heme oxygenase–1 G143H mutant transgenic mice) ... p.1479

www.NewsRx.com

Oncology - Breast Cancer. Findings from Harbin Medical University in the Area of Breast Cancer Reported (Histone H3 lysine 23 acetylation is associated with oncogene TRIM24 expression and a poor prognosis in breast cancer) ... p.1480

RNA Viruses - Influenza A Virus. Findings from Harbin Veterinary Research Institute Broaden Understanding of Influenza A Virus (Human antibody 3E1 targets the HA stem region of H1N1 and H5N6 influenza A viruses) ... p.1481

Stem Cell Research - Hematopoietic Stem Cells. Findings from Harvard School of Medicine Provides New Data about Hematopoietic Stem Cells (Epigenetic Memory Underlies Cell–Autonomous Heterogeneous Behavior of Hematopoietic Stem Cells) ... p.1482

Cardiovascular Diseases and Conditions - Aneurysm. Findings from Harvard School of Medicine Provides New Data on Aneurysm (Pipeline Embolization Device for small paraophthalmic artery aneurysms with an emphasis on the anatomical relationship of ophthalmic artery origin and aneurysm) ... p.1483

Mycobacterium Infections - Tuberculosis. Findings from Harvard School of Medicine Provides New Data on Tuberculosis (Genomic Analysis of the Evolution of Fluoroquinolone Resistance in Mycobacterium tuberculosis Prior to Tuberculosis Diagnosis) ... p.1484

Heart Disorders and Diseases - Tachycardia. Findings from Harvard School of Medicine Reveals New Findings on Tachycardia (Evaluation of a novel high–resolution mapping technology for ablation of recurrent scar–related atrial tachycardias) ... p.1486
January 14, 2017

Oncology - Glioblastomas. Findings from Harvard School of Medicine Update Knowledge of Glioblastomas (Demonstration of DCE–MRI as an early pharmacodynamic biomarker of response to VEGF Trap in glioblastoma) … p.1487

Oncology - Carcinomas. Findings from Harvard School of Medicine Update Understanding of Carcinomas (Targeting PD–1/PD–L1 in the treatment of metastatic renal cell carcinoma) … p.1488

Intercellular Signaling Peptides and Proteins - Cytokines. Findings from Harvard School of Medicine Update Understanding of Cytokines (Aire Inhibits the Generation of a Perinatal Population of Interleukin–17A–Producing gamma delta T Cells to Promote Immunologic Tolerance) … p.1489

Autoimmune Diseases and Conditions. Findings from Haukeland Hospital in Autoimmune Diseases and Conditions Reported (AIRE–mutations and autoimmune disease) … p.1490

Oncology - Ovarian Cancer. Findings from Haydarpasa Numune Education and Research Hospital Broaden Understanding of Ovarian Cancer (The ovarian cancers in geriatric population: the validity of inflammatory markers, malignancy risk indices 1, 2, 3, 4, and CA–125 levels in ...) … p.1490

Heart Disorders and Diseases - Heart Attack. Findings from Heart of England NHS Foundation Trust in the Area of Heart Attack Reported (Characteristics of patients who are not resuscitated in out of hospital cardiac arrests and opportunities to improve community response to cardiac arrest) … p.1491

www.NewsRx.com

Intracellular Space. Findings from Hebrew University Broaden Understanding of Intracellular Space (Emulating proton–induced conformational changes in the vesicular monoamine transporter VMAT2 by mutagenesis) … p.1492

Liver Diseases and Conditions - Hepatitis C Virus. Findings from Henan University Provides New Data on Hepatitis C Virus (Hepatitis C virus promotes hepatocellular carcinogenesis by targeting TIPE2, a new regulator of DNA damage response) … p.1494

Nephrology - Kidney Research. Findings from Henri Mondor Hospital Provide New Insights into Kidney Research (Repression of CMIP transcription by WT1 is relevant to podocyte health) … p.1495

Oncology - Squamous Cell Carcinoma. Findings from Hiroshima University in the Area of Squamous Cell Carcinoma Reported (Ability of Fluorine–18 Fluorodeoxyglucose Positron Emission Tomography to Predict Outcomes of Neoadjuvant Chemoradiotherapy Followed by Surgical Treatment for ...) … p.1496

Diet and Nutrition. Findings from Hong Kong Polytechnic University Yields New Data on Diet and Nutrition (Association between dietary fibre intake with cancer and all–cause mortality among 15 740 adults: the National Health and Nutrition Examination Survey III) … p.1498
January 14, 2017

Oncology - Oral Squamous Cell Carcinoma. Findings from Hong Kong University of Science and Technology Has Provided New Data on Oral Squamous Cell Carcinoma (Long non–coding RNA UCA1 contributes to the progression of oral squamous cell carcinoma by regulating the WNT/beta–catenin ...) ... p.1499

Transplant Medicine - Kidney Transplants. Findings from Hospital Clinic Reveals New Findings on Kidney Transplants (Bortezomib for refractory acute antibody–mediated rejection in kidney transplant recipients: A single–centre case series) ... p.1500

Oncology - Acute Myeloid Leukemia. Findings from Hospital Clinic in Acute Myeloid Leukemia Provides New Insights (The lincRNA HOTAIR1, located in the HOXA genomic region, is expressed in acute myeloid leukemia, impacts prognosis in patients in the intermediate–risk cytogenetic ...) ... p.1501

Heart Disorders and Diseases - Heart Attack. Findings from Hospital Clinico Universitario Broadens Understanding of Heart Attack (Inhomogeneity of collagen organization within the fibrotic scar after myocardial infarction: results in a swine model and in human samples) ... p.1502

Nutritional and Metabolic Diseases and Conditions - Malnutrition. Findings from Hospital for Special Surgery Provides New Data on Malnutrition (Malnutrition Increases With Obesity and Is A Stronger Independent Risk Factor for Postoperative Complications: A Propensity–Adjusted Analysis of Total Hip ...) ... p.1503

Cardiology. Findings from Howard Hughes Medical Institute Broaden Understanding of Cardiology (Single–Cell Resolution of Temporal Gene Expression during Heart Development) ... p.1504

www.NewsRx.com

Drugs and Therapies - Antineoplastics. Findings from Huaiyin Institute of Technology Yields New Data on Antineoplastics (Novel morphology change of Au–Methotrexate conjugates: From nanochains to discrete nanoparticles) ... p.1505

Oncology - Breast Cancer. Findings from Huazhong University of Science and Technology Provide New Insights into Breast Cancer (Addition of the p110 alpha inhibitor BYL719 overcomes targeted therapy resistance in cells from Her2–positive–PTEN–loss breast cancer) ... p.1506

Oncology - Non-Small Cell Lung Cancer. Findings from Hyogo Cancer Center Yields New Findings on Non–Small Cell Lung Cancer (Re–Assessment of Intentional Extended Segmentectomy for Clinical T1aN0 Non–Small Cell Lung Cancer) ... p.1507

Liver Diseases and Conditions - Hepatitis C Virus. Findings from IDIBAPS Provide New Insights into Hepatitis C Virus (Boceprevir plus pegylated interferon/ribavirin to re–treat hepatitis C virus genotype 1 in HIV–HCV co–infected patients: final results of the Spanish BOC HIV–HCV Study) ... p.1508

Drugs and Therapies - Central Nervous System Agents. Findings from Illinois State University in the Area of Central Nervous System Agents Reported (Modafinil Activates Phasic Dopamine Signaling in Dorsal and Ventral Striata) ... p.1511
DNA Research. Findings from Imperial College Provides New Data on DNA Research (Single–Molecule Studies of Unlabeled Full–Length p53 Protein Binding to DNA) … p.1512

Sulfur Amino Acids. Findings from Imperial College Provides New Data on Sulfur Amino Acids (The Salmonella Effector SpvD Is a Cysteine Hydrolase with a Serovar–specific Polymorphism Influencing Catalytic Activity, Suppression of Immune Responses, and Bacterial ...) … p.1513

Drugs and Therapies - Pharmaceutical Research. Findings from Imperial College in Pharmaceutical Research Reported (ATR–FTIR spectroscopic imaging to study the drying and dissolution of pharmaceutical polymer–based films) … p.1514

Drugs and Therapies - Antibiotics. Findings from Indian Institute of Science Provides New Data about Antibiotics (High Antibacterial Activity of Functionalized Chemically Exfoliated MoS2) … p.1515

Emergency Treatment. Findings from Indiana University in Emergency Treatment Reported (Being There: Inpatients' Perceptions Of Family Presence During Resuscitation And Invasive Cardiac Procedures) … p.1516

Oncology - Glottic Cancer. Findings from Inonu University Provide New Insights into Glottic Cancer (Dosimetric comparison of helical tomotherapy, intensity–modulated radiation therapy, volumetric–modulated arc therapy, and 3–dimensional conformal therapy for the ...) … p.1517

Transplant Medicine - Heart Transplants. Findings from Inova Fairfax Hospital Provide New Insights into Heart Transplants (Long–term outcomes of heart transplant recipients with hepatitis C positivity: the data from the US transplant registry) … p.1518

Immunology - Mononuclear Phagocyte System. Findings from Insmed Inc. Update Knowledge of Mononuclear Phagocyte System (Pulmonary Deposition and Elimination of Liposomal Amikacin for Inhalation and Effect on Macrophage Function after Administration in Rats) … p.1519

Gram-Negative Bacteria - Escherichia coli. Findings from Institute Butantan Provide New Insights into Escherichia coli (Characterization of the universal stress protein F from atypical enteropathogenic Escherichia coli and its prevalence in Enterobacteriaceae) … p.1520

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from Institute for Biochemistry Update Knowledge of Obesity [Cardiac–Specific Down–Regulation of Carnitine Palmitoyltransferase–1b (CPT–1b) Prevents Cardiac Remodeling in Obese Mice] … p.1521

Blood Diseases and Conditions - Sepsis. Findings from Institute for Cancer Research and Treatment (IRCCS) Broaden Understanding of Sepsis (Cardiac dysfunction and circulating cardiac markers during sepsis) … p.1522

Clinical Research - Clinical Trials and Studies. Findings from Institute for Cancer Research and Treatment (IRCCS) Provides New Data about Clinical Trials and Studies (Brain and cognitive functions in two groups of naive HIV patients selected for a different plan of antiretroviral therapy: A ...) … p.1523

Drugs and Therapies - Chemotherapy. Findings from Institute for Cancer Research and Treatment (IRCCS) in the Area of Chemotherapy Described (Efficacy of adjuvant chemotherapy in early stage uterine leiomyosarcoma: A systematic review and meta–analysis) … p.1524
January 14, 2017

www.NewsRx.com

Oncology - Squamous Cell Carcinoma. Findings from Institute for Cancer Research and Treatment (IRCCS) in the Area of Squamous Cell Carcinoma Described (Phase II clinical study of valproic acid plus cisplatin and cetuximab in recurrent and/or metastatic squamous cell carcinoma of …) … p.1525

Drugs and Therapies - Drug Delivery Systems. Findings from Institute for Food Research Provides New Data on Drug Delivery Systems (Nerve cell–mimicking liposomes as biosensor for botulinum neurotoxin complete physiological activity) … p.1526

Cardiovascular Diseases. Findings from Institute for Health Research Provide New Insights into Cardiovascular Diseases [Association between a dietary carbohydrate index and cardiovascular disease in the SUN (Seguimiento Universidad de Navarra) Project] … p.1527

Oncology - Liver Cancer. Findings from Institute for Medical Research Yields New Findings on Liver Cancer (Liver Fibrosis and Body Mass Index Predict Eradication of Hepatitis C Virus RNA by Direct–Acting Antivirals) … p.1528

Biotechnology - Liposomes. Findings from Institute for Physical Chemistry Provide New Insights into Liposomes (Platinum–carbon electrocatalytic composites via liposome–directed electrodeposition at conductive diamond) … p.1529

Immune System Diseases and Conditions - HIV/AIDS. Findings from Institute for Tropical Medicine Has Provided New Data on HIV/AIDS (Sensitivity and specificity of dried blood spots for HIV–1 viral load quantification A laboratory assessment of 3 commercial assays) … p.1530

Oncology - Melanoma. Findings from Institute of Biomedical Chemistry in the Area of Melanoma Reported (Bringing Down Cancer Aircraft: Searching for Essential Hypomutated Proteins in Skin Melanoma) … p.1531

Proteins - Lectins. Findings from Institute of Biomedicine in the Area of Lectins Described (Lactose–Functionalized Gold Nanorods for Sensitive and Rapid Serological Diagnosis of Cancer) … p.1532

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Findings from Institute of Biophysics Provide New Insights into Alzheimer Disease (Vps35–dependent recycling of Trem2 regulates microglial function) … p.1533

Skin Diseases and Conditions - Actinic Keratosis. Findings from Institute of Cancer in the Area of Actinic Keratosis Reported (Pigmentation–Independent Susceptibility Loci for Actinic Keratosis Highlighted by Compound Heterozygosity Analysis) … p.1534

Drugs and Therapies - Pharmacology. Findings from Institute of Cardiovascular Sciences Broaden Understanding of Pharmacology (Effect of Dexmedetomidine on Normal Coronary Vessel Diameter) … p.1535

Heart Disorders and Diseases - Brugada Syndrome. Findings from Institute of Cardiovascular Sciences Provide New Insights into Brugada Syndrome (Suicidal Zinc Phosphide Poisoning Unmasking Brugada Syndrome and Triggering Near Fatal Ventricular Arrhythmia) … p.1536

Inflammation. Findings from Institute of Clinical and Experimental Medicine in the Area of Inflammation Described (Identification Of Gene Transcripts Implicated In Peritoneal Membrane Alterations) … p.1537
January 14, 2017

Liver Diseases and Conditions - Liver Failure. Findings from Institute of Liver and Biliary Sciences in Liver Failure Provides New Insights (Acute–on–chronic liver failure: terminology, mechanisms and management) … p.1538

Genetics - Human Genetics. Findings from Institute of Ophthalmology Broaden Understanding of Human Genetics (Mutations in CPAMD8 Cause a Unique Form of Autosomal–Recessive Anterior Segment Dysgenesis) … p.1539

Drugs and Therapies - BCR-ABL Tyrosine Kinase Inhibitors. Findings from Institute of Pediatrics Broaden Understanding of BCR–ABL Tyrosine Kinase Inhibitors (Field–assisted paper spray mass spectrometry for the quantitative evaluation of imatinib levels in plasma) … p.1540

Central Nervous System Diseases and Conditions - Epilepsy. Findings from Institute of Pharmacology Provides New Data on Epilepsy (Current Use of mTOR Inhibitors for the Treatment of Subependymal Giant Cell Astrocytomas and Epilepsy in Patients with TSC) … p.1541

Cardiology. Findings from Institute of Radiation Biology Update Understanding of Cardiology (Pathology and biology of radiation–induced cardiac disease) … p.1542

Cardiovascular Diseases and Conditions - Thrombosis. Findings from Institute of Urology Broaden Understanding of Thrombosis (Endovascular Removal of Intracardiac Thrombus Prior to Radical Nephrectomy and Inferior Vena Cava Thrombectomy) … p.1543

Oncology - Head and Neck Cancer. Findings from International Agency for Research on Cancer Update Knowledge of Head and Neck Cancer (Head and neck cancer burden and preventive measures in Central and South America) … p.1544

Cardiovascular Diseases and Conditions - Atherosclerosis. Findings from Iran University of Medical Sciences Provide New Insights into Atherosclerosis (Carotid duplex ultrasound and transcranial Doppler findings in commercial divers and pilots) … p.1545

Nutritional and Metabolic Diseases and Conditions - Vitamin D Deficiency. Findings from Isfahan University of Medical Sciences Provide New Insights into Vitamin D Deficiency (Association Between Acute Infectious Mononucleosis and Vitamin D Deficiency) … p.1546

Immune System Diseases and Conditions - Allergic Rhinitis. Findings from Iuliu Hatieganu University of Medicine and Pharmacy in Allergic Rhinitis Provides New Insights (In Vivo Anti–Inflammatory Effect of H1 Antihistamines in Allergic Rhinitis: A Randomized Clinical Trial) … p.1547

Lentivirus. Findings from J. Chen and Colleagues Update Understanding of Lentivirus (Targeting HIF–1 alpha and VEGF by lentivirus–mediated RNA interference reduces liver tumor cells migration and invasion under hypoxic conditions) … p.1548

Oncology - Gastric Cancer. Findings from J. Dreanic and Co–Authors Broaden Understanding of Gastric Cancer (Gastric Carcinoma at the Era of Targeted Therapies) … p.1549

Blood Pressure. Findings from J. She and Co–Authors Reveals New Information on Blood Pressure (Validation of the RisingSun RS–651 Blood Pressure Monitor Based on Auscultation in Adults According to the ANSI/AAMI/ISO 81060–2:2013 Standard) … p.1551

Enzymes and Coenzymes - Peptide Hydrolases. Findings from J. Stingele and Co–Researchers in the Area of Peptide Hydrolases Reported (Mechanism and Regulation of DNA–Protein Crosslink Repair by the DNA–Dependent Metalloprotease SPRTN) … p.1552

Genetics - Assisted Reproduction and Genetics. Findings from J.B. Whitney and Co–Authors Broaden Understanding of Assisted Reproduction and Genetics (Single center validation of routine blastocyst biopsy implementation) … p.1553

Hemodialysis. Findings from J.C. Luo et al Has Provided New Information about Hemodialysis (Spectrum and Burden of Erythropoiesis–Stimulating Agent Hyporesponsiveness Among Contemporary Hemodialysis Patients) … p.1554

Cytoskeletal Proteins - Microfilament Proteins. Findings from J.P.J. Ungerer and Colleagues Update Understanding of Microfilament Proteins (Discordance with 3 Cardiac Troponin I and T Assays: Implications for the 99th Percentile Cutoff) … p.1555

Drugs and Therapies - Antibiotics. Findings from JMI Laboratories Broaden Understanding of Antibiotics (Effect of the beta–Lactamase Inhibitor Vaborbactam Combined with Meropenem against Serine Carbapenem–Producing Enterobacteriaceae) … p.1556

Neurodegenerative Diseases and Conditions - Huntington Disease. Findings from Jadavpur University in Huntington Disease Reported (First molecular modeling report on novel arylpyrimidine kynurenine monoxygenase inhibitors through multi–QSAR analysis against Huntington's disease: A proposal to chemists!) … p.1557

Mycobacterium Infections - Tuberculosis. Findings from Jadavpur University in the Area of Tuberculosis Reported (In search of Tuberculosis drug design : An in silico approach to azoimidazolyl derivatives as antagonist for Cytochrome P450) … p.1558

Oncology - Kidney Cancer. Findings from Jagiellonian University Has Provided New Information about Kidney Cancer (Obesity and renal cancer incidence and mortality—a systematic review of prospective cohort studies) … p.1559

Cell Surface Extensions. Findings from Japan Science and Technology Agency Provide New Insights into Cell Surface Extensions [Loss of ift122, a Retrograde Intraflagellar Transport (IFT) Complex Component, Leads to Slow, Progressive Photoreceptor Degeneration Due to …] … p.1560

Myeloid Cells. Findings from Jawaharlal Nehru University Broaden Understanding of Myeloid Cells [Role of Macrophage (M1 and M2) in Titanium–Dioxide Nanoparticle–Induced Oxidative Stress and Inflammatory Response in Rat] … p.1561

Respiratory Tract Diseases and Conditions - Pleural Effusion. Findings from Jiaxing University in the Area of Pleural Effusion Reported (Promoter hypermethylation of Wnt inhibitory factor–1 in patients with lung cancer A systematic meta–analysis) … p.1562
Lupus. Findings from Jichi Medical University Update Understanding of Lupus (Wide discrepancies in activated clotting times measured by two devices were detected for a patient with lupus anticoagulant in a cardiac surgery) … p.1563

Apoptosis. Findings from Jilin University Provides New Data on Apoptosis (A polysaccharide from the leaves of Aralia elata induces apoptosis in U–2 OS cells via mitochondrial–dependent pathway) … p.1564

Oncology - Gallbladder Cancer. Findings from Jiwaji University Update Understanding of Gallbladder Cancer (Global methylation profiling to identify epigenetic signature of gallbladder cancer and gallstone disease) … p.1565

Health and Medicine - Hematology Research. Findings from John Radcliffe Hospital Provides New Data about Hematology Research (A novel 33–Gene targeted resequencing panel provides accurate, clinical–grade diagnosis and improves patient management for rare inherited anaemias) … p.1566

Immune System Diseases and Conditions - HIV/AIDS. Findings from Johns Hopkins University Provide New Insights into HIV/AIDS (Context of First Same–Sex Condom Use and Nonuse in Young Black Gay and Bisexual Males) … p.1571

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings from Johns Hopkins University School of Medicine Broaden Understanding of Chronic Obstructive Pulmonary Disease (Safety and efficacy of tiotropium Respimat versus HandiHaler in patients naïve to treatment with inhaled anticholinergics: …) … p.1572

Oncology - Duodenal Cancer. Findings from Johns Hopkins University Update Knowledge of Duodenal Cancer (A Polycythemia Vera JAK2 Mutation Masquerading as a Duodenal Cancer Mutation) … p.1573

Lung Diseases and Conditions - Cystic Fibrosis. Findings from Johns Hopkins University in the Area of Cystic Fibrosis Described (A sequence upstream of canonical PDZ–binding motif within CFTR COOH–terminus enhances NHERF1 interaction) … p.1574

Neuropeptides - Calcitonin. Findings from Justus–Liebig–University Broaden Understanding of Calcitonin [Spatial expression of components of a calcitonin receptor–like receptor (CRL) signalling system (CRL, calcitonin gene–related peptide, adrenomedullin, ...)] ... p.1576

Bone Research. Findings from K. Yamawaki and Co–Researchers in the Area of Bone Research Reported (The soluble form of BMPRIB is a novel therapeutic candidate for treating bone related disorders) ... p.1578

Digestive System Diseases and Conditions - Pancreatitis. Findings from K.C. Hu and Colleagues Update Understanding of Pancreatitis (How Does Aging Affect Presentation and Management of Biliary Stones?) ... p.1580

Myelofibrosis. Findings from K.L. Davis and Colleagues Update Understanding of Myelofibrosis (Real–World Assessment of Clinical Outcomes in Patients with Lower–Risk Myelofibrosis Receiving Treatment with Ruxolitinib) ... p.1581

Propanolamines. Findings from K.M. Mohamed and Co–Researchers in the Area of Propanolamines Described (A GC–MS Method for Detection and Quantification of Cathine, Cathinone, Methcathinone and Ephedrine in Oral Fluid) ... p.1582

Peptides - Oligopeptides. Findings from Kangwon National University Broaden Understanding of Oligopeptides (Genetic overexpressing of GPx–1 attenuates cocaine–induced renal toxicity via induction of anti–apoptotic factors) ... p.1583

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Findings from Kaohsiung Medical University Hospital Provides New Data about Rheumatoid Arthritis (Soluble vascular cell adhesion molecular–1 is a potential biological indicator of hemophilic arthropathy) ... p.1584

Cell Research - Cell Adhesion Molecules. Findings from Kaohsiung Medical University Provides New Data about Cell Adhesion Molecules (G9a orchestrates PCL3 and KDM7A to promote histone H3K27 methylation) ... p.1585

Lung Diseases and Conditions - Asthma. Findings from Kaohsiung Medical University in the Area of Asthma Reported (Protective effects of elafin against adult asthma) ... p.1586

Microcirculation. Findings from Karolinska Institute Broaden Understanding of Microcirculation (Fetal growth is associated with first–trimester maternal vascular function) ... p.1587

Drugs and Therapies - Toxicology and Pharmacology. Findings from Karolinska Institute Update Understanding of Toxicology and Pharmacology (Testing in artificial sweat – Is less more? Comparison of metal release in two different artificial sweat solutions) ... p.1588

Oncology - Leukemia. Findings from Karolinska University Hospital Update Understanding of Leukemia [Role of ribosomal protein mutations in tumor development (Review)] ... p.1589
Heart Disorders and Diseases - Heart Failure. Findings from Kasugai Municipal Hospital Has Provided New Data on Heart Failure (Clinical characteristics of patients hospitalized for acute heart failure according to hospital arrival timing) … p.1589

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Kidney Disease Center Broadens Understanding of Atrial Fibrillation (Presence of Atrial Fibrillation at the Time of Dialysis Initiation Is Associated with Mortality and Cardiovascular Events) … p.1590

Oncology - Non-Hodgkin Lymphoma. Findings from Kidwai Memorial Institute of Oncology Provides New Data about Non–Hodgkin Lymphoma (Lenalidomide in relapsed refractory non–Hodgkin’s lymphoma: An Indian perspective) … p.1591

Coronavirus. Findings from King Saud bin Abdulaziz University for Health Sciences Yields New Findings on Coronavirus (Middle East respiratory syndrome coronavirus on inanimate surfaces: A risk for health care transmission) … p.1592

Retinal Neurons. Findings from Kitasato University in Retinal Neurons Reported (Apelin–36 is protective against N–methyl–D–aspartic–acid–induced retinal ganglion cell death in the mice) … p.1593

Amrinone. Findings from Kobe University Hospital Has Provided New Data on Amrinone (Impact of Milrinone Administration in Adult Cardiac Surgery Patients: Updated Meta–Analysis) … p.1594

Oncology - Colon Cancer. Findings from Koc University in the Area of Colon Cancer Reported (Evidence–based medical oncology and interventional radiology paradigms for liver–dominant colorectal cancer metastases) … p.1595

Enzymes and Coenzymes - Fatty Acid Desaturases. Findings from Korea Polar Research Institute in Fatty Acid Desaturases Reported (Characterization of Stearoyl–CoA Desaturases from a Psychrophilic Antarctic Copepod, Tigriopus kingsejongensis) … p.1597

Oncology - Gastric Cancer. Findings from Korea University Update Knowledge of Gastric Cancer (The roles of HOXB7 in promoting migration, invasion, and anti–apoptosis in gastric cancer) … p.1598

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings from Kumamoto University Provides New Data on Chronic Obstructive Pulmonary Disease (Pharmacological and genetic reappraisals of protease and oxidative stress pathways in a mouse model of obstructive lung diseases) … p.1599

Mental Health Diseases and Conditions - Schizophrenia. Findings from Kunming Institute of Zoology in Schizophrenia Reported (No association between schizophrenia susceptibility variants and macroscopic structural brain volume variation in healthy subjects) … p.1600

Therapeutics. Findings from Kyoto University Broaden Understanding of Therapeutics (Dosimetric comparison of lung stereotactic body radiotherapy treatment plans using averaged computed tomography and end–exhalation computed tomography images: Evaluation of …) … p.1601
January 14, 2017

Transplant Medicine - Kidney Transplants. Findings from Kyoto University Yields New Findings on Kidney Transplants (The Short–Term Impact of Dietary Counseling on Sodium Intake and Blood Pressure in Renal Allograft Recipients) ... p.1602

Lung Diseases and Conditions - Pulmonary Embolism. Findings from Kyungpook National University School of Medicine Provides New Data on Pulmonary Embolism (Clinical characteristics of pulmonary embolism with concomitant pneumonia) ... p.1603

Oncology - Soft Tissue Sarcomas. Findings from Kyushu University Provide New Insights into Soft Tissue Sarcomas (Efficacy analysis of the aprepitant–combined antiemetic prophylaxis for non–round cell soft–tissue sarcoma patients received adriamycin and ifosfamide therapy) ... p.1605

Oncology - Melanoma. Findings from L. Gonzalez et al Update Understanding of Melanoma (Epigallocatechin–3–O–gallate up–regulates microRNA–let–7b expression by activating 67–kDa laminin receptor signaling in melanoma cells) ... p.1606

Blood Pressure. Findings from Kyushu University in the Area of Blood Pressure Described (The Relationship between Snoring Sound Intensity and Morning Blood Pressure in Workers) ... p.1606

Oncology - Breast Cancer. Findings from L. Gonzalez et al Update Understanding of Breast Cancer (Gene Expression Profile of Normal and Cancer–Associated Fibroblasts According to Intratumoral Inflammatory Cells Phenotype From Breast Cancer Tissue) ... p.1607

www.NewsRx.com

Ischemia. Findings from L. Monassier and Co–Authors in the Area of Ischemia Reported (Targeting myocardial reperfusion injuries with cyclosporine in the CIRCUS Trial – pharmacological reasons for failure) ... p.1608

Nephrology. Findings from L. Prieto–Garcia and Co–Authors Provide New Insights into Nephrology (Mechanisms of triple whammy acute kidney injury) ... p.1609

Neoplasia. Findings from L.A. Henrique and Co–Researchers in the Area of Neoplasia Reported (Cancer mortality among adolescents and young adults: A historical cohort in a reference institution for cancer treatment in Santa Catarina/South of Brazil ...) ... p.1610

Immune System Diseases and Conditions - HIV/AIDS. Findings from L.M. Lopez and Co–Authors Provide New Insights into HIV/AIDS (Theory–based interventions for contraception) ... p.1612

Oncology - Melanoma. Findings from L.Z. Chen and Co–Researchers in the Area of Melanoma Reported (AMPK activation by GSK621 inhibits human melanoma cells in vitro and in vivo) ... p.1613

Transplant Medicine - Heart Transplants. Findings from La Trobe University Yields New Data on Heart Transplants (Physical function after extracorporeal membrane oxygenation in patients pre or post heart transplantation – An observational study) ... p.1614

Immunology - Immunophilins. Findings from Lanzhou University Provides New Data about Immunophilins (Shengmai Formula suppressed over–activated Ras/MAPK pathway in C. elegans by opening mitochondrial permeability transition pore via regulating cyclophilin D) ... p.1615
Oncology - Lung Cancer. Findings from Leibniz University Update Knowledge of Lung Cancer (Preferences of lung cancer patients for treatment and decision-making: a systematic literature review) … p.1616

Prostheses. Findings from Leiden University in the Area of Prostheses Described (Prosthesis Dislocation After Transapical Valve-In-Valve Mitral Valve Implantation) … p.1617

Immunization - Vaccines. Findings from London School of Hygiene and Tropical Medicine Broaden Understanding of Vaccines (Near real-time vaccine safety surveillance using electronic health records—a systematic review of the application of statistical methods) … p.1618

Drugs and Therapies - Chemometrics. Findings from Loyola College Yields New Findings on Chemometrics (Analytical expressions for topological properties of polycyclic benzenoid networks) … p.1619

Drugs and Therapies - Antibiotics. Findings from Luigi Sacco University Hospital Yields New Findings on Antibiotics (Therapeutic drug management of linezolid: a missed opportunity for clinicians?) … p.1620

Cardiovascular Research. Findings from M. Birkholz and Co–Authors Broaden Understanding of Cardiovascular Research (Omega–3 fatty acids and mortality in patients referred for coronary angiography. The Ludwigshafen Risk and Cardiovascular Health Study) … p.1622

Heart Disorders and Diseases - Dilated Cardiomyopathy. Findings from Maastricht University Broaden Understanding of Dilated Cardiomyopathy (Relevance of cardiac parvovirus B19 in myocarditis and dilated cardiomyopathy: review of the literature) … p.1624

Digestive System Diseases and Conditions - Sclerosing Cholangitis. Findings from Maastricht University Yields New Data on Sclerosing Cholangitis (Elevated interleukin–8 in bile of patients with primary sclerosing cholangitis) … p.1625

Hematology - Blood Coagulation Factors. Findings from Maastricht University Yields New Data on Blood Coagulation Factors (Cardiac troponin T degradation in serum is catalysed by human thrombin) … p.1626

Obesity, Fitness and Wellness. Findings from Maastricht University in Obesity, Fitness and Wellness Reported (New insights into the generation and role of de novo mutations in health and disease) … p.1627
January 14, 2017

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Findings from Maastricht University in the Area of Abdominal Aortic Aneurysm Reported (Application of an Adaptive Polynomial Chaos Expansion on Computationally Expensive Three–Dimensional Cardiovascular Models for Uncertainty Quantification and ...) ... p.1628

Gram-Negative Bacteria - Escherichia coli. Findings from Mahatma Gandhi University Has Provided New Information about Escherichia coli (Bioconversion of sodium dodecyl sulphate to rhamnolipids by transformed Escherichia coli DH5a cells–a novel strategy for rhamnolipid synthesis) ... p.1629

Immune System Diseases and Conditions - Hypersensitivity. Findings from Mahidol University Provide New Insights into Hypersensitivity (Skin testing with beta–lactam antibiotics for diagnosis of beta–lactam hypersensitivity in children) ... p.1630

Interstitial Lung Diseases and Conditions - Wegener Granulomatosis. Findings from Massachusetts General Hospital in the Area of Wegener Granulomatosis Described [Myeloperoxidase–Antineutrophil Cytoplasmic Antibody (ANCA)–Positive and ANCA–Negative Patients With Granulomatosis With Polyangiitis (Wegener's) ...] ... p.1631

Cardiovascular Research. Findings from Massachusetts Institute of Technology Broaden Understanding of Cardiovascular Research (A G–Rich Motif in the IncRNA Braveheart Interacts with a Zinc–Finger Transcription Factor to Specify the Cardiovascular Lineage) ... p.1632

Pharmacokinetics. Findings from Massachusetts Institute of Technology Yields New Data on Pharmacokinetics (Quantitative Assessment of Population Variability in Hepatic Drug Metabolism Using a Perfused Three–Dimensional Human Liver Microphysiological Systems) ... p.1633

Skin Diseases and Conditions - Lichen Planus. Findings from Mayo Clinic Reveals New Findings on Lichen Planus (Oesophageal lichen planus: the efficacy of topical steroid–based therapies) ... p.1634

Digestive System Diseases and Conditions - Cholestasis. Findings from Mayo Clinic in the Area of Cholestasis Reported [Low incidence of primary biliary cirrhosis (PBC) in the first–degree relatives of PBC probands after 8 years of follow–up] ... p.1637

Peptide Proteins - Proinsulin. Findings from McGill University Yields New Findings on Proinsulin (Hyperinsulinemic–normoglycemic clamp administered together with amino acids induces anabolism after cardiac surgery) ... p.1638

Cardiology. Findings from McMaster University Broaden Understanding of Cardiology (Guidance signalling regulates leading edge behaviour during collective cell migration of cardiac cells in Drosophila) ... p.1639

Bacterial Infections and Mycoses - Bacteremia. Findings from Medical College of Wisconsin Provides New Data on Bacteremia (Bacteremia in Patients with Heterotaxy: A Review and Implications for Management) ... p.1640
Cardiovascular Diseases and Conditions - Thrombosis. Findings from Medical University Has Provided New Data on Thrombosis (Perceval Sutureless Valve Dysfunction Caused by Valvular Thrombosis) … p.1641

Biological Factors - Biological Pigments. Findings from Medical University Has Provided New Information about Biological Pigments (Microphthalmia–associated transcription factor regulates the visual cycle genes Rlbp1 and Rdh5 in the retinal pigment epithelium) … p.1642

Medical Imaging - Echocardiography. Findings from Medical University Provides New Data about Echocardiography (Echocardiographic Assessment of Aortic Pulse–Wave Velocity: Validation against Invasive Pressure Measurements) … p.1643

Oncology - Prostate Cancer. Findings from Medical University Provides New Data on Prostate Cancer (Se–methylselenocysteine suppresses the growth of prostate cancer cell DU145 through connexin 43–induced apoptosis) … p.1644

Central Nervous System Diseases and Conditions - Epilepsy. Findings from Medical University Update Knowledge of Epilepsy [Focal cortical dysplasia: Molecular disturbances and clinicopathological classification (Review)] … p.1646

www.NewsRx.com

Oncology - Colon Cancer. Findings from Medical University Update Understanding of Colon Cancer (Hypoxia–inducible factor–1 modulates upregulation of mutT homolog–1 in colorectal cancer) … p.1646

Oncology - Non-Small Cell Lung Cancer. Findings from Medical University in the Area of Non–Small Cell Lung Cancer Reported (Epidermal growth factor receptor and notch signaling in non–small–cell lung cancer) … p.1648

Teichoic Acids. Findings from Merck & Company in Teichoic Acids Reported (TarO–specific inhibitors of wall teichoic acid biosynthesis restore b–lactam efficacy against methicillin–resistant staphylococci) … p.1649

Drugs and Therapies - Antiretrovirals. Findings from Merck Research Labs Provides New Data on Antiretrovirals (Efavirenz does not meaningfully affect the single dose pharmacokinetics of 1200mg raltegravir) … p.1650

Apoptosis. Findings from Michigan State University in the Area of Apoptosis Reported (The unfolded protein response controls ER stress–induced apoptosis of lung epithelial cells through angiotensin generation) … p.1651

Cardiovascular Diseases. Findings from Middle Tennessee State University Broaden Understanding of Cardiovascular Diseases [An isoflavonoid–enriched extract from Pueraria lobata (kudzu) root protects human umbilical vein endothelial cells against oxidative stress induced …] … p.1652

Stem Cell Research - Embryonic Stem Cells. Findings from Miguel Hernandez University Provides New Data on Embryonic Stem Cells (Effects of mipafox, paraoxon, chlorpyrifos and its metabolite chlorpyrifos–oxon on the expression of biomarker genes of differentiation in D3 mouse embryonic ...) ... p.1654

Drugs and Therapies - Antibiotics. Findings from Monash University Provides New Data on Antibiotics (Updated US and European Dose Recommendations for Intravenous Colistin: How Do They Perform?) ... p.1655

Drugs and Therapies - Chemotherapy. Findings from Monash University Update Understanding of Chemotherapy (Guidelines for timely initiation of chemotherapy: a proposed framework for access to medical oncology and haematology cancer clinics and chemotherapy services) ... p.1656

Immune System Diseases and Conditions - HIV/AIDS. Findings from Monash University in the Area of HIV/AIDS Reported (A 'test and treat' prevention strategy in Australia requires innovative HIV testing models: a cohort study of repeat testing among 'high–risk' men who have sex with men) ... p.1657

Public Health - Disease Outbreaks. Findings from Morehouse School of Medicine in the Area of Disease Outbreaks Reported (Clinical profile and containment of the Ebola virus disease outbreak in two large West African cities, Nigeria, July–September 2014) ... p.1658

Aortic Stenosis. Findings from Morristown Medical Center Update Understanding of Aortic Stenosis (Medical Treatment of Aortic Stenosis) ... p.1659

DNA Research. Findings from Mount Sinai Hospital Provides New Data about DNA Research (A mechanism for the suppression of homologous recombination in G1 cells) ... p.1660

Arthroplasty. Findings from Mt. Carmel Health System in the Area of Arthroplasty Reported (Risk of Periprosthetic Fractures With Direct Anterior Primary Total Hip Arthroplasty) ... p.1661

Pregnancy Complications - Spontaneous Abortion. Findings from N. Rogenhofer and Co–Researchers in the Area of Spontaneous Abortion Described (Lessons From the EThIGII Trial: Proper Putative Benefit Assessment of Low–Molecular–Weight Heparin Treatment in M2/ANXA5 Haplotype Carriers) ... p.1662

Environmental Research. Findings from N. Roth et al Has Provided New Information about Environmental Research [A critical review of frameworks used for evaluating reliability and relevance of (eco)toxicity data: Perspectives for an integrated eco–human decision–making ...] ... p.1663

Imino Acids. Findings from N. Sahu et al Has Provided New Information about Imino Acids (Proline Starvation Induces Unresolved ER Stress and Hinders mTORC1–Dependent Tumorigenesis) ... p.1664

Biomedical Engineering - Tissue Engineering. Findings from N.H. Marei and Co–Authors in the Area of Tissue Engineering Reported (Mesenchymal stem cells growth and proliferation enhancement using PLA vs PCL based nanofibrous scaffolds) ... p.1665

Oncology - Prostate Cancer. Findings from NHS Foundation Trust in the Area of Prostate Cancer Described (Focal therapy in prostate cancer: A review of seven common controversies) ... p.1666
Drugs and Therapies - Pharmaceutical Research. Findings from NIPER Provides New Data on Pharmaceutical Research (Co amorphous systems: A product development perspective) … p.1667

Health and Medicine - Bone and Mineral Research. Findings from Nagasaki University Broaden Understanding of Bone and Mineral Research (Cbf2 Isoform Dominates More Potent Cbf1 and Is Required for Skeletal Development) … p.1668

Cardiovascular Diseases and Conditions - Hypertension. Findings from Nanchang University in Hypertension Reported (Risk of bradykinin B2 receptor–58T/C gene polymorphism on hypertension: A meta--analysis) … p.1669

Immunology. Findings from Nanjing Medical University Provides New Data on Immunology (BPTF Is Essential for T Cell Homeostasis and Function) … p.1670

Oncology - Bladder Cancer. Findings from Nanjing Medical University in Bladder Cancer Reported (LINC00312 inhibits the migration and invasion of bladder cancer cells by targeting miR–197–3p) … p.1670

Phenols. Findings from Nanjing Normal University Has Provided New Data on Phenols (Propofol inhibits hERG K+ channels and enhances the inhibition effects on its mutations in HEK293 cells) … p.1671

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Nankai University in the Area of Type 2 Diabetes Reported (Toxicology Assessment of a Dual–Function Peptide 5rolGLP–HV in Mice) … p.1673

www.NewsRx.com

Arsenic. Findings from Nantong University Broaden Understanding of Arsenic (Arsenic trioxide mediates HAPI microglia inflammatory response and the secretion of inflammatory cytokine IL–6 via Akt/NF–kappa B signaling pathway) … p.1674

Drugs and Therapies - Chemotherapy. Findings from Nanyang Technological University in Chemotherapy Reported (Polymeric Prodrug Grafted Hollow Mesoporous Silica Nanoparticles Encapsulating Near–Infrared Absorbing Dye for Potent Combined Photothermal–Chemotherapy) … p.1675

Cardiology. Findings from Nara Medical University in Cardiology Reported (Prediction of contrast–induced nephropathy by the serum creatinine level on the day following cardiac catheterization) … p.1676

Gram-Negative Bacteria - Acinetobacter baumannii. Findings from Naresuan University in Acinetobacter baumannii Reported (Distribution of virulence genes involved in biofilm formation in multi–drug resistant Acinetobacter baumannii clinical isolates) … p.1677

Health and Medicine - Medical Research. Findings from National Cancer Institute in Medical Research Reported (T–Cell Transfer Therapy Targeting Mutant KRAS in Cancer) … p.1678

Musculoskeletal Diseases and Conditions - Osteoarthritis. Findings from National Center for Scientific Research (CNRS) Broaden Understanding of Osteoarthritis (Fibroblast Growth Factor 23 drives MMP13 expression in human osteoarthritic chondrocytes in a Klotho–independent manner) … p.1679

Oncology - Bone Cancer. Findings from National Cheng Kung University Broaden Understanding of Bone Cancer (Alleviating Bone Cancer–induced Mechanical Hypersensitivity by Inhibiting Neuronal Activity in the Anterior Cingulate Cortex) … p.1680
January 14, 2017

Immune System Diseases and Conditions - Allergies. Findings from National Chung Hsing University Update Understanding of Allergies (Cloning, expression, and purification of recombinant major mango allergen Mani 1 in Escherichia coli) … p.1681

Oncology - Head and Neck Cancer. Findings from National Defense Medical College Provides New Data on Head and Neck Cancer (Serum midkine as a biomarker for malignancy, prognosis, and chemosensitivity in head and neck squamous cell carcinoma) … p.1682

Digestive System Diseases and Conditions - Intrahepatic Cholestasis. Findings from National Hospital Organization Has Provided New Data on Intrahepatic Cholestasis (Recurrence of Progressive Familial Intrahepatic Cholestasis Type 2 Phenotype After Living–donor Liver Transplantation: A Case Report) … p.1683

Mycobacterium Infections - Tuberculosis. Findings from National Hospital Organization Provide New Insights into Tuberculosis (Anti–PD1 Antibody Treatment and the Development of Acute Pulmonary Tuberculosis) … p.1684

Cardiovascular Diseases. Findings from National Human Genome Research Institute Broaden Understanding of Cardiovascular Diseases (Associations between Vitamin D and Cardiovascular Disease Risk Factors in African Americans Are Partly Explained by Circulating Adipokines ...) … p.1685

Liver Diseases and Conditions - Liver Fibrosis. Findings from National Institute of Immunology Update Understanding of Liver Fibrosis (Molecular and Cellular Functions Distinguish Superior Therapeutic Efficiency of Bone Marrow CD45 Cells Over Mesenchymal Stem Cells in Liver Cirrhosis) … p.1686

Neurodegenerative Diseases and Conditions - Schizophrenia. Findings from National Institute of Mental Health and Neurosciences Update Understanding of Schizophrenia (The impact of HLA–G 3 ' UTR variants and sHLA–G on risk and clinical correlates of schizophrenia) … p.1687

Organelles. Findings from National Pingtung University of Science and Technology Update Knowledge of Organelles (Cytotoxicity of 11–epi–Sinulariolide Acetate Isolated from Cultured Soft Corals on HA22T Cells through the Endoplasmic Reticulum Stress Pathway ...) … p.1689

Oncology - Colon Cancer. Findings from National Research Council Broaden Understanding of Colon Cancer (Preventive screening of colorectal cancer with a device based on chemoresistive sensors) … p.1690

Musculoskeletal Diseases and Conditions - Osteoarthritis. Findings from National Taiwan University Reveals New Findings on Osteoarthritis (G–phycocyanin alleviates osteoarthritic injury in chondrocytes stimulated with H2O2 and compressive stress) … p.1691

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Findings from National Yang Ming University Has Provided New Information about Alzheimer Disease (Antroquinonol Lowers Brain Amyloid–b Levels and Improves Spatial Learning and Memory in a Transgenic Mouse Model of Alzheimer’s Disease) … p.1692

www.NewsRx.com
January 14, 2017

Oncology - Gliomas. Findings from Nencki Institute of Experimental Biology Provides New Data on Gliomas (BIX01294, an inhibitor of histone methyltransferase, induces autophagy–dependent differentiation of glioma stem–like cells) … p.1693

Oncology - Bladder Cancer. Findings from Netherlands Cancer Institute Broaden Understanding of Bladder Cancer (Pathological downstaging and survival after induction chemotherapy and radical cystectomy for clinically node–positive bladder cancer–Results of a nationwide …) … p.1694

Hematopoietic. Findings from New York University in the Area of Hematopoietic Reported (MED12 Regulates HSC–Specific Enhancers Independently of Mediator Kinase Activity to Control Hematopoiesis) … p.1695

Oncology - Squamous Cell Carcinoma. Findings from Nippon School of Medicine in Squamous Cell Carcinoma Reported (Insulin–like growth factor 2 mRNA–binding protein–3 as a marker for distinguishing between cutaneous squamous cell carcinoma and keratoacanthoma) … p.1696

Respiratory Tract Diseases and Conditions - Pneumothorax. Findings from Northwestern Memorial Hospital Broaden Understanding of Pneumothorax (Primary Spontaneous Pneumothorax in Menstruating Women Has High Recurrence) … p.1698

Oncology - Breast Cancer. Findings from Northwestern University Provide New Insights into Breast Cancer (Radiology as the Point of Cancer Patient and Care Team Engagement: Applying the 4R Model at a Patient's Breast Cancer Care Initiation) … p.1699

Central Nervous System - Metencephalon. Findings from Nova Southeastern University Update Understanding of Metencephalon (Heterologous regulation of the cannabinoid type 1 receptor by angiotensin II in astrocytes of spontaneously hypertensive rats) … p.1700

Skin Diseases and Conditions - Atopic Dermatitis. Findings from O. Nemoto and Co–Researchers Advance Knowledge in Atopic Dermatitis (The first trial of CIM331, a humanized antihuman interleukin–31 receptor A antibody, in healthy volunteers and patients with atopic dermatitis to evaluate …) … p.1701

Heart Disorders and Diseases - Left Ventricular Dysfunction. Findings from Obafemi Awolowo University in the Area of Left Ventricular Dysfunction Reported (Correlation between volume overload, chronic inflammation, and left ventricular dysfunction in chronic kidney disease patients) … p.1703

Anterior Cruciate Ligament. Findings from Ohio State University Broaden Understanding of Anterior Cruciate Ligament (Effect of High–Grade Preoperative Knee Laxity on Anterior Cruciate Ligament Reconstruction Outcomes) … p.1704

Genetics - Human Genetics. Findings from Ohio State University Has Provided New Data on Human Genetics (Block–based association tests for rare variants using Kullback–Leibler divergence) … p.1705
January 14, 2017

Periodontal Diseases and Conditions - Periodontitis. Findings from Ohio State University Reveals New Findings on Periodontitis (Comparative metagenomics reveals taxonomically idiosyncratic yet functionally congruent communities in periodontitis) … p.1706

Clinical Research - Clinical Trials and Studies. Findings from Ohio State University Update Knowledge of Clinical Trials and Studies (Real–World Assessment of Acute Left Ventricular Lead Implant Success and Complication Rates: Results from the Attain Success Clinical Trial) … p.1707

Drugs and Therapies - Phenylpiperazine Antidepressants. Findings from Ohio State University Yields New Findings on Phenylpiperazine Antidepressants (Effects of trazodone on behavioral signs of stress in hospitalized dogs) … p.1708

Oncology - Pancreatic Cancer. Findings from Ohio State University in Pancreatic Cancer Reported (STAT3 as a potential therapeutic target in ALD1(+)+ and CD44 (+)/CD24(+) stem cell–like pancreatic cancer cells) … p.1709

Oncology - Pancreatic Cancer. Findings from Ohio State University in the Area of Pancreatic Cancer Described (The Impact of Obesity on Gallstone Disease, Acute Pancreatitis, and Pancreatic Cancer) … p.1710

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Ohio University Yields New Findings on Type 2 Diabetes (Fenofibrate Decreases Insulin Clearance and Insulin Secretion to Maintain Insulin Sensitivity) … p.1711

Platinum Compounds. Findings from Ondokuz Mayis University Has Provided New Data on Platinum Compounds (Effects of Ginkgo biloba extract on brain oxidative condition after cisplatin exposure) … p.1712

Musculoskeletal Diseases and Conditions - Myotonic Dystrophy. Findings from Oregon Health and Science University Provides New Data about Myotonic Dystrophy (Results from an external proficiency testing program: 11 years of molecular genetics testing for myotonic dystrophy type 1) … p.1713

Phenanthrenes. Findings from Oregon State University in Phenanthrenes Reported (Dibenzo[def,p]chrysene transplacental carcinogenesis in wild–type, Cyp1b1 knockout, and CYP1B1 humanized mice) … p.1714

Heart Disorders and Diseases - Acute Coronary Syndrome. Findings from Osaka City University Broaden Understanding of Acute Coronary Syndrome (New insights into spotty calcification and plaque rupture in acute coronary syndrome: an optical coherence tomography study) … p.1715

Heart Disorders and Diseases - Dilated Cardiomyopathy. Findings from Osaka Medical College Provide New Insights into Dilated Cardiomyopathy (Is cardiac and hepatic iron status assessed by MRI T2*associated with left ventricular function in patients with idiopathic cardiomyopathy?) … p.1716

DNA Research. Findings from Osaka University Provides New Data on DNA Research (A chimeric protein composed of NuMA fused to the DNA binding domain of LANA is sufficient for the ori–P–dependent DNA replication) … p.1717

Clinical Research - Clinical Trials and Studies. Findings from Oslo University Hospital Broadens Understanding of Clinical Trials and Studies (Phase I trial of EpCAM–targeting immunotoxin MOC31PE, alone and in combination with cyclosporin) … p.1718
Oncology - Prostate Cancer. Findings from Oslo University Hospital Provide New Insights into Prostate Cancer (Low β-8322–adrenergic receptor level may promote development of castration resistant prostate cancer and altered steroid metabolism) … p.1719

Helper-Inducer T-Lymphocytes. Findings from Oslo University Hospital Provides New Data about Helper–Inducer T-Lymphocytes (Adoptive Transfer of Tumor–Specific Th2 Cells Eradicates Tumors by Triggering an In Situ Inflammatory Immune Response) … p.1720

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Findings from P. Benotti and Co–Authors Update Knowledge of Obstructive Sleep Apnea (The impact of obstructive sleep apnea on nonalcoholic fatty liver disease in patients with severe obesity) … p.1721

Drugs and Therapies - Adrenal Cortical Steroids. Findings from P. Daull and Co–Researchers Advance Knowledge in Adrenal Cortical Steroids (Efficacy of a new topical cationic emulsion of cyclosporine A on dry eye clinical signs in an experimental mouse model of dry eye) … p.1722

Drugs and Therapies - Antiretrovirals. Findings from P. Suntharasamai and Co–Authors Update Knowledge of Antiretrovirals (Assessment of Oral Fluid HIV Test Performance in an HIV Pre–Exposure Prophylaxis Trial in Bangkok, Thailand) … p.1723

Drugs and Therapies - Ethnopharmacology. Findings from Panjab University Update Understanding of Ethnopharmacology (Isolation, characterization and quantification of an anxiolytic constituent – mahanimbine, from Murraya koenigii Linn. Spreng Leaves) … p.1724

Drugs and Therapies - Chemotherapy. Findings from Paratek Pharmaceuticals in Chemotherapy Reported (In Vitro and In Vivo Assessments of Cardiovascular Effects with Omadacycline) … p.1725

Drugs and Therapies - Antifungals. Findings from Pasteur Institute in the Area of Antifungals Described (Administration of Zinc Chelators Improves Survival of Mice Infected with Aspergillus fumigatus both in Monotherapy and in Combination with Caspofungin) … p.1726

Drugs and Therapies - Cancer Therapy. Findings from Payame Noor University in the Area of Cancer Therapy Described (Novel dual stimuli–responsive ABC triblock copolymer: RAFT synthesis, "schizophrenic" micellization, and its performance as an anticancer drug delivery nanosystem) … p.1727

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Findings from Peking Union Medical College Has Provided New Data on Abdominal Aortic Aneurysm (Application of physician–modified fenestrated stent graft in urgent endovascular repair of abdominal aortic aneurysm with hostile neck anatomy Case ...) … p.1728

Obesity, Fitness and Wellness. Findings from Peking Union Medical College Yields New Findings on Obesity, Fitness and Wellness (First–in–Human Percutaneous Balloon Pulmonary Valvuloplasty Under Echocardiographic Guidance Only) … p.1729

Cardiovascular Research. Findings from Peking Union Medical College in Cardiovascular Research Reported (Ambient Fine Particulate Matter Exposure and Risk of Cardiovascular Mortality: Adjustment of the Meteorological Factors) … p.1730
January 14, 2017

Thrombolysis. Findings from Peking University Provide New Insights into Thrombolysis (Regional variation in acute stroke care organisation) … p.1731

Cardiology. Findings from Pennsylvania State University Yields New Data on Cardiology (Self–organizing visualization and pattern matching of vectorcardiographic QRS waveforms) … p.1734

Vascular Endothelial Growth Factor. Findings from People's Hospital Provides New Data on Vascular Endothelial Growth Factor (Mechanistic Study of the Inhibitory Effect of Kaempferol on Uterine Fibroids In Vitro) … p.1736

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Findings from People's Hospital Update Understanding of Rheumatoid Arthritis (HLA–DRB1 shared epitope allele polymorphisms and rheumatoid arthritis: a systemic review and meta–analysis) … p.1737

www.NewsRx.com

Oncology - Rectal Cancer. Findings from Peter MacCallum Cancer Center Update Understanding of Rectal Cancer (Predicting pathological complete response to neoadjuvant chemoradiotherapy in locally advanced rectal cancer: a systematic review) … p.1739

Endoscopic Submucosal Dissection. Findings from Portuguese Oncology Institute Update Knowledge of Endoscopic Submucosal Dissection (Risk factors for bleeding after gastric endoscopic submucosal dissection: a systematic review and meta–analysis) … p.1740

Liver Diseases and Conditions - Fatty Liver. Findings from Postgraduate Institute of Medical Education and Research Reveals New Findings on Fatty Liver (Genetic polymorphism in CD14 gene, a co–receptor of TLR4 associated with non–alcoholic fatty liver disease) … p.1741

Oncology - Colon Cancer. Findings from Postgraduate Institute of Medical Education and Research in the Area of Colon Cancer Reported (Frequent Activation of the beta–Catenin Gene in Sporadic Colorectal Carcinomas: A Mutational & Expression Analysis) … p.1742

Drugs and Therapies - Drug Delivery Systems. Findings from Princeton University in the Area of Drug Delivery Systems Reported (Nanomedicine as a non–invasive strategy for drug delivery across the blood brain barrier) … p.1743
Immune System Diseases and Conditions - HIV/AIDS. Findings from Public Hospital System Broaden Understanding of HIV/AIDS (Total HIV–1 DNA, a Marker of Viral Reservoir Dynamics with Clinical Implications) … p.1744

Autoimmune Diseases and Conditions - Psoriatic Arthritis. Findings from Public Hospital System Broaden Understanding of Psoriatic Arthritis (Management of psoriatic arthritis in 2016: a comparison of EULAR and GRAPPA recommendations) … p.1745

Wilson’s Disease. Findings from Q.J. Zhang and Co–Authors Provide New Insights into Wilson’s Disease (Four–year follow–up of a Wilson disease pedigree complicated with epilepsy and hypopituitarism Case report with a literature review) … p.1747

Membrane Proteins - Membrane Glycoproteins. Findings from Qiqihar Medical University Update Knowledge of Membrane Glycoproteins (Acid–sensing ion channels are expressed in the ventrolateral medulla and contribute to central chemoreception) … p.1748

Enzymes and Coenzymes - Amidohydrolases. Findings from Quaid–i–Azam University in Amidohydrolases Provides New Insights (Iminothiazoline–Sulfonamide Hybrids as Jack Bean Urease Inhibitors; Synthesis, Kinetic Mechanism and Computational Molecular Modeling) … p.1749

Oncology - Colon Cancer. Findings from Queen’s University Broaden Understanding of Colon Cancer (Statin use and survival in colorectal cancer: Results from a population–based cohort study and an updated systematic review and meta–analysis) … p.1750

Drugs and Therapies - Alkylating Agents. Findings from R. Daillere et al Has Provided New Information about Alkylating Agents (Enterococcus hirae and Barnesiella intestinihominis Facilitate Cyclophosphamide–Induced Therapeutic Immunomodulatory Effects) … p.1751

Drugs and Therapies - Aldosterone Receptor Antagonists. Findings from R. Fung et al Has Provided New Information about Aldosterone Receptor Antagonists (Differential Effects of Cyproterone Acetate vs Spironolactone on Serum High–Density Lipoprotein and Prolactin Concentrations in the Hormonal ...) … p.1752

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Findings from R. Goldberg and Co–Authors Provide New Insights into Inflammatory Bowel Disease (Thiopurine metabolite testing in inflammatory bowel disease) … p.1754

Drugs and Therapies - Indomethacin Therapy. Findings from R. Kamel et al in Indomethacin Therapy Reported (Development and optimization of self–assembling nanosystem for intra–articular delivery of indomethacin) … p.1755

Oncology - Breast Cancer. Findings from R.H. Hamunyela and Co–Researchers Advance Knowledge in Breast Cancer (Strong synergism between small molecule inhibitors of HER2, PI3K, mTOR and Bcl–2 in human breast cancer cells) … p.1757

Heart Disorders and Diseases - Heart Attack. Findings from R.N. Leao and Co–Authors Provide New Insights into Heart Attack (Therapeutic hypothermia after cardiac arrest: outcome predictors) … p.1758

Drugs and Therapies - Toxicology and Pharmacology. Findings from R.R. Dalefield and Co–Authors Update Knowledge of Toxicology and Pharmacology (A 28–day oral toxicity study of echimidine and lasiocarpine in Wistar rats) … p.1759

Smoking. Findings from RAND Update Understanding of Smoking (Hiding the tobacco power wall reduces cigarette smoking risk in adolescents: using an experimental convenience store to assess tobacco regulatory options at retail point–of–sale) … p.1760

Drugs and Therapies - Antiretrovirals. Findings from Radboud University Broaden Understanding of Antiretrovirals (Ribavirin concentration determines treatment success of first–generation DAA–based chronic HCV therapy) … p.1761

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. Findings from Radboud University Update Understanding of Metabolic Syndrome (Exercise Improves Insulin Sensitivity in the Absence of Changes in Cytokines) … p.1762

Genetics - Human Genetics. Findings from Ragon Institute Has Provided New Data on Human Genetics (HLA–C Level Is Regulated by a Polymorphic Oct1 Binding Site in the HLA–C Promoter Region) … p.1763

Life Science Research - Apoptosis and Cell Death. Findings from Regina Elena Cancer Institute Has Provided New Information about Apoptosis and Cell Death (Affinity purification–mass spectrometry analysis of bcl–2 interactome identified SLIRP as a novel interacting protein) … p.1764

Drugs and Therapies - Anticholinergics. Findings from Regina Margherita Children's Hospital Reveals New Findings on Anticholinergics (Pain–relieving agents for infantile colic) … p.1765

Heart Disorders and Diseases - Heart Attack. Findings from Renmin Hospital of Wuhan University Provides New Data about Heart Attack (Exosomes Mediate the Intercellular Communication after Myocardial Infarction) … p.1766

Eye Diseases and Conditions - Retinitis Pigmentosa. Findings from Research Foundation Reveals New Findings on Retinitis Pigmentosa (Homozygosity mapping guided next generation sequencing to identify the causative genetic variation in inherited retinal degenerative diseases) … p.1767

Cell Research - Cell Adhesion Molecules. Findings from Research Hospital Broaden Understanding of Cell Adhesion Molecules (Association between the Levels of IL–6, sE–Selectin and Distal Sensory Nerve Conduction Studies in Patients with Prediabetes) … p.1768

Heart Disorders and Diseases - Takotsubo Cardiomyopathy. Findings from Research Hospital in Takotsubo Cardiomyopathy Reported (Warm–up Brugada phenocopy associated with takotsubo cardiomyopathy) … p.1769
Oncology - Neuroblastomas. Findings from Research Institute Update Understanding of Neuroblastomas (MicroRNA–497 impairs the growth of chemoresistant neuroblastoma cells by targeting cell cycle, survival and vascular permeability genes) … p.1770

Skin Diseases and Conditions - Psoriasis. Findings from Rockefeller University in the Area of Psoriasis Reported (Increased expression of interleukin–17 pathway genes in nonlesional skin of moderate–to–severe psoriasis vulgaris) … p.1772

Cardiovascular Diseases. Findings from Roma Tor Vergata University in the Area of Cardiovascular Diseases Reported (Preterm delivery and elevated maternal total vascular resistance: signs of suboptimal cardiovascular adaptation to pregnancy?) … p.1773

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Findings from Royal Brompton Hospital Provide New Insights into Left Ventricular Hypertrophy (Differential diagnosis of left ventricular hypertrophy: usefulness of multimodality imaging and tissue characterization with cardiac magnetic resonance) … p.1774

Heart Disorders and Diseases - Rheumatic Heart Disease. Findings from Royal Children's Hospital Has Provided New Data on Rheumatic Heart Disease (Adherence to secondary antibiotic prophylaxis for patients with rheumatic heart disease diagnosed through screening in Fiji) … p.1775

Central Nervous System Diseases and Conditions - Epilepsy. Findings from Royal College of Surgeons Update Understanding of Epilepsy (Distinct behavioral and epileptic phenotype differences in 129/P mice compared to C57BL/6 mice subject to intraamygdala kainic acid–induced status epilepticus) … p.1776

Hormones - Anterior Pituitary Hormones. Findings from Royal Manchester Children's Hospital Update Understanding of Anterior Pituitary Hormones (Effect of summer daylight exposure and genetic background on growth in growth hormone–deficient children) … p.1777

Gram-Positive Bacteria - Staphylococcus aureus. Findings from Royal Prince Alfred Hospital in the Area of Staphylococcus aureus Reported (Prevention and Control of Methicillin–Resistant Staphylococcus aureus in Acute Care Settings) … p.1778

Clinical Research - Clinical Trials and Studies. Findings from Royal United Hospital Update Understanding of Clinical Trials and Studies (Safety and effectiveness of hormonal treatment versus hormonal treatment with vigabatrin for infantile spasms (ICISS): a randomised, multicentre, open–label …] … p.1779

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Ruhr University Has Provided New Information about Atrial Fibrillation (Vdrive Evaluation of Remote Steering and Testing in Lasso Electrophysiology Procedures Study: The VERSATILE Study in Atrial Fibrillation Ablation) … p.1781

Nervous System Diseases and Conditions - Hyperalgesia. Findings from Rutgers State University Reveals New Findings on Hyperalgesia (Contribution of the Suppressor of Variegation 3–9 Homolog 1 in Dorsal Root Ganglia and Spinal
Cord Dorsal Horn to Nerve Injury–induced Nociceptive Hypersensitivity) … p.1782

Central Nervous System Diseases and Conditions - Intracranial Aneurysm.
Findings from S. Fischer et al Update Understanding of Intracranial Aneurysm [Single–center experience in the endovascular treatment of wide–necked intracranial aneurysms with a bridging intra–/extra–aneurysm implant (pCONus)] … p.1783

Drugs and Therapies - Pharmacology.
Findings from S. Klenke and Co–Authors Broaden Understanding of Pharmacology (Easy–to–use strategy for reference gene selection in quantitative real–time PCR experiments) … p.1784

Oncology - Colon Cancer.
Findings from S. Mukherjee and Colleagues Provides New Insights into Colon Cancer (Chromosomal microarray provides enhanced targetable gene aberration detection when paired with next generation sequencing panel in profiling lung and colorectal ...) … p.1785

Cyclohexanes.
Findings from S. Sassano–Higgins and Co–Researchers in the Area of Cyclohexanes Reported (A Review Of Ketamine Abuse And Diversion) … p.1786

Small Interference RNAs (siRNAs).
Findings from S. Svenson and Co–Authors Broaden Understanding of Small Interference RNAs (siRNAs) (Tumor Selective Silencing Using an RNAi–Conjugated Polymeric Nanopharmaceutical) … p.1787

Gram–Negative Bacteria - Enterobacteriaceae.
Findings from S.D. Braun and Co–Researchers in the Area of Enterobacteriaceae Described (Carbapenemase–producing Enterobacteriaceae: a 2–year surveillance in a hospital in Iasi, Romania) … p.1788

Urologic Diseases and Conditions - Urinary Tract Infection.
Findings from S.K. Singh and Co–Researchers Provides New Data on Urinary Tract Infection (Detection of AmpC beta–lactamase and adherence factors in uropathogenic Escherichia coli isolated from aged patients) … p.1789

Cancer Research.

Oncology - Colon Cancer.
Findings from Sacred Heart Catholic University Provides New Data on Colon Cancer (Infliximab does not increase colonic cancer risk associated to murine chronic colitis) … p.1791

Endocrine System Diseases and Conditions - Polycystic Ovary Syndrome.
Findings from Safarik University Yields New Findings on Polycystic Ovary Syndrome (The Effect of Alfalcacidol and Metformin on Phenotype Manifestations in Women with Polycystic Ovary Syndrome – a Preliminary Study) … p.1792

Drugs and Therapies - Drug Delivery Systems.

Genetics - Human Genetics.
Findings from Saitama Medical University Broaden Understanding of Human Genetics (HDR: a statistical two–step approach successfully identifies disease genes in autosomal recessive families) … p.1794

Liver Diseases and Conditions - Hepatitis C Virus.
Findings from Saitama Medical University Provide New Insights into Hepatitis C Virus (Development of rare resistance–associated variants that are extremely tolerant against NSSA inhibitors during daclatasvir/asunaprevir
therapy by a two–hit ...) … p.1795

Heart Disorders and Diseases - Cardiogenic Shock. Findings from San Gerardo Hospital Broaden Understanding of Cardiogenic Shock (Effects of Levosimendan on Endothelial Function and Hemodynamics During Weaning From Veno–Arterial Extracorporeal Life Support) … p.1796

Oncology - Epithelial Cancer. Findings from Sapienza–University Broaden Understanding of Epithelial Cancer [Interleukin–15 enhances cytokine induced killer (CIK) cytotoxic potential against epithelial cancer cell lines via an innate pathway] … p.1797

Oncology - Breast Cancer. Findings from Sarah Cannon Research Institute Provide New Insights into Breast Cancer (Ramucirumab With Eribulin Versus Eribulin in Locally Recurrent or Metastatic Breast Cancer Previously Treated With Anthracycline and Taxane Therapy: A ...) … p.1798

Apoptosis. Findings from Sathyabama University Yields New Data on Apoptosis (Pectin mediated gold nanoparticles induces apoptosis in mammary adenocarcinoma cell lines) … p.1799

Oncology - Cancer Genetics. Findings from School of Biotechnology and Biomolecular Science Reveals New Findings on Cancer Genetics (The emerging role of long non–coding RNAs in endometrial cancer) … p.1800

Chemistry - Biochemistry. Findings from School of Medicine Broaden Understanding of Biochemistry (MAGI–1 Interacts with Nephrin to Maintain Slit Diaphragm Structure through Enhanced Rap1 Activation in Podocytes) … p.1801

Cardiovascular Diseases and Conditions - Malignant Hypertension. Findings from School of Medicine Broaden Understanding of Malignant Hypertension (Incidence and risk of hypertension in patients newly treated for multiple myeloma: a retrospective cohort study) … p.1802

Nephrology. Findings from School of Medicine Broaden Understanding of Nephrology (Photothermal Ablation of in Situ Renal Tumor by PEG–IR780–C13 Micelles and Near–Infrared Irradiation) … p.1803

Digestive System Diseases and Conditions - Sclerosing Cholangitis. Findings from School of Medicine Broadens Understanding of Sclerosing Cholangitis (The features of mucosa–associated microbiota in primary sclerosing cholangitis) … p.1804

Heart Disorders and Diseases - Heart Attack. Findings from School of Medicine Provide New Insights into Heart Attack (Amiodarone or nifekalant upon hospital arrival for refractory ventricular fibrillation after out–of–hospital cardiac arrest) … p.1805

Breast Diseases and Conditions. Findings from School of Medicine Provides New Data about Breast Diseases and Conditions (Endothelial cell colony forming units derived from malignant breast diseases are resistant to tumor necrosis factor–alpha–induced apoptosis) … p.1806

Drugs and Therapies - Pharmaceutical Research. Findings from School of Medicine Provides New Data on Pharmaceutical Research (Immune checkpoint inhibitors for cancer treatment) … p.1807

Digestive System Diseases and Conditions - Crohn's Disease. Findings from School of Medicine in Crohn's Disease Reported (Potential model for differential diagnosis between Crohn's disease and primary intestinal lymphoma) … p.1808
January 14, 2017

Lung Diseases and Conditions - Pneumonia. Findings from School of Medicine in Pneumonia Reported (Dual–seq transcriptomics reveals the battle for iron during Pseudomonas aeruginosa acute murine pneumonia) … p.1809

Proteins - Mitochondrial Proteins. Findings from School of Pharmacy Yields New Findings on Mitochondrial Proteins (Identification of small molecules that bind to the mitochondrial protein mitoNEET) … p.1810

Gastroenterology. Findings from School of Science Reveals New Findings on Gastroenterology (3D engineered In vitro hepatospheroids for studying drug toxicity and metabolism) … p.1811

Genetics - Genetics and Cancer. Findings from Semmelweis University Provide New Insights into Genetics and Cancer (Epigenetic Regulation of SMARCB1 By miR–206,–381 and–671–5p Is Evident in a Variety of SMARCB1 Immunonegative Soft Tissue Sarcomas, While miR–765 Appears ...) … p.1812

Drugs and Therapies - Antifungals. Findings from Semmelweis University Reveals New Findings on Antifungals (Development and characterization of the voriconazole loaded lipid–based nanoparticles) … p.1813

Oncology - Esophageal Cancer. Findings from Seoul National University in the Area of Esophageal Cancer Described (Risk Factors for Local Recurrence and Optimal Length of Esophagectomy in Esophageal Squamous Cell Carcinoma) … p.1814

Oncology - Carcinomas. Findings from Shandong Academy of Medical Sciences in the Area of Carcinomas Described (Differentiating Brain Metastases from Different Pathological Types of Lung Cancers Using Texture Analysis of T1 Postcontrast MR) … p.1815

Chemistry - Chemistry and Materials Research. Findings from Shandong University Broden Understanding of Chemistry and Materials Research (Multifunctional Mixed Micelles for Efficient Docetaxol Delivery for Cancer Therapy) … p.1816

Cardiovascular Diseases and Conditions - Thrombosis. Findings from Shandong University Update Understanding of Thrombosis (Neoadjuvant Transcatheter Arterial Chemoembolization For Biliary Tumor Thrombosis: A Retrospective Study) … p.1817

Enterovirus. Findings from Shandong University Yields New Data on Enterovirus (In Vitro Assessment of Combinations of Enterovirus Inhibitors against Enterovirus 71) … p.1818

Nutritional and Metabolic Diseases and Conditions - Hyperglycemia. Findings from Shandong University Yields New Data on Hyperglycemia (Inhibition of Aberrant MicroRNA–133a Expression in Endothelial Cells by Statin Prevents Endothelial Dysfunction by Targeting GTP Cyclohydrolase 1 in Vivo) … p.1819

Oncology - Esophageal Cancer. Findings from Shandong University in the Area of Esophageal Cancer Described (Longitudinal, observational study on associations between postoperative nutritional vitamin D supplementation and clinical outcomes in esophageal cancer patients ...) … p.1821

Oncology - Oral Squamous Cell Carcinoma. Findings from Shanghai Jiao–Tong University Broden Understanding of Oral Squamous Cell Carcinoma (Overexpression of stathmin/oncoprotein 18 correlates with poorer prognosis and interacts with p53 in oral squamous cell carcinoma) … p.1822
January 14, 2017

www.NewsRx.com

Spermatogenesis. Findings from Shanghai Jiao–Tong University Broadens Understanding of Spermatogenesis. (Dynamics of the Transcriptome during Human Spermatogenesis: Predicting the Potential Key Genes Regulating Male Gametes Generation) ... p.1823

Curettage. Findings from Shanghai Jiao–Tong University Yields New Findings on Curettage (Management of Cesarean Scar Pregnancy Using Ultrasound–Guided Dilation and Curettage) ... p.1824

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Shanghai Jiao–Tong University in Type 2 Diabetes Reported (Glucose enhances rat islet function via stimulating CART expression) ... p.1825

Chalcones. Findings from Shanghai Jiao–Tong University in the Area of Chalcones Described (Chalcone–benzoxaborole hybrids as novel anticancer agents) ... p.1826

Oncology - Cancer Research. Findings from Shanghai Normal University Update Understanding of Cancer Research (Rap1A promotes ovarian cancer metastasis via activation of ERK/p38 and notch signaling) ... p.1827

Science. Findings from Shanghai University Yields New Data on Science (Remarkable alterations of Nav1.6 in reactive astrogliosis during epileptogenesis) ... p.1828

Apoptosis. Findings from Shanxi Medical University Update Understanding of Apoptosis (Overproduction of reactive oxygen species and activation of MAPKs are involved in apoptosis induced by PM2.5 in rat cardiac H9c2 cells) ... p.1829

Drugs and Therapies - Ethnopharmacology. Findings from Shihezi University Has Provided New Data on Ethnopharmacology (Protective effects of seed melon extract on CCl4–induced hepatic fibrosis in mice)

Cell Research - Cell Adhesion Molecules. Findings from Shihezi University Has Provided New Information about Cell Adhesion Molecules (Meta–analysis of downregulated E–cadherin as a poor prognostic biomarker for cervical cancer) ... p.1831

Leptospiira. Findings from Shiraz University in Leptospiira Reported (Prevalence of renal lesions in slaughtered cattle in Shiraz, Iran, and detection of Leptospira in them by nested PCR–RFLP) ... p.1832

Leukocyte Diseases and Conditions - Neutropenia. Findings from Shizuoka Prefectural General Hospital in the Area of Neutropenia Described (Augmented Renal Clearance in Patients With Febrile Neutropenia is Associated With Increased Risk for Subtherapeutic Concentrations of Vancomycin) ... p.1833

Central Nervous System Diseases and Conditions - Meningitis. Findings from Sichuan University Broadens Understanding of Meningitis (Clinical features, Outcomes and Molecular Profiles of Drug Resistance in Tuberculous Meningitis in non–HIV Patients) ... p.1834

Oncology - Gastric Cancer. Findings from Singapore National University Update Knowledge of Gastric Cancer (A simple biomarker scoring matrix for early gastric cancer detection) ... p.1836

Mesotheliomas. Findings from Sir Charles Gairdner Hospital Yields New Data on Mesotheliomas (The IASLC Mesothelioma Staging Project: Proposals for Revisions of the T Descriptors in the Forthcoming Eighth
January 14, 2017

Edition of the TNM Classification for Pleural ...) … p.1837

Oncology - Cancer Genetics. Findings from Soochow University Broaden Understanding of Cancer Genetics [Clinical and molecular cytogenetic studies in ten patients with hematological malignancies characterized by t(20;21)(q11;q11) resulted from del(20q)] … p.1838

Oncology - Gastric Cancer. Findings from Soochow University Provides New Data about Gastric Cancer [Rs56288038 (C/G) in 3'UTR of IRF–1 Regulated by MiR–502–5p Promotes Gastric Cancer Development] … p.1839

Therapeutics. Findings from Sorbonne University in Therapeutics Reported (Highly selective inhibition of myosin motors provides the basis of potential therapeutic application) … p.1840

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Southeast University in the Area of Type 2 Diabetes Described (Renal Denervation: A Potential Novel Treatment for Type 2 Diabetes Mellitus?) … p.1841

Oncology - Squamous Cell Carcinoma. Findings from Southern Medical University Broadens Understanding of Squamous Cell Carcinoma (Epb413 suppresses esophageal squamous cell carcinoma invasion and inhibits MMP2 and MMP9 expression) … p.1842

Mental Health Diseases and Conditions - Depression. Findings from Southern Medical University in the Area of Depression Described (A pilot integrative genomics study of GABA and glutamate neurotransmitter systems in suicide, suicidal behavior, and major depressive disorder) … p.1843

www.NewsRx.com

Pharmacokinetics. Findings from Southwest University Has Provided New Data on Pharmacokinetics (Pharmacokinetics, excretion of 8–cetylberberine and its main metabolites in rat urine) … p.1844

Peptidoglycan. Findings from Spanish National Research Council (CSIC) Provides New Data about Peptidoglycan (Orthologous and Paralogous AmpD Peptidoglycan Amidases from Gram–Negative Bacteria) … p.1845

Oncology - Prostate Cancer. Findings from Stanford University Provides New Data about Prostate Cancer (Fluorescence Monitoring of the Oxidative Repair of DNA Alkylation Damage by ALKBH3, a Prostate Cancer Marker) … p.1846

Drugs and Therapies - Pharmacy Practice. Findings from Stanford University Yields New Findings on Pharmacy Practice (Lost in translation: Medication labeling for immigrant families) … p.1847

Cardiology. Findings from Stanford University in the Area of Cardiology Reported (Transcriptomic Profiling Maps Anatomically Patterned Subpopulations among Single Embryonic Cardiac Cells) … p.1848

Drugs and Therapies - Acetylcysteine. Findings from State University in Acetylcysteine Reported (The Coadministration of N–Acetylcysteine Ameliorates the Effects of Arsenic Trioxide on the Male Mouse Genital System) … p.1849

Drugs and Therapies - Cardiovascular Agents. Findings from State University of Campinas Provide New Insights into Cardiovascular Agents [Beneficial Effect of the Nitric Oxide Donor Compound 3–(1,3–Dioxoisindolin–2–yl)Benzyl Nitrate on Dysregulated Phosphodiesterase 5, NADPH Oxidase, and ...] … p.1850
January 14, 2017

Gram-Negative Bacteria - Burkholderia. Findings from State University of New York in the Area of Burkholderia Reported (Burkholderia ginsengisoli bacteremia: emergence of a novel pathogen) … p.1851

Oncology - Gliomas. Findings from State University of New York in the Area of Gliomas Described (TRPM7 channel inhibition mediates midazolam–induced proliferation loss in human malignant glioma) … p.1852

Oncology - Breast Cancer. Findings from Sun Yat Sen University Yields New Data on Breast Cancer (Allelic expression imbalance polymorphisms in susceptibility chromosome regions and the risk and survival of breast cancer) … p.1853

Oncology - Lung Cancer. Findings from Sungkyunkwan University Broaden Understanding of Lung Cancer (Do New pN Subclassifications Proposed by IASLC’s Lung Cancer Staging Project Agree with ypN Categories after Trimodality Therapy for Initial N2 Disease?) … p.1854

Oncology - Liver Cancer. Findings from Sungkyunkwan University Provides New Data about Liver Cancer (Aggressive Intrasegmental Recurrence of Hepatocellular Carcinoma After Combined Transarterial Chemoembolization and Radiofrequency Ablation) … p.1855

Oncology - Breast Cancer. Findings from Sungkyunkwan University School of Medicine Broadens Understanding of Breast Cancer (Zerumbone suppresses the motility and tumorigenecity of triple negative breast cancer cells via the inhibition of TGF–b1 signaling pathway) … p.1856

Cardiology. Findings from Sungkyunkwan University in the Area of Cardiology Described (Association Between Presence of a Cardiac Intensivist and Mortality in an Adult Cardiac Care Unit) … p.1857

Immunology - Immunoglobulins. Findings from Swiss Federal Institute of Technology Broaden Understanding of Immunoglobulins (Immunocytokines and bispecific antibodies: two complementary strategies for the selective activation of immune cells at the tumor site) … p.1858

Biotechnology - Biologics. Findings from T.H. Broschard and Colleagues Update Understanding of Biologics (Assessing safety of extractables from materials and leachables in pharmaceuticals and biologics – Current challenges and approaches) … p.1859

Cardiovascular Diseases and Conditions - Thromboembolism. Findings from T.J. Milling and Co–Authors in the Area of Thromboembolism Reported (Re–initiation of dabigatran and direct factor Xa antagonists after a major bleed) … p.1860

Oncology - Prostate Cancer. Findings from Taipei Medical University Update Knowledge of Prostate Cancer (Obstructive sleep apnea and urological comorbidities in males: a population–based study) … p.1861

Life Science Research - Cell Biology. Findings from Technical University Broaden Understanding of Cell Biology (Rare phenotypes in the understanding of autoimmunity) … p.1862

Oncology - Breast Cancer. Findings from Technical University Has Provided New Data on Breast Cancer (Changes in apoptosis–related gene expression and cytokine release in breast cancer cells treated with CpG–loaded magnetic PAMAM nanoparticles) … p.1863

Statistical Mechanics. Findings from Technical University Provide New Insights into Statistical Mechanics (Some thermodynamic considerations on low frequency electromagnetic waves effects on cancer invasion and metastasis) … p.1864

www.NewsRx.com
January 14, 2017

Oncology - Prostate Cancer. Findings from Technical University Provides New Data on Prostate Cancer (Current use of PSMA–PET in prostate cancer management) … p.1865

Periodontal Diseases and Conditions - Aggressive Periodontitis. Findings from Technical University Update Knowledge of Aggressive Periodontitis (Differentiation of Chronic and Aggressive Periodontitis by FTIR Spectroscopy) … p.1866

Cardiology. Findings from Tel Aviv University Has Provided New Data on Cardiology (Left atrial appendage and pulmonary artery anatomic relationship by cardiac–gated computed tomography: Implications for late pulmonary artery perforation by left atrial …) … p.1867

Oncology - Breast Cancer. Findings from Tel Aviv University Reveals New Findings on Breast Cancer (First trimester human placenta prevents breast cancer cell attachment to the matrix: The role of extracellular matrix) … p.1868

Oncology - Endometrial Cancer. Findings from Temple University Hospital Provides New Data about Endometrial Cancer (The obese endometrial cancer patient: how do we effectively improve morbidity and mortality in this patient population?) … p.1869

Lymphatic Diseases and Conditions - Hemophagocytic Lymphohistiocytosis. Findings from Thomas Jefferson University Update Understanding of Hemophagocytic Lymphohistiocytosis (Hemophagocytic lymphohistiocytosis in the ED) … p.1870

www.NewsRx.com

Drugs and Therapies - Pharmacology. Findings from Tohoku University Update Knowledge of Pharmacology (Effects of ZD0947, a novel and potent ATP–sensitive K+ channel opener, on smooth muscle–type ATP–sensitive K+ channels) … p.1872

Necroptosis. Findings from Tokyo Medical and Dental University Broaden Understanding of Necroptosis (Necroptosis–like Neuronal Cell Death Caused by Cellular Cholesterol Accumulation) … p.1873

Drugs and Therapies - Antibiotics. Findings from Tongji University Update Knowledge of Antibiotics (Preparation and Antibacterial Mechanism Insight of Polypeptide–Based Micelles with Excellent Antibacterial Activities) … p.1874

Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Findings from Tongji University in the Area of Arteriovenous Fistula Described (A modified nontransposed brachiobasilic arteriovenous fistula versus brachiocephalic arteriovenous fistula for maintenance hemodialysis access) … p.1875

Autoimmune Diseases and Conditions - Psoriatic Arthritis. Findings from Toronto Western Hospital Yields New Data on Psoriatic Arthritis (CXCL10 Is a Possible Biomarker for the Development of Psoriatic Arthritis Among Patients With Psoriasis) … p.1876

Choline. Findings from Tottori University Broaden Understanding of Choline (M3 Muscarinic Receptor Signaling Stabilizes a Novel Mutant Human Ether–a–Go–Go–Related Gene Channel Protein via Phosphorylation of Heat Shock Factor 1 in Transfected Cells) … p.1877
Immune System Diseases and Conditions
- Graft-Versus-Host Disease. Findings from Toulouse University Hospital Reveals New Findings on Graft–Versus–Host Disease (Photo–induced graft–versus–host disease) … p.1878

Immunology - Immune System. Findings from Trinity College in Immune System Provides New Insights (The Role of the Oxysterol/EBI2 Pathway in the Immune and Central Nervous Systems) … p.1879

Stroke. Findings from Triserv General Hospital Yields New Findings on Stroke (Differentiating contrast staining after acute ischemic stroke from hemorrhagic transformation during emergency evaluation) … p.1880

Membrane Proteins - Arrestins. Findings from Tufts University Update Understanding of Arrestins (Mutation–Induced Functional Alterations of CCR6) … p.1881

Heart Disorders and Diseases - Atrial Fibrillation. Findings from Turgut Ozal University Yields New Data on Atrial Fibrillation (Galectin–3: A biochemical marker to detect paroxysmal atrial fibrillation?) … p.1882

Heart Disorders and Diseases - Endocarditis. Findings from Umea University Broaden Understanding of Endocarditis (High incidence of infective endocarditis in adults with congenital ventricular septal defect) … p.1883

Autoinflammatory Diseases and Conditions - Familial Mediterranean Fever. Findings from University Children’s Hospital Broaden Understanding of Familial Mediterranean Fever (Correlation of Secretory Activity of Neutrophils With Genotype in Patients With Familial Mediterranean Fever) … p.1884

Sexually Transmitted Diseases and Conditions (STDs). Findings from University College Broaden Understanding of Sexually Transmitted Diseases and Conditions (STDs) (Men who have sex with men in Great Britain: comparing methods and estimates from probability and convenience sample surveys) … p.1885

Biomedical Engineering - Regenerative Medicine. Findings from University College Yields New Findings on Regenerative Medicine (Liver resection for cancer: New developments in prediction, prevention and management of postresectional liver failure) … p.1886

Cardiology. Findings from University Health Network Broadens Understanding of Cardiology (The cardiac repair benefits of inflammation do not persist: evidence from mast cell implantation) … p.1887

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from University Hospital Broaden Understanding of Type 2 Diabetes (Development of an Interleukin–1b Vaccine in Patients with Type 2 Diabetes) … p.1888

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Findings from University Hospital Has Provided New Data on Abdominal Aortic Aneurysm (Three–dimensional Ultrasound in the Management of Abdominal Aortic Aneurysms: A Topical Review) … p.1889

Transplant Medicine - Liver Transplants. Findings from University Hospital Provide New Insights into Liver Transps (Effects of the Hypnotic Agent on Primary Graft Dysfunction After Liver Transplantation) … p.1890

Oncology - Rectal Cancer. Findings from University Hospital Yields New Data on Rectal Cancer (Primary squamous cell carcinoma of the rectum: an atypical histology) … p.1891
January 14, 2017

Oncology - Prostate Cancer. Findings from University Hospital in the Area of Prostate Cancer Reported (Current Status of Lymph Node Imaging in Bladder and Prostate Cancer) … p.1892

Lung Diseases and Conditions - Pulmonary Sarcoidosis. Findings from University Medical Center Broadens Understanding of Pulmonary Sarcoidosis (Refractory pulmonary sarcoidosis – proposal of a definition and recommendations for the diagnostic and therapeutic approach) … p.1892

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Findings from University Medical Center Has Provided New Data on Inflammatory Bowel Disease (Systematic analysis of chromatin interactions at disease associated loci links novel candidate genes to inflammatory bowel disease) … p.1893

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from University Medical Center, Erlangen Provides New Data on Type 2 Diabetes (Benefits and Risks of Aliskiren Treatment in Patients With Type 2 Diabetes: Analyses of the 3A Registry) … p.1895

Transplant Medicine - Heart Transplants. Findings from University do Estado da Bahia Broadens Understanding of Heart Transplants (Use of venoarterial extracorporeal membrane oxygenation in fulminant chagasic myocarditis as a bridge to heart transplant) … p.1896

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Findings from University of Aberdeen Broaden Understanding of Alzheimer Disease (Efficacy and safety of tau–aggregation inhibitor therapy in patients with mild or moderate Alzheimer’s disease: a randomised, controlled, double-blind, ...) … p.1897

www.NewsRx.com

Drugs and Therapies - Monoclonal Antibodies. Findings from University of Adelaide Broaden Understanding of Monoclonal Antibodies (What are we paying for? A cost–effectiveness analysis of patented denosumab and generic alendronate for postmenopausal osteoporotic women in Australia) … p.1898

Oncology - Breast Cancer. Findings from University of Adelaide Provides New Data on Breast Cancer (Pushing estrogen receptor around in breast cancer) … p.1899

Heart Disorders and Diseases - Heart Disease. Findings from University of Alabama Provide New Insights into Heart Disease (Idiopathic ventricular arrhythmias Relevance to the anatomy, diagnosis and treatment) … p.1900

Musculoskeletal Manipulations. Findings from University of Alberta Update Understanding of Musculoskeletal Manipulations (Tissue loading created during spinal manipulation in comparison to loading created by passive spinal movements) … p.1901

Developmental Diseases and Conditions - Autism. Findings from University of Antwerp Broaden Understanding of Autism (The ethics of complexity. Genetics and autism, a literature review) … p.1902

Health and Medicine - Clinical Dysmorphology. Findings from University of Antwerp Broaden Understanding of Clinical Dysmorphology (Germline mosaicism in osteopathia striata with cranial sclerosis—recurrence in siblings) … p.1903

Oncology. Findings from University of Antwerp in Oncology Reported (Evaluation and consequences of heterogeneity in the circulating tumor cell compartment) … p.1904
Gram-Positive Bacteria - Staphylococcus aureus. Findings from University of Arkansas Broaden Understanding of Staphylococcus aureus (Evaluation of Antibiotics Active against Methicillin–Resistant Staphylococcus aureus Based on Activity in an Established Biofilm) … p.1904

Heart Disorders and Diseases - Heart Failure. Findings from University of Arkansas Provides New Data about Heart Failure (Differing Effects Of Fatigue And Depression On Hospitalizations In Men And Women With Heart Failure) … p.1906

Cardiology. Findings from University of Arkansas Reveals New Findings on Cardiology (Effects of registered nurse staffing level on hospital–acquired conditions in cardiac surgery patients: A propensity score matching analysis) … p.1907

Uterine Diseases and Conditions - Endometrial Hyperplasia. Findings from University of Auckland in the Area of Endometrial Hyperplasia Reported (Body mass index trumps age in decision for endometrial biopsy: cohort study of symptomatic premenopausal women) … p.1908

Drugs and Therapies - Antibiotics. Findings from University of Aveiro in the Area of Antibiotics Described (Potential of Constructed Wetlands for Removal of Antibiotics from Saline Aquaculture Effluents) … p.1909

Oncology - Bladder Cancer. Findings from University of Bari in the Area of Bladder Cancer Described (Apoptotic effect of the selective PPAR beta/delta agonist GW501516 in invasive bladder cancer cells) … p.1910

Pharmacokinetics. Findings from University of Basel in the Area of Pharmacokinetics Reported (Population Pharmacokinetic Modeling of Tribendimidine Metabolites in Opisthorchis viverrini–Infected Adults) … p.1911

Oncology - Breast Cancer. Findings from University of Birmingham Update Knowledge of Breast Cancer (Modeling Canadian Quality Control Test Program for Steroid Hormone Receptors in Breast Cancer: Diagnostic Accuracy Study) … p.1912

Sexually Transmitted Diseases and Conditions (STDs). Findings from University of Birmingham in the Area of Sexually Transmitted Diseases and Conditions (STDs) Described (Sexual behaviour of backpackers who visit Koh Tao and Koh Phangan, Thailand: a cross–sectional study) … p.1913

Aortic Dissection. Findings from University of Bologna Provide New Insights into Aortic Dissection (Composite valve graft implantation for the treatment of aortic valve and root disease: Results in 1045 patients) … p.1914

Oncology - Bladder Cancer. Findings from University of Bourgogne Broaden Understanding of Bladder Cancer (Apoptotic effect of the selective PPAR beta/delta agonist GW501516 in invasive bladder cancer cells) … p.1915

Dentistry. Findings from University of Brescia Yields New Findings on Dentistry (Mutation analysis by direct and whole exome sequencing in familial and sporadic tooth agenesis) … p.1916

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from University of Brighton Broaden Understanding of Obesity [Weight bias, health consciousness and behavioral actions (activities)] … p.1917

Life Science Research - Plant Biology. Findings from University of British Columbia Update Knowledge of Plant Biology (Identification of Methylosome Components as Negative Regulators of Plant Immunity Using Chemical Genetics) … p.1918
January 14, 2017

**Biomedical Engineering - Tissue Engineering.** Findings from University of British Columbia Yields New Findings on Tissue Engineering (It May Seem Inflammatory, but Some T Cells Are Innately Healing to the Bone) … p.1919

**Men's Health - Andrology.** Findings from University of Cairo Broaden Understanding of Andrology (Molecular screening of CFTR gene in Egyptian patients with congenital bilateral absence of the vas deferens: a preliminary study) … p.1920

**Lung Diseases and Conditions - Asthma.** Findings from University of Calgary Broaden Understanding of Asthma [Understanding how long–acting beta(2)–adrenoceptor agonists enhance the clinical efficacy of inhaled corticosteroids in asthma – an update] … p.1921

**Infectious Diseases.** Findings from University of Calgary Has Provided New Data on Infectious Diseases (A Primer on Infectious Disease Bacterial Genomics) … p.1922

**Disease Attributes - Chronic Disease.** Findings from University of Calgary Update Knowledge of Chronic Disease (Finding resiliency in the face of financial barriers Development of a conceptual framework for people with cardiovascular–related chronic disease) … p.1923

**Stem Cell Research - Hematopoietic Stem Cells.** Findings from University of California Broaden Understanding of Hematopoietic Stem Cells (A Transient Developmental Hematopoietic Stem Cell Gives Rise to Innate–like B and T Cells) … p.1924

**Endocrine System Diseases and Conditions - Insulin Resistance.** Findings from University of California Has Provided New Data on Insulin Resistance (Mitochondrial quality control in insulin resistance and diabetes) … p.1925

**Eye Diseases and Conditions - Retinitis Pigmentosa.** Findings from University of California Provide New Insights into Retinitis Pigmentosa (Establishing the involvement of the novel gene AGBL5 in retinitis pigmentosa by whole genome sequencing) … p.1926

**Stem Cell Research.** Findings from University of California Provides New Data on Stem Cell Research (Regional signals in the planarian body guide stem cell fate in the presence of genomic instability) … p.1927

**Biomedical Engineering - Tissue Engineering.** Findings from University of California Provides New Data on Tissue Engineering (Transforming Growth Factor–b–Induced KDM4B Promotes Chondrogenic Differentiation of Human Mesenchymal Stem Cells) … p.1928

**Surgery - Surgical Technologies.** Findings from University of California Yields New Findings on Surgical Technologies (Compatibility of Radiofrequency Surgical Sponge Detection Technology with Cardiac Implantable Electronic Devices and Temporary Pacemakers) … p.1929

**Drugs and Therapies - Antibiotics.** Findings from University of California in Antibiotics Provides New Insights (Exploring Synergy between Classic Mutagens and Antibiotics To Examine Mechanisms of Synergy and Antibiotic Action) … p.1930

**Chemistry - Biochemistry.** Findings from University of California in the Area of Biochemistry Reported (Effect of site–directed mutations in multidrug efflux pump AcrB examined by quantitative efflux assays) … p.1931

**Blood Pressure.** Findings from University of Cambridge Provides New Data about Blood Pressure (Clinical relevance of central blood pressure – a critical review) … p.1932
Immune System Diseases and Conditions

Cardiology. Findings from University of Central Florida Broaden Understanding of Cardiology (SOD1 Overexpression Preserves Baroreflex Control of Heart Rate with an Increase of Aortic Depressor Nerve Function) … p.1934

Evolution. Findings from University of Chester in the Area of Evolution Described (Consequences of mating and predation risk for longevity in a freshwater snail: abstinence makes the heart beat longer) … p.1935

Oncology - Pancreatic Cancer. Findings from University of Chicago Has Provided New Data on Pancreatic Cancer (External radiation is associated with limited improvement in overall survival in resected margin–negative stage IIB pancreatic adenocarcinoma) … p.1936

Drugs and Therapies - Antibiotics. Findings from University of Cincinnati Update Knowledge of Antibiotics [MDMA decreases glutamic acid decarboxylase (GAD) 67–immunoreactive neurons in the hippocampus and increases seizure susceptibility: Role for glutamate] … p.1937

Oncology - Cervical Cancer. Findings from University of Colorado Broaden Understanding of Cervical Cancer (Disparities in standard of care treatment and associated survival decrement in patients with locally advanced cervical cancer) … p.1938

Oncology - Medulloblastomas. Findings from University of Colorado Broadens Understanding of Medulloblastomas (A WEE1 Inhibitor Analog of AZD1775 Maintains Synergy with Cisplatin and Demonstrates Reduced Single–Agent Cytotoxicity in Medulloblastoma Cells) … p.1939

Life Science Research - Cell Biology. Findings from University of Colorado Has Provided New Data on Cell Biology (Diverse Intestinal Bacteria Contain Putative Zwitterionic Capsular Polysaccharides with Anti–inflammatory Properties) … p.1941

Hematologic Diseases and Conditions - Anemia. Findings from University of Colorado School of Medicine Provide New Insights into Anemia (Twin–twin transfusion and laser therapy) … p.1942

Thyroid Diseases and Conditions - Hypothyroidism. Findings from University of Colorado in Hypothyroidism Reported (Clinical significance of sunitinib–associated macrocytosis in metastatic renal cell carcinoma) … p.1943

Gram-Negative Bacteria - Piscirickettsia. Findings from University of Concepcion Has Provided New Data on Piscirickettsia [Novel insights into the response of Atlantic salmon (Salmo salar) to Piscirickettsia salmonis: Interplay of coding genes and IncRNAs during bacterial infection] … p.1944

Nitrofurans. Findings from University of Copenhagen Broaden Understanding of Nitrofurans [Near–infrared chemical imaging (NIR–CI) of 3D printed pharmaceuticals] … p.1945

Gastroenterology - Colorectal Research. Findings from University of Copenhagen Provide New Insights into Colorectal Research (Phosphodiesterases in non–neoplastic appearing colonic mucosa from patients with colorectal neoplasia) … p.1946

Endocrine System Diseases and Conditions - Insulin Resistance. Findings from University of Copenhagen Provide New Insights into Insulin Resistance (Increasing insulin resistance accentuates the effect of triglyceride–associated loci on serum triglycerides during 5 years) … p.1947
Gram-Negative Bacteria - Pseudomonas fluorescens. Findings from University of Copenhagen Update Knowledge of Pseudomonas fluorescens (Lipopeptide biosurfactant viscosin enhances dispersal of Pseudomonas fluorescens SBW25 biofilms) … p.1948

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from University of Copenhagen in Type 2 Diabetes Reported (Metformin–associated risk of acute dialysis in patients with type 2 diabetes: A nationwide cohort study) … p.1949

Cardiovascular Diseases and Conditions - Hypertension. Findings from University of Copenhagen in the Area of Hypertension Reported (Causes of Death Data in the Global Burden of Disease Estimates for Ischemic and Hemorrhagic Stroke) … p.1950

Cardiovascular Diseases and Conditions - Thrombosis. Findings from University of Cordoba in the Area of Thrombosis Reported (Partial thrombosis of the corpus cavernosum: should we dig deeper into coagulopathy disorders?) … p.1951

Heart Disorders and Diseases - Atrial Fibrillation. Findings from University of Eastern Finland Has Provided New Data on Atrial Fibrillation (Reduced kidney function is a risk factor for atrial fibrillation) … p.1952

Oncology - Glioblastomas. Findings from University of Edinburgh Provides New Data on Glioblastomas (A Zebrafish Live Imaging Model Reveals Differential Responses of Microglia Toward Glioblastoma Cells In Vivo) … p.1953

Cytokines. Findings from University of Florida Provides New Data about Cytokines (Sexual dimorphic function of IL–17 in salivary gland dysfunction of the C57BL/6.NOD–Aec1Aec2 model of Sjoren's syndrome) … p.1955

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from University of Florida Provides New Data about Obesity (Accuracy of Weight Loss Information in Spanish Search Engine Results on the Internet) … p.1956

Biotechnology - Cellular and Molecular Medicine. Findings from University of Fudan in the Area of Cellular and Molecular Medicine Described (Gene mutation–based and specific therapies in precision medicine) … p.1957

Pharmacogenetics. Findings from University of Geneva in the Area of Pharmacogenetics Described (Pharmacogenetic comparison of CYP2D6 predictive and measured phenotypes in a South African cohort) … p.1958

Heart Disorders and Diseases - Heart Failure. Findings from University of Genoa Provides New Insights into Heart Failure (Update on cardiotoxicity of anti–cancer treatments) … p.1959

Oncology - Prostate Cancer. Findings from University of Glasgow Provide New Insights into Prostate Cancer (Loss of Signal Transducer and Activator of Transcription 1 is Associated With Prostate Cancer Recurrence) … p.1960

Mononuclear Leukocytes. Findings from University of Glasgow Provides New Data on Mononuclear Leukocytes (Use of neutrophil to lymphocyte ratio for predicting histopathological grade of canine mast cell tumours) … p.1961
Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings from University of Groningen Provide New Insights into Chronic Obstructive Pulmonary Disease (Susceptibility for cigarette smoke–induced DAMP release and DAMP–induced inflammation in COPD) ... p.1961

Angiology. Findings from University of Groningen Reveals New Findings on Angiology (Advanced glycation end products: An emerging biomarker for adverse outcome in patients with peripheral artery disease) ... p.1963

Heart Disorders and Diseases - Right Ventricular Dysfunction. Findings from University of Groningen in the Area of Right Ventricular Dysfunction Reported (Right ventricular dysfunction in heart failure with preserved ejection fraction: a systematic review and meta–analysis) ... p.1963

Oncology - Prostate Cancer. Findings from University of Helsinki Central Hospital in Oncology (Advanced glycation end products: An emerging biomarker for adverse outcome in patients with peripheral artery disease) ... p.1964

Coagulation. Findings from University of Helsinki Central Hospital in Coagulation Reported (Platelet Function Tests in Bleeding Disorders) ... p.1965

Diet and Nutrition - Nutritional Biochemistry. Findings from University of Helsinki in the Area of Nutritional Biochemistry Reported (Western diet enhances intestinal tumorigenesis in Min/ plus mice, associating with mucosal metabolic and inflammatory stress and loss of Apc heterozygosity) ... p.1966

Drugs and Therapies - Antibiotics. Findings from University of Houston in Antibiotics Reported (Comparative Pharmacokinetic Profiling of Different Polymyxin B Components) ... p.1967

Cardiology. Findings from University of Illinois in Cardiology Reported (Cardiac MR Elastography of the Mouse: Initial Results) ... p.1968

Gram-Negative Bacteria - Pseudomonas aeruginosa. Findings from University of Insubria Yields New Findings on Pseudomonas aeruginosa (Pigments influence the tolerance of Pseudomonas aeruginosa PAO1 to photodynamically induced oxidative stress) ... p.1969

Keto Acids. Findings from University of Iowa Reveals New Findings on Keto Acids (Mitochondrial pyruvate carrier function and cancer metabolism) ... p.1970

Drugs and Therapies - Olanzapine Therapy. Findings from University of Karachi Broaden Understanding of Olanzapine Therapy [MALDI–MS analysis and theoretical evaluation of olanzapine as a UV laser desorption ionization (LDI) matrix] ... p.1971

Oncology - Oral Cancer. Findings from University of Karachi Yields New Data on Oral Cancer (Metabolite Profiling of Preneoplastic and Neoplastic Lesions of Oral Cavity Tissue Samples Revealed a Biomarker Pattern) ... p.1972

Drugs and Therapies - Coumarins and Indandiones. Findings from University of Kebangsaan Yields New Data on Coumarins and Indandiones (Influence of Genotype on Warfarin Maintenance Dose Predictions Produced Using a Bayesian Dose Individualization Tool) ... p.1973

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Findings from University of KwaZulu–Natal Provides New Data about Type 1 Diabetes Mellitus (Naringin Mitigates Cardiac Hypertrophy by Reducing Oxidative Stress and
January 14, 2017

Inactivating c–Jun Nuclear Kinase–1 Protein in Type I Diabetes) … p.1974

Oncology - Prostate Cancer. Findings from University of L’Aquila in the Area of Prostate Cancer Described (Cyclin D1 silencing suppresses tumorigenicity, impairs DNA double strand break repair and thus radiosensitizes androgen–independent prostate cancer cells to DNA ...) … p.1975

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Findings from University of Lausanne Hospital Reveals New Findings on Subarachnoid Hemorrhage (Intracranial pressure and outcome in critically ill patients with aneurysmal subarachnoid hemorrhage: a systematic review) … p.1976

Mental Health Diseases and Conditions - Schizophrenia. Findings from University of Lausanne Provides New Data about Schizophrenia (Neurons acetylate their way to migration) … p.1977

Bacterial Infections. Findings from University of Lausanne Yields New Findings on Bacterial Infections (Impact of the microbial derived short chain fatty acid propionate on host susceptibility to bacterial and fungal infections in vivo) … p.1978

Oncology - Colon Cancer. Findings from University of Leeds Update Understanding of Colon Cancer (Poor predictive value of lower gastrointestinal alarm features in the diagnosis of colorectal cancer in 1981 patients in secondary care) … p.1979

Musculoskeletal Diseases and Conditions - Osteoarthritis. Findings from University of London in the Area of Osteoarthritis Reported (Endochondral Growth Defect and Deployment of Transient Chondrocyte Behaviors Underlie Osteoarthritis Onset in a Natural Murine Model) … p.1982

Hematologic Diseases and Conditions - Anemia. Findings from University of Malaysia Update Understanding of Anemia (Effects of various microalgae on fatty acid composition and survival rate of the blue swimming crab Portunus pelagicus larvae) … p.1984

Central Nervous System Diseases and Conditions - Epilepsy. Findings from University of Manchester in the Area of Epilepsy Reported (Monotherapy treatment of epilepsy in pregnancy: congenital malformation outcomes in the child) … p.1985

Immune System Diseases and Conditions - HIV/AIDS. Findings from University of Maryland Update Understanding of HIV/AIDS (Prevalence of transmitted HIV–1 drug resistance among young adults attending HIV counselling and testing clinics in Kigali, Rwanda) … p.1987
Myeloid Cells. Findings from University of Massachusetts School of Medicine in Myeloid Cells Reported (Peptide– and Amine–Modified Glucan Particles for the Delivery of Therapeutic siRNA) … p.1988

Nursing - Transcultural Nursing. Findings from University of Massachusetts Yields New Findings on Transcultural Nursing (A Culturally Adapted Smoking Cessation Intervention for Korean Americans: Preliminary Findings) … p.1989

Cardiovascular Diseases and Conditions - Aneurysm. Findings from University of Massachusetts in the Area of Aneurysm Reported (Endovascular management of radiation–induced subclavian and axillary artery aneurysms) … p.1990

Heart Disorders and Diseases - Heart Attack. Findings from University of Massachusetts in the Area of Heart Attack Described (Emergency department point–of–care ultrasound in out–of–hospital and in–ED cardiac arrest) … p.1991

Dental Cavities. Findings from University of Melbourne Provides New Data on Dental Cavities (Breastfeeding and the risk of dental caries: a systematic review and meta–analysis) … p.1992

Eye Diseases and Conditions - Retinoblastoma. Findings from University of Miami Provides New Data on Retinoblastoma (Antagonists of growth hormone–releasing hormone receptor induce apoptosis specifically in retinoblastoma cells) … p.1993

Proteomics. Findings from University of Michigan Broaden Understanding of Proteomics (ESR1 and PGR polymorphisms are associated with estrogen and progesterone receptor expression in breast tumors) … p.1994

Heart Disorders and Diseases - Heart Failure. Findings from University of Michigan Has Provided New Information about Heart Failure (Refusal to participate in heart failure studies: do age and gender matter?) … p.1995

Oncology - Prostate Cancer. Findings from University of Michigan Reveals New Findings on Prostate Cancer (Health Care Integration and Quality among Men with Prostate Cancer) … p.1996

Mononuclear Leukocytes. Findings from University of Milan Broaden Understanding of Mononuclear Leukocytes (Transcriptional Landscape of Human Tissue Lymphocytes Unveils Uniqueness of Tumor–Infiltrating T Regulatory Cells) … p.1997

Metabolic Diseases. Findings from University of Minnesota Broaden Understanding of Metabolic Diseases (Gut microbiota from metabolic disease–resistant, macrophagespecific RIP140 knockdown mice improves metabolic phenotype and gastrointestinal integrity) … p.1998

Thiazoles. Findings from University of Minnesota Broadens Understanding of Thiazoles (Cocaine–induced reward enhancement measured with intracranial self–stimulation in rats bred for low versus high saccharin intake) … p.1999

Drugs and Therapies - Pharmacy Practice. Findings from University of Minnesota Provides New Data on Pharmacy Practice (Strategies and steps fostering the success of medication management services in community pharmacies) … p.2000

Microcystis. Findings from University of Minnesota in the Area of Microcystis Reported (Influence of fluid motion on growth and vertical distribution of cyanobacterium Microcystis aeruginosa) … p.2001
January 14, 2017

Hormones - Corpus Luteum Hormones. Findings from University of Mississippi Provides New Data on Corpus Luteum Hormones (Serelaxin improves the pathophysiology of placental ischemia in the reduced uterine perfusion pressure rat model of preeclampsia) … p.2002

Blood Diseases and Conditions - Sepsis. Findings from University of Miyazaki in the Area of Sepsis Described (Preterm labor and neonatal sepsis caused by intrauterine Helicobacter cinaedi infection) … p.2003

Cell Research - Bone Marrow Cells. Findings from University of Munster Yields New Data on Bone Marrow Cells [Increased intermediate CD14(++)CD16(++) monocyte subset levels associate with restenosis after peripheral percutaneous transluminal angioplasty] … p.2004

Cardiovascular Diseases and Conditions - Vasculitis. Findings from University of Nantes Has Provided New Data on Vasculitis (Exercise–Induced Vasculitis: A Review with Illustrated Cases) … p.2005

Oncology - Breast Cancer. Findings from University of Naples Federico II Update Understanding of Breast Cancer (Tumor characteristics and prognosis in familial breast cancer) … p.2006

Autoimmune Diseases and Conditions. Findings from University of Navarra Provides New Data about Autoimmune Diseases and Conditions (Towards patient stratification and treatment in the autoimmune disease lupus erythematosus using a systems pharmacology approach) … p.2007

Oncology - Prostate Cancer. Findings from University of Navarra Provides New Data about Prostate Cancer (Dose escalation with external beam radiation therapy and high–dose–rate brachytherapy combined with long–term androgen deprivation therapy in high and very high risk ...) … p.2008

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Findings from University of Navarra Update Understanding of Abdominal Aortic Aneurysm (Anisotropic abdominal aortic aneurysm replicas with biaxial material characterization) … p.2009

Oncology - Pancreatic Cancer. Findings from University of Nebraska in Pancreatic Cancer Reported (Up–regulation of N–cadherin by Collagen I–activated Discoidin Domain Receptor 1 in Pancreatic Cancer Requires the Adaptor Molecule Shc1) … p.2010

Oncology - Carcinoid Tumor. Findings from University of Ottawa in the Area of Carcinoid Tumor Reported (Recurrence of a Thymic Carcinoid Tumour 15 Years After Resection With Multiple Myopericardial Cardiac Metastases: The Role of Multimodality Imaging) … p.2014

Liver Diseases and Conditions - Hepatitis C Virus. Findings from University of Ottawa in the Area of Hepatitis C Virus Described (Influence of female sex on hepatitis C virus infection progression and treatment outcomes) … p.2015

www.NewsRx.com
January 14, 2017

Ankylosing Spondylitis. Findings from University of Oxford Update Understanding of Ankylosing Spondylitis (An ankylosing spondylitis–associated genetic variant in the IL23R–IL12RB2 intergenic region modulates enhancer activity and is associated with increased Th1–cell ...) … p.2017

Lung Diseases and Conditions - Pulmonary Hypertension. Findings from University of Oxford Yields New Data on Pulmonary Hypertension (Elevation of iron storage in humans attenuates the pulmonary vascular response to hypoxia) … p.2018

Oncology - Prostate Cancer. Findings from University of Oxford in Prostate Cancer Reported [Lifestyle factors and prostate–specific antigen (PSA) testing in UK Biobank: Implications for epidemiological research] … p.2020

Drugs and Therapies - Antiretrovirals. Findings from University of Paris Has Provided New Information about Antiretrovirals (A Predictive Model for Selecting Patients with HCV Genotype 3 Chronic Infection with a High Probability of Sustained Virological Response to Peginterferon ...) … p.2021

Gram-Negative Bacteria - Acinetobacter baumannii. Findings from University of Paris–Sud Provide New Insights into Acinetobacter baumannii (First Occurrence of OXA–72–Producing Acinetobacter baumannii in Serbia) … p.2022

www.NewsRx.com

Oncology - Melanoma. Findings from University of Paris–Sud Provide New Insights into Melanoma (Adjuvant ipilimumab in stage III melanoma: New landscape, new questions) … p.2023

Liver Diseases and Conditions - Hepatitis C Virus. Findings from University of Parma Has Provided New Information about Hepatitis C Virus (Are Anti–TNF–a Agents Safe for Treating Psoriasis in Hepatitis C Virus Patients with Advanced Liver Disease? Case Reports and Review of the Literature) … p.2024

Terpenes. Findings from University of Pennsylvania Provides New Data on Terpenes (Structure and Function of Fusicoccadiene Synthase, a Hexameric Bifunctional Diterpene Synthase) … p.2025

Heart Disorders and Diseases - Atrial Fibrillation. Findings from University of Pennsylvania Yields New Findings on Atrial Fibrillation (Mechanistic insights into mitral regurgitation due to atrial fibrillation: “Atrial functional mitral regurgitation.”) … p.2026

Digestive System Diseases and Conditions - Acid Reflux Disease. Findings from University of Pennsylvania in the Area of Acid Reflux Disease Described (Autophagy Levels Are Elevated in Barrett's Esophagus and Promote Cell Survival From Acid and Oxidative Stress) … p.2027

Mosquito-Borne Diseases - Malaria. Findings from University of Pisa in the Area of Malaria Described (Ethnopharmacology in the fight against Plasmodium parasites and brain disorders: In memoriam of Philippe Rasoanaivo) … p.2028

Drugs and Therapies - Antibiotics. Findings from University of Pompeu Fabra Update Knowledge of Antibiotics (Validation of a colistin plasma concentration breakpoint as a predictor of nephrotoxicity in patients treated with colistin methanesulfonate) … p.2028
January 14, 2017

Cardiovascular Diseases and Conditions - Hypertension. Findings from University of Porto Reveals New Findings on Hypertension (Pulmonary arterial hypertension: Basic knowledge for clinicians) … p.2030

Human Coronavirus Oc43. Findings from University of Quebec Provide New Insights into Human Coronavirus Oc43 (Safe and Sensitive Antiviral Screening Platform Based on Recombinant Human Coronavirus OC43 Expressing the Luciferase Reporter Gene) … p.2030

Cardiovascular Research. Findings from University of Queensland Broaden Understanding of Cardiovascular Research (Sedentary Time, Cardiorespiratory Fitness, and Cardiovascular Risk Factor Clustering in Older Adults—the Generation 100 Study) … p.2032

Oncology - Pancreatic Cancer. Findings from University of Queensland Yields New Data on Pancreatic Cancer (Association between family cancer history and risk of pancreatic cancer) … p.2033

Nanotechnology and Microtechnology. Findings from University of Queensland in the Area of Nanotechnology and Microtechnology Described (Toward Precision Medicine: A Cancer Molecular Subtyping Nano–Strategy for RNA Biomarkers in Tumor and Urine) … p.2034

Oncology - Breast Cancer. Findings from University of Reims Update Knowledge of Breast Cancer (Costs associated with Eribulin treatment for patients with metastatic breast cancer in a comprehensive cancer center in France) … p.2035

Drugs and Therapies - Metabolic Agents. Findings from University of Rostock Has Provided New Data on Metabolic Agents (Pharmacologic Treatment Assigned for Niemann Pick Type C1 Disease Partly Changes Behavioral Traits in Wild–Type Mice) … p.2036

www.NewsRx.com

Oncology - Colon Cancer. Findings from University of Sannio Provides New Data about Colon Cancer (Proteomic screening identifies calreticulin as a miR–27a direct target repressing MHC class I cell surface exposure in colorectal cancer) … p.2037

Liver Diseases and Conditions - Non-Alcoholic Steatohepatitis. Findings from University of Seville Has Provided New Data on Non–Alcoholic Steatohepatitis (Improvement in liver histology due to lifestyle modification is independently associated with improved kidney function in patients with non–alcoholic ...) … p.2038

Nutritional and Metabolic Diseases and Conditions - Hyperglycemia. Findings from University of Sherbrooke Provides New Data about Hyperglycemia (Persistent Insulin Resistance in Podocytes Caused by Epigenetic Changes of SHP–1 in Diabetes) … p.2039

Nanotechnology - Nanoparticles. Findings from University of Sonora Update Understanding of Nanoparticles (Folate Functionalized PLGA Nanoparticles Loaded with Plasmid pVAX1–NH36: Mathematical Analysis of Release) … p.2040

Oncology - Cancer Care. Findings from University of Sussex Provides New Data about Cancer Care (Therapeutic aims of drugs offering only progression–free survival are misunderstood by patients, and oncologists may be overly optimistic about likely benefits) … p.2042
Oncology - Breast Cancer. Findings from University of Sydney in the Area of Breast Cancer Reported (The Role of Socially Embedded Concepts in Breast Cancer Screening: An Empirical Study with Australian Experts) … p.2043

Oncology - Prostate Cancer. Findings from University of Tampere Broaden Understanding of Prostate Cancer (Additive inhibitory effects of simvastatin and enzalutamide on androgen–sensitive LNCaP and VCaP prostate cancer cells) … p.2044

Connective Tissue Cells. Findings from University of Tehran Provides New Data on Connective Tissue Cells (Inhibition of MicroRNA–21 induces apoptosis in dermal fibroblasts of patients with systemic sclerosis) … p.2045

Oncology - Prostate Cancer. Findings from University of Texas Broaden Understanding of Prostate Cancer (Tissue–scale, personalized modeling and simulation of prostate cancer growth) … p.2046

Transplant Medicine - Liver Transplants. Findings from University of Texas Medical Branch Update Understanding of Liver Transplants (Increased Risk of Death for Patients on the Waitlist for Liver Transplant Residing at Greater Distance From Specialized Liver Transplant Centers in the …) … p.2047

Oncology - Thyroid Cancer. Findings from University of Texas Provides New Data on Thyroid Cancer (Spine Stereotactic Radiosurgery for Patients with Metastatic Thyroid Cancer: Secondary Analysis of Phase I/II Trials) … p.2048

Drugs and Therapies - Therapeutic Drug Monitoring. Findings from University of Texas School of Medicine Provide New Insights into Therapeutic Drug Monitoring (Suitability of the DRI Hydrocodone/Hydromorphone Immunoassay in the Clinical Environment at a Lower Cutoff: Validation With LC–MS/MS …) … p.2049

Aortic Aneurysms. Findings from University of Texas Southwestern Has Provided New Data on Aortic Aneurysms (Safety and effectiveness of total percutaneous access for fenestrated endovascular aortic aneurysm repair) … p.2050

Oncology - Gliomas. Findings from University of Texas Southwestern Medical Center Provides New Data on Gliomas (Phase I study of RO4929097 with bevacizumab in patients with recurrent malignant glioma) … p.2051

Autoimmune Diseases and Conditions - Multiple Sclerosis. Findings from University of Texas Southwestern Yields New Findings on Multiple Sclerosis (CD40–Mediated NF–kappa B Activation in B Cells Is Increased in Multiple Sclerosis and Modulated by Therapeutics) … p.2052

Oncology - Pancreatic Cancer. Findings from University of Texas Update Knowledge of Pancreatic Cancer (Identification of KIAA1199 as a Biomarker for Pancreatic Intraepithelial Neoplasia) … p.2053

Oncology - Lung Cancer. Findings from University of Texas Update Understanding of Lung Cancer (The IASLC Mesothelioma Staging Project: Proposals for Revisions of the N Descriptors in the Forthcoming Eighth Edition of the TNM Classification for Pleural Mesothelioma) … p.2054

Drugs and Therapies - Central Nervous System Agents. Findings from University of Texas in the Area of Central Nervous System Agents Described (Effects of Lorcaserin on Cocaine and Methamphetamine Self–Administration and Reinstatement of Responding Previously Maintained by Cocaine in Rhesus Monkeys) … p.2055
January 14, 2017

Gram-Negative Bacteria - Pseudomonas putida. Findings from University of Tokyo in the Area of Pseudomonas putida Reported (Effects of carbazole–degradative plasmid pCAR1 on biofilm morphology in Pseudomonas putida KT2440) ... p.2057

Steatosis. Findings from University of Toledo Yields New Findings on Steatosis [Glucocorticoid Receptor beta Induces Hepatic Steatosis by Augmenting Inflammation and Inhibition of the Peroxisome Proliferator–activated Receptor (PPAR) alpha] ... p.2058

Clinical Research - Clinical Trials and Studies. Findings from University of Toronto Broaden Understanding of Clinical Trials and Studies (Integrated safety of levodopa–carbidopa intestinal gel from prospective clinical trials) ... p.2059

Hematologic Diseases and Conditions - Sickle Cell Anemia. Findings from University of Toronto Broaden Understanding of Sickle Cell Anemia (MRI–based cerebrovascular reactivity using transfer function analysis reveals temporal group differences between patients with sickle cell disease and healthy ...) ... p.2060

Health and Medicine - Clinical Epidemiology. Findings from University of Toronto in the Area of Clinical Epidemiology Described (A third of systematic reviews changed or did not specify the primary outcome: a PROSPERO register study) ... p.2061

Oncology - Breast Cancer. Findings from University of Turin Broadens Understanding of Breast Cancer (Luminal long non–coding RNAs regulated by estrogen receptor alpha in a ligand–independent manner show functional roles in breast cancer) ... p.2062

www.NewsRx.com

Neurodegenerative Diseases and Conditions - Creutzfeldt-Jakob Disease. Findings from University of Ulm Broaden Understanding of Creutzfeldt–Jakob Disease (Neurofilaments in blood and CSF for diagnosis and prediction of onset in Creutzfeldt–Jakob disease) ... p.2063

Drugs and Therapies - Testosterone Congeners. Findings from University of Utrecht Update Knowledge of Testosterone Congeners (Where does hydrolysis of nandrolone decanoate occur in the human body after release from an oil depot?) ... p.2064

Central Nervous System Diseases and Conditions - Epilepsy. Findings from University of Verona Has Provided New Data on Epilepsy (Melatonin as add–on treatment for epilepsy) ... p.2065

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from University of Verona in the Area of Type 2 Diabetes Reported (Evidence of left atrial remodeling and left ventricular diastolic dysfunction in type 2 diabetes mellitus with preserved systolic function) ... p.2066

Oncology - Breast Cancer. Findings from University of Waikato Broaden Understanding of Breast Cancer (Urban Rural Differences in Breast Cancer in New Zealand) ... p.2068

Oncology - Prostate Cancer. Findings from University of Waikato Yields New Data on Prostate Cancer (Communication networks of men facing a diagnosis of prostate cancer) ... p.2068

Nutritional and Metabolic Diseases and Conditions - Hyperglycemia. Findings from University of Washington Broaden Understanding of Hyperglycemia (Blood–Brain Barrier Disruption and Neurovascular Unit Dysfunction in Diabetic Mice: Protection with the Mitochondrial Carbonic Anhydrase Inhibitor Topiramate) ... p.2070
Heart Disorders and Diseases - Sinus Arrhythmia. Findings from University of Washington Provides New Data about Sinus Arrhythmia (Respiratory sinus arrhythmia as a potential measure in substance use treatment—outcome studies) … p.2071

Gram-Negative Bacteria - Escherichia coli. Findings from University of Waterloo Has Provided New Information about Escherichia coli (Cinnamaldehyde Characterization as an Antibacterial Agent toward E. coli Metabolic Profile Using 96–Blade Solid–Phase Microextraction Coupled to Liquid …) … p.2072

Oncology - Breast Cancer. Findings from University of Waterloo in the Area of Breast Cancer Described (Identification of potential compensatory muscle strategies in a breast cancer survivor population: A combined computational and experimental approach) … p.2073

Musculoskeletal Diseases and Conditions - Microcephaly. Findings from University of Western Australia Provide New Insights into Microcephaly (Reinforcing the association between distal 1q CNVs and structural brain disorder: A case of a complex 1q43–q44 CNV and a review of the literature) … p.2074

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings from University of Western Australia Provides New Data on Obesity (Sun Exposure and Its Effects on Human Health: Mechanisms through Which Sun Exposure Could Reduce the Risk of Developing Obesity and Cardiometabolic Dysfunction) … p.2075

Transplant Medicine - Lung Transplants. Findings from University of Western Australia Yields New Data on Lung Transplants (Successful Single–Lung Transplant for Severe Lung Graft–Versus–Host Disease Two Years After Sibling Allograft for Acute Lymphoblastic Leukemia: A Case

www.NewsRx.com

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics. Findings from University of Western Ontario in Anxiolytics Sedatives and Hypnotics Provides New Insights (Relationships between Endogenous Plasma Biomarkers of Constitutive Cytochrome P450 3A Activity and Single–Time–Point Oral Midazolam …) … p.2077

Oncology - Prostate Cancer. Findings from University of Wisconsin Has Provided New Information about Prostate Cancer (Optimizing an 18F–NaF and 18F–FDG cocktail for PET assessment of metastatic castration–resistant prostate cancer) … p.2078

Health and Medicine - Addiction Research. Findings from University of Wisconsin School of Medicine and Public Health Broaden Understanding of Addiction Research (Comparative effectiveness of motivation phase intervention components for use with smokers unwilling to quit: a factorial …) … p.2079

Drugs and Therapies - Immunosuppressive Agents. Findings from University of Witwatersrand Has Provided New Data on Immunosuppressive Agents (Sirolimus–induced lymphoedema) … p.2080

Environmental Health - Environmental Research and Public Health. Findings from University of Wollongong in the Area of Environmental Research and Public Health Described (Improving Precautionary Communication in the EMF Field? Effects of Making Messages Consistent and Explaining the Effectiveness of …) … p.2081

Ebola Virus. Findings from University of Zambia Yields New Findings on Ebola Virus [Development of an Immunochromatography Assay (QuickNavi–Ebola) to Detect Multiple Species of Ebolaviruses] … p.2082
Transplant Medicine - Cell Transplants.  
Findings from University of Zurich in Cell Transplants Reported (Blood Stem Cell Activity Is Arrested by Th1–Mediated Injury Preventing Engraftment following Nonmyeloablative Conditioning) … p.2083

Genetic Diseases and Conditions - Down Syndrome.  
Findings from University of the West of Scotland Provides New Data about Down Syndrome (Investigating the Lived Experience of People with Down Syndrome with Dementia: Overcoming Methodological and Ethical Challenges) … p.2084

Central Nervous System Diseases and Conditions - Epilepsy.  
Findings from Uppsala University Broaden Understanding of Epilepsy (Novel SACS mutations associated with intellectual disability, epilepsy and widespread supratentorial abnormalities) … p.2085

Science - Materials Science and Physical Chemistry.  
Findings from Uppsala University Broaden Understanding of Materials Science and Physical Chemistry (Partitioning into Colloidal Structures of Fasted State Intestinal Fluid Studied by Molecular Dynamics Simulations) … p.2086

Gram-Negative Bacteria - Klebsiella pneumoniae.  
Findings from V. Sziarto et al Has Provided New Information about Klebsiella pneumoniae (Both clades of the epidemic KPC–producing Klebsiella pneumoniae clone ST258 share a modified galactan O–antigen type) … p.2087

Autoimmune Diseases and Conditions - Multiple Sclerosis.  
Findings from V.D. Nazarov et al Has Provided New Information about Multiple Sclerosis (Immunogenicity of human interferon–beta–containing pharmaceuticals) … p.2088

Nephrology.  
Findings from V.H. Thourani and Co–Authors Update Knowledge of Nephrology (Impact of Preoperative Chronic Kidney Disease in 2,531 High–Risk and Inoperable Patients Undergoing Transcatheter Aortic Valve Replacement in the PARTNER Trial) … p.2089

Cardiovascular Diseases.  
Findings from V.L. Mendy and Co–Authors Broaden Understanding of Cardiovascular Diseases (Decreasing prevalence of no known major risk factors for cardiovascular disease among Mississippi adults, Mississippi Behavioral Risk Factor Surveillance …) … p.2090

Stem Cell Research - Embryonic Stem Cells.  
Findings from Venetian Institute of Molecular Medicine Provides New Data on Embryonic Stem Cells (Analysis of Calcium Transients and Uniaxial Contraction Force in Single Human Embryonic Stem Cell–Derived Cardiomyocytes on Microstructured …) … p.2091

Cardiovascular Diseases and Conditions - Atherosclerosis.  
Findings from Vesalius Research Center Broaden Understanding of Atherosclerosis (Endothelial cell metabolism: A novel player in atherosclerosis? Basic principles and therapeutic opportunities) … p.2092

Oncology - Melanoma.  
Findings from Veterans Affairs Medical Center Broaden Understanding of Melanoma (Primary and Secondary Chemoprevention of Malignant Melanoma) … p.2093

Physiology - Applied Physiology.  
Findings from Victoria University in the Area of Applied Physiology Described (Salbutamol effects on systemic potassium dynamics during and following intense continuous and intermittent exercise) … p.2094
January 14, 2017

Bacterial Infections and Mycoses - Endotoxemia. Findings from Virginia Commonwealth University Broaden Understanding of Endotoxemia (Chronic opioid use is associated with altered gut microbiota and predicts readmissions in patients with cirrhosis) … p.2095

Science. Findings from Virginia Polytechnic Institute and State University Provides New Data about Science (Convex Analysis of Mixtures for Separating Non–negative Well–grounded Sources) … p.2096

Oncology - Prostate Cancer. Findings from Virginia University Medical Center Broaden Understanding of Prostate Cancer (Development of a patient decision aid for the treatment of localised prostate cancer: a participatory design approach) … p.2097

Cardiovascular Diseases and Conditions - Atherosclerosis. Findings from W. Zhou and Co–Researchers Provides New Data on Atherosclerosis (Study on material base and action mechanism of compound Danshen dripping pills for treatment of atherosclerosis based on modularity analysis) … p.2098

Oncology - Prostate Cancer. Findings from Wayne State University Has Provided New Data on Prostate Cancer (Appropriateness Criteria for Active Surveillance of Prostate Cancer) … p.2099

Otolaryngology. Findings from Wayne State University Provides New Data about Otolaryngology (Otolaryngology Concerns for Illicit and Prescription Drug Use) … p.2100

Liver Diseases and Conditions - Hepatitis C Virus. Findings from Weill Cornell Medical College Update Understanding of Hepatitis C Virus (Treatment adherence and virological response rates in hepatitis C virus infected persons treated with sofosbuvir–based regimens: results from ERCHIVES) … p.2101

www.NewsRx.com

Inflammation. Findings from Weill Cornell Medical College Yields New Findings on Inflammation (The Microbiome and the Liver: The Basics) … p.2102

Oncology - Breast Cancer. Findings from Wroclaw University Broaden Understanding of Breast Cancer (Expression of metallothionein 3 in ductal breast cancer) … p.2103

Transfusion Medicine - Blood Transfusion. Findings from Wuhan University Broaden Understanding of Blood Transfusion (Associations between autophagy, the ubiquitin–proteasome system and endoplasmic reticulum stress in hypoxia–deoxygenation or ischemia–reperfusion) … p.2104

Oncology - Breast Cancer. Findings from Wuhan University Broaden Understanding of Breast Cancer (Progress in the clinical detection of heterogeneity in breast cancer) … p.2105

Connective Tissue Cells. Findings from Y. Huang and Colleagues Provides New Insights into Connective Tissue Cells (CRISPR/Cas9 knockout of HAS2 in rat chondrosarcoma chondrocytes demonstrates the requirement of hyaluronan for aggrecan retention) … p.2107

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings from Y. Li and Colleagues Update Understanding of Chronic Obstructive Pulmonary Disease (Bufei Yishen granules combined with acupoint sticking therapy suppress oxidative stress in chronic obstructive pulmonary disease rats: Via ...) … p.2108
Adipogenesis. Findings from Y.J. Li and Co–Authors Broaden Understanding of Adipogenesis (Berberine Alleviates Olanzapine–Induced Adipogenesis via the AMPK alpha–SREBP Pathway in 3T3–L1 Cells) … p.2110

Eye Diseases and Conditions - Retinal Vein Occlusion. Findings from Yonsei University Update Understanding of Retinal Vein Occlusion (Central Retinal Vein Occlusion Associated with Ulcerative Collitis) … p.2111

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Yonsei University Yields New Findings on Type 2 Diabetes (Mitochondria and the NLRP3 inflammasome: physiological and pathological relevance) … p.2112

Oncology - Gastric Cancer. Findings from Z.P. Yang and Co–Authors Broaden Understanding of Gastric Cancer (Equol Induces Mitochondria–Dependent Apoptosis in Human Gastric Cancer Cells via the Sustained Activation of ERK1/2 Pathway) … p.2113

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings from Zagazig University in the Area of Type 2 Diabetes Reported (PARP–1 inhibition alleviates diabetic cardiac complications in experimental animals) … p.2114

Health and Medicine - Medicinal Chemistry. Findings from Zhejiang University Broaden Understanding of Medicinal Chemistry [Discovery of 4–chloro–3–(5–(pyridin–3–yl)–1,2,4–oxadiazole–3–yl) benzamides as novel RET kinase inhibitors] … p.2115

Intercellular Signaling Peptides and Proteins - Cytokines. Findings from Zhejiang University Provides New Data on Cytokines (RKIP and TBK1 form a positive feedback loop to promote type I interferon production in innate immunity) … p.2116

Nanotechnology - Nanoparticles. Findings from Zhejiang University Provides New Data on Nanoparticles (Tetraphenylethene–based highly emissive metallacage as a component of theranostic supramolecular nanoparticles) … p.2117

Genetics - Human Mutation. Findings from Ziv Medical Center Update Understanding of Human Mutation (Systematic Analysis of CCNO Variants in a Defined Population: Implications for Clinical Phenotype and Differential Diagnosis) … p.2118

Oncology - Acute Lymphoblastic Leukemia. Findings in Acute Lymphoblastic Leukemia Reported from University of Southern California [Expression and polymorphism (rs4880) of mitochondrial superoxide dismutase (SOD2) and asparaginase induced hepatotoxicity in adult patients with acute ...] … p.2119

Oncology - Acute Myeloid Leukemia. Findings in Acute Myeloid Leukemia Reported from Wroclaw Medical University (Variations in genes involved in regulation of the nuclear factor – kB pathway and the risk of acute myeloid leukaemia) … p.2120

Adenocarcinomas. Findings in Adenocarcinomas Reported from Gazi University (Unusual Presentation of an Adenocarcinoma of the Lung Metastasizing to the Mandible, Including Molecular Analysis and a Review of the Literature) … p.2121

Pediatrics - Adolescent Medicine. Findings in Adolescent Medicine Reported from University of Miami (Substance Use and Sexual Risk Behavior in Sexual Minority Hispanic Adolescents) … p.2121

Amino Acids. Findings in Amino Acids Reported from Baylor University College of Medicine (Whole genome sequence analysis of serum amino acid levels) … p.2122
Drugs and Therapies - Androgens.  
Findings in Androgens Reported from University of Ulster (Androgen deprivation in LNCaP prostate tumour xenografts induces vascular changes and hypoxic stress, resulting in promotion of epithelial–to–mesenchymal transition) … p.2123

Angiography.  Findings in Angiography Reported from Second Military Medical University (Dynamic contrast–enhanced MRI for the assessment of spinal tumor vascularity: correlation with angiography) … p.2124

Drugs and Therapies - Antibiotics.  
Findings in Antibiotics Reported from Institute of Surgery Research (Ciprofloxacin–loaded keratin hydrogels reduce infection and support healing in a porcine partial–thickness thermal burn) … p.2125

Drugs and Therapies - Anticholinergic Bronchodilators.  
Findings in Anticholinergic Bronchodilators Reported from University of Ulsan College of Medicine [Efficiency of a New Mesh–Type Nebulizer (NE–SM1 NEPLUS) for Intrapulmonary Delivery of Ipratropium Bromide in Surgical Patients] … p.2126

Drugs and Therapies - Antiinfectives.  
Findings in Antiinfectives Reported from Ehime University (The antibacterial activity of levofloxacin eye drops against staphylococci using an in vitro pharmacokinetic model in the bulbar conjunctiva) … p.2127

Lung Diseases and Conditions - Asthma.  
Findings in Asthma Reported from Queensland University of Technology (Exhaled nitric oxide levels to guide treatment for adults with asthma) … p.2128

Cardiovascular Diseases and Conditions - Atherosclerosis.  Findings in Atherosclerosis Reported from Peking Union Medical College (Association of BMI with total mortality and recurrent stroke among stroke patients: A meta–analysis of cohort studies) … p.2130

Cardiovascular Diseases and Conditions - Atherosclerosis.  Findings in Atherosclerosis Reported from University of Heidelberg [Reduced glyoxalase 1 activity in carotid artery plaques of nondiabetic patients with increased hemoglobin A(1c) level] … p.2131

Atrial Fibrillation.  Findings in Atrial Fibrillation Reported from University of Tokushima (Relationship between local production of microRNA–328 and atrial substrate remodeling in atrial fibrillation) … p.2132

Biguanides.  Findings in Biguanides Reported from Dana–Farber Cancer Institute (Environment Dictates Dependence on Mitochondrial Complex I for NAD plus and Aspartate Production and Determines Cancer Cell Sensitivity to Metformin) … p.2133

Blood Pressure.  Findings in Blood Pressure Reported from Capital Medical University (Cumulative systolic blood pressure exposure in relation to cognitive function in middle–aged and elderly adults A prospective, population–based study) … p.2134

Bone Research.  Findings in Bone Research Reported from University of Oxford (The Effects of Age, Adiposity, and Physical Activity on the Risk of Seven Site–Specific Fractures in Postmenopausal Women) … p.2135

Drugs and Therapies - Cancer Therapy.  
Findings in Cancer Therapy Reported from Chonbuk National University (Nano–Fenton Reactors as a New Class of Oxidative Stress Amplifying Anticancer Therapeutic Agents) … p.2136
January 14, 2017

Tumor Markers - Carcinoembryonic Antigens. Findings in Carcinoembryonic Antigens Reported from University of Jinan (Amperometric sandwich immunoassay for the carcinoembryonic antigen using a glassy carbon electrode modified with iridium nanoparticles, polydopamine and reduced graphene ...) … p.2137

Eye Diseases and Conditions - Cataracts. Findings in Cataracts Reported from Peking Union Medical College Hospital (Novel mutations in CRYGD are associated with congenital cataracts in Chinese families) … p.2138

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings in Chronic Obstructive Pulmonary Disease Reported from China Pharmaceutical University (Liujunzi Tang, a famous traditional Chinese medicine, ameliorates cigarette smoke–induced mouse model of COPD) … p.2139

Cloning. Findings in Cloning Reported from Z.M. Xiang and Co–Researchers (Cloning, characterization and comparative analysis of four death receptorTNFRs from the oyster Crassostrea hongkongensis) … p.2140

Oncology - Colon Cancer. Findings in Colon Cancer Reported from Chonnam National University (Association between the TCF7L2 polymorphism and colorectal cancer does not differ by diabetes and obesity statuses) … p.2141

Oncology - Colon Cancer. Findings in Colon Cancer Reported from Department of Surgery (Synchronous polyps predict metachronous colorectal lesions after curative resection of colorectal cancer) … p.2142

Oncology - Colon Cancer. Findings in Colon Cancer Reported from Osaka University (BRAF V600E inhibition stimulates AMP–activated protein kinase–mediated autophagy in colorectal cancer cells) … p.2143

Oncology - Colon Cancer. Findings in Colon Cancer Reported from Zhengzhou University [Stage dependent expression and tumor suppressive function of FAM134B (JK1) in colon cancer] … p.2144

Digestive System Diseases and Conditions - Crohn's Disease. Findings in Crohn's Disease Reported from All India Institute of Medical Sciences (Endoscopic and clinical responses to anti–tubercular therapy can differentiate intestinal tuberculosis from Crohn's disease) … p.2145

DNA Research. Findings in DNA Research Reported from Tohoku University (DNA Garden: A Simple Method for Producing Arrays of Stretchable DNA for Single–Molecule Fluorescence Imaging of DNA–Binding Proteins) … p.2146

DNA Research. Findings in DNA Research Reported from University of California [In Vitro Lesion Bypass Studies of O(4)–Alkylthymidines with Human DNA Polymerase e] … p.2147

Nervous System Diseases and Conditions - Delirium. Findings in Delirium Reported from J. Norbaek and Co–Researchers (Delirium is seen in one–third of patients in an acute hospital setting. Identification, pharmacologic and non–pharmacologic treatment is inadequate) … p.2148

Diabetes. Findings in Diabetes Reported from Lund University (Nerve regeneration in chitosan conduits and in autologous nerve grafts in healthy and in type 2 diabetic Goto–Kakizaki rats) … p.2150

Drugs and Therapies - Drug Delivery Systems. Findings in Drug Delivery Systems Reported from Institute of Macromolecular Chemistry (Multifunctional nanogels with dual temperature and pH responsiveness) … p.2151

Drugs and Therapies - Drug Development. Findings in Drug Development Reported from GlaxoSmithKline (Epigenetic drug discovery: breaking through the immune barrier) … p.2152

Musculoskeletal Diseases and Conditions - Duchenne Muscular Dystrophy. Findings in Duchenne Muscular Dystrophy Reported from Stanford University (Telomere shortening and metabolic compromise underlie dystrophic cardiomyopathy) … p.2153

Environmental Research. Findings in Environmental Research Reported from State University of New York (Innovating e–waste management: From macroscopic to microscopic scales) … p.2154

Enzymes and Coenzymes - Esterases. Findings in Esterases Reported from Affiliated Hospital (Reduced apurinic/apyrimidinic endonuclease activity enhances the antitumor activity of oxymatrine in lung cancer cells) … p.2155

Oncology - Follicular Lymphoma. Findings in Follicular Lymphoma Reported from Okayama University (CD10 down expression in follicular lymphoma correlates with gastrointestinal lesion involving the stomach and large intestine) … p.2156

Drugs and Therapies - Gliclazide Therapy. Findings in Gliclazide Therapy Reported from Department of Chemistry (Swelling behavior of cross–linked dextran hydrogels and preliminary Gliclazide release behavior) … p.2157

Heart Disorders and Diseases - Heart Failure. Findings in Heart Failure Reported from Division of Nephrology (Pulmonary hypertension in patients on chronic hemodialysis and with heart failure) … p.2158

Heart Disorders and Diseases - Heart Failure. Findings in Heart Failure Reported from University of Pisa (Right ventricular recovery during follow–up is associated with improved survival in patients with chronic heart failure with reduced ejection fraction) … p.2159

Transplant Medicine - Kidney Transplants. Findings in Kidney Transplants Reported from Tel Aviv University (Anemia and markers of erythropoiesis in pediatric kidney transplant recipients compared to children with chronic renal failure) … p.2160

Lipid Research. Findings in Lipid Research Reported from UFCSPA (ESR1 polymorphisms and statin therapy: a sex–specific approach) … p.2161

Lipopolysaccharides. Findings in Lipopolysaccharides Reported from Northwestern University (Lipopolysaccharide Domains Modulate Urovirulence) … p.2162

Oncology - Liver Cancer. Findings in Liver Cancer Reported from Fourth Military Medical University (Dominant Suppression of beta 1 Integrin by Ectopic CD98–ICD Inhibits Hepatocellular Carcinoma Progression) … p.2163

Oncology - Lung Cancer. Findings in Lung Cancer Reported from J. Li and Co–Researchers (Microbial HSP70 peptide epitope 407–426 as adjuvant in tumor–derived autophagosome vaccine therapy of mouse lung cancer)
January 14, 2017

... p.2164

Macrolides. Findings in Macrolides Reported from Medical University (Thermodynamics and kinetics of amphotericin B self–association in aqueous solution characterized in molecular detail) ... p.2165

Oncology - Nasopharyngeal Carcinoma. Findings in Nasopharyngeal Carcinoma Reported from University of Wisconsin (Radiation therapy for nasopharyngeal carcinoma: the predictive value of interim survival assessment) ... p.2166

Nephrology. Findings in Nephrology Reported from Zhengzhou University (Early initiation of renal replacement treatment in patients with acute kidney injury A systematic review and meta–analysis) ... p.2167

Gastroenterology - Oesophagitis. Findings in Oesophagitis Reported from K. Ashida and Co–Researchers (Randomised clinical trial: vonoprazan, a novel potassium–competitive acid blocker, vs. lansoprazole for the healing of erosive oesophagitis) ... p.2168

Oncology - Oropharyngeal Cancer. Findings in Oropharyngeal Cancer Reported from Churchill Hospital (Long–term survival outcomes in patients with surgically treated oropharyngeal cancer and defined human papilloma virus status) ... p.2169

Parkinson’s Disease. Findings in Parkinson’s Disease Reported from King’s College (Dementia in Parkinson’s disease is associated with enhanced mitochondrial complex I deficiency) ... p.2170

Proteins - Peroxisome Proliferator–Activated Receptors. Findings in Peroxisome Proliferator–Activated Receptors Reported from Columbia University (Distinct functions of PPAR gamma isoforms in regulating adipocyte plasticity) ... p.2171

www.NewsRx.com

Drugs and Therapies - Pharmacology. Findings in Pharmacology Reported from University of Florence (What is the evidence for the role of TRP channels in inflammatory and immune cells?) ... p.2172

Drugs and Therapies - Phytotherapy. Findings in Phytotherapy Reported from British Columbia Institute of Technology (Single–Laboratory Validation for the Determination of Flavonoids in Hawthorn Leaves and Finished Products by LC–UV) ... p.2173

Oncology - Prostate Cancer. Findings in Prostate Cancer Reported from Fox Chase Cancer Center (Men’s health supplement use and outcomes in men receiving definitive intensity–modulated radiation therapy for localized prostate cancer) ... p.2174

Oncology - Prostate Cancer. Findings in Prostate Cancer Reported from University of Catania [Prevalence of Cardiovascular Disease and Osteoporosis During Androgen Deprivation Therapy Prescription Discordant to EAU Guidelines: Results From a Multicenter, Cross–sectional ...] ... p.2175

Lung Diseases and Conditions - Pulmonary Embolism. Findings in Pulmonary Embolism Reported from Department of Cardiology (Endosonography of a Pulmonary Artery Obstruction in Echinococcosis) ... p.2176

Science. Findings in Science Reported from University of Florida (Spatiotemporal dynamics of androgen signaling underlie sexual differentiation and congenital malformations of the urethra and vagina) ... p.2177

Biomedical Engineering - Tissue Engineering. Findings in Tissue Engineering Reported from University of Maryland (Improving the clinical impact of biomaterials in cancer immunotherapy) ... p.2178
Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings in Type 2 Diabetes Reported from Yang Ming National University (Interleukin–6 gene polymorphisms correlate with the progression of nephropathy in Chinese patients with type 2 diabetes: A prospective cohort study) … p.2179

Heart Disorders and Diseases - Acute Coronary Syndrome. Findings in the Area of Acute Coronary Syndrome Reported from Bellvitge University Hospital (Does anemia affect the predictive ability of bleeding risk scores in patients with acute coronary syndromes?) … p.2180

Drugs and Therapies - Adverse Drug Reactions. Findings in the Area of Adverse Drug Reactions Reported from University of Chicago [Safety and efficacy of EMR for sporadic, nonampullary duodenal adenomas: a single US center experience (with video)] … p.2181

Cardiovascular Diseases and Conditions - Aneurysm. Findings in the Area of Aneurysm Reported from Health Science Center (A direct aspiration first pass technique for retrieval of a detached coil) … p.2182

Musculoskeletal Diseases and Conditions - Angelman Syndrome. Findings in the Area of Angelman Syndrome Reported from University of California (Protein Delivery of an Artificial Transcription Factor Restores Widespread Ube3a Expression in an Angelman Syndrome Mouse Brain) … p.2183

Immunology - Antigen-Presenting Cells. Findings in the Area of Antigen–Presenting Cells Reported from University of Pittsburgh (Dendritic Cells Regulate Extrafollicular Autoreactive B Cells via T Cells Expressing Fas and Fas Ligand) … p.2184

Arthroplasty. Findings in the Area of Arthroplasty Reported from University of Los Andes (Primary Joint Arthroplasty Surgery: Is the Risk of Major Bleeding Higher in Elderly Patients? A Retrospective Cohort Study) … p.2185

Heart Disorders and Diseases - Atrial Fibrillation. Findings in the Area of Atrial Fibrillation Reported from Tianjin Medical University (Association between air pollution and development of atrial fibrillation: A meta–analysis of observational studies) … p.2186

Hematology - Blood Coagulation Factors. Findings in the Area of Blood Coagulation Factors Reported from Lerner Research Institute (Thrombin Cleavage of Inter–alpha–inhibitor Heavy Chain 1 Regulates Leukocyte Binding to an Inflammatory Hyaluronan Matrix) … p.2187

Drugs and Therapies - Botulinum Toxin Therapy. Findings in the Area of Botulinum Toxin Therapy Reported from Institute of Pharmacology (Participation of pro– and anti–nociceptive interleukins in botulinum toxin A–induced analgesia in a rat model of neuropathic pain) … p.2188

Oncology - Breast Cancer. Findings in the Area of Breast Cancer Reported from Capital Medical University (Long non–coding RNA UCA1 enhances tamoxifen resistance in breast cancer cells through a miR–18a–HIF1 alpha feedback regulatory loop) … p.2189

Oncology - Breast Cancer. Findings in the Area of Breast Cancer Reported from Sun Yat–Sen University (Estrogen receptor beta as a prognostic factor in breast cancer patients: A systematic review and meta–analysis) … p.2190

Oncology - Breast Cancer. Findings in the Area of Breast Cancer Reported from University of Fudan (mTOR complex–2 stimulates acetyl–CoA and de novo lipogenesis through ATP citrate lyase in HER2/PIK3CA–hyperactive breast cancer) … p.2191

Carcinogenesis. Findings in the Area of Carcinogenesis Reported from Dow Chemical [Methyl isobutyl ketone–induced hepatocellular carcinogenesis in B6C3F(1) mice: A constitutive androstane receptor (CAR)–mediated mode of action] … p.2193

Cardiology. Findings in the Area of Cardiology Reported from Children’s Hospital (Acetylation of VGLL4 Regulates Hippo–YAP Signaling and Postnatal Cardiac Growth) … p.2194

Cardiology. Findings in the Area of Cardiology Reported from Nagoya University (Predictors of surgery–induced muscle proteolysis in patients undergoing cardiac surgery) … p.2195

Cardiovascular Diseases. Findings in the Area of Cardiovascular Diseases Reported from Azienda Ospedaliera University (Hypolipidemic drugs in elderly subjects: Indications and limits) … p.2196

Transplant Medicine - Cell Transplants. Findings in the Area of Cell Transplants Reported from Institute for Cancer Research and Treatment (IRCCS) (Treosulfan based reduced toxicity conditioning followed by allogeneic stem cell transplantation in patients with myelofibrosis) … p.2197

Drugs and Therapies - Chemotherapy. Findings in the Area of Chemotherapy Reported from University of Toronto (Approach to evaluation of fever in ambulatory cancer patients receiving chemotherapy: A systematic review) … p.2198

Oncology - Chronic Lymphocytic Leukemia. Findings in the Area of Chronic Lymphocytic Leukemia Reported from University of Oslo (National trends in incidence and survival of chronic lymphocytic leukemia in Norway for 1953–2012: a systematic analysis of population–based data) … p.2199

Drugs and Therapies - Clinical Therapeutics. Findings in the Area of Clinical Therapeutics Reported from National University [The Internal Reliability of Family Crisis Oriented Personal Evaluation Scale (F–COPES) in Malay version among caregivers of individual with learning disabilities] … p.2200

Clinical Research - Clinical Trials and Studies. Findings in the Area of Clinical Trials and Studies Reported from China Medical University and Hospital (Subintimal angioplasty for lower limb arterial chronic total occlusions) … p.2201

Gram-Positive Bacteria - Clostridium thermocellum. Findings in the Area of Clostridium thermocellum Reported from National Renewable Energy Laboratory (CO2–fixing one–carbon metabolism in a cellulose–degrading bacterium Clostridium thermocellum) … p.2203

Oncology - Colon Cancer. Findings in the Area of Colon Cancer Reported from University of Melbourne [Synthesis of an inositol hexakisphosphate (IP6) affinity probe to study the interactome from a colon cancer cell line] … p.2204

Health and Medicine - Cutaneous Medicine and Surgery. Findings in the Area of Cutaneous Medicine and Surgery Reported from Research Institute (Cosmeceuticals in skin of color) … p.2204
January 14, 2017

Health and Medicine - Dermatology. Findings in the Area of Dermatology Reported from Philipps University (Research Techniques Made Simple: Mouse Models of Autoimmune Blistering Diseases) … p.2205

Drugs and Therapies - Drug Targets. Findings in the Area of Drug Targets Reported from CNIO (Antiangiogenic Resistance and Cancer Metabolism: Opportunities for Synthetic Lethality) … p.2207

Gram-Positive Bacteria - Enterococcus faecalis. Findings in the Area of Enterococcus faecalis Reported from University of Zurich (The Heterodimeric ABC Transporter EfrCD Mediates Multidrug Efflux in Enterococcus faecalis) … p.2208

Oncology - Esophageal Cancer. Findings in the Area of Esophageal Cancer Reported from Department of Thoracic Surgery (Neoadjuvant chemoradiation treatment followed by surgery for esophageal cancer: there is much more than th mandard tumor regression score) … p.2209

Oncology - Esophageal Cancer. Findings in the Area of Esophageal Cancer Reported from Hubei University of Medicine (Tooth loss is associated with increased risk of esophageal cancer: evidence from a meta–analysis with dose–response analysis) … p.2210

Drugs and Therapies - Ethnopharmacology. Findings in the Area of Ethnopharmacology Reported from Department of Microbiology (Myrtus communis L. and its application in treatment of Recurrent Aphthous Stomatitis) … p.2211

Liver Diseases and Conditions - Fatty Liver. Findings in the Area of Fatty Liver Reported from University of Pennsylvania (Nonalcoholic Fatty Liver Disease Pathophysiology and Management) … p.2212

Oncology - Head and Neck Cancer. Findings in the Area of Head and Neck Cancer Reported from Columbia University College of Physicians and Surgeons (De–escalation of radiation dose for human papillomavirus–positive oropharyngeal head and neck squamous cell carcinoma: A case …) … p.2213

Health and Medicine. Findings in the Area of Health and Medicine Reported from University of Pretoria (Sudden and unexpected childhood deaths investigated at the Pretoria Medico–Legal Laboratory, South Africa, 2007–2011) … p.2214

Hematologic Diseases and Conditions - Hemophilia. Findings in the Area of Hemophilia Reported from Virginia Commonwealth University (Coated platelets and severe haemophilia A bleeding phenotype: Is there a connection?) … p.2215

Human Herpesvirus Diseases and Conditions - Human Herpesvirus 6. Findings in the Area of Human Herpesvirus 6 Reported from Osaka Medical College (Hippocampal signal abnormality on the first day of illness in acute encephalopathy with biphasic seizures and late reduced diffusion caused by HHV–6 infection) … p.2216

Human Immunodeficiency Virus. Findings in the Area of Human Immunodeficiency Virus Reported from Florida State University (Caring for Older Adults with the Human Immunodeficiency Virus) … p.2217
Cardiovascular Diseases and Conditions - Hypotension. Findings in the Area of Hypotension Reported from General Hospital (Induction of endothelium–dependent constriction of mesenteric arteries in endotoxemic hypotensive shock) ... p.2218

Immunology - Immunoglobulins. Findings in the Area of Immunoglobulins Reported from Dana–Farber Cancer Institute (Paraprotein–Related Kidney Disease: Glomerular Diseases Associated with Paraproteinemias) ... p.2219

Immunology - Immunoglobulins. Findings in the Area of Immunoglobulins Reported from MedImmune (Critical Role of Alpha–Toxin and Protective Effects of Its Neutralization by a Human Antibody in Acute Bacterial Skin and Skin Structure Infections) ... p.2220

Lung Diseases and Conditions - Interstitial Lung Disease. Findings in the Area of Interstitial Lung Disease Reported from Kansai Medical University (Clinicopathological, Immunohistochemical, and Genetic Features of Primary Lung Adenocarcinoma Occurring in the Setting of Usual Interstitial Pneumonia ...) ... p.2221

Transplant Medicine - Kidney Transplants. Findings in the Area of Kidney Transplants Reported from University of Groningen (Urinary potassium excretion, renal ammoniagenesis, and risk of graft failure and mortality in renal transplant recipients) ... p.2222

Oncology - Liver Cancer. Findings in the Area of Liver Cancer Reported from University of Bologna (Relationship between indocyanine green retention test, decompensation and survival in patients with Child–Pugh A cirrhosis and portal hypertension) ... p.2224

Magnesium Silicates. Findings in the Area of Magnesium Silicates Reported from University of Minnesota [A Review of Mortality Associated With Elongate Mineral Particle (EMP) Exposure in Occupational Epidemiology Studies of Gold, Talc, and Taconite Mining] ... p.2225

Mosquito-Borne Diseases - Malaria. Findings in the Area of Malaria Reported from Institute for Molecular Biology (Release of Plasmodium sporozoites requires proteins with histone–fold dimerization domains) ... p.2226

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings in the Area of Obesity Reported from Karolinska University Hospital (Impaired atrial natriuretic peptide–mediated lipolysis in obesity) ... p.2227

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings in the Area of Obesity Reported from Max–Planck–Institute (Stopping at the sight of food – How gender and obesity impact on response inhibition) ... p.2228

Musculoskeletal Diseases and Conditions - Osteomyelitis. Findings in the Area of Osteomyelitis Reported from Aichi Medical University (Osteomyelitis caused by Veillonella species: Case report and review of the literature) ... p.2229

Musculoskeletal Diseases and Conditions - Osteoporosis. Findings in the Area of Osteoporosis Reported from Southern Medical University (Activation of mTORC1 in B Lymphocytes Promotes Osteoclast Formation via Regulation of beta–Catelin and RANKL/OPG) ... p.2230
Surgery - Osteotomy. Findings in the Area of Osteotomy Reported from University Hospital (Mandibular Access Osteotomy for Tumor Ablation: Could a More Tissue-Preserving Technique Affect Healing Outcome?) … p.2231

Enzymes and Coenzymes - Phosphoprotein Phosphatases. Findings in the Area of Phosphoprotein Phosphatases Reported from Institute for Clinical Chemistry (Analytical Validation and Cross-Validation of an NFAT-Regulated Gene Expression Assay for Pharmacodynamic Monitoring of Therapy With Calcineurin …) … p.2232

Liver Diseases and Conditions - Portal Hypertension. Findings in the Area of Portal Hypertension Reported from Medical University (Interferon-free regimens improve portal hypertension and histological necroinflammation in HIV/HCV patients with advanced liver disease) … p.2233

Oncology - Prostate Cancer. Findings in the Area of Prostate Cancer Reported from Technical University (Prevention of bisphosphonate-related osteonecrosis of the jaws in patients with prostate cancer treated with zoledronic acid – A prospective study over 6 years) … p.2235

Lung Diseases and Conditions - Pulmonary Fibrosis. Findings in the Area of Pulmonary Fibrosis Reported from University of Texas Medical Branch (BRD4 mediates NF-kappa B-dependent epithelial-mesenchymal transition and pulmonary fibrosis via transcriptional elongation) … p.2236

Science. Findings in the Area of Science Reported from Chinese Academy of Sciences (Elucidating the druggable interface of protein-protein interactions using fragment docking and coevolutionary analysis) … p.2237

Drugs and Therapies - Serum albumin Therapy. Findings in the Area of Serum albumin Therapy Reported from First Affiliated Hospital (Numb Protects Human Renal Tubular Epithelial Cells From Bovine Serum Albumin-Induced Apoptosis Through Antagonizing CHOP/PERK Pathway) … p.2238

Sexually Transmitted Diseases and Conditions (STDs). Findings in the Area of Sexually Transmitted Diseases and Conditions (STDs) Reported from University College [Forming new sex partnerships while overseas: findings from the third British National Survey of Sexual Attitudes & Lifestyles …] … p.2239

Oncology - Squamous Cell Carcinoma. Findings in the Area of Squamous Cell Carcinoma Reported from University of Athens School of Medicine (Novel therapies for advanced squamous cell carcinoma of the lung) … p.2240

Steatosis. Findings in the Area of Steatosis Reported from Capital Medical University (Akebia Saponin D Decreases Hepatic Steatosis through Autophagy Modulation) … p.2241

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Findings in the Area of Subarachnoid Hemorrhage Reported from Wenzhou Medical University (Aneurysm rebleeding after poor-grade aneurysmal subarachnoid hemorrhage: Predictors and impact on clinical outcomes) … p.2242

Proteins - Transcription Factor. Findings in the Area of Transcription Factor Reported from Mayo Clinic (Computational discovery of transcription factors associated with drug response) … p.2243
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.
Findings in the Area of Type 2 Diabetes Reported from Juntendo University School of Medicine (Gut microbiota in health and disease: an overview focused on metabolic inflammation) ... p.2244

Cardiovascular Diseases and Conditions - Vasculitis. Findings in the Area of Vasculitis Reported from University of Kiel (Myeloperoxidase–Antineutrophil Cytoplasmic Antibody (ANCA)–Positive Granulomatosis With Polyangiitis (Wegener’s) Is a Clinically Distinct Subset of ANCA–Associated Vasculitis A ...) ... p.2245

Cardiovascular Diseases and Conditions - Venous Thrombosis. Findings in the Area of Venous Thrombosis Reported from University of Cairo (Endothelial cell protein C receptor gene 6936A/G and 4678G/C polymorphisms as risk factors for deep venous thrombosis) ... p.2246

Abdominal Aortic Aneurysm. Findings on Abdominal Aortic Aneurysm Detailed by Investigators at University of Michigan (The use of pre–existing CT imaging in screening for abdominal aortic aneurysms) ... p.2247

Gram-Negative Bacteria - Acinetobacter baumannii. Findings on Acinetobacter baumannii Discussed by Investigators at University of Tehran (Carbapenem–resistant Acinetobacter baumannii Recovered from Burn Patients) ... p.2248

Lung Diseases and Conditions - Acute Lung Injury. Findings on Acute Lung Injury Reported by Investigators at Tianjin Medical University (Heme Oxygenase–1/Carbon Monoxide–regulated Mitochondrial Dynamic Equilibrium Contributes to the Attenuation of Endotoxin–induced Acute Lung Injury in Rats ...) ... p.2250

Oncology - Acute Myeloid Leukemia. Findings on Acute Myeloid Leukemia Detailed by Investigators at Broad Institute of MIT and Harvard (Development of ML390: A Human DHODH Inhibitor That Induces Differentiation in Acute Myeloid Leukemia) ... p.2251

Oncology - Acute Myeloid Leukemia. Findings on Acute Myeloid Leukemia Reported by Investigators at University of California (RNA Splicing Modulation Selectively Impairs Leukemia Stem Cell Maintenance in Secondary Human AML) ... p.2252

Oncology - Acute Myeloid Leukemia. Findings on Acute Myeloid Leukemia Reported by Investigators at University of Florida (Serum Uric Acid Exhibits Inverse Relationship with Estimated Glomerular Filtration Rate) ... p.2253

Enzymes and Coenzymes - Acyl-CoA Dehydrogenases. Findings on Acyl-CoA Dehydrogenases Detailed by Investigators at University of Pennsylvania (Morbidity and mortality among exclusively breastfed neonates with medium–chain acyl–CoA dehydrogenase deficiency) ... p.2254

Drugs and Therapies - Adrenal Cortical Steroids. Findings on Adrenal Cortical Steroids Detailed by Investigators at Free University (Core–multishell nanocarriers: Transport and release of dexamethasone probed by soft X–ray spectromicroscopy) ... p.2255
Drugs and Therapies - Adverse Drug Reactions. Findings on Adverse Drug Reactions Reported by Investigators at University of California (Root Cause Analysis of Ambulatory Adverse Drug Events That Present to the Emergency Department) … p.2256

Immune System Diseases and Conditions - Allergies. Findings on Allergies Reported by Researchers at University of Salzburg (Prophylactic mRNA Vaccination against Allergy Confers Long–Term Memory Responses and Persistent Protection in Mice) … p.2257

Health and Medicine - Allergy and Rhinology. Findings on Allergy and Rhinology Reported by Researchers at University of Adelaide (The bacterial microbiome in chronic rhinosinusitis: Richness, diversity, postoperative changes, and patient outcomes) … p.2258

Enzymes and Coenzymes - Amidohydrolases. Findings on Amidohydrolases Reported by Investigators at University of Bristol (Structural and Biochemical Characterization of Rm3, a Subclass B3 Metallo–beta–Lactamase Identified from a Functional Metagenomic Study) … p.2259

Nutritional and Metabolic Diseases and Conditions - Amyloidosis. Findings on Amyloidosis Reported by Investigators at Chinese Academy of Medical Sciences (Clinical correlates and prognostic values of pseudoinfarction in cardiac light–chain amyloidosis) … p.2260

Immune System Diseases and Conditions - Anaphylaxis. Findings on Anaphylaxis Reported by Investigators at Vanderbilt University (Intraoperative medications associated with hemodynamically significant anaphylaxis) … p.2261

Hematologic Diseases and Conditions - Anemia. Findings on Anemia Reported by Investigators at Division of Cardiovascular (Possible Inhibitory Effect of Erythropoiesis–Stimulating Agents at the Predialysis Stage on Early–Phase Coronary Events after Hemodialysis Initiation) … p.2262

Cardiovascular Diseases and Conditions - Aneurysm. Findings on Aneurysm Described by M. Razavian and Colleagues (Optical imaging of MMP–12 active form in inflammation and aneurysm) … p.2264

Ankylosing Spondylitis. Findings on Ankylosing Spondylitis Reported by Investigators at University of Oxford (An ankylosing spondylitis–associated genetic variant in the IL23R–IL12RB2 intergenic region modulates enhancer activity and is associated with increased …) … p.2264

Anterior Cruciate Ligament. Findings on Anterior Cruciate Ligament Reported by Investigators at Department of Orthopedic Surgery (Predictors of Revision Surgery After Anterior Cruciate Ligament Reconstruction) … p.2266

Drugs and Therapies - Antibiotics. Findings on Antibiotics Discussed by Investigators at University of Kebangsaan (Doxorubicin and siRNA Codelivery via Chitosan–Coated pH–Responsive Mixed Micellar Polyplexes for Enhanced Cancer Therapy in Multidrug–Resistant Tumors) … p.2267

Drugs and Therapies - Antibiotics. Findings on Antibiotics Reported by Investigators at Hunan University [Voltammetric determination of levofloxacin using a glassy carbon electrode modified with poly (o–aminophenol) and graphene quantum dots] … p.2268
January 14, 2017

Drugs and Therapies - Antiinfectives. Findings on Antiinfectives Described by Researchers at University of Leipzig (Effects of minocycline on parameters of cardiovascular recovery after cardioplegic arrest in a rabbit Langendorff heart model) … p.2270

Drugs and Therapies - Antiinflammatory Agents. Findings on Antiinflammatory Agents Detailed by Investigators at University of Bourgogne (Inflammasomes and Natural Ingredients towards New Anti–Inflammatory Agents) … p.2271

Drugs and Therapies - Antimicrobials. Findings on Antimicrobials Discussed by Investigators at BioMerieux Inc. (Antimicrobial binding and growth kinetics in Bact/ALERTA (R) FA Plus and BACTECA (R) Aerobic/F Plus blood culture media) … p.2272

Drugs and Therapies - Antimicrobials. Findings on Antimicrobials Reported by Investigators at Indian Institute of Technology (Development and Scale–up of an Efficient and Green Process for HPLC Purification of Antimicrobial Homologues of Commercially Important Microbial Lipopeptides) … p.2272

Drugs and Therapies - Antineoplastics. Findings on Antineoplastics Reported by Investigators at Imam Khomeini International University (Kinetic and thermodynamic studies of methotrexate adsorption on chitosan–modified magnetic multi–walled carbon nanotubes) … p.2273

Antioxidants. Findings on Antioxidants Detailed by Investigators at Tarbiat Modares University (Antioxidant effects of alfalfa can improve iron oxide nanoparticle damage: Invivo and invitro studies) … p.2274

Drugs and Therapies - Antipsychotics. Findings on Antipsychotics Reported by Researchers at University of Calgary (Amygdala responses to quetiapine XR and citalopram treatment in major depression: the role of 5–HTTLPR–S/Lg polymorphisms) … p.2275

Drugs and Therapies - Antiretrovirals. Findings on Antiretrovirals Reported by Investigators at Vall d’Hebron Research Institute (Impact of low–level viraemia on virological failure in HIV–1–infected patients with stable antiretroviral treatment) … p.2276

Drugs and Therapies - Antiseptic and Germicides. Findings on Antiseptic and Germicides Discussed by Investigators at University of Medicine and Dentistry of New Jersey (UMDNJ) (Chlorhexidine versus Tincture of Iodine for Reduction of Blood Culture Contamination Rates: a Prospective Randomized …) … p.2277

Aortic Aneurysms. Findings on Aortic Aneurysms Detailed by Investigators at University of Cologne (Single Centre Results of Total Endovascular Repair of Complex Aortic Aneurysms with Custom Made Anaconda Fenestrated Stent Grafts) … p.2278

Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Findings on Arteriovenous Fistula Reported by Investigators at Johns Hopkins University (Neuromyelitis optica unmasked by a spinal dural arteriovenous fistula) … p.2280
Musculoskeletal Diseases and Conditions - Arthritis. Findings on Arthritis Discussed by Investigators at CSL Ltd. (Therapeutic Targeting of the G–CSF Receptor Reduces Neutrophil Trafficking and Joint Inflammation in Antibody–Mediated Inflammatory Arthritis) … p.2281

Cardiovascular Diseases and Conditions - Atherosclerosis. Findings on Atherosclerosis Described by Researchers at Department of Neurology (Higher Levels of Cystatin C Are Associated with Extracranial Carotid Artery Steno–Occlusive Disease in Patients with Noncardioembolic Ischemic Stroke) … p.2282

Cardiovascular Diseases and Conditions - Atherosclerosis. Findings on Atherosclerosis Detailed by Investigators at Singapore National University (NKT Cell Hyporesponsiveness Leads to Unrestrained Accumulation of Marginal Zone B Cells in Hypercholesterolemic Apolipoprotein E–Deficient Mice) … p.2283

Cardiovascular Diseases and Conditions - Atherosclerosis. Findings on Atherosclerosis Discussed by Investigators at Erasmus University Medical Center [Plasma cystatin C and neutrophil gelatinase–associated lipocalin in relation to coronary atherosclerosis on intravascular ultrasound and cardiovascular …] … p.2284

Heart Disorders and Diseases - Atrial Fibrillation. Findings on Atrial Fibrillation Discussed by Investigators at University of Pennsylvania Hospital (Recurrent atrial arrhythmias in the setting of chronic pulmonary vein isolation) … p.2287

Oncology - B-Cell Lymphoma. Findings on B–Cell Lymphoma Described by M. Saito and Colleagues (Regression of gastric de novo diffuse large B–cell lymphoma following Helicobacter pylori eradication: a case report) … p.2290

Bacterial Infections and Mycoses - Bacteremia. Findings on Bacteremia Detailed by G. Sakoulas and Co–Authors (Cefazolin and Ertapenem, a Synergistic Combination Used To Clear Persistent Staphylococcus aureus Bacteremia) … p.2290

Bacterial Infections and Mycoses - Bacteremia. Findings on Bacteremia Detailed by Investigators at Mayo Clinic (Management of bacteremia in patients living with cardiovascular implantable electronic devices) … p.2292

Bacterial Infections and Mycoses - Bacteremia. Findings on Bacteremia Discussed by Investigators at Sungkyunkwan University (Clinical Features and Risk Factors for Development of Breakthrough Gram–Negative Bacteremia during Carbapenem Therapy) … p.2293
Biological Factors - Biological Pigments.  
Findings on Biological Pigments  
Detailed by Investigators at University of Montpellier (Martinique Crinkled Retinal Pigment Epitheliopathy Clinical Stages and Pathophysiologic Insights)  
... p.2294

Transplant Medicine - Bone Marrow Harvesting.  
Findings on Bone Marrow Harvesting Discussed by Investigators at Medical University (Multiple small versus few large amount aspirations for bone marrow harvesting in autologous and allogeneic bone marrow transplantation)  
... p.2295

Bone Research.  
Findings on Bone Research  
Detailed by Investigators at Iran University of Medical Sciences (A Dermal Equivalent Engineered with TGF–beta 3 Expressing Bone Marrow Stromal Cells and Amniotic Membrane: Cosmetic Healing of Full–Thickness Skin ...)  
... p.2296

Musculoskeletal Diseases and Conditions - Bone Resorption.  
Findings on Bone Resorption Discussed by Investigators at Tianjin Medical University (Aggravation of spinal cord compromise following new osteoporotic vertebral compression fracture prevented by teriparatide in patients with surgical ...)  
... p.2297

Musculoskeletal Diseases and Conditions - Bone Resorption.  
Findings on Bone Resorption Discussed by Investigators at Veterans Affairs Medical Center (Protection From Glucocorticoid–Induced Osteoporosis by Anti–Catabolic Signaling in the Absence of Sost/Sclerostin)  
... p.2298

Drugs and Therapies - Botulinum Toxin Therapy.  
Findings on Botulinum Toxin Therapy Discussed by R.L. Rosales and Co–Researchers (Botulinum toxin as early intervention for spasticity after stroke or non–progressive brain lesion: A meta–analysis)  
... p.2299

Oncology - Breast Cancer.  
... p.2300

Oncology - Breast Cancer.  
Findings on Breast Cancer Discussed by Investigators at Chulalongkorn University (Plumbagin Enhances Tamoxifen Sensitivity and Inhibits Tumor Invasion in Endocrine Resistant Breast Cancer through EMT Regulation)  
... p.2301

Oncology - Breast Cancer.  
Findings on Breast Cancer Reported by Investigators at Singapore National University (miR–93 inhibits the invasive potential of triple–negative breast cancer cells in vitro via protein kinase WNK1)  
... p.2302

Diagnostics and Screening - Breast Cancer Screening.  
Findings on Breast Cancer Screening Discussed by Investigators at International Hospital (Contrast enhanced dual energy spectral mammogram, an emerging addendum in breast imaging)  
... p.2303

Gram-Negative Bacteria - Burkholderia pseudomallei.  
Findings on Burkholderia pseudomallei Detailed by Researchers at Federal University (Farnesol increases the susceptibility of Burkholderia pseudomallei biofilm to antimicrobials used to treat melioidosis)  
... p.2304

Gram-Negative Bacteria - Burkholderia pseudomallei.  
Findings on Burkholderia pseudomallei Reported by Researchers at Case Western Reserve University (Exposing a b–Lactamase "Twist"the Mechanistic Basis for the High Level of Ceftazidime Resistance in the C69F Variant of the Burkholderia ...)  
... p.2305
Onology - Cancer Epidemiology. Findings on Cancer Epidemiology Reported by Investigators at University of Health Sciences [Cancer patterns in Karachi (all districts), Pakistan: First results (2010–2015) from a Pathology based cancer registry of the largest government–run ...] ... p.2307

Drugs and Therapies - Cancer Therapy. Findings on Cancer Therapy Detailed by Investigators at Dalian Medical University (Anti–tumor effects of osthole on ovarian cancer cells in vitro) ... p.2308

Drugs and Therapies - Cancer Therapy. Findings on Cancer Therapy Reported by Researchers at National Cancer Center Research Institute (Telomerase reverse transcriptase moonlights: Therapeutic targets beyond telomerase) ... p.2309

Drugs and Therapies - Carbamazepine Therapy. Findings on Carbamazepine Therapy Reported by Researchers at University of Michigan (Influence of Coformer Stoichiometric Ratio on Pharmaceutical Cocrystal Dissolution: Three Cocrystals of Carbamazepine/4–Aminobenzoic Acid) ... p.2310

Onology - Carcinomas. Findings on Carcinomas Described by Researchers at Postgraduate Institute of Medical Education and Research (Dosimetric evaluation and clinical outcome in post–operative patients of carcinoma vulva treated with intensity–modulated radiotherapy) ... p.2311

Onology - Carcinomas. Findings on Carcinomas Reported by Investigators at University of Michigan (Trends in hospice discharge, documented inpatient palliative care services and inpatient mortality in ovarian carcinoma) ... p.2312

www.NewsRx.com

Onology - Carcinomas. Findings on Carcinomas Reported by Researchers at Ain Shams University (Continuous Low–Dose Oral Cyclophosphamide and Methotrexate as Maintenance Therapy in Patients With Advanced Ovarian Carcinoma After Complete Clinical Response to Platinum ...) ... p.2313

Cardiology. Findings on Cardiology Described by Researchers at Institute of Genetics (Bioinspired negatively charged calcium phosphate nanocarriers for cardiac delivery of MicroRNAs) ... p.2314

Cardiology. Findings on Cardiology Detailed by Investigators at University of Leeds (Acute Reverse Remodelling After Transcatheter Aortic Valve Implantation: A Link Between Myocardial Fibrosis and Left Ventricular Mass Regression) ... p.2315

Drugs and Therapies - Cardiovascular Agents. Findings on Cardiovascular Agents Detailed by Investigators at Copenhagen University Hospital (Effect of clonidine to prevent agitation in children after sevoflurane anaesthesia: a randomised placebo controlled multicentre trial) ... p.2316

Medical Imaging - Cardiovascular Imaging. Findings on Cardiovascular Imaging Described by H.U. Aksu and Colleagues (Isolated cleft of both the anterior and posterior mitral valve leaflets) ... p.2317

Cardiovascular Research. Findings on Cardiovascular Research Reported by Investigators at School of Medicine (Effect of diastolic dysfunction on postoperative outcomes after cardiovascular surgery: A systematic review and meta–analysis) ... p.2317

Membrane Proteins - Catecholamine Receptors. Findings on Catecholamine Receptors Discussed by Investigators at University of North Carolina (Discovery of G Protein–Biased D2 Dopamine Receptor Partial Agonists) ... p.2319
January 14, 2017

Drugs and Therapies - Central Nervous System Agents. Findings on Central Nervous System Agents Discussed by Investigators at Kerman University of Medical Sciences (Induction of antinociceptive tolerance to the chronic intrathecal administration of apelin–13 in rat) ... p.2320

Drugs and Therapies - Central Nervous System Agents. Findings on Central Nervous System Agents Discussed by Investigators at University of Toronto (Enhanced Thalamic Spillover Inhibition during Non–rapid–eye–movement Sleep Triggers an Electrocortical Signature of Anesthetic Hypnosis) ... p.2321

Drugs and Therapies - Central Nervous System Agents. Findings on Central Nervous System Agents Reported by Researchers at University of Texas Health Science Center (Delay discounting of the m–opioid receptor agonist remifentanil in rhesus monkeys) ... p.2322

Central Nervous System Diseases and Conditions - Cerebral Palsy. Findings on Cerebral Palsy Detailed by Investigators at University of Gothenburg (Association of COL4A1 gene polymorphisms with cerebral palsy in a Chinese Han population) ... p.2323

Oncology - Cervical Cancer. Findings on Cervical Cancer Reported by Investigators at Academic Medical Center (Vaginal high–risk human papillomavirus infection in a cross–sectional study among women of six different ethnicities in Amsterdam, the Netherlands: the HELIUS ...) ... p.2324

Drugs and Therapies - Chemical Biology and Drug Design. Findings on Chemical Biology and Drug Design Reported by Researchers at Ministry of Education (Novel Peptides from Skins of Amphibians Showed Broad–Spectrum Antimicrobial Activities) ... p.2325

Chemistry. Findings on Chemistry Discussed by Investigators at University of Santiago (Ruthenation of Non–stacked Guanines in DNA G–Quadruplex Structures: Enhancement of c–MYC Expression) ... p.2326

Oncology - Chronic Lymphocytic Leukemia. Findings on Chronic Lymphocytic Leukemia Detailed by Researchers at University of Kansas (Targeting HSF1 disrupts HSP90 chaperone function in chronic lymphocytic leukemia) ... p.2327

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Findings on Chronic Obstructive Pulmonary Disease Reported by Researchers at Leiden University Medical Center (Prediction of Long–Term Benefits of Inhaled Steroids by Phenotypic Markers in Moderate–to–Severe COPD: A Randomized Controlled Trial) ... p.2328

Musculoskeletal Diseases and Conditions - Chronic Pain. Findings on Chronic Pain Described by Researchers at Department of Anesthesiology (Prevalence and determinants of medication non–adherence in chronic pain patients: a systematic review) ... p.2329

Health and Medicine - Clinical Epidemiology. Findings on Clinical Epidemiology Reported by Investigators at Public Hospital System (Peer reviewers identified spin in manuscripts of nonrandomized studies assessing therapeutic interventions, but their impact on spin in abstract conclusions ...) ... p.2330

Health and Medicine - Clinical Nephrology. Findings on Clinical Nephrology Described by A. Bellasi and Colleagues (Cinacalcet but not vitamin D use modulates the survival benefit associated with sevelamer in the INDEPENDENT study) ... p.2331
Drugs and Therapies - Clinical Pharmacology and Therapeutics.
Findings on Clinical Pharmacology and Therapeutics Reported by Investigators at Massachusetts Institute of Technology (Leveraging Industry–Academia Collaborations in Adaptive Biomedical Innovation) … p.2332

Clinical Research - Clinical Trials and Studies. Findings on Clinical Trials and Studies Reported by Investigators at Copenhagen University Hospital [Thromboelastography (TEG) or thromboelastometry (ROTEM) to monitor haemostatic treatment versus usual care in adults or children with bleeding] … p.2333

Clinical Research - Clinical Trials and Studies. Findings on Clinical Trials and Studies Reported by Investigators at Maastricht University (Randomized clinical trial on the efficacy of hesperidin 2S on validated cardiovascular biomarkers in healthy overweight individuals) … p.2335

Clinical Research - Clinical Trials and Studies. Findings on Clinical Trials and Studies Reported by Investigators at Zhejiang University (Dexmedetomidine Versus Propofol Sedation Improves Sublingual Microcirculation After Cardiac Surgery: A Randomized Controlled Trial) … p.2336

Clinical Research - Clinical Trials and Studies. Findings on Clinical Trials and Studies Reported by Researchers at Fukuoka University [Intracellular mechanisms underlying lipid accumulation (white opaque substance) in gastric epithelial neoplasms: A pilot study of expression profiles of …] … p.2338

Drugs and Therapies - Coagulation Modifiers. Findings on Coagulation Modifiers Reported by Investigators at CSIR (Site–Specific Thiol–mediated PEGylation of Streptokinase Leads to Improved Properties with Clinical Potential) … p.2339

Oncology - Colon Cancer. Findings on Colon Cancer Detailed by Researchers at Peking Union Medical College (Developmental genes significantly afflicted by aberrant promoter methylation and somatic mutation predict overall survival of late–stage colorectal cancer) … p.2340

Oncology - Colon Cancer. Findings on Colon Cancer Discussed by Investigators at McGill University (Four–week prehabilitation program is sufficient to modify exercise behaviors and improve preoperative functional walking capacity in patients with colorectal cancer) … p.2341

Oncology - Colon Cancer. Findings on Colon Cancer Discussed by Investigators at Tongji University (A nomogram improves AJCC stages for colorectal cancers by introducing CEA, modified lymph node ratio and negative lymph node count) … p.2342

Oncology - Colon Cancer. Findings on Colon Cancer Discussed by Investigators at Liaoning University (Oncogenic Activin C Interacts With Decorin in Colorectal Cancer In Vivo and In Vitro) … p.2343

Oncology - Colon Cancer. Findings on Colon Cancer Reported by Investigators at National Institute for Public Health and the Environment (The Dutch public are positive about the colorectal cancer–screening programme, but is this a well–informed opinion?) … p.2344
January 14, 2017

Oncology - Colon Cancer.  Findings on Colon Cancer Reported by Investigators at School of Medicine (Functional exploration of colorectal cancer genomes using Drosophila)  ... p.2345

Congenital Diseases and Conditions - Congenital Myopathy.  Findings on Congenital Myopathy Detailed by Investigators at National Institute of Neuroscience (Calcium Dyshomeostasis in Tubular Aggregate Myopathy)  ... p.2346

Drugs and Therapies - Coumarins and Indandiones.  Findings on Coumarins and Indandiones Discussed by Investigators at Central South University (The effects of Chuanxiong on the pharmacokinetics of warfarin in rats after biliary drainage)  ... p.2347

Lung Diseases and Conditions - Cystic Fibrosis.  Findings on Cystic Fibrosis Reported by Investigators at University of Tehran (Antimicrobial susceptibility of microorganisms isolated from sputum culture of patients with cystic fibrosis: Methicillin-resistant Staphylococcus aureus as a ...)  ... p.2348

Proteins - DNA-Binding Proteins.  Findings on DNA-Binding Proteins Reported by Investigators at Jinzhou Medical University (Tenuigenin exhibits protective effects against LPS-induced acute kidney injury via inhibiting TLR4/NF-κappa B signaling pathway)  ... p.2349

Mosquito-Borne Diseases - Dengue Hemorrhagic Fever.  Findings on Dengue Hemorrhagic Fever Detailed by Investigators at La Jolla Institute for Allergy and Immunology [HLA-DRB1 Alleles Are Associated With Different Magnitudes of Dengue Virus-Specific CD4(+) T-Cell Responses]  ... p.2350

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Diabetic Nephropathy.  Findings on Diabetic Nephropathy Reported by Investigators at University of Utah (An additive effect of anti–PAI–1 antibody to ACE inhibitor on slowing the progression of diabetic kidney disease)  ... p.2351

Diet and Nutrition.  Findings on Diet and Nutrition Detailed by Investigators at Queensland University of Technology (Exploring power and influence in nutrition policy in Australia)  ... p.2352

Disability Research.  Findings on Disability Research Discussed by Investigators at Oregon Health and Science University (Parent Beliefs About the Causes of Learning and Developmental Problems Among Children With Autism Spectrum Disorder: Results From a National ...)  ... p.2353

Disease Attributes - Disease Progression.  Findings on Disease Progression Reported by Researchers at University Medical Center (Recommendations for the use of tolvaptan in autosomal dominant polycystic kidney disease: a position statement on behalf of the ERA-EDTA Working Groups on ...)  ... p.2354

Drugs and Therapies - Drug Delivery Systems.  Findings on Drug Delivery Systems Reported by Investigators at Tongji University (A superparamagnetic polymersome with extremely high T-2 relaxivity for MRI and cancer–targeted drug delivery)  ... p.2355

Drug Development.  Findings on Drug Development Reported by Investigators at Monash University (The ways and means of fragment–based drug design)  ... p.2356

Ebola Virus.  Findings on Ebola Virus Discussed by Investigators at University of Pennsylvania (Pathogenicity Comparison Between the Kikwit and Makona Ebola Virus Variants in Rhesus Macaques)  ... p.2357
January 14, 2017

Oncology - Endometrial Cancer. Findings on Endometrial Cancer Detailed by Investigators at Royal Marsden NHS Foundation Trust (Assessment of sexual difficulties associated with multi-modal treatment for cervical or endometrial cancer: A systematic review of measurement ...) … p.2358

Environmental Health - Environmental Research and Public Health. Findings on Environmental Research and Public Health Reported by Investigators at Nanjing Medical University (Polymorphism of the XRCC1 Gene Is Associated with Susceptibility and Short-Term Recovery of Ischemic Stroke) … p.2359

Central Nervous System Diseases and Conditions - Epilepsy. Findings on Epilepsy Discussed by Investigators at Dartmouth-Hitchcock Medical Center (The implantation effect: delay in seizure occurrence with implantation of intracranial electrodes) … p.2360

Central Nervous System Diseases and Conditions - Epilepsy. Findings on Epilepsy Reported by Investigators at Department of Neurology (Is intravenous lorazepam really more effective and safe than intravenous diazepam as first-line treatment for convulsive status epilepticus? A systematic review with ...) … p.2361

Gram-Negative Bacteria - Escherichia coli. Findings on Escherichia coli Detailed by Investigators at University of Toronto (Mechanism of Selective Nickel Transfer from HypB to HypA, Escherichia coli [NiFe]-Hydrogenase Accessory Proteins) … p.2362

Gram-Negative Bacteria - Escherichia coli. Findings on Escherichia coli Reported by Investigators at Duke University (In Vivo and in Vitro Synthesis of Phosphatidylglycerol by an Escherichia coli Cardiolipin Synthase) … p.2363

www.NewsRx.com

Oncology - Esophageal Cancer. Findings on Esophageal Cancer Detailed by Researchers at University Medical Center (Current understanding of the functional roles of aberrantly expressed microRNAs in esophageal cancer) … p.2364

Oncology - Esophageal Cancer. Findings on Esophageal Cancer Discussed by Investigators at Fudan University (Landscape of expression profiles in esophageal carcinoma by The Cancer Genome Atlas data) … p.2365

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Findings on Fabry Disease Reported by Investigators at School of Medicine (Later Onset Fabry Disease, Cardiac Damage Progress in Silence Experience With a Highly Prevalent Mutation) … p.2366

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Findings on Fabry Disease Reported by Investigators at Tohoku University (Focal Reduction in Cardiac I-123-Metaiodobenzylguanidine Uptake in Patients With Anderson–Fabry Disease) … p.2367

Neurodegenerative Diseases and Conditions - Frontotemporal Dementia. Findings on Frontotemporal Dementia Detailed by Investigators at Free University (Cerebral blood flow in presymptomatic MAPT and GRN mutation carriers: A longitudinal arterial spin labeling study) … p.2368

Neurodegenerative Diseases and Conditions - Frontotemporal Dementia. Findings on Frontotemporal Dementia Reported by Investigators at University of Sao Paulo (GRN and MAPT Mutations in 2 Frontotemporal Dementia Research Centers in Brazil) … p.2369
Oncology - Gastric Cancer. Findings on Gastric Cancer Discussed by Investigators at Xiamen University (Trefoil factor family 2 expression inhibits gastric cancer cell growth and invasion in vitro via interactions with the transcription factor Sp3) … p.2370

Oncology - Gastric Cancer. Findings on Gastric Cancer Discussed by Investigators at Yeungnam University (Association between Helicobacter pylori status and metachronous gastric cancer after endoscopic resection) … p.2371

Oncology - Gastric Cancer. Findings on Gastric Cancer Reported by Investigators at Nanjing University (Expression profile of E–cadherin, estrogen receptors, and P53 in early–onset gastric cancers) … p.2372

Oncology - Gastric Cancer. Findings on Gastric Cancer Reported by Investigators at Research Institute (Effects for Sequential Treatment of siAkt and Paclitaxel on Gastric Cancer Cell Lines) … p.2373

Digestive System Diseases and Conditions - Gastric Ulcers. Findings on Gastric Ulcers Reported by Researchers at Jagiellonian University The renin–angiotensin system and its vasoactive metabolite angiotensin–(1–7) in the mechanism of the healing of preexisting gastric ulcers. The …] … p.2374

Genetics. Findings on Genetics Discussed by Investigators at School of Public Health Human epidermal growth factor receptor 4 (Her4) Suppresses p53 Protein via Targeting the MDMX–MDM2 Protein Complex IMPLICATION OF A NOVEL MDMX SER–314 PHOSPHOSITE] … p.2375

Life Science Research - Genetics. Findings on Genetics Discussed by Investigators at University of Pittsburgh The Fitness Effects of Spontaneous Mutations Nearly Unseen by Selection in a Bacterium with Multiple Chromosomes) … p.2376

Oncology - Germ Cell Cancer. Findings on Germ Cell Cancer Reported by Researchers at Institute for Cancer Research and Treatment (IRCCS) (Prognostic impact of progression to induction chemotherapy and prior paclitaxel therapy in patients with germ cell tumors receiving ...) … p.2377

Oncology - Glioblastomas. Findings on Glioblastomas Discussed by B. Kim and Co–Researchers (Apigenin Inhibits Cancer Stem Cell–Like Phenotypes in Human Glioblastoma Cells via Suppression of c–Met Signaling) … p.2378

Gynecology. Findings on Gynecology Reported by Investigators at Democritus University MiRNAs: regulators of human disease) … p.2379

Immune System Diseases and Conditions - HIV/AIDS. Findings on HIV/AIDS Reported by Investigators at Center for Disease Control and Prevention (Prevalence and Correlates of Heterosexual Anal Intercourse Among Men and Women, 20 US Cities) … p.2380

Oncology - Head and Neck Cancer.
Findings on Head and Neck Cancer Reported by Investigators at University of Amsterdam (A critical evaluation of lymph node ratio in head and neck cancer) ... p.2382

Health and Medicine. Findings on Health and Medicine Reported by Investigators at King Abdul–Aziz University Hospital (Costly coagulation profile tests prior to performing breast biopsies Do we really need it?) ... p.2383

Health and Medicine - Health and Society. Findings on Health and Society Detailed by Investigators at Michigan State University (Three modes of power operation: Understanding doctor–patient conflicts in China’s hospital therapeutic landscapes) ... p.2385

Heart Disorders and Diseases - Heart Disease. Findings on Heart Disease Detailed by Investigators at Landspitali University Hospital (Adult height associates with angiographic extent of coronary artery disease) ... p.2386

Heart Disorders and Diseases - Heart Disease. Findings on Heart Disease Reported by Researchers at Department of Cardiology (Unrecognized Myocardial Infarction Assessed by Cardiac Magnetic Resonance Imaging—Prognostic Implications) ... p.2387

Heart Disorders and Diseases - Heart Failure. Findings on Heart Failure Discussed by J. Tomono and Co–Researchers (Usefulness of anaerobic threshold to peak oxygen uptake ratio to determine the severity and pathophysiological condition of chronic heart failure) ... p.2388

Transplant Medicine - Heart Transplants. Findings on Heart Transplants Reported by Investigators at University of Louisville (Differences in Status 1A Heart Transplantation Survival in the Continuous Flow Left Ventricular Assist Device Era) ... p.2389

Liver Diseases and Conditions - Hepatitis B Virus. Findings on Hepatitis B Virus Reported by Investigators at University of Naples (Occult HBV infection in the oncohematological setting) ... p.2390

Liver Diseases and Conditions - Hepatitis C Virus. Findings on Hepatitis C Virus Discussed by Investigators at China Medical University and Hospital (RELATIONSHIP BETWEEN UVEITIS, DIFFERENT TYPES OF VIRAL HEPATITIS, AND LIVER CIRRHOSIS A 12–Year Nationwide Population–Based Cohort Study) ... p.2391

Intercellular Signaling Peptides and Proteins - Hepatocyte Growth Factor. Findings on Hepatocyte Growth Factor Discussed by Investigators at Imperial College (Identifying ultrasensitive HGF dose–response functions in a 3D mammalian system for synthetic morphogenesis) ... p.2392

Oncology - Hereditary Cancer Syndrome. Findings on Hereditary Cancer Syndrome Detailed by Investigators at Genomic Medicine Institute (Strategies for clinical implementation of screening for hereditary cancer syndromes) ... p.2393

Drugs and Therapies - Hormone Replacement Therapy. Findings on Hormone Replacement Therapy Reported by Investigators at School of Psychology (Estradiol Is Associated With Altered Cognitive and Physiological Responses During Fear Conditioning and Extinction in Healthy and Spider Phobic Women) ... p.2394
January 14, 2017

Genetics - Human Genetics. Findings on Human Genetics Detailed by Investigators at Hanken School of Economics (Twinning Rates in Isolates) … p.2395

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. Findings on Hypercholesterolemia from R. Mehta and Colleagues Provide New Insights (The panorama of familial hypercholesterolemia in Latin America: a systematic review) … p.2396

Cardiovascular Diseases and Conditions - Hypertension. Findings on Hypertension Detailed by Investigators at George Mason University (Improving Prognostic Web Calculators: Violation of Preferential Risk Independence) … p.2397

Cardiovascular Diseases and Conditions - Hypertension. Findings on Hypertension Discussed by Investigators at Catholic University of Leuven (BMPRII influences the response of pulmonary microvascular endothelial cells to inflammatory mediators) … p.2398

Cardiovascular Diseases and Conditions - Hypertension. Findings on Hypertension Reported by Investigators at Johns Hopkins University (Microbial short chain fatty acid metabolites lower blood pressure via endothelial G protein–coupled receptor 41) … p.2399

Cardiovascular Diseases and Conditions - Hypertension. Findings on Hypertension Reported by Investigators at University of Catania (Blood Pressure Control in Smokers with Arterial Hypertension Who Switched to Electronic Cigarettes) … p.2400

Drugs and Therapies - Ibuprofen Therapy. Findings on Ibuprofen Therapy Discussed by Investigators at Silesian Technical University (Influence of Inorganic Ions and Organic Substances on the Degradation of Pharmaceutical Compound in Water Matrix) … p.2401

www.NewsRx.com

Proteins - Immediate-Early Proteins. Findings on Immediate–Early Proteins Detailed by Investigators at State Oceanic Administration (Shrimp STAT was hijacked by white spot syndrome virus immediate–early protein IE1 involved in modulation of viral genes) … p.2402

Immunology - Immunoglobulins. Findings on Immunoglobulins Discussed by Investigators at Genentech, Inc. (Peripheral neuropathy with microtubule inhibitor containing antibody drug conjugates: Challenges and perspectives in translatability from nonclinical toxicology studies ...) … p.2403

Membrane Proteins - Immunologic Receptors. Findings on Immunologic Receptors Detailed by Investigators at China Pharmaceutical University (Structural and functional aspects of decorsin and its analog as recognized by integrin alpha IIb beta 3) … p.2404

Inflammation. Findings on Inflammation Detailed by J.M. De Cock and Co–Authors (Inflammation Triggers Zeb1–Dependent Escape from Tumor Latency) … p.2405

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Findings on Inflammatory Bowel Disease Discussed by Investigators at Shanghai Jiao–Tong University (Exosome in intestinal mucosal immunity) … p.2406

January 14, 2017

Transplant Medicine - Kidney Transplants. Findings on Kidney Transplants Reported by Investigators at University of Birmingham (Clinical outcomes with ABO antibody titer variability in a multicenter study of ABO–incompatible kidney transplantation in the United Kingdom) … p.2409

Skin Diseases and Conditions - Leg Ulcers. Findings on Leg Ulcers Discussed by Investigators at Federal University (Autologous stem cell–based therapy for sickle cell leg ulcer: a pilot study) … p.2410

Leukocyte Diseases and Conditions - Leukocytosis. Findings on Leukocytosis Reported by Investigators at Brown University (Leukocytosis and Leukemia) … p.2412

Drugs and Therapies - Leukotriene Modifiers. Findings on Leukotriene Modifiers Reported by Investigators at Consejo Naci Invest Cient and Tecn (Development of an enantioselective capillary electrophoretic method for the simultaneous determination of montelukast enantiomeric and …) … p.2413

www.NewsRx.com

Biotechnology - Liposomes. Findings on Liposomes Detailed by Investigators at Rush University (Postoperative Pain Management After Primary Total Knee Arthroplasty: The Value of Liposomal Bupivacaine) … p.2414

Biotechnology - Liposomes. Findings on Liposomes Reported by Investigators at University of Waterloo (Adsorption of Nanoceria by Phosphocholine Liposomes) … p.2415

Oncology - Liver Cancer. Findings on Liver Cancer Discussed by Investigators at China Medical University and Hospital (Short–term and long–term efficacy of 7 targeted therapies for the treatment of advanced hepatocellular carcinoma: a network meta–analysis Efficacy of …) … p.2416

Oncology - Liver Cancer. Findings on Liver Cancer Reported by Investigators at Kansai Medical University (Effects of implementing an "enhanced recovery after surgery" program on patients undergoing resection of hepatocellular carcinoma) … p.2417

Oncology - Liver Cancer. Findings on Liver Cancer Reported by Investigators at Soochow University (Biomarker MicroRNAs for Diagnosis, Prognosis and Treatment of Hepatocellular Carcinoma: A Functional Survey and Comparison) … p.2418

Oncology - Liver Cancer. Findings on Liver Cancer Reported by Researchers at Yonsei University College of Medicine (Subclassification of Barcelona Clinic Liver Cancer B and C hepatocellular carcinoma: A cohort study of the multicenter registry database) … p.2419

Oncology - Lung Cancer. Findings on Lung Cancer Discussed by Investigators at People's Hospital (WWOX inhibits the invasion of lung cancer cells by downregulating RUNX2) … p.2420
Oncology - Lung Cancer. Findings on Lung Cancer Reported by Investigators at City of Hope National Medical Center (Perceptions and Utilization of Lung Cancer Screening Among Primary Care Physicians) … p.2421

Oncology - Lymphoma. Findings on Lymphoma Detailed by Investigators at University of Alberta (The Influence of Corticosteroids on Diagnostic Accuracy of Biopsy for Primary Central Nervous System Lymphoma) … p.2422

Oncology - Lymphoma. Findings on Lymphoma Discussed by Investigators at University of Athens (Brentuximab vedotin in combination with or without donor lymphocyte infusion for patients with Hodgkin lymphoma after allogeneic stem cell transplantation) … p.2423

Oncology - Lymphoma. Findings on Lymphoma Reported by Researchers at Alexandra Hospital (Recent treatment advances in Hodgkin lymphoma: a concise review) … p.2424

Macropinocytosis. Findings on Macropinocytosis Reported by Investigators at School of Medicine (A Diaphanous–related formin links Ras signaling directly to actin assembly in macropinocytosis and phagocytosis) … p.2425

Mathematics. Findings on Mathematics Reported by Investigators at Mississippi State University (Constrained topological optimization of a football helmet facemask based on brain response) … p.2426

Genetics - Medical Genetics. Findings on Medical Genetics Reported by Investigators at Hospital of Santa Maria (A Novel MED12 Mutation: Evidence for a Fourth Phenotype) … p.2427

Health and Medicine - Medical Physics. Findings on Medical Physics Detailed by Researchers at Sunnybrook Research Institute (Quantifying masking in clinical mammograms via local detectability of simulated lesions) … p.2428

Oncology - Melanoma. Findings on Melanoma Reported by Investigators at University of Ulsan (Upregulation of annexin A1 expression by butyrate in human melanoma cells induces invasion by inhibiting E–cadherin expression) … p.2429

Oncology - Merkel Cell Cancer. Findings on Merkel Cell Cancer Reported by Investigators at IBBTEC (Shared Oncogenic Pathways Implicated in Both Virus–Positive and UV–Induced Merkel Cell Carcinomas) … p.2430

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. Findings on Metabolic Syndrome Discussed by Investigators at Ignacio Chavez National Institute of Cardiology (Effect of the Aged Garlic Extract on Cardiovascular Function in Metabolic Syndrome Rats) … p.2431

Minimally Invasive Gynecology. Findings on Minimally Invasive Gynecology Discussed by Investigators at Mayo Clinic (Location of the Deep Epigastric Vessels in the Resting and Insufflated Abdomen) … p.2432

Oncology - Molecular Cancer and Carcinogenesis. Findings on Molecular Cancer and Carcinogenesis Reported by Investigators at University of Sao Paulo (beta–ionone modulates the expression of miRNAs and genes involved in the metastatic phenotype of microdissected persistent preneoplastic …) … p.2433

Molecular Research. Findings on Molecular Research Discussed by Investigators at Dong–A University (Transcriptional and Posttranslational Regulation of Nucleotide Excision Repair: The Guardian of the Genome against Ultraviolet Radiation) … p.2434

www.NewsRx.com
January 14, 2017

Molecular Research. Findings on Molecular Research Reported by Investigators at Pusan National University (MICAL–like Regulates Fasciclin II Membrane Cycling and Synaptic Development) … p.2435

Monoterpenes. Findings on Monoterpenes from S.F. Yang and Colleagues Provide New Insights (A Multiscale Study on the Penetration Enhancement Mechanism of Menthol to Osthole) … p.2436

Autoimmune Diseases and Conditions - Multiple Sclerosis. Findings on Multiple Sclerosis Discussed by Investigators at Royal Melbourne Hospital (A genetic basis for multiple sclerosis severity: Red herring or real?) … p.2437

Gram-Negative Bacteria - Mycoplasma pneumoniae. Findings on Mycoplasma pneumoniae Reported by Researchers at Georg–August–University (Hydrogen sulfide is a novel potential virulence factor of Mycoplasma pneumoniae: characterization of the unusual cysteine desulfurase/desulfhydrase HapE) … p.2437

Nanotechnology - Nanoparticles. Findings on Nanoparticles Discussed by Investigators at School of Chemistry and Environment (Using hyaluronic acid–functionalized pH stimuli–responsive mesoporous silica nanoparticles for targeted delivery to CD44–overexpressing cancer cells) … p.2438

Nephrology. Findings on Nephrology Discussed by D. Habedank and Co–Researchers (Vasodilation and Exercise Capacity in Patients with End–Stage Renal Disease: A Prospective Proof–of–Concept Study) … p.2439

www.NewsRx.com

Nephrology. Findings on Nephrology Reported by Investigators at Harvard School of Medicine (G alpha 12 is required for renal cystogenesis induced by Pkd1 inactivation) … p.2440

Nephrology. Findings on Nephrology Reported by Investigators at University of Sydney (Recent advances in autosomal–dominant polycystic kidney disease) … p.2441

Neurodegenerative Diseases. Findings on Neurodegenerative Diseases Reported by Investigators at Max–Planck–Institute (The m–AAA Protease Associated with Neurodegeneration Limits MCU Activity in Mitochondria) … p.2442

Oncology - Neuroendocrine Cancer. Findings on Neuroendocrine Cancer Detailed by Investigators at Ochsner Medical Center (Neuroendocrine Tumors and Lanreotide Depot: Clinical Considerations and Nurse and Patient Preferences) … p.2443

Neurons. Findings on Neurons Detailed by Investigators at Tokyo Women's Medical University (Endoplasmic reticulum stress–mediated neuronal apoptosis by acrylamide exposure) … p.2444

Neutral Amino Acids. Findings on Neutral Amino Acids Detailed by Investigators at Van Andel Research Institute (The role of the unusual threonine string in the conversion of prion protein) … p.2445

Oncology - Non-Small Cell Lung Cancer. Findings on Non–Small Cell Lung Cancer Described by Researchers at School of Public Health (Dose–Dependent Mutation Rates Determine Optimum Erlotinib Dosing Strategies for EGFR Mutant Non–Small Cell Lung Cancer Patients) … p.2446

Oncology - Non-Small Cell Lung Cancer. Findings on Non–Small Cell Lung Cancer Detailed by Investigators at Kyungpook National University (The Different Effect of VEGF Polymorphisms on the Prognosis of Non–Small Cell Lung Cancer according to Tumor Histology) … p.2447
January 14, 2017

Proteins - Nucleoproteins. Findings on Nucleoproteins Detailed by Investigators at Stanford University (A New Chromatin–Cytoskeleton Link in Cancer) … p.2448

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings on Obesity Detailed by Investigators at Salzburg University (Attentional and motor impulsivity interactively predict ‘food addiction’ in obese individuals) … p.2449

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings on Obesity Discussed by Investigators at University of New Mexico (Mirror, Mirror on the Wall: Children's Preferences and Self–Perceptions of Weight in a Rural Hispanic Community) … p.2450

Nutritional and Metabolic Diseases and Conditions - Obesity. Findings on Obesity Reported by Investigators at University of Zurich (Organic Cation Transporter 2 Overexpression May Confer an Increased Risk of Gentamicin–Induced Nephrotoxicity) … p.2451

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Findings on Obstructive Sleep Apnea Reported by Investigators at Capital Medical University (Mean apnea–hypopnea duration (but not apnea–hypopnea index) is associated with worse hypertension in patients with obstructive sleep apnea] … p.2452

Oncology. Findings on Oncology Described by T. Baker and Colleagues (Acquisition of a single EZH2 D1 domain mutation confers acquired resistance to EZH2–targeted inhibitors) … p.2453

Nursing - Oncology Nursing. Findings on Oncology Nursing Discussed by Investigators at Isfahan University of Medical Sciences (Perceptions of patients, families, physicians and nurses regarding challenges in cancer disclosure: A descriptive qualitative study) … p.2454

www.NewsRx.com

Oncology - Oral Cancer. Findings on Oral Cancer Reported by Investigators at National Taiwan University (Phenethyl isothiocyanate enhances TRAIL–induced apoptosis in oral cancer cells and xenografts) … p.2455

Musculoskeletal Diseases and Conditions - Osteoporosis. Findings on Osteoporosis Reported by Investigators at Columbia University (Effects of Daily or Cyclic Teriparatide on Bone Formation in the Iliac Crest in Women on No Prior Therapy and in Women on Alendronate) … p.2456

Oncology - Ovarian Cancer. Findings on Ovarian Cancer Detailed by Investigators at Jagiellonian University (17–Estradiol Reverses Leptin–Inducing Ovarian Cancer Cell Migration by the PI3K/Akt Signaling Pathway) … p.2457

Oncology - Ovarian Cancer. Findings on Ovarian Cancer Reported by Researchers at Royal Marsden NHS Foundation Trust (UK BRCA mutation testing in patients with ovarian cancer) … p.2458

Surgery - Ovariectomy. Findings on Ovariectomy Detailed by Investigators at Veterans Affairs Medical Center [RANKL (Receptor Activator of NF kappa B Ligand) Produced by Osteocytes Is Required for the Increase in B Cells and Bone Loss Caused by Estrogen Deficiency in ...] … p.2459

Oxygenators. Findings on Oxygenators Reported by Investigators at Oslo University Hospital (VAVD vacuum may cause bubble transgression in membrane oxygenators) … p.2460

Oncology - Pancreatic Cancer. Findings on Pancreatic Cancer Discussed by Investigators at Veterans Affairs Medical Center (Tissue Transglutaminase Activates Cancer–Associated Fibroblasts and Contributes to Gemcitabine Resistance in Pancreatic Cancer) … p.2461
Oncology - Pancreatic Cancer. Findings on Pancreatic Cancer Reported by Investigators at Nanjing Medical University (Long non–coding RNA IRAIN suppresses apoptosis and promotes proliferation by binding to LSD1 and EZH2 in pancreatic cancer) … p.2462

Oncology - Pancreatic Cancer. Findings on Pancreatic Cancer Reported by Investigators at University of Tokyo (Measles virus selectively blind to signaling lymphocyte activity molecule has oncolytic efficacy against nectin–4–expressing pancreatic cancer cells) … p.2463

Oncology - Pancreatic Cancer. Findings on Pancreatic Cancer Reported by Researchers at North Dakota State University (Acridine Orange Conjugated Polymersomes for Simultaneous Nuclear Delivery of Gemcitabine and Doxorubicin to Pancreatic Cancer Cells) … p.2464

Papillomas. Findings on Papillomas Reported by Researchers at Johns Hopkins University (Immunologic Control of Mus musculus Papillomavirus Type 1) … p.2465

Life Science Research - Parasitology. Findings on Parasitology Reported by Researchers at University of Berne (Approaches for the vaccination and treatment of Neospora caninum infections in mice and ruminant models) … p.2466

Neurodegenerative Diseases and Conditions - Parkinson's Disease. Findings on Parkinson's Disease Detailed by Investigators at Palacky University (Familial atypical parkinsonism with rare variant in VPS35 and FBXO7 genes A case report) … p.2467

www.NewsRx.com

Pentanoic Acids. Findings on Pentanoic Acids Discussed by Investigators at University of Michigan (Alterations in the human proteome following administration of valproic acid) … p.2468

Enzymes and Coenzymes - Peptide Hydrolases. Findings on Peptide Hydrolases Described by Researchers at University of Wurzburg (Development of a New Antileishmanial Aziridine–2,3–Dicarboxylate–Based Inhibitor with High Selectivity for Parasite Cysteine Proteases) … p.2469

Pericytes. Findings on Pericytes Detailed by Investigators at University of Washington (Maintenance of vascular integrity by pericytes is essential for normal kidney function) … p.2470

Drugs and Therapies - Pharmacoepidemiology and Drug Safety. Findings on Pharmacoepidemiology and Drug Safety Reported by Investigators at University of Milan (A probabilistic bias analysis for misclassified categorical exposures, with application to oral anti–hyperglycaemic drugs) … p.2471

Pharmacology. Findings on Pharmacology Detailed by Researchers at University of Naples Federico II (Insights on FXR selective modulation. Speculation on bile acid chemical space in the discovery of potent and selective agonists) … p.2472

Pharmacology. Findings on Pharmacology Reported by Investigators at Ministry of Agriculture (Synthesis and Pharmacological Evaluation of Novel Pleuromutilin Derivatives with Substituted Benzimidazole Moieties) … p.2473

Pharmacology. Findings on Pharmacology Reported by R.C. Anderson et al (Iodinated benzimidazole PARP radiotracer for evaluating PARP1/2 expression in vitro and in vivo) … p.2474
January 14, 2017

Drugs and Therapies - Pharmacy Practice. Findings on Pharmacy Practice Discussed by Investigators at University of Arkansas (Community pharmacy owners' views of star ratings and performance measurement: In–depth interviews) … p.2475

Photodynamics. Findings on Photodynamics Detailed by Investigators at University of Sao Paulo (In vitro effects of photodynamic therapy induced by chloroaluminum phthalocyanine nanoemulsion) … p.2476

Platinum Compounds. Findings on Platinum Compounds Reported by Investigators at University of Messina (Evaluation of cisplatin plasma levels in patients undergoing cytoreductive surgery and hyperthermic intraperitoneal chemotherapy) … p.2477

Platinum Compounds. Findings on Platinum Compounds Reported by Researchers at Shanghai Jiao–Tong University (Phenylethyl isothiocyanate reverses cisplatin resistance in biliary tract cancer cells via glutathionylation–dependent degradation of Mcl–1) … p.2478

Polyethylene Glycols. Findings on Polyethylene Glycols Reported by Investigators at University of Lisbon (Controlled drug release from hydrogels for contact lenses: Drug partitioning and diffusion) … p.2479

Peptide Proteins - Posterior Pituitary Hormones. Findings on Posterior Pituitary Hormones Discussed by Investigators at Mental Health Research Institute (A meta–analytic review of the correlation between peripheral oxytocin and cortisol concentrations) … p.2480

Oncology - Prostate Cancer. Findings on Prostate Cancer Detailed by Researchers at Institute of Medical Sciences (Outcome of radical prostatectomy as primary treatment for high–risk prostate cancer patients) … p.2482

Oncology - Prostate Cancer. Findings on Prostate Cancer Reported by Investigators at Cancer Institute (Sexual Function After Hypofractionated Versus Conventionally Fractionated Radiotherapy for Prostate Cancer: Results From the Randomized Phase III HYPRO Trial) … p.2483

Oncology - Prostate Cancer. Findings on Prostate Cancer Reported by Investigators at Yale University School of Medicine (The Association Between Evaluation at Academic Centers and the Likelihood of Expectant Management in Low–risk Prostate Cancer) … p.2484

Oncology - Prostate Cancer. Findings on Prostate Cancer Reported by Researchers at Institute of Medical Sciences (Outcome of radical prostatectomy as primary treatment for high–risk prostate cancer patients) … p.2482

Prothrombin. Findings on Prothrombin Discussed by K. Kapoor and Co–Researchers (Discovery of Novel Nonactive Site Inhibitors of the Prothrombinase Enzyme Complex) … p.2485

Lung Diseases and Conditions - Pulmonary Embolism. Findings on Pulmonary Embolism Discussed by Investigators at Queen Margaret Hospital (D–dimer test for excluding the diagnosis of pulmonary embolism) … p.2486

Lung Diseases and Conditions - Pulmonary Hypertension. Findings on Pulmonary Hypertension Reported by Investigators at University of Toronto (Simvastatin prevents and reverses chronic pulmonary hypertension in newborn rats via pleiotropic inhibition of RhoA signaling) … p.2487
January 14, 2017

Lung Diseases and Conditions - Radiation Pneumonitis. Findings on Radiation Pneumonitis Reported by Investigators at Department of Radiation Oncology (Dosimetric factors predicting radiation pneumonitis after CyberKnife stereotactic body radiotherapy for peripheral lung cancer) … p.2488

Drugs and Therapies - Radiotherapy. Findings on Radiotherapy Detailed by Investigators at French National Institute of Health and Medical Research (INSERM) (Vaginal dose assessment in image–guided brachytherapy for cervical cancer: Can we really rely on dose–point evaluation?) … p.2489

Oncology - Rectal Cancer. Findings on Rectal Cancer Reported by Investigators at Aarhus University (Cancer of the Upper Rectum) … p.2491

Eye Diseases and Conditions - Retinoblastoma. Findings on Retinoblastoma Reported by Investigators at Scripps Research Institute (Mapping the interactions of adenoviral E1A proteins with the p160 nuclear receptor coactivator binding domain of CBP) … p.2492

Rotavirus. Findings on Rotavirus from V. Hoffman and Colleagues Provide New Insights (Validation of current procedural terminology codes for rotavirus vaccination among infants in two commercially insured US populations) … p.2493

Blood Diseases and Conditions - Sepsis. Findings on Sepsis Detailed by Investigators at Harbin Medical University (The plasma levels of CST and BCKDK in patients with sepsis) … p.2494

Blood Diseases and Conditions - Sepsis. Findings on Sepsis Reported by Investigators at Logan College of Chiropractic (Pharmacist impact on time to antibiotic administration in patients with sepsis in an ED) … p.2495

www.NewsRx.com

Hematologic Diseases and Conditions - Sickle Cell Anemia. Findings on Sickle Cell Anemia Detailed by Investigators at Oregon Health and Science University (Contemporary outcomes of sickle cell disease in pregnancy) … p.2496

Drugs and Therapies - Small Molecule Inhibitors. Findings on Small Molecule Inhibitors Reported by Researchers at University of New South Wales (A small molecule inhibitor of tropomyosin dissociates actin binding from tropomyosin–directed regulation of actin dynamics) … p.2497

Oncology - Squamous Cell Carcinoma. Findings on Squamous Cell Carcinoma Detailed by Investigators at Soochow University (Sunitinib modulates the radiosensitivity of esophageal squamous cell carcinoma cells in vitro) … p.2498

Oncology - Squamous Cell Carcinoma. Findings on Squamous Cell Carcinoma Discussed by Investigators at Hebei Medical University (Association of programmed death–1 polymorphisms with the risk and prognosis of esophageal squamous cell carcinoma) … p.2499

Oncology - Squamous Cell Carcinoma. Findings on Squamous Cell Carcinoma Discussed by Investigators at Nanchang University (CD47 is a Potential Target for the Treatment of Laryngeal Squamous Cell Carcinoma) … p.2500

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Findings on Subarachnoid Hemorrhage Described by I.R. Da Silva and Colleagues (Effect of Age on Transcranial Doppler Velocities in Patients with Aneurysmal Subarachnoid Hemorrhage) … p.2501
January 14, 2017

Heart Disorders and Diseases - Takotsubo Cardiomyopathy. Findings on Takotsubo Cardiomyopathy Detailed by Investigators at University of Athens (A Heartbreaking Renal Transplantation: Is Norepinephrine the Culprit to Blame?) … p.2502

Lymphatic Diseases and Conditions - Thymoma. Findings on Thymoma Reported by Investigators at Yonsei University (Limited thymectomy as a potential alternative treatment option for early–stage thymoma: A multi–institutional propensity–matched study) … p.2503

Thyroid Diseases and Conditions - Thyroiditis. Findings on Thyroiditis Discussed by Investigators at Catholic University of Louvain (Pioglitazone, a PPAR gamma Agonist, Upregulates the Expression of Caveolin–1 and Catalase, Essential for Thyroid Cell Homeostasis: A Clue to the Pathogenesis …) … p.2504

Biomedical Engineering - Tissue Engineering. Findings on Tissue Engineering Described by Researchers at Institute of Basic Medical Sciences (Development of Electrically Conductive Double–Network Hydrogels via One–Step Facile Strategy for Cardiac Tissue Engineering) … p.2505

Biomedical Engineering - Tissue Engineering. Findings on Tissue Engineering Reported by Investigators at National Institute of Technology (Alginate Bead Based Hexagonal Close Packed 3D Implant for Bone Tissue Engineering) … p.2506

Bacterial Infections and Mycoses - Toxemia. Findings on Toxemia from B.J. Yamamoto and Colleagues Provide New Insights (Efficacy Projection of Obiltoxaximab for Treatment of Inhalational Anthrax across a Range of Disease Severity) … p.2507

Drugs and Therapies - Trimethoprim Therapy. Findings on Trimethoprim Therapy Detailed by Investigators at University of Otago (Pharmacist–only trimethoprim: pharmacist satisfaction on their training and the impact on their practice) … p.2508

Tryptamines. Findings on Tryptamines Described by Z.I. Sandor and Colleagues (Serotonin or the Mucosa Do Not Mediate the Motor Effect of Allyl Isothiocyanate in the Guinea–Pig Small Intestine) … p.2509

Mycobacterium Infections - Tuberculosis. Findings on Tuberculosis Reported by Investigators at Capital Medical University (Interactions of linezolid and second–line anti–tuberculosis agents against multidrug–resistant Mycobacterium tuberculosis in vitro and in vivo) … p.2510

Mycobacterium Infections - Tuberculosis. Findings on Tuberculosis Reported by Investigators at University of Arkansas (Mobility patterns of persons at risk for drug–resistant tuberculosis in Mumbai, India) … p.2512

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Findings on Type 1 Diabetes Mellitus Reported by Investigators at Harvard School of Medicine [Singular role for T–BET+ CXCR3(+) regulatory T cells in protection from autoimmune diabetes] … p.2513

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings on Type 2 Diabetes Detailed by W. Stonehouse and Co–Authors (Short term effects of palm–tocotrienol and palm–carotenes on vascular function and cardiovascular disease risk: A randomised controlled trial) … p.2514
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings on Type 2 Diabetes Discussed by Investigators at Central South University (Long-term effects intensive medical therapy on the development and progression of subclinical atherosclerosis and the metabolic syndrome in Chinese patients ...)
... p.2515

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Findings on Type 2 Diabetes Reported by Investigators at Merck & Company (Discovery of benzofuran propanoic acid GPR120 agonists: From uHTS hit to mechanism-based pharmacodynamic effects) ... p.2516

Oncology - Urothelial Cancer. Findings on Urothelial Cancer Discussed by Investigators at University of G. d'Annunzio [The Clinical Use of the Neutrophil to Lymphocyte Ratio (NLR) in Urothelial Cancer: A Systematic Review] ... p.2517

Immunization - Vaccines. Findings on Vaccines Reported by Investigators at Chinese Academy of Sciences (Improving adjuvanticity of quaternized chitosan–based microgels for H5N1 split vaccine by tailoring the particle properties to achieve antigen dose sparing effect) ... p.2518

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Findings on Venous Thromboembolism Described by Researchers at Leiden University Medical Center (Instrumental variable analysis as a complementary analysis in studies of adverse effects: venous thromboembolism and second–generation versus ...) ... p.2519

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Findings on Venous Thromboembolism Reported by Investigators at Huazhong University of Science and Technology (Subtypes of SERPINC1 mutations and the thrombotic phenotype of inherited antithrombin deficient individuals in Chinese Han population) ... p.2520

Eye Diseases and Conditions - Age-Related Macular Degeneration. French National Institute of Health and Medical Research (INSERM) Reports Findings in Age–Related Macular Degeneration (Twelve–Month Outcomes of Ranibizumab vs. Afibercept for Neovascular Age–Related Macular Degeneration: Data from an ...) ... p.2522

Oncology - Prostate Cancer. Fudan University Shanghai Cancer Center Reports Findings in Prostate Cancer (Effect of body mass index on the performance characteristics of PSA–related markers to detect prostate cancer) ... p.2523

Drugs and Therapies - Drug Delivery Systems. Fujian Agriculture and Forestry University Details Findings in Drug Delivery Systems (Rehmannia glutinosa polysaccharide liposome as a novel strategy for stimulating an efficient immune response and their effects on dendritic cells) ... p.2524

Oncology - Breast Cancer. Gene test could pinpoint patients sensitive to new type of cancer drug ... p.2525

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. General Hospital Describes Findings in Subarachnoid Hemorrhage (Melatonin attenuated early brain injury induced by subarachnoid hemorrhage via regulating NLRP3 inflammasome and apoptosis signaling) ... p.2526

www.NewsRx.com
January 14, 2017

Oncology - Carcinomas. General Hospital Details Findings in Carcinomas (The influence of American Society of Anesthesiologists Physical Status on patient morbidity and survival after total thyroidectomy) … p.2527

Neurodegenerative Diseases. Genes Nardilysin and OGDHL linked to human neurological conditions … p.2528

Gram-Negative Bacteria - Pseudomonas aeruginosa. Georgia State University Reports Findings in Pseudomonas aeruginosa (Inhibition and Dispersal of Pseudomonas aeruginosa Biofilms by Combination Treatment with Escapin Intermediate Products and Hydrogen Peroxide) … p.2530

Glancy Prongay & Murray LLP. Glancy Prongay & Murray LLP Commences Investigation on Behalf of Endologix, Inc. Investors … p.2532

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Gut microorganisms affect our physiology … p.2532

Oncology - Glioblastomas. Hadassah–Hebrew University Details Findings in Glioblastomas (Expression level of miRNAs on chromosome 14q32.31 region correlates with tumor aggressiveness and survival of glioblastoma patients) … p.2534

Cellular Structures. Harbin Institute of Technology Reports Findings in Cellular Structures (How Leucocyte Cell Membrane Modified Janus Microcapsules are Phagocytosed by Cancer Cells) … p.2535

Musculoskeletal Diseases and Conditions - Kyphosis. Harvard School of Medicine Reports Findings in Kyphosis (Heritability of Thoracic Spine Curvature and Genetic Correlations With Other Spine Traits: The Framingham Study) … p.2536

Cardiology. Heart–related deaths spike at Christmas … p.2537

Drugs and Therapies - Biopharmaceuticals. Helix BioPharma Corp. Successfully Out–Licenses Late Stage Biphasix Technology … p.2538

Oncology - Lung Cancer. Histologic classification impacts SBRT treatment in early–stage lung cancer patients … p.2539

Pregnancy Complications - Preeclampsia. History of kidney injury increases risk of pregnancy complications … p.2540

Clinical Research - Clinical Trials and Studies. Hong Kong Baptist University Details Findings in Clinical Trials and Studies [Tolerability, exposure and pharmacokinetics in healthy subjects of a Chinese herbal medicine MaZiRenWan (MZRW): Study protocol for a randomized open–labelled, …] … p.2541

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. IMPORTANT INVESTOR ALERT: Goldberg Law PC Announces an Investigation of Endologix, Inc. and Advises Investors with Losses to Contact the Firm … p.2542

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. INVESTOR ALERT: Law Offices of Howard G. Smith Commences Investigation on Behalf of Endologix, Inc. Investors … p.2543
Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Imperial College Details Findings in Chronic Obstructive Pulmonary Disease (Angiotensin–Converting Enzyme Inhibition as an Adjunct to Pulmonary Rehabilitation in Chronic Obstructive Pulmonary Disease) … p.2544

Enzymes and Coenzymes - Esterases. Indiana University School of Medicine Reports Findings in Esterases (Identification and Characterization of New Chemical Entities Targeting Apurinic/Apyrimidinic Endonuclease 1 for the Prevention of Chemotherapy–Induced Peripheral Neuropathies) … p.2545

Clinical Research - Clinical Trials and Studies. Institute for Cardiovascular Research Reports Findings in Clinical Trials and Studies [Phosphate Binding Therapy to Lower Serum Fibroblast–Growth–Factor–23 Concentrations in Chronic Kidney Disease: Rationale and Study Design of the Sevelamer on …] … p.2546

Lung Diseases and Conditions - Asthma. Interleukin–1a causes people to choke on air … p.2547

Lung Diseases and Conditions - Pulmonary Embolism. Investigators at A.T. Still University of Health Sciences Report Findings in Pulmonary Embolism [Pulseless electrical activity in pulmonary embolism treated with thrombolysis (from the “PEAPETT” study)] … p.2548

Gram-Positive Bacteria - Corynebacterium glutamicum. Investigators at Academy of Sciences Detail Findings in Corynebacterium glutamicum (Stereospecificity of Corynebacterium glutamicum 2,3–butanediol dehydrogenase and implications for the stereochemical purity of bioproduced 2,3–butanediol) … p.2549

Oncology - Osteosarcomas. Investigators at Albert Einstein College of Medicine Report Findings in Osteosarcomas [Targeted therapy of osteosarcoma with radiolabeled monoclonal antibody to an insulin–like growth factor–2 receptor (IGF2R)] … p.2551

Oncology - Thyroid Cancer. Investigators at Allegheny General Hospital Describe Findings in Thyroid Cancer (Lymphocytic Thyroiditis Is Associated With Increased Number Of Benign Cervical Nodes And Fewer Central Neck Compartment Metastatic Lymph Nodes In Patients With ...) … p.2552

Oncology - Pancreatic Cancer. Investigators at Asia University Report Findings in Pancreatic Cancer (Oncogenic Functions of Gli1 in Pancreatic Adenocarcinoma Are Supported by Its PRMT1–Mediated Methylation) … p.2553

Pharmacology. Investigators at Assam University Target Pharmacology (Cicca acida L.: phytochemistry and pharmacological studies) … p.2554

Heart Disorders and Diseases - Ventricular Tachycardia. Investigators at Baylor University College of Medicine Have Reported New Data on Ventricular Tachycardia (Safety and Feasibility of Open Chest Epicardial Mapping and Ablation of Ventricular Tachycardia During the Period of Left Ventricular ...) … p.2555

Immunology - Immunoglobulins. Investigators at Baylor University College of Medicine Report Findings in Immunoglobulins (Coming–of–Age of Antibodies in Cancer Therapeutics) … p.2556
January 14, 2017

Drugs and Therapies - Pharmacology. Investigators at Beijing Institute of Pharmacology and Toxicology Detail Findings in Pharmacology (Allosteric activation of midazolam CYP3A5 hydroxylase activity by icotinib – Enhancement by ketoconazole) … p.2557

Inflammation. Investigators at Brigham Young University Describe Findings in Inflammation (Up–Regulation of Claudin–6 in the Distal Lung Impacts Secondhand Smoke–Induced Inflammation) … p.2559

Cardiology. Investigators at Bristol–Myers Squibb Detail Findings in Cardiology (Evaluation of microRNAs–208 and 133a/b as differential biomarkers of acute cardiac and skeletal muscle toxicity in rats) … p.2560

Heart Disorders and Diseases - Heart Disease. Investigators at Broad Institute of MIT and Harvard Detail Findings in Heart Disease (Genetic Risk, Adherence to a Healthy Lifestyle, and Coronary Disease) … p.2561

Neurodegenerative Diseases and Conditions - Parkinson's Disease. Investigators at CONICET Describe Findings in Parkinson's Disease (Facial tremors in patients with and without parkinsonism) … p.2562

Drugs and Therapies - Aerosol Medicine and Pulmonary Drug Delivery. Investigators at Carleton University Detail Findings in Aerosol Medicine and Pulmonary Drug Delivery (Characterization of Medication Velocity and Size Distribution from Pressurized Metered–Dose Inhalers by Phase Doppler Anemometry) … p.2563

www.NewsRx.com

Oncology - Lymphoma. Investigators at Case Western Reserve University Detail Findings in Lymphoma (Dual institution experience of nodal marginal zone lymphoma reveals excellent long–term outcomes in the rituximab era) … p.2564

Clinical Research - Clinical Trials and Studies. Investigators at Cedars–Sinai Medical Center Report Findings in Clinical Trials and Studies (Selecting Patients for Intra–Arterial Therapy in the Context of a Clinical Trial for Neuroprotection) … p.2566

Stem Cell Research - Mesenchymal Stem Cells. Investigators at Central Hospital Discuss Findings in Mesenchymal Stem Cells (Combination of butylphthalide with umbilical mesenchymal stem cells for the treatment of delayed encephalopathy after carbon monoxide poisoning) … p.2567

Transfusion Medicine - Blood Transfusion. Investigators at Central South University Report Findings in Blood Transfusion [mTOR Signaling Regulates Protective Activity of Transferred CD4(+)Foxp3(+) T Cells in Repair of Acute Kidney Injury] … p.2568

Oncology - Colon Cancer. Investigators at Chiba Cancer Center Discuss Findings in Colon Cancer [Magnified endoscopic observation of early colorectal cancer by linked color imaging with crystal violet staining (with video)] … p.2569

Cardiovascular Diseases and Conditions - Vascular Malformations. Investigators at Children's Hospital Report Findings in Vascular Malformations (Spontaneous Cystic Penile Vascular Malformation in an Adolescent and Review of the Literature) … p.2570
Oncology - Colon Cancer. Investigators at China Medical University and Hospital Detail Findings in Colon Cancer (A potential biomarker for colorectal cancer: long non–coding RNA RP1–13P20.6) … p.2571

Oncology - Gastric Cancer. Investigators at China Medical University and Hospital Detail Findings in Gastric Cancer (Palliative Gastrectomy Prolongs Survival of Metastatic Gastric Cancer Patients with Normal Preoperative CEA or CA19–9 Values: A Retrospective Cohort Study) … p.2572

Oncology - Multiple Myeloma. Investigators at China Pharmaceutical University Have Reported New Data on Multiple Myeloma (Wogonin inhibits multiple myeloma–stimulated angiogenesis via c–Myc/VHL/HIF–1a signaling axis) … p.2573

Drugs and Therapies - Histone Deacetylase Inhibitors. Investigators at China University of Science and Technology Report Findings in Histone Deacetylase Inhibitors (HISTONE DEACETYLASE INHIBITOR–INDUCED EMERGENCE OF SYNAPTIC delta–OPIOID RECEPTORS AND BEHAVIORAL ANTINOCICEPTION IN PERSISTENT ...) … p.2574

Gram-Negative Bacteria - Shewanella. Investigators at China University of Science and Technology Report Findings in Shewanella (Extracellular biosynthesis of copper sulfide nanoparticles by Shewanella oneidensis MR–1 as a photothermal agent) … p.2575

Oncology - Esophageal Cancer. Investigators at Chinese Academy of Medical Sciences Have Reported New Data on Esophageal Cancer (An Interdisciplinary Nutrition Support Team Improves Clinical and Hospitalized Outcomes of Esophageal Cancer Patients with Concurrent ...) … p.2576

Oncology - Brain Cancer. Investigators at Chinese Academy of Sciences Describe Findings in Brain Cancer (Dual–Targeting Magnetic PLGA Nanoparticles for Codelivery of Paclitaxel and Curcumin for Brain Tumor Therapy) … p.2577

Oncology - Breast Cancer. Investigators at Chinese Academy of Sciences Describe Findings in Breast Cancer (Dual pH–sensitive micelles with charge–switch for controlling cellular uptake and drug release to treat metastatic breast cancer) … p.2578

Proteomics. Investigators at Chinese Academy of Sciences Describe Findings in Proteomics [Brain quantitative proteomic responses reveal new insight of benzotriazole neurotoxicity in female Chinese rare minnow (Gobiocypris rarus)] … p.2579

Adenomas. Investigators at Chinese People’s Liberation Army General Hospital Detail Findings in Adenomas (Clinical characteristics of PRKACA mutations in Chinese patients with adrenal lesions: a single–centre study) … p.2580

Cardiovascular Diseases and Conditions - Thrombosis. Investigators at Chinese People’s Liberation Army General Hospital Detail Findings in Thrombosis (Impact of acute kidney injury on coagulation in adult minimal change nephropathy) … p.2581

Thrombolysis. Investigators at Chinese University of Hong Kong Describe Findings in Thrombolysis (Good collateral circulation predicts favorable outcomes in intravenous thrombolysis: a systematic review and meta–analysis) … p.2583

Oncology - Breast Cancer. Investigators at Chongqing Medical University Report Findings in Breast Cancer (Association of MTDH immunohistochemical expression with metastasis and prognosis in female reproduction malignancies: a systematic review and
January 14, 2017

meta–analysis) … p.2584

Cardiovascular Diseases and Conditions - Thrombosis. Investigators at Chosun University Describe Findings in Thrombosis (Histologic features of acute thrombi retrieved from stroke patients during mechanical reperfusion therapy) … p.2585

Oncology - Colon Cancer. Investigators at Chung Ang University Report Findings in Colon Cancer (Choroidal and skin metastases from colorectal cancer) … p.2586

Oncology - Colon Cancer. Investigators at City of Hope National Medical Center Report Findings in Colon Cancer (Oncolytic herpes simplex virus kills stem–like tumor–initiating colon cancer cells) … p.2587

Connective Tissue Cells. Investigators at Cleveland Clinic Describe Findings in Connective Tissue Cells (In vitro chondrocyte toxicity following long–term, high–dose exposure to Gd–DTPA and a novel cartilage–targeted MR contrast agent) … p.2588

Heart Disorders and Diseases - Pericarditis. Investigators at Cleveland Clinic Describe Findings in Pericarditis (Complicated Pericarditis Understanding Risk Factors and Pathophysiology to Inform Imaging and Treatment) … p.2589

Drugs and Therapies - Chemotherapy. Investigators at Cleveland Clinic Report Findings in Chemotherapy (Nurse Adherence to Safe–Handling Practices: Observation Versus Self–Assessment) … p.2590

Cyclohexanes. Investigators at Clinical Neurosciences Division Describe Findings in Cyclohexanes (Ketamine's Mechanism Of Action: A Path To Rapid–acting Antidepressants) … p.2591

Nutritional and Metabolic Diseases and Conditions - Abdominal Obesity. Investigators at Clinical Research Institute Report Findings in Abdominal Obesity (Time–dependent Changes of Atherosclerotic LDL Complexes after Smoking Cessation) … p.2592

Sexually Transmitted Diseases and Conditions (STDs) - Syphilis. Investigators at Creighton University School of Medicine Target Syphilis (The continuing threat of syphilis in pregnancy) … p.2593

Drugs and Therapies - Chemical Biology and Drug Design. Investigators at Dalian University of Technology Target Chemical Biology and Drug Design (Mechanism of Mcl–1 Conformational Regulation Upon Small Molecule Binding Revealed by Molecular Dynamic Simulation) … p.2594

Cardiovascular Diseases and Conditions - Hypotension. Investigators at Dandenong Hospital Release New Data on Hypotension (Calcium channel antagonist and beta–blocker overdose: antidotes and adjunct therapies) … p.2595

Propanolamines. Investigators at Department of Cardiology Discuss Findings in Propanolamines (Bailout intravenous esmolol for heart rate control in cardiac computed tomography angiography) … p.2598
January 14, 2017

Peptide Proteins - Peptide Hormones. Investigators at Department of Clinical Laboratory Release New Data on Peptide Hormones (Ghrelin attenuates the growth of HO–8910 ovarian cancer cells through the ERK pathway) ... p.2599

Musculoskeletal Diseases and Conditions - Acromegaly. Investigators at Department of Endocrinology Zero in on Acromegaly (Circadian variation in serum cortisol during hydrocortisone replacement is not attributable to changes in cortisol–binding globulin concentrations) ... p.2600

Oncology - Breast Cancer. Investigators at Department of Gynecology Describe Findings in Breast Cancer (Can a pathological complete response of breast cancer after neoadjuvant chemotherapy be diagnosed by minimal invasive biopsy?) ... p.2601

Immune System Diseases and Conditions - Paraproteinemias. Investigators at Department of Medicine Discuss Findings in Paraproteinemias (Paraprotein–Related Kidney Disease: Kidney Injury from Paraproteins–What Determines the Site of Injury?) ... p.2602

Proteins - Carrier Proteins. Investigators at Department of Neuroscience Zero in on Carrier Proteins (TDP–43 functions within a network of hnRNP proteins to inhibit the production of a truncated human SORT1 receptor) ... p.2603

Oncology - Skin Cancer. Investigators at Department of Pharmacology & Toxicology Describe Findings in Skin Cancer (Anandamide–induced Endoplasmic Reticulum Stress and Apoptosis are Mediated by Oxidative Stress in Non–melanoma Skin Cancer: Receptor–independent ...) ... p.2604

Heart Disorders and Diseases - Heart Attack. Investigators at Department of Pharmacology Report Findings in Heart Attack (Inhibition of RhoA/Rho kinase by ibuprofen exerts cardioprotective effect on isoproterenol induced myocardial infarction in rats) ... p.2605

Clinical Research - Clinical Trials and Studies. Investigators at Department of Radiation Oncology Release New Data on Clinical Trials and Studies (Phase I trial evaluating the antiviral agent Cidofovir in combination with chemoradiation in cervical cancer patients) ... p.2606

Cardiovascular Diseases and Conditions - Thrombosis. Investigators at Department of Urology Report Findings in Thrombosis (Late Allograft Renal Vein Thrombosis Treated With Anticoagulation Alone: A Case Report) ... p.2607

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Investigators at Digestive Disease Institute Target Inflammatory Bowel Disease (Links of Autophagy Dysfunction to Inflammatory Bowel Disease Onset) ... p.2608

Immunology - Immunoproteins. Investigators at Division of Cardiology Describe Findings in Immunoproteins ([iMAP (TM) imaging of tumorous lesions surrounding the coronary arteries in a patient with an elevated serum level of immunoglobulin G4) ... p.2609

Oncology - Acute Lymphoblastic Leukemia. Investigators at Dokkyo Medical University School of Medicine Report New Data on Acute Lymphoblastic Leukemia (Burkitt–Type Acute Lymphoblastic Leukemia With Precursor B–Cell Immunophenotype and Partial Tetrasomy of 1q: A Case Report) ... p.2610
January 14, 2017

Ischemia. Investigators at Dokuz Eylul University Have Reported New Data on Ischemia (Renal Ischemia/Reperfusion Injury in Diabetic Rats: The Role of Local Ischemic Preconditioning) ... p.2610

Eye Diseases and Conditions - Age-Related Macular Degeneration. Investigators at Duke University Detail Findings in Age–Related Macular Degeneration (Differential Response to Anti–VEGF Regimens in Age–Related Macular Degeneration Patients with Early Persistent Retinal Fluid) ... p.2611

Drugs and Therapies - Central Nervous System Agents. Investigators at Duke University Discuss Findings in Central Nervous System Agents (Use of Therapeutic Drug Monitoring, Electronic Health Record Data, and Pharmacokinetic Modeling to Determine the Therapeutic Index of Phenytoin and Lamotrigine) ... p.2613

Oncology - Cancer Biomarkers. Investigators at East China University of Science and Technology Report New Data on Cancer Biomarkers (Near–Infrared Fluorogenic Probes with Polarity–Sensitive Emission for in Vivo Imaging of an Ovarian Cancer Biomarker) ... p.2614

Pharmacology. Investigators at Eli Lilly Discuss Findings in Pharmacology (Pharmacological interrogation of a rodent forced ambulation model: leveraging gait impairment as a measure of pain behavior pre–clinically) ... p.2615

Oncology - Leukemia. Investigators at Emory University Detail Findings in Leukemia (Modulation of Immune Checkpoints and Graft–versus–Leukemia in Allogeneic Transplants by Antagonizing Vasoactive Intestinal Peptide Signaling) ... p.2616

Immunology - Antigens. Investigators at Emory University Report Findings in Antigens (Genetic engineering of chimeric antigen receptors using lamprey derived variable lymphocyte receptors) ... p.2617

Stem Cell Research - Hematopoietic Stem Cells. Investigators at Erasmus University Medical Center Report Findings in Hematopoietic Stem Cells [Hematopoietic (stem) cell development – how divergent are the roads taken?] ... p.2618

Biotechnology - Cancer Gene Therapy. Investigators at Faculty of Pharmacy Zero in on Cancer Gene Therapy [Akt inhibitors in cancer treatment: The long journey from drug discovery to clinical use (Review)] ... p.2620

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Investigators at Federal University Discuss Findings in Fabry Disease (Characterization and phosphoproteomic analysis of a human immortalized podocyte model of Fabry disease generated using CRISPR/Cas9 technology) ... p.2621

Heart Disorders and Diseases - Cardiomyopathies. Investigators at First Hospital of Jilin University Report New Data on Cardiomyopathies (Ginsenoside Rg1 ameliorates diabetic cardiomyopathy by inhibiting endoplasmic reticulum stress–induced apoptosis in a streptozotocin–induced diabetes rat ...) ... p.2622
Urogenital Diseases and Conditions - Interstitial Cystitis. Investigators at Florida International University Report Findings in Interstitial Cystitis (Therapeutic Potential of Human Chorionic Gonadotropin Against Painful Bladder Syndrome/Interstitial Cystitis) … p.2623

Drugs and Therapies - Chemotherapy. Investigators at Guangxi Medical University Discuss Findings in Chemotherapy (Serum HE4 superior to CA125 in predicting poorer surgical outcome of epithelial ovarian cancer) … p.2624

Enzymes and Coenzymes - Glycoside Hydrolases. Investigators at Gyeongsang National University Detail Findings in Glycoside Hydrolases (Potent bacterial neuraminidase inhibitors, anthraquinone glucosides from Polygonum cuspidatum and their inhibitory mechanism) … p.2625

Heart Disorders and Diseases - Heart Disease. Investigators at Hamilton Health Science Describe Findings in Heart Disease [A Risk Assessment Tool Incorporating New Biomarkers for Coronary Syndromes: The Organization to Assess Strategies in Ischemic Syndromes …] … p.2626

Oncology - Lung Cancer. Investigators at Harvard School of Medicine Describe Findings in Lung Cancer (Programmed Cell Death Ligand 1 Expression in Resected Lung Adenocarcinomas: Association with Immune Microenvironment) … p.2627

Muscle Cells. Investigators at Harvard School of Medicine Describe Findings in Muscle Cells (Adventitial MSC–like Cells Are Progenitors of Vascular Smooth Muscle Cells and Drive Vascular Calcification in Chronic Kidney Disease) … p.2628
Oncology - Liver Cancer. Investigators at Huazhong University of Science and Technology Report New Data on Liver Cancer (Novel Glypican–3–Binding Peptide for in Vivo Hepatocellular Carcinoma Fluorescent Imaging) … p.2635

Chromaffin Cells. Investigators at Hunan University Report Findings in Chromaffin Cells (Bibenzyl compound 20c protects against endoplasmic reticulum stress in tunicamycin–treated PC12 cells in vitro) … p.2636

Drugs and Therapies - Antiretrovirals. Investigators at Indiana University School of Medicine Detail Findings in Antiretrovirals (Inhibition of Cytochrome P450 2B6 Activity by Voriconazole Profiled Using Efavirenz Disposition in Healthy Volunteers) … p.2637

Genetics - Medical Genetics. Investigators at Institute for Medical Genetics Report New Data on Medical Genetics (A homozygous HOXD13 missense mutation causes a severe form of synpolydactyly with metacarpal to carpal transformation) … p.2641

Musculoskeletal Diseases and Conditions - Muscular Dystrophy. Investigators at Institute of Gerontology Describe Findings in Muscular Dystrophy (The Muscular Dystrophy Gene TMEM5 Encodes a Ribitol beta 1,4–Xylosyltransferase Required for the Functional Glycosylation of Dystroglycan) … p.2645

Life Science Research - Developmental Biology. Investigators at Institute of Life Sciences Have Reported New Data on Developmental Biology (Nucleolar protein 4–like has a complex expression pattern in zebrafish embryos) … p.2646

Oncology - Lymphoma. Investigators at Institute of Oncology Report New Data on Lymphoma (Checkpoint inhibitors in Hodgkin's lymphoma) … p.2646

Gram-Positive Bacteria - Staphylococcus aureus. Investigators at Institute of Surgery Research Discuss Findings in Staphylococcus aureus (Screening a Commercial Library of Pharmacologically Active Small Molecules against Staphylococcus)
Cardiovascular Diseases and Conditions - Hereditary Hemorrhagic Telangiectasia. Investigators at Jikei University Report Findings in Hereditary Hemorrhagic Telangiectasia (Open arterial reconstruction of multiple hepatic artery aneurysms in a patient with hereditary hemorrhagic telangiectasia A case report) ... p.2648

Digestive System Diseases and Conditions - Sclerosing Cholangitis. Investigators at John Radcliffe Hospital Release New Data on Sclerosing Cholangitis (New Therapeutic Strategies for Primary Sclerosing Cholangitis) ... p.2649

Herpesvirus Diseases and Conditions - Cytomegalovirus. Investigators at Johns Hopkins University Describe Findings in Cytomegalovirus [Role of nucleotide–binding oligomerization domain 1 (NOD1) and its variants in human cytomegalovirus control in vitro and in vivo] ... p.2650

Hematologic Diseases and Conditions - Sickle Cell Anemia. Investigators at Johns Hopkins University Detail Findings in Sickle Cell Anemia (Secondhand Smoke Is an Important Modifiable Risk Factor in Sickle Cell Disease: A Review of the Current Literature and Areas for Future Research) ... p.2651

Hematology - Blood Coagulation Factors. Investigators at Johns Hopkins University Report Findings in Blood Coagulation Factors (Immature endothelial cells initiate endothelin–mediated constriction of newborn arteries) ... p.2652

Oncology - Breast Cancer. Investigators at Karolinska Institute Describe Findings in Breast Cancer (Sequencing–based breast cancer diagnostics as an alternative to routine biomarkers) ... p.2654

Cardiovascular Diseases and Conditions - Thrombosis. Investigators at Karolinska Institute Describe Findings in Thrombosis (Ageing, deep vein thrombosis and male gender predict poor outcome after acute Achilles tendon rupture) ... p.2655

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics. Investigators at Karolinska Institute Report Findings in Anxiolytics Sedatives and Hypnotics (Sedation with Dexmedetomidine or Propofol Impairs Hypoxic Control of Breathing in Healthy Male Volunteers A Nonblinded, Randomized Crossover Study) ... p.2656

Herpesvirus Diseases and Conditions - Cytomegalovirus. Investigators at Kashan University of Medical Sciences Report New Data on Cytomegalovirus (ToRCH “co–infections” are associated with increased risk of abortion in pregnant women) ... p.2657

Oncology - Cancer Epidemiology. Investigators at Kent State University Describe Findings in Cancer Epidemiology (Current depression as a potential barrier to health care utilization in adult cancer survivors) ... p.2658

Developmental Diseases and Conditions - Autism Spectrum Disorders. Investigators at King Saud University Discuss Findings in Autism Spectrum Disorders (High–resolution Snp Genotyping Platform Identified Recurrent And Novel Cnvs In Autism Multiplex Families) ... p.2659
January 14, 2017

Immunology. Investigators at King's College Report New Data on Immunology (T–bet as a key regulator of mucosal immunity) ... p.2661

Genetics - Medical Genetics. Investigators at King's College Zero in on Medical Genetics (Comparative mRNA analysis of behavioral and genetic mouse models of aggression) ... p.2662

Cell Motility. Investigators at Kinki University Discuss Findings in Cell Motility (Different Induction of LPA Receptors by Chemical Liver Carcinogens Regulates Cellular Functions of Liver Epithelial WB–F344 Cells) ... p.2663

Drugs and Therapies - Antiretrovirals. Investigators at Kirby Institute Discuss Findings in Antiretrovirals (The impact of ribavirin plasma concentration on the efficacy of the interferon–sparing regimen, sofosbuvir and ribavirin) ... p.2664

Oncology - Breast Cancer. Investigators at Korea Advanced Institute of Science and Technology (KAIST) Discuss Findings in Breast Cancer (GALNT14 promotes lung–specific breast cancer metastasis by modulating self–renewal and interaction with the lung microenvironment) ... p.2665

Pathology. Investigators at Korea Institute of Toxicology Report Findings in Pathology (A subchronic toxicity study of Radix Dipsaci water extract by oral administration in F344 rats) ... p.2666

Oncology - Breast Cancer. Investigators at Kyung Hee University Detail Findings in Breast Cancer (Synergistic Effect of SH003 and Doxorubicin in Triple–negative Breast Cancer) ... p.2667

Heart Disorders and Diseases - Endocarditis. Investigators at Laval University Discuss Findings in Endocarditis (Management of Loeffler's Endocarditis With Bivalvular Involvement and a FIP1L1/PDGFRα–Negative Mutation)

www.NewsRx.com

... p.2668

Oncology - Acute Leukemia. Investigators at Lung and Blood Institute Have Reported New Data on Acute Leukemia [Novel immunotherapeutic approaches for the treatment of acute leukemia (myeloid and lymphoblastic)] ... p.2668

Musculoskeletal Diseases and Conditions - Bone Resorption. Investigators at Mahidol University Report New Data on Bone Resorption (Expression of osteoclastogenic factor transcripts in osteoblast-like UMR–106 cells after exposure to FGF–23 or FGF–23 combined with parathyroid hormone) ... p.2669

Drugs and Therapies - Human Serum Albumin Therapy. Investigators at Maria Curie–Skłodowska University Detail Findings in Human Serum Albumin Therapy (Determination of binding properties of ampicillin in drug–human serum albumin standard solution using N–vinylpyrrolidone copolymer combined with ... ) ... p.2670

Pharmacology. Investigators at Mashhad University of Medical Sciences Report Findings in Pharmacology (Berberis Vulgaris and Berberine: An Update Review) ... p.2672

Cardiovascular Diseases and Conditions - Thrombosis. Investigators at Mayo Clinic Detail Findings in Thrombosis [Non–infectious thrombosis of the melody((R)) valve: A tale of two cities] ... p.2672

Surgery - Patellalectomy. Investigators at Mayo Clinic Discuss Findings in Patellalectomy (Increased Risk of Postoperative Complications After Total Knee Arthroplasty in Patients With Previous Patellalectomy) ... p.2673
Proteins - Neuropeptides. Investigators at Mayo Clinic Zero in on Neuropeptides (A neurtensin analog blocks cocaine–conditioned place preference and reinstatement) … p.2674

Lung Diseases and Conditions - Asthma. Investigators at McGill University Release New Data on Asthma (Local genotype influences DNA methylation at two asthma–associated regions, 5q31 and 17q21, in a founder effect population) … p.2675

Drugs and Therapies - Genistein Therapy. Investigators at Midwestern University Detail Findings in Genistein Therapy (Dietary Genistein Rescues Reduced Basal Chloride Secretion in Diabetic Jejunum via Sex–Dependent Mechanisms) … p.2676

Oncoology - Carcinomas. Investigators at Milton S. Hershey Medical Center Zero in on Carcinomas (Molecular genetics and targeted therapeutics in biliary tract carcinoma) … p.2677

Viral RNA. Investigators at Monsanto Report Findings in Viral RNA (Corn rootworm–active RNA DvSnf7: Repeat dose oral toxicity assessment in support of human and mammalian safety) … p.2678

Drugs and Therapies - Hesperetin Therapy. Investigators at Nanchang University Detail Findings in Hesperetin Therapy (Inhibitory Effect of Hesperetin and Naringenin on Human UDP–Glucuronosyltransferase Enzymes: Implications for Herb–Drug Interactions) … p.2679

Central Nervous System Diseases and Conditions - Intracranial Vasospasm. Investigators at Nanjing Medical University Describe Findings in Intracranial Vasospasm (Sulforaphane activates the cerebral vascular Nrf2 ARE pathway and suppresses inflammation to attenuate cerebral vasospasm in rat with subarachnoid ...) … p.2680

Oncology - Brain Cancer. Investigators at National Cancer Institute Have Reported New Data on Brain Cancer (Brain tumors in patients with myotonic dystrophy: a population–based study) … p.2682

Mosquito-Borne Diseases - Malaria. Investigators at National Institutes of Health Discuss Findings in Malaria (Cross–Regulation of Two Type I Interferon Signaling Pathways in Plasmacytoid Dendritic Cells Controls Anti–malaria Immunity and Host Mortality) … p.2683

Oncology - Breast Cancer. Investigators at National University Health System Report New Data on Breast Cancer (High–Throughput Mutation Profiling Changes before and 3 Weeks after Chemotherapy in Newly Diagnosed Breast Cancer Patients) … p.2684

Anesthesia. Investigators at National University Report New Data on Anesthesia (The patients' understanding on the status and role of anaesthesiologists) … p.2685

Oncology - Acute Lymphoblastic Leukemia. Investigators at Nihon University Report Findings in Acute Lymphoblastic Leukemia (Adult acute lymphoblastic leukemia with a rare b3a3 type BCR/ABL1 fusion transcript) … p.2686

Drugs and Therapies - Antimicrobials. Investigators at Northwest University Report Findings in Antimicrobials (Antimicrobial mechanism of theaflavins: They target 1–deoxy–D–xylulose 5–phosphate reductoisomerase, the key enzyme of the MEP terpenoid biosynthetic pathway) … p.2687
January 14, 2017

Histopathology. Investigators at Novartis Institute for Biomedical Research Detail Findings in Histopathology (Graphical display of histopathology data from toxicology studies for drug discovery and development: An industry perspective) ... p.2688

Oncology - Colon Cancer. Investigators at Novartis Institute for Biomedical Research Report Findings in Colon Cancer (High–Order Drug Combinations Are Required to Effectively Kill Colorectal Cancer Cells) ... p.2689

Oncology - Follicular Lymphoma. Investigators at Novosibirsk State University Report Findings in Follicular Lymphoma (Activation induced deaminase mutational signature overlaps with CpG methylation sites in follicular lymphoma and other cancers) ... p.2690

Dental Diseases and Conditions - Pulpitis. Investigators at Ohio State University Report Findings in Pulpitis [Pain Reduction in Untreated Symptomatic Irreversible Pulpitis Using Liposomal Bupivacaine (Exparel): A Prospective, Randomized, Double–blind Trial] ... p.2691

Inflammation. Investigators at Ondokuz Mayis University Discuss Findings in Inflammation (Can subphysiological cold application be utilized in excessive dermal scarring prophylaxis and treatment?: A promising hypothetical perspective) ... p.2692

Cardiology. Investigators at Ondokuz Mayis University Report Findings in Cardiology (Pentraxin 3, ischemia–modified albumin, and myeloperoxidase in predicting a cardiac damage in acute carbon monoxide poisoning) ... p.2693

Drugs and Therapies - Pharmacology. Investigators at Osmania University Discuss Findings in Pharmacology (beta–N–oxalyl–L–alpha, beta–diaminopropionic acid induces HRE expression by inhibiting HIF–prolyl hydroxylase–2 in normoxic conditions) ... p.2694

Cardiovascular Diseases and Conditions - Atherosclerosis. Investigators at Peking Union Medical College Hospital Zero in on Atherosclerosis (Intestinal Microbiota Metabolism and Atherosclerosis) ... p.2696

Heart Disorders and Diseases - Heart Failure. Investigators at Policinico University Describe Findings in Heart Failure (The Renal Arterial Resistance Index Predicts Worsening Renal Function in Chronic Heart Failure Patients) ... p.2697

Mycobacterium Infections - Tuberculosis. Investigators at Prince Songkla University Report Findings in Tuberculosis (Evaluation of Proinflammatory Cytokines and Adverse Events in Healthy Volunteers upon Inhalation of Antituberculosis Drugs) ... p.2698

Gram-Positive Bacteria - Staphylococcus aureus. Investigators at Pusan National University Hospital Report Findings in Staphylococcus aureus (Association between Type A blaZ Gene Polymorphism and Cefazolin Inoculum Effect in Methicillin–Susceptible Staphylococcus aureus) ... p.2699

Cardiovascular Diseases and Conditions - Aneurysm. Investigators at Queen Elizabeth Hospital Detail Findings in Aneurysm (Left gastric artery aneurysm rupture: a rare cause of retroperitoneal bleeding: a case report) ... p.2700
Liver Diseases and Conditions - Hepatitis C Virus. Investigators at Queen Mary University Target Hepatitis C Virus (Impact of Safety–Related Dose Reductions or Discontinuations on Sustained Virologic Response in HCV–Infected Patients: Results from the GUARD–C Cohort) … p.2701

Oncology - Breast Cancer. Investigators at RENORBIO Report Findings in Breast Cancer (Clinical and epidemiological profile of women with breast cancer managed in a public referral hospital in northeastern Brazil) … p.2702

Gram-Positive Bacteria - Lactobacillus. Investigators at Research Center Target LactoBacillus (Development and Validation of a Highly Accurate Quantitative Real–Time PCR Assay for Diagnosis of Bacterial Vaginosis) … p.2703

Immune System Diseases and Conditions - HIV/AIDS. Investigators at Rockefeller University Detail Findings in HIV/AIDS (Paired quantitative and qualitative assessment of the replication–competent HIV–1 reservoir and comparison with integrated proviral DNA) … p.2704

Nephrology. Investigators at Roswell Park Cancer Institute Zero in on Nephrology (An RNA interference screen identifies new avenues for nephroprotection) … p.2705

Apoptosis. Investigators at Royal College of Surgeons in Ireland Release New Data on Apoptosis (Endoplasmic reticulum stress–mediated upregulation of miR–29a enhances sensitivity to neuronal apoptosis) … p.2706

Skin Diseases and Conditions - Urticaria. Investigators at Royal Melbourne Hospital Report Findings in Urticaria (An unusual urticarial eruption: Familial cold autoinflammatory syndrome) … p.2707

Sexually Transmitted Diseases and Conditions (STDs) - Syphilis. Investigators at Rush University Report Findings in Syphilis (Risk behaviours of an interrelated syphilis–infected sexual network of men who have sex with men) … p.2708

Oncology. Investigators at SWOG Statistical Center Report New Data on Oncology (Stepwise development of a cancer care delivery research study to evaluate the prevalence of virus infections in cancer patients) … p.2709

Eye Diseases and Conditions - Open–Angle Glaucoma. Investigators at San Bortolo Hospital Have Reported New Data on Open–Angle Glaucoma (Brinzolamide 1%/timolol versus dorzolamide 2%/timolol in the treatment of open–angle glaucoma or ocular hypertension: prospective randomized patient–preference ...) … p.2710

Drugs and Therapies - Chemotherapy. Investigators at Sansom Institute for Health Research Report Findings in Chemotherapy (2016 Updated MASCC/ESMO Consensus Recommendations: Controlling nausea and vomiting with chemotherapy of low or minimal emetic potential) … p.2711

Nutritional and Metabolic Diseases and Conditions - Calcinosis. Investigators at Sapienza–University Detail Findings in Calcinosis (ASIA syndrome, calcinosis cutis and chronic kidney disease following silicone injections. A case–based review) … p.2712

Oncology - Melanoma. Investigators at School of Life Sciences Target Melanoma (TLR–3 stimulation improves anti–tumor immunity elicited by dendritic cell exosome–based vaccines in a murine model of melanoma) … p.2713
January 14, 2017

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Investigators at School of Medicine Detail Findings in Myelodysplastic Syndromes (Establishing a murine xenograft–model for long–term analysis of factors inducing chromosomal instability in myelodysplastic syndrome: Pitfalls and successes) … p.2714

Adrenal Gland Diseases and Conditions - Hyperaldosteronism. Investigators at School of Medicine Discuss Findings in Hyperaldosteronism (Prevalence Of Primary Aldosteronism In An Urban Hypertensive Population) … p.2715

Clinical Research - Clinical Trials and Studies. Investigators at Science Institute Describe Findings in Clinical Trials and Studies (General practice patients treated for substance use problems: a cross–national observational study in Belgium) … p.2716

Essential Amino Acids. Investigators at Scripps Research Institute Target Essential Amino Acids (Protein Arginine Methylation and Citrullination in Epigenetic Regulation) … p.2717

Oncology - Liver Cancer. Investigators at Second Military Medical University Report Findings in Liver Cancer (Practice guidelines for the pathological diagnosis of primary liver cancer: 2015 update) … p.2717

Oncology - Melanoma. Investigators at Seoul National University Describe Findings in Melanoma [Inhibition of tyrosinase activity and melanin production by the chalcone derivative 1–(2–cyclohexylmethoxy–6–hydroxy–phenyl)–3(4–hydroxymethyl–phenyl)–propenone] … p.2719

Heart Disorders and Diseases - Heart Attack. Investigators at Seoul National University Discuss Findings in Heart Attack (The effect of atmosphere temperature on out–of–hospital cardiac arrest outcomes) … p.2720

www.NewsRx.com

Oncology - Colon Cancer. Investigators at Seoul National University Hospital Report New Data on Colon Cancer (Clinical Implication of Anti–Angiogenic Effect of Regorafenib in Metastatic Colorectal Cancer) … p.2721

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators at Shaheed Beheshti University of Medical Sciences Release New Data on Type 2 Diabetes (Oxidative stress, type 2 diabetes and vitamin D: past, present and future) … p.2722

Ethanol. Investigators at Shandong University Describe Findings in Ethanol (Corosolic acid protects hepatocytes against ethanol–induced damage by modulating mitogen–activated protein kinases and activating autophagy) … p.2724

Biotechnology - Xenografts. Investigators at Shandong University Report Findings in Xenografts (Riccardin D–N induces lysosomal membrane permeabilization by inhibiting acid sphingomyelinase and interfering with sphingomyelin metabolism in vivo) … p.2725

Drugs and Therapies - Drug Delivery Systems. Investigators at Sharif University of Technology Have Reported New Data on Drug Delivery Systems (Exploring Cellular Interactions of Liposomes Using Protein Corona Fingerprints and Physicochemical Properties) … p.2727
Peptide Proteins - Proinsulin. Investigators at Shiga University of Medical Sciences Discuss Findings in Proinsulin (MicroRNA148b–3p inhibits mTORC1–dependent apoptosis in diabetes by repressing TNFR2 in proximal tubular cells) … p.2728

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators at Sichuan University Release New Data on Type 2 Diabetes (Factors that Affect Pancreatic Islet Cell Autophagy in Adult Rats: Evaluation of a Calorie–Restricted Diet and a High–Fat Diet) … p.2729

Enzymes and Coenzymes - Peptide Hydrolases. Investigators at Soochow University Report Findings in Peptide Hydrolases (Cathepsin L upregulation–induced EMT phenotype is associated with the acquisition of cisplatin or paclitaxel resistance in A549 cells) … p.2730

Drugs and Therapies - Chemotherapy. Investigators at South China Normal University Describe Findings in Chemotherapy (Theranostic Upconversion Nanobeacons for Tumor mRNA Ratiometric Fluorescence Detection and Imaging–Monitored Drug Delivery) … p.2731

Heart Disorders and Diseases - Atrial Fibrillation. Investigators at St. Louis College of Pharmacy Detail Findings in Atrial Fibrillation (Practical Considerations for the Use of Direct Oral Anticoagulants in Patients With Atrial Fibrillation) … p.2732

Cardiovascular Diseases and Conditions - Aneurysm. Investigators at St. Michael's Hospital Report Findings in Aneurysm [The wire anchor loop traction (WALT) maneuver] … p.2733

Laboratory Research. Investigators at Stanford University Detail Findings in Laboratory Research (Directed evolution using dCas9–targeted somatic hypermutation in mammalian cells) … p.2734

Connective Tissue Cells. Investigators at Stanford University Discuss Findings in Connective Tissue Cells (Biochemically engineered stromal cell–derived factor 1–alpha analog increases perfusion in the ischemic hind limb) … p.2735

Drugs and Therapies - Chemotherapy. Investigators at State University of Campinas Describe Findings in Chemotherapy (Medicinal herbs for cancer patients undergoing chemotherapy in a Brazilian hospital – An exploratory study) … p.2736

Digestive System Diseases and Conditions - Peritonitis. Investigators at Sun Yat Sen University Discuss Findings in Peritonitis (Risk Factors For Early–onset Peritonitis In Southern Chinese Peritoneal Dialysis Patients) … p.2737

Oncology - Nasopharyngeal Carcinoma. Investigators at Sun Yat-sen University Cancer Center Have Reported New Data on Nasopharyngeal Carcinoma (Morphine, a potential antagonist of cisplatin cytotoxicity, inhibits cisplatin–induced apoptosis and suppression of tumor growth in ...) … p.2738

Oncology - Breast Cancer. Investigators at Sungkyunkwan University Detail Findings in Breast Cancer (Comparative analysis of BRCA1 and BRCA2 variants of uncertain significance in patients with breast cancer: a multifactorial probability–based model versus ACMG standards ...) … p.2739
Heart Disorders and Diseases - Ebstein Anomaly. Investigators at Sungkyunkwan University Report Findings in Ebstein Anomaly (Natural Course of Adult Ebstein Anomaly When Treated according to Current Recommendation) … p.2740

Pharmacotherapy. Investigators at Sungkyunkwan University School of Medicine Release New Data on Pharmacotherapy (Persistence and compliance with medication management in the treatment of overactive bladder) … p.2741

Cardiovascular Diseases and Conditions - Air Embolism. Investigators at Swedish Neuroscience Institute Report Findings in Air Embolism (Venous air embolus during prone cervical spine fusion: case report) … p.2741

Algorithms. Investigators at Taipei Veterans General Hospital Describe Findings in Algorithms (Diagnostic algorithm for detection of targetable driver mutations in lung adenocarcinomas: Comprehensive analyses of 205 cases with immunohistochemistry, …) … p.2742

Health and Medicine - Spinal Research. Investigators at Tel Aviv Medical Center & School of Medicine Describe Findings in Spinal Research (Predictors for surgical complications of en bloc resections in the spine: review of 220 cases treated by the same team) … p.2743

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Investigators at Tel Aviv University Describe Findings in Inflammatory Bowel Disease (Biosimilars in Inflammatory Bowel Disease: Facts and Fears of Extrapolation) … p.2745

Oncology - Oral Squamous Cell Carcinoma. Investigators at Tokyo Medical and Dental University Discuss Findings in Oral Squamous Cell Carcinoma (Exosomal microRNA miR–1246 induces cell motility and invasion through the regulation of DENND2D in oral squamous cell carcinoma) … p.2746

Drugs and Therapies - Ketoprofen Therapy. Investigators at Tokyo University of Science Report Findings in Ketoprofen Therapy (Dibucaine inhibits ketoprofen photodegradation via a mechanism different from that of antioxidants) … p.2747

Urogenital Diseases and Conditions - Cryptorchidism. Investigators at Tottori University School of Medicine Release New Data on Cryptorchidism (Post–fertilization effect of bilateral primary testicular damage induced by unilateral cryptorchidism in the rat model) … p.2748

Clinical Research - Clinical Research in Anesthesia. Investigators at Trinity College Detail Findings in Clinical Research in Anesthesia (The preoperative use of field tests of exercise tolerance to predict postoperative outcome in intra–abdominal surgery: a systematic review) … p.2749

Heart Disorders and Diseases - Dilated Cardiomyopathy. Investigators at University Children's Hospital Report Findings in Dilated Cardiomyopathy [Pitfalls in Echocardiography: Coarctation of the Aorta Presenting as Dilated Cardiomyopathy (DCM)] … p.2750

Cardiovascular Diseases and Conditions - Aneurysm. Investigators at University Health Network Describe Findings in Aneurysm (Intra–aneurysmal hemodynamics: evaluation of pCONus and pCANvas bifurcation aneurysm devices using DSA optical flow imaging) … p.2752

Anaphylactic Shock. Investigators at University Hospital Describe Findings in Anaphylactic Shock (Intraoperative anaphylactic shock to nefopam) … p.2753

Cardiovascular Diseases and Conditions - Thromboangiitis Obliterans. Investigators at University Hospital Discuss Findings in Thromboangiitis Obliterans [Efficacy of bosentan in patients with refractory thromboangiitis obliterans (Buerger disease) A case series and review of the literature] … p.2753

Central Nervous System Diseases and Conditions - Epilepsy. Investigators at University Hospital Report Findings in Epilepsy (Low–grade epilepsy–associated neuroepithelial tumours – the 2016 WHO classification) … p.2755

Autoimmune Diseases and Conditions - Multiple Sclerosis. Investigators at University Hospital Report Findings in Multiple Sclerosis (Vestibular and ocular motor function prior to and after therapeutic apheresis with small plasmalfilter in multiple sclerosis) … p.2756

Neuropathy. Investigators at University Hospital Report Findings in Neuropathy (HSMNR belongs to the most frequent types of hereditary neuropathy in the Czech Republic and is twice more frequent than HMSNL) … p.2756

Transplant Medicine - Heart Transplants. Investigators at University Hospital Report New Data on Heart Transplants (Design of the DRAGET Study: a multicentre controlled diagnostic study to assess the detection of acute rejection in patients with heart transplant by means of T2 …) … p.2757

Cytometry. Investigators at University Hospital Target Cytometry (Flow cytometry in hematological nonmalignant disorders) … p.2758

Oncology - Liver Cancer. Investigators at University Hospital Zero in on Liver Cancer (Radiofrequency ablation of hepatocellular carcinoma: Mono or multipolar?) … p.2759

Cardiovascular Diseases and Conditions - Hypertension. Investigators at University of Alabama Report New Data on Hypertension (Urinary sodium excretion predicts blood pressure response to spironolactone in patients with resistant hypertension independent of aldosterone status) … p.2760

Life Science Research. Investigators at University of Alberta Have Reported New Data on Life Science Research (Does School–Based Health Promotion Affect Physical Activity on Weekends? And, Does It Reach Those Students Most in Need of Health Promotion?) … p.2761

Oncology - Prostate Cancer. Investigators at University of Arizona College of Medicine Report New Data on Prostate Cancer (Prostate Cancer–Associated Disseminated Intravascular Coagulation with Excessive Fibrinolysis Treated with Degarelix) … p.2762

Oncology - Small Cell Lung Cancer. Investigators at University of Barcelona Discuss Findings in Small Cell Lung Cancer (LincRNA–p21 Impacts Prognosis in Resected Non–Small Cell Lung Cancer Patients through Angiogenesis Regulation) … p.2763
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.
Investigators at University of Bielsko Biala Discuss Findings in Type 2 Diabetes (Independent Factors of Changes of Ankle–Brachial Index in Peripheral Arterial Occlusive Disease in Elderly Patients with or without Diabetes) … p.2764

Hormones. Investigators at University of Calgary Report Findings in Hormones (Two light–activated neuroendocrine circuits arising in the eye trigger physiological and morphological pigmentation) … p.2766

Oncology - Non-Small Cell Lung Cancer.
Investigators at University of California School of Medicine Discuss Findings in Non–Small Cell Lung Cancer (Surgical Management of Advanced Non–Small Cell Lung Cancer Is Decreasing But Is Associated With Improved Survival) … p.2767

Immune System Diseases and Conditions - HIV/AIDS.

Pediatrics - Adolescent Medicine.
Investigators at University of California Report Findings in Adolescent Medicine (Teen Preferences for Clinic–Based Behavior Screens: Who, Where, When, and How?) … p.2769

Diseases and Conditions - Basilar Aneurysm.
Investigators at University of California Report Findings in Basilar Aneurysm (Treatment of wide–necked basilar tip aneurysm not amenable to Y–stenting using the PulseRider device) … p.2770

Genetics - Human Genetics.
Investigators at University of California Report Findings in Human Genetics (Colocalization of GWAS and eQTL Signals Detects Target Genes) … p.2771

Skin Diseases.
Investigators at University of California Report Findings in Skin Diseases (Therapeutic RNAi robed with ionic liquid moieties as a simple, scalable prodrug platform for treating skin disease) … p.2772

Transfusion Medicine - Blood Transfusion.
Investigators at University of Chicago Detail Findings in Blood Transfusion (Endothelin Receptor A Antagonism Prevents Damage to Glycogen–Rich Placental Cells Following Uterine Ischemia–Reperfusion in the Rat) … p.2773

Oncology - Colon Cancer.
Investigators at University of Chicago Release New Data on Colon Cancer (TET–catalyzed 5–hydroxymethylcytosine regulates gene expression in differentiating colonocytes and colon cancer) … p.2774

Drugs and Therapies - Central Nervous System Agents.
Investigators at University of Coimbra Report Findings in Central Nervous System Agents (A Rapid and Sensitive HPLC–DAD Assay to Quantify Lamotrigine, Phenytoin and Its Main Metabolite in Samples of Cultured HepaRG Cells) … p.2775

Nutritional and Metabolic Diseases and Conditions - Obesity.
Investigators at University of Colorado Detail Findings in Obesity (Characterization of Childhood Obesity and Behavioral Factors) … p.2776
Transplant Medicine - Liver Transplants. Investigators at University of Hong Kong Release New Data on Liver Transplants (Circulating Fibroblast Growth Factor 21 Is A Sensitive Biomarker for Severe Ischemia/reperfusion Injury in Patients with Liver Transplantation) ... p.2783

Drugs and Therapies - Central Nervous System Agents. Investigators at University of Illinois Detail Findings in Central Nervous System Agents (Exploring Hallucinogen Pharmacology and Psychedelic Medicine with Zebrafish Models) ... p.2784

Dicarboxylic Acids. Investigators at University of Illinois Have Reported New Data on Dicarboxylic Acids (Fumarate–Mediated Persistence of Escherichia coli against Antibiotics) ... p.2785

Ischemia. Investigators at University of Ioannina Report New Data on Ischemia (The diagnostic yield of transesophageal echocardiography in patients with cryptogenic cerebral ischaemia: a meta–analysis) ... p.2786

Central Nervous System Diseases and Conditions - Cerebral Infarction. Investigators at University of Malaya Detail Findings in Cerebral Infarction (Cerebral infarction pattern in tuberculous meningitis) ... p.2787

Mycobacterium Infections - Tuberculosis. Investigators at University of Manitoba Describe Findings in Tuberculosis [IFN–gamma promoter polymorphisms do not affect QuantIFERON((R)) TB Gold In–Tube test results in a Canadian population] ... p.2788

Mycobacterium Infections - Tuberculosis. Investigators at University of Massachusetts Report Findings in Tuberculosis (Structural and Genetic Analyses of the Mycobacterium tuberculosis Protein Kinase B Sensor Domain Identify a Potential Ligand–binding Site) ... p.2789
Musculoskeletal Diseases and Conditions
- Muscular Dystrophy. Investigators at University of Massachusetts School of Medicine Have Reported New Data on Muscular Dystrophy (CRISPR/dCas9–mediated Transcriptional Inhibition Ameliorates the Epigenetic Dysregulation at D4Z4 and Represses DUX4–fl in FSH ...) … p.2790

Blood Pressure. Investigators at University of Melbourne Zero in on Blood Pressure (Nocturnal indicators of increased cardiovascular risk in depressed adolescent girls) … p.2791

Oncology - Colon Cancer. Investigators at University of Michigan Detail Findings in Colon Cancer (Genetic predisposition to colorectal cancer: Implications for treatment and prevention) … p.2792

Naphthaleneacetic Acids. Investigators at University of Michigan Report Findings in Naphthaleneacetic Acids (Mimicking natural systems: Changes in behavior as a result of dynamic exposure to naproxen) … p.2793

Lung Diseases and Conditions - Asthma. Investigators at University of Milan Discuss Findings in Asthma (The lag–time approach improved drug–outcome association estimates in presence of protopathic bias) … p.2794

Medicare and Medicaid. Investigators at University of Mississippi Describe Findings in Medicare and Medicaid (Comparison of Pharmacist and Physician Managed Annual Medicare Wellness Services) … p.2795

Heart Disorders and Diseases - Heart Failure. Investigators at University of Mississippi Report Findings in Heart Failure (Presence and Implication of Temporal Nonuniformity of Early Diastolic Left Ventricular Wall Expansion in Patients With Heart Failure) … p.2796

Nephrology. Investigators at University of Montreal Describe Findings in Nephrology (Acute kidney injury induces hallmarks of polycystic kidney disease) … p.2797

Chemistry - Biochemistry. Investigators at University of Nice Hospital Center Detail Findings in Biochemistry (How does metabolism affect cell death in cancer?) … p.2798

Clinical Research - Clinical Trials and Studies. Investigators at University of Otago Describe Findings in Clinical Trials and Studies (Combination Nicotine Metered Dose Inhaler and Nicotine Patch for Smoking Cessation: A Randomized Controlled Trial) … p.2799

Adipogenesis. Investigators at University of Ottawa Detail Findings in Adipogenesis (The Anti–Adipogenic Effect of Peripheral Blood Mononuclear Cells is Absent with PCSK9 Loss–of–Function Variants) … p.2800

Science - Separation Science. Investigators at University of Pardubice Report Findings in Separation Science (Determination of selected fatty acids in dried sweat spot using gas chromatography with flame ionization detection) … p.2801

Gram-Negative Bacteria - Pseudomonas aeruginosa. Investigators at University of Paris–Sud Report Findings in Pseudomonas aeruginosa (Actin activates Pseudomonas aeruginosa ExoY nucleotidyl cyclase toxin and ExoY–like effector domains from MARTX toxins) … p.2802

Oncology - Lymphoma. Investigators at University of Pittsburgh Medical Center Report New Data on Lymphoma (Flow Cytometric Evaluation of Double/Triple Hit Lymphoma) … p.2803
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Obesity and Diabetes. Investigators at University of Queensland Report Findings in Obesity and Diabetes (Epicardial Adipose Tissue Volume and Left Ventricular Myocardial Function Using 3-Dimensional Speckle Tracking Echocardiography) … p.2804

Oncology - Colon Cancer. Investigators at University of Regensburg Detail Findings in Colon Cancer (Physical Activity and Risk of Colon Cancer in Diabetic and Nondiabetic US Adults) … p.2805

Heart Disorders and Diseases - Dilated Cardiomyopathy. Investigators at University of Rochester School of Medicine and Dentistry Release New Data on Dilated Cardiomyopathy (Cardiac Gab1 deletion leads to dilated cardiomyopathy associated with mitochondrial damage and cardiomyocyte apoptosis) … p.2806

Biotechnology - Genomics. Investigators at University of Sao Paulo Describe Findings in Genomics (Methylation status of homeobox genes in common human cancers) … p.2807

Hormones - Estradiol Congeners. Investigators at University of Sydney Describe Findings in Estradiol Congeners (Progressive Temporal Change in Serum SHBG, But Not in Serum Testosterone or Estradiol, Is Associated With Bone Loss and Incident Fractures in Older Men: The Concord …) … p.2808

Immunology - Granulocytes. Investigators at University of Texas Medical Branch Detail Findings in Granulocytes (Cytokine–Induced Glucocorticoid Resistance from Eosinophil Activation: Protein Phosphatase 5 Modulation of Glucocorticoid Receptor Phosphorylation and Signaling) … p.2809

www.NewsRx.com

Oncology - Breast Cancer. Investigators at University of Texas Report Findings in Breast Cancer (Interventions to Manage Uncertainty and Fear of Recurrence in Female Breast Cancer Survivors: A Review of the Literature) … p.2810

Oncology - Glioblastomas. Investigators at University of Texas Report Findings in Glioblastomas (The Cytoskeletal Adapter Protein Spinophilin Regulates Invadopodia Dynamics and Tumor Cell Invasion in Glioblastoma) … p.2811

Hearing Diseases and Conditions - Tinnitus. Investigators at University of Texas Report Findings in Tinnitus (Acute high-intensity noise induces rapid Arc protein expression but fails to rapidly change GAD expression in amygdala and hippocampus of rats: Effects of treatment with …) … p.2812

Oncology - Liver Cancer. Investigators at University of Texas Southwestern Medical Center Discuss Findings in Liver Cancer (Predictors of adequate ultrasound quality for hepatocellular carcinoma surveillance in patients with cirrhosis) … p.2815

Drugs and Therapies - Heparin Therapy. Investigators at University of Tubingen Report Findings in Heparin Therapy (Design of intelligent chitosan/heparin hollow microcapsules for drug delivery) … p.2816

Oncology - Prostate Cancer. Investigators at University of Turin Release New Data on Prostate Cancer (Retrospective study testing next generation sequencing of selected cancer–associated genes in resected prostate cancer) … p.2817
January 14, 2017

Biomedical Engineering - Regenerative Medicine. Investigators at University of Washington Have Reported New Data on Regenerative Medicine (Silent IL2RG Gene Editing in Human Pluripotent Stem Cells) ... p.2818

Health and Medicine - Addiction Research. Investigators at University of Wisconsin School of Medicine and Public Health Release New Data on Addiction Research (Identifying effective intervention components for smoking cessation: a factorial screening experiment) ... p.2819

Cardiovascular Diseases and Conditions - Hypertension. Investigators at University of Yaounde Discuss Findings in Hypertension (Distribution and patterning of noncommunicable disease risk factors in indigenous Mbororo and non–autochthonous populations in Cameroon: cross sectional study) ... p.2820

Lung Diseases and Conditions - Pneumonia. Investigators at Veterans Affairs Medical Center Describe Findings in Pneumonia (Evaluation of a protocol to optimize duration of pneumonia therapy at hospital discharge) ... p.2821

Drugs and Therapies - Central Nervous System Depressants. Investigators at Wake Forest University Discuss Findings in Central Nervous System Depressants ($1.8 Million and counting: how volatile agent education has decreased our spending $1000 per day) ... p.2822

Women's Health - Obstetrics and Gynecology. Investigators at Washington University Report Findings in Obstetrics and Gynecology (Adult Comorbidity Evaluation 27 score as a predictor of survival in endometrial cancer patients) ... p.2823

www.NewsRx.com

Epidemiology. Investigators at Wayne State University Discuss Findings in Epidemiology (High–throughput allele–specific expression across 250 environmental conditions) ... p.2824

Heart Disorders and Diseases - Heart Failure. Investigators at Wayne State University Report Findings in Heart Failure (Results of a Hospital–Based Palliative Care Intervention for Patients With an Acute Exacerbation of Chronic Heart Failure) ... p.2825

Immune System Diseases and Conditions - HIV/AIDS. Investigators at Weizmann Institute of Science Detail Findings in HIV/AIDS [Heat Shock Protein 90 Facilitates Latent HIV Reactivation through Maintaining the Function of Positive Transcriptional Elongation Factor b (p–TEFb) under Proteasome ...] ... p.2826

Adenocarcinomas. Investigators at West China Hospital Target Adenocarcinomas (Diagnostic value of thyroid transcription factor–1 for pleural or other serous metastases of pulmonary adenocarcinoma: a meta–analysis) ... p.2828

Carrier Proteins - Iron-Binding Proteins. Investigators at Xiamen University Zero in on Iron–Binding Proteins (Biomineralization–Inspired Synthesis of Copper Sulfide–Ferritin Nanocages as Cancer Theranostics) ... p.2829

Enzymes and Coenzymes - One-Carbon Group Transferases. Investigators at Yale University Report Findings in One–Carbon Group Transferases (Methyltransferase–like protein 16 binds the 3 '–terminal triple helix of MALAT1 long noncoding RNA) ... p.2830

Proteins - Basic-Leucine Zipper Transcription Factors. Investigators at Yang Ming National University Describe Findings in Basic–Leucine Zipper Transcription Factors (The SHP2–ERK2 signaling pathway regulates branched I antigen formation by controlling the binding of...
January 14, 2017

CCAAT/enhancer binding protein ...) ... p.2831

Cardiology. Investigators at Yang Ming National University Detail Findings in Cardiology (Asymmetric dimethylarginine predicts the risk of contrast–induced acute kidney injury in patients undergoing cardiac catheterization) ... p.2832

Clinical Research - Clinical Trials and Studies. Investigators at Yonsei University Discuss Findings in Clinical Trials and Studies (A retrospective observational study on the treatment outcomes of 26 patients with spinal cord astrocytoma including two cases of malignant transformation) ... p.2833

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators at Zhejiang Chinese Medical University Detail Findings in Type 2 Diabetes (Urinary Metabolomic Profiling in Zucker Diabetic Fatty Rats with Type 2 Diabetes Mellitus Treated with Glimepiride, Metformin, and Their Combination) ... p.2834

Neurodegenerative Diseases and Conditions. Investigators from Aarhus University Have Reported New Data on Neurodegenerative Diseases and Conditions (Current status of treating neurodegenerative disease with induced pluripotent stem cells) ... p.2835

Oncology - Pancreatic Cancer. Investigators from Academy of Military Medical Sciences Release New Data on Pancreatic Cancer (Numb/Notch signaling pathway modulation enhances human pancreatic cancer cell radiosensitivity) ... p.2836

Personalized Medicine. Investigators from Aetna Release New Data on Personalized Medicine (Payer view of personalized medicine) ... p.2837

www.NewsRx.com

Lipoproteins. Investigators from Aix–Marseille University Zero in on Lipoproteins (A Combination of Single–Nucleotide Polymorphisms Is Associated with Interindividual Variability in Cholecalciferol Bioavailability in Healthy Men) ... p.2838

Blood Diseases and Conditions - Sepsis. Investigators from Alice Springs Hospital Report New Data on Sepsis (Total and unbound ceftriaxone pharmacokinetics in critically ill Australian Indigenous patients with severe sepsis) ... p.2839

Oncology - Colon Cancer. Investigators from Annamalai University Zero in on Colon Cancer (Biochemical and molecular mechanisms underlying the chemopreventive efficacy of rosmarinic acid in a rat colon cancer) ... p.2840

Cystic Fibrosis. Investigators from Autonomous University Release New Data on Cystic Fibrosis (The+1858 C/T Polymorphism in the PTPN22 Gene Is Associated with Cystic Fibrosis Patients in Northeast Mexico) ... p.2841

Heart Disorders and Diseases - Heart Disease. Investigators from Baylor University Zero in on Heart Disease (Causes of Death and Heart Weights in Adults at Necropsy in a Tertiary Texas Hospital, 2013–2015) ... p.2842

Chromaffin Cells. Investigators from Beijing Institute of Radiation Medicine Zero in on Chromaffin Cells (Ferulic acid prevents LPS–induced up–regulation of PDE4B and stimulates the cAMP/CREB signaling pathway in PC12 cells) ... p.2843

January 14, 2017

Ischemia. Investigators from Boston University Have Reported New Data on Ischemia (Recurrent Lower–Extremity Compartment Syndrome after Four–Compartment Fasciotomy Secondary to Acute Limb Ischemia) ... p.2845

Proteins - DNA-Binding Proteins. Investigators from Boston University Have zeroed in on DNA–Binding Proteins (MEK and TAK1 Regulate Apoptosis in Colon Cancer Cells with KRAS–Dependent Activation of Proinflammatory Signaling) ... p.2846

RNA Viruses - Respiratory Syncytial Viruses. Investigators from Brigham and Women's Hospital Target Respiratory Syncytial Viruses (Pharmacist–driven respiratory syncytial virus prophylaxis stewardship service in a neonatal intensive care unit) ... p.2847

Health and Medicine - Emergency Medicine. Investigators from Brigham and Women's Hospital Zero in on Emergency Medicine (An ED pilot intervention to facilitate outpatient acute care for cancer patients) ... p.2848

Heart Disorders and Diseases - Heart Disease. Investigators from Brigham and Women's Hospital Zero in on Heart Disease (Long–term outcomes after catheter ablation of ventricular tachycardia in patients with and without structural heart disease) ... p.2849

Hormones. Investigators from Brown University Release New Data on Hormones (The metabolic sensor Sirt1 and the hypothalamus: Interplay between peptide hormones and pro–hormone convertases) ... p.2850

Oncology - Breast Cancer. Investigators from Cancer Research Institute Have Reported New Data on Breast Cancer (Global and gene specific DNA methylation in breast cancer cells was not affected during epithelial–to–mesenchymal transition in vitro) ... p.2852

www.NewsRx.com

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Investigators from Capital Medical University Target Alzheimer Disease (Treatment of epilepsy for people with Alzheimer's disease) ... p.2853

Heart Disorders and Diseases - Ventricular Fibrillation. Investigators from Captain James A. Lovell Federal Health Care Center Have Reported New Data on Ventricular Fibrillation (Adverse postresuscitation myocardial effects elicited by buffer–induced alkalemia ameliorated by NHE–1 inhibition in a rat ...) ... p.2854

Lung Diseases and Conditions - Asbestosis. Investigators from Cardno ChemRisk Release New Data on Asbestosis (Anthophyllite asbestos: state of the science review) ... p.2855

Chalones. Investigators from Central Drug Research Institute Release New Data on Chalones (Development of Leishmania donovani stably expressing DsRed for flow cytometry–based drug screening using chalcone thiazolyl–hydrazone as a new antileishmanial ...) ... p.2856

Oncology - Breast Cancer. Investigators from China Pharmaceutical University Report New Data on Breast Cancer (Transferrin–inspired vehicles based on pH–responsive coordination bond to combat multidrug–resistant breast cancer) ... p.2857

Enzymes and Coenzymes - Cholinesterases. Investigators from Chinese Academy of Sciences Release New Data on Cholinesterases (New perspectives for multi–level regulations of neuronal acetylcholinesterase by dioxins) ... p.2858

January 14, 2017

Down–Regulates Tight Junction Proteins to ...] ... p.2859

Blood Diseases and Conditions - Sepsis.
Investigators from Chinese University of Hong Kong Have Reported New Data on Sepsis (Regulation of Circulating Hematopoietic Stem/Progenitor Cells in Preterm Infants with Septicemia) ... p.2861

Oncology - Cervical Cancer.
Investigators from Chinese University of Hong Kong Release New Data on Cervical Cancer (Examining the Cervical Screening Behaviour of Women Aged 50 or above and Its Predicting Factors: A Population–Based Survey) ... p.2862

Chalcogens.
Investigators from Chosun University Zero in on Chalcogens [Isorhamnetin Inhibits Reactive Oxygen Species–Dependent Hypoxia Inducible Factor (HIF)1 alpha a Accumulation] ... p.2863

Lipopolysaccharides.
Investigators from Chung Ang University Target Lipopolysaccharides (Apocynin inhibits Toll–like receptor–4–mediated activation of NF–kappa B by depressing the Akt and mTOR pathways) ... p.2864

Oncology - T-Cell Lymphoma.
Investigators from City of Hope National Medical Center Report New Data on T–Cell Lymphoma [Long–term follow–up and management of small and medium–sized CD4(+) T cell lymphoma and CD8(+) lymphoid proliferations of acral sites: a multicenter ...] ... p.2865

Cardiovascular Diseases and Conditions - Hypertension.
Investigators from Cleveland Clinic Release New Data on Hypertension (Impact of Sleep–Disordered Breathing Treatment on Patient Reported Outcomes in a Clinic–Based Cohort of Hypertensive Patients) ... p.2866

Cardiovascular Diseases and Conditions - Thrombosis.
Investigators from Columbia University Have Reported New Data on Thrombosis (Impact of time to treatment on the effects of bivalirudin vs. glycoprotein IIb/IIIa inhibitors and heparin in patients undergoing primary percutaneous coronary ...) ... p.2867

Cardiovascular Research.
Investigators from Comenius University Report New Data on Cardiovascular Research (Effects of Necrostatin–1, an Inhibitor of Necroptosis, and its Inactive Analogue Nec–1i on Basal Cardiovascular Function) ... p.2868

Microtubule Proteins.

Drugs and Therapies - Antibiotics.
Investigators from Curtin University Target Antibiotics (Exploiting Interkingdom Interactions for Development of Small–Molecule Inhibitors of Candida albicans Biofilm Formation) ... p.2869

Biotechnology - Gene Therapy.
Investigators from DZHK German Center for Cardiovascular Research Report New Data on Gene Therapy (Antiarrhythmic gene therapy – will biologics replace catheters, drugs and devices?) ... p.2870

Gram-Negative Bacteria - Helicobacter pylori.
Investigators from DZIF German Center for Infection Research Target Helicobacter pylori (Systematic site–directed mutagenesis of the Helicobacter pylori CagL protein of the Cag type IV secretion system identifies novel functional domains) ... p.2871
January 14, 2017

Gender and Health. Investigators from Department of Nuclear Medicine Have Reported New Data on Gender and Health (Impact of Gender on the Prognostic Value of Coronary Artery Calcium in Symptomatic Patients With Normal Single–Photon Emission Computed Tomography ...) ... p.2872

Oncology - Neuroblastomas. Investigators from Department of Pediatrics Target Neuroblastomas (MicroRNA–21 promotes the proliferation and invasion of neuroblastoma cells through targeting CHIA) ... p.2873

Nutritional and Metabolic Diseases and Conditions - Protein Deficiency. Investigators from Dokkyo Medical University Zero in on Protein Deficiency (StarD7 Protein Deficiency Adversely Affects the Phosphatidylcholine Composition, Respiratory Activity, and Cristae Structure of Mitochondria) ... p.2874

Patient Care. Investigators from Duke University Target Patient Care (Impact of remote monitoring on clinical events and associated health care utilization: A nationwide assessment) ... p.2875

Clinical Trials and Studies - Pre–Trial Research. Investigators from Emory University Zero in on Pre–Trial Research (The CRF System as a Therapeutic Target for Neuropsychiatric Disorders) ... p.2876

Oncology - Pancreatic Cancer. Investigators from Erasmus University Target Pancreatic Cancer (Intraperitoneal mesh prosthesis metastasis from pancreatic cancer, after laparoscopic hernia repair) ... p.2877

Cardiovascular Diseases. Investigators from Erasmus University Release New Data on Cardiovascular Diseases (Von Willebrand Factor, ADAMTS13, and the Risk of Mortality The Rotterdam Study) ... p.2878

Oncology - Cancer Risk. Investigators from Erasmus University Target Cancer Risk (Value of cyclin A immunohistochemistry for cancer risk stratification in Barrett esophagus surveillance A multicenter case–control study) ... p.2879

Oncology - Carcinomas. Investigators from Erasmus University Target Carcinomas (Survival in Patients With Primary Metastatic Renal Cell Carcinoma Treated With Sunitinib With or Without Previous Cytoreductive Nephrectomy: Results From a Population–based Registry) ... p.2880

Clinical Research - Clinical Trials and Studies. Investigators from Eye Institute Zero in on Clinical Trials and Studies [Results of the 2–Year Ocriplasmin for Treatment for Symptomatic Vitreomacular Adhesion Including Macular Hole (OASIS) Randomized Trial] ... p.2881

Cardiovascular Diseases and Conditions - Atherosclerosis. Investigators from FIOCRUZ Target Atherosclerosis (Chronic LPSF/GQ–02 treatment attenuates inflammation and atherosclerosis development in LDLr–/– mice) ... p.2883

Chemistry. Investigators from Federal University Target Chemistry (Analysis of tricyclic antidepressants in human plasma using online restricted access molecularly imprinted solid phase extraction followed by direct mass spectrometry ...) ... p.2884

Clinical Research - Clinical Trials and Studies. Investigators from Foothills Medical Center Zero in on Clinical Trials and Studies [Infarct in a New Territory After Treatment Administration in the ESCAPE Randomized Controlled Trial (Endovascular Treatment for Small Core and Anterior ...] ... p.2885
Oncology - Melanoma. Investigators from Fourth Military Medical University Have Reported New Data on Melanoma (Expression of MicroRNA–301a and its Functional Roles in Malignant Melanoma) … p.2886

Oncology - Lymphoma. Investigators from Fred Hutchinson Cancer Research Center Report New Data on Lymphoma (Quality of life results from a phase 3 study of brentuximab vedotin consolidation following autologous haematopoietic stem cell transplant for persons with ...) … p.2887

Herpesvirus Diseases and Conditions - Cytomegalovirus. Investigators from Free University Target Cytomegalovirus (Primary maternal cytomegalovirus infections: accuracy of fetal ultrasound for predicting sequelae in offspring) … p.2889

Heart Disorders and Diseases - Heart Failure. Investigators from Fukushima Medical University Target heart failure (Associations With Eicosapentaenoic Acid to Arachidonic Acid Ratio and Mortality in Hospitalized Heart Failure Patients) … p.2893

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from Geisinger Health System Target obesity (Depression, its Comorbidities and Treatment, and Childhood Body Mass Index Trajectories) … p.2894

Cell Proliferation. Investigators from General Hospital Have Reported New Data on Cell Proliferation (Inhibitor of DNA–binding 1 promotes endothelial progenitor cell proliferation and migration by suppressing E2–2 through the helix–loop–helix domain) … p.2895

Autoinflammatory Diseases and Conditions - Familial Mediterranean Fever. Investigators from Ghent University Report New Data on Familial Mediterranean Fever (Familial Mediterranean fever mutations lift the obligatory requirement for microtubules in Pyrin inflammasome activation) … p.2896

Oncology - Bladder Cancer. Investigators from Gifu University Zero in on Bladder Cancer (A Novel Role of Dickkopf–Related Protein 3 in Macropinocytosis in Human Bladder Cancer T24 Cells) … p.2897
January 14, 2017

Nanotechnology. Investigators from Gil Medical Center Report New Data on Nanotechnology (Recent insights into the development of nanotechnology to detect circulating tumor cells) ... p.2898

Drugs and Therapies - Diclofenac Therapy. Investigators from Guangxi Medical University Have Reported New Data on Diclofenac Therapy (Protection from diclofenac-induced liver injury by Yulangsan polysaccharide in a mouse model) ... p.2898

Kidney Diseases and Conditions - Chronic Kidney Disease. Investigators from Hamamatsu University Release New Data on Chronic Kidney Disease (Impaired endogenous nighttime melatonin secretion relates to intrarenal renin–angiotensin system activation and renal damage in patients with chronic kidney ...) ... p.2900

Cardiovascular Diseases and Conditions - Atherosclerosis. Investigators from Harvard School of Medicine Release New Data on Atherosclerosis (Heterogeneity of Coronary Plaque Morphology and Natural History: Current Understanding and Clinical Significance) ... p.2901

Oncology - Thyroid Cancer. Investigators from Hebrew University Report New Data on Thyroid Cancer (Unemployment Risk and Decreased Income Two and Four Years After Thyroid Cancer Diagnosis: A Population–Based Study) ... p.2902

Cardiovascular Diseases and Conditions - Thrombosis. Investigators from Hospital Clinic Report New Data on Thrombosis (Surgical Complications in En Bloc Renal Transplantation) ... p.2903

Immunology - Immunoglobulins. Investigators from Huazhong University of Science and Technology Zero in on Immunoglobulins (SPECT and fluorescence imaging of vulnerable atherosclerotic plaque with a vascular cell adhesion molecule 1 single–chain antibody fragment) ... p.2904

Bone Research. Investigators from Imperial College Have Reported New Data on Bone Research (Blood flow controls bone vascular function and osteogenesis) ... p.2905

Biological Factors - Biological Toxins. Investigators from Institute of Applied Ecology Report New Data on Biological Toxins (Up-regulation of granzyme B and perforin by staphylococcal enterotoxin C2 mutant induces enhanced cytotoxicity in Hepal–6 cells) ... p.2906

Genetics. Investigators from Institute of Cytology Have Reported New Data on Genetics (p53 Proteoforms and Intrinsic Disorder: An Illustration of the Protein Structure–Function Continuum Concept) ... p.2907

Oncology - Brain Cancer. Investigators from Institute of Science Release New Data on Brain Cancer (OCT4 spliced variants are highly expressed in brain cancer tissues and inhibition of OCT4B1 causes G2/M arrest in brain cancer cells) ... p.2908

Amino Acids. Investigators from Institute of Science and Technology Austria Report New Data on Amino Acids (Impaired Amino Acid Transport at the Blood Brain Barrier Is a Cause of Autism Spectrum Disorder) ... p.2909

RNA Viruses - Respiratory Syncytial Viruses. Investigators from Instituto de Salud Carlos III Release New Data on Respiratory Syncytial Viruses (Trivalency of a Nanobody Specific for the Human Respiratory Syncytial Virus Fusion Glycoprotein Drastically Enhances Virus Neutralization and ...) ... p.2910

Heart Disorders and Diseases - Heart Failure. Investigators from Iuliu Hatieganu University of Medicine and Pharmacy Zero in on Heart Failure (Combined use of renin–angiotensin–aldosterone
January 14, 2017

system–acting agents: a cross–sectional study) ... p.2911

Ameloblasts. Investigators from Iwate Medical University Release New Data on Ameloblasts (The Semaphorin 4D–RhoA–Akt Signal Cascade Regulates Enamel Matrix Secretion in Coordination With Cell Polarization During Ameloblast Differentiation) ... p.2912

Cardiovascular Diseases and Conditions - Aneurysm. Investigators from Jefferson Hospital for Neuroscience Report New Data on Aneurysm (Clipping of previously coiled cerebral aneurysms: efficacy, safety, and predictors in a cohort of 111 patients) ... p.2913

Immune System Diseases and Conditions - HIV/AIDS. Investigators from Jilin University Have Reported New Data on HIV/AIDS (Transmission of Multiple HIV–1 Subtype C Transmitted/founder Viruses into the Same Recipients Was not Determined by Modest Phenotypic Differences) ... p.2914

Heart Disorders and Diseases - Acute Coronary Syndrome. Investigators from Jilin University Target Acute Coronary Syndrome (Negative Association of Circulating MicroRNA–126 with High–sensitive C–reactive Protein and Vascular Cell Adhesion Molecule–1 in Patients with Coronary Artery Disease Following ...) ... p.2915

Parkinson’s Disease. Investigators from Jinzhou Medical University Report New Data on Parkinson’s Disease (Involvement of microRNA–135a–5p in the Protective Effects of Hydrogen Sulfide Against Parkinson’s Disease) ... p.2916

Congenital Diseases and Conditions - Congenital Heart Disease. Investigators from John Hunter Hospital Release New Data on Congenital Heart Disease (Sleep–Disordered Breathing in Patients with Pulmonary Valve Incompetence Complicating Congenital Heart Disease) ... p.2917

Oncology - Lung Cancer. Investigators from Kanagawa Cancer Center Release New Data on Lung Cancer (Prognostic Role of Subtype Classification in Small–Sized Pathologic N0 Invasive Lung Adenocarcinoma) ... p.2918

Blood Pressure. Investigators from Karolinska Institute Release New Data on Blood Pressure (Effects of antiseptic mouthwash on resting metabolic rate: A randomized, double–blind, crossover study) ... p.2919

Cardiovascular Diseases and Conditions - Carotid Stenosis. Investigators from Keimyung University Zero in on Carotid Stenosis (A lotus root–like appearance in carotid stenosis on optical coherence tomography) ... p.2920

Inflammation. Investigators from Keio University Target Inflammation (Innate lymphoid cells in allergic and nonallergic inflammation) ... p.2921

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Investigators from King’s College Hospital Have Reported New Data on Venous Thromboembolism (Maternal and pregnancy characteristics affect plasma fibrin monomer complexes and D–dimer reference ranges for venous thromboembolism in pregnancy) ... p.2922

Digestive System Diseases and Conditions - Sclerosing Cholangitis. Investigators from King’s College Target Sclerosing Cholangitis [Mutations in DCDC2 (doublecortin domain containing protein 2) in neonatal sclerosing cholangitis] ... p.2923

Drugs and Therapies - Indomethacin Therapy. Investigators from Kobe Pharmaceutical University Report New Data on Indomethacin Therapy (Down–regulation of hepatic CYP3A1 expression in a rat model of indomethacin–induced small intestinal
January 14, 2017

Intercellular Signaling Peptides and Proteins - Cytokines. Investigators from Konkuk University Report New Data on Cytokines [Intracellular interleukin (IL)–1 family cytokine processing enzyme] … p.2925

Gram-Positive Bacteria - Streptococcus pneumoniae. Investigators from Kyungpook National University Release New Data on Streptococcus pneumoniae (Antimicrobial Activity of Zabofloxacin against Clinically Isolated Streptococcus pneumoniae) … p.2926

Erythrocytosis. Investigators from Laval University Have Reported New Data on Erythrocytosis (Hypercapnic ventilatory response is decreased in a mouse model of excessive erythrocytosis) … p.2927

Oncology - Acute Lymphoblastic Leukemia. Investigators from Ludwig–Maximilians–University Target Acute Lymphoblastic Leukemia (Characterization of Rare, Dormant, and Therapy–Resistant Cells in Acute Lymphoblastic Leukemia) … p.2928

Inflammation. Investigators from Manchester Metropolitan University Release New Data on Inflammation (P116 is a shear stress and inflammation–regulated inhibitor of MMP2) … p.2929

Jaw Diseases and Conditions - Giant Cell Granuloma. Investigators from Mansoura University Have Reported New Data on Giant Cell Granuloma (Efficacy of Ethanolamine Oleate Sclerotherapy in Treatment of Peripheral Giant Cell Granuloma) … p.2930

Heart Disorders and Diseases - Atrial Fibrillation. Investigators from Marmara University Target Atrial Fibrillation (Effect of intravenous zoledronic acid infusion on electrocardiographic parameters in patients with osteoporosis) … p.2931

Life Science Research - Molecular and Cellular Biology. Investigators from Max–Planck–Institute for Biophysics Zero in on Molecular and Cellular Biology (Molecular Architecture of SF3b and Structural Consequences of Its Cancer–Related Mutations) … p.2932

Congenital Diseases and Conditions - Congenital Heart Disease. Investigators from Mayo Clinic Report New Data on Congenital Heart Disease (Postcardiomyotomy ECMO Support after High–risk Operations in Adult Congenital Heart Disease) … p.2933

Nervous System Diseases and Conditions - Neurofibromatosis Type 2. Investigators from Mayo Clinic Report New Data on Neurofibromatosis Type 2 (Gamma Knife radiosurgery for neurofibromatosis type 2–associated meningiomas: a 22–year patient series) … p.2934

Musculoskeletal Diseases and Conditions - Osteomyelitis. Investigators from Mayo Clinic Target Osteomyelitis (Mycoplasma hominis vertebral spine infection: Case report and a review of infections of bone and joints) … p.2935

Oncology - Prostate Cancer. Investigators from Mayo Clinic Zero in on Prostate Cancer [Evaluation of polymer shielding for adenovirus serotype 6 (Ad6) for systemic virotherapy against human prostate cancers] … p.2936

Heart Disorders and Diseases - Heart Disease. Investigators from McMaster University Zero in on Heart Disease (Impact of a Genetic Risk Score on Myocardial Infarction Risk Across Different Ethnic Populations) … p.2937

Papillomas. Investigators from Medical College of Wisconsin Target Papillomas (Black Raspberries Demethylate Sfrp4, a WNT Pathway Antagonist, in Rat Esophageal Squamous Cell Papilloma) … p.2938
Stem Cell Research - Mesenchymal Stem Cells. Investigators from Medical Research Institute Report New Data on Mesenchymal Stem Cells (Tyrosine kinase receptor c–ros–oncogene 1 mediates TWIST–1 regulation of human mesenchymal stem cell lineage commitment) … p.2939

Gram-Positive Bacteria - Staphylococcus aureus. Investigators from Medicines Co. Have Reported New Data on Staphylococcus aureus (Pooled analysis of single–dose ortavancin in the treatment of acute bacterial skin and skin–structure infections caused by Gram–positive pathogens, including a ...) … p.2940

Neuropathy. Investigators from Miguel Hernandez University Report New Data on Neuropathy (Roles of NTE protein and encoding gene in development and neurodevelopmental toxicity) … p.2941

Drugs and Therapies - Antibiotics. Investigators from Monash University Target Antibiotics (Pharmacokinetics/pharmacodynamics of colistin and polymyxin B: are we there yet?) … p.2942

Drugs and Therapies - Toxicology and Pharmacology. Investigators from Monsanto Zero in on Toxicology and Pharmacology (Ecological risk assessment for DvSnf7 RNA: A plant–incorporated protectant with targeted activity against western corn rootworm) … p.2943

Liver Diseases and Conditions - Hepatitis B Virus. Investigators from Nagoya City University Target Hepatitis B Virus [Molecular epidemiology of co–infection with hepatitis B virus and human immunodeficiency virus (HIV) among adult patients in Harare, Zimbabwe] … p.2944

Molecular Nutrition. Investigators from National Heart Lung and Blood Institute Have Reported New Data on Molecular Nutrition (Long–chain monounsaturated fatty acid–rich fish oil attenuates the development of atherosclerosis in mouse models) … p.2945

Subcellular Fractions. Investigators from National Heart Lung and Blood Institute Zero in on Subcellular Fractions (TP53 mutation, mitochondria and cancer) … p.2947

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators from National Institute for Health Research Zero in on Type 2 Diabetes (Systematic Functional Characterization of Candidate Causal Genes for Type 2 Diabetes Risk Variants) … p.2948

Leukocyte Diseases and Conditions - Eosinophilia. Investigators from National Research Institute Release New Data on Eosinophilia (Platelets constitutively express IL–33 protein and modulate eosinophilic airway inflammation) … p.2949

Drugs and Therapies - Chemotherapy. Investigators from National Tsing Hua University Release New Data on Chemotherapy (Tumor Microenvironment–Responsive Nanoparticle Delivery of Chemotherapy for Enhanced Selective Cellular Uptake and Transportation within Tumor) … p.2950

Drugs and Therapies - Central Nervous System Agents. Investigators from Odense University Hospital Zero in on Central Nervous System Agents (2016 updated MASCC/ESMO consensus recommendations: prevention of radiotherapy–induced nausea and vomiting) … p.2952

Clinical Research - Clinical Trials and Studies. Investigators from Osaka University Target Clinical Trials and Studies (Intravenous Vitamin B6 Increases Resistance to Erythropoiesis–Stimulating Agents in Hemodialysis Patients: A Randomized Controlled Trial) … p.2954

Dimethylamines. Investigators from Paris Diderot University Zero in on Dimethylamines (Mechanisms of tramadol–related neurotoxicity in the rat: Does diazepam/tramadol combination play a worsening role in overdose?) … p.2955

Enzymes and Coenzymes. Investigators from Pasteur Institute Release New Data on Enzymes and Coenzymes (Crystal Structure of the Metallo–beta–Lactamase GOB in the Periplasmic Dizinc Form Reveals an Unusual Metal Site) … p.2956

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Investigators from Peking University Release New Data on Left Ventricular Hypertrophy (A novel hydrodynamic approach of drag–reducing polymers to improve left ventricular hypertrophy and aortic remodeling in spontaneously hypertensive rats) … p.2957

Heart Disorders and Diseases - Heart Failure. Investigators from Peking University Zero in on Heart Failure (The predictive value of plasma catestatin for all–cause and cardiac deaths in chronic heart failure patients) … p.2959

Oncology - Rectal Cancer. Investigators from People’s Hospital Release New Data on Rectal Cancer (Relationship between serum uric acid and metastatic and nonmetastatic rectal cancer patients with undergoing no chemotherapy) … p.2960

Oncology - Lung Cancer. Investigators from Postgraduate Institute of Medical Education and Research Report New Data on Lung Cancer (Endosonography Versus Mediastinoscopy in Mediastinal Staging of Lung Cancer: Systematic Review and Meta–Analysis) … p.2964
Crystal Research. Investigators from Purdue University have reported new data on crystal research (A comparison of the crystallization inhibition properties of bile salts) ... p.2965

Parkinson's Disease. Investigators from Queensland University of Technology release new data on Parkinson's disease [Occupancy of pramipexole (Sifrol) at cerebral dopamine D2/3 receptors in Parkinson's disease patients] ... p.2966

Genetics - Assisted Reproduction and Genetics. Investigators from Radboud University report new data on assisted reproduction and genetics (Clinically applied procedures for human ovarian tissue cryopreservation result in different levels of efficacy and efficiency) ... p.2967

Eye Diseases and Conditions - Choroidal Neovascularization. Investigators from Rambam Medical Center have reported new data on choroidal neovascularization [A SEMA3E mutant resistant to cleavage by furins (UNCL–SEMA3E) inhibits choroidal neovascularization] ... p.2968

Atrial Fibrillation. Investigators from Research Hospital report new data on atrial fibrillation (Unanswered questions in complex fractionated atrial electrogram ablation) ... p.2969

Nervous System Diseases and Conditions - Charcot-Marie-Tooth Disease. Investigators from Royal Devon and Exeter NHS Foundation Trust have reported new data on Charcot-Marie-Tooth disease (Novel homozygous missense mutation in GAN associated with Charcot-Marie-Tooth disease type 2 in a large consanguineous family ...) ... p.2970

Biomedical Engineering - Tissue Engineering. Investigators from Royal University Hospital report new data on tissue engineering (Regulation of sequential release of growth factors using bilayer polymeric nanoparticles for cardiac tissue engineering) ... p.2971

Hematology - Plasma. Investigators from Rush University release new data on plasma (Membrane-based therapeutic plasma exchange: A new frontier for nephrologists) ... p.2972

Chronic Venous Disease. Investigators from Sapienza–University Zero in on chronic venous disease (Ultrasonography of skin changes in legs with chronic venous disease) ... p.2973

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. Investigators from Sapporo Medical University release new data on Epstein-Barr virus (Virus reactivations after autologous hematopoietic stem cell transplantation detected by multiplex PCR assay) ... p.2974

Oncology - Prostate Cancer. Investigators from School of Life Science release new data on prostate cancer (Ailanthone targets p23 to overcome MDV3100 resistance in castration-resistant prostate cancer) ... p.2975

Digestive System Diseases and Conditions - Crohn's Disease. Investigators from School of Medicine report new data on Crohn's disease (A frameshift in CSF2RB predominant among Ashkenazi Jews increases risk for Crohn's disease and reduces monocyte signaling via Gm-CSF) ... p.2976

Drugs and Therapies - Pharmaceutical Research. Investigators from School of Pharmacy report new data on pharmaceutical research (Nanomedicines for advanced cancer treatments: Transitioning towards responsive systems) ... p.2977
Biological Factors - Heme. Investigators from School of Public Health Target Heme (A novel label–free and signal–on electrochemical aptasensor based on the autonomous assembly of hemin/G–quadruplex and direct electron transfer of hemin) … p.2978

Drug Development. Investigators from Shaheed Beheshti University of Medical Sciences Target Drug Development (PH–sensitive bionanocomposite hydrogel beads based on carboxymethyl cellulose/ZnO nanoparticle as drug carrier) … p.2979

Proteins - Nerve Tissue Proteins. Investigators from Shandong University Target Nerve Tissue Proteins (Gamma–synuclein binds to AKT and promotes cancer cell survival and proliferation) … p.2981

Heart Disorders and Diseases - Heart Failure. Investigators from Shanghai Jiao–Tong University Report New Data on Heart Failure (IL–34 is associated with the presence and severity of renal dysfunction and coronary artery disease in patients with heart failure) … p.2982

Oncology - Bone Cancer. Investigators from Shanghai Jiao–Tong University Target Bone Cancer (Osteotropic peptide–mediated bone targeting for photothermal treatment of bone tumors) … p.2983

Oncology - Breast Cancer. Investigators from Shantou University Have Reported New Data on Breast Cancer (Evaluating Breast Cancer Risk under Exposure to Environmental Estrogen–Like Chemicals) … p.2984

Nanotechnology - Nanoparticles. Investigators from Simon Fraser University Have Reported New Data on Nanoparticles (NanoHDA: A nanoparticle–assisted isothermal amplification technique for genotyping assays) … p.2986

Heart Disorders and Diseases - Heart Failure. Investigators from Sophiahemmet University Have Reported New Data on Heart Failure (y Patterns and the mediating role of avoidant coping style and illness perception on anxiety and depression in patients with chronic heart failure) … p.2988

Lung Diseases and Conditions - Asthma. Investigators from Southeast University Have Reported New Data on Asthma (Atopy and Specific Cancer Sites: a Review of Epidemiological Studies) … p.2989

Oncology - Head and Neck Cancer. Investigators from St. Louis University Zero in on Head and Neck Cancer (Palliative Care Considerations for Patients With Head and Neck Cancer With Children at Home) … p.2990

Clinical Research - Clinical Trials and Studies. Investigators from Sun Yat Sen University Report New Data on Clinical Trials and Studies (Sequential four–drug chemotherapy and intensity–modulated radiotherapy for larynx preservation in resectable advanced larynx and hypopharynx
January 14, 2017

cancer: A ...) ... p.2991

Oncology - Colon Cancer. Investigators from Taipei Medical University Release New Data on Colon Cancer (Down-regulation of let-7a–5p predicts lymph node metastasis and prognosis in colorectal cancer: Implications for chemotherapy) ... p.2992

Nephrology. Investigators from Tel Aviv University Have Reported New Data on Nephrology (Can Unenhanced CT Findings Predict Interventional Versus Conservative Treatment in Acute Renal Colic?) ... p.2993

Respiratory Tract. Investigators from Third Military Medical University Target Respiratory Tract (Deficiency of LIGHT signaling pathway exacerbates Chlamydia psittaci respiratory tract infection in mice) ... p.2994

Hematologic Diseases and Conditions - Thrombocytopenia. Investigators from Thomas Jefferson University Target Thrombocytopenia [TULA–2 (T-Cell Ubiquitin Ligand–2) Inhibits the Platelet Fc Receptor for IgG IIA (Fc gamma RIIA) Signaling Pathway and Heparin–Induced Thrombocytopenia in Mice] ... p.2995

Nutritional and Metabolic Diseases and Conditions - Obesity. Investigators from Tokyo Medical and Dental University Zero in on Obesity (Reduced Morning Cortisol Concentration in Saliva Was Associated with Obesity: Evidence from Community–Dwelling Adults in Papua New Guinea) ... p.2996

Gram-Negative Bacteria - Bacteroides. Investigators from Tufts Medical Center Zero in on Bacteroides (In Vitro Evaluation of the Activity of Imipenem–Relebactam against 451 Recent Clinical Isolates of Bacteroides Group and Related Species) ... p.2997

www.NewsRx.com

Oncology - Prostate Cancer. Investigators from Tulane University Report New Data on Prostate Cancer (Emerging data on androgen receptor splice variants in prostate cancer) ... p.2998

Lung Diseases and Conditions - Tuberculosis and Lung Disease. Investigators from United Hospitals Target Tuberculosis and Lung Disease [Pyrazinamide susceptibility testing: proposed new standard with the BAGTEC(TM) MGIT(TM) 960 system] ... p.2999

Drugs and Therapies - Pharmaceutical Design. Investigators from University College Target Pharmaceutical Design (ABC Transporters and Drug Resistance in Patients with Epilepsy) ... p.2999

Drugs and Therapies - Chemotherapy. Investigators from University Hospital Zero in on Chemotherapy (Preoperative predictors of delay in initiation of adjuvant chemotherapy in patients undergoing primary debulking surgery for ovarian cancer) ... p.3000

Heart Disorders and Diseases - Atrial Fibrillation. Investigators from University Institute of Cardiology and Pneumology Quebec Research Center Release New Data on Atrial Fibrillation (Contact–Force Catheters: Efficacy Versus Safety? Case Report of 2 Atrioesophageal Fistulae) ... p.3001

Hematopoietic. Investigators from University Medical Center Have Reported New Data on Hematopoietic (Bcl–2 proteins in development, health, and disease of the hematopoietic system) ... p.3002

Drugs and Therapies - Antibiotics. Investigators from University Medical Center, Hamburg Eppendorf Report New Data on Antibiotics (Tedizolid susceptibility in linezolid– and vancomycin–resistant Enterococcus faecium isolates) ... p.3003
Endocrine System Diseases and Conditions - Insulin Resistance. Investigators from University Nova of Lisboa Release New Data on Insulin Resistance (Functional abolition of carotid body activity restores insulin action and glucose homeostasis in rats: key roles for visceral adipose tissue and the liver) … p.3004

Eye Diseases and Conditions - Retinitis Pigmentosa. Investigators from University of Adelaide Report New Data on Retinitis Pigmentosa (A review of the mechanisms of cone degeneration in retinitis pigmentosa) … p.3005

Gram-Negative Bacteria - Acinetobacter baumannii. Investigators from University of Athens Zero in on Acinetobacter baumannii (In Vitro Bactericidal Activity of Trimethoprim–Sulfamethoxazole Alone and in Combination with Colistin against Carbapenem–Resistant Acinetobacter baumannii Clinical ...) … p.3006

Oncology - Brain Cancer. Investigators from University of Bordeaux Have Reported New Data on Brain Cancer (In Vivo Follow–up of Brain Tumor Growth via Bioluminescence Imaging and Fluorescence Tomography) … p.3007

Blood Pressure. Investigators from University of Bristol Zero in on Blood Pressure (Quantifying sympathetic neuro–haemodynamic transduction at rest in humans: insights into sex, ageing and blood pressure control) … p.3008

Therapeutics. Investigators from University of British Columbia Report New Data on Therapeutics (Effective Translation of Research to Practice: Hospital–Based Rehabilitation Program Improves Health–Related Physical Fitness and Quality of Life of Cancer ...) … p.3009

Pharmacokinetics. Investigators from University of Cairo Zero in on Pharmacokinetics (UPLC–MS–MS Method for the Determination of Vilazodone in Human Plasma: Application to a Pharmacokinetic Study) … p.3010

Life Science Research - Molecular Biology. Investigators from University of California Have Reported New Data on Molecular Biology (GOLPH3 drives cell migration by promoting Golgi reorientation and directional trafficking to the leading edge) … p.3011

Respiratory Tract Diseases and Conditions - Hypoventilation. Investigators from University of California Release New Data on Hypoventilation (Treatment of ethanol poisoning and associated hypoventilation with doxapram) … p.3012

Oncology - Glioblastomas. Investigators from University of California Target Glioblastomas (Tissue mechanics promote IDH1–dependent HIF1 alpha–tenascin C feedback to regulate glioblastoma aggression) … p.3013

Drugs and Therapies - Oxaprozin Therapy. Investigators from University of Florence Release New Data on Oxaprozin Therapy [Comparison of liposomal and NLC (nanostructured lipid carrier) formulations for improving the transdermal delivery of oxaprozin: Effect of cyclodextrin complexation] … p.3013

Blood Pressure. Investigators from University of Glasgow Report New Data on Blood Pressure (Relationship Between Blood Pressure Values, Depressive Symptoms, and Cardiovascular Outcomes in Patients With Cardiometabolic Disease) … p.3014
Amphetamines. Investigators from University of Illinois Zero in on Amphetamines (Timing Of Amphetamine Exposure In Relation To Puberty Onset Determines Its Effects On Anhedonia, Exploratory Behavior, And Dopamine D–1 Receptor Expression In Young Adulthood) … p.3015

Oncology - Cancer Genetics. Investigators from University of Iowa Have Reported New Data on Cancer Genetics (The NAB2–STAT6 gene fusion in solitary fibrous tumor can be reliably detected by anchored multiplexed PCR for targeted next–generation sequencing) … p.3017

Immunology - Immunoglobulins. Investigators from University of Lisbon Target Immunoglobulins (Integration of cell harvest with affinity–enhanced purification of monoclonal antibodies using aqueous two–phase systems with a dual tag ligand) … p.3020

Oncology - Breast Cancer. Investigators from University of Louisiana Have Reported New Data on Breast Cancer (Role of Rac1/WAVE2 Signaling in Mediating the Inhibitory Effects of gamma–Tocotrienol on Mammary Cancer Cell Migration and Invasion) … p.3021

www.NewsRx.com

Oncology - Gynecologic Cancer. Investigators from University of Louisville Target Gynecologic Cancer (Optimal epidural analgesia for patients diagnosed as having gynecologic cancer undergoing interstitial brachytherapy) … p.3022

Cardiovascular Research. Investigators from University of Manchester Release New Data on Cardiovascular Research (Knowledge gaps in the management of familial hypercholesterolaemia. A UK based survey) … p.3024

Gram-Negative Bacteria - Escherichia coli. Investigators from University of Manitoba Release New Data on Escherichia coli (Bacteria in drinking water sources of a First Nation reserve in Canada) … p.3025

Biological Factors - Eicosanoids. Investigators from University of Maryland Target Eicosanoids (Prostaglandin E Receptor EP4 expression, survival and pattern of recurrence in locally advanced NSCLC) … p.3026

Transplant Medicine - Clinical Transplants. Investigators from University of Massachusetts Release New Data on Clinical Transplants (Functional status predicts postoperative mortality after liver transplantation) … p.3027

Drugs and Therapies - Platelet Aggregation Inhibitors. Investigators from University of Michigan Target Platelet Aggregation Inhibitors (Significant Improvement of Antithrombotic Responses to Clopidogrel by Use of a Novel Conjugate as Revealed in an Arterial Model of Thrombosis) … p.3028
January 14, 2017

Gram-Negative Bacteria - Brachyspira. Investigators from University of Minnesota Report New Data on Brachyspira (Characterization and Recognition of Brachyspira hampsonii sp nov., a Novel Intestinal Spirochete That Is Pathogenic to Pigs) … p.3029

Nutritional and Metabolic Diseases and Conditions - Hyperglycemia. Investigators from University of Mississippi Target Hyperglycemia (Early development of podocyte injury independently of hyperglycemia and elevations in arterial pressure in nondiabetic obese Dahl SS leptin receptor mutant rats) … p.3030

Cardiovascular Diseases and Conditions - Hypertension. Investigators from University of Mississippi Target Hypertension (Associations Between Inflammation and Physical Function in African Americans and European Americans with Prevalent Cardiovascular Risk Factors) … p.3031

Wellness. Investigators from University of North Carolina Target Wellness (Strength and Comprehensiveness of School Wellness Policies in Southeastern US School Districts) … p.3034

Cardiology. Investigators from University of Oslo Have Reported New Data on Cardiology (The correlation between pulsatile intracranial pressure and indices of intracranial pressure–volume reserve capacity; results from ventricular infusion testing) … p.3035

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Investigators from University of Oxford Have Reported New Data on Type 2 Diabetes (Assessment of Metformin–Induced Changes in Cardiac and Hepatic Redox State Using Hyperpolarized [1–C–13]Pyruvate) … p.3036

Membrane Proteins - Toll Like Receptors. Investigators from University of Oxford Zero in on Toll Like Receptors (TLR Adaptor Protein MYD88 Mediates Sensitivity to HDAC Inhibitors via a Cytokine–Dependent Mechanism) … p.3037

Lung Diseases and Conditions - Pulmonary Fibrosis. Investigators from University of Pittsburgh Release New Data on Pulmonary Fibrosis (Expression of RXFP1 Is Decreased in Idiopathic Pulmonary Fibrosis Implications for Relaxin–based Therapies) … p.3039

Heart Disorders and Diseases - Heart Attack. Investigators from University of Pittsburgh Target Heart Attack (Long–term survival benefit from treatment at a specialty center after cardiac arrest) … p.3040
Respiratory Tract Diseases and Conditions. Investigators from University of Sao Paulo Zero in on Respiratory Tract Diseases and Conditions (Effects of Particulate Matter and Its Chemical Constituents on Elderly Hospital Admissions Due to Circulatory and Respiratory Diseases) … p.3041

Gram-Negative Bacteria - Escherichia coli. Investigators from University of South Carolina Zero in on Escherichia coli (The Escherichia coli BolaA Protein IbaG Forms a Histidine–Ligated [2Fe–2S]–Bridged Complex with Grx4) … p.3042

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Investigators from University of Szeged Target Left Ventricular Hypertrophy (Identification of Two Novel LAMP2 Gene Mutations in Danon Disease) … p.3043

Drugs and Therapies - Chemotherapy. Investigators from University of Texas Medical Branch Target Chemotherapy (The DNA Polymerase Gamma R953C Mutant Is Associated with Antiretroviral Therapy–Induced Mitochondrial Toxicity) … p.3044

Oncology - Small Cell Lung Cancer. Investigators from University of Texas Target Small Cell Lung Cancer (Hsp90 Inhibitor Ganetespib Sensitizes Non–Small Cell Lung Cancer to Radiation but Has Variable Effects with Chemoradiation) … p.3045

Membrane Proteins - Vesicular Transport Proteins. Investigators from University of Toledo Target Vesicular Transport Proteins (Differential roles of caveolin–1 in ouabain–induced Na+/K+-ATPase cardiac signaling and contractility) … p.3046

Drugs and Therapies - Biotherapies and Biologicals. Investigators from University of Toronto Report New Data on Biotherapies and Biologicals (Immune–Related Adverse Events Associated with Immune Checkpoint Inhibitors) … p.3047

Histology. Investigators from University of Ulsan Have Reported New Data on Histology (Plaque structural stress assessed by virtual histology–intravascular ultrasound predicts dynamic changes in phenotype and composition of untreated coronary artery ...) … p.3048

Drugs and Therapies - Adverse Drug Reactions. Investigators from University of Washington Release New Data on Adverse Drug Reactions (Use of hydroxyethyl starch in leukocytapheresis procedures does not increase renal toxicity) … p.3049

Immune System Diseases and Conditions - HIV/AIDS. Investigators from University of Washington Report New Data on HIV/AIDS (Changes in Condomless Sex and Serosorting Among Men Who Have Sex With Men After HIV Diagnosis) … p.3051

Eye Diseases and Conditions - Retinal Vein Occlusion. Investigators from University of Western Australia Report New Data on Retinal Vein Occlusion (Visual Acuity Is Correlated with the Area of the Foveal Avascular Zone in Diabetic Retinopathy and Retinal Vein Occlusion) … p.3052
January 14, 2017

Central Nervous System Diseases and Conditions - Epilepsy. Investigators from University of Wollongong Zero in on Epilepsy (Development and validation of a seizure initiated drug delivery system for the treatment of epilepsy) … p.3053

Autoimmune Diseases and Conditions - Multiple Sclerosis. Investigators from University of Zurich Target Multiple Sclerosis (Cancer co–occurrence patterns in Parkinson's disease and multiple sclerosis–Do they mirror immune system imbalances?) … p.3054

Hematology - Blood Coagulation Factors. Investigators from Vanderbilt University Have Reported New Data on Blood Coagulation Factors (Contributions of Protease–Activated Receptors PAR1 and PAR4 to Thrombin–Induced GPIIbIIIa Activation in Human Platelets) … p.3055

Oncology - Glioblastomas. Investigators from Wake Forest University Report New Data on Glioblastomas (Impact of timing of radiotherapy in patients with newly diagnosed glioblastoma) … p.3057

Genetics. Investigators from Xuzhou Medical College Release New Data on Genetics (MDM2 oligomers: antagonizers of the guardian of the genome) … p.3059

www.NewsRx.com

DNA Research. Investigators from Yale University School of Medicine Release New Data on DNA Research (A Mechanistic Model for Colibactin–Induced Genotoxicity) … p.3060

Oncology - Lung Cancer. Investigators from Yeungnam University Have Reported New Data on Lung Cancer (Non–invasive visualization of mast cell recruitment and its effects in lung cancer by optical reporter gene imaging and glucose metabolism monitoring) … p.3061

Erythromycin. Investigators from Yokohama City University Report New Data on Erythromycin (Clarithromycin Suppresses Chloride Channel Accessory 1 and Inhibits Interleukin–13–Induced Goblet Cell Hyperplasia in Human Bronchial Epithelial Cells) … p.3062

Uterine Diseases and Conditions - Endometriosis. Iran University of Medical Sciences Details Findings in Endometriosis (1,25–Dihydroxy Vitamin D3 Modulates Endometriosis–Related Features of Human Endometriotic Stromal Cells) … p.3063

Therapeutics. Isfahan University of Medical Sciences Describes Findings in Therapeutics (Spiritual Well–Being for Increasing Life Expectancy in Palliative Radiotherapy Patients: A Questionnaire–Based Study) … p.3065

Oncology - Colon Cancer. Jimenez Diaz Foundation Reports Findings in Colon Cancer (Prognostic role of tissue transglutaminase 2 in colon carcinoma) … p.3066
January 14, 2017

Organelles. Kagoshima University Reports Findings in Organelles (Lysozyme Mutants Accumulate in Cells while Associated at their N–terminal Alpha–domain with the Endoplasmic Reticulum Chaperone GRP78/BiP) … p.3067

Atrial Fibrillation. Kanazawa University Details Findings in Atrial Fibrillation (Short–term rapid atrial pacing alters the gene expression profile of rat liver: Cardiohepatic interaction in atrial fibrillation) … p.3068

Musculoskeletal Diseases and Conditions - Bone Resorption. Kanazawa University Reports Findings in Bone Resorption (The Transcriptional Modulator Interferon–Related Developmental Regulator 1 in Osteoblasts Suppresses Bone Formation and Promotes Bone Resorption) … p.3069

Photodynamics. Kaohsiung Medical University Reports Findings in Photodynamics (Plasmon–Enhanced Photodynamic Cancer Therapy by Upconversion Nanoparticles Conjugated with Au Nanorods) … p.3070

Dominican Republic Ministry of Tourism. Kickstart your Healthy New Year's Resolutions on a Dominican Republic Fitness Getaway … p.3071

Neurologic Manifestations - Pain. King's College Reports Findings in Pain (Role of extracellular calcitonin gene–related peptide in spinal cord mechanisms of cancer–induced bone pain) … p.3072

Digestive System Diseases and Conditions - Gastritis. Kitasato Institute Hospital Reports Findings in Gastritis (First–line eradication for Helicobacter pylori–positive gastritis by esomeprazole–based triple therapy is influenced by CYP2C19 genotype) … p.3073

Oncology - Breast Cancer. Kurdistan University of Medical Sciences Reports Findings in Breast Cancer (Association of XRCC1 Trp194 allele with risk of breast cancer, and Ki67 protein status in breast tumor tissues) … p.3074

Membrane Proteins - Antimicrobial Cationic Peptides. La Trobe University Reports Findings in Antimicrobial Cationic Peptides [Human b–defensin 3 contains an oncolytic motif that binds PI(4,5)P2 to mediate tumour cell permeabilisation] … p.3075

Gram-Negative Bacteria - Klebsiella. Laboratory of Clinical Microbiology Reports Findings in Klebsiella (First clinical cases of NDM–1–producing Klebsiella pneumoniae from two hospitals in Bulgaria) … p.3076

Drugs and Therapies - Behavioural Pharmacology. Lancaster University Reports Findings in Behavioural Pharmacology (How cognitive biases can distort environmental statistics: introducing the rough estimation task) … p.3077

Congenital Diseases and Conditions - Congenital Heart Defects. Leiden University Details Findings in Congenital Heart Defects (Head growth in fetuses with isolated congenital heart defects: lack of influence of aortic arch flow and ascending aorta oxygen saturation) … p.3078

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Lund University Details Findings in Type 2 Diabetes (HDAC7 is overexpressed in human diabetic islets and impairs insulin secretion in rat islets and clonal beta cells) … p.3079

Biomedical Engineering - Tissue Engineering. Magnetic stem cells for gene engineering … p.3080
Drugs and Therapies - Immunotherapy.
Massachusetts Institute of Technology
Details Findings in Immunotherapy
(Eradication of large established tumors
in mice by combination immunotherapy
that engages innate and adaptive
immune responses) … p.3081

Oncology - Breast Cancer. Medical College
Describes Findings in Breast Cancer
(Study on knowledge, experiences and
barriers to mammography among
working women from Delhi) … p.3082

Pathology. Medical University Describes
Findings in Pathology (Vitamin D in the
skin physiology and pathology)
… p.3083

Oncology - Melanoma. Medical University
Details Findings in Melanoma
[Parthenolide induces MITF–M
downregulation and senescence in
patient–derived MITF–M(high)
melanoma cell populations] … p.3084

Surgery - Glossectomy. Memorial
Sloan–Kettering Cancer Center Reports
Findings in Glossectomy
(Health–Related Quality of Life following
Reconstruction for Common Head and
Neck Surgical Defects) … p.3085

Mylan N.V. Mylan Launches Generic
Concerta(R) Tablets … p.3086

Drugs and Therapies - Biopharmaceuticals. NIPTE is
Partner in Newly Announced National
Biopharmaceutical Manufacturing
Institute … p.3087

Oncology - Non–Small Cell Lung Cancer. Nanjing Medical University Reports
Findings in Non–Small Cell Lung Cancer
(Prognostic Significance of EZH2
Expression in Non–Small Cell Lung
Cancer: A Meta–analysis) … p.3088

Oncology - Breast Cancer. National Cancer
Center Reports Findings in Breast
Cancer (PI3K/Akt/mTOR inhibitors in
breast cancer) … p.3089

Neurons. National Center for Nanoscience
and Technology Details Findings in
Neurons (An on–chip model for
investigating the interaction between
neurons and cancer cells) … p.3089

Macrolides. National Institute of Allergy and
Infectious Diseases (NIAID) Details
Findings in Macrolides (The Role of
Signaling via Aqueous Pore Formation
in Resistance Responses to
Amphotericin B) … p.3090

Cardiovascular Diseases and Conditions -
Atherosclerosis. National University
Hospital Details Findings in
Atherosclerosis (Airflow obstruction,
atherosclerosis and cardiovascular risk
factors in the AGES Reykjavik study)
… p.3091

Oncology - Breast Cancer. National
University Reports Findings in Breast
Cancer (Predicting general and
cancer–related distress in women with
newly diagnosed breast cancer)
… p.3092

Oncology - Squamous Cell Carcinoma. National University of Singapore
Reports Findings in Squamous Cell
Carcinoma (Exome sequencing reveals
recurrent REV3L mutations in
cisplatin–resistant squamous cell
carcinoma of head and neck) … p.3094

Drug Resistance. Naturally occurring
mechanism of cancer drug–resistance
may itself be a treatment
target … p.3095

Research and Markets. Neurovascular
Devices Market 2013 – 2024 –
Research and Markets … p.3096

Cardiovascular Diseases and Conditions -
Abdominal Aortic Aneurysm. New
Abdominal Aortic Aneurysm Data Have
Been Reported by Researchers at
Academic Medical Center
(Biomechanical Imaging Markers as
Predictors of Abdominal Aortic
Aneurysm Growth or Rupture: A
Systematic Review) … p.3097
Abdominal Aortic Aneurysm. New Abdominal Aortic Aneurysm Findings from Shandong University Described (Silencing of hypoxia inducible factor–1 alpha gene attenuated angiotensin II–induced abdominal aortic aneurysm in apolipoprotein E–deficient mice) … p.3098

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. New Abdominal Aortic Aneurysm Study Findings Recently Were Reported by Researchers at Odense University Hospital (Animal Models Used to Explore Abdominal Aortic Aneurysms: A Systematic Review) … p.3099

Nutritional and Metabolic Diseases and Conditions - Acidosis. New Acidosis Findings Reported from Hospices civils de Lyon (Hyperchloremic metabolic acidosis following plasma exchange during myasthenia gravis crisis) … p.3100

Gram-Negative Bacteria - Acinetobacter baumannii. New Acinetobacter baumannii Study Findings Have Been Reported from University of Pittsburgh (Comparison of Minocycline Susceptibility Testing Methods for Carbapenem–Resistant Acinetobacter baumannii) … p.3101

Lung Diseases and Conditions - Acute Chest Syndrome. New Acute Chest Syndrome Study Findings Reported from Research Institute (Inhaled bronchodilators for acute chest syndrome in people with sickle cell disease) … p.3102

Heart Disorders and Diseases - Acute Coronary Syndrome. New Acute Coronary Syndrome Study Findings Have Been Reported by Researchers at First Affiliated Hospital (Platelet–to–Lymphocyte Ratio Improves the Predictive Power of GRACE Risk Score for Long–Term Cardiovascular Events in Patients with Acute ...) … p.3104

Oncology - Acute Myeloid Leukemia. New Acute Myeloid Leukemia Data Have Been Reported by Investigators at University of Pittsburgh (Leukapheresis in patients newly diagnosed with acute myeloid leukemia) … p.3106

Acute Myeloid Leukemia. New Acute Myeloid Leukemia Findings from University of Halle Outlined (Azacitidine in combination with intensive induction chemotherapy in older patients with acute myeloid leukemia: The AML–AZA trial of the Study Alliance Leukemia) … p.3107

Drugs and Therapies - Acyclovir Therapy. New Acyclovir Therapy Findings from King Faisal University Described (Quantification of uptake and clearance of acyclovir in skin layers) … p.3108

Musculoskeletal Diseases and Conditions - Adamantinoma. New Adamantinoma Findings Reported from Medical University (Long–term outcome following treatment of Adamantinoma and Osteofibrous dysplasia of long bones) … p.3109

Adenocarcinomas. New Adenocarcinomas Findings from Medical College of Wisconsin Described (Expression, Modulation, and Clinical Correlates of the Autophagy Protein Beclin–1 in Esophageal Adenocarcinoma) … p.3110
Adenocarcinomas. New Adenocarcinomas Findings from State University Described [Antiproliferative activity of monastrol in human adenocarcinoma (MCF–7) and non–tumor (HB4a) breast cells] ... p.3111

Membrane Proteins - Adenosine A2 Receptors. New Adenosine A2 Receptors Study Findings Have Been Reported by Researchers at AstraZeneca (Structure–Activity Relationships of the Sustained Effects of Adenosine A2A Receptor Agonists Driven by Slow Dissociation Kinetics) ... p.3112

Drugs and Therapies - Adriamycin Therapy. New Adriamycin Therapy Findings from Istanbul Bilim University Described (The Cooperative Effect of Local Angiotensin–II in Liver with Adriamycin Hepatotoxicity on Mitochondria) ... p.3113

Drugs and Therapies - Adverse Drug Reactions. New Adverse Drug Reactions Study Findings Have Been Reported by Researchers at China Medical University and Hospital (Clinical Outcomes of Infants With Periorbital Hemangiomas Treated With Oral Propranolol) ... p.3114

Life Science Research - Agricultural and Environmental Medicine. New Agricultural and Environmental Medicine Study Findings Have Been Reported from University of Vigo (Prediction of biological sensors appearance with ARIMA models as a tool for Integrated Pest Management protocols) ... p.3115

Enzymes and Coenzymes - Aldehyde Oxidoreductases. New Aldehyde Oxidoreductases Findings Has Been Reported by Investigators at General Hospital (The Alcohol Intolerance Produced by Isoniazid Is Not Due to a Disulfiram–Like Reaction Despite Aldehyde Dehydrogenase Inhibition) ... p.3116

Enzymes and Coenzymes - Aldehyde Oxidoreductases. New Aldehyde Oxidoreductases Findings from University of Graz Reported (Formation of Nitric Oxide by Aldehyde Dehydrogenase–2 Is Necessary and Sufficient for Vascular Bioactivation of Nitroglycerin) ... p.3117

Algorithms. New Algorithms Findings from University of Perugia Described (Inherited Platelet Function Disorders: Algorithms for Phenotypic and Genetic Investigation) ... p.3119

Immunology - Allergy Immunology. New Allergy Immunology Study Findings Recently Were Reported by Researchers at Copenhagen University Hospital (High alcohol consumption causes high IgE levels but not high risk of allergic disease) ... p.3120

Skin Diseases and Conditions - Alopecia. New Alopecia Study Findings Have Been Reported by Researchers at Sheffield Teaching Hospitals NHS Foundation Trust (Risk adapted single–agent dactinomycin or carboplatin for second–line treatment of methotrexate resistant low–risk gestational ...) ... p.3121

Skin Diseases and Conditions - Alopecia. New Alopecia Study Results Reported from Department of Dermatology (Guidelines on the use of finasteride in androgenetic alopecia) ... p.3122

Neurodegenerative Diseases and Conditions - Alzheimer Disease. New Alzheimer Disease Findings from Central Michigan University Described (Mesenchymal Stem Cells as Treatment for Behavioral Deficits and Neuropathology in the 5xFAD Mouse Model of Alzheimer's Disease) ... p.3123
Neurodegenerative Diseases and Conditions - Alzheimer Disease.
New Alzheimer Disease Findings from Vrije University Described (Blood–Brain Barrier ABC–transporter P–glycoprotein in Alzheimer's Disease: Still a Suspect?) … p.3124

Neurodegenerative Diseases and Conditions - Alzheimer Disease.
New Alzheimer Disease Study Findings Have Been Reported by Researchers at University of Duisburg–Essen (Kallikrein–8 inhibition attenuates Alzheimer’s disease pathology in mice) … p.3125

Neurodegenerative Diseases and Conditions - Alzheimer Disease.
New Alzheimer Disease Study Results from Faculty of Medicine Described (Knowledge and pharmacological management of Alzheimer's disease by managing community pharmacists: a nationwide study) … p.3126

Enzymes and Coenzymes - Amidohydrolases.
New Amidohydrolases Findings Has Been Reported by Investigators at University of Washington (Class I Histone Deacetylase HDAC1 and WRN RECQ Helicase Contribute Additively to Protect Replication Forks upon Hydroxyurea–induced Arresel) … p.3127

Enzymes and Coenzymes - Amidohydrolases.
New Amidohydrolases Study Findings Have Been Reported by Investigators at University of Liege (Interaction of Avibactam with Class B Metallo–beta–Lactamases) … p.3129

Drugs and Therapies - Aminoglycosides.
New Aminoglycosides Findings Reported from Washington University (Perilymph pharmacokinetics of locally–applied gentamicin in the guinea pig) … p.3130

Drugs and Therapies - Ampicillins.
New Ampicillins Study Findings Recently Were Reported by Researchers at University of Paris [Sub–stoichiometric titanium oxide (Ti4O7) as a suitable ceramic anode for electrooxidation of organic pollutants: A case study of kinetics, ...] … p.3131

Chemistry - Analytical Chemistry.
New Analytical Chemistry Study Findings Have Been Reported from University of Copenhagen (Aspects of Quantitation in Mass Spectrometry Imaging Investigated on Cryo–Sections of Spiked Tissue Homogenates) … p.3132

Oncology - Anaplastic Large Cell Lymphoma.
New Anaplastic Large Cell Lymphoma Study Results from Department of Hematology Described (Detection of an early adult T–cell leukemia–lymphoma clone in lymph nodes with anaplastic lymphoma kinase–negative anaplastic large cell lymphoma ...) … p.3133

Heart Disorders and Diseases - Andersen-Tawil Syndrome.
New Andersen–Tawil Syndrome Findings from Cleveland Clinic Outlined (The evolution of sports participation guidelines and the influence of genotype–phenotype correlation in long QT syndrome) … p.3134

Hematologic Diseases and Conditions - Anemia.
New Anemia Findings from Peking University Reported (Anemia Among Lactating Mothers In Kokang, Myanmar) … p.3135
January 14, 2017

Pain Medicine - Anesthesiology. New Anesthesiology Study Results from University of Manitoba Described (Neurodevelopmental Assessment in Kindergarten in Children Exposed to General Anesthesia before the Age of 4 Years A Retrospective Matched Cohort Study) … p.3136

Cardiovascular Diseases and Conditions - Aneurysm. New Aneurysm Findings from National University Reported [Insights from complex aortic surgery with a Streamliner device for aortic arch repair (STAR)] … p.3137

Cardiovascular Diseases and Conditions - Aneurysm. New Aneurysm Study Findings Have Been Reported by Researchers at Department of Vascular Surgery (Staged Hybrid Repair of an Intrathoracic Subclavian Artery Aneurysm Associated with a Long Segment Dissection) … p.3138

Cardiovascular Diseases and Conditions - Aneurysm. New Aneurysm Study Findings Recently Were Reported by Researchers at Eastern Virginia School of Medicine (Anatomic severity grading score for primary descending thoracic aneurysms predicts procedural difficulty and aortic–related ...) … p.3139

Angiogenesis. New Angiogenesis Findings from DZHK German Center for Cardiovascular Research Described (PAFAH1B1 and the lncRNA NONHSAT073641 maintain an angiogenic phenotype in human endothelial cells) … p.3140

Angiogenesis. New Angiogenesis Study Findings Have Been Reported from Beijing University of Technology (Silver nanoparticles inhibit the function of hypoxia–inducible factor–1 and target genes: insight into the cytotoxicity and antiangiogenesis) … p.3142

Angiogenesis. New Angiogenesis Study Findings Recently Were Reported by Researchers at Henan University of Technology (Identification of resveratrol derivative 3,3 ',4,4 ',5,5 '–hexamethoxy–trans–stilbene as a novel pro–angiogenic small–molecule compound) … p.3143

Angiography. New Angiography Findings from Chinese People’s Liberation Army General Hospital Described (Prognostic Value of Gai’s Plaque Score and Agatston Coronary Artery Calcium Score for Functionally Significant Coronary Artery Stenosis) … p.3144

Angiology. New Angiology Data Have Been Reported by Investigators at Johns Hopkins University (Successful facial artery pseudoaneurysm coiling and pedicle preservation following free tissue transfer) … p.3145

Angiology. New Angiology Data Have Been Reported by Researchers at Nippon Veterinary and Life Science University (Endothelium–Dependent and –Independent Vasodilator Effects of Dimethyl Sulfoxide in Rat Aorta) … p.3146

Angiology. New Angiology Findings Reported from Yantai University [Endothelium–independent vasorelaxant effect of 20(S)–protopanaxadiol on isolated rat thoracic aorta] … p.3147

Angiology. New Angiology Findings from Tongji University Discussed (Combined use of Onyx and coils for transarterial balloon–assisted embolization of traumatic carotid–cavernous fistulas: a report of 16 cases with 17 fistulas) … p.3148
Angiology. New Angiology Findings from University of Bristol Described (Right internal thoracic artery versus radial artery as the second best arterial conduit: Insights from a meta–analysis of propensity–matched data on long–term survival) ... p.3149

Angiology. New Angiology Study Findings Recently Were Reported by Researchers at Boston University (Cross–Sectional Associations of Flow Reversal, Vascular Function, and Arterial Stiffness in the Framingham Heart Study) ... p.3150

Angiology. New Angiology Study Findings Recently Were Reported by Researchers at University College (A systematic review and meta–analysis of donor ischaemic preconditioning in liver transplantation) ... p.3151

Angiology. New Angiology Study Findings Recently Were Reported by Researchers at Wenzhou Medical University (High serum levels of sclerostin and Dickkopf–1 are associated with acute ischaemic stroke) ... p.3152

Drugs and Therapies - Angiotensins. New Angiotensins Findings Has Been Reported by Investigators at Shanghai University (Swertiamarin Attenuates Experimental Rat Hepatic Fibrosis by Suppressing Angiotensin II–Angiotensin Type 1 Receptor–Extracellular Signal–Regulated Kinase ...) ... p.3154
January 14, 2017

Drugs and Therapies - Antibiotics. New Antibiotics Findings Has Been Reported by Investigators at Public Hospital System (Determination of Colistin and Colistimethate Levels in Human Plasma and Urine by High–Performance Liquid Chromatography–Tandem Mass Spectrometry) … p.3162

Drugs and Therapies - Antibiotics. New Antibiotics Findings from Baylor University College of Medicine Described (Nonprescription Antimicrobial Use in a Primary Care Population in the United States) … p.3163

Drugs and Therapies - Antibiotics. New Antibiotics Findings from Chinese University of Hong Kong Reported (Fabrication of doxorubicin nanoparticles by controlled antisolvent precipitation for enhanced intracellular delivery) … p.3164

Drugs and Therapies - Antibiotics. New Antibiotics Study Findings Have Been Reported by Researchers at University of Lyon (Impact of untreated urban waste on the prevalence and antibiotic resistance profiles of human opportunistic pathogens in agricultural soils from Burkina Faso) … p.3165

Drugs and Therapies - Antibiotics. New Antibiotics Study Findings Have Been Reported by Researchers at University of Santiago (First Multitarget Chemo–Bioinformatic Model To Enable the Discovery of Antibacterial Peptides against Multiple Gram–Positive Pathogens) … p.3166

Drugs and Therapies - Antibiotics. New Antibiotics Study Findings Have Been Reported from Peking University (The Promising Nanocarrier for Doxorubicin and siRNA Co–delivery by PDMAEMA–based Amphiphilic Nanomicelles) … p.3167

www.NewsRx.com

Drugs and Therapies - Antibiotics. New Antibiotics Study Findings Recently Were Reported by Researchers at University of Messina (Tunable doxorubicin release from polymer–gated multiwalled carbon nanotubes) … p.3168

Drugs and Therapies - Antibiotics. New Antibiotics Study Results Reported from Jichi Medical University (Improvement of Predictivity of Teicoplanin Serum Trough Concentrations at Steady State Calculated by Vancomycin Pharmacokinetic Parameter) … p.3169

Drugs and Therapies - Antibiotics. New Antibiotics Study Results Reported from McMaster University (A diverse intrinsic antibiotic resistome from a cave bacterium) … p.3170

Drugs and Therapies - Antibiotics. New Antibiotics Study Results Reported from Princeton University (Rapid emergence and mechanisms of resistance by U87 glioblastoma cells to doxorubicin in an in vitro tumor microfluidic ecology) … p.3171

Drugs and Therapies - Anticholinergics. New Anticholinergics Data Have Been Reported by Investigators at Zhejiang University (Benzoate fraction from Gentiana rigescens Franch alleviates scopolamine–induced impaired memory in mice model in vivo) … p.3172

Drugs and Therapies - Antidepressants. New Antidepressants Findings from Swiss Federal Institute of Technology Described (Solar photo–Fenton and UV/H2O2 processes against the antidepressant Venlafaxine in urban wastewaters and human urine. Intermediates formation and …) … p.3173

Drugs and Therapies - Antiepileptics. New Antiepileptics Data Have Been Reported by Researchers at University of Helsinki Central Hospital (Evidence for spared attention to faces in 7–month–old infants after prenatal exposure to antiepileptic drugs) … p.3174
Drugs and Therapies - Antifungals. New Antifungals Findings Reported from Federal University (Drug utilization study of systemic antifungal agents in a Brazilian tertiary care hospital) ... p.3175

Drugs and Therapies - Antifungals. New Antifungals Findings from University of Liege Discussed (Continuous production of itraconazole–based solid dispersions by hot melt extrusion: Preformulation, optimization and design space determination) ... p.3177

Drugs and Therapies - Antifungals. New Antifungals Study Findings Have Been Reported by Investigators at Consejo Nacl Invest Cient and Tecn (Aspergillus fumigatus Intrinsic Fluconazole Resistance Is Due to the Naturally Occurring T301I Substitution in Cyp51Ap) ... p.3178

Drugs and Therapies - Antifungals. New Antifungals Study Findings Have Been Reported from Shujitsu University [Substrate Specificity of Human Cytochrome P450 (CYP) 2C Subfamily and Effect of Azole Antifungal Agents on CYP2C8] ... p.3179

Drugs and Therapies - Antifungals. New Antifungals Study Findings Reported from Duke Clinical Research Institute (Population Pharmacokinetics of Fluconazole in Premature Infants with Birth Weights Less than 750 Grams) ... p.3180

Drugs and Therapies - Antihyperlipidemic Agents. New Antihyperlipidemic Agents Data Have Been Reported by Investigators at Bristol–Myers Squibb [Biliary excretion of pravastatin and taurocholate in rats with bile salt export pump (Bsep) impairment] ... p.3181

Drugs and Therapies - Antihyperlipidemic Agents. New Antihyperlipidemic Agents Data Have Been Reported by Researchers at Biochemistry Laboratory (A Cross–Reactivity of Fenofibric Acid With MDMA DRI Assay) ... p.3182

Drugs and Therapies - Antimicrobials. New Antimicrobials Findings from D.M. Meng and Co–Authors Described (Recombinant expression, purification and antimicrobial activity of a novel antimicrobial peptide PaDef in Pichia pastoris) ... p.3183

Drugs and Therapies - Antimicrobials. New Antimicrobials Study Findings Have Been Reported by Researchers at Autonomous University (Antimicrobial Activity of Silver Nanoparticles in Polycaprolactone Nanofibers against Gram–Positive and Gram–Negative Bacteria) ... p.3184

Drugs and Therapies - Antimicrobials. New Antimicrobials Study Findings Reported from Federal University [In Vitro Activity of Melaleuca alternifolia (Tea Tree) in Its Free Oil and Nanoemulsion Formulations Against Pythium insidiosum] ... p.3185

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. New Antineoplastic Monoclonal Antibodies Study Results from R.L. Dillon et al Described (Trastuzumab–deBouganin Conjugate Overcomes Multiple Mechanisms of T–DM1 Drug Resistance) ... p.3186

Drugs and Therapies - Antineoplastics. New Antineoplastics Findings from Kyoto Pharmaceutical University Described (Population Pharmacodynamic Model for Bayesian Prediction of Myelosuppression Profiles Based on Routine Clinical Data after Gemcitabine and Carboplatin Treatment) ... p.3187

Drugs and Therapies - Antineoplastics. New Antineoplastics Findings from University of Calabria Outlined [Novel microspheres based on triterpene saponins from the roots of Physospermum verticillatum (Waldst & Kit) (Apiaceae) for the improvement of gemcitabine release] ... p.3188
Drugs and Therapies - Antineoplastics.
New Antineoplastics Study Findings Have Been Reported by Researchers at Duke University Medical Center (Lapatinib Plasma and Tumor Concentrations and Effects on HER Receptor Phosphorylation in Tumor) … p.3189

Drugs and Therapies - Antineoplastics.
New Antineoplastics Study Findings Recently Were Reported by Researchers at University of Montreal (Pharmacokinetics and the effect of heat on intraperitoneal pemetrexed using a murine model) … p.3190

Drugs and Therapies - Antipsychotics.

Drugs and Therapies - Antiretrovirals.
New Antiretrovirals Study Findings from Catholic University of Leuven Reported [Distinct Effects of T–705 (Favipiravir) and Ribavirin on Influenza Virus Replication and Viral RNA Synthesis] … p.3192

Drugs and Therapies - Antiretrovirals.
New Antiretrovirals Study Findings Have Been Reported by Investigators at Center for Disease Control and Prevention (Trends in Racial and Ethnic Disparities in Antiretroviral Therapy Prescription and Viral Suppression in the United States, ...) … p.3193

Drugs and Therapies - Antiretrovirals.
New Antiretrovirals Study Findings Have Been Reported by Researchers at University of British Columbia (Factors associated with initiation of antiretroviral therapy among HIV–positive people who use injection drugs in a Canadian setting) … p.3195

Drugs and Therapies - Antiretrovirals.

Antithrombins. New Antithrombins Data Have Been Reported by A. Bouchnita and Co–Authors (Influence of Antithrombin on the Regimes of Blood Coagulation: Insights from the Mathematical Model) … p.3197

Drugs and Therapies - Antivirals. New Antivirals Study Findings Recently Were Reported by Researchers at Los Alamos National Laboratory (Modelling the interaction between danoprevir and mericitabine in the treatment of chronic HCV infection) … p.3198

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics. New Anxiolytics Sedatives and Hypnotics Study Findings Have Been Reported by A.O. James and Colleagues (Something old, something new: a successful case of meprobamate withdrawal) … p.3198

Apoptosis. New Apoptosis Data Have Been Reported by Investigators at Chongqing University (PEG–b–PCL polymeric nano–micelle inhibits vascular angiogenesis by activating p53–dependent apoptosis in zebrafish) … p.3199

Apoptosis. New Apoptosis Findings from Biomedical Center Reported (Retrotransposon derepression leads to activation of the unfolded protein response and apoptosis in pro–B cells) … p.3200

Apoptosis. New Apoptosis Findings from H. Xiao and Co–Researchers Reported
(N–Acetyl–L–cysteine Protects the Enterocyte against Oxidative Damage by Modulation of Mitochondrial Function) ... p.3202

Apoptosis. New Apoptosis Study Findings Have Been Reported from Central South University (MicroRNA–142–3p inhibits hypoxia/reoxygenation–induced apoptosis and fibrosis of cardiomyocytes by targeting high mobility group box 1) ... p.3203

Applied Bioinformatics. New Applied Bioinformatics Findings from S. Pirro and Colleagues Discussed (Bioinformatics Prediction and Experimental Validation of MicroRNAs Involved in Cross–Kingdom Interaction) ... p.3204

Life Science Research - Aquatic Toxicology. New Aquatic Toxicology Findings from Dalian Ocean University Described (Ocean acidification stimulates alkali signal pathway: A bicarbonate sensing soluble adenylyl cyclase from oyster Crassostrea gigas mediates physiological changes induced by ...) ... p.3205

Membrane Proteins - Arrestins. New Arrestins Findings from Duke University Described (Distinct cortical and striatal actions of a beta–arrestin–biased dopamine D2 receptor ligand reveal unique antipsychotic–like properties) ... p.3206

Arrhythmia. New Arrhythmia Study Results Reported from Yang Ming National University (Pleiotropic Effects of Myocardial MMP–9 Inhibition to Prevent Ventricular Arrhythmia) ... p.3207

Heart Disorders and Diseases - Arrhythmogenic Right Ventricular Dysplasia. New Arrhythmogenic Right Ventricular Dysplasia Findings Reported from University of British Columbia (Long–term right ventricular implantable cardioverter–defibrillator lead performance in arrhythmogenic right ventricular cardiomyopathy) ... p.3208

Arsenic. New Arsenic Study Findings Recently Were Reported by Researchers at Jilin Agricultural University (Determination and pharmacokinetic properties of arsenic speciation in Xiao–Er–Zhi–Bao–Wan by high–performance liquid chromatography with ...) ... p.3209

Arsenicals. New Arsenicals Study Findings Recently Were Reported by Researchers at Nanjing Medical University (A MALAT1/HIF–2a feedback loop contributes to arsenite carcinogenesis) ... p.3210

Arsenicals. New Arsenicals Study Findings Recently Were Reported by Researchers at Sichuan University (Arsenite–induced endoplasmic reticulum–dependent apoptosis through disturbance of calcium homeostasis in HBE cell line) ... p.3211

Arteriovenous Malformation. New Arteriovenous Malformation Findings from Careggi University Hospital Outlined (Curative Transvenous Onyx Embolization of a Maxillary Arteriovenous Malformation in a Child: Report of a New Technique) ... p.3212

Musculoskeletal Diseases and Conditions - Arthritis. New Arthritis Findings from University of Edinburgh Described (PTPN22 Is a Critical Regulator of Fc gamma Receptor–Mediated Neutrophil Activation) ... p.3213

Biomedical Engineering - Artificial Cartilage. New Artificial Cartilage Study Findings Reported from University of Copenhagen (Role of Electrostatic Interactions on the Transport of Druglike Molecules in Hydrogel–Based Articular Cartilage Mimics: Implications for Drug Delivery) ... p.3214
Lung Diseases and Conditions - Asthma. New Asthma Study Results Reported from Norwegian Institute of Public Health (Maternal plasma total neopterin and kynurenine/tryptophan levels during pregnancy in relation to asthma development in the offspring) … p.3222

Cardiovascular Diseases and Conditions - Atherosclerosis. New Atherosclerosis Findings Has Been Reported by Investigators at Fox Chase Cancer Center (The role of cytokines in the development of atherosclerosis) … p.3225

Cardiovascular Diseases and Conditions - Atherosclerosis. New Atherosclerosis Findings from Gifu University Reported (Different Susceptibilities between Apoe– and Ldlr–Deficient Mice to Inflammation–Associated Colorectal Carcinogenesis) … p.3226

Cardiovascular Diseases and Conditions - Atherosclerosis. New Atherosclerosis Study Findings Recently Were Reported by Researchers at Affiliated Hospital (Trimethylamine N-oxide induces inflammation and endothelial dysfunction in human umbilical vein endothelial cells via activating ROS–TXNIP–NLRP3 ...) … p.3228

Cardiovascular Diseases and Conditions - Atherosclerosis. New Atherosclerosis Study Findings Recently Were Reported by Researchers at University of Antwerp (NecroX–7 reduces necrotic core formation in atherosclerotic plaques of Apoe knockout mice) … p.3229

Skin Diseases and Conditions - Atopic Dermatitis. New Atopic Dermatitis Study Findings Have Been Reported by Researchers at Department of Pediatrics (Bacterial and Viral Infections in Atopic Dermatitis: a Comprehensive Review) … p.3230

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Data Have Been Reported by R.A. Winkle and Co–Authors (Predicting atrial fibrillation ablation outcome: The CAAP–AF score) … p.3231

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings Has Been Reported by Researchers at Research Hospital (Predictors of Future Atrial Fibrillation Development in Patients with Hypertrophic Cardiomyopathy: A Prospective Follow–Up Study) … p.3232

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from Cleveland Clinic Described (Evolving strategies to prevent stroke and thromboembolism in nonvalvular atrial fibrillation) … p.3233

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from Guangdong Cardiovascular Institute Reported (Association of Serum Omentin–1 Concentrations with the Presence of Atrial Fibrillation) … p.3234

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from Mayo Clinic Outlined (Left Atrial Appendage Closure for Stroke Prevention in Atrial Fibrillation) … p.3235

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from R.J. Piers et al Outlined (Association between atrial fibrillation and volumetric magnetic resonance imaging brain measures: Framingham Offspring Study) … p.3236

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from University of British Columbia Described (Cost–Effectiveness of Left Atrial Appendage Closure for Stroke Prevention in Atrial Fibrillation Patients With Contraindications to Anticoagulation) … p.3237

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings from University of Witten Described (Impact of Cryoballoon Ablation in Hypertrophic Cardiomyopathy–related Heart Failure due to Paroxysmal Atrial Fibrillation. A Comparative Case Series) … p.3238
Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Findings Have Been Reported by Investigators at Center for Research and Advanced Studies of the National Polytechnic Institute (CINVESTAV) (Chronic atrial ionic remodeling by aldosterone: potentiation of L-type ...) ... p.3239

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Findings Have Been Reported by Investigators at Wenzhou Medical University (Direct His–Bundle Pacing Improved Left Ventricular Function and Remodelling in a Biventricular Pacing Nonresponder) ... p.3240

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Findings Recently Were Reported by Researchers at University of Leipzig (Successful Repeat Catheter Ablation of Recurrent Longstanding Persistent Atrial Fibrillation With Rotor Elimination as the Procedural ...) ... p.3241

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Findings Reported from Brigham and Women's Hospital (Hospital–level variation and predictors of admission after ED visits for atrial fibrillation: 2006 to 2011) ... p.3242

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Findings Reported from University of Palermo (Relationship between HRV measurements and demographic and clinical variables in a population of patients with atrial fibrillation) ... p.3243

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Results Reported from Medical College of Georgia (Is It Time to Incorporate the Left Atrial Size to the Current Stroke Risk Scoring Systems for Atrial Fibrillation?) ... p.3244

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Study Results Reported from University of Massachusetts (Association of Left Atrial Function Index With Late Atrial Fibrillation Recurrence after Catheter Ablation) ... p.3245

Heart Disorders and Diseases - Atrial Fibrillation. New Atrial Fibrillation Findings Have Been Reported from Intermountain Medical Center (A Comparison of Remote Magnetic Irrigated Tip Ablation versus Manual Catheter Irrigated Tip Catheter Ablation With and Without Force Sensing Feedback) ... p.3246

Atrial Septal Defects. New Atrial Septal Defects Study Findings Recently Were Reported by Researchers at Bordeaux Segalen University (Long–term Complications After Transcatheter Atrial Septal Defect Closure: A Review of the Medical Literature) ... p.3247

Developmental Diseases and Conditions - Autism Spectrum Disorders. New Autism Spectrum Disorders Data Have Been Reported by Investigators at University of California (If genetic variation could talk: What genomic data may teach us about the importance of gene expression regulation in the genetics of autism) ... p.3248

Oncology - B-Cell Leukemia. New B–Cell Leukemia Findings from University Medical Center Described (Hepatic B cell leukemia–3 promotes hepatic steatosis and inflammation through insulin–sensitive metabolic transcription factors) ... p.3249

Oncology - B-Cell Lymphoma. New B–Cell Lymphoma Data Have Been Reported by Investigators at National Institutes of Health [Molecular Determinants of Scaffold–induced Linear Ubiquitylation of B Cell Lymphoma/Leukemia 10 (Bcl10) during T Cell Receptor and Oncogenic Caspase ...] ... p.3250
January 14, 2017

Oncology - B-Cell Lymphoma. New B-Cell Lymphoma Study Findings Recently Were Reported by Researchers at Fujita Health University (Influence of R-CHOP Therapy on Immune System Restoration in Patients with B-Cell Lymphoma) ... p.3251

Oncology - B-Cell Lymphoma. New B-Cell Lymphoma Study Results from Xinjiang Medical University Described (Immunological subtypes analysis of Uygur diffuse large B-cell lymphoma in Xinjiang and their prognostic significance) ... p.3252

Gram-Positive Bacteria - Bacillus anthracis. New Bacillus anthracis Study Findings Have Been Reported by Researchers at Georgia State University (Loss of sI affects heat-shock response and virulence gene expression in Bacillus anthracis) ... p.3253

Surgery - Bariatric Surgery. New Bariatric Surgery Findings from University of Malaga Reported (Metabolomics-Guided Insights on Bariatric Surgery Versus Behavioral Interventions for Weight Loss) ... p.3254

Biological Factors - Bee Venoms. New Bee Venoms Study Findings Recently Were Reported by Researchers at Department of Pharmacology (Characterization of relaxant mechanism of H2S in mouse corpus cavernosum) ... p.3255

Autoimmune Diseases and Conditions - Behcet Disease. New Behcet Disease Findings from Department of Ophthalmology Reported (INTRAVITREAL INFLIXIMAB IN REFRACTORY UVEITIS IN BEHCET’S DISEASE A Safety and Efficacy Clinical Study) ... p.3256

Biguanides. New Biguanides Study Findings Have Been Reported from Lanzhou University (Metoprolol decreases the plasma exposure of metformin via the induction of liver, kidney and muscle uptake in rats) ... p.3257

Chemistry - Biochemistry. New Biochemistry Data Have Been Reported by Investigators at McGill University (Crystal Structure of the Acid Sphingomyelinase-like Phosphodiesterase SMPDL3B Provides Insights into Determinants of Substrate Specificity) ... p.3258

Life Science Research - Biochemistry and Biophysics. New Biochemistry and Biophysics Study Findings Have Been Reported by Investigators at University of Wisconsin (Ligand binding phenomena that pertain to the metabolic function of renalase) ... p.3259

Biological Factors - Biological Pigments. New Biological Pigments Findings from University of Yaounde Described (Simultaneous determination of acetaminophen and tyrosine using a glassy carbon electrode modified with a tetraruthenated cobalt(II) porphyrin intercalated into a smectite ...) ... p.3260

Drugs and Therapies - Biopharmaceuticals. New Biopharmaceuticals Study Results from University of Tehran Described (Outer membrane protein 100 of Aggregatibacter actinomycetemcomitans act as a biopharmaceutical target for photodynamic therapy: An in silico analysis) ... p.3261

Drugs and Therapies - Biotherapies and Biologicals. New Biotherapies and Biologicals Study Findings Have Been Reported from Pfizer (Biosimilars for the Treatment of Chronic Inflammatory Diseases: A Systematic Review of Published Evidence) ... p.3262

Oncology - Bladder Cancer. New Bladder Cancer Data Have Been Reported by Investigators at Okayama University (Dynamin2 GTPase contributes to invadopodia formation in invasive bladder cancer cells) ... p.3263
January 14, 2017

Oncology - Bladder Cancer. New Bladder Cancer Findings Has Been Reported by Investigators at Division of Cancer Surgery (A Systematic Review of Ileal Conduit and Neobladder Outcomes in Primary Bladder Cancer) … p.3264

Cell Research - Blood Cells. New Blood Cells Data Have Been Reported by Investigators at Duke University (Sevuparin binds to multiple adhesive ligands and reduces sickle red blood cell–induced vaso–occlusion) … p.3265

Hematology - Blood Coagulation Factors. New Blood Coagulation Factors Findings Has Been Reported by Researchers at Institute of Biotechnology and Antibiotics (The factor VIII protein and its function) … p.3267

Blood Pressure. New Blood Pressure Data Have Been Reported by Researchers at Tohoku University Graduate School of Medicine (Maternal clinic and home blood pressure measurements during pregnancy and infant birth weight: the BOSHI study) … p.3269

Blood Pressure. New Blood Pressure Findings from Federal University Outlined (Power spectrum analysis of cardiovascular variability during passive heating in conscious rats) … p.3270

Blood Pressure. New Blood Pressure Findings from University of Brasilia Reported (Carotid baroreflex function at the onset of cycling in men) … p.3271

Blood Pressure. New Blood Pressure Study Findings Recently Were Reported by Researchers at Queensland University of Technology (Outdoor Temperature, Heart Rate and Blood Pressure in Chinese Adults: Effect Modification by Individual Characteristics) … p.3272

Blood Pressure. New Blood Pressure Study Results Reported from Duke University [Influence of Kidney Function on Blood Pressure Response to Lifestyle Modifications: Secondary Analysis From the Exercise and Nutritional Interventions for Cardiovascular Health …] … p.3273

Blood Pressure. New Blood Pressure Study Results Reported from Federal University (Sedentary Behavior and Light Physical Activity Are Associated with Brachial and Central Blood Pressure in Hypertensive Patients) … p.3274

Blood Pressure. New Blood Pressure Study Results Reported from Osaka Medical College Described (Improvement of cardiovascular remodelling by chymase inhibitor) … p.3275

Proteins - Blood Proteins. New Blood Proteins Findings from Ben–Gurion University of the Negev Described (T Helper Subsets, Peripheral Plasticity, and the Acute Phase Protein, a1–Antitrypsin) … p.3276

Transfusion Medicine - Blood Transfusion. New Blood Transfusion Data Have Been Reported by Investigators at Radboud University (Effects of a human recombinant alkaline phosphatase on renal hemodynamics, oxygenation and inflammation in two models of acute kidney injury) … p.3277
Transfusion Medicine - Blood Transfusion. New Blood Transfusion Findings Has Been Reported by E.H. Tischler et al (Are Preoperative Serologic Type and Screen Tests Necessary for Primary Total Joint Arthroplasty Patients in Specialty Surgical Hospitals?) … p.3278

Transfusion Medicine - Blood Transfusion. New Blood Transfusion Study Findings Have Been Reported by Investigators at Shanghai Jiao–Tong University (Inhibition of PKR protects against H2O2–induced injury on neonatal cardiac myocytes by attenuating apoptosis and inflammation) … p.3279

Transfusion Medicine - Blood Transfusion. New Blood Transfusion Study Findings Have Been Reported from University of Rochester (ABO–immune complex formation and impact on platelet function, red cell structural integrity and haemostasis: an in vitro model of ABO non–identical transfusion) … p.3280

Transfusion Medicine - Blood Transfusion. New Blood Transfusion Study Findings Recently Were Reported by C. L’Acqua and Co–Researchers (Red blood cell transfusion is associated with increased hemolysis and an acute phase response in a subset of critically ill children) … p.3281

Blood Vessels. New Blood Vessels Findings from Florida International University Described (Echocardiographic and Surgical Correlation of Coronary Artery Patterns in Transposition of the Great Arteries) … p.3282

Cell Research - Bone Marrow Cells. New Bone Marrow Cells Study Findings Recently Were Reported by Researchers at State University of New York (Identification of a potent small molecule capable of regulating polyplidization, megakaryocyte maturation, and platelet production) … p.3283

Bone Research. New Bone Research Data Have Been Reported by Investigators at Azienda Ospedaliera University (The Use of Integra Dermal Regeneration Template Versus Flaps for Reconstruction of Full–Thickness Scalp Defects Involving the Calvaria: A Cost–Benefit …) … p.3284

Bone Research. New Bone Research Study Findings Reported from University of Tokushima (The Nuclear Receptor AhR Controls Bone Homeostasis by Regulating Osteoclast Differentiation via the RANK/c–Fos Signaling Axis) … p.3285

Musculoskeletal Diseases and Conditions - Bone Resorption. New Bone Resorption Study Findings Have Been Reported by Investigators at Japan Science and Technology Agency (Circadian Clock Regulates Bone Resorption in Mice) … p.3286

Drugs and Therapies - Botulinum Toxin Therapy. New Botulinum Toxin Therapy Study Findings Have Been Reported by Researchers at University Hospital (Sensorimotor modulation by botulinum toxin A in post–stroke arm spasticity: Passive hand movement) … p.3287

Proteins - Bovine Serum Albumin. New Bovine Serum Albumin Findings from Kingston University Outlined (Efficient approach to enhance drug solubility by particle engineering of bovine serum albumin) … p.3288

Heart Disorders and Diseases - Bradycardia. New Bradycardia Findings from C.M. Harris and Co–Researchers Described [Sphingosine–1–Phosphate (S1P) Lyase Inhibition Causes Increased Cardiac S1P Levels and Bradycardia in Rats] … p.3289
Heart Disorders and Diseases - Bradycardia. New Bradycardia Study Findings Recently Were Reported by Researchers at Inje University (Anticholinergic premedication to prevent bradycardia in combined spinal anesthesia and dexmedetomidine sedation: a randomized, double-blind, ...). p.3290

Neuropeptides - Bradykinin. New Bradykinin Study Findings Have Been Reported by Investigators at University of Texas (Constitutive Desensitization of Opioid Receptors in Peripheral Sensory Neurons). p.3291

Oncology - Brain Cancer. New Brain Cancer Study Findings Recently Were Reported by Researchers at University of Western Ontario (Topiramate induces acute intracellular acidification in glioblastoma). p.3293

Central Nervous System Diseases and Conditions - Brain Injuries. New Brain Injuries Findings Has Been Reported by Investigators at Tel Aviv University (Novel pharmaceutical treatments for minimal traumatic brain injury and evaluation of animal models and methodologies supporting their development). p.3294

Central Nervous System Diseases and Conditions - Brain Injuries. New Brain Injuries Study Findings Have Been Reported by Researchers at University of Michigan (Early resuscitation with lyophilized plasma provides equal neuroprotection compared with fresh frozen plasma in a large animal survival model of ...). p.3295

Central Nervous System - Brain Research. New Brain Research Study Findings Have Been Reported by Researchers at University of Georgia (Dorsomedial hypothalamic NPY affects cholecystokinin–induced satiety via modulation of brain stem catecholamine neuronal signaling). p.3296

Oncology - Breast Cancer. New Breast Cancer Data Have Been Reported by Investigators at China Academy of Chinese Medical Sciences (Low doses of paclitaxel enhance liver metastasis of breast cancer cells in the mouse model). p.3297

Oncology - Breast Cancer. New Breast Cancer Data Have Been Reported by Investigators at University of Athens (Current Evidence and Future Perspectives on HuR and Breast Cancer Development, Prognosis, and Treatment). p.3298

Oncology - Breast Cancer. New Breast Cancer Data Have Been Reported by Researchers at University of Gothenburg (Lipid Heterogeneity Resulting from Fatty Acid Processing in the Human Breast Cancer Microenvironment Identified by GCIB–ToF–SIMS Imaging). p.3299

Oncology - Breast Cancer. New Breast Cancer Findings Has Been Reported by Investigators at Wake Forest University (Irreversible electroporation inhibits pro–cancer inflammatory signaling in triple negative breast cancer cells). p.3300

Oncology - Breast Cancer. New Breast Cancer Findings Reported from European Institute of Oncology (Aspirin and atenolol enhance metformin activity against breast cancer by targeting both neoplastic and microenvironment cells). p.3301

Oncology - Breast Cancer. New Breast Cancer Findings Reported from Indira Gandhi Medical College (Lymphatic vessel assessment by podoplanin (D2–40) immunohistochemistry in breast cancer). p.3303

Oncology - Breast Cancer. New Breast Cancer Findings from Chongqing Medical University Described (Chemosensitization role of fulvestrant in combination with chemotherapy in postmenopausal hormone receptor positive and human epidermal growth factor negative metastatic ...) … p.3305

Oncology - Breast Cancer. New Breast Cancer Findings from Columbia University Described (Effect of curcumin and paclitaxel on breast carcinogenesis) … p.3306

Oncology - Breast Cancer. New Breast Cancer Findings from Dana–Farber Cancer Institute Outlined (Factors Associated With Delays in Chemotherapy Initiation Among Patients With Breast Cancer at a Comprehensive Cancer Center) … p.3307

Oncology - Breast Cancer. New Breast Cancer Findings from Department of Microbiology & Immunology Described (The therapeutic potential of mTOR inhibitors in breast cancer) … p.3308

Oncology - Breast Cancer. New Breast Cancer Findings from Indiana University Reported (Long intergenic non–coding RNA expression signature in human breast cancer) … p.3309

Oncology - Breast Cancer. New Breast Cancer Findings from Institute for Cancer Research Discussed [Phase 2 multicentre trial investigating intermittent and continuous dosing schedules of the poly(ADP–ribose) polymerase inhibitor rucaparib in germline BRCA mutation …] … p.3310

Oncology - Breast Cancer. New Breast Cancer Findings from National Cancer Institute Described (Androgen deprivation therapy sensitizes triple negative breast cancer cells to immune–mediated lysis through androgen receptor independent modulation of osteoprotegerin) … p.3311

Oncology - Breast Cancer. New Breast Cancer Findings from T. Reinert and Co–Authors Described (Optimal management of hormone receptor positive metastatic breast cancer in 2016) … p.3313

Oncology - Breast Cancer. New Breast Cancer Findings from University of Basel Hospital Reported (Contraception counseling for young breast cancer patients: A practical needs assessment and a survey among medical oncologists) … p.3316

Oncology - Breast Cancer. New Breast Cancer Findings from University of Salamanca Described (Antitumoral activity of the mithralog EC–8042 in triple negative breast cancer linked to cell cycle arrest in G2) … p.3317

Diagnostics and Screening - Breast Cancer Screening. New Breast Cancer Screening Findings from Duke University Described (Focal Breast Pain: Does Breast Density Affect the Need for Ultrasound?) … p.3318
January 14, 2017

www.NewsRx.com

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Investigators at Harbin Medical University (Transcriptome sequencing of HER2–positive breast cancer stem cells identifies potential prognostic marker) … p.3319

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Investigators at Queensland University of Technology (The Impact of Rurality and Disadvantage on the Diagnostic Interval for Breast Cancer in a Large Population–Based Study of 3202 Women in …) … p.3321

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Investigators at Roswell Park Cancer Institute (Comprehensive Histologic Scoring to Maximize the Predictability of Pathology–generated Equation of Breast Cancer Oncotype DX Recurrence Score) … p.3322

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Investigators at Royal Devon and Exeter NHS Foundation Trust (The significance of sentinel lymph node micrometastasis in breast cancer: Comparing outcomes with and without axillary clearance) … p.3323

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Investigators at University of Sheffield (The endocrine influence on the bone microenvironment in early breast cancer) … p.3324

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Researchers at Georgia Institute of Technology (Bacterial Effector Nanoparticles as Breast Cancer Therapeutics) … p.3325

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported by Researchers at University of Tehran (Enterolactone: A novel radiosensitizer for human breast cancer cell lines through impaired DNA repair and increased apoptosis) … p.3326

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported from Sungkyunkwan University (Goserelin plus tamoxifen compared to chemotherapy followed by tamoxifen in premenopausal patients with early stage–, lymph node–negative breast cancer of luminal …) … p.3327

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported from University of Kentucky College of Medicine (Chronic ethanol exposure enhances the aggressiveness of breast cancer: the role of p38g) … p.3328

Oncology - Breast Cancer. New Breast Cancer Study Findings Have Been Reported from University of Oviedo (Fibulin–5 downregulates Ki–67 and inhibits proliferation and invasion of breast cancer cells) … p.3329

Oncology - Breast Cancer. New Breast Cancer Study Findings Recently Were Reported by Researchers at Netherlands Cancer Institute (Integration of genomic, transcriptomic and proteomic data identifies two biologically distinct subtypes of invasive lobular breast cancer) … p.3330

Oncology - Breast Cancer. New Breast Cancer Study Findings Reported from China Medical University and Hospital (Combination of shear wave elastography and Ki–67 index as a novel predictive modality for the pathological response to neoadjuvant chemotherapy
January 14, 2017

Oncology - Breast Cancer. New Breast Cancer Study Results Reported from Bharati Vidyapeeth University (Evaluating the anticancer activity and nanoparticulate nature of homeopathic preparations of Terminalia chebula) ... p.3332

Oncology - Breast Cancer. New Breast Cancer Study Results Reported from Complutense University (Therapeutic attitude towards internal mammary chain drainage in patients with breast cancer) ... p.3333

Heart Disorders and Diseases - Brugada Syndrome. New Brugada Syndrome Findings from Tohoku University Described (Prognostic Significance of Late Potentials in Outpatients with Type 2 Brugada Electrocardiogram) ... p.3335

Gram-Negative Bacteria - Burkholderia cepacia. New Burkholderia cepacia Study Findings Have Been Reported by Researchers at Aberdeen Royal Infirmary (Combination antimicrobial susceptibility testing of Burkholderia cepacia complex: significance of species) ... p.3336

Oncology - Cancer Care. New Cancer Care Study Results Recently Were Reported by N. Garcia–Rueda and Co–Researchers (The experience of living with advanced–stage cancer: a thematic synthesis of the literature) ... p.3337

Oncology - Cancer Epidemiology. New Cancer Epidemiology Findings from London School of Hygiene and Tropical Medicine Discussed (The burden of HPV associated cancers in two regions in Nigeria 2012–2014) ... p.3338

www.NewsRx.com

Oncology - Cancer Epidemiology. New Cancer Epidemiology Findings from University of Toronto Described (Estimation of screening sensitivity and sojourn time from an organized screening program) ... p.3339

Oncology - Cancer Epidemiology. New Cancer Epidemiology Study Findings Recently Were Reported by Researchers at International Agency for Research on Cancer (Cancer in Central and South America: Introduction) ... p.3340

Oncology - Cancer Genetics. New Cancer Genetics Study Findings Recently Were Reported by Researchers at University of New Mexico [Chronic myelogenous leukemia with acquired t(11;14) (q13;q32) CCND1–IGH: A case report and literature review] ... p.3342

Cancer Research. New Cancer Research Data Have Been Reported by Investigators at Cleveland Clinic [Recommendations for clinical staging (cTNM) of cancer of the esophagus and esophagogastric junction for the 8th edition AJCC/UICC staging manuals] ... p.3343

Cancer Research. New Cancer Research Study Findings Recently Were Reported by Researchers at National University (Glycosylation–Based Serum Biomarkers for Cancer Diagnostics and Prognostics) ... p.3344

Oncology - Cancer Research. New Cancer Research Study Findings Reported from University of Ljubljana (Analysing population–based cancer survival – settling the controversies) ... p.3345
Oncology - Cancer Risk. New Cancer Risk Data Have Been Reported by X. Fang and Co–Authors (Polymorphisms in GEMIN4 and AGO1 Genes Are Associated with the Risk of Lung Cancer: A Case–Control Study in Chinese Female Non–Smokers) … p.3346

Oncology - Cancer Risk. New Cancer Risk Study Findings Have Been Reported by Investigators at Texas A&M University (Comprehensive site–specific whole genome profiling of stromal and epithelial colonic gene signatures in human sigmoid colon and rectal tissue) … p.3347

Oncology - Cancer Risk. New Cancer Risk Study Results from Peking Union Medical College Described (Polymorphism of HSD17B1 Ser312Gly with Cancer Risk: Evidence from 66,147 Subjects) … p.3348

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Findings Have Been Reported by Investigators at Gachon University (New arylated benzo[h]quinolines induce anti–cancer activity by oxidative stress–mediated DNA damage) … p.3349

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Findings Have Been Reported by Investigators at Sun Yat Sen University [Ester–Modified Cyclometalated Iridium(III) Complexes as Mitochondria–Targeting Anticancer Agents] … p.3350

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Findings Have Been Reported by Researchers at National Institute of Pharmaceutical Education and Research (An improved approach for predicting drug–target interaction: proteochemometrics to molecular docking) … p.3351

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Findings Recently Were Reported by Researchers at National Cancer Institute (Phenanthriplatin Acts As a Covalent Poison of Topoisomerase II Cleavage Complexes) … p.3352

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Findings Recently Were Reported by Researchers at Uppsala University (Characterizing and Controlling the Loading and Release of Cationic Amphiphilic Peptides onto and from PEG–Stabilized Lipodisks) … p.3353

Drugs and Therapies - Cancer Therapy. New Cancer Therapy Study Results from Emory University Described (Metabolism, Biochemical Actions, and Chemical Synthesis of Anticancer Nucleosides, Nucleotides, and Base Analogs) … p.3354

Carcinogenesis. New Carcinogenesis Study Findings Reported from Health Sciences Center (Withaferin A Suppresses the Up–Regulation of Acetyl–CoA Carboxylase 1 and Skin Tumor Formation in a Skin Carcinogenesis Mouse Model) … p.3355

Oncology - Carcinomas. New Carcinomas Findings Has Been Reported by Investigators at Guangxi Medical University (CCL18 From Tumor–Cells Promotes Epithelial Ovarian Cancer Metastasis via mTOR Signaling Pathway) … p.3356

Oncology - Carcinomas. New Carcinomas Findings Reported from University Hospital (Pazopanib in Renal Cell Carcinoma Dialysis Patients: A Mini–Review and a Case Report) … p.3357

Oncology - Carcinomas. New Carcinomas Findings from Henan University Outlined (Abnormal expressed long non–coding RNA IRAIN inhibits tumor progression in human renal cell carcinoma cells) … p.3358
Oncology - Carcinomas. New Carcinomas Study Findings Have Been Reported by Investigators at Central South University (Autophagy prevention sensitizes AKT1/2–induced antihepatocellular carcinoma cell activity in vitro and in vivo) … p.3358

Oncology - Carcinomas. New Carcinomas Study Findings Have Been Reported by Researchers at Research Institute and Hospital (A Prospective Multicenter Trial of the Efficacy and Tolerability of Neoadjuvant Sunitinib for Inoperable Metastatic Renal Cell Carcinoma) … p.3359

Oncology - Carcinomas. New Carcinomas Study Findings Have Been Reported from Midwestern University (Tocotrienol Nanoemulsion Platform of Curcumin Elicit Elevated Apoptosis and Augmentation of Anticancer Efficacy against Breast and Ovarian Carcinomas) … p.3361

Oncology - Carcinomas. New Carcinomas Study Findings Recently Were Reported by Researchers at Emory University (Onodera’s Prognostic Nutritional Index as an Independent Prognostic Factor in Clear Cell Renal Cell Carcinoma) … p.3362

Oncology - Carcinomas. New Carcinomas Study Findings Recently Were Reported by Researchers at People’s Liberation Army (Association of Vasculogenic Mimicry Formation and CD133 Expression with Poor Prognosis in Ovarian Cancer) … p.3363

Oncology - Carcinomas. New Carcinomas Study Findings Reported from Capital Medical University (miR–19a correlates with poor prognosis of clear cell renal cell carcinoma patients via promoting cell proliferation and suppressing PTEN/SMAD4 expression) … p.3364

Oncology - Carcinomas. Study Results Reported from H.B. Hu et al (Three Circulating LncRNA Predict Early Progress of Esophageal Squamous eNN Carcinoma) … p.3365

Oncology - Carcinomas. New Carcinomas Study Results from Division of Gynecology Oncology Described (The effect of adjuvant radiation on survival in early stage clear cell ovarian carcinoma) … p.3366

Cardiology. New Cardiology Data Have Been Reported by Investigators at University of Colorado (Clinical and biophysical evaluation of variable bipolar configurations during radiofrequency ablation for treatment of ventricular arrhythmias) … p.3367

Cardiology. New Cardiology Data Have Been Reported by Researchers at LUMC (Heritability of heart rate recovery and vagal rebound after exercise) … p.3368

Cardiology. New Cardiology Data Have Been Reported by Researchers at Veterans Affairs Medical Center [Selective Assembly of Na,K–ATPase alpha(2)beta2 Heterodimers in the Heart DISTINCT FUNCTIONAL PROPERTIES AND ISOFORM–SELECTIVE INHIBITORS] … p.3369

Cardiology. New Cardiology Findings Reported from Group Health Research Institute (Exploring Provider Reactions to Decision Aid Distribution and Shared Decision Making: Lessons from Two Specialties) … p.3370

Cardiology. New Cardiology Findings from Baylor University College of Medicine Discussed (Cardiac Lesions in the Critical Care Setting) … p.3371

Cardiology. New Cardiology Findings from University of Skövde Described (Comparative transcriptomic analysis identifies genes differentially expressed in human epicardial progenitors and hiPSC–derived cardiac progenitors) … p.3371
Cardiology. New Cardiology Study Findings Have Been Reported by Researchers at Erasmus University Medical Center (Effects of body position on exercise capacity and pulmonary vascular pressure–flow relationships) … p.3372

Cardiology. New Cardiology Study Findings Have Been Reported by Researchers at University Hospital Leicester NHS Trust (Radiation protection training for cardiologists in the era of multiple imaging techniques and complex interventions) … p.3373

Cardiology. New Cardiology Study Findings Have Been Reported from P.J. Yu et al (Outcomes of Patients With Prolonged Intensive Care Unit Length of Stay After Cardiac Surgery) … p.3374

Cardiology. New Cardiology Study Findings Have Been Reported from Queen Mary University (Single–Cell Expression Profiling Reveals a Dynamic State of Cardiac Precursor Cells in the Early Mouse Embryo) … p.3375

Cardiology. New Cardiology Study Findings Recently Were Reported by Researchers at Beth Israel Deaconess Medical Center (A novel algorithm to predict the QT interval during intrinsic atrioventricular conduction from an electrocardiogram obtained during ...) … p.3376

Cardiology. New Cardiology Study Findings Recently Were Reported by Researchers at Intermountain Medical Center (Reasons for, and outcomes of patients who were referred for a ventricular assist device but were declined: the recent era forgotten ones) … p.3377

Cardiology. New Cardiology Study Results from Q. Xing et al Described (Cardiac performance: a thermal tolerance indicator in scallops) … p.3379

Cardiology. New Cardiology Study Results from University of Alberta Described (Effect of resveratrol on metabolic and cardiovascular function in male and female adult offspring exposed to prenatal hypoxia and a high–fat diet) … p.3380

Cardiology. New Cardiology Study Results from Walter Reed National Military Medical Center Described (A Quadricuspid Aortic Valve as Seen by Cardiac Magnetic Resonance Imaging) … p.3381

Heart Disorders and Diseases - Cardiomegaly. New Cardiomegaly Findings from Huazhong University of Science and Technology Described (Tanshinone IIA inhibits myocardial remodeling induced by pressure overload via suppressing oxidative stress and inflammation: Possible role of silent ...) … p.3382

Heart Disorders and Diseases - Cardiomegaly. New Cardiomegaly Findings from Jikei University Discussed (Impact of alcohol intake on the relationships of uric acid with blood pressure and cardiac hypertrophy in essential hypertension) … p.3383

Heart Disorders and Diseases - Cardiomegaly. New Cardiomegaly Study Findings Recently Were Reported by Researchers at State University of Campinas (Increased Circulating Tissue Inhibitor of Metalloproteinase–2 Is Associated With Resistant Hypertension) … p.3384

Heart Disorders and Diseases - Cardiomyopathies. New Cardiomyopathies Study Findings Have Been Reported by Researchers at University of Melbourne (Diabetic Cardiomyopathy: The Case for a Role of Fructose in Disease Etiology) … p.3385
Heart Disorders and Diseases - Cardiomyopathies. New Cardiomyopathies Study Findings Have Been Reported from M.F. Ortiz–Genga et al (Truncating FLNC Mutations Are Associated With High–Risk Dilated and Arrhythmogenic Cardiomyopathies) ... p.3386

Heart Disorders and Diseases - Cardiomyopathies. New Cardiomyopathies Study Results from General Hospital Described [Mangiferin suppressed advanced glycation end products (AGEs) through NF–κB deactivation and displayed anti–inflammatory effects in streptozotocin and high fat diet–diabetic ...] ... p.3387

Cardiovascular Research. New Cardiovascular Research Data Have Been Reported by Researchers at Sungkyunkwan University (Novel approach to study the cardiovascular effects and mechanism of action of urban particulate matter using lung epithelial–endothelial ...) ... p.3394

Cardiovascular Research. New Cardiovascular Research Study Findings Have Been Reported by M. Cruz–Lemini and Colleagues (Fetal cardiovascular remodeling persists at 6 months in infants with intrauterine growth restriction) ... p.3395

Cardiovascular Research. New Cardiovascular Research Study Results from University of Copenhagen Described (SuPAR Predicts Cardiovascular Events and Mortality in Patients With Asymptomatic Aortic Stenosis) ... p.3397

Cardiovascular Research. New Cardiovascular Research Study Results from University of Copenhagen Described (SuPAR Predicts Cardiovascular Events and Mortality in Patients With Asymptomatic Aortic Stenosis) ... p.3397

Surgery - Cardiovascular and Thoracic Surgery. New Cardiovascular and Thoracic Surgery Study Findings Recently Were Reported by Researchers at University of Ottawa (Identifying Patients at Higher Risk of Prolonged Air Leak After Lung Resection) ... p.3398
Cardiovascular Diseases and Conditions - Carotid Stenosis. New Carotid Stenosis Findings from Jena University Hospital Discussed (Autonomic outcome is better after endarterectomy than after stenting in patients with asymptomatic carotid stenosis) … p.3399

Cardiovascular Diseases and Conditions - Carotid Stenosis. New Carotid Stenosis Study Results Reported from Ningxia Medical University (The association between ankle–brachial index and asymptomatic cranial–carotid stenosis: a population–based, cross–sectional study of 5440 Han Chinese) … p.3400

Catecholamines. New Catecholamines Findings from University of Wollongong Described (Early Antipsychotic Treatment in Juvenile Rats Elicits Long–Term Alterations to the Dopamine Neurotransmitter System) … p.3401

Drugs and Therapies - Celecoxib Therapy. New Celecoxib Therapy Study Findings Have Been Reported by Researchers at University of Antioquia (Chitosan/OA nanoparticle as delivery system for celecoxib: Parameters affecting the particle size, encapsulation, and release) … p.3402

Cell Research - Cell Adhesion Molecules. New Cell Adhesion Molecules Study Results from Peking Union Medical College Described (Honokiol inhibits EMT–mediated motility and migration of human non–small cell lung cancer cells in vitro by targeting c–FLIP) … p.3403

Life Science Research - Cell Biology. New Cell Biology Findings from Karolinska Institute Described (Lgr6 labels a rare population of mammary gland progenitor cells that are able to originate luminal mammary tumours) … p.3404

www.NewsRx.com

Science - Cell Science. New Cell Science Study Findings Reported from Osaka University (ARHGEF10 directs the localization of Rab8 to Rab6–positive executive vesicles) … p.3405

Transplant Medicine - Cell Transplants. New Cell Transplants Study Findings Have Been Reported by Investigators at University Hospital (ABO blood group antigen mismatch has an impact on outcome after allogeneic peripheral blood stem cell transplantation) … p.3407

Transplant Medicine - Cell Transplants. New Cell Transplants Study Findings Recently Were Reported by Researchers at University of Edinburgh (Re–implantation of cryopreserved ovarian cortex resulting in restoration of ovarian function, natural conception and successful pregnancy …) … p.3408

Cellular Structures. New Cellular Structures Study Findings Recently Were Reported by Researchers at University of North Carolina (Dual Targeting of Cell Wall Precursors by Teixobactin Leads to Cell Lysis) … p.3409

Drugs and Therapies - Central Nervous System Agents. New Central Nervous System Agents Data Have Been Reported by Investigators at Macquarie University (The neurocircuitry involved in oxytocin modulation of methamphetamine addiction) … p.3410
January 14, 2017

Drugs and Therapies - Central Nervous System Agents. New Central Nervous System Agents Findings from University of California Described (Prefrontal glutamate correlates of methamphetamine sensitization and preference) ... p.3411

Drugs and Therapies - Central Nervous System Agents. New Central Nervous System Agents Study Results from University College Described (2016 Updated MASCC/ESMO consensus recommendations: Management of nausea and vomiting in advanced cancer) ... p.3412

Central Nervous System. New Central Nervous System Data Have Been Reported by Investigators at University of Porto (Flavonoids in Neurodegeneration: Limitations and Strategies to Cross CNS Barriers) ... p.3413

Drugs and Therapies - Central Nervous System Depressants. New Central Nervous System Depressants Findings from Mayo Clinic Described (Anesthetic implications for patients with Segawa syndrome) ... p.3414

Respiratory Tract Diseases and Conditions - Central Sleep Apnea. New Central Sleep Apnea Study Findings Have Been Reported by Researchers at Vanderbilt Eye Institute (Congenital Tonic Pupils Associated With Congenital Central Hypoventilation Syndrome and Hirschsprung Disease) ... p.3415

Central Nervous System Diseases and Conditions - Cerebral Infarction. New Cerebral Infarction Findings from University Medical Center Described (Diagnostic performance of peroxiredoxin 1 to determine time–of–onset of acute cerebral infarction) ... p.3416

www.NewsRx.com

Oncology - Cervical Cancer. New Cervical Cancer Findings Reported from University of Nevada (Quantitative and mixed analyses to identify factors that affect cervical cancer screening uptake among lesbian and bisexual women and transgender men) ... p.3417

Chagas Disease. New Chagas Disease Data Have Been Reported by Researchers at Federal University (Efficacy of Lychnopholide Polymeric Nanocapsules after Oral and Intravenous Administration in Murine Experimental Chagas Disease) ... p.3418

Parasitic Diseases and Conditions - Chagas Disease. New Chagas Disease Study Findings Recently Were Reported by Researchers at Federal University (Nelfinavir and lopinavir impair Trypanosoma cruzi trypomastigote infection in mammalian host cells and show anti–amastigote activity) ... p.3419

Computation - Chemical Theory and Computation. New Chemical Theory and Computation Study Results Reported from National Center for Scientific Research (CNRS) (Coarse–Grained Simulations Complemented by Atomistic Molecular Dynamics Provide New Insights into Folding and Unfolding of Human ...) ... p.3420

Chemical Research - Chemical and Biological Interactions. New Chemical and Biological Interactions Findings from Kazan Federal University Outlined (Emergence of catalytic bioscavengers against organophosphorus agents) ... p.3421

Drugs and Therapies - Chemotherapy. New Chemotherapy Data Have Been Reported by Investigators at Changchun Institute of Applied Chemistry (Self–Assembly of Amphiphilic Drug–Dye Conjugates into Nanoparticles for Imaging and Chemotherapy) ... p.3422
Drugs and Therapies - Chemotherapy. New Chemotherapy Findings Reported from Barbara Ann Karmanos Cancer Institute (Managing Chemotherapy Side Effects: Achieving Reliable and Equitable Outcomes) … p.3423

Drugs and Therapies - Chemotherapy. New Chemotherapy Findings from Hasselt University Described (Outcome after PORT in ypN2 or R1/R2 versus no PORT in ypNO Stage III–N2 NSCLC after Induction Chemotherapy and Resection) … p.3424

Drugs and Therapies - Chemotherapy. New Chemotherapy Findings from Inje University Outlined (Inhibitory Interaction Potential of 22 Antituberculosis Drugs on Organic Anion and Cation Transporters of the SLC22A Family) … p.3425

Drugs and Therapies - Chemotherapy. New Chemotherapy Study Findings Have Been Reported by Investigators at University Hospital (Effectiveness and failures of a fast track protocol after cytoreduction and hyperthermic intraoperative intraperitoneal chemotherapy in patients with ...) … p.3426

Drugs and Therapies - Chemotherapy. New Chemotherapy Study Findings Have Been Reported by Researchers at University Hospital [Cytoreductive surgery and hyperthermic intraperitoneal chemotherapy (HIPEC) in elderly patients. A systematic literature review] … p.3428

Drugs and Therapies - Chemotherapy. New Chemotherapy Study Findings Recently Were Reported by M. Chasen and Co–Researchers (Rolapitant improves quality of life of patients receiving highly or moderately emetogenic chemotherapy) … p.3429

Drugs and Therapies - Chemotherapy. New Chemotherapy Study Findings Reported from Kovai Medical Center (Post chemotherapy extravasation injuries: Hypogastric flap for reconstruction of wounds over dorsum of hand) … p.3430

Chlorinated Hydrocarbons. New Chlorinated Hydrocarbons Study Findings Have Been Reported by Investigators at Texas A&M University (Target Organ Metabolism, Toxicity, and Mechanisms of Trichloroethylene and Perchloroethylene: Key Similarities, Differences, and Data Gaps) … p.3431

Oncology - Cholangiocarcinoma. New Cholangiocarcinoma Findings from China Medical University and Hospital Outlined (The anticancer effects of Resina Draconis extract on cholangiocarcinoma) … p.3432

Oncology - Cholangiocarcinoma. New Cholangiocarcinoma Findings from Taishan Medical University Reported [Identification of transcription factors (TFs) and targets involved in the cholangiocarcinoma (CCA) by integrated analysis] … p.3433

Oncology - Cholangiocarcinoma. New Cholangiocarcinoma Study Results from University of Nebraska Medical Center Described [Delivery of miR–200c Mimic with Poly(amoido amine) CXCR4 Antagonists for Combined Inhibition of Cholangiocarcinoma Cell Invasiveness] … p.3434

Digestive System Diseases and Conditions - Cholera. New Cholera Study Findings Recently Were Reported by Researchers at Yonsei University College of Medicine (Cholera Toxin Production Induced upon Anaerobic
Liver Diseases and Conditions - Chronic Hepatitis B Virus. New Chronic Hepatitis B Virus Findings from Istanbul University Described (Predictors of treatment requirement in HBeAg–negative chronic hepatitis B patients with persistently normal alanine aminotransferase and high serum HBV DNA levels) ... p.3443

Liver Diseases and Conditions - Chronic Hepatitis B Virus. New Chronic Hepatitis B Virus Study Findings Have Been Reported by Investigators at Military Hospital (Comparison of relationship between histopathological, serological and biochemical parameters in patients with chronic hepatitis B infection) ... p.3445

Liver Diseases and Conditions - Chronic Hepatitis C Virus. New Chronic Hepatitis C Virus Study Results Reported from Department of Gastroenterology & Hepatology (Safety and Effectiveness of Direct–Acting Antiviral Agents for Treatment of Patients With Chronic Hepatitis C Virus Infection and Cirrhosis) ... p.3447

Kidney Diseases and Conditions - Chronic Kidney Disease. New Chronic Kidney Disease Data Have Been Reported by Investigators at Chang Gung University (Acute Kidney Injury in Asians With Atrial Fibrillation Treated With Dabigatran or Warfarin) ... p.3448

Kidney Diseases and Conditions - Chronic Kidney Disease. New Chronic Kidney Disease Data Have Been Reported by Researchers at School of Medicine (The prognostic impact of uric acid in patients with severely decompensated acute

Kidney Diseases and Conditions - Chronic Kidney Disease. New Chronic Kidney Disease Study Findings Recently Were Reported by Researchers at Chugai Pharmaceutical (A prospective observational study of early intervention with erythropoietin therapy and renal survival in non–dialysis chronic kidney disease) ... p.3451

Kidney Diseases and Conditions - Chronic Kidney Disease. New Chronic Kidney Disease Study Findings Recently Were Reported by Researchers at School of Medicine (Illness Perceptions, Medication Beliefs, and Adherence to Antiretrovirals and Medications for Comorbidities in Adults With HIV Infection and ...) ... p.3452

Kidney Diseases and Conditions - Chronic Kidney Disease. New Chronic Kidney Disease Study Findings Reported from University of Paris–Sud (Neurological complications in chronic kidney disease patients) ... p.3453

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. New Chronic Obstructive Pulmonary Disease Findings Reported from School of Medicine (Metabolomic profiling of doxycycline treatment in chronic obstructive pulmonary disease) ... p.3456

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. New Chronic Obstructive Pulmonary Disease Findings from W.H. van Geffen and Co–Authors Described (Bronchodilators delivered by nebuliser versus pMDI with spacer or DPI for exacerbations of COPD) ... p.3457

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. New Chronic Obstructive Pulmonary Disease Study Findings Recently Were Reported by Researchers at Asan Medical Center (Gene Profiles in a Smoke–Induced COPD Mouse Lung Model Following Treatment with Mesenchymal Stem Cells) ... p.3459

Mouth Disease and Conditions - Cleft Lip and Palate. New Cleft Lip and Palate Study Findings Have Been Reported by Investigators at University of Groningen (Prevalence, diagnosis and outcome of cleft lip with or without cleft palate in The Netherlands) ... p.3460

Nursing - Clinical Nursing. New Clinical Nursing Data Have Been Reported by Researchers at Gachon University (Middle East respiratory syndrome–related knowledge, preventive behaviours and risk perception among nursing students during outbreak) ... p.3461

Clinical Oncology. New Clinical Oncology Findings Has Been Reported by Researchers at University of Barcelona (The evolving role of biosimilars in haematology–oncology: a practical perspective) ... p.3462
Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings from Buddhist Tzu Chi General Hospital Reported (OnabotulinumtoxinA Urethral Sphincter Injection as Treatment for Non–neurogenic Voiding Dysfunction – A Randomized, Double–Blind, Placebo–Controlled Study) … p.3463

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings from Burnet Institute Discussed [Polymorphisms in the CD14 and TLR4 genes independently predict CD4(+) T–cell recovery in HIV–infected individuals on antiretroviral therapy] … p.3464

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings from Peking University Reported (Low–dose Dexmedetomidine Improves Sleep Quality Pattern in Elderly Patients after Noncardiac Surgery in the Intensive Care Unit A Pilot Randomized Controlled Trial) … p.3465

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings from Shanghai Xuhui Central Hospital Outlined (Single and Multiple Dose Pharmacokinetics, Pharmacodynamics and Safety of the Novel Lipoprotein–Associated Phospholipase A2 Enzyme Inhibitor Darapladib in …) … p.3466

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings from University College Outlined (Effect of Remote Ischaemic Conditioning in Oncology Patients Undergoing Chemotherapy: Rationale and Design of the ERIC–ONC Study—A Single–Center, Blinded, Randomized …) … p.3467

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Have Been Reported by Investigators at Tokyo University Hospital (Early menopause does not influence left ventricular diastolic dysfunction: A clinical observational study in healthy subjects) … p.3468

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Have Been Reported by Researchers at Merck & Company (Phase 2, Dose–Ranging Study of Relebactam with Imipenem–Cilastatin in Subjects with Complicated Intra–abdominal Infection) … p.3469

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Have Been Reported by Researchers at University of Calgary (Preoperative single–dose methylprednisolone versus placebo after major liver resection in adults: protocol for a randomised controlled …) … p.3471

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Have Been Reported by Researchers at University of Padua (Efficacy and safety of sugammadex compared to neostigmine for reversal of neuromuscular blockade: a meta–analysis of randomized controlled …) … p.3472

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Have Been Reported from Poznan University of Medical Sciences (New Molecular Targets of Anticancer Therapy – Current Status and Perspectives) … p.3473

Clinical Research - Clinical Trials and Studies. New Clinical Trials and Studies Findings Recently Were Reported by Researchers at Brown University (A Randomized Trial of an Acceptance–Based Behavioral
Intervention for Weight Loss in People with High Internal Disinhibition) … p.3474

Neurodegenerative Diseases and Conditions - Cockayne Syndrome. New Cockayne Syndrome Study Findings Have Been Reported from Kyushu University Hospital (Discrepancy between electroencephalography and hemodynamics in a patient with Cockayne syndrome during general anesthesia) … p.3475

Surgery - Colectomy. New Colectomy Study Findings Reported from Department of Gastroenterology (Lanreotide Autogel in the Treatment of Persistent Diarrhea following a Total Colectomy) … p.3476

Digestive System Diseases and Conditions - Colitis. New Colitis Study Results Reported from Portuguese Institute of Oncology (Eosinophilic colitis) … p.3477

Oncology - Colon Cancer. New Colon Cancer Data Have Been Reported by Researchers at University of Burgundy (Folfirinox in elderly patients with pancreatic or colorectal cancer–tolerance and efficacy) … p.3477

Oncology - Colon Cancer. New Colon Cancer Findings Has Been Reported by Investigators at Research Institute (Somatostatin signaling via SSTR1 contributes to the quiescence of colon cancer stem cells) … p.3479

Oncology - Colon Cancer. New Colon Cancer Findings Reported from Prince of Wales Clinical School (Integrated Genetic, Epigenetic, and Transcriptional Profiling Identifies Molecular Pathways in the Development of Laterally Spreading Tumors) … p.3480

Oncology - Colon Cancer. New Colon Cancer Findings Reported from University Hospital (Ovarian metastases from colorectal cancer: prognostic role of prophylactic oophorectomy. A single center experience) … p.3481

Oncology - Colon Cancer. New Colon Cancer Findings Reported from University of Sannio (The miR–27a–calreticulin axis affects drug–induced immunogenic cell death in human colorectal cancer cells) … p.3482

Oncology - Colon Cancer. New Colon Cancer Findings from Department of Gastroenterology & Hepatology Described (Unemployment risk at 2 and 4 years following colorectal cancer diagnosis: a population based study) … p.3484

Oncology - Colon Cancer. New Colon Cancer Findings from Hebrew University Hadassah Medical School and Hospital Described (Efficacy and safety of addition of bevacizumab to FOLFIRI or irinotecan/bolus 5–FU/LV (IFL) in patients with metastatic colorectal cancer A meta–analysis] … p.3485

Oncology - Colon Cancer. New Colon Cancer Findings from S. Lonardi et al Outlined (Phase III trial comparing 3–6 months of adjuvant FOLFOX4/XELOX in stage II–III colon cancer: safety and compliance in the TOSCA trial) … p.3486

Oncology - Colon Cancer. New Colon Cancer Findings from University of Bologna Described (Inflammation increases NOTCH1 activity via MMP9 and is counteracted by Eicosapentaenoic Acid–free fatty acid in colon cancer cells) … p.3487

Oncology - Colon Cancer. New Colon Cancer Study Findings Have Been Reported by Investigators at International Agency for Research on Cancer (Burden of colorectal cancer in Central and South America) … p.3488
January 14, 2017

Oncology - Colon Cancer. New Colon Cancer Study Findings Have Been Reported by Investigators at University of Rome (Overcoming dynamic molecular heterogeneity in metastatic colorectal cancer: Multikinase inhibition with regorafenib and the case of rechallenge with ...) … p.3489

Oncology - Colon Cancer. New Colon Cancer Study Findings Have Been Reported by Researchers at University of Malaya (Chemopreventive effect of Phaleria macrocarpa on colorectal cancer aberrant crypt foci in vivo) … p.3490

Oncology - Colon Cancer. New Colon Cancer Study Findings Have Been Reported from Queen's University (Delivery of Adjuvant Oxaliplatin for Colon Cancer: Insights From Routine Clinical Practice) … p.3491

Oncology - Colon Cancer. New Colon Cancer Study Findings Have Been Reported from University of Alabama (Altered T–Cell Balance in Lymphoid Organs of a Mouse Model of Colorectal Cancer) … p.3492

Oncology - Colon Cancer. New Colon Cancer Study Findings Recently Were Reported by Researchers at Coventry University (Diagnostic accuracy of faecal biomarkers in detecting colorectal cancer and adenoma in symptomatic patients) … p.3493

Oncology - Colon Cancer. New Colon Cancer Study Findings Recently Were Reported by Researchers at Paris–Descartes University (A Study of Hypermethylated Circulating Tumor DNA as a Universal Colorectal Cancer Biomarker) … p.3494

Oncology - Colon Cancer. New Colon Cancer Study Findings Recently Were Reported by Researchers at Southeast University (FAS rs2234767 and rs1800682 polymorphisms jointly contributed to risk of colorectal cancer by affecting SP1/STAT1 complex recruitment to chromatin) … p.3495

www.NewsRx.com

Oncology - Colon Cancer. New Colon Cancer Study Findings Recently Were Reported by Researchers at University of Tokushima (Propensity score–matched study of laparoscopic and open surgery for colorectal cancer in rural hospitals) … p.3496

Oncology - Colon Cancer. New Colon Cancer Study Findings Reported from National Institute of Radiological Sciences (Regorafenib as a potential adjuvant chemotherapy agent in disseminated small colon cancer: Drug selection outcome of a novel screening system using ...) … p.3497

Oncology - Colon Cancer. New Colon Cancer Study Findings Reported from Xinxiang Medical University (Treating Colon Cancer Cells with FK228 Reveals a Link between Histone Lysine Acetylation and Extensive Changes in the Cellular Proteome) … p.3498

Oncology - Colon Cancer. New Colon Cancer Study Results Reported from Institute for Cancer Research and Treatment (IRCCS) (CT colonography for population screening of colorectal cancer: hints from European trials) … p.3499

Oncology - Colon Cancer. New Colon Cancer Study Results Reported from Mercy Medical Center [Prognosis of patients with peritoneal metastatic colorectal cancer given systemic therapy: an analysis of individual patient data from prospective randomised trials from the ...] … p.3500

Gastroenterology - Colorectal Research. New Colorectal Research Findings from Yonsei University Reported (Molecular characteristics of colorectal serrated polyps and hyperplastic polyps A STROBE compliant article) … p.3502

Gastroenterology - Colorectal Research. New Colorectal Research Study Results Reported from National Institutes of Health (The B–cell tumor promoter Bcl–3 suppresses inflammation associated colon tumorigenesis in
epithelial cells) ... p.3503

Congenital Diseases and Conditions - Congenital Heart Defects. New Congenital Heart Defects Data Have Been Reported by Researchers at Center for Disease Control and Prevention (Proportion of selected congenital heart defects attributable to recognized risk factors) ... p.3504

Congenital Diseases and Conditions - Congenital Heart Defects. New Congenital Heart Defects Findings from Institute for Cancer Research and Treatment (IRCCS) Discussed (Serum NT–proBNP Levels Are Not Related to Vitamin D Status in Young Patients with Congenital Heart Defects) ... p.3505

Congenital Diseases and Conditions - Congenital Heart Disease. New Congenital Heart Disease Data Have Been Reported by Researchers at National Taiwan University (Postnatal cumulative incidence of supraventricular tachycardia in a general pediatric population: A national birth cohort database study) ... p.3506

Congenital Diseases and Conditions - Congenital Heart Disease. New Congenital Heart Disease Findings Has Been Reported by Investigators at Children's Hospital (Combined blood pool and extracellular contrast agents for pediatric and young adult cardiovascular magnetic resonance imaging) ... p.3507

Congenital Diseases and Conditions - Congenital Hypothyroidism. New Congenital Hypothyroidism Study Findings Have Been Reported by Investigators at Turku University Hospital (Detection of Novel Gene Variants Associated with Congenital Hypothyroidism in a Finnish Patient Cohort) ... p.3508

Immunization and Public Health - Conjugate Vaccines. New Conjugate Vaccines Data Have Been Reported by Investigators at Federal University (Streptococcus pneumoniae Serotypes 9 and 14 Circulating in Brazil over a 23–Year Period Prior to Introduction of the 10–Valent Pneumococcal Conjugate ...) ... p.3509

Connective Tissue Cells. New Connective Tissue Cells Findings from Wuhan University Reported (Autophagy regulates odontoblast differentiation by suppressing NF–κB activation in an inflammatory environment) ... p.3510

Corneal Dystrophies. New Corneal Dystrophies Study Findings Reported from Hanyang University (Sensitive Surface Enhanced Raman Scattering–Based Detection of a BIGH3 Point Mutation Associated with Avellino Corneal Dystrophy) ... p.3511

Digestive System Diseases and Conditions - Crohn's Disease. New Crohn's Disease Findings Reported from University of Pittsburgh (A Pleiotropic Missense Variant in SLC39A8 Is Associated With Crohn's Disease and Human Gut Microbiome Composition) ... p.3512

Digestive System Diseases and Conditions - Crohn's Disease. New Crohn's Disease Study Findings Reported from Catholic University of Korea (The importance of the Crohn's disease activity index in surgery for small bowel Crohn's disease) ... p.3513

Adrenal Gland Diseases and Conditions - Cushing Syndrome. New Cushing Syndrome Study Results Reported from Concept Therapeutics (Mifepristone Improves Octreotide Efficacy in Resistant Ectopic Cushing's Syndrome) ... p.3514
Intracellular Signaling Peptides and Proteins - Cyclin D. New Cyclin D Study Results Reported from Ajou University (Cannabinoids Regulate Bcl–2 and Cyclin D2 Expression in Pancreatic b Cells) … p.3515

Cyclohexanes. New Cyclohexanes Study Findings Recently Were Reported by Researchers at University of Maryland (Effects of Ketamine and Ketamine Metabolites on Evoked Striatal Dopamine Release, Dopamine Receptors, and Monoamine Transporters) … p.3516

Lung Diseases and Conditions - Cystic Fibrosis. New Cystic Fibrosis Study Findings Have Been Reported by Researchers at Catholic University of Louvain (Antimicrobial Susceptibility of Pseudomonas aeruginosa Isolated from Cystic Fibrosis Patients in Northern Europe) … p.3517

Lung Diseases and Conditions - Cystic Fibrosis. New Cystic Fibrosis Study Results Reported from Griffith University (Singing as an adjunct therapy for children and adults with cystic fibrosis) … p.3519

Intercellular Signaling Peptides and Proteins - Cytokines. New Cytokines Findings Reported from University of Auckland (Plasmin and regulators of plasmin activity control the migratory capacity and adhesion of human T cells and dendritic cells by regulating cleavage of the chemokine CCL21) … p.3520

Intercellular Signaling Peptides and Proteins - Cytokines. New Cytokines Findings from University of California Described (Gestational food restriction decreases placental interleukin–10 expression and markers of autophagy and endoplasmic reticulum stress in murine intrauterine growth restriction) … p.3521

Intercellular Signaling Peptides and Proteins - Cytokines. New Cytokines Study Findings Have Been Reported from SooKyung Women's University [Essential role of interferon regulatory factor 4 (IRF4) in immune cell development] … p.3522

Herpesvirus Diseases and Conditions - Cytomegalovirus. New Cytomegalovirus Data Have Been Reported by Researchers at University College (Cytomegalovirus latency and reactivation: recent insights into an age old problem) … p.3523

DNA Research. New DNA Research Data Have Been Reported by Researchers at Center for Molecular Discovery (Characterization of Cardiac Glycoside Natural Products as Potent Inhibitors of DNA Double–Strand Break Repair by a Whole–Cell Double Immunofluorescence ...) … p.3524

DNA Research. New DNA Research Data Have Been Reported by Researchers at University of Toronto (From Function to Phenotype: Impaired DNA Binding and Clustering Correlates with Clinical Severity in Males with Missense Mutations in MECP2) … p.3525

DNA Research. New DNA Research Findings Reported from School of Medicine (Intracellular mitochondrial DNA transfers to the nucleus in human cancer cells) … p.3526

DNA Research. New DNA Research Findings from Saha Institute of Nuclear Physics Described (Spectroscopic studies on the interaction of DNA with the copper complexes of NSAIDs lornoxicam and isoxicam) … p.3527

DNA Research. New DNA Research Study Findings Have Been Reported by Investigators at Harvard School of Medicine (A high–throughput small molecule screen identifies synergism between DNA methylation and Aurora kinase pathways for X reactivation) … p.3528
Genetics - DNA Research. New DNA Research Study Findings Have Been Reported by Researchers at University of Geneva (Alternative lengthening of human telomeres is a conservative DNA replication process with features of break–induced replication) … p.3529

DNA Research. New DNA Research Study Findings Recently Were Reported by Researchers at School of Medicine (Aldo–keto reductase 1B10 protects human colon cells from DNA damage induced by electrophilic carbonyl compounds) … p.3530

Proteins - DNA-Binding Proteins. New DNA-Binding Proteins Data Have Been Reported by Researchers at Zhejiang Chinese Medical University (Bufalin inhibits pancreatic cancer by inducing cell cycle arrest via the c–Myc/NF–kappa B pathway) … p.3531

Drugs and Therapies - Toxicology and Pharmacology. New Data from A. Aigner et al Illuminate Findings in Toxicology and Pharmacology (Advancing the use of noncoding RNA in regulatory toxicology: Report of an ECETOC workshop) … p.3532

Musculoskeletal Diseases and Conditions - Osteogenesis Imperfecta. New Data from Aarhus University Illuminate Findings in Osteogenesis Imperfecta (Skeletal phenotypes in adult patients with osteogenesis imperfecta–correlations with COL1A1/COL1A2 genotype and collagen structure) … p.3533

Oncology - Non-Small Cell Lung Cancer. New Data from Ain Shams University Illuminate Findings in Non–Small Cell Lung Cancer (S–1–based regimens for locally advanced/metastatic non–small–cell lung cancer: a meta–analysis) … p.3535

Drugs and Therapies - Antipsychotics. New Data from Ataturk Teaching and Research Hospital Illuminate Findings in Antipsychotics (A Case of Ileus in a Patient with Schizophrenia Under Paliperidone Palmitate Treatment) … p.3535

Cardiovascular Diseases and Conditions - Fat Embolism. New Data from Azienda Ospedaliera University Illuminate Findings in Fat Embolism (Cerebral Fat Embolism After Video–Assisted Thoracic Surgery) … p.3536

Inflammation. New Data from Bar–Ilan University Illuminate Findings in Inflammation (Differentiating Between Cancer and Inflammation: A Metabolic–Based Method for Functional Computed Tomography Imaging) … p.3537

Gram-Negative Bacteria - Enterobacteriaceae. New Data from Brown University Illuminate Findings in Enterobacteriaceae (Colonisation with extended–spectrum beta–lactamase–producing Enterobacteriaceae and risk for infection among patients with solid or haematological malignancy: a …) … p.3538

Uterine Diseases and Conditions - Endometriosis. New Data from Capital Medical University Illuminate Findings in Endometriosis (Prognostic value of endometriosis in patients with stage I ovarian clear cell carcinoma: Experiences at three academic institutions) … p.3539

Bone Marrow Diseases and Conditions - Aplastic Anemia. New Data from Catholic University of Korea Illuminate Findings in Aplastic Anemia (Impact of pretransplant red cell transfusion on outcome after allogeneic stem cell transplantation in adult patients with severe aplastic anemia) … p.3540
January 14, 2017

Mosquito-Borne Diseases - Dengue Hemorrhagic Fever. New Data from Center for Research and Advanced Studies of the National Polytechnic Institute (CINVESTAV) Illuminate Findings in Dengue Hemorrhagic Fever (No Evidence of Dengue Virus Infections in Several Species of Bats Captured in Central and ...) … p.3541

Oncology - Gliomas. New Data from Central South University Illuminate Findings in Gliomas (PPIC, EMP3 and CHI3L1 Are Novel Prognostic Markers for High Grade Glioma) … p.3542

Oncology - Liver Cancer. New Data from Chinese Academy of Sciences Illuminate Findings in Liver Cancer (LncBRM initiates YAP1 signalling activation to drive self-renewal of liver cancer stem cells) … p.3543

Drugs and Therapies - Immunosuppressive Agents. New Data from Copenhagen University Hospital Illuminate Findings in Immunosuppressive Agents (Early safety and efficacy of fingolimod treatment in Denmark) … p.3544

Nursing - Oncology Nursing. New Data from Department of Nursing Illuminate Findings in Oncology Nursing (Opioid-taking self-efficacy as influencing emotional status in patients with cancer pain) … p.3545

Health and Medicine - Medical Science. New Data from Ewha Woman's University Illuminate Findings in Medical Science (The Radiation Problem and Its Solution from a Health Communication Perspective) … p.3546

Angiology. New Data from First Affiliated Hospital Illuminate Findings in Angiology (A Giant Right Coronary Artery of Diffuse Ectasia Induced by a Right Ventricular Fistula) … p.3547

www.NewsRx.com

Health and Medicine - Biological and Medical Science. New Data from Georgetown University Illuminate Findings in Biological and Medical Science (INDEED: Integrated differential expression and differential network analysis of omic data for biomarker discovery) … p.3547

Oncology - Pancreatic Cancer. New Data from Georgia Institute of Technology Illuminate Findings in Pancreatic Cancer (Acquired resistance of pancreatic cancer cells to cisplatin is multifactorial with cell context-dependent involvement of resistance genes) … p.3549

Musculoskeletal Diseases and Conditions - Poland Syndrome. New Data from Giannina Gaslini Institute Illuminate Findings in Poland Syndrome (Assessment of copy number variations in 120 patients with Poland syndrome) … p.3550

Gram-Negative Bacteria - Salmonella enterica. New Data from Graduate School of Agriculture Illuminate Findings in Salmonella enterica (In vivo cloning of large chromosomal segments into a BAC derivative by generalized transduction and recombineering in Salmonella enterica) … p.3551

Liver Diseases and Conditions - Chronic Hepatitis B Virus. New Data from Guangzhou University Illuminate Findings in Chronic Hepatitis B Virus (Identification of UQCRB as an oxymatrine recognizing protein using a T7 phage display screen) … p.3552

Lung Diseases and Conditions - Acute Respiratory Distress Syndrome. New Data from Harvard School of Medicine Illuminate Findings in Acute Respiratory Distress Syndrome (Lung Metabolic Activation as an Early Biomarker of Acute Respiratory Distress Syndrome and Local Gene Expression Heterogeneity) … p.3553
January 14, 2017

Suicide. New Data from Health Science Center Illuminate Findings in Suicide (Comorbidity Correlates of Death Among New Veterans of Iraq and Afghanistan Deployment) ... p.3554

Gram-Negative Bacteria - Escherichia coli. New Data from Huazhong Agricultural University Illuminate Findings in Escherichia coli (Differential transcription profiles of long non-coding RNAs in primary human brain microvascular endothelial cells in response to meningitic Escherichia coli) ... p.3555

Lung Diseases and Conditions - Pneumonia. New Data from Idaho State University Illuminate Findings in Pneumonia (Total Duration of Antimicrobial Therapy in Veterans Hospitalized With Uncomplicated Pneumonia: Results of a National Medication Utilization Evaluation) ... p.3556

Oncology - Breast Cancer. New Data from Indian Institute of Science Illuminate Findings in Breast Cancer (Triple Block Nanocarrier Platform for Synergistic Cancer Therapy of Antagonistic Drugs) ... p.3557

Oncology - Multiple Myeloma. New Data from Institute of Cancer Research Illuminate Findings in Multiple Myeloma (Genetic factors influencing the risk of multiple myeloma bone disease) ... p.3558

Oncology - Colon Cancer. New Data from Institute of Oncology Illuminate Findings in Colon Cancer (Post-Operative Infection Is an Independent Risk Factor for Worse Long-Term Survival after Colorectal Cancer Surgery) ... p.3559

Proteomics. New Data from Institute of Radiology Illuminate Findings in Proteomics (A novel Chk1-binding peptide that enhances genotoxic sensitivity through the cellular redistribution of nuclear Chk1) ... p.3560

www.NewsRx.com

Oncology - Breast Cancer. New Data from K. Froehlich et al Illuminate Findings in Breast Cancer (Generation of Multicellular Breast Cancer Tumor Spheroids: Comparison of Different Protocols) ... p.3561

Lymphocytes. New Data from Karolinska Institute Illuminate Findings in Lymphocytes [S–2–hydroxyglutarate regulates CD8(+) T–lymphocyte fate] ... p.3562

Eye Diseases and Conditions - Retinal Neovascularization. New Data from Kyushu University Illuminate Findings in Retinal Neovascularization (Different roles played by periostin splice variants in retinal neovascularization) ... p.3563

Oncology - Prostate Cancer. New Data from La Trobe University Illuminate Findings in Prostate Cancer (Which coping strategies can predict beneficial feelings associated with prostate cancer?) ... p.3564

Gram-Positive Bacteria - Streptomyces. New Data from Louisiana State University Illuminate Findings in Streptomyces (Genome Content and Phylogenomics Reveal both Ancestral and Lateral Evolutionary Pathways in Plant–Pathogenic Streptomyces Species) ... p.3565

Heart Disorders and Diseases - Heart Attack. New Data from Lund University Illuminate Findings in Heart Attack (Critical Care Management after Cardiac Arrest) ... p.3566

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Data from Mahidol University Illuminate Findings in Type 2 Diabetes (Adipoq Polymorphisms Among Thais With Pre-diabetes) ... p.3567

Drugs and Therapies - Genitourinary Tract Agents. New Data from Ministry of Health Illuminate Findings in Genitourinary Tract Agents (Effects of chronic restraint stress on social behaviors and the number of
hypothalamic oxytocin neurons in male rats) … p.3568

Genetic Diseases and Conditions - Down Syndrome. New Data from National Research Center Illuminate Findings in Down Syndrome (Genotype/phenotype correlation in a female patient with 21q22.3 and 12p13.33 duplications) … p.3569

Surgical Procedures - Endoscopy. New Data from Nippon School of Medicine Illuminate Findings in Endoscopy (Retrieval of Retained Capsule Endoscopy at Small Bowel Stricture by Double–Balloon Endoscopy Significantly Decreases Surgical Treatment) … p.3570

Biological Factors - Mycotoxins. New Data from Oregon Health and Science University Illuminate Findings in Mycotoxins (DNA polymerase zeta limits chromosomal damage and promotes cell survival following aflatoxin exposure) … p.3571

Pelvic Organ Prolapse. New Data from Peking Union Medical College Hospital Illuminate Findings in Pelvic Organ Prolapse (Proteomic Analysis of the Uterosacral Ligament in Postmenopausal Women with and without Pelvic Organ Prolapse) … p.3572

Nutritional and Metabolic Diseases and Conditions - Obesity. New Data from Pennsylvania State University Illuminate Findings in Obesity (Effects of Canola and High–Oleic–Acid Canola Oils on Abdominal Fat Mass in Individuals with Central Obesity) … p.3573

Digestive System Diseases and Conditions - Hirschsprung Disease. New Data from R.B. Pinto et al Illuminate Findings in Hirschsprung Disease (Hirschsprung disease and hepatoblastoma: case report of a rare association) … p.3574

Skin Diseases and Conditions - Atopic Dermatitis. New Data from Ruhr University Illuminate Findings in Atopic Dermatitis (Trying to understand the genetics of atopic dermatitis) … p.3575

Mesotheliomas. New Data from Sapienza–University Illuminate Findings in Mesotheliomas (Mesothelioma families without inheritance of a BAP1 predisposing mutation) … p.3576

Drugs and Therapies - Small Molecule Inhibitors. New Data from Scripps Research Institute Illuminate Findings in Small Molecule Inhibitors [Identification of Neutrophil Exocytosis Inhibitors (Nexinhibs), Small Molecule Inhibitors of Neutrophil Exocytosis and Inflammation DRUGGABILITY OF THE …] … p.3577

Stem Cell Research - Embryonic Stem Cells. New Data from Second Military Medical University Illuminate Findings in Embryonic Stem Cells (Induction of site–specific chromosomal translocations in embryonic stem cells by CRISPR/Cas9) … p.3578

Oncology - Osteosarcomas. New Data from Second Military Medical University Illuminate Findings in Osteosarcomas (Parthenolide Induces Reactive Oxygen Species–Mediated Autophagic Cell Death in Human Osteosarcoma Cells) … p.3579

Cardiovascular Diseases and Conditions - Hyperemia. New Data from Sichuan University Illuminate Findings in Hyperemia (Short–Term Efficacy of Pudilan Keyanning Toothpaste in Treatment of Minor Recurrent Aphthous Ulcers) … p.3580

Heart Disorders and Diseases - Endocarditis. New Data from State University of New York Illuminate Findings in Endocarditis (Neisseria elongata endocarditis of a native aortic valve) … p.3581
Science. New Data from Technical University Illuminate Findings in Science
(Recognition of the 3’ splice site RNA by the U2AF heterodimer involves a
dynamic population shift) … p.3581

Peptides and Proteins. New Data from Tokai University Illuminate Findings in
Peptides and Proteins [The Bromodomain and Extra–Terminal
Domain (BET) Family: Functional Anatomy of BET Paralogous Proteins]
… p.3582

Cardiology. New Data from UC Davis Medical Center Illuminate Findings in
Cardiology (Getting a better look: Outcomes of laparoscopic versus
transdiaphragmatic pericardial window for penetrating thoracoabdominal
trauma at a Level I trauma center) … p.3583

Oncology - Solid Cancer. New Data from University College Illuminate Findings in
Solid Cancer (ADD–ASPIRIN: A phase III, double–blind, placebo controlled,
randomised trial assessing the effects of aspirin on disease recurrence and
survival after primary therapy in ...) … p.3584

Oncology - Liver Cancer. New Data from University Hospital Illuminate Findings in
Liver Cancer (Recurrent Hepatocellular Carcinoma After Liver Transplantation:
Analysis of Risk Factors) … p.3586

Pharmacokinetics. New Data from University of Alexandria Illuminate Findings in
Pharmacokinetics (A Validated HPLC Method for the Determination of Linagliptin in Rat
Plasma. Application to a Pharmacokinetic Study) … p.3587

Clinical Research - Clinical Trials and Studies. New Data from University of
G. d’Annunzio Illuminate Findings in Clinical Trials and Studies (How Technology Can Impact Surgeon
Performance: A Randomized Trial Comparing 3–Dimensional versus
2–Dimensional Laparoscopy in Gynecology Oncology) … p.3588

Oncology - Squamous Cell Carcinoma. New Data from University of Kashmir Illuminate Findings in Squamous Cell
Carcinoma (Genotypes of CYP1A1,SULT1A1 and SULT1A2 and risk of squamous cell carcinoma of esophagus: outcome of a case–control study from Kashmir, India) … p.3589

Drugs and Therapies - Angiotensin II Inhibitors. New Data from University of Lincoln Illuminate Findings in
Angiotensin II Inhibitors (Comparative biodistribution and safety profiling of olmesartan medoxomil oil–in–water oral nanoemulsion) … p.3590

Gram-Positive Bacteria - Enterococcus. New Data from University of Paris Illuminate Findings in Enterococcus
(First nosocomial outbreak of vanA–type vancomycin–resistant Enterococcus raffinosus in France) … p.3591

Drugs and Therapies - Immunotherapy. New Data from University of Paris Illuminate Findings in Immunotherapy
(Co–stimulation Blockade Plus T–Cell Depletion in Transplant Patients: Towards a Steroid– and Calcineurin
Inhibitor–Free Future?) … p.3592

Oncology - Breast Cancer. New Data from University of Sheffield Illuminate Findings in Breast Cancer [Goserelin, as
an ovarian protector during (neo) adjuvant breast cancer chemotherapy, prevents long term altered bone
turnover] … p.3593

Hormones - Estrogen. New Data from University of Tokyo Illuminate Findings in Estrogen (Protective effects of
estrogen against vascular calcification via estrogen receptor alpha–dependent growth arrest–specific gene 6
transactivation) … p.3594

Chemistry - Biochemistry. New Data from University of Victoria Illuminate Findings in Biochemistry [Molecular Basis for
Recognition of the Cancer Glycobiomarker, LacdiNAc (GalNAc[14] GlcNAc), by Wisteria floribunda
Agglutinin] … p.3595
Musculoskeletal Diseases and Conditions - Tendinopathy. New Data from University of the Western Cape Illuminate Findings in Tendinopathy (Semantic interrogation of a multi-knowledge domain ontological model of tendinopathy identifies four strong candidate risk genes) ... p.3596

Optic Nerve Diseases. New Data from Wenzhou Medical University Illuminate Findings in Optic Nerve Diseases (Three-dimensional Characteristics Of Four Macular Intraretinal Layer Thicknesses In Symptomatic And Asymptomatic Carriers Of G11778a Mutation With Leber's ...) ... p.3597

Cardiovascular Diseases and Conditions - Deep Vein Thrombosis. New Deep Vein Thrombosis Study Findings Have Been Reported by B. Du Pont and Colleagues (Right-sided Cockett's syndrome) ... p.3598

Immune System Diseases and Conditions - Delayed Hypersensitivity. New Delayed Hypersensitivity Findings from Rambam Health Care Campus Outlined (The use of patch tests in the diagnosis of delayed hypersensitivity drug eruptions) ... p.3599

Neurodegenerative Diseases and Conditions - Dementia. New Dementia Study Findings Have Been Reported by Researchers at School of Medicine (Aberrant Spontaneous Brain Activity in Patients with Mild Cognitive Impairment and concomitant Lacunar Infarction: A Resting–State Functional MRI Study) ... p.3600

Mosquito-Borne Diseases - Dengue Hemorrhagic Fever. New Dengue Hemorrhagic Fever Study Findings Have Been Reported by Investigators at University of Rhode Island (Dengue virus induces mitochondrial elongation through impairment of Drp1–triggered mitochondrial fission) ... p.3601

Dental Diseases and Conditions - Dental Fluorosis. New Dental Fluorosis Study Findings Recently Were Reported by Researchers at Paris Diderot University (Chronic Exposure to Bisphenol A Exacerbates Dental Fluorosis in Growing Rats) ... p.3602

Mental Health Diseases and Conditions - Depression. New Depression Study Results Reported from National Institute for Health and Welfare [PRKCDBP (CAVIN3) and CRY2 associate with major depressive disorder] ... p.3603

Drugs and Therapies - Dexrazoxane Therapy. New Dexrazoxane Therapy Study Findings Have Been Reported by Researchers at Ohio State University (Quantifying Drug–Induced Nanomechanics and Mechanical Effects to Single Cardiomyocytes for Optimal Drug Administration To Minimize Cardiotoxicity) ... p.3604

Diabetes. New Diabetes Study Findings Have Been Reported by Investigators at Second Military Medical University (Reintervention after endovascular repair for aortic dissection: A systematic review and meta–analysis) ... p.3605

Diabetes. New Diabetes Study Results Recently Were Reported by Researchers at Research Hospital (The Emerging Role of Sirtuin 1 in Cellular Metabolism, Diabetes Mellitus, Diabetic Kidney Disease and Hypertension) ... p.3606

Diabetes. New Diabetes Study Results Reported from Second Military Medical University (Topical administration of cryopreserved living micronized amnion accelerates wound healing in diabetic mice by modulating local microenvironment) ... p.3607

Diabetes. New Diabetes Study Results Reported from University of Iowa (P66Shc–Induced MicroRNA–34a Causes Diabetic Endothelial Dysfunction by Downregulating Sirtuin1) ... p.3608
Nutritional and Metabolic Diseases and Conditions - Diabetic Foot. New Diabetic Foot Findings from Tufts University Discussed (Altered ECM deposition by diabetic foot ulcer–derived fibroblasts implicates fibronectin in chronic wound repair) … p.3609

Nutritional and Metabolic Diseases and Conditions - Diabetic Nephropathy. New Diabetic Nephropathy Study Results from Nanjing University Described (Terpene glycoside component from Moutan Cortex ameliorates diabetic nephropathy by regulating endoplasmic reticulum stress–related inflammatory responses) … p.3610

Heart Disorders and Diseases - Dilated Cardiomyopathy. New Dilated Cardiomyopathy Findings from Soonchunhyang University Discussed (Genetic Variations Leading to Familial Dilated Cardiomyopathy) … p.3611

Heart Disorders and Diseases - Dilated Cardiomyopathy. New Dilated Cardiomyopathy Findings from University of Leipzig Discussed (Endomyocardial miR–133a levels correlate with myocardial inflammation, improved left ventricular function, and clinical outcome in patients with inflammatory …) … p.3612

Disease Attributes - Disease Progression. New Disease Progression Findings from Radboud University Described (Multimodal imaging of the disease progression of birdshot chorioretinopathy) … p.3613

Disease Attributes - Disease Progression. New Disease Progression Study Findings Recently Were Reported by Researchers at Medical College of Wisconsin (Protease–activated receptors in kidney disease progression) … p.3615

Disease Attributes - Disease Progression. New Disease Progression Study Results Reported from University of Turin (Pembrolizumab Cutaneous Adverse Events and Their Association With Disease Progression) … p.3617

Hematologic Diseases and Conditions - Disseminated Intravascular Coagulation. New Disseminated Intravascular Coagulation Study Results Reported from Nanjing Medical University (Efficacy evaluation of D–dimer and modified criteria in overt and nonovert disseminated intravascular coagulation diagnosis) … p.3618

Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Findings Reported from Max–Planck–Institute for Polymer Research (The pro–active payload strategy significantly increases selective release from mesoporous nanocapsules) … p.3619

Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Findings from Hong Kong University of Science and Technology Outlined (Theranostic hyaluronic acid prodrug micelles with aggregation–induced emission characteristics for targeted drug delivery) … p.3620

Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Findings from University of Twente Described (Targeting distinct myeloid cell populations in vivo using polymers, liposomes and microbubbles) … p.3621
Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Findings from University of Valencia Reported (Aptamers as smart ligands for nano–carriers targeting) … p.3622

Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Study Findings Have Been Reported by Researchers at Tianjin University (Zwitterionic–Modified Starch–Based Stealth Micelles for Prolonging Circulation Time and Reducing Macrophage Response) … p.3623

Drugs and Therapies - Drug Delivery Systems. New Drug Delivery Systems Study Findings Reported from University of Sassari (Immune cell impact of three differently coated lipid nanocapsules: pluronic, chitosan and polyethylene glycol) … p.3624

Drug Resistance. New Drug Resistance Study Findings Reported from Okayama University (Low frequency of drug–resistant virus did not affect the therapeutic efficacy in daclatasvir plus asunaprevir therapy in patients with chronic HCV genotype–1 infection) … p.3626

Nutritional and Metabolic Diseases and Conditions - Dyslipidemias. New Dyslipidemias Study Findings Recently Were Reported by Researchers at General University Hospital (Statin–Induced Changes in Mitochondrial Respiration in Blood Platelets in Rats and Human With Dyslipidemia) … p.3627

Digestive System Diseases and Conditions - Dysphagia. New Dysphagia Study Findings Have Been Reported by Researchers at Vanderbilt University (Randomized controlled trial comparing esophageal dilation to no dilation among adults with esophageal eosinophilia and dysphagia) … p.3628

Ebola Virus. New Ebola Virus Study Findings Have Been Reported from J.W. Benzine et al (Molecular Diagnostic Field Test for Point–of–Care Detection of Ebola Virus Directly From Blood) … p.3629

Ebola Virus. New Ebola Virus Study Findings Have Been Reported from University of Manitoba (Inactivation of Zaire ebolavirus Variant Makona in Human Serum Samples Analyzed by Enzyme–Linked Immunosorbent Assay) … p.3630

Ebola Virus. New Ebola Virus Study Findings Recently Were Reported by Researchers at Harvard School of Medicine (Strengthening Health Systems While Responding to a Health Crisis: Lessons Learned by a Nongovernmental Organization During the Ebola Virus ...) … p.3631

Eye Diseases and Conditions - Ectopia Lentis. New Ectopia Lentis Study Findings Have Been Reported from University of Utah (Capsular bag stabilization during lens extraction and intraocular lens implantation in cases of Marfan syndrome with ectopia lentis using ultra–high–viscosity ...) … p.3632

Embolism. New Embolism Study Findings Have Been Reported from Second Military Medical University (Usefulness of CHA(2)DS(2)–VASc Scoring Systems for Predicting Risk of Perioperative Embolism in Patients of Cardiac Myxomas Underwent Surgical Treatment] … p.3633

Health and Medicine - Emergency Medicine. New Emergency Medicine Findings from Beth Israel Deaconess Medical Center Discussed (Platypnea–orthodeoxia syndrome: a simple clinical observation that heralds critical but treatable disease) … p.3634
January 14, 2017

Endocytosis. New Endocytosis Data Have Been Reported by Investigators at University of Southern Denmark (AQP2 Plasma Membrane Diffusion Is Altered by the Degree of AQP2–S256 Phosphorylation) … p.3635

Oncology - Endometrial Cancer. New Endometrial Cancer Findings Has Been Reported by Investigators at University of Southern Denmark (The nature of early–stage endometrial cancer recurrence–A national cohort study) … p.3636

Oncology - Endometrial Cancer. New Endometrial Cancer Study Findings Recently Were Reported by Researchers at Radboud University (Atypical Endometrial Polyps and Concurrent Endometrial Cancer A Systematic Review) … p.3637

Bacterial Infections and Mycoses - Endotoxemia. New Endotoxemia Study Findings Have Been Reported by Investigators at Istanbul University (Amelioration of Energy Metabolism by Melatonin in Skeletal Muscle of Rats With LPS Induced Endotoxemia) … p.3638

Gram-Negative Bacteria - Enterobacter aerogenes. New Enterobacter aerogenes Findings from B.B. Flury and Co–Researchers Described (The differential importance of mutations within AmpD in cephalosporin resistance of Enterobacter aerogenes and Enterobacter cloacae) … p.3639

Gram-Positive Bacteria - Enterococcus faecalis. New Enterococcus faecalis Findings from CSIR Reported (Assessment of virulence potential of uncharacterized Enterococcus faecalis strains using pan genomic approach – Identification of pathogen–specific and habitat–specific genes) … p.3640

Enterovirus. New Enterovirus Study Findings Reported from University of Thessaly (Serum Neutralization Assay for the Determination of Antibody Levels Against Non–Polio Enterovirus Strains in Central and Western Greece) … p.3641

Enterovirus. New Enterovirus Study Results from French National Institute of Health and Medical Research (INSERM) Described (Exchanges of genomic domains between poliovirus and other cocirculating species C enteroviruses reveal a high degree of plasticity) … p.3642

Environmental Research. New Environmental Research Findings from School of Medicine Outlined (Identifying sensitive windows for prenatal particulate air pollution exposure and mitochondrial DNA content in cord blood) … p.3643

Environmental Health - Environmental Research and Public Health. New Environmental Research and Public Health Findings from Sylvester Comprehensive Cancer Center Described (Racial/Ethnic Differences in Electronic Cigarette Use and Reasons for Use among Current and Former Smokers: Findings from a …) … p.3644

Enzymes and Coenzymes. New Enzymes and Coenzymes Findings from Brandeis University Outlined (Enzyme–Instructed Self–Assembly of Small D–Peptides as a Multiple–Step Process for Selectively Killing Cancer Cells) … p.3645

Enzymes and Coenzymes. New Enzymes and Coenzymes Findings from Leibniz University Outlined (PvdN Enzyme Catalyzes a Periplasmic Pyoverdine Modification) … p.3646

Central Nervous System Diseases and Conditions - Epilepsy. New Epilepsy Data Have Been Reported by Researchers at McGill University (Epileptic Encephalopathy Caused by Mutations in the Guanine Nucleotide Exchange Factor DENND5A) … p.3647
Central Nervous System Diseases and Conditions - Epilepsy. New Epilepsy Findings from All India Institute of Medical Sciences Discussed (A case of recurrent status epilepticus and successful management with progesterone) … p.3648

Central Nervous System Diseases and Conditions - Epilepsy. New Epilepsy Findings from Institute of Neurology Discussed (Brivaracetam: review of its pharmacology and potential use as adjunctive therapy in patients with partial onset seizures) … p.3649

Central Nervous System Diseases and Conditions - Epilepsy. New Epilepsy Findings from Research Institute Described (MED23–Associated Refractory Epilepsy Successfully Treated with the Ketogenic Diet) … p.3650

Nose Diseases and Conditions - Epistaxis. New Epistaxis Data Have Been Reported by Investigators at University of Maryland (Role of topical tranexamic acid in the management of idiopathic anterior epistaxis in adult patients in the emergency department) … p.3651

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. New Epstein–Barr Virus Findings from Harvard School of Medicine Discussed (Epstein–Barr virus super–enhancer eRNAs are essential for MYC oncogene expression and lymphoblast proliferation) … p.3652

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. New Epstein–Barr Virus Study Findings Recently Were Reported by Researchers at Midwestern University [Epstein–Barr Virus Latent Membrane Protein 2A (LMP2A) enhances IL–10 production through the activation of Bruton's tyrosine kinase and STAT3] … p.3653

Nutritional and Metabolic Diseases and Conditions - Erythropoietic Protoporphyria. New Erythropoietic Protoporphyria Study Findings Have Been Reported by Researchers at University of Toyama (Incomplete erythropoietic protoporphyria caused by a splice site modulator homozygous IVS3–48C polymorphism in the ferrochelatase gene) … p.3654

Gram-Negative Bacteria - Escherichia coli. New Escherichia coli Data Have Been Reported by Investigators at University of California (Mutational Consequences of Ciprofloxacin in Escherichia coli) … p.3655

Gram-Negative Bacteria - Escherichia coli. New Escherichia coli Data Have Been Reported by Researchers at Nara Women's University (Natural Escherichia coli strains undergo cell–to–cell plasmid transformation) … p.3656

Gram-Negative Bacteria - Escherichia coli. New Escherichia coli Study Findings Recently Were Reported by Researchers at King Abdullah University of Science and Technology (Isolation and Characterization of NDM–Positive Escherichia coli from Municipal Wastewater in Jeddah, Saudi Arabia) … p.3658

Gram-Negative Bacteria - Escherichia coli. New Escherichia coli Study Findings Recently Were Reported by Researchers at University Hospital (Real–Time Genome Sequencing of Resistant Bacteria Provides Precision Infection Control in an Institutional Setting) … p.3659
January 14, 2017

Oncology - Esophageal Cancer. New Esophageal Cancer Findings Reported from Shandong University (Predictive Effects of Lung function test on Postoperative Pneumonia in Squamous Esophageal Cancer) ... p.3660

Oncology - Esophageal Cancer. New Esophageal Cancer Findings from First Hospital Described (Hormonal and reproductive factors and risk of esophageal cancer in women: a meta-analysis) ... p.3661

Oncology - Esophageal Cancer. New Esophageal Cancer Findings from Mie University Hospital Reported (Preliminary treatment results of proton beam therapy with chemoradiotherapy for stage I–III esophageal cancer) ... p.3662

Oncology - Esophageal Cancer. New Esophageal Cancer Findings from Tianjin Medical University Reported (Clinical significance of preoperative and postoperative cytokeratin 19 messenger RNA level in peripheral blood of esophageal cancer patients) ... p.3663

Oncology - Esophageal Cancer. New Esophageal Cancer Study Findings Have Been Reported by Researchers at Cancer Hospital (Radiation dose escalation by simultaneous modulated accelerated radiotherapy combined with chemotherapy for esophageal cancer: a phase II study) ... p.3664

Oncology - Esophageal Cancer. New Esophageal Cancer Study Findings Have Been Reported from Stanford University (Dynamic Microenvironment Induces Phenotypic Plasticity of Esophageal Cancer Cells Under Flow) ... p.3665

Hormones - Estradiol Congeners. New Estradiol Congeners Data Have Been Reported by Investigators at Ocean University of China (An in vivo assay performed using multiple biomarkers related to testosterone synthesis and conversion for assessing the androgenic potency of refuse ...) ... p.3666

Hormones - Estradiol Congeners. New Estradiol Congeners Findings Has Been Reported by Researchers at University of Gothenburg (High Serum SHBG Predicts Incident Vertebral Fractures in Elderly Men) ... p.3667

Hormones - Estradiol Congeners. New Estradiol Congeners Findings from G.A. Partsinevelos and Colleagues Discussed (Addition of low–dose hCG to rFSH during ovarian stimulation for IVF/ICSI: is it beneficial?) ... p.3668

Hormones - Estradiol Congeners. New Estradiol Congeners Findings from Zhejiang University Described (Chloramines in a pilot–scale water distribution system: Transformation of 17 beta–estradiol and formation of disinfection byproducts) ... p.3669

Drugs and Therapies - Ethnopharmacology. New Ethnopharmacology Findings Reported from University of Nairobi (Freeze dried extracts of Bidens biternata (Lour.) Men. and Sheriff. show significant antidiarrheal activity in in–vivo models of diarrhea) ... p.3670

Drugs and Therapies - Ethnopharmacology. New Ethnopharmacology Findings from University of Kragujevac Discussed (In vitro and in vivo assessment of meadowsweet (Filipendula ulmaria) as anti–inflammatory agent) ... p.3671

Drugs and Therapies - Ethnopharmacology. New Ethnopharmacology Study Findings Recently Were Reported by Researchers at University of Technology (Phytochemical and ethnomedicinal study of Huperzia species used in the traditional medicine of Saraguros in Southern Ecuador; AChE and MAO ...) ... p.3673
Evolution. New Evolution Findings from Alfred–Wegener Institute for Polar and Marine Research Reported (Transgenerational effects persist down the maternal line in marine sticklebacks: gene expression matches physiology in a warming ocean) … p.3674

Autoinflammatory Diseases and Conditions - Familial Mediterranean Fever. New Familial Mediterranean Fever Data Have Been Reported by Investigators at Istanbul University (Approach to the patients with inadequate response to colchicine in familial Mediterranean fever) … p.3675

Liver Diseases and Conditions - Fatty Liver. New Fatty Liver Data Have Been Reported by Researchers at Samsung Medical Center (Non–alcoholic fatty liver diseases and risk of colorectal neoplasia) … p.3676

Liver Diseases and Conditions - Fatty Liver. New Fatty Liver Findings from Medical University Reported (Nuclear Receptor Modulation for the Treatment of Nonalcoholic Fatty Liver Disease) … p.3677

Liver Diseases and Conditions - Fatty Liver. New Fatty Liver Study Findings Recently Were Reported by Researchers at University of Malaya (Phosphatidylethanolamine N–methyltransferase gene rs7946 polymorphism plays a role in risk of nonalcoholic fatty liver disease: evidence from …) … p.3679

Fertilization in Vitro. New Fertilization in Vitro Study Findings Have Been Reported by Investigators at Kagoshima University (Developmental ability of embryos produced from oocytes with fragile oolemma by intracytoplasmic sperm injection) … p.3680

Fibrous Dysplasia. New Fibrous Dysplasia Findings from Edouard Herriot Hospital Described (Prognostic Factors From an Epidemiologic Evaluation of Fibrous Dysplasia of Bone in a Modern Cohort: The FRANCEDYS Study) … p.3681

Genetics - Medical Genetics. New Findings Reported from A. Arjunan and Co–Authors Describe Advances in Medical Genetics (Carrier screening in the era of expanding genetic technology) … p.3682

Drugs and Therapies - Transdermal Delivery. New Findings Reported from A. Shah and Co–Authors Describe Advances in Transdermal Delivery (Support vector regression to estimate the permeability enhancement of potential transdermal enhancers) … p.3683

Drugs and Therapies - Cancer Therapy. New Findings Reported from Al Quds University Describe Advances in Cancer Therapy (Anticancer Activity, Antioxidant Activity, and Phenolic and Flavonoids Content of Wild Tragopogon porrifolius Plant Extracts) … p.3684

Eye Diseases and Conditions - Miosis. New Findings Reported from AstraZeneca Describe Advances in Miosis (The effect of quinidine, a strong P–glycoprotein inhibitor, on the pharmacokinetics and central nervous system distribution of naloxegol) … p.3685

Oncology - Gastric Cancer. New Findings Reported from Azienda Ospedaliera University Describe Advances in Gastric Cancer (Third–Line Chemotherapy with irinotecan plus 5–Fluorouracil in Caucasian Metastatic Gastric Cancer Patients) … p.3686
Oncology - Lung Cancer. New Findings Reported from B.J. Page and Co–Authors Describe Advances in Lung Cancer (A survey of lung cancer in rural and remote Aboriginal and Torres Strait Islander communities in Queensland: health views that impact on early diagnosis and ...) ... p.3687

Nutritional and Metabolic Diseases and Conditions - Diabetic Nephropathy. New Findings Reported from Beckman Research Institute Describe Advances in Diabetic Nephropathy (Inhibition of the processing of miR–25 by HIPK2–Phosphorylated–MeCP2 induces NOX4 in early diabetic nephropathy) ... p.3688

Liver Diseases and Conditions - Hepatitis E Virus. New Findings Reported from Blood Center Describe Advances in Hepatitis E Virus (Hepatitis E virus infection in the Irish blood donor population) ... p.3689

Oncology - Liver Cancer. New Findings Reported from Chinese Academy of Medical Sciences Describe Advances in Liver Cancer (A novel anti–cancer agent Icaritin suppresses hepatocellular carcinoma initiation and malignant growth through the IL–6/Jak2/Stat3 pathway) ... p.3690

Science. New Findings Reported from Chinese Academy of Sciences Describe Advances in Science (Antiproliferative activities of Amaryllidaceae alkaloids from Lycoris radiata targeting DNA topoisomerase I) ... p.3691

Oncology - Liver Cancer. New Findings Reported from Chongqing Medical University Describe Advances in Liver Cancer (The prognostic value of a classification system for centrally located liver tumors in the setting of hepatocellular carcinoma after mesohepatectomy) ... p.3692

www.NewsRx.com

Oncology - Colon Cancer. New Findings Reported from Christchurch Hospital Describe Advances in Colon Cancer (Follow–up strategies for patients treated for non–metastatic colorectal cancer) ... p.3693

Heart Disorders and Diseases - Heart Attack. New Findings Reported from Cleveland Clinic Describe Advances in Heart Attack (Therapeutic hypothermia after cardiac arrest: A systematic review/meta–analysis exploring the impact of expanded criteria and targeted temperature) ... p.3695

Heart Disorders and Diseases - Heart Disease. New Findings Reported from Copenhagen University Hospital Describe Advances in Heart Disease (Short Telomere Length and Ischemic Heart Disease: Observational and Genetic Studies in 290 022 Individuals) ... p.3696

Neurodegenerative Diseases and Conditions - Alzheimer Disease. New Findings Reported from Department of Neurochemistry Describe Advances in Alzheimer Disease (Tau and neurodegenerative disease: the story so far) ... p.3697

Oncology - Ovarian Cancer. New Findings Reported from Department of Obstetrics & Gynecology Describe Advances in Ovarian Cancer (Synergistic effect of piperine and paclitaxel on cell fate via cyt–c, Bax/Bcl–2–caspase–3 pathway in ovarian adenocarcinomas SKOV–3 cells) ... p.3698

Oncology - Thyroid Cancer. New Findings Reported from Federal University Describe Advances in Thyroid Cancer (M918V RET mutation causes familial medullary thyroid carcinoma: study of 8 affected kindreds) ... p.3699
January 14, 2017

DNA Research. New Findings Reported from First Affiliated Hospital Describe Advances in DNA Research (Direct ultrasensitive electrochemical biosensing of pathogenic DNA using homogeneous target–initiated transcription amplification) … p.3700

Heart Disorders and Diseases - Atrial Fibrillation. New Findings Reported from Gangnam Severance Hospital Describe Advances in Atrial Fibrillation (The safety and efficacy of vitamin K antagonist in atrial fibrillation patients with previous ulcer bleeding Long–term results from a multicenter ...) … p.3701

Cardiology. New Findings Reported from Hiroshima University Describe Advances in Cardiology (Coronary CT angiography in patients with implanted cardiac devices: initial experience with the metal artefact reduction technique) … p.3702

Salicylic Acid. New Findings Reported from Indian Institute of Technology Describe Advances in Salicylic Acid (Carbon Bead–Supported Ethylene Diamine–Functionalized Carbon Nanofibers: An Efficient Adsorbent for Salicylic Acid) … p.3703

Musculoskeletal Diseases and Conditions - Osteopetrosis. New Findings Reported from Indiana University School of Medicine Describe Advances in Osteopetrosis [Phenotypic severity of autosomal dominant osteopetrosis type II (ADO2) mice on different genetic backgrounds recapitulates the features of human ...] … p.3704

Oncology - Colon Cancer. New Findings Reported from Institute of General Surgery Describe Advances in Colon Cancer (Arsenic trioxide inhibits lung metastasis of mouse colon cancer via reducing the infiltration of regulatory T cells) … p.3705

Central Nervous System Diseases and Conditions - Meningeal Neoplasms. New Findings Reported from Institute of Oncology Describe Advances in Meningeal Neoplasms (Aberrant DNA methylation of alternative promoter of DLC1 isofrom 1 in meningiomas) … p.3706

Oncology - Cancer Epidemiology. New Findings Reported from International Agency for Research on Cancer Describe Advances in Cancer Epidemiology (Cancer in Central and South America: Methodology) … p.3707

Oncology - Breast Cancer. New Findings Reported from J. Taradaj and Co–Authors Describe Advances in Breast Cancer (The influence of Kinesiology Taping on the volume of lymphoedema and manual dexterity of the upper limb in women after breast cancer treatment) … p.3708

Drugs and Therapies - Pharmacoepidemiology. New Findings Reported from K. Kubota and Co–Authors Describe Advances in Pharmacoepidemiology (Symmetry analysis for monitoring safety of newly marketed drugs) … p.3709

Immune System Diseases and Conditions - Chediak–Higashi Syndrome. New Findings Reported from Kuwait University Describe Advances in Chediak–Higashi Syndrome (Oral rehabilitation of patients with Chediak–Higashi syndrome using zygoma and root form implant–supported fixed prostheses: A report of two patients) … p.3710

Oncology - Liver Cancer. New Findings Reported from Madurai Kamaraj University Describe Advances in Liver Cancer (NF kappa B activation demarcates a subset of hepatocellular carcinoma patients for targeted therapy) … p.3711
Autoimmune Diseases and Conditions - Multiple Sclerosis. New Findings Reported from McGill University Describe Advances in Multiple Sclerosis (Geographic associations between lactase phenotype, multiple sclerosis, and inflammatory bowel diseases; Does obesity trump geography?) ... p.3712

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. New Findings Reported from National Heart and Lung Institute Describe Advances in Chronic Obstructive Pulmonary Disease (The MIF Antagonist ISO–1 Attenuates Corticosteroid–Insensitive Inflammation and Airways Hyperresponsiveness in an ...) ... p.3713

Kidney Diseases and Conditions - Chronic Kidney Disease. New Findings Reported from O. Akchurin and Co–Authors Describe Advances in Chronic Kidney Disease (Lack of hepcidin ameliorates anemia and improves growth in an adenine–induced mouse model of chronic kidney disease) ... p.3715

Mycobacterium Infections - Tuberculosis. New Findings Reported from Oswaldo Cruz Foundation Describe Advances in Tuberculosis (Occult hepatitis B virus infection: clinical implications in tuberculosis treatment) ... p.3716

Ebola Virus. New Findings Reported from Public Health Agency of Canada Describe Advances in Ebola Virus (Laboratory Response to 2014 Ebola Virus Outbreak in Mali) ... p.3717

Oncology - Breast Cancer. New Findings Reported from Pusan National University Hospital Describe Advances in Breast Cancer (Tumor Heterogeneity Assessed by 18F–FDG PET/CT Is Not Significantly Associated with Nodal Metastasis in Breast Cancer Patients) ... p.3718

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. New Findings Reported from R. Mormile and Co–Authors Describe Advances in Hypertrophic Cardiomyopathy (Neonates of diabetic mothers: The starting point for developing novel therapeutic approaches to ischemic heart and brain?) ... p.3719

Heart Disorders and Diseases - Heart Failure. New Findings Reported from Sao Paulo State University Describe Advances in Heart Failure (Beneficial Effects of Physical Exercise on Functional Capacity and Skeletal Muscle Oxidative Stress in Rats with Aortic Stenosis–Induced Heart Failure) ... p.3720

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings Reported from School of Medicine Describe Advances in Type 2 Diabetes (Serum Irisin Level is Higher and Related with Insulin in Acanthosis Nigricans–related Obesity) ... p.3721

Drugs and Therapies - Pharmacology and Experimental Therapeutics. New Findings Reported from Semmelweis University Describe Advances in Pharmacology and Experimental Therapeutics (New Morphine Analogs Produce Peripheral Antinociception within a Certain Dose Range of Their Systemic Administration) ... p.3722

Musculoskeletal Diseases and Conditions - Chronic Fatigue Syndrome. New Findings Reported from Shaanxi Normal University Describe Advances in Chronic Fatigue Syndrome (Metabolic mechanism of a polysaccharide from Schisandra chinensis to relieve chronic fatigue syndrome) ... p.3723

Genetics - Assisted Reproduction and Genetics. New Findings Reported from Smithsonian Describe Advances in Assisted Reproduction and Genetics [Carbonyl cyanide 4–(trifluoromethoxy) phenylhydrazone (FCCP) pre–exposure ensures follicle integrity during in vitro
January 14, 2017

www.NewsRx.com

Drugs and Therapies - Antiinfectives. New Findings Reported from University of Melbourne Describe Advances in Antiinfectives (Divergent Transcriptional Responses to Physiological and Xenobiotic Stress in Giardia duodenalis) … p.3732

Transfusion Medicine - Blood Transfusion. New Findings Reported from University of Oregon Describe Advances in Blood Transfusion (Acute hot water immersion is protective against impaired vascular function following forearm ischemia–reperfusion in young healthy humans) … p.3734

Campylobacter. New Findings Reported from University of Oxford Describe Advances in Campylobacter (Exploiting Bacterial Whole–Genome Sequencing Data for Evaluation of Diagnostic Assays: Campylobacter Species Identification as a Case Study) … p.3735

Heart Research. New Findings Reported from University of Queensland Describe Advances in Heart Research (Crim1 has cell–autonomous and paracrine roles during embryonic heart development) … p.3736

Oncology - Peripheral T-Cell Lymphoma. New Findings Reported from University of Rijeka Describe Advances in Peripheral T–Cell Lymphoma (Rapid Fatal Acute Peripheral T–Cell Lymphoma Associated With IgG Plasma Cell Leukemia and IgA Hypergammaglobulinemia) … p.3737

Algorithms. New Findings Reported from University of Rostock Describe Advances in Algorithms (On generalized Borgen plots II: The line–moving algorithm and its numerical implementation) … p.3738

Drugs and Therapies - Nasal Lubricants and Irrigations. New Findings Reported from University of Rouen Describe Advances in Nasal Lubricants and Irrigations (Impact of sodium chloride on the expansion of a...
January 14, 2017

www.NewsRx.com

Heart Disorders and Diseases - Heart Attack. New Findings Reported from Wakayama Medical University Describe Advances in Heart Attack (Local Matrix Metalloproteinase 9 Level Determines Early Clinical Presentation of ST–Segment–Elevation Myocardial Infarction) … p.3745

Cytokines. New Findings Reported from Wright State University Describe Advances in Cytokines (Hydroxyurea Induces Cytokinesis Arrest in Cells Expressing a Mutated Sterol–14 alpha–Demethylase in the Ergosterol Biosynthesis Pathway) … p.3746

Gram-Positive Bacteria - Clostridium beijerinckii. New Findings Reported from Xi'an Jiao Tong University Describe Advances in Clostridium beijerinckii [Transcriptional analysis of degenerate strain Clostridium beijerinckii DG–8052 reveals a pleiotropic response to CaCO(3) associated recovery of ...] … p.3747

Oncology - Breast Cancer. New Findings Reported from Zhejiang University Describe Advances in Breast Cancer (MicroRNA–200c delivered by solid lipid nanoparticles enhances the effect of paclitaxel on breast cancer stem cell) … p.3748

Oncology - Prostate Cancer. New Findings from A.J. Lomax and Co–Authors in the Area of Prostate Cancer Reported ('First, do no harm': managing the metabolic impacts of androgen deprivation in men with advanced prostate cancer) … p.3750

liquid–liquid miscibility gap in an API/water system. Case study of Brivaracetam) … p.3738

Nutritional and Metabolic Diseases and Conditions - Dyslipidemias. New Findings Reported from University of Saskatchewan Describe Advances in Dyslipidemias (The Different Facets of Dyslipidemia and Hypertension in Atherosclerosis) … p.3739

Drugs and Therapies - Thioredoxin Therapy. New Findings Reported from University of Science and Technology Describe Advances in Thioredoxin Therapy (Thioredoxin–interacting protein regulates haematopoietic stem cell ageing and rejuvenation by inhibiting p38 kinase activity) … p.3740

Cardiology. New Findings Reported from University of Toronto Describe Advances in Cardiology (Sex Differences in Cardiac Rehabilitation Adherence: A Meta–analysis) … p.3741

Oncology - Breast Cancer. New Findings Reported from University of Udine Describe Advances in Breast Cancer (Translational and clinical research highlights from the 38th San Antonio Breast Cancer Symposium) … p.3742

Arteriovenous Malformation. New Findings Reported from University of Virginia Describe Advances in Arteriovenous Malformation (Dosimetric effects of Onyx embolization on Gamma Knife arteriovenous malformation dose distributions) … p.3743

Mycobacterium Infections - Tuberculosis. New Findings Reported from Vanderbilt University Describe Advances in Tuberculosis (Fluoroquinolones for the treatment and prevention of multidrug–resistant tuberculosis) … p.3744
Blood Diseases and Conditions - Sepsis. New Findings from A.J. Rahbar and Co–Authors in the Area of Sepsis Reported (Pharmacokinetic and Pharmacodynamic Evaluation of Doripenem in Critically Ill Trauma Patients with Sepsis) ... p.3751

Heart Disorders and Diseases - Heart Disease. New Findings from A.Q. Kolff et al. Broadens Understanding of Heart Disease (Discriminative Power of the HEART Score for Obstructive Coronary Artery Disease in Acute Chest Pain Patients Referred for CCTA) ... p.3752

Angiology. New Findings from Academic Medical Center in Angiology Provides New Insights (Carotid plaque fissure: An underestimated source of intraplaque hemorrhage) ... p.3753

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics. New Findings from Affiliated Hospital Update Understanding of Anxiolytics Sedatives and Hypnotics (Chloral Hydrate Treatment Induced Apoptosis of Macrophages via Fas Signaling Pathway) ... p.3754

Oncology - Liver Cancer. New Findings from Affiliated Hospital of Nanjing University School of Medicine Yields New Data on Liver Cancer (Electrochemical Detection and Distribution Analysis of β–Catenin for the Evaluation of Invasion and Metastasis in Hepatocellular ...) ... p.3755

Digestive System Diseases and Conditions - Crohn's Disease. New Findings from Ain Shams University in the Area of Crohn's Disease Reported (Does Helicobacter pylori eradication therapy trigger or protect against Crohn's disease?) ... p.3756

Oncology - Ovarian Cancer. New Findings from Ajou University Update Understanding of Ovarian Cancer (Total parietal peritonectomy with en bloc pelvic resection for advanced ovarian cancer with peritoneal carcinomatosis) ... p.3757

Oncology - Breast Cancer. New Findings from Alexandra Hospital in Breast Cancer Provides New Insights (Adding the power of iodinated contrast media to the credibility of mammography in breast cancer diagnosis) ... p.3758

Blood Diseases and Conditions - Sepsis. New Findings from Alice Springs Hospital in Sepsis Provides New Insights (Optimising meropenem dosing in critically ill Australian Indigenous patients with severe sepsis) ... p.3759

Central Nervous System Diseases and Conditions - Epilepsy. New Findings from All India Institute of Medical Sciences Describe Advances in Epilepsy (Behavioral effects and somnolence due to levetiracetam versus oxcarbazepine – a retrospective comparison study of North Indian patients with refractory ...) ... p.3760

Eye Diseases and Conditions - Retinoblastoma. New Findings from All India Institute of Medical Sciences in Retinoblastoma Provides New Insights (Epigenetic regulation of human retinoblastoma) ... p.3762

Structural Biology. New Findings from Almirall S.A. in the Area of Structural Biology Reported (Biphenyl Pyridazinone Derivatives as Inhaled PDE4 Inhibitors: Structural Biology and Structure–Activity Relationships) ... p.3763

Drugs and Therapies - Antibiotics. New Findings from Amiens University Hospital Update Understanding of Antibiotics (Tolerability and Plasma Drug Level Monitoring of Prolonged Subcutaneous Teicoplanin Treatment for Bone and Joint Infections) ... p.3764
January 14, 2017

Plethysmography. New Findings from Anna University in Plethysmography Provides New Insights (An adaptive delineator for photoplethysmography waveforms) … p.3765

Oncology - Skin Cancer. New Findings from Aristotle University in the Area of Skin Cancer Reported (Skin cancer risk in outdoor workers: a European multicenter case–control study) … p.3765

Liver Diseases and Conditions - Hepatitis C Virus. New Findings from Autonomous University Update Understanding of Hepatitis C Virus (New real–time–PCR method to identify single point mutations in hepatitis C virus) … p.3768

Immunology - Immunoglobulins. New Findings from B. Montaruli et al Broadens Understanding of Immunoglobulins (Analytical and clinical comparison of different immunoassay systems for the detection of antiphospholipid antibodies) … p.3769

Drugs and Therapies - Androgens. New Findings from Baylor University College of Medicine Describe Advances in Androgens (Non–Cell–Autonomous Regulation of Prostate Epithelial Homeostasis by Androgen Receptor) … p.3771

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from Baylor University College of Medicine in the Area of Type 2 Diabetes Reported (A Plethora of GLP–1 Agonists: Decisions About What to Use and When) … p.3772

DNA Viruses - Circovirus. New Findings from Beijing Academy of Agriculture and Forestry Science Update Understanding of Circovirus (Induction of a Cellular DNA Damage Response by Porcine Circovirus Type 2 Facilitates Viral Replication and Mediates Apoptotic Responses) … p.3773

Drugs and Therapies - Drug Delivery Systems. New Findings from Beijing University of Chemical Technology Describe Advances in Drug Delivery Systems (Microneedles with Controlled Bubble Sizes and Drug Distributions for Efficient Transdermal Drug Delivery) … p.3774

Drugs and Therapies - Coagulation Modifiers. New Findings from Boehringer Ingelheim Pharmaceuticals Update Understanding of Coagulation Modifiers (Idarucizumab, a specific reversal agent for dabigatran: mode of action, pharmacokinetics and pharmacodynamics, and safety and efficacy in …) … p.3775

Bone Research. New Findings from Brussels Free University Describe Advances in Bone Research (Bone health in the elderly cancer patient: A SIOG position paper) … p.3776
January 14, 2017

Aldehydes. New Findings from C. Van Landingham and Colleagues Has Provided New Data on Aldehydes (The need for transparency and reproducibility in documenting values for regulatory decision making and evaluating causality: The example of formaldehyde) … p.3777

Hormones. New Findings from CHA University Describe Advances in Hormones (Melatonin prevents cisplatin–induced primordial follicle loss via suppression of PTEN/AKT/FOXO3a pathway activation in the mouse ovary) … p.3778

Clinical Research - Clinical Trials and Studies. New Findings from CIBERESP Describe Advances in Clinical Trials and Studies (Chronotherapy versus conventional statins therapy for the treatment of hyperlipidaemia) … p.3779

Oncology - Ring Cell Cancer. New Findings from Cancer Hospital Update Understanding of Ring Cell Cancer (A nomogram for predicting the likelihood of lymph node metastasis in early gastric signet ring cell carcinoma A single center retrospective analysis with external ...) … p.3781

Oncology - Gastric Cancer. New Findings from Cancer Institute Hospital in the Area of Gastric Cancer Reported (Prognostic impact of KRAS mutant type and MET amplification in metastatic and recurrent gastric cancer patients treated with first–line S–1 plus cisplatin ...) … p.3782

Connective Tissue Cells. New Findings from Capital Medical University in the Area of Connective Tissue Cells Described (Brown adipogenic potential of brown adipocytes and peri–renal adipocytes from human embryo) … p.3783

Cardiovascular Research. New Findings from Careggi Hospital Describe Advances in Cardiovascular Research (Which is the main molecular target responsible for the cardiovascular benefits in the EMPA–REG OUTCOME trial? A journey through the kidney, the heart and other ...) … p.3784

Oncology - Prostate Cancer. New Findings from Catholic University in Prostate Cancer Provides New Insights (MALAT1 and HOTAIR Long Non–Coding RNAs Play Opposite Role in Estrogen–Mediated Transcriptional Regulation in Prostate Cancer Cells) … p.3785

Autoimmune Diseases and Conditions. New Findings from Catholic University of Korea in the Area of Autoimmune Diseases and Conditions Reported (Gut microbiota in autoimmunity: potential for clinical applications) … p.3786

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Findings from Catholic University of Korea in the Area of Rheumatoid Arthritis Described (MIF allele–dependent regulation of the MIF coreceptor CD44 and role in rheumatoid arthritis) … p.3787

Vascular Endothelial Growth Factor. New Findings from Central Hospital in Vascular Endothelial Growth Factor Provides New Insights (Correlation Analysis of the STAT3 Polymorphism and Transcription of Survivin and VEGF in Missed Abortion Experience Among Women of the Chinese Han ...) … p.3788

Cardiovascular Diseases and Conditions - Hypertension. New Findings from Charite University Hospital and School of Medicine Describe Advances in Hypertension (Long–Term Donor Outcomes after Pure Laparoscopic versus Open Living Donor Nephrectomy: Focus on Pregnancy Rates, Hypertension and Quality of ...) … p.3790

Heart Disorders and Diseases - Heart Failure. New Findings from Charles University in the Area of Heart Failure Reported (Beneficial Effect of Continuous Normobaric Hypoxia on Ventricular Dilatation in Rats With Post–Infarction Heart Failure) … p.3791

Heart Disorders and Diseases - Bundle–Branch Block. New Findings from Children’s Mercy Hospital in the Area of Bundle–Branch Block Described (Frequent Activation Delay–Induced Mechanical Dyssynchrony and Dysfunction in the Systemic Right Ventricle) … p.3792

Heart Disorders and Diseases - Atrial Fibrillation. New Findings from China Medical University and Hospital Update Understanding of Atrial Fibrillation (Chronic Osteomyelitis Is Associated With Increased Risk of New–Onset Atrial Fibrillation: Evidence From a Nationwide Cohort of 23 Million People) … p.3793

Tryptamines. New Findings from Chungnam National University in the Area of Tryptamines Reported (Anti–Inflammatory and Antioxidant Actions of N–Arachidonoyl Serotonin in RAW264.7 Cells) … p.3795

www.NewsRx.com

Heart Disorders and Diseases - Heart Attack. New Findings from Complejo Hospital Describe Advances in Heart Attack (Mortality benefit of long–term angiotensin–converting enzyme inhibitors or angiotensin receptor blockers after successful percutaneous coronary intervention in non–ST ...) … p.3796

Breast Diseases and Conditions - Mastitis. New Findings from Council of Scientific and Industrial Research (CSIR) in Mastitis Provides New Insights (Isolation and characterization of three benzylisoquinoline alkaloids from Thalictrum minus L. and their antibacterial activity against ...) … p.3797

Nanotechnology - Nanoparticles. New Findings from Dalian University of Technology Update Understanding of Nanoparticles (Construction of A Triple–Stimuli–Responsive System Based on Cerium Oxide Coated Mesoporous Silica Nanoparticles) … p.3798

Oncology - Astroblastomas. New Findings from Dana–Farber Cancer Institute in Astroblastomas Provides New Insights (Genomic characterization of recurrent high–grade astroblastoma) … p.3799

Drugs and Therapies - Antibiotics. New Findings from Danube University Describe Advances in Antibiotics (Adsorption of Selected Antibiotics to Resins in Extracorporeal Blood Purification) … p.3800

Cardiology. New Findings from Department of Biomedical Sciences and Public Health Describe Advances in Cardiology (The role of cardiac dysfunction in multiorgan dysfunction) … p.3801

Heart Disorders and Diseases - Atrial Fibrillation. New Findings from Department of Orthopedics in the Area of Atrial Fibrillation Reported (Impact of atrial fibrillation on postoperative outcomes after total knee arthroplasty–A retrospective study) … p.3802
Drugs and Therapies - Chemotherapy. New Findings from Department of Pharmacy in the Area of Chemotherapy Described (Infusion reactions are common after high-dose carmustine in BEAM chemotherapy and are not reduced by lengthening the time of administration) ... p.3803

Cardiovascular Diseases and Conditions - Aortic Rupture. New Findings from Department of Surgery in the Area of Aortic Rupture Described (Plug the Hole—A Bailout Option for Acute Focal Aortic Rupture) ... p.3804

Oncology - Colon Cancer. New Findings from Division of Surgery and Oncology in the Area of Colon Cancer Reported (Management of para-aortic lymph node metastasis in colorectal patients: A systemic review) ... p.3805

Cardiology. New Findings from Duke University in the Area of Cardiology Reported (Multicolor mapping of the cardiomyocyte proliferation dynamics that construct the atrium) ... p.3806

Heart Disorders and Diseases - Endocarditis. New Findings from Duke University in the Area of Endocarditis Described (Antistaphylococcal beta-Lactams versus Vancomycin for Treatment of Infective Endocarditis Due to Methicillin-Susceptible Coagulase-Negative Staphylococci: a Prospective ...) ... p.3807

Nutritional and Metabolic Diseases and Conditions - Pediatric Obesity. New Findings from Eunice Kennedy Shriver National Institute of Child Health and Human Development in the Area of Pediatric Obesity Described (Cortisol response to an induction of negative affect among adolescents with and without loss of ...) ... p.3808

Nephrology. New Findings from Faculty of Medicine Yields New Data on Nephrology (Angio–embolization of a renal pseudoaneurysm complicating a percutaneous renal biopsy: a case report) ... p.3809

Skin Diseases and Conditions - Acne Vulgaris. New Findings from Federal University in the Area of Acne Vulgaris Reported (Observational retrospective study evaluating the effects of oral isotretinoin in keloids and hypertrophic scars) ... p.3810

Drugs and Therapies - Antimicrobials. New Findings from Federal University in the Area of Antimicrobials Described (Adverse events caused by potential drug–drug interactions in an intensive care unit of a teaching hospital) ... p.3811

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from Federal University in the Area of Type 2 Diabetes Reported (The contribution of protein intrinsic disorder to understand the role of genetic variants uncovered by autism spectrum disorders exome studies) ... p.3812

Atrial Fibrillation. New Findings from First Affiliated Hospital in the Area of Atrial Fibrillation Reported (One-Year Clinical Outcome of Pulmonary Vein Isolation Using the Second-Generation Cryoballoon: A Meta-Analysis) ... p.3813

U.S. Food and Drug Administration. New Findings from Food and Drug Administration in the Area of U.S. Food and Drug Administration Reported (Advancing pharmaceutical quality: An overview of science and research in the US FDA’s Office of Pharmaceutical Quality) ... p.3814
Immunology - Immunoglobulins. New Findings from Fourth Military Medical University Describe Advances in Immunoglobulins (Expression and purification of mouse Ttyh1 fragments as antigens to generate Ttyh1–specific monoclonal antibodies) … p.3815

Immune System Diseases and Conditions - HIV/AIDS. New Findings from Free University Update Understanding of HIV/AIDS (Top-down and bottom-up modeling in system pharmacology to understand clinical efficacy: An example with NRTIs of HIV–1) … p.3816

Drugs and Therapies - Toxicology and Pharmacology. New Findings from Free University Update Understanding of Toxicology and Pharmacology (Printed paper and board food contact materials as a potential source of food contamination) … p.3817

Oncology - Colon Cancer. New Findings from General Hospital in the Area of Colon Cancer Described (Is estimated intra–operative blood loss a reliable predictor of surgical outcomes in laparoscopic colorectal cancer surgery?) … p.3824

Drugs and Therapies - Cardiovascular Agents. New Findings from George Washington University in the Area of Cardiovascular Agents Described (Tamsulosin for urolithiasis: a review of the recent literature and current controversies) … p.3825

Membrane Proteins - G-Protein-Coupled Receptors. New Findings from George Washington University in the Area of G–Protein–Coupled Receptors Reported (Bonobo personality traits are heritable and associated with vasopressin receptor gene 1a variation) … p.3826

Central Nervous System Diseases and Conditions - Intracranial Hemorrhages. New Findings from Gifu Pharmaceutical University in Intracranial Hemorrhages Provides New Insights (Cilostazol ameliorates collagenase–induced cerebral hemorrhage by protecting the blood–brain barrier) … p.3827

Neuroticism. New Findings from Graduate Institute of Medical Science in Neuroticism Provides New Insights [Gender–specific association between serotonin transporter polymorphisms (5–HTTLPR and rs25531) and neuroticism, anxiety and depression in well–defined …] … p.3828
January 14, 2017

Oncology - Bowel Cancer. New Findings from Griffith University in the Area of Bowel Cancer Reported (Modulatory roles of microRNAs in the regulation of different signalling pathways in large bowel cancer stem cells) … p.3829

Neurodegenerative Diseases and Conditions. New Findings from Gyeongsang National University in the Area of Neurodegenerative Diseases and Conditions Described (Flavonoids Isolated from Flowers of Lonicera japonica Thunb. Inhibit Inflammatory Responses in BV2 Microglial Cells by ...) … p.3830

DNA Research. New Findings from Hainan University Update Understanding of DNA Research (DNA methylation patterns of banana leaves in response to Fusarium oxysporum f. sp cubense tropical race 4) … p.3831

Gastroenterology - Kidney Function. New Findings from Hamad Medical Corporation Describe Advances in Kidney Function (Do directly acting antiviral agents for HCV increase the risk of hepatic decompensation and decline in renal function? Results from ERCHIVES) … p.3832

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Findings from Hanyang University Hospital in the Area of Rheumatoid Arthritis Described (A phase III, multicentre, randomised, double–blind, active–controlled, parallel–group trial comparing safety and efficacy of HD203, with innovator ...) … p.3833

Drugs and Therapies - Antibiotics. New Findings from Harvard School of Medicine Describe Advances in Antibiotics (An Autotaxin/Lysophosphatidic Acid/Interleukin–6 Amplification Loop Drives Scleroderma Fibrosis) … p.3834

Essential Amino Acids. New Findings from Harvard School of Medicine in the Area of Essential Amino Acids Reported [Tryptophan–rich basic protein (WRB) mediates insertion of the tail–anchored protein otoferlin and is required for hair cell exocytosis and hearing] … p.3835

Stem Cell Research. New Findings from Harvard School of Medicine in the Area of Stem Cell Research Reported [Alteration in cellular turnover and progenitor cell population in lacrimal glands from thrombospondin 1(−/−) mice, a model of dry eye] … p.3836

Heart Disorders and Diseases - Atrial Fibrillation. New Findings from Heart Center in the Area of Atrial Fibrillation Reported (Renal sympathetic denervation for treatment of patients with atrial fibrillation: Reappraisal of the available evidence) … p.3837

Immunology - Antigen–Presenting Cells. New Findings from Hospital Clinic in the Area of Antigen–Presenting Cells Reported (GATA1–Deficient Dendritic Cells Display Impaired CCL21–Dependent Migration toward Lymph Nodes Due to Reduced Levels of Polysialic Acid) … p.3838

Apoptosis. New Findings from Howard Hughes Medical Institute in Apoptosis Provides New Insights (Cyclin F–Mediated Degradation of SLBP Limits H2A.X Accumulation and Apoptosis upon Genotoxic Stress in G2) … p.3839

Drugs and Therapies - Cancer Therapy. New Findings from Huazhong University of Science and Technology Describe Advances in Cancer Therapy (Geldanamycin, an inhibitor of Hsp90, increases paclitaxel–mediated toxicity in ovarian cancer cells through sustained activation of the ...) … p.3840
January 14, 2017

Oncology - Liver Cancer. New Findings from Huazhong University of Science and Technology Describe Advances in Liver Cancer (Notch and Wnt/b-catenin signaling pathway play important roles in activating liver cancer stem cells) … p.3841

Stem Cell Research - Mesenchymal Stem Cells. New Findings from Huazhong University of Science and Technology in Mesenchymal Stem Cells Provides New Insights (Role of the ER/NO/cGMP Signaling Pathway in the Promotion of Osteogenic Differentiation of Rat Bone Marrow Mesenchymal Stem Cells ...) … p.3842

Peptides - Cyclic Peptides. New Findings from Hunan Normal University in the Area of Cyclic Peptides Described (Hepatoprotective Effects and Mechanisms of Action of Triterpenoids from Lingzhi or Reishi Medicinal Mushroom Ganoderma lucidum (Agaricomycetes) on ...) … p.3844

Oncology - Liver Cancer. New Findings from Institute for Cancer Research and Treatment (IRCCS) Describe Advances in Liver Cancer (Molecular alterations in hepatocellular carcinoma associated with hepatitis B and hepatitis C infections) … p.3845

Clinical Research - Clinical Trials and Studies. New Findings from Institute for Cancer Research and Treatment (IRCCS) in the Area of Clinical Trials and Studies Reported (Antiretroviral therapy affects the z-score index of deviant cortical EEG rhythms in naive HIV individuals) … p.3846

Proteins - Neuropeptides. New Findings from Institute for Health Update Understanding of Neuropeptides (Vasopressin lowers renal epoxyeicosatrienoic acid levels by activating soluble epoxide hydrolase) … p.3848

Eye Diseases and Conditions - Glaucoma. New Findings from Institute for Neuroscience in the Area of Glaucoma Described (Clinical Characteristics and Risk Factors of Extensive Macular Atrophy with Pseudodrusen The EMAP Case–Control National Clinical Trial) … p.3849

Environmental Polution. New Findings from Institute of Applied Ecology in the Area of Environmental Polution Reported (The accumulation and health risk of heavy metals in vegetables around a zinc smelter in northeastern China) … p.3850

Oncology - Prostate Cancer. New Findings from Institute of Cancer Research in the Area of Prostate Cancer Reported (Castration–Resistant Prostate Cancer Tissue Acquisition From Bone Metastases for Molecular Analyses) … p.3851

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings from Institute of Chemistry in the Area of Atherosclerosis Described (MRI/optical dual–modality imaging of vulnerable atherosclerotic plaque with an osteopontin–targeted probe based on Fe3O4 nanoparticles) … p.3852
January 14, 2017

Oncology - Breast Cancer. New Findings from International Agency for Research on Cancer in the Area of Breast Cancer Reported (Female breast cancer in Central and South America) … p.3853

Heart Disorders and Diseases - Heart Disease. New Findings from Iran University of Medical Sciences in the Area of Heart Disease Reported (Nanotechnology in diagnosis and treatment of coronary artery disease) … p.3855

Musculoskeletal Diseases and Conditions - Osteoporosis. New Findings from J.E. Compston and Co–Authors Describe Advances in Osteoporosis (Increase in Fracture Risk Following Unintentional Weight Loss in Postmenopausal Women: The Global Longitudinal Study of Osteoporosis in Women) … p.3856

Heart Disorders and Diseases - Atrial Fibrillation. New Findings from Jichi Medical University in the Area of Atrial Fibrillation Reported (Dose Timing of an Angiotensin II Receptor Blocker/Calcium Channel Blocker Combination in Hypertensive Patients With Paroxysmal Atrial Fibrillation) … p.3857

Eye Diseases and Conditions - Retinitis Pigmentosa. New Findings from Johns Hopkins University in the Area of Retinitis Pigmentosa Described [Safety and Proof–of–Concept Study of Oral QLT091001 in Retinitis Pigmentosa Due to Inherited Deficiencies of Retinal Pigment Epithelial 65 Protein (RPE65) ...] … p.3858

www.NewsRx.com

Pharmacology. New Findings from Josai University in Pharmacology Provides New Insights (Fatty Acid beta–Oxidation Plays a Key Role in Regulating cis–Palmitoleic Acid Levels in the Liver) … p.3859

Oncology - Glioblastomas. New Findings from Justus–Liebig–University in the Area of Glioblastomas Described (High–mobility group AT–hook protein 2 expression and its prognostic significance in MGMT methylated and unmethylated glioblastoma) … p.3860

Immune System Diseases and Conditions - IgA Deficiency. New Findings from Kagoshima University Describe Advances in IgA Deficiency (Immunoglobulin A deficiency following treatment with lamotrigine) … p.3861

Drugs and Therapies - Antifungals. New Findings from Keio University Yields New Data on Antifungals (Impact of cytochrome P450 2C19 polymorphisms on the pharmacokinetics of tacrolimus when coadministered with voriconazole) … p.3863

Oncology - Non-Small Cell Lung Cancer. New Findings from Keio University in Non–Small Cell Lung Cancer Provides New Insights (Prognostic value of tumor–infiltrating lymphocytes differs depending on histological type and smoking habit in completely resected non–small–cell lung cancer) … p.3864

Fibrosarcomas. New Findings from Kinki University Describe Advances in Fibrosarcomas (Negative Effects of G–Protein–Coupled Free Fatty Acid Receptor GPR40 on Cell Migration and Invasion in Fibrosarcoma HT1080 Cells) … p.3865
January 14, 2017

Science. New Findings from Konkuk University Describe Advances in Science (Identification of disease comorbidity through hidden molecular mechanisms) … p.3866

Oncology - Breast Cancer. New Findings from Korea University School of Medicine Describe Advances in Breast Cancer (Resistin, a fat–derived secretory factor, promotes metastasis of MDA–MB–231 human breast cancer cells through ERM activation) … p.3867

Clinical Research - Clinical Trials and Studies. New Findings from Kyoto Pharmaceutical University in the Area of Clinical Trials and Studies Described (Transport of Azithromycin into Extravascular Space in Rats) … p.3868

Enzymes and Coenzymes - Amidohydrolases. New Findings from Kyoto University Describe Advances in Amidohydrolases [Interspecies Dissemination of a Mobilizable Plasmid Harboring bla(IMP–19) and the Possibility of Horizontal Gene Transfer in a Single Patient] … p.3869

Environmental Research. New Findings from Kyoto University in Environmental Research Provides New Insights (Assessing the population equivalent and performance of wastewater treatment through the ratios of pharmaceuticals and personal care products present in a river ...) … p.3870

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. New Findings from Leicester Royal Infirmary Update Understanding of Abdominal Aortic Aneurysm (Late Survival in Nonoperated Patients with Infrarenal Abdominal Aortic Aneurysm) … p.3871

Disease Attributes - Disease Progression. New Findings from Leiden University in the Area of Disease Progression Described (Systems pharmacology – Towards the modeling of network interactions) … p.3872

Mycobacterium Infections - Tuberculosis. New Findings from Leiden University in the Area of Tuberculosis Reported (Mechanisms of Phenotypic Rifampicin Tolerance in Mycobacterium tuberculosis Beijing Genotype Strain B0/W148 Revealed by Proteomics) … p.3874

Cardiology. New Findings from Linkoping University Describe Advances in Cardiology (Patient–Specific Simulation of Cardiac Blood Flow From High–Resolution Computed Tomography) … p.3875

Diabetes. New Findings from M. Rizzi and Co–Authors Describe Advances in Diabetes (Genitourinary infections in diabetic patients in the new era of diabetes therapy with sodium–glucose cotransporter–2 inhibitors) … p.3876

Oncology - Hereditary Nonpolyposis Colorectal Cancer. New Findings from M.D. Anderson Cancer Center in the Area of Hereditary Nonpolyposis Colorectal Cancer Described (Genetic predisposition in gynecologic cancers) … p.3877

Drugs and Therapies - Central Nervous System Agents. New Findings from M.S. Duh and Co–Researchers in the Area of Central Nervous System Agents Described (Can social media data lead to earlier detection of drug–related adverse events?) … p.3877

Oncology - Breast Cancer. New Findings from Maastricht University in the Area of Breast Cancer Described (Routine use of standard breast MRI compared to axillary ultrasound for differentiating between no, limited and advanced axillary nodal disease in newly diagnosed ...) … p.3879

Transfusion Medicine - Blood Transfusion. New Findings from Mashhad University of Medical Sciences Update Understanding of Blood Transfusion (RISK pathway is involved in oxytocin postconditioning in isolated rat heart) … p.3880
Oncology - B-Cell Lymphoma. New Findings from Mayo Clinic Describe Advances in B–Cell Lymphoma (T–Cell/Histiocyte–Rich Large B–Cell Lymphoma Presenting as a Primary Central Nervous System Lymphoma) ... p.3881

Blood Diseases and Conditions - Sepsis. New Findings from Mayo Clinic Describe Advances in Sepsis (Pre– and Postoperative Predictors of Infection–Related Complications in Patients Undergoing Percutaneous Nephrolithotomy) ... p.3882

Nervous System Diseases and Conditions - Dystonia. New Findings from Mayo Clinic in Dystonia Provides New Insights (A novel ANO3 variant identified in a 53–year–old woman presenting with hyperkinetic dysarthria, blepharospasm, hyperkinesias, and complex motor tics) ... p.3883

Heart Disorders and Diseases - Heart Failure. New Findings from Mayo Clinic in the Area of Heart Failure Described (Differentiation of Constriction and Restriction Complex Cardiovascular Hemodynamics) ... p.3884

Drugs and Therapies - Radiation Therapy. New Findings from Mazandaran University of Medical Sciences Update Understanding of Radiation Therapy (The paradox role of caspase cascade in ionizing radiation therapy) ... p.3885

Clinical Research - Clinical Trials and Studies. New Findings from Medical University of South Carolina Describe Advances in Clinical Trials and Studies (Effects Of Liraglutide 3.0 Mg On Weight And Risk Factors In Hispanic Versus Non–hispanic Populations: Subgroup Analysis From Scale ...) ... p.3885

Hematopoietic. New Findings from Medical University of South Carolina in the Area of Hematopoietic Described (Contributions of Mouse and Human Hematopoietic Cells to Remodeling of the Adult Auditory Nerve After Neuron Loss) ... p.3886

Oncology. New Findings from Memorial Hospital Yields New Data on Oncology (Double autophagy modulators reduce 2–deoxyglucose uptake in sarcoma patients) ... p.3887

Pharmacology. New Findings from Merck Research Labs Describe Advances in Pharmacology [Discovery of highly potent and selective orexin 1 receptor antagonists (1–SORAs) suitable for in vivo interrogation of orexin 1 receptor pharmacology] ... p.3888

Drugs and Therapies - Antiretrovirals. New Findings from Merck Research Labs in the Area of Antiretrovirals Reported (Atazanavir increases the plasma concentrations of 1200 mg raltegravir dose) ... p.3889

Hematology - Blood Coagulation Factors. New Findings from Mie University in Blood Coagulation Factors Provides New Insights (Hypofibrinogenemia and the –Fibrinogen Thr312Ala Polymorphism may be Risk Factors for Early Pregnancy Loss) ... p.3890

Transplant Medicine - Liver Transplants. New Findings from Misericordia University in the Area of Liver Transplants Reported (Impact of new treatment options for hepatitis C virus infection in liver transplantation) ... p.3891

Genetics - Medical Genetics. New Findings from Murdoch Children's Research Institute in Medical Genetics Provides New Insights (Parents’ experiences with requesting carrier testing for their unaffected children) ... p.3892
January 14, 2017

Ebola Virus. New Findings from Nagasaki University in the Area of Ebola Virus Reported (Deployment of a Reverse Transcription Loop–Mediated Isothermal Amplification Test for Ebola Virus Surveillance in Remote Areas in Guinea) … p.3893

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. New Findings from Nanjing University Update Understanding of Subarachnoid Hemorrhage (Increased Expression of Caspase–12 After Experimental Subarachnoid Hemorrhage) … p.3895

Eye Diseases and Conditions - Glaucoma. New Findings from Nanyang Technological University Describe Advances in Glaucoma (Progress in anterior chamberangle imaging for glaucoma risk prediction – A review on clinical equipment, practice and research) … p.3896

Oncology - Colon Cancer. New Findings from National Cancer Center Hospital in the Area of Colon Cancer Described (Biomarkers of skin toxicity induced by anti–epidermal growth factor receptor antibody treatment in colorectal cancer) … p.3897

Oncology - Cancer Research. New Findings from National Chung Hsing University Update Understanding of Cancer Research [Cdk5 Directly Targets Nuclear p21(CIP1) and Promotes Cancer Cell Growth] … p.3898

Cardiovascular Diseases and Conditions - Hypertension. New Findings from National Hospital Organization Describe Advances in Hypertension (Rapid and high–dose titration of epoprostenol improves pulmonary hemodynamics and clinical outcomes in patients with idiopathic and heritable pulmonary arterial ...) … p.3899

Hormones - Gonadal Hormones. New Findings from National Institutes of Health Describe Advances in Gonadal Hormones (Immunoregulation by members of the TGF beta superfamily) … p.3900

Biotechnology - Pharmacogenomics. New Findings from National Institutes of Health Update Understanding of Pharmacogenomics (Pharmacogenomic incidental findings in 308 families: The NIH Undiagnosed Diseases Program experience) … p.3901

Gram-Positive Bacteria - Enterococcus faecium. New Findings from National Taiwan University in the Area of Enterococcus faecium Reported (Novel Structure of Enterococcus faecium–Originated ermB–Positive Tn1546–Like Element in Staphylococcus aureus) … p.3903

Hormones - Estradiol Congeners. New Findings from National University in the Area of Estradiol Congeners Described (Role of Estradiol in the Regulation of Prolactin Secretion During Late Pregnancy) … p.3904
Musculoskeletal Diseases and Conditions - Osteoarthritis. New Findings from Ningxia Medical University in the Area of Osteoarthritis Reported (Sclerostin expression in the subchondral bone of patients with knee osteoarthritis) ... p.3905

Oncology - Mullerian Adenosarcoma. New Findings from Northwestern University in the Area of Mullerian Adenosarcoma Described (Survival of women with Mullerian adenosarcoma: A National Cancer Data Base study) ... p.3906

Skin Diseases and Conditions - Atopic Dermatitis. New Findings from Norwegian University of Science and Technology (NTNU) in the Area of Atopic Dermatitis Reported (Human Breast Milk miRNA, Maternal Probiotic Supplementation and Atopic Dermatitis in Offspring) ... p.3907

Mosquito-Borne Diseases - Zika Virus. New Findings from Novartis Institute for Biomedical Research Describe Advances in Zika Virus (Genetic Ablation of AXL Does Not Protect Human Neural Progenitor Cells and Cerebral Organoids from Zika Virus Infection) ... p.3908

Mosquito-Borne Diseases - Malaria. New Findings from Obafemi Awolowo University in the Area of Malaria Reported [Evaluation of the combination of Uvaria chamae (P. Beauv.) and amodiaquine in murine malaria] ... p.3909

Nutritional and Metabolic Diseases and Conditions - Diabetic Nephropathy. New Findings from Okayama University Graduate School of Medicine Yields New Data on Diabetic Nephropathy (Innate immunity in diabetes and diabetic nephropathy) ... p.3910

Musculoskeletal Diseases and Conditions - Hand-and-Foot Syndrome. New Findings from Osaka University Hospital in Hand-and-Foot Syndrome Provides New Insights (Hemoglobin Value Is the Most Important Factor in the Development of Hand–Foot Syndrome under the Capecitabine Regimen) ... p.3911

Intercellular Signaling Peptides and Proteins - Angiogenic Proteins. New Findings from P. Adamson and Co–Authors Describe Advances in Angiogenic Proteins (Single ocular injection of a sustained–release anti–VEGF delivers 6 months pharmacokinetics and efficacy in a primate laser CNV model) ... p.3912

Oncology - Cancer Research. New Findings from P. Soubeyran and Co–Researchers in the Area of Cancer Research Described (Role of geriatric intervention in the treatment of older patients with cancer: rationale and design of a phase III multicenter trial) ... p.3913

Health and Medicine - Complementary and Alternative Medicine. New Findings from Palmer College of Chiropractic in the Area of Complementary and Alternative Medicine Reported (Antinociceptive Effects of Spinal Manipulative Therapy on Nociceptive Behavior of Adult Rats during the Formalin Test) ... p.3914

Oncology - Carcinoma Ex Pleomorphic Adenoma. New Findings from Peking University Describe Advances in Carcinoma Ex Pleomorphic Adenoma (Carcinoma Ex Pleomorphic Adenoma: Is It a High–Grade Malignancy?) ... p.3915

Restenosis. New Findings from Peking University People’s Hospital Describe Advances in Restenosis (Open and Endovascular Treatment of Trans–Atlantic Inter–Society Consensus II D Aortoiliac Occlusive Lesions: What Determines the Rate of Restenosis?)
Physiology - Applied Physiology. New Findings from Penn State Heart and Vascular Institute in Applied Physiology Provides New Insights (Whole body heat stress attenuates the pressure response to muscle metaboreceptor stimulation in humans) ... p.3917

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from Pennington Biomedical Research Center in the Area of Type 2 Diabetes Reported (Effect of serial cell passaging in the retention of fiber type and mitochondrial content in primary human myotubes) ... p.3918

Biological Factors - Autacoids. New Findings from Pennsylvania State University Update Understanding of Autacoids (Calcium Signaling Is Dispensable for Receptor Regulation of Endothelial Barrier Function) ... p.3919

Medical Imaging - Neuroimaging. New Findings from People's Hospital Describe Advances in Neuroimaging (Effects of outcome on the covariance between risk level and brain activity in adolescents with internet gaming disorder) ... p.3920

Intracellular Signaling Peptides and Proteins - RHO-Associated Kinases. New Findings from Polytechnic Institute Update Understanding of RHO–Associated Kinases (TGF beta 2–induced outflow alterations in a bioengineered trabecular meshwork are offset by a rho–associated kinase inhibitor) ... p.3921

Liver Diseases and Conditions - Hepatitis C Virus. New Findings from Queen Mary University in the Area of Hepatitis C Virus Described (Open–label study of faldaprevir plus peginterferon and ribavirin in hepatitis C virus genotype 1–infected patients who failed placebo plus peginterferon and ...) ... p.3922

Neoplasms. New Findings from Queen's University Describe Advances in Neoplasms (Minor allele frequency of myeloproliferative neoplasm mutations in the Irish blood donor population) ... p.3923

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from Queen's University in the Area of Type 2 Diabetes Reported (Peptide Therapeutics and the Pharmaceutical Industry: Barriers Encountered Translating from the Laboratory to Patients) ... p.3924

Oncology - Breast Cancer. New Findings from R. Singh and Co–Authors in the Area of Breast Cancer Reported (MicroRNA–195 inhibits proliferation, invasion and metastasis in breast cancer cells by targeting FASN, HMGCR, ACACA and CYP27B1) ... p.3925

Central Nervous System Diseases and Conditions - Epilepsy. New Findings from R. Surges and Co–Authors in the Area of Epilepsy Reported (Changes in serum miRNAs following generalized convulsive seizures in human mesial temporal lobe epilepsy) ... p.3926

Mosquito-Borne Diseases - Malaria. New Findings from R.J. Hill and Co–Researchers in the Area of Malaria Described [Regulation and Essentiality of the StAR–related Lipid Transfer (START) Domain–containing Phospholipid Transfer Protein PFA0210c in Malaria Parasites] ... p.3927

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. New Findings from RIKEN in Inflammatory Bowel Disease Provides New Insights (Tranexamic Acid and Supportive Measures to Treat Wasting Marmoset Syndrome) ... p.3928
Cytoskeleton. New Findings from RWTH Aachen University in Cytoskeleton Provides New Insights (A novel function for the MAP kinase SMA–5 in intestinal tube stability) ... p.3929

Oncology - Prostate Cancer. New Findings from Research Center in the Area of Prostate Cancer Reported (Novel Bispecific PSMA/GRPr Targeting Radioligands with Optimized Pharmacokinetics for Improved PET Imaging of Prostate Cancer) ... p.3931

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from Research Hospital in the Area of Type 2 Diabetes Reported (Exenatide Treatment Causes Suppression of Serum Ghrelin Levels following Mixed Meal Test in Obese Diabetic Women) ... p.3932

Oncology - Lymphoma. New Findings from Roma Tor Vergata University Describe Advances in Lymphoma (Technical solutions to reduce mediastinal irradiation in young patients undergoing treatment for lymphomas: Preliminary experience) ... p.3933

Oncology - Glioblastomas. New Findings from Roma Tor Vergata University in the Area of Glioblastomas Described (Resetting cancer stem cell regulatory nodes upon MYC inhibition) ... p.3934

Oncology - Colon Cancer. New Findings from Royal College of Surgeons in Ireland Yields New Data on Colon Cancer (Low levels of Caspase–3 predict favourable response to 5FU–based chemotherapy in advanced colorectal cancer: Caspase–3 inhibition as a therapeutic approach) ... p.3935

Genetics - Assisted Reproduction and Genetics. New Findings from Royal Women's Hospital in Assisted Reproduction and Genetics Provides New Insights (What is the contribution of embryo–endometrial asynchrony to implantation failure?) ... p.3936

Oncology - Lobular Cancer. New Findings from Rush University in the Area of Lobular Cancer Reported (Prognostic Value of Coexisting Lobular Carcinoma In Situ With Invasive Lobular Carcinoma) ... p.3937

Microtubule-Organizing Center. New Findings from Russian Academy of Science Update Understanding of Microtubule–Organizing Center (Nuclear alignment in myotubes requires centrosome proteins recruited by nesprin–1) ... p.3939

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. New Findings from S. Roversi and Co–Authors in the Area of Chronic Obstructive Pulmonary Disease Reported (Chronic Obstructive Pulmonary Disease and Cardiac Diseases An Urgent Need for Integrated Care) ... p.3940

Drugs and Therapies - Chemotherapy. New Findings from S.E. Al–Batran et al Broadens Understanding of Chemotherapy [Histopathological regression after neoadjuvant docetaxel, oxaliplatin, fluorouracil, and leucovorin versus epirubicin, cisplatin, and fluorouracil or capecitabine in ...] ... p.3941

Oncology - Lymphoblastic Lymphoma. New Findings from Saitama Medical University in the Area of Lymphoblastic Lymphoma Described [Lineage switch with t(6;11)(q27;q23) from T–cell lymphoblastic lymphoma to acute monoblastic leukemia at relapse] ... p.3942
Oncology - Prostate Cancer. New Findings from Sansom Institute for Health Research in the Area of Prostate Cancer Reported (Targeting CDK9: a promising therapeutic opportunity in prostate cancer) … p.3943

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. New Findings from School of Medicine Describe Advances in Epstein–Barr Virus [Diagnostic dilemma: Epstein–Barr virus (EBV) infectious mononucleosis with lung involvement or co–infection with Legionnaire's disease?] … p.3944

Oncology - Lung Cancer. New Findings from School of Medicine Update Understanding of Lung Cancer (The potential utility of re–mining results of somatic mutation testing: KRAS status in lung adenocarcinoma) … p.3945

Biotechnology - Molecular Pharmaceutics. New Findings from School of Pharmacy in the Area of Molecular Pharmaceutics Reported (Role of Molecular Interactions for Synergistic Precipitation Inhibition of Poorly Soluble Drug in Supersaturated Drug–Polymer–Polymer Ternary Solution) … p.3946

Lung Diseases. New Findings from School of Public Health in the Area of Lung Diseases Reported (High risks of lung disease associated with early–life and moderate lifetime arsenic exposure in northern Chile) … p.3947

Drugs and Therapies - Ethnopharmacology. New Findings from Second Military Medical University Describe Advances in Ethnopharmacology [Toxic polyacetylenes in the genus Bupleurum (Apiaceae) – Distribution, toxicity, molecular mechanism and analysis] … p.3948

Drugs and Therapies - Adverse Drug Reactions. New Findings from Seoul National University Update Understanding of Adverse Drug Reactions (Risk Factors for the Adverse Events after Conversion from Twice–Daily to Once–Daily Tacrolimus in Stable Liver Transplantation Patients) … p.3949

Oncology - Thyroid Cancer. New Findings from Seoul National University in the Area of Thyroid Cancer Reported (Recurrence and Survival After Gross Total Removal of Resectable Undifferentiated or Poorly Differentiated Thyroid Carcinoma) … p.3950

Heart Disorders and Diseases - Heart Failure. New Findings from Shanghai Jiao–Tong University School of Medicine in the Area of Heart Failure Described (Sildenafil ameliorates left ventricular T–tubule remodeling in a pressure overload–induced murine heart failure model) … p.3952

Lymphatic Diseases and Conditions - Lymphedema. New Findings from Shanghai University in the Area of Lymphedema Described (Total saponins of panaxnotoginseng promotes lymphangiogenesis by activation VEGF–C expression of lymphatic endothelial cells) … p.3954
Drugs and Therapies - Controlled Release Research. New Findings from ShanghaiTech University in the Area of Controlled Release Research Described (Delivery methods for site–specific nucleases: Achieving the full potential of therapeutic gene editing) … p.3956

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings from Sichuan University Describe Advances in Atherosclerosis (Liver function may play an uneven role in haemorrhagic transformation for stroke subtypes after acute ischaemic stroke) … p.3957

Nanotechnology. New Findings from Southeast University Describe Advances in Nanotechnology (Biosynthesized Gold Nanoclusters and Iron Complexes as Scaffolds for Multimodal Cancer Bioimaging) … p.3958

Nanotechnology - Nanoparticles. New Findings from Southern Medical University in Nanoparticles Provides New Insights (Recent Advances on Inorganic Nanoparticle–Based Cancer Therapeutic Agents) … p.3959

Health and Medicine - Urology. New Findings from Southmead Hospital Yields New Data on Urology (Clinical use of the b3 adrenoceptor agonist mirabegron in patients with overactive bladder syndrome) … p.3959

Chemistry - Biochemistry. New Findings from St. Jude Children's Research Hospital in the Area of Biochemistry Described (Attacking cancer's Achilles heel: antagonism of antiapoptotic BCL–2 family members) … p.3960

Cardiology. New Findings from St. Thomas' Hospital Yields New Data on Cardiology (In vitro evaluation of valve-in-valve combinations using a SAPIEN XT valve implanted within PERIMOUNT and Magna Ease pericardial bioprostheses) … p.3961

www.NewsRx.com

Oncology - Colon Cancer. New Findings from Stanford University in the Area of Colon Cancer Reported [Normalizing Microbiota–Induced Retinoic Acid Deficiency Stimulates Protective CD8(+) T Cell–Mediated Immunity in Colorectal Cancer] … p.3962

Dimethylamines. New Findings from State University in the Area of Dimethylamines Reported (Impact of fraction unbound, CYP3A, and CYP2D6 in vivo activities, and other potential covariates to the clearance of tramadol enantiomers in patients with neuropathic …) … p.3963

Diarylheptanoids. New Findings from State University of New Jersey Describe Advances in Diarylheptanoids (Epigenetics Reactivation of Nrf2 in Prostate TRAMP C1 Cells by Curcumin Analogue FN1) … p.3964

Oncology - Breast Cancer. New Findings from Sun Yat Sen University Describe Advances in Breast Cancer (RING1 and YY1 binding protein suppresses breast cancer growth and metastasis) … p.3965

Hormones. New Findings from Sun Yat-sen University Cancer Center Describe Advances in Hormones (Melatonin overcomes gemcitabine resistance in pancreatic ductal adenocarcinoma by abrogating nuclear factor–kB activation) … p.3966

Mental Health Diseases and Conditions - Schizophrenia. New Findings from Sungkyunkwan University School of Medicine in the Area of Schizophrenia Described (Association Study of 60 Candidate Genes with Antipsychotic–induced Weight Gain in Schizophrenia Patients) … p.3968

Lung Diseases. New Findings from Sungkyunkwan University in Lung Diseases Provides New Insights (Clinical Characteristics, Treatment Outcomes, and Resistance Mutations Associated with Macrolide–Resistant Mycobacterium avium Complex Lung Disease) … p.3969
Cardiovascular Research. New Findings from Sungkyunkwan University Kangbuk Samsung Hospital in the Area of Cardiovascular Research Described (Association of Physical Activity and Inflammation With All–Cause, Cardiovascular–Related, and Cancer–Related Mortality) … p.3970

Central Nervous System - Telencephalon. New Findings from Tel Aviv University Describe Advances in Telencephalon (Thick corpus callosum in the second trimester can be transient and is of uncertain significance) … p.3971

Drugs and Therapies - Phytotherapy. New Findings from Tianjin Medical University Update Understanding of Phytotherapy [The Inhibition of UDP–Glucuronosyltransferase (UGT) Isoforms by Praeruptorin A and B] … p.3972

Oncology - Lung Cancer. New Findings from Tisch Cancer Institute Describe Advances in Lung Cancer (A mortality study of beryllium workers) … p.3973

Clinical Research - Clinical Trials and Studies. New Findings from Tokyo Medical and Dental University Describe Advances in Clinical Trials and Studies (Effects of Miconazole Oral Gel on Blood Concentrations of Tacrolimus and Cyclosporine: A Retrospective Observational Study) … p.3974

Clinical Research - Clinical Trials and Studies. New Findings from UCL Hospitals in the Area of Cardiovascular Diseases and Conditions Described (Overall survival in patients with platinum-sensitive recurrent serous ovarian cancer receiving olaparib maintenance monotherapy: an updated analysis from a ...) … p.3975

Immunology - Lymphoid Tissue. New Findings from Uniformed Services University of the Health Sciences Describe Advances in Lymphoid Tissue (An algorithm for expanding the TNM staging system) … p.3977

www.NewsRx.com

Myeloid Cells. New Findings from University College in the Area of Myeloid Cells Described (Cell–type–specific modulation of innate immune signalling by vitamin D in human mononuclear phagocytes) … p.3977

Heart Disorders and Diseases - Dilated Cardiomyopathy. New Findings from University Hospital Describe Advances in Dilated Cardiomyopathy (Reversible Dilated Cardiomyopathy Caused by a High Burden of Ventricular Arrhythmias in Andersen–Tawil Syndrome) … p.3979

Oncology - Lung Cancer. New Findings from University Hospital Describe Advances in Lung Cancer (Evaluation of the relevance of surgery in a retrospective case series of patients who underwent the surgical treatment of a symptomatic spine metastasis from lung cancer) … p.3979

Cardiovascular Diseases and Conditions - Aneurysm. New Findings from University Hospital Yields New Data on Aneurysm (A rare case of a giant saphenous vein graft aneurysm with right atrial fistula formation) … p.3980

Drugs and Therapies - Antimicrobial Agents and Chemotherapy. New Findings from University Hospital in the Area of Antimicrobial Agents and Chemotherapy Reported (Preventing Implant–Associated Infections by Silver Coating) … p.3981

Cardiovascular Diseases. New Findings from University Hospital in the Area of Cardiovascular Diseases Described (New concepts in the management of dyslipidaemia) … p.3982

Oncology - Gastric Cancer. New Findings from University Hospital in the Area of Gastric Cancer Reported (Advanced gastric cancer: Current treatment landscape and future perspectives) … p.3983
January 14, 2017

Mycobacterium Infections - Tuberculosis. New Findings from University Hospital in the Area of Tuberculosis Reported (Early Bactericidal Activity of AZD5847 in Patients with Pulmonary Tuberculosis) ... p.3984

Oncology - Breast Cancer. New Findings from University of Adelaide in Breast Cancer Provides New Insights (The safety and effectiveness of liver resection for breast cancer liver metastases: A systematic review) ... p.3985

Mosquito-Borne Diseases - Zika Virus. New Findings from University of Alberta in Zika Virus Provides New Insights (Zika virus inhibits type–I interferon production and downstream signaling) ... p.3987

Nervous System Diseases and Conditions - Hyperalgesia. New Findings from University of Belgrade Update Understanding of Hyperalgesia (Participation Of Peripheral Trpv1, Trpv4, Trpa1 And Asic In A Magnesium Sulfate–induced Local Pain Model In Rat) ... p.3987

Neurodegenerative Diseases and Conditions - Dementia. New Findings from University of Brescia in the Area of Dementia Described (Looking for Neuroimaging Markers in Frontotemporal Lobar Degeneration Clinical Trials: A Multi–Voxel Pattern Analysis Study in Granulin Disease) ... p.3989

Central Nervous System Diseases and Conditions - Cerebral Infarction. New Findings from University of British Columbia Update Understanding of Cerebral Infarction (Dissociation of Early and Delayed Cerebral Infarction After Aneurysmal Subarachnoid Hemorrhage) ... p.3990

Hematologic Diseases and Conditions - Anemia. New Findings from University of British Columbia in the Area of Anemia Reported (Spine tumor resection among patients who refuse blood product transfusion: a retrospective case series) ... p.3991

Toxicology - Ecotoxicology. New Findings from University of Buenos Aires Update Understanding of Ecotoxicology [Toxicity and genotoxicity assessment in sediments from the Matanza–Riachuelo river basin (Argentina) under the influence of heavy metals and organic contaminants] ... p.3992

Digestive System Diseases and Conditions - Gastric Ulcers. New Findings from University of Cairo Update Understanding of Gastric Ulcers (Combined effect of bone marrow derived mesenchymal stem cells and nitric oxide inducer on injured gastric mucosa in a rat model) ... p.3993

Oncology - Lung Cancer. New Findings from University of California Describe Advances in Lung Cancer (Dacomitinib in lung cancer: a "lost generation" EGFR tyrosine–kinase inhibitor from a bygone era?) ... p.3995

Neurotechnology. New Findings from University of California Yields New Data on Neurotechnology (Single Cell "Glucose Nanosensor" Verifies Elevated Glucose Levels in Individual Cancer Cells) ... p.3996

Neoplasms. New Findings from University of California in Neoplasms Provides New Insights (Role of serial EUS–guided FNA on pancreatic cystic neoplasms: a retrospective analysis of repeat carcinoembryonic antigen measurements) ... p.3997

Oncology - Acute Lymphoblastic Leukemia. New Findings from University of California in the Area of Acute Lymphoblastic Leukemia Reported (PTEN opposes negative selection and enables oncogenic transformation of pre–B cells) ... p.3998
Stem Cell Research - Mesenchymal Stem Cells. New Findings from University of Cincinnati Medical Center in the Area of Mesenchymal Stem Cells Reported (Abrogation of Age–Induced MicroRNA–195 Rejuvenates the Senescent Mesenchymal Stem Cells by Reactivating Telomerase) … p.3999

Heart Disorders and Diseases - Endocarditis. New Findings from University of Cologne in the Area of Endocarditis Described (Three–dimensional compared to two–dimensional transesophageal echocardiography for diagnosis of infective endocarditis) … p.4000

Oncology - Hereditary Nonpolyposis Colorectal Cancer. New Findings from University of Colorado Describe Advances in Hereditary Nonpolyposis Colorectal Cancer (Knowledge and Uptake of Genetic Counseling and Colonoscopic Screening Among Individuals at Increased Risk for Lynch Syndrome and their ...) … p.4001

Membrane Proteins - Ion Channels. New Findings from University of Copenhagen in the Area of Ion Channels Reported (The Volume Activated Potassium Channel KCNK5 is Up–Regulated in Activated Human T Cells, but Volume Regulation is Impaired) … p.4002

Neuropeptides. New Findings from University of G. d’Annunzio Describe Advances in Neuropeptides (Central inhibitory effects on feeding induced by the adipo–myokine irisin) … p.4003

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Findings from University of Glasgow in the Area of Rheumatoid Arthritis Described (Effect of IL–6 receptor blockade on high–sensitivity troponin T and NT–proBNP in rheumatoid arthritis) … p.4004

Oncology - Lymphoma. New Findings from University of Groningen in the Area of Lymphoma Reported (Biomarkers for evaluation of treatment response in classical Hodgkin lymphoma: comparison of sGalectin–1, sCD163 and sCD30 with TARC) … p.4005

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from University of Guelph in the Area of Obesity Reported (Randomized trial of a prevention intervention that embeds weight–related messages within a general parenting program) … p.4006

Digestive System Diseases and Conditions - Hemoperitoneum. New Findings from University of Hong Kong in the Area of Hemoperitoneum Described (Successful Treatment of a Pararenal Pregnancy Using High–Dose Methotrexate Regimen A Case Report) … p.4007

Musculoskeletal Diseases and Conditions - Myotonic Dystrophy. New Findings from University of Iowa Update Understanding of Myotonic Dystrophy (Myotonic Dystrophy Type 1 Management and Therapeutics) … p.4009

Public Health. New Findings from University of Jordan in the Area of Public Health Described (Integrating the Principles of Evidence Based Medicine and Evidence Based Public Health: Impact on the Quality of Patient Care and Hospital Readmission Rates in Jordan) … p.4010
Neurodegenerative Diseases and Conditions - Alzheimer Disease. New Findings from University of Kentucky in Alzheimer Disease Provides New Insights (Genomics and CSF analyses implicate thyroid hormone in hippocampal sclerosis of aging) … p.4011

Drugs and Therapies - Hormone Replacement Therapy. New Findings from University of Kragujevac in the Area of Hormone Replacement Therapy Reported (Cytogenetic biomarkers in detection of genotoxic effects of gestagens in peripheral blood lymphocytes in vitro and in vivo) … p.4012

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings from University of KwaZulu–Natal in the Area of Atherosclerosis Described (Linkage and Association Analysis Identifies TRAF1 Influencing Common Carotid Intima–Media Thickness) … p.4013

Cardiology. New Findings from University of Leipzig Update Understanding of Cardiology (Neuroprotective Strategies during Cardiac Surgery with Cardiopulmonary Bypass) … p.4014

Endocrine System Diseases and Conditions - Polycystic Ovary Syndrome. New Findings from University of Lille in Polycystic Ovary Syndrome Provides New Insights (Interactions between androgens, FSH, anti–Mullerian hormone and estradiol during folliculogenesis in the human normal and polycystic ovary) … p.4015

Peripheral Neuropathy. New Findings from University of Malaya Update Understanding of Peripheral Neuropathy (Mutation analysis of genes within the dynactin complex in a cohort of hereditary peripheral neuropathies) … p.4017

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from University of Massachusetts Describe Advances in Obesity (Economic preferences and obesity among a low–income African American community) … p.4019

Hematologic Diseases and Conditions - Sickle Cell Anemia. New Findings from University of Massachusetts in the Area of Sickle Cell Anemia Reported (Exploring Transition to Self–Management Within the Culture of Sickle Cell Disease) … p.4020

Oncology - Prostate Cancer. New Findings from University of Medicine and Pharmacy Describe Advances in Prostate Cancer (Replication study of 34 common SNPs associated with prostate cancer in the Romanian population) … p.4021

Immunology - Antigens. New Findings from University of Melbourne Describe Advances in Antigens (Lack of Heterologous Cross–reactivity toward HLA–A*02:01 Restricted Viral Epitopes Is Underpinned by Distinct alpha beta T Cell Receptor Signatures) … p.4022

Oncology - Colon Cancer. New Findings from University of Melbourne in the Area of Colon Cancer Reported (Regulation of colorectal cancer cell epithelial to mesenchymal transition by the renin angiotensin system) … p.4023
January 14, 2017

Cardiovascular Diseases and Conditions - Venous Thromboembolism. New Findings from University of Miami in Venous Thromboembolism Provides New Insights (Anti–Xa–guided enoxaparin thromboprophylaxis reduces rate of deep venous thromboembolism in high-risk trauma patients) ... p.4024

Lung Diseases and Conditions - Pneumonia. New Findings from University of Michigan Update Understanding of Pneumonia (Electroporation–mediated delivery of the FER gene in the resolution of trauma–related fatal pneumonia) ... p.4025

Cardiovascular Diseases and Conditions - Thrombosis. New Findings from University of Milan Describe Advances in Thrombosis (Resistance to thrombomodulin is associated with de novo portal vein thrombosis and low survival in patients with cirrhosis) ... p.4026

Duchenne Muscular Dystrophy. New Findings from University of Milan in Duchenne Muscular Dystrophy Provides New Insights (Therapeutic Potential of Immunoproteasome Inhibition in Duchenne Muscular Dystrophy) ... p.4027

Pregnancy Complications - Spontaneous Abortion. New Findings from University of Milan in the Area of Spontaneous Abortion Described (The impact of thyroid autoimmunity on IVF/ICSI outcome: a systematic review and meta–analysis) ... p.4028

Oncology - Prostate Cancer. New Findings from University of Montreal Update Understanding of Prostate Cancer (Lessons learned using an MRI–only workflow during high–dose–rate brachytherapy for prostate cancer) ... p.4030

Atomic Force Microscopy. New Findings from University of Munster in Atomic Force Microscopy Provides New Insights (AFM visualization of sub–50 nm polyplex disposition to the nuclear pore complex without compromising the integrity of the nuclear envelope) ... p.4031

Oncology - Lung Cancer. New Findings from University of Naples Federico II in the Area of Lung Cancer Described (rpL3 promotes the apoptosis of p53 mutated lung cancer cells by down–regulating CBS and NF kappa B upon 5–FU treatment) ... p.4032

Pediatrics. New Findings from University of New Mexico Describe Advances in Pediatrics (Proteinuria and hematuria in the neonate) ... p.4032

Kidney Diseases and Conditions - Chronic Kidney Disease. New Findings from University of North Carolina Describe Advances in Chronic Kidney Disease (Smoking patterns and chronic kidney disease in US Hispanics: Hispanic Community Health Study/Study of Latinos) ... p.4033

Heart Disorders and Diseases - Heart Failure. New Findings from University of North Carolina in Heart Failure Provides New Insights (Prehospital Delay, Precipitants Of Admission, And Length Of Stay In Patients With Exacerbation Of Heart Failure) ... p.4034

Proteins - Transcription Factors. New Findings from University of North Carolina in the Area of Transcription Factors Described (Environmental contaminants and microRNA regulation: Transcription factors as regulators of toxicant–altered microRNA expression) ... p.4035
Pharmacology. New Findings from University of Nottingham School of Medicine Yields New Data on Pharmacology (The Concise Guide to PHARMACOLOGY 2015/16: Overview) ... p.4037

Drugs and Therapies - Viscosupplementation Agents. New Findings from University of Occupational and Environmental Health Yields New Data on Viscosupplementation Agents (Targeting hyaluronan for the treatment of pancreatic ductal adenocarcinoma) ... p.4038

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from University of Oklahoma Update Understanding of Type 2 Diabetes (Interaction of PPAR alpha With the Canonic Wnt Pathway in the Regulation of Renal Fibrosis) ... p.4039

Oncology - Non-Small Cell Lung Cancer. New Findings from University of Paris–Sud Update Understanding of Non–Small Cell Lung Cancer (Predictors of chemotherapy efficacy in non–small–cell lung cancer: a challenging landscape) ... p.4040

Life Science Research - Plant Physiology. New Findings from University of Pennsylvania in Plant Physiology Provides New Insights (Codon Optimization to Enhance Expression Yields Insights into Chloroplast Translation) ... p.4041

Drugs and Therapies - Acetaminophen Therapy. New Findings from University of Pittsburgh in the Area of Acetaminophen Therapy Reported (An acetaminophen icon helps reduce medication decision errors in an experimental setting) ... p.4042

Oncology - Breast Cancer. New Findings from University of Queensland in the Area of Breast Cancer Described (The Biodistribution and Immune Suppressive Effects of Breast Cancer–Derived Exosomes) ... p.4043

Gram-Negative Bacteria - Pseudomonas aeruginosa. New Findings from University of Rome in the Area of Pseudomonas aeruginosa Reported (Novel genetic tools to tackle c–di–GMP–dependent signalling in Pseudomonas aeruginosa) ... p.4044

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings from University of South Carolina in Obesity Provides New Insights (Do Individual, Online Motivational Interviewing Chat Sessions Enhance Weight Loss in a Group–Based, Online Weight Control Program?) ... p.4045

Mental Health Diseases and Conditions - Bipolar Disorders. New Findings from University of Southern California Yields New Data on Bipolar Disorders (Mechanisms underlying the benefits of anticonvulsants over lithium in the treatment of bipolar disorder) ... p.4046

Lung Diseases and Conditions - Lung Injury. New Findings from University of Sydney in the Area of Lung Injury Described (Atomized Human Amniotic Mesenchymal Stromal Cells for Direct Delivery to the Airway for Treatment of Lung Injury) ... p.4047

Drugs and Therapies - Drug Delivery Systems. New Findings from University of Tennessee Update Understanding of Drug Delivery Systems (Current Advances of Tubulin Inhibitors in Nanoparticle Drug Delivery and Vascular Disruption/Angiogenesis) ... p.4048

Cardiology. New Findings from University of Tennessee in the Area of Cardiology Described (Ventricular catheter development: past, present, and future) ... p.4049

Immunology - Immunoglobulins. New Findings from University of Texas Describe Advances in Immunoglobulins (Paraprotein–Related Kidney Disease: Evaluation and Treatment of Myeloma Cast Nephropathy) ... p.4050
Drugs and Therapies - Smoking
Cessation Agents. New Findings from University of Texas Describe Advances in Smoking Cessation Agents (Attenuated nicotine–like effects of varenicline but not other nicotinic ACh receptor agonists in monkeys receiving nicotine daily) ... p.4051

Oncology - Prostate Cancer. New Findings from University of Texas Health Science Center in the Area of Prostate Cancer Reported (Histone deacetylase inhibitors in castration–resistant prostate cancer: molecular mechanism of action and recent clinical trials) ... p.4052

Oncology - Endometrial Cancer. New Findings from University of Texas in the Area of Endometrial Cancer Reported (Prospective evaluation of the molecular effects of metformin on the endometrium in women with newly diagnosed endometrial cancer: A window of opportunity study) ... p.4053

Education - School Health. New Findings from University of Texas in the Area of School Health Reported (Health Promotion Efforts as Predictors of Physical Activity in Schools: An Application of the Diffusion of Innovations Model) ... p.4054

Enzymes and Coenzymes - One-Carbon Group Transferases. New Findings from University of Toronto in the Area of One–Carbon Group Transferases Reported (A Potent, Selective, and Cell–Active Inhibitor of Human Type I Protein Arginine Methyltransferases) ... p.4055

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. New Findings from University of Toronto in the Area of Subarachnoid Hemorrhage Reported (Clinical characteristics and outcome of aneurysmal subarachnoid hemorrhage with intracerebral hematoma) ... p.4056

Phenylpropionates. New Findings from University of Turku Update Understanding of Phenylpropionates (Influence of Surface Chemistry on Ibuprofen Adsorption and Confinement in Mesoporous Silicon Microparticles) ... p.4057

Oncology - Breast Cancer. New Findings from University of Ulsan College of Medicine Describe Advances in Breast Cancer (Docetaxel–based adjuvant therapy for breast cancer patients in Asia–Pacific region: Results from 5 years follow–up on Asia–Pacific Breast Initiative–I) ... p.4058

Mouth Diseases and Conditions - Cheilitis. New Findings from University of Vale do Paraiba in the Area of Cheilitis Described (Optical diagnosis of actinic cheilitis by infrared spectroscopy) ... p.4059

Heart Disorders and Diseases - Heart Failure. New Findings from University of Washington Update Understanding of Heart Failure [Loss of beta–adrenergic–stimulated phosphorylation of Ca(V)1.2 channels on Ser1700 leads to heart failure] ... p.4060

Respiratory Tract Diseases and Conditions - Dyspnea. New Findings from University of Washington in the Area of Dyspnea Reported (Emergent radiation therapy as definite airway management for dyspnea with mediastinal mass) ... p.4061

Liver Diseases and Conditions - Hepatitis C Virus. New Findings from University of Washington in the Area of Hepatitis C Virus Reported (Hepatitis–C–virus–induced microRNAs dampen interferon–mediated antiviral signaling) ... p.4062
Transfusion Medicine - Blood Transfusion. New Findings from University of Western Australia in the Area of Blood Transfusion Reported (The potential for nanotechnology to improve delivery of therapy to the acute ischemic heart) ... p.4063

Drugs and Therapies - Toxicology and Pharmacology. New Findings from University of Wurzburg in the Area of Toxicology and Pharmacology Described (A quantitative weight of evidence methodology for the assessment of reproductive and developmental toxicity and its application for classification ...) ... p.4064

Angiology. New Findings from University of Ziekenhuis Update Understanding of Angiology (Anomalous right coronary artery in a middle-aged patient A case report and review of the literature) ... p.4065

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings from V. Catalan et al Broadens Understanding of Type 2 Diabetes (Increased Interleukin–32 Levels in Obesity Promote Adipose Tissue Inflammation and Extracellular Matrix Remodeling: Effect of Weight Loss) ... p.4066

Gram-Negative Bacteria - Neisseria gonorrhoeae. New Findings from V.J. Savage and Co–Authors Describe Advances in Neisseria gonorrhoeae (Efficacy of a Novel Tricyclic Topoisomerase Inhibitor in a Murine Model of Neisseria gonorrhoeae Infection) ... p.4067

Cardiovascular Diseases and Conditions - Venous Thrombosis. New Findings from Vanderbilt University Describe Advances in Venous Thrombosis (Elevated D–Dimer Is Not Predictive of Symptomatic Deep Venous Thrombosis After Total Joint Arthroplasty) ... p.4068

Oncology - Head and Neck Cancer. New Findings from Vanderbilt University in the Area of Head and Neck Cancer Described (Perceived Symptom Experience in Head and Neck Cancer Patients with Lymphedema) ... p.4069

Drugs and Therapies - Antibiotics. New Findings from Veterans Affairs Medical Center in the Area of Antibiotics Reported (Clinical Utility of On–Demand Multiplex Respiratory Pathogen Testing among Adult Outpatients) ... p.4070

Cardiovascular Diseases and Conditions - Hypertension. New Findings from Veterans Affairs Medical Center in the Area of Hypertension Described (Targeting cytokine signaling in salt–sensitive hypertension) ... p.4071

Genetics - Human Genetics. New Findings from Vrije University in the Area of Human Genetics Described (The Genetic Overlap Between Hair and Eye Color) ... p.4072

Drugs and Therapies - Antimalarial Agents. New Findings from Washington University Update Understanding of Antimalarial Agents (Whole–Genome Sequencing to Evaluate the Resistance Landscape Following Antimalarial Treatment Failure With Fosmidomycin–Clindamycin) ... p.4073

Drugs and Therapies - Central Nervous System Agents. New Findings from Wayne State University Update Understanding of Central Nervous System Agents (Drug Toxicities of Common Analgesic Medications in the Emergency Department) ... p.4074

Life Science Research - Cell Biology. New Findings from Weizmann Institute of Science in the Area of Cell Biology Reported (Microbiota Diurnal Rhythmicy Programs Host Transcriptome Oscillations) ... p.4075
January 14, 2017

Clinical Research - Clinical Trials and Studies. New Findings from William Paterson University in the Area of Clinical Trials and Studies Described (The Special Supplemental Nutrition Program for Women, Infants, and Children Fresh Start Randomized Controlled Trial: Baseline Participant ...) ... p.4075

Education - Pharmaceutical Education. New Findings from Wingate University in Pharmaceutical Education Provides New Insights (Evidence of Criterion Validity for One Pharmacy School’s Progress Examination Program) ... p.4077

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. New Findings from Wuhan University in the Area of Type 1 Diabetes Mellitus Described (Biopatterned CTLA4/Fc Matrices Facilitate Local Immunomodulation, Engraftment, and Glucose Homeostasis After Pancreatic Islet Transplantation) ... p.4078

Musculoskeletal Diseases and Conditions - Osteoarthritis. New Findings from X. Zhang and Co–Authors in the Area of Osteoarthritis Reported (Chondromodulin–1 ameliorates osteoarthritis progression by inhibiting HIF–2 alpha activity) ... p.4079

Musculoskeletal Diseases and Conditions - Osteonecrosis. New Findings from Xi’an Jiaotong University Describe Advances in Osteonecrosis (Single–nucleotide polymorphisms of MMP2 in MMP/TIMP pathways associated with the risk of alcohol–induced osteonecrosis of the femoral head in Chinese males A ...) ... p.4080

Kidney Diseases and Conditions - Hemolytic Uremic Syndrome. New Findings from Xi’an Jiaotong University in the Area of Hemolytic Uremic Syndrome Reported (Association among Complement Factor H ... Autoantibodies, Deletions of CFHR, and the Risk of Atypical Hemolytic Uremic Syndrome) ... p.4081

Heart Disorders and Diseases - Heart Failure. New Findings from Y. Shiraishi and Co–Researchers in the Area of Heart Failure Described (Correlation of Pre– and In–Hospital Systolic Blood Pressure in Acute Heart Failure Patients and the Prognostic Implications – Report From the Tokyo ...) ... p.4082

Choline. New Findings from Yale University in the Area of Choline Reported (Secretagogue–dependent and –independent transport of zinc hydration forms in rat parietal cells) ... p.4083

Cardiovascular Diseases and Conditions - Hypertension. New Findings from Yale University in the Area of Hypertension Described (Incarceration History and Uncontrolled Blood Pressure in a Multi–Site Cohort) ... p.4084

Cardiovascular Research. New Findings from Yeungnam University in the Area of Cardiovascular Research Reported (CHOP deficiency inhibits methylglyoxal–induced endothelial dysfunction) ... p.4085

Skin Diseases and Conditions - Alopecia. New Findings from Yonsei University in the Area of Alopecia Described (Relationship between androgenetic alopecia and cardiovascular risk factors according to BASP classification in Koreans) ... p.4086

Nephrology. New Findings from Zhejiang University in Nephrology Provides New Insights (Multiple Drug Transporters Are Involved in Renal Secretion of Entecavir) ... p.4087

Oncology - Bladder Cancer. New Findings from Zhengzhou University in the Area of Bladder Cancer Described (Association of thymosin beta 4 expression with clinicopathological parameters and clinical outcomes of bladder cancer patients) ... p.4088
Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. New Findings in Abdominal Aortic Aneurysm Described from Department of Vascular Surgery (Management of a dislocated endovascular aneurysm repair in a challenging giant abdominal aortic aneurysm) … p.4089

Drugs and Therapies - Antibiotics. New Findings in Antibiotics Described from Zagazig University [Phenolic extracts of clove (Syzygium aromaticum) with novel antioxidant and antibacterial activities] … p.4090

Drugs and Therapies - Antihyperlipidemic Agents. New Findings in Antihyperlipidemic Agents Described from University of Arkansas [The Vitamin E Analog Gamma–Tocotrienol (GT3) and Statins Synergistically Up–Regulate Endothelial Thrombomodulin (TM)] … p.4091

Drugs and Therapies - Antimicrobial Agents and Chemotherapy. New Findings in Antimicrobial Agents and Chemotherapy Described from University of California (Fluconazole Susceptibility in Cryptococcus gattii Is Dependent on the ABC Transporter Pdr11) … p.4092

Apoptosis. New Findings in Apoptosis Described from Medical University (Pax8 plays a pivotal role in regulation of cardiomyocyte growth and senescence) … p.4093

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings in Atherosclerosis Described from Free University (The relationship between vitamin K and peripheral arterial disease) … p.4094

Heart Disorders and Diseases - Atrial Fibrillation. New Findings in Atrial Fibrillation Described from University of Maryland (Diltiazem versus metoprolol for rate control in atrial fibrillation with rapid ventricular response in the emergency department) … p.4096

Drugs and Therapies - Biotherapies and Biologicals. New Findings in Biotherapies and Biologicals Described by M. Beck and Co–Researchers (Rheumatologists’ Perceptions of Biosimilar Medicines Prescription: Findings from a French Web–Based Survey) … p.4098

Drugs and Therapies - Bisphosphonates. New Findings in Bisphosphonates Described from Keio University (Ibandronate concomitantly blocks immobilization–induced bone and muscle atrophy) … p.4099

Oncology - Bladder Cancer. New Findings in Bladder Cancer Described from University of Turin (H2AX Phosphorylation Level in Peripheral Blood Mononuclear Cells as an Event–Free Survival Predictor for Bladder Cancer) … p.4100

Transfusion Medicine - Blood Transfusion. New Findings in Blood Transfusion Described from University of Newcastle (Association of Cortical Vein Filling with Clot Location and Clinical Outcomes in Acute Ischaemic Stroke Patients) … p.4101

Heart Disorders and Diseases - Bradycardia. New Findings in Bradycardia Described from Shanghai Jiao–Tong University (Potential Role of Regulator of G–Protein Signaling 5 in the Protection of Vagal–Related Bradycardia and Atrial Tachyarrhythmia) … p.4102
January 14, 2017

Oncology - Breast Cancer. New Findings in Breast Cancer Described from University of Kentucky (An approach for deciphering patient–specific variations with application to breast cancer molecular expression profiles) ... p.4103

Oncology - Carcinomas. New Findings in Carcinomas Described from Institute for Cancer Research and Treatment (IRCCS) (A phase II study of sorafenib in recurrent and/or metastatic salivary gland carcinomas: Translational analyses and clinical impact) ... p.4104

Oncology - Carcinomas. New Findings in Carcinomas Described from Tom Baker Cancer Center (Repurposing Sunitinib with Oncolytic Reovirus as a Novel Immunotherapeutic Strategy for Renal Cell Carcinoma) ... p.4105

Cardiology. New Findings in Cardiology Described from Henry Ford Hospital (Outcomes on Continuous Flow Left Ventricular Assist Devices: A Single Institutional 9–Year Experience) ... p.4106

Drugs and Therapies - Central Nervous System Agents. New Findings in Central Nervous System Agents Described from University of Rey Juan Carlos (Time Trend in Psychotropic Medication Use in Spain: A Nationwide Population–Based Study) ... p.4107

Drugs and Therapies - Chemotherapy. New Findings in Chemotherapy Described from University of California (Posaconazole Plasma Concentrations on Days Three to Five Predict Steady–State Levels) ... p.4108

Digestive System Diseases and Conditions - Cholangitis. New Findings in Cholangitis Described from Capital Medical University (A multicenter, randomized, double–blind trial comparing the efficacy and safety of TUDCA and UDCA in Chinese patients with primary biliary cholangitis) ... p.4109

www.NewsRx.com

Digestive System Diseases and Conditions - Cholelithiasis. New Findings in Cholelithiasis Described from University of Milan (Non–steroid anti–inflammatory drugs for biliary colic) ... p.4110

Kidney Diseases and Conditions - Chronic Kidney Disease. New Findings in Chronic Kidney Disease Described by K. Zhang and Co– Researchers (MICS, an easily ignored contributor to arterial calcification in CKD patients) ... p.4112

Kidney Diseases and Conditions - Chronic Kidney Disease. New Findings in Chronic Kidney Disease Described from Federal University (Asymptomatic Ventricular Arrhythmia and Clinical Outcomes in Chronic Kidney Disease: A Pilot Study) ... p.4113

Musculoskeletal Diseases and Conditions - Chronic Pain. New Findings in Chronic Pain Described from St. Louis University School of Medicine (Identification of A3 adenosine receptor agonists as novel non–narcotic analgesics) ... p.4114

Cirrhosis. New Findings in Cirrhosis Described from Laboratory of Human Genetics of Infectious Diseases (Impact of IL28B, APOH and ITPA Polymorphisms on Efficacy and Safety of TVR– or BOC–Based Triple Therapy in Treatment–Experienced HCV–1 Patients with ...) ... p.4115

Clinical Research - Clinical Trials and Studies. New Findings in Clinical Trials and Studies Described by B. Tan and Co– Researchers (Incidence and cost of stress ulcer prophylaxis after discharge from the intensive care unit: a retrospective study) ... p.4116

Clinical Research - Clinical Trials and Studies. New Findings in Clinical Trials and Studies Described from Fujian University of Traditional Chinese Medicine (Clinical Efficacy of Acupuncture Treatment in Combination With RehaCom Cognitive Training for
January 14, 2017

Improving Cognitive Function in Stroke: ... p.4117

Clinical Research - Clinical Trials and Studies. New Findings in Clinical Trials and Studies Described from Medical University ("Threshold–crossing"A Useful Way to Establish the Counterfactual in Clinical Trials?) ... p.4118

Clinical Research - Clinical Trials and Studies. New Findings in Clinical Trials and Studies Described from University of Iowa (Patient–activation and guideline–concordant pharmacological treatment after bone density testing: the PAADRN randomized controlled trial) ... p.4119

DNA Research. New Findings in DNA Research Described from University of Sao Paulo (An Aromatic Diamidine That Targets Kinetoplast DNA, Impairs the Cell Cycle in Trypanosoma cruzi, and Diminishes Trypomastigote Release from Infected Mammalian Host Cells) ... p.4120

Genetics - DNA Research. New Findings in DNA Research Described from University of Toulouse (Analysis of DNA Replication by Optical Mapping in Nanochannels) ... p.4121

Drugs and Therapies - Drug Resistance. New Findings in Drug Resistance Described from Yuncheng University (Stability Analysis Of A Two–strain Epidemic Model On Complex Networks With Latency) ... p.4122

Oncology - Esophageal Cancer. New Findings in Esophageal Cancer Described from Oregon Health and Science University (Significant understaging is seen in clinically staged T2N0 esophageal cancer patients undergoing esophagectomy) ... p.4124

Proteins - Extracellular Matrix Proteins. New Findings in Extracellular Matrix Proteins Described from University of Texas Southwestern (Endotrophin, a multifaceted player in metabolic dysregulation and cancer progression, is a predictive biomarker for the response to PPAR gamma ...) ... p.4125

Oncology - Gastric Cancer. New Findings in Gastric Cancer Described from Royal Marsden Hospital (Novel targets in the treatment of advanced gastric cancer: a perspective review) ... p.4126

Oncology - Gastric Cancer. New Findings in Gastric Cancer Described from Shanxi Cancer Hospital (RAD51B as a potential biomarker for early detection and poor prognostic evaluation contributes to tumorigenesis of gastric cancer) ... p.4127

Oncology - Gliomas. New Findings in Gliomas Described from Central South University (Overexpression of RACK1 Promotes Metastasis by Enhancing Epithelial–Mesenchymal Transition and Predicts Poor Prognosis in Human Glioma) ... p.4128

Immune System Diseases and Conditions - HIV/AIDS. New Findings in HIV/AIDS Described from Department of Molecular Virology (Human Immunodeficiency Virus Type 1 Two–Long Terminal Repeat Circles: A Subject for Debate) ... p.4129

Immune System Diseases and Conditions - HIV/AIDS. New Findings in HIV/AIDS Described from San Francisco State University (Relationship–Based Predictors of Sexual Risk for HIV Among MSM Couples: A Systematic Review of the Literature) ... p.4130

www.NewsRx.com
Immune System Diseases and Conditions
- HIV/AIDS. New Findings in HIV/AIDS Described from University of California (Use of HIV pre–exposure prophylaxis during the preconception, antepartum and postpartum periods at two United States medical centers) … p.4131

Heart Disorders and Diseases - Heart Attack. New Findings in Heart Attack Described from Annamalai University (Anti–inflammatory and anti–thrombotic effects of zingerone in a rat model of myocardial infarction) … p.4132

Stem Cell Research - Hematopoietic Stem Cells. New Findings in Hematopoietic Stem Cells Described from University of Debrecen (Evaluation of Mannose–Binding Lectin is a Useful Approach to Predict the Risk of Infectious Complications Following Autologous Hematopoietic Stem Cell …) … p.4133

Immunology - Immunoglobulins. New Findings in Immunoglobulins Described by N. Poirier and Co–Researchers (First–in–Human Study in Healthy Subjects with FR104, a Pegylated Monoclonal Antibody Fragment Antagonist of CD28) … p.4135

Membrane Proteins - Immunologic Receptors. New Findings in Immunologic Receptors Described from Karolinska Institute (Tetraspanin CD151 and integrin a6b1 mediate platelet–enhanced endothelial colony forming cell angiogenesis) … p.4136

Drugs and Therapies - Immunosuppressive Agents. New Findings in Immunosuppressive Agents Described from University of California [In Vitro and In Vivo Sustained Zero–Order Delivery of Rapamycin (Sirolimus) From a Biodegradable Intraocular Device] … p.4137

Inflammation. New Findings in Inflammation Described from Wenzhou Medical University (Loss of PINK1 inhibits apoptosis by upregulating a–synuclein in inflammation –sensitized hypoxic–ischemic injury in the immature brains) … p.4138

Digestive System Diseases and Conditions - Intestinal Pseudo–Obstruction. New Findings in Intestinal Pseudo–Obstruction Described from University of Genoa (Chronic Intestinal Pseudo–Obstruction in a Child Harboring a Founder Hirschsprung RET Mutation) … p.4140

Nutritional and Metabolic Diseases and Conditions - Iron Deficiency. New Findings in Iron Deficiency Described from Hyogo College of Medicine (Iron is associated with the development of hypoxia–induced pulmonary vascular remodeling in mice) … p.4141

Oncology - Liposarcomas. New Findings in Liposarcomas Described from Second Military Medical University (Surgical management of spinal liposarcoma: a case series of 7 patients and literature review) … p.4142
January 14, 2017

Biotechnology - Liposomes. New Findings in Liposomes Described from University of Hohenheim (In vitro release of grape–seed polyphenols encapsulated from uncoated and chitosan–coated liposomes) ... p.4143

Mosquito–Borne Diseases - Malaria. New Findings in Malaria Described from Albert Einstein College of Medicine [Targeting the Plasmodium vivax equilibrative nucleoside transporter 1 (PvENT1) for antimalarial drug development] ... p.4145

Mononuclear Leukocytes. New Findings in Mononuclear Leukocytes Described from Kyushu University (Hedgehog signaling regulates PDL–1 expression in cancer cells to induce anti–tumor activity by activated lymphocytes) ... p.4146

Heart Disorders and Diseases - Myocardial Ischemia. New Findings in Myocardial Ischemia Described from University of Copenhagen (Diagnostic accuracy of static CT perfusion for the detection of myocardial ischemia. A systematic review and meta–analysis) ... p.4147

Nanotechnology - Nanoindentation. New Findings in Nanoindentation Described from Harbin Medical University (Fabrication of atomic force microscope spherical tips and its application in determining the mechanical property of cancer cells) ... p.4148

Oncology. New Findings in Oncology Described from Mayo Clinic (Custom Gene Capture and Next–Generation Sequencing to Resolve Discordant ALK Status by FISH and IHC in Lung Adenocarcinoma) ... p.4149

Oncology - Oral Cancer. New Findings in Oral Cancer Described from China Medical University and Hospital (Taiwanin C selectively inhibits arecoline and 4–NQO–induced oral cancer cell proliferation via ERK1/2 inactivation) ... p.4151

Oxides. New Findings in Oxides Described from Research Hospital (Treatment in carbon monoxide poisoning patients with headache: a prospective, multicenter, double–blind, controlled clinical trial) ... p.4152

Neurologic Manifestations - Pain. New Findings in Pain Described from Washington University School of Medicine (Eact, a small molecule activator of TMEM16A, activates TRPV1 and elicits pain– and itch–related behaviours) ... p.4153

Palliative and Supportive Care. New Findings in Palliative and Supportive Care Described from Christian Medical College (The patient who 'must not be told': demographic factors associated with collusion in a retrospective study in South India) ... p.4154

Drugs and Therapies - Pharmacology and Experimental Therapeutics. New Findings in Pharmacology and Experimental Therapeutics Described from University of Michigan (Intranasal Opioid Administration in Rhesus Monkeys: PET Imaging and Antinociception) ... p.4155

Gram–Negative Bacteria - Pseudomonas aeruginosa. New Findings in Pseudomonas aeruginosa Described from Hannover School of Medicine (Intraclonal genome diversity of the major Pseudomonas aeruginosa clones C and PA14) ... p.4156

Oncology - Rectal Cancer. New Findings in Rectal Cancer Described by C. Huang and Co–Researchers (Clinical comparison of laparoscopy vs open surgery in a radical operation for rectal cancer: A retrospective case–control study) ... p.4157
Oncology - Renal Cell Carcinoma. New Findings in Renal Cell Carcinoma Described from Charles University (Morphological, immunohistochemical, and chromosomal analysis of multicystic chromophobe renal cell carcinoma, an architecturally unusual challenging variant) ... p.4158

Oncology - Small Cell Lung Cancer. New Findings in Small Cell Lung Cancer Described from Maastricht University (Development of symptomatic brain metastases after chemoradiotherapy for stage III non–small cell lung cancer: Does the type of chemotherapy regimen matter?) ... p.4159

Life Science Research - Spinal Research. New Findings in Spinal Research Described from Nanjing University School of Medicine (Replication of Association Between 53 Single–Nucleotide Polymorphisms in a DNA–Based Diagnostic Test and AIS Progression in Chinese Han Population) ... p.4160

Spiro Compounds. New Findings in Spiro Compounds Described from University of Kerala [Fluorescein–labeled fluoroapatite nanocrystals codoped with Yb(III) and Ho(III) for trimodal (downconversion, upconversion and magnetic resonance) imaging of cancer cells] ... p.4161

Succinic Acid. New Findings in Succinic Acid Described from Harbin Medical University (Nanoemulsion enhances alpha–tocopherol succinate bioavailability in rats) ... p.4162

Respiratory Tract Diseases and Conditions - Thoracic Aortic Aneurysm. New Findings in Thoracic Aortic Aneurysm Described from Health Science Center (Type A Aortic Dissection After Thoracic Endovascular Aortic Repair) ... p.4163

Cardiovascular Diseases and Conditions - Thrombosis. New Findings in Thrombosis Described from Heinrich–Heine–University (Platelet–vessel wall interactions and drug effects) ... p.4164

Tobacco Research. New Findings in Tobacco Research Described from Duke University (Efficacy of a Nurse–Delivered Intervention to Prevent and Delay Postpartum Return to Smoking: The Quit for Two Trial) ... p.4165

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings in Type 2 Diabetes Described from King’s College (Mortality in Individuals Aged 80 and Older with Type 2 Diabetes Mellitus in Relation to Glycosylated Hemoglobin, Blood Pressure, and Total Cholesterol) ... p.4166

Drugs and Therapies - Anidulafungin Therapy. New Findings in the Area of Anidulafungin Therapy Reported from J.B. Locke and Colleagues (Characterization of In Vitro Resistance Development to the Novel Echinocandin CD101 in Candida Species) ... p.4168

Health and Medicine - Cardiovascular Research. New Findings in the Area of Cardiovascular Research Reported from J.S. Shinbane and Colleagues (Digital monitoring and care: Virtual medicine) ... p.4169

Clinical Research - Clinical Trials and Studies. New Findings in the Area of Clinical Trials and Studies Reported from A. Bottomley and Colleagues (Analysing data from patient–reported outcome and quality of life endpoints for cancer clinical trials: a start in setting international standards) ... p.4170
January 14, 2017

Enzymes and Coenzymes - ADP Ribose Transferases. New Findings on ADP Ribose Transferases Discussed by Researchers at University of Shandong Poly(ADP–ribose)polymerase 1 inhibition protects against age–dependent endothelial dysfunction] ... p.4171

Gram-Negative Bacteria - Acinetobacterbaumannii. New Findings on Acinetobacter baumannii from United States Military Academy Summarized (Evaluation of Virulence Gene Expression Patterns in Acinetobacter baumannii Using Quantitative Real–Time Polymerase Chain Reaction Array) ... p.4172

Oncology - Acute Lymphoblastic Leukemia. New Findings on Acute Lymphoblastic Leukemia from University of Montreal Summarized (Polymorphisms of ABCC5 and NOS3 genes influence doxorubicin cardiotoxicity in survivors of childhood acute lymphoblastic leukemia) ... p.4173

Oncology - Acute Myeloid Leukemia. New Findings on Acute Myeloid Leukemia Described by Investigators at University Hospital (Natural killer cells in acute myeloid leukemia patients: from phenotype to transcriptomic analysis) ... p.4174

Drugs and Therapies - Adenosine Therapy. New Findings on Adenosine Therapy Described by Investigators at Third Military Medical University (Adenosine A1–Receptors Modulate mTOR Signaling to Regulate White Matter Inflammatory Lesions Induced by Chronic Cerebral Hypoperfusion) ... p.4175

Nursing - Advanced Nursing. New Findings on Advanced Nursing Described by Investigators at University of Notre Dame (The Cancer Nurse Coordinator Service in Western Australia: perspectives of specialist cancer nurse coordinators) ... p.4176

www.NewsRx.com

Immune System Diseases and Conditions - Allergic Rhinitis. New Findings on Allergic Rhinitis Discussed by Researchers at Nova Southeastern University (The role of allergen immunotherapy in the management of allergic rhinitis) ... p.4177

Neurodegenerative Diseases and Conditions - Alzheimer Disease. New Findings on Alzheimer Disease from University of Lisbon Summarized (Recent progress in multifunctional metal chelators as potential drugs for Alzheimer’s disease) ... p.4178

Cardiovascular Diseases and Conditions - Aneurysm. New Findings on Aneurysm from Kyoto University Summarized (Compressed Sensing 3–Dimensional Time–of–Flight Magnetic Resonance Angiography for Cerebral Aneurysms: Optimization and Evaluation) ... p.4179

Cardiovascular Diseases and Conditions - Aneurysm. New Findings on Aneurysm from University of Utah Summarized (Inter–rater reliability of published flow diversion occlusion scales) ... p.4180

Drugs and Therapies - Antibiotics. New Findings on Antibiotics Described by Investigators at Federal University (Evaluation Of Aerobic And Anaerobic Biodegradability And Toxicity Assessment Of Real Pharmaceutical Wastewater From Industrial Production Of Antibiotics) ... p.4181

Drugs and Therapies - Antibiotics. New Findings on Antibiotics Described by Investigators at University of Tennessee (A single–center retrospective review of postoperative infectious complications in the surgical management of mandibular fractures: Postoperative antibiotics add ...) ... p.4182
Drugs and Therapies - Antibiotics. New Findings on Antibiotics from Weizmann Institute of Science Summarized (A novel pleuromutilin antibacterial compound, its binding mode and selectivity mechanism) … p.4183

Drugs and Therapies - Antidepressants. New Findings on Antidepressants from University of Texas Summarized (Ontogeny of Norepinephrine Transporter Expression and Antidepressant–Like Response to Desipramine in Wild–Type and Serotonin Transporter Mutant Mice) … p.4184

Drugs and Therapies - Antiinfectives. New Findings on Antiinfectives Described by Investigators at Federal University (Nitazoxanide induces in vitro metabolic acidosis in Taenia crassiceps cysticerci) … p.4185

Drugs and Therapies - Antineoplastics. New Findings on Antineoplastics Discussed by Researchers at Zhejiang University (Autophagy in 5–Fluorouracil Therapy in Gastrointestinal Cancer: Trends and Challenges) … p.4186

Drugs and Therapies - Antiretrovirals. New Findings on Antiretrovirals from University of Alabama Summarized (Cost considerations in the current antiretroviral era) … p.4188

Musculoskeletal Diseases and Conditions - Arachnodactyly. New Findings on Arachnodactyly Described by Investigators at Research Institute (Whole exome sequencing identifies a novel missense FBN2 mutation co–segregating in a four–generation Chinese family with congenital contractural arachnodactyly) … p.4190

Arrhythmia. New Findings on Arrhythmia from University Hospital Summarized (Asymptomatic Intradialytic Supraventricular Arrhythmias and Adverse Outcomes in Patients on Hemodialysis) … p.4191

Biological Factors - Arthropod Venoms. New Findings on Arthropod Venoms from Fourth Military Medical University Summarized (Involvement of Rac1 signalling pathway in the development and maintenance of acute inflammatory pain induced by bee venom injection) … p.4192

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings on Atherosclerosis from Guangxi Medical University Summarized (Arsenic Exposure and Predicted 10–Year Atherosclerotic Cardiovascular Risk Using the Pooled Cohort Equations in US Hypertensive Adults) … p.4193

Cardiovascular Diseases and Conditions - Atherosclerosis. New Findings on Atherosclerosis from University of California Summarized (Endothelial–mesenchymal transition in atherosclerotic lesion calcification) … p.4194

Heart Disorders and Diseases - Atrial Fibrillation. New Findings on Atrial Fibrillation Described by Investigators at University Hospital (Direct Oral Anticoagulants for Very Elderly People With Atrial Fibrillation: Efficacy and Safe Enough?) … p.4195
Heart Disorders and Diseases - Atrial Fibrillation. New Findings on Atrial Fibrillation Described by Investigators at University of Belgrade (Uncoupling of cardiac and respiratory rhythm in atrial fibrillation) … p.4196

Heart Disorders and Diseases - Atrial Fibrillation. New Findings on Atrial Fibrillation from Hiroshima International University Summarized (Dosage Adjustment of Dabigatran Etexilate Based on Creatinine Clearance in Patients With Cardioembolic Stroke or Atrial Fibrillation) … p.4197

Autoimmune Diseases and Conditions. New Findings on Autoimmune Diseases and Conditions from National Institutes of Health Summarized (Targeting cytokine signaling in autoimmunity: back to the future and beyond) … p.4198

Oncology - B-Cell Lymphoma. New Findings on B–Cell Lymphoma Described by Investigators at University of Wisconsin (Epigenetic gene regulation by Janus kinase 1 in diffuse large B–cell lymphoma) … p.4199

Biological Structures. New Findings on Biological Structures Described by Investigators at University of Sassari (The subcortical maternal complex: multiple functions for one biological structure?) … p.4200

Blood Vessels. New Findings on Blood Vessels from Children's Hospital Summarized (A Novel Method for Epicardial Defibrillator Lead Placement in Young Children: Coil Between the Great Arteries) … p.4201

Bone Research. New Findings on Bone Research Reported by S. Manor et al (High–resolution HLA A similar to B similar to DRB1 haplotype frequencies from the Ezer Mizion Bone Marrow Donor Registry in Israel) … p.4201

Oncology - Breast Cancer. New Findings on Breast Cancer Described by Investigators at Department of Oncology (GEMOX: An Active Regimen for the Treatment of Luminal and Human Epidermal Growth Factor Receptor 2–Positive Metastatic Breast Cancer) … p.4202

Oncology - Breast Cancer. New Findings on Breast Cancer from Curtin University Summarized (Breast cancer risk and the interaction between adolescent body size and weight gain in later life: A case–control study) … p.4204

Oncology - Breast Cancer. New Findings on Breast Cancer from Fudan University Summarized (PA–MSHA inhibits the growth of doxorubicin–resistant MCF–7/ADR human breast cancer cells by downregulating Nrf2/p62) … p.4205

Bullying. New Findings on Bullying Reported by B. Venkatesh et al (Prevalence of bullying, discrimination and sexual harassment among trainees and Fellows of the College of Intensive Care Medicine of Australia and New Zealand) … p.4206

Oncology - Cancer Risk. New Findings on Cancer Risk Described by Investigators at National Hospital Organization (Risk Factors Associated with Cisplatin–Induced Nephrotoxicity in Patients with Advanced Lung Cancer) … p.4207

Drugs and Therapies - Cancer Therapy. New Findings on Cancer Therapy Described by Investigators at Institute for Biochemistry [Helenalin Acetate, a Natural Sesquiterpene Lactone with Anti–inflammatory and Anti–cancer Activity, Disrupts the Cooperation of CCAAT Box/Enhancer–binding …] … p.4208
January 14, 2017

Cardiology. New Findings on Cardiology Described by Investigators at Cedars–Sinai Heart Institute (Mitrail annular calcification is not associated with decreased procedural success, durability of repair, or left ventricular remodelling ...)
... p.4209

Cardiology. New Findings on Cardiology Described by Investigators at Stanford University (Engineered Substrate–Specific Delta PKC Antagonists to Enhance Cardiac Therapeutics) ... p.4210

Cardiology. New Findings on Cardiology Described by Investigators at University of California (Regulation of human cardiac potassium channels by full–length KCNE3 and KCNE4) ... p.4211

Cardiology. New Findings on Cardiology from L.M. Hocke and Co–Authors Summarized (Comparison of Peripheral Near–Infrared Spectroscopy Low–Frequency Oscillations to Other Denoising Methods in Resting State Functional MRI with Ultrahigh Temporal Resolution) ... p.4212

Cardiology. New Findings on Cardiology from Thomas Jefferson University Summarized (Strategic Positioning and Biased Activity of the Mitochondrial Calcium Uniporter in Cardiac Muscle) ... p.4213

Cardiovascular Diseases. New Findings on Cardiovascular Diseases Described by Investigators at Duke University (Cardiovascular Disease and HIV: Pathophysiology, Treatment Considerations, and Nursing Implications) ... p.4214

Cardiovascular Diseases and Conditions - Carotid Stenosis. New Findings on Carotid Stenosis Described by Investigators at Sakarya University (Relationship Between Carotid Stenosis and Infarct Volume in Ischemic Stroke Patients) ... p.4215

www.NewsRx.com

Chemistry - Cell Biochemistry. New Findings on Cell Biochemistry Described by Investigators at Pusan National University (Hedgehog Signaling is Associated with Liver Response to Fractionated Irradiation in Mice) ... p.4216

Life Science Research - Cell Science. New Findings on Cell Science from Shanghai Medical College of Fudan University Summarized (MBD3L2 promotes Tet2 enzymatic activity for mediating 5–methylcytosine oxidation) ... p.4217

Transplant Medicine - Cell Transplants. New Findings on Cell Transplants Described by Investigators at University College (Optimisation and quality control of cell processing for autologous stem cell transplantation) ... p.4218

Digestive System Diseases and Conditions - Cholangitis. New Findings on Cholangitis from Shizuoka Cancer Center Summarized (Evaluation of Streptococcus pneumoniae in bile samples: A case series review) ... p.4219

Clinical Research - Clinical Trials and Studies. New Findings on Clinical Trials and Studies from French National Institute of Health and Medical Research (INSERM) Summarized (High level of depressive symptoms as a barrier to reach an ideal cardiovascular health. The Paris Prospective Study ...) ... p.4220

Digestive System Diseases and Conditions - Colitis. New Findings on Colitis from Department of Gastroenterology Summarized (Segmental colitis caused by idiopathic myointimal hyperplasia of mesenteric veins) ... p.4221
January 14, 2017

Digestive System Diseases and Conditions - Colitis. New Findings on Colitis from Stanford University Summarized (Control of inflammation by stromal Hedgehog pathway activation restrains colitis) ... p.4221

Oncology - Colon Cancer. New Findings on Colon Cancer from Emory University Summarized (Novel synthetic curcumin analogs as potent antiangiogenic agents in colorectal cancer) ... p.4223

Drugs and Therapies - Dopaminergic Antiparkinsonism Agents. New Findings on Dopaminergic Antiparkinsonism Agents from R. Sant’Anna and Co–Authors Summarized (Repositioning tolcapone as a potent inhibitor of transthyretin amyloidogenesis and associated cellular toxicity) ... p.4224

Musculoskeletal Diseases and Conditions - Duchenne Muscular Dystrophy. New Findings on Duchenne Muscular Dystrophy from M. Rodrigues and Co–Authors Summarized (Impaired regenerative capacity and lower revertant fibre expansion in dystrophin–deficient mdx muscles on DBA/2 background) ... p.4225

Biological Factors - Eicosanoids. New Findings on Eicosanoids from Copenhagen University Hospital Summarized (The vasopressin type 2 receptor and prostaglandin receptors EP2 and EP4 can increase aquaporin–2 plasma membrane targeting through a cAMP–independent pathway) ... p.4226

Epithelial Cells. New Findings on Epithelial Cells from Harvard School of Medicine Summarized (Characterization of oncocytes in deep esophageal glands) ... p.4227

Gram-Negative Bacteria - Escherichia coli. New Findings on Escherichia coli from SASTRA University Summarized (Escherichia coli MazEF toxin–antitoxin system does not mediate programmed cell death) ... p.4228

www.NewsRx.com

Oncology - Esophageal Cancer. New Findings on Esophageal Cancer Described by Investigators at Shandong University (Postoperative radiation therapy of pT2–3N0M0 esophageal carcinoma—a review) ... p.4228

Evolution. New Findings on Evolution from University of Chicago Summarized (Genotype–by–genotype interactions between an insect and its pathogen) ... p.4229

Oncology - Gastric Cancer. New Findings on Gastric Cancer Discussed by Researchers at Nanjing Medical University (Influence of marital status on the survival of patients with gastric cancer) ... p.4230

Oncology - Gastric Cancer. New Findings on Gastric Cancer from Yonsei University Summarized (Incidence and impact of scheduled endoscopic surveillance on recurrence after curative endoscopic resection for early gastric cancer) ... p.4231

Genetic Disorders. New Findings on Genetic Disorders from Duke University Summarized (The continuum of causality in human genetic disorders) ... p.4232

Genetics. New Findings on Genetics from University of Tokyo Summarized (Multiple facets of p53 in senescence induction and maintenance) ... p.4233

Oncology - Glioblastomas. New Findings on Glioblastomas Discussed by Researchers at Department of Neurosurgery (Inhibiting receptor tyrosine kinase AXL with small molecule inhibitor BMS–777607 reduces glioblastoma growth, migration, and invasion in vitro and in vivo) ... p.4234

Oncology - Gliomas. New Findings on Gliomas Described by Investigators at University of Toronto (External beam radiation dose escalation for high grade glioma) ... p.4235
January 14, 2017

Oncology - Gynecologic Oncology. New Findings on Gynecologic Oncology Described by Investigators at University of Texas (Sexual health of endometrial cancer survivors before and after a physical activity intervention: A retrospective cohort analysis) … p.4236

Immune System Diseases and Conditions - HIV/AIDS. New Findings on HIV/AIDS from K.I. Persson and Co–Authors Summarized (Motivators and barriers for HIV testing among men who have sex with men in Sweden) … p.4237

Heart Disorders and Diseases - Heart Attack. New Findings on Heart Attack Described by Investigators at University of Valencia (Clinical Evaluation Versus Undetectable High–Sensitivity Troponin for Assessment of Patients With Acute Chest Pain) … p.4238

Heart Disorders and Diseases - Heart Attack. New Findings on Heart Attack from New York University Summarized (Cardiac Arrest and Resuscitation Unique to Pregnancy) … p.4240

Heart Disorders and Diseases - Heart Attack. New Findings on Heart Attack from P. Wise and Co–Authors Summarized (Excessive volume of hydrogel injectates may compromise the efficacy for the treatment of acute myocardial infarction) … p.4240

Heart Disorders and Diseases - Heart Attack. New Findings on Heart Attack from University of Copenhagen Summarized (Recognition of out–of–hospital cardiac arrest by medical dispatchers in emergency medical dispatch centres in two countries) … p.4241

Heart Disorders and Diseases - Heart Attack. New Findings on Heart Attack from University of Zurich Summarized (Treatment and outcomes of patients with recurrent myocardial infarction: A prospective observational cohort study) … p.4242

Heart Disorders and Diseases - Heart Failure. New Findings on Heart Failure from Medical University Summarized (Impaired hepato–renal function defined by the MELD XI score as prognosticator in acute heart failure) … p.4243

Heart Disorders and Diseases - Heart Failure. New Findings on Heart Failure from Odense University Hospital Summarized (Incidence of cancer in patients with chronic heart failure: a long–term follow–up study) … p.4244

Transplant Medicine - Heart Transplants. New Findings on Heart Transplants Described by Investigators at University Hospital (Quality of Life According to Urgency Status in De Novo Heart Transplant Recipients) … p.4245

Stem Cell Research - Hematopoietic Stem Cells. New Findings on Hematopoietic Stem Cells from Department of Hematology Summarized (Successful T–cell Replete Hematopoietic Stem Cell Boost Without Conditioning for Late Graft Failure) … p.4246

Nutritional and Metabolic Diseases and Conditions - Hemochromatosis. New Findings on Hemochromatosis Described by Investigators at Oregon Health and Science University (Highly accurate molecular genetic testing for HFE hereditary hemochromatosis: results from 10 years of blinded proficiency surveys by the ...) … p.4247

Herpesvirus Diseases and Conditions - Herpes Simplex Virus 1. New Findings on Herpes Simplex Virus 1 from Oswaldo Cruz Institute Summarized (Effects of RNA interference therapy against herpes simplex virus type 1 encephalitis) … p.4248

Parathyroid Diseases and Conditions - Hyperparathyroidism. New Findings on Hyperparathyroidism Described by Investigators at University of Valladolid (Parathyroid Hormone Polymorphism RS6254 is Associated with the
January 14, 2017

**Development and Severity of Osteoporosis in Asymptomatic but not Normocalcemic ...** ... p.4249

**Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. New Findings on Hypertrophic Cardiomyopathy from University of Michigan Summarized (Genotype–Dependent and –Independent Calcium Signaling Dysregulation in Human Hypertrophic Cardiomyopathy) ... p.4250

**Immunology - Immunoglobulins. New Findings on Immunoglobulins from Lukas Hospital Summarized (High affinity anti–BSEP antibodies after liver transplantation for PFIC–2–Successful treatment with immunoadsorption and B–cell depletion) ... p.4251

**Intermediate Filament Proteins. New Findings on Intermediate Filament Proteins Described by Investigators at Texas A&M University (Nebulette is a powerful cytolinker organizing desmin and actin in mouse hearts) ... p.4252

**Gram-Negative Bacteria - Klebsiella. New Findings on Klebsiella Described by Investigators at University of Melbourne (Klebsiella pneumoniae Population Genomics and Antimicrobial–Resistant Clones) ... p.4253

**Parasitic Diseases and Conditions - Leishmaniasis. New Findings on Leishmaniasis Described by Investigators at Abdul Wall Khan University (Plants as Antileishmanial Agents: Current Scenario) ... p.4254

**Oncology - Liver Cancer. New Findings on Liver Cancer from Fudan University Summarized (Lamp2a is required for tumor growth and promotes tumor recurrence of hepatocellular carcinoma) ... p.4255

**Oncology - Lung Cancer. New Findings on Lung Cancer from Brussels Free University Summarized (Development of controlled–release cisplatin dry powders for inhalation against lung cancers) ... p.4256

**Oncology - Lung Cancer. New Findings on Lung Cancer from New York University Summarized (The IASLC Mesothelioma Staging Project: Improving Staging of a Rare Disease Through International Participation) ... p.4257

**Immunology - Lymphoid Tissue. New Findings on Lymphoid Tissue Described by Investigators at Georgetown University (Copy number and expression analysis of FOSL1, GSTP1, NTSR1, FADD and CCND1 genes in primary breast tumors with axillary lymph node metastasis) ... p.4258

**Oncology - Lymphoma. New Findings on Lymphoma from Catholic University of the Sacred Heart Summarized (CD68+ cell count, early evaluation with PET and plasma TARC levels predict response in Hodgkin lymphoma) ... p.4259

**Mosquito-Borne Diseases - Malaria. New Findings on Malaria Described by Investigators at Uniformed Services University of the Health Sciences [Using Hematology Data from Malaria Vaccine Research Trials in Humans and Rhesus Macaques (Macaca mulatta) To Guide Volume Limits for ...] ... p.4260

**Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. New Findings on Metabolic Syndrome Described by Investigators at Pusan National University (Association between uterine leiomyoma and metabolic syndrome in parous premenopausal women A case–control study) ... p.4261
January 14, 2017

Molecular Medicine. New Findings on Molecular Medicine Described by Investigators at Department of Radiology (The Importance of Biopsy in the Era of Molecular Medicine) … p.4262

Digestive System Diseases and Conditions - Mucositis. New Findings on Mucositis Described by Investigators at Spanish National Research Council (CSIC) (Susceptibility of lactic acid bacteria, bifidobacteria and other bacteria of intestinal origin to chemotherapeutic agents) … p.4263

Autoimmune Diseases and Conditions - Multiple Sclerosis. New Findings on Multiple Sclerosis from Beijing Normal University Summarized (Amelioration of Experimental Autoimmune Encephalomyelitis by Isogarcinol Extracted from Garcinia mangostana L. Mangosteen) … p.4264

Health and Medicine - Nephrology. New Findings on Nephrology from M. Postorino and Co–Authors Summarized (Body mass index trend in haemodialysis patients: the shift of nutritional disorders in two Italian regions) … p.4265

Nutritional and Metabolic Diseases and Conditions - Obesity. New Findings on Obesity Described by Investigators at Brown University (Overeat Today, Skip the Scale Tomorrow: An Examination of Caloric Intake Predicting Nonadherence to Daily Self–Weighing) … p.4268

www.NewsRx.com

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. New Findings on Obstructive Sleep Apnea Described by Investigators at Tel Aviv University (Adenoidectomy for Obstructive Sleep Apnea in Children) … p.4269

Oncology. New Findings on Oncology from University of Athens Summarized (Aberrant microRNA expression in tumor mycosis fungoides) … p.4270

Musculoskeletal Diseases and Conditions - Osteoarthritis. New Findings on Osteoarthritis Described by Investigators at Maastricht University (Celecoxib–loaded PEA microspheres as an auto regulatory drug–delivery system after intra–articular injection) … p.4271

Musculoskeletal Diseases and Conditions - Osteoarthritis. New Findings on Osteoarthritis from University of Tokyo Summarized (Messenger RNA delivery of a cartilage–anabolic transcription factor as a disease–modifying strategy for osteoarthritis treatment) … p.4272

Musculoskeletal Diseases and Conditions - Osteolysis. New Findings on Osteolysis from New York University Summarized (Progranulin suppresses titanium particle induced inflammatory osteolysis by targeting TNFa signaling) … p.4273

Oncology - Osteosarcomas. New Findings on Osteosarcomas from Central South University Summarized (Visfatin triggers the in vitro migration of osteosarcoma cells via activation of NF–kappa B/IL–6 signals) … p.4274

Oncology - Pancreatic Cancer. New Findings on Pancreatic Cancer Described by Investigators at Harvard School of Medicine (Phase I study of safety and pharmacokinetics of the anti–MUC16 antibody–drug conjugate DMUC5754A in patients with platinum–resistant ovarian cancer or …) … p.4275
Oncology - Pancreatic Cancer. New Findings on Pancreatic Cancer Described by Investigators at University of Kragujevac (Epidemiology of pancreatic cancer) … p.4276

Parkinson's Disease. New Findings on Parkinson's Disease from Kyung Hee University Summarized (Mulberry fruit ameliorates Parkinson’s–disease–related pathology by reducing alpha–synuclein and ubiquitin levels in a ...) … p.4277

Enzymes and Coenzymes - Peptide Hydrolases. New Findings on Peptide Hydrolases Described by Investigators at Uppsala University (The association between serum cathepsin L and mortality in older adults) … p.4278

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). New Findings on Phosphotransferases (Alcohol Group Acceptor) Described by Investigators at University of Vermont (Rho kinase activity governs arteriolar myogenic depolarization) … p.4283

Lung Diseases and Conditions - Pneumonia. New Findings on Pneumonia Described by Investigators at University of Florida (Intubated Trauma Patients Receiving Prolonged Antibiotics for Pneumonia despite Negative Cultures: Predictors and Outcomes) … p.4284

Gram-Negative Bacteria - Prevotella intermedia. New Findings on Prevotella intermedia Discussed by Researchers at Kyung Hee University (In Vitro Effects of Polyphosphate against Prevotella intermedia in Planktonic Phase and Biofilm) … p.4285

Neurodegenerative Diseases and Conditions - Progressive Supranuclear Palsy. New Findings on Progressive Supranuclear Palsy Discussed by Researchers at Hospital of the Holy Cross and St. Paul (Copy number variation analysis of the 17q21.31 region and its role in neurodegenerative diseases) … p.4286

Proline. New Findings on Proline Described by Investigators at Chinese Academy of Sciences (Transformation and products of captopril with humic constituents during laccase–catalyzed oxidation: Role of reactive intermediates) … p.4287

Oncology - Prostate Cancer. New Findings on Prostate Cancer Described by Investigators at University of Udine (Can multiparametric MRI replace Roach equations in staging prostate cancer before external beam radiation therapy?) … p.4288
Proteomics. New Findings on Proteomics from National Institute of Radiological Sciences Summarized (PU–H71, a novel Hsp90 inhibitor, as a potential cancer–specific sensitizer to carbon–ion beam therapy) … p.4289

Lung Diseases and Conditions - Pulmonary Embolism. New Findings on Pulmonary Embolism from Rovigo General Hospital Summarized (Rheolytic thrombectomy in patient with acute pulmonary embolism, heparin–induced thrombocytopenia and recent stoke. When percutaneous treatment is the only therapeutic …) … p.4290

Quality of Life. New Findings on Quality of Life Described by Investigators at Royal North Shore Hospital [Nutritional issues and body weight in long–term survivors of allogeneic blood and marrow transplant (BMT) in NSW Australia] … p.4291

Drugs and Therapies - Radiation Therapy. New Findings on Radiation Therapy Discussed by Researchers at Polytechnic University (Tumor radio–sensitivity assessment by means of volume data and magnetic resonance indices measured on prostate tumor bearing rats) … p.4292

Respiratory Tract Diseases and Conditions - Respiratory Tract Infections. New Findings on Respiratory Tract Infections Discussed by Researchers at Royal Liverpool and Broadgreen University Hospital (Pneumococcal Colonization Rates in Patients Admitted to a United Kingdom Hospital with Lower Respiratory Tract …) … p.4293

Respiratory Tract. New Findings on Respiratory Tract from University of Texas Summarized (Interferon–gamma promotes double–stranded RNA–induced TLR3–dependent apoptosis via upregulation of transcription factor Runx3 in airway epithelial cells) … p.4294

Science. New Findings on Science from Max–Planck–Institute for Biophysics Summarized (Two pathways regulate cortical granule translocation to prevent polyspermy in mouse oocytes) … p.4296

Hematologic Diseases and Conditions - Sickle Cell Anemia. New Findings on Sickle Cell Anemia from E. Charrin and Co–Authors Summarized (Inflammatory and oxidative stress phenotypes in transgenic sickle cell mice) … p.4297

Stainless Steel. New Findings on Stainless Steel Reported by B. Moen et al (Microbiota formed on attached stainless steel coupons correlates with the natural biofilm of the sink surface in domestic kitchens) … p.4298

Gram–Positive Bacteria - Staphylococcus aureus. New Findings on Staphylococcus aureus from University of Lausanne Summarized (In Vitro and In Vivo Effectiveness of an Innovative Silver–Copper Nanoparticle Coating of Catheters To Prevent Methicillin–Resistant Staphylococcus aureus Infection) … p.4299

Oncology - Stomach Cancer. New Findings on Stomach Cancer from Jilin University Summarized (Enhanced recovery after surgery with laparoscopic radical gastrectomy for stomach carcinomas) … p.4300

Ear Diseases and Conditions - Suppurative Otitis Media. New Findings on Suppurative Otitis Media from Seoul National University Summarized (Changes in antibiotic resistance in recurrent Pseudomonas aeruginosa infections of chronic suppurative otitis media) … p.4301

Drugs and Therapies - Toxicology and Pharmacology. New Findings on Toxicology and Pharmacology from National Institute for Public Health and the Environment Summarized (Critical elements for human health risk assessment of less than lifetime exposures) … p.4303

Drugs and Therapies - Toxicology and Pharmacology. New Findings on Toxicology and Pharmacology from T. Zhang and Co–Authors Summarized (The comparison of animal models for premature ovarian failure established by several different source of inducers) … p.4304

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis Described by Investigators at Anacor Pharmaceuticals (Discovery of Novel Oral Protein Synthesis Inhibitors of Mycobacterium tuberculosis That Target Leucyl–tRNA Synthetase) … p.4305

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis Described by Investigators at Ondokuz Mayis University [Multicenter evaluation of crystal violet decolorization assay (CVDA) for rapid detection of isoniazid and rifampicin resistance in Mycobacterium tuberculosis] … p.4306

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis Described by Investigators at School of Public Health (Pyrazinamide Resistance Assays and Two–Month Sputum Culture Status in Patients with Multidrug–Resistant Tuberculosis) … p.4307

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis From Anacor Pharmaceuticals (Discovery of Novel Oral Protein Synthesis Inhibitors of Mycobacterium tuberculosis That Target Leucyl–tRNA Synthetase) … p.4305

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis Described by Investigators at Ondokuz Mayis University [Multicenter evaluation of crystal violet decolorization assay (CVDA) for rapid detection of isoniazid and rifampicin resistance in Mycobacterium tuberculosis] … p.4306

Mycobacterium Infections - Tuberculosis. New Findings on Tuberculosis Described by Investigators at School of Public Health (Pyrazinamide Resistance Assays and Two–Month Sputum Culture Status in Patients with Multidrug–Resistant Tuberculosis) … p.4307

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. New Findings on Type 1 Diabetes Mellitus from Department of Clinical Chemistry Summarized (Taurine Transporter Gene Expression in Mononuclear Blood Cells of Type 1 Diabetes Patients) … p.4308

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. New Findings on Type 1 Diabetes Mellitus from Department of Internal Medicine Summarized (Adherence to insulin therapeutic regimens in patients with type 1 diabetes. A nationwide survey in Brazil) … p.4309

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings on Type 2 Diabetes Described by Investigators at University of Copenhagen (Ionizing Radiation Potentiates High–Fat Diet–Induced Insulin Resistance and Reprograms Skeletal Muscle and Adipose Progenitor Cells) … p.4310

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Findings on Type 2 Diabetes from Huazhong University of Science and Technology Summarized (Entada phaseoloides extract suppresses hepatic gluconeogenesis via activation of the AMPK signaling pathway) … p.4311

Vaginal Diseases and Conditions - Vaginitis. New Findings on Vaginitis from Jiangsu University Summarized (Identification of a novel human papillomavirus by metagenomic analysis of vaginal swab samples from pregnant women) … p.4312

Cardiovascular Diseases and Conditions - Varicocele. New Findings on Varicocele Reported by E. Janghorban–Laricheh et al (An association between sperm PLC zeta levels and varicocele?) … p.4313
January 14, 2017

Cardiovascular Diseases and Conditions - Venous Thromboembolism. New Findings on Venous Thromboembolism from Thomas Jefferson University Hospital Summarized (Aspirin Can Be Used as Prophylaxis for Prevention of Venous Thromboembolism After Revision Hip and Knee Arthroplasty) … p.4314

Drugs and Therapies - Fluoxetine Therapy. New Fluoxetine Therapy Findings from Shandong University Reported (The Synergistic Effect of Azoles and Fluoxetine against Resistant Candida albicans Strains Is Attributed to Attenuating Fungal Virulence) … p.4315

Science - Food Science. New Food Science Study Findings Have Been Reported by Investigators at Huazhong Agricultural University (Development and Application of a Multiplex Real–Time PCR Assay as an Indicator of Potential Allergenicity in Citrus Fruits) … p.4316

RNA Viruses - Foot and Mouth Disease Virus. New Foot and Mouth Disease Virus Study Findings Reported from GlaxoSmithKline (Pharmacological Characterization of the avb6 Integrin Binding and Internalization Kinetics of the Foot–and–Mouth Disease Virus Derived Peptide A20FMDV2) … p.4318

Genetic Diseases and Conditions - Fragile X Syndrome. New Fragile X Syndrome Findings from Stanford University Reported (The Role of Executive Function in Independent Living Skills in Female Adolescents and Young Adults With Fragile X Syndrome) … p.4319

Friedreich’s Ataxia. New Friedreich’s Ataxia Study Findings Reported from M. Kearney and Co–Authors (Pharmacological treatments for Friedreich ataxia) … p.4320

www.NewsRx.com

Fusion Proteins. New Fusion Proteins Findings from Harvard School of Medicine Described (NUP98 Fusion Proteins Interact with the NSL and MLL1 Complexes to Drive Leukemogenesis) … p.4321

Oncology - Gallbladder Cancer. New Gallbladder Cancer Findings from Shanghai Jiao–Tong University Described (The IncRNA MALAT1 functions as a competing endogenous RNA to regulate MCL–1 expression by sponging miR–363–3p in gallbladder cancer) … p.4322

Oncology - Gallbladder Cancer. New Gallbladder Cancer Study Findings Have Been Reported by Investigators at Department of Pharmacology (Prognostic Significance of HER–2 and p53 Expression in Gallbladder Carcinoma in North Indian Patients) … p.4323

Oncology - Gastric Cancer. New Gastric Cancer Data Have Been Reported by Researchers at Ulsan University School of Medicine (Use of a clinical pathway in laparoscopic gastrectomy for gastric cancer) … p.4324

Oncology - Gastric Cancer. New Gastric Cancer Findings Has Been Reported by Investigators at University Medical Center (Esophageal and Gastric Cancer Pearl: a nationwide clinical biobanking project in the Netherlands) … p.4325

Oncology - Gastric Cancer. New Gastric Cancer Findings Has Been Reported by Researchers at Kyoto Prefectural University (Histological evaluation for chemotherapeutic responses of metastatic lymph nodes in gastric cancer) … p.4326

Oncology - Gastric Cancer. New Gastric Cancer Findings Has Been Reported by Researchers at Otto–von–Guericke–University (Expression of aurora kinase A correlates with the Wnt–modulator RACGAP1 in gastric cancer) … p.4327
Oncology - Gastric Cancer. New Gastric Cancer Findings Reported from Tongji Medical College (Detection and Characterization of Metastatic Cancer Cells in the Mesogastrium of Gastric Cancer Patients) … p.4328

Oncology - Gastric Cancer. New Gastric Cancer Findings from China Pharmaceutical University Discussed (E platinum, a newly synthesized platinum compound, induces apoptosis through ROS–triggered ER stress in gastric carcinoma cells) … p.4329

Oncology - Gastric Cancer. New Gastric Cancer Findings from Department of Oncology Reported (Autophagy Protects from Raddeanin A–Induced Apoptosis in SGC–7901 Human Gastric Cancer Cells) … p.4330

Oncology - Gastric Cancer. New Gastric Cancer Findings from Sun Yat Sen University Described (Low expression of MAP1LC3B, associated with low Beclin–1, predicts lymph node metastasis and poor prognosis of gastric cancer) … p.4331

Oncology - Gastric Cancer. New Gastric Cancer Findings from University of Medicine Described (Patient preferences for palliative treatment of locally advanced or metastatic gastric cancer and adenocarcinoma of the gastroesophageal junction: a choice–based conjoint …) … p.4332

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported by Investigators at University College of Medicine (The first European family with gastric adenocarcinoma and proximal polyposis of the stomach: case report and review of the literature) … p.4333

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported by Researchers at Ningbo University (Novel long non–coding RNA GACAT3 promotes gastric cancer cell proliferation through the IL–6/STAT3 signaling pathway) … p.4334

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported by Researchers at Hannover School of Medicine (Different gastric microbiota compositions in two human populations with high and low gastric cancer risk in Colombia) … p.4335

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported by Researchers at Peking University Third Hospital (Helicobacter Pylori and Gastric Cancer: Clinical Aspects) … p.4336

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported by Researchers at Yonsei University College of Medicine (Laparoscopic gastric cancer surgery: Current evidence and future perspectives) … p.4337

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Have Been Reported from Maastricht University (Use of Proton Pump Inhibitors and Risks of Fundic Gland Polyps and Gastric Cancer: Systematic Review and Meta–analysis) … p.4338

Oncology - Gastric Cancer. New Gastric Cancer Study Findings Recently Were Reported by Researchers at University of Pennsylvania (Neoadjuvant therapy for gastric cancer: current evidence and future directions) … p.4339

Digieal System Diseases and Conditions - Gastroenteritis. New Gastroenteritis Study Findings Have Been Reported by Investigators at University of Calgary (Ondansetron Oral Dissolve Tab Vs. Oral Solution In Children Presenting To The Emergency Department With Gastroenteritis) … p.4341

Gastroenterology. New Gastroenterology Study Findings Have Been Reported from Weill Cornell Medical College (Leaky gut – concept or clinical entity?) ... p.4343

Digestive System Diseases and Conditions - Gastroparesis. New Gastroparesis Data Have Been Reported by Investigators at University of Louisville (Treating an oft– unrecognized and troublesome entity: using gastric electrical stimulation to reduce symptoms of malignancy– associated gastroparesis) ... p.4344

Biotechnology - Gene Therapy. New Gene Therapy Data Have Been Reported by Researchers at Tianjin University (Multitargeting Gene Delivery Systems for Enhancing the Transfection of Endothelial Cells) ... p.4345

Surgery - General Surgery. New General Surgery Findings Has Been Reported by Investigators at Metaxa Cancer Hospital (Re– admissions for delayed complications after cytoreductive surgery and HIPEC) ... p.4346

Genetics - Genetic Epidemiology. New Genetic Epidemiology Findings from Fred Hutchinson Cancer Research Center Described (Prioritizing individual genetic variants after kernel machine testing using variable selection) ... p.4347

Genetics. New Genetics Findings from Xavier University of Louisiana Reported (Mutant TP53 disrupts age– related accumulation patterns of somatic mutations in multiple cancer types) ... p.4348

Genetics. New Genetics Study Findings Have Been Reported by Investigators at Mount Sinai School of Medicine (Emerging roles of p53 and other tumour– suppressor genes in immune regulation) ... p.4349

Genetics. New Genetics Study Findings Recently Were Reported by Researchers at Rutgers State University (MicroRNA Control of p53) ... p.4350

Genetics. New Genetics Study Findings Recently Were Reported by Researchers at Yonsei University College of Medicine (Cellular localization of NRF2 determines the self– renewal and osteogenic differentiation potential of human MSCs via the P53– SIRT1 axis) ... p.4351

Drugs and Therapies - Genitourinary Tract Agents. New Genitourinary Tract Agents Study Results Reported from Konkuk University (Oxytocin Protects Hippocampal Memory and Plasticity from Uncontrollable Stress) ... p.4352

Biotechnology - Genomics. New Genomics Findings Has Been Reported by Investigators at Johns Hopkins University Bloomberg School of Public Health (Whole– genome analysis of the methylome and hydroxymethylome in normal and malignant lung and liver) ... p.4353

Biotechnology - Genomics. New Genomics Findings from Laval University Described (RNA expression profile of calcified bicuspid, tricuspid, and normal human aortic valves by RNA sequencing) ... p.4354

Genomics and Genetics. New Genomics and Genetics Study Findings Recently Were Reported by Researchers at Mayo Clinic (Molecular and Functional Characterization of Rare CACNA1C Variants in Sudden Unexplained Death in the Young) ... p.4355
January 14, 2017

Vascular Diseases and Conditions - Giant Cell Arteritis. New Giant Cell Arteritis Study Results from Mayo Clinic Described (Evaluating the Incidence of Arteritic Ischemic Optic Neuropathy and Other Causes of Vision Loss from Giant Cell Arteritis) … p.4356

Eye Diseases and Conditions - Glaucoma. New Glaucoma Findings from University of California Described (Deep Retinal Layer Microvasculature Dropout Detected by the Optical Coherence Tomography Angiography in Glaucoma) … p.4357

Oncology - Glioblastomas. New Glioblastomas Findings from Provincial Hospital Discussed (Icaritin inhibits the invasion and epithelial–to–mesenchymal transition of glioblastoma cells by targeting EMMPRIN via PTEN/AKT/HIF–1α signalling) … p.4358

Oncology - Glioblastomas. New Glioblastomas Findings from University of Otago Reported (A combination of tyrosine kinase inhibitors, crizotinib and dasatinib for the treatment of glioblastoma multiforme) … p.4359

Oncology - Glioblastomas. New Glioblastomas Study Findings Have Been Reported by Researchers at New York Medical College (ATP–site binding inhibitor effectively targets mTORC1 and mTORC2 complexes in glioblastoma) … p.4360

Oncology - Glioblastomas. New Glioblastomas Study Results Reported from Hoag Memorial Hospital (Upfront boost Gamma Knife "leading–edge" radiosurgery to FLAIR MRI–defined tumor migration pathways in 174 patients with glioblastoma multiforme: a 15–year assessment of a …) … p.4361

Oncology - Glioblastomas. New Glioblastomas Study Results from Xinjiang Medical University Described (MicroRNA–106a–5p facilitates human glioblastoma cell proliferation and invasion by targeting adenomatosis polyposis coli protein) … p.4362

Oncology - Gliomas. New Gliomas Data Have Been Reported by Researchers at Department of Neurosurgery (Nimotuzumab enhances temozolomide–induced growth suppression of glioma cells expressing mutant EGFR in vivo) … p.4363

Oncology - Gliomas. New Gliomas Findings from University of Wisconsin Described (Effect of D609 on the expression of GADD45 beta protein: Potential inhibitory role in the growth of glioblastoma cancer stem like cells) … p.4364

Oncology - Gliomas. New Gliomas Study Findings Have Been Reported by Researchers at Si Chuan University (Biomarkers related with seizure risk in glioma patients: A systematic review) … p.4365

Oncology - Gliomas. New Gliomas Study Results from Northwestern University Feinberg School of Medicine Described (Controlled Payload Release by Magnetic Field Triggered Neural Stem Cell Destruction for Malignant Glioma Treatment) … p.4367

Oncology - Gliomas. New Gliomas Study Results from Uppsala University Described (Heparanase Promotes Glioma Progression and Is Inversely Correlated with Patient Survival) … p.4368

Nutritional and Metabolic Diseases and Conditions - Glucose Intolerance. New Glucose Intolerance Findings from New York University Described (One–hour post–load plasma glucose level during the OGTT predicts dysglycemia Observations from the 24 year follow–up of the Israel Study of
January 14, 2017

Gluco... Intolerance, Obesity and ...) ... p.4369

Membrane Proteins - Glutamate Receptors. New Glutamate Receptors Study Findings Recently Were Reported by C. Citti and Co–Researchers [7-Chloro-5-(furan-3-yl)-3-methyl-4H-benzo[e][1,2,4]thiadiazine 1,1-Dioxide as Positive Allosteric Modulator of ...] ... p.4370

Glycyrrh... Acid. New Glycyrrh... Acid Study Results Reported from Kuwait University (Carbenoxolone exposure during late gestation in rats alters placental expressions of p53 and estrogen receptors) ... p.4371

Immune System Diseases and Conditions - Graft–Versus–Host Disease. New Graft–Versus–Host Disease Study Results from University of Freiburg Described (Pathogenesis of acute graft–versus–host disease: from intestinal microbiota alterations to donor T cell activation) ... p.4372

Granulocytes. New Granulocytes Findings from Institute of Pediatrics Reported (T Cell Independent Mechanisms Associated with Neutrophil Extracellular Trap Formation and Selective Autophagy in IL–17A Mediated Epidermal Hyperplasia) ... p.4373

Immunology - Granulocytes. New Granulocytes Findings from Johannes Gutenberg–University Reported [Genetics and pathophysiology of granulomatosis with polyangiitis (GPA) and its main autoantigen proteinate 3] ... p.4374

Immunology - Granulocytes. New Granulocytes Study Findings Have Been Reported by Investigators at Inner Mongolia Medical College (Macrophage migration inhibitory factor contributes to anti–neutroph... antibody–induced neutrophils activation) ... p.4375

www.NewsRx.com

Guanidines. New Guanidines Study Results Reported from Mansoura University (Agmatine protects rat liver from nicotine–induced hepatic damage via antioxidative, antiapoptotic, and antifibrotic pathways) ... p.4376

Oncology - Gynecologic Oncology. New Gynecologic Oncology Findings from Roswell Park Cancer Institute Discussed (The CD47 "don't eat me signal" is highly expressed in human ovarian cancer) ... p.4377

Immune System Diseases and Conditions - HIV/AIDS. New HIV/AIDS Data Have Been Reported by Researchers at Fudan University (Specific Reactivation of Latent HIV–1 by dCas9–SunTag–VP64–mediated Guide RNA Targeting the HIV–1 Promoter) ... p.4378

Immune System Diseases and Conditions - HIV/AIDS. New HIV/AIDS Findings Has Been Reported by Investigators at Medical College of Wisconsin (Partnership–Level Analysis of African American Women's Risky Sexual Behavior in Main and Non–Main Partnerships) ... p.4380

Immune System Diseases and Conditions - HIV/AIDS. New HIV/AIDS Findings Reported from Kyoto University (Core Binding Factor beta Protects HIV, Type 1 Accessory Protein Viral Infectivity Factor from MDM2–mediated Degradation) ... p.4381

Immune System Diseases and Conditions - HIV/AIDS. New HIV/AIDS Findings Reported from S.T. Xu and Co–Authors (cGAS–Mediated Innate Immunity Spreads Intercellularly through HIV–1 Env–Induced Membrane Fusion Sites) ... p.4382
Immune System Diseases and Conditions

Immune System Diseases and Conditions
- HIV/AIDS. New HIV/AIDS Study Findings Have Been Reported by Researchers at University of Antioquia (HIV–1–derived single–stranded RNA acts as activator of human neutrophils) … p.4384

Immune System Diseases and Conditions
- HIV/AIDS. New HIV/AIDS Study Findings Have Been Reported from University Hospital (NS5A Resistance: Clinical Implications and Treatment Possibilities) … p.4385

Immune System Diseases and Conditions
- HIV/AIDS. New HIV/AIDS Study Findings Reported from University of California (CRISPR–mediated Activation of Latent HIV–1 Expression) … p.4386

Immune System Diseases and Conditions
- HIV/AIDS. New HIV/AIDS Study Findings Reported from University of Molise (High prevalence of human papillomavirus type 58 in HIV infected men who have sex with men: A preliminary report in Central Italy) … p.4387

Gram-Negative Bacteria - Haemophilus influenzae. New Haemophilus influenzae Findings from Center for Disease Control and Prevention Reported (Comparative Genomic Analysis of Haemophilus haemolyticus and Nontypeable Haemophilus influenzae and a New Testing Scheme for Their Discrimination) … p.4388

Hantavirus. New Hantavirus Findings from University of Health Sciences Described (Targeting a Novel RNA–Protein Interaction for Therapeutic Intervention of Hantavirus Disease) … p.4389

Oncology - Head and Neck Cancer. New Head and Neck Cancer Study Findings Have Been Reported by Investigators at University of Malaya (HOPX functions as a tumour suppressor in head and neck cancer) … p.4390

Oncology - Head and Neck Cancer. New Head and Neck Cancer Study Findings Recently Were Reported by Researchers at Research Institute (Treatment delays, race, and outcomes in head and neck cancer) … p.4391

Oncology - Head and Neck Cancer. New Head and Neck Cancer Study Findings Recently Were Reported by Researchers at University of Colorado (Enhancing radiosensitization in EphB4 receptor–expressing Head and Neck Squamous Cell Carcinomas) … p.4392

Surgery - Head and Neck Surgery. New Head and Neck Surgery Findings Has Been Reported by Investigators at Laval University (Decreasing loco–regional recurrence for oral cavity cancer with total Mohs margins technique) … p.4393

Health and Medicine - Health and Society. New Health and Society Study Results from IMS Health Described (Orphan Drug Expenditures In The United States: A Historical And Prospective Analysis, 2007–18) … p.4394

Drugs and Therapies - Health-System Pharmacy. New Health–System Pharmacy Findings from Medical University of South Carolina Described (Pharmacy residency training measured through a standardized knowledge test) … p.4395
Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings Has Been Reported by M. Cardona–Morrell et al (Pre–existing risk factors for in–hospital death among older patients could be used to initiate end–of–life discussions rather than Rapid Response System calls: A ...) ... p.4396

Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings Has Been Reported by Researchers at Department of Emergency Medicine (Prevalence of emergency medical service utilisation in patients with out–of–hospital cardiac arrest in Thailand) ... p.4397

Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings from Federal University Outline (Effects of thyroid hormones on aortic tissue after myocardial infarction in rats) ... p.4398

Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings from Kanazawa University Hospital Described (Age–specific differences in prognostic significance of rhythm conversion from initial non–shockable to shockable rhythm and subsequent shock delivery in out–of–hospital ...) ... p.4399

Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings from P.C. Sherrell and Co–Authors Described (Cardiac and stem cell–coocooned hybrid microspheres: A multi factorial design approach) ... p.4400

Heart Disorders and Diseases - Heart Attack. New Heart Attack Findings from University of Lille Described (Can we identify termination of resuscitation criteria in cardiac arrest due to drowning: results from the French national out–of–hospital cardiac arrest registry) ... p.4401

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Have Been Reported by Investigators at Oslo University Hospital (Factors impacting upon timely and adequate allocation of prehospital medical assistance and resources to cardiac arrest patients) ... p.4402

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Have Been Reported by Researchers at American University (The Association of Anemia and Its Severity with Cardiac Outcomes and Mortality After Total Knee Arthroplasty in Noncardiac Patients) ... p.4403

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Have Been Reported by Researchers at University Hospital (External validity of a contemporaneous primary percutaneous coronary intervention trial in patients with acute ST–elevation myocardial infarction: ...) ... p.4404

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Recently Were Reported by Researchers at Tel Aviv Sourasky Medical Center (Differential Effects of Colchicine on Cardiac Cell Viability in an in vitro Model Simulating Myocardial Infarction) ... p.4405

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Reported from University of Alberta (Complete vs Culprit–Only Percutaneous Coronary Intervention in STEMI With Multivessel Disease: A Meta–analysis and Trial Sequential Analysis of Randomized Trials) ... p.4406

Heart Disorders and Diseases - Heart Attack. New Heart Attack Study Findings Reported from Yokohama City University (Pharmacodynamic Assessment of Platelet Reactivity After a Loading Dose of Prasugrel or Clopidogrel in Patients With...
Heart Disorders and Diseases - Heart Disease. New Heart Disease Data. New Heart Disease Study Findings Recently Were Reported by Researchers at Seoul National University (Limiting scan range of cardiac CT and the chance of missed acute aortic syndrome) … p.4415

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings Has Been Reported by Investigators at Gilead Sciences Inc. (Targeting LOXL2 for cardiac interstitial fibrosis and heart failure treatment) … p.4416

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings Has Been Reported by Investigators at Kumamoto University (Late gadolinium enhancement on cardiac magnetic resonance predicts coronary vasomotor abnormality and myocardial lactate production in patients with chronic ...) … p.4417

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings Has Been Reported by Investigators at Ruhr University (Calciotropic and phosphaturic hormones in heart failure) … p.4418

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings Reported from Hasselt University (Mode of Death in Octogenarians Treated With Cardiac Resynchronization Therapy) … p.4419

Heart Failure. New Heart Failure Findings from Brigham and Women’s Hospital Reported (Long–Term Arrhythmic and Nonarrhythmic Outcomes of Lamin A/C Mutation Carriers) … p.4420

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings from Institute for Health Outlined (Use of Coronary Ultrasound Imaging to Evaluate Ventricular Function in Adult Zebrafish) … p.4421
January 14, 2017

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings from P.M. Brown and Colleagues Discussed (Composite End Points in Acute Heart Failure Research: Data Simulations Illustrate the Limitations) ... p.4422

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings from University of Ottawa Described (Characteristics and outcomes for acute heart failure in elderly patients presenting to the ED) ... p.4423

Heart Disorders and Diseases - Heart Failure. New Heart Failure Findings from University of Pennsylvania Discussed (A qualitative secondary data analysis of intentional and unintentional medication nonadherence in adults with chronic heart failure) ... p.4424

Heart Disorders and Diseases - Heart Failure. New Heart Failure Study Findings Reported from Emory University [An evidence–based review of recent advances in therapy for heart failure with reduced ejection fraction (HFrEF)] ... p.4425

Heart Disorders and Diseases - Heart Failure. New Heart Failure Study Results from University of Pennsylvania Hospital Described [Pulsatile Load Components, Resistive Load and Incident Heart Failure: The Multi–Ethnic Study of Atherosclerosis (MESA)] ... p.4426

Surgery - Heart Surgery. New Heart Surgery Findings from University of Michigan Described (Delayed Sternal Closure in Infant Heart Surgery–The Importance of Where and When: An Analysis of the STS Congenital Heart Surgery Database) ... p.4427

Transplant Medicine - Heart Transplants. New Heart Transplants Study Findings Reported from Vanderbilt University (Duration of Left Ventricular Assist Device Support Does Not Impact Survival After US Heart Transplantation) ... p.4428

www.NewsRx.com

Heart Valves. New Heart Valves Study Findings Reported from St. Marianna University (Influence of aortic valve leaflet calcification on dynamic aortic valve motion assessed by cardiac computed tomography) ... p.4429

Gram-Negative Bacteria - Helicobacter pylori. New Helicobacter pylori Findings from Autonomous University Discussed (Regression of gastric intestinal metaplasia after the eradication of Helicobacter pylori infection in a hospital in Mexico) ... p.4430

Gram-Negative Bacteria - Helicobacter pylori. New Helicobacter pylori Findings from Shahrekord University of Medical Sciences Described (Clinical relevance of Helicobacter pylori virulence factors in Iranian patients with gastrointestinal diseases) ... p.4431

Health and Medicine - Hematology Research. New Hematology Research Findings from Leiden University Reported (Red cell alloimmunisation in patients with different types of infections) ... p.4432

Hematopoiesis. New Hematopoiesis Study Findings Have Been Reported from M. Letourneau et al (Drosophila hematopoiesis under normal conditions and in response to immune stress) ... p.4433

Stem Cell Research - Hematopoietic Stem Cells. New Hematopoietic Stem Cells Study Findings Recently Were Reported by Researchers at University Hospital (A case of maternal–foetal chimerism identified during routine histocompatibility testing for hematopoietic stem cell transplantation) ... p.4434

Stem Cell Research - Hematopoietic Stem Cells. New Hematopoietic Stem Cells Study Findings Recently Were Reported by Researchers at University of Wisconsin (Generating human hematopoietic stem cells in vitro – exploring endothelial to hematopoietic transition as a portal for stemness ...
Hematopoietic. New Hematopoietic Study Findings Have Been Reported by A. Cico and Colleagues (Enhancers and their dynamics during hematopoietic differentiation and emerging strategies for therapeutic action) … p.4436

Biological Factors - Heme. New Heme Study Findings Have Been Reported by Y.K. Ye and Colleagues (Electrochemical gene sensor based on a glassy carbon electrode modified with hemin–functionalized reduced graphene oxide and gold nanoparticle–immobilized probe DNA) … p.4437

Proteins - Hemeprteins. New Hemeprteins Findings from Showa Pharmaceutical University Reported (Identification of putative substrates for cynomolgus monkey cytochrome P450 2C8 by substrate depletion assays with 22 human P450 substrates and inhibitors) … p.4438

Hematologic Diseases and Conditions - Hemophilia A. New Hemophilia A Findings Reported from University of Caen (Influence of factor VIII level and its inhibitor titer on the therapeutic response to corticosteroids alone in the management of acquired hemophilia A retrospective single–center study) … p.4439

Hemorrhagic Shock. New Hemorrhagic Shock Data Have Been Reported by Investigators at Academy of Military Medical Sciences (Carboxyfullerene nanoparticles alleviate acute hepatic injury in severe hemorrhagic shock) … p.4440

Liver Diseases and Conditions - Hepatitis B Virus. New Hepatitis B Virus Findings from Hokkaido University Described (Hepatitis B virus Xprotein impairs alpha–interferon signaling via up–regulation of suppressor of cytokine signaling 3 and prozin phosphatase 2A) … p.4441

Liver Diseases and Conditions - Hepatitis B Virus. New Hepatitis B Virus Study Findings Have Been Reported by Researchers at University Hospital (The transcription factor c–JUN/AP–1 promotes HBV–related liver tumorigenesis in mice) … p.4442

Liver Diseases and Conditions - Hepatitis B Virus. New Hepatitis B Virus Study Findings Recently Were Reported by Researchers at French National Institute of Health and Medical Research (INSERM) (Intensification with pegylated interferon during treatment with tenofovir in HIV–hepatitis B virus ...) … p.4443

Liver Diseases and Conditions - Hepatitis C Virus. New Hepatitis C Virus Study Findings Have Been Reported by Researchers at University Hospital (The transcription factor c–JUN/AP–1 promotes HBV–related liver tumorigenesis in mice) … p.4444

Liver Diseases and Conditions - Hepatitis C Virus. New Hepatitis C Virus Study Findings Recently Were Reported by Researchers at French National Institute of Health and Medical Research (INSERM) (Intensification with pegylated interferon during treatment with tenofovir in HIV–hepatitis B virus ...) … p.4445

Liver Diseases and Conditions - Hepatitis C Virus. New Hepatitis C Virus Study Findings Recently Were Reported by Researchers at Dalian Medical University (Sofosbuvir and ribavirin in acute hepatitis C–infected patient with decompensated cirrhosis) … p.4446

Liver Diseases and Conditions - Hepatitis. New Hepatitis Findings from Boston University Reported (Extranodal Marginal Zone Endobronchial Lymphoma Associated With Hepatitis C) … p.4447

Gastroenterology - Hepatology Research. New Hepatology Research Study Findings Recently Were Reported by Researchers at Saarland University Hospital [The common PNPLA3 variant p.I148M is associated with liver fat contents as quantified by controlled attenuation parameter (CAP)] … p.4447
January 14, 2017

Cardiovascular Diseases and Conditions - Hereditary Hemorrhagic Telangiectasia. New Hereditary Hemorrhagic Telangiectasia Findings from Department of Radiology Discussed (Natural history of brain capillary vascular malformations in hereditary hemorrhagic telangiectasia patients) … p.4448

Oncology - Hereditary Nonpolyposis Colorectal Cancer. New Hereditary Nonpolyposis Colorectal Cancer Study Findings Have Been Reported from University Medical Center (Cost–effectiveness of routine screening for Lynch syndrome in endometrial cancer patients up to 70 years of age) … p.4449

Histology. New Histology Study Findings Reported from University of California (Molecular inimitability amongst tumors: implications for precision cancer medicine in the age of personalized oncology) … p.4450

Hormones. New Hormones Study Results from Karolinska Institute Described (Hippocampal Transcriptome Profile of Persistent Memory Rescue in a Mouse Model of THRA1 Mutation–Mediated Resistance to Thyroid Hormone) … p.4451

Human Herpesvirus Diseases and Conditions - Human Herpesvirus 8. New Human Herpesvirus 8 Findings from Hannover School of Medicine Outlined (The KSHV RNA regulator ORF57: target specificity and its role in the viral life cycle) … p.4454

www.NewsRx.com

Human Immunodeficiency Virus. New Human Immunodeficiency Virus Study Findings Recently Were Reported by Researchers at Blood Systems Research Institute [Self–reported historic human immunodeficiency virus (HIV) testing in a Brazilian blood donor HIV case–control study] … p.4454

Immunology - Human Immunology. New Human Immunology Study Findings Reported from Laboratory for Immunology (Next–Generation Sequencing of the HLA locus: Methods and impacts on HLA typing, population genetics and disease association studies) … p.4455

Drugs and Therapies - Human Serum Albumin Therapy. New Human Serum Albumin Therapy Findings from Tarbiat Modares University Described (Inhibition of lysozyme fibrillation by human serum albumin nanoparticles: Possible mechanism) … p.4456

Hydrocarbons. New Hydrocarbons Data Have Been Reported by Investigators at Dana–Farber Cancer Institute (Challenges in Targeting a Basic Helix–Loop–Helix Transcription Factor with Hydrocarbon–Stapled Peptides) … p.4457

Hydrochloric Acid. New Hydrochloric Acid Study Findings Have Been Reported by Researchers at University of Tennessee (Safety Of Continuous Peripheral Infusion Of 3% Sodium Chloride Solution In Neurocritical Care Patients) … p.4458

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. New Hypercholesterolemia Study Findings Have Been Reported by Investigators at Federal University (The effects of rosuvastatin on lipid–lowering, inflammatory, antioxidant and fibrinolytics blood biomarkers are influenced by Val16Ala superoxide …) … p.4459
Hyperoxia. New Hyperoxia Study Findings Have Been Reported from Medical University (Cyclic and constant hyperoxia cause inflammation, apoptosis and cell death in human umbilical vein endothelial cells) … p.4460

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Data Have Been Reported by Researchers at North West University (A call to action and a lifecourse strategy to address the global burden of raised blood pressure on current and future generations: the Lancet Commission on …) … p.4461

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Findings from Tel Aviv University Described (Combination Therapy for Pulmonary Arterial Hypertension: A Systematic Review and Meta–analysis) … p.4463

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Findings from Veterans Affairs Medical Center Described (Screening and brief intervention for unhealthy substance use in patients with chronic medical conditions: a systematic review) … p.4464

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Findings Have Been Reported by F. Crovetto and Co–Researchers (First–trimester screening with specific algorithms for early– and late–onset fetal growth restriction) … p.4465

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Findings Have Been Reported by Investigators at Mayo Clinic (Emerging concepts for patients with treatment–resistant hypertension) … p.4466

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Findings Have Been Reported by Investigators at Ohio State University (Ascorbic Acid Protects against Hypertension through Downregulation of ACE1 Gene Expression Mediated by Histone Deacetylation in Prenatal …) … p.4467

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Findings Reported from M. Nemecz and Co–Authors (Role of MicroRNA in Endothelial Dysfunction and Hypertension) … p.4468

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Results Reported from University of Science Malaysia [Efficacy of Losartan in the management of Post–Dialysis Euvolemic Hypertension (HELD–Trial): A Single–Blind Randomized Control Trial] … p.4469

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Results from Soochow University Described (High sucrose intake during gestation increases angiotensin II type 1 receptor–mediated vascular contractility associated with epigenetic alterations in aged offspring rats) … p.4470

Cardiovascular Diseases and Conditions - Hypertension. New Hypertension Study Results from Boston University Reported (Effect of severe hypoalbuminemia on toxicity of high–dose melphalan and autologous stem cell transplantation in patients with AL amyloidosis) … p.4471

Hematologic Diseases and Conditions - Hypoalbuminemia. New Hypoalbuminemia Findings from Boston University Described (Effect of severe hypoalbuminemia on toxicity of high–dose melphalan and autologous stem cell transplantation in patients with AL amyloidosis) … p.4471

Cardiovascular Diseases and Conditions - Hypotension. New Hypotension Findings Has Been Reported by Investigators at School of Medicine (Effectiveness of an Electronic Alert for Hypotension and Low Bispectral Index on 90–day Postoperative Mortality A Prospective, Randomized Trial) … p.4472
Cardiovascular Diseases and Conditions - Hypotension. New Hypotension Study Findings Have Been Reported by Researchers at Federal University (Cardiovascular Effects of the Essential Oil of Croton argyrophylloides in Normotensive Rats: Role of the Autonomic Nervous System) … p.4473

Cardiovascular Diseases and Conditions - Hypotension. New Hypotension Study Findings Recently Were Reported by Researchers at Xi’an Jiao Tong University [Vasodilation and hypotension of a novel 3–benzylquinazolin–4(3H)–one derivative via the inhibition of calcium flux] … p.4474

Surgery - Hysterectomy. New Hysterectomy Findings from Southeast University Described (Effects of propofol and sevoflurane on perioperative immune response in patients undergoing laparoscopic radical hysterectomy for cervical cancer) … p.4475

Immunology - Immunoglobulins. New Immunoglobulins Findings from University of Texas Health Science Center Reported (Pharmacological concentrations of recombinant factor VIIa restore hemostasis independent of tissue factor in antibody–induced hemophilia mice) … p.4476

Immunology - Immunoglobulins. New Immunoglobulins Study Findings Have Been Reported by Investigators at Aichi Medical University [De Novo Anti–HLA DSA Characteristics and Subclinical Antibody–Mediated Kidney Allograft Injury] … p.4477

Immunology - Immunoglobulins. New Immunoglobulins Study Findings Have Been Reported by Investigators at University of Pittsburgh [A depleting antibody toward sca–1 mitigates a surge of CD34(+)c–kit(+) progenitors and reduces vascular restenosis in a murine vascular injury …] … p.4478

Immunology - Immunoglobulins. New Immunoglobulins Study Findings Reported from S. Ducreux and Co–Authors (Monitoring efficiency of humoral rejection episode therapy in liver transplantation: any role for complement binding Luminex Single Antigen assays?) … p.4479

Immunology. New Immunology Findings from University of Sydney Described [The Analysis of CD83 Expression on Human Immune Cells Identifies a Unique CD83(+)–Activated T Cell Population] … p.4480

Drugs and Therapies - Immunosuppressive Agents. New Immunosuppressive Agents Findings Reported from Department of Surgery (Unusual case of tacrolimus vascular toxicity after deceased donor renal transplantation) … p.4481

Drugs and Therapies - Immunotherapy. New Immunotherapy Study Findings Recently Were Reported by Researchers at Shiraz University of Medical Sciences [Monitoring of CD8(+) T–cell Activity in mTOR Inhibitor–treated Cancer Patients for Successful Immunotherapy] … p.4483

Drugs and Therapies - Immunotherapy. New Immunotherapy Study Results Reported from Dana–Farber Cancer Institute (Genomic Approaches to Understanding Response and Resistance to Immunotherapy) … p.4484
Drugs and Therapies - Indomethacin Therapy. New Indomethacin Therapy Study Findings Have Been Reported by Investigators at University of Barcelona (Oil–in–water nanoemulsions are suitable for carrying hydrophobic compounds: Indomethacin as a model of anti–inflammatory drug) … p.4485

Drugs and Therapies - Indomethacin Therapy. New Indomethacin Therapy Study Findings Have Been Reported by Investigators at Vanderbilt University (Antitumor Activity of Cytotoxic Cyclooxygenase–2 Inhibitors) … p.4486

Inflammation. New Inflammation Findings from G.J. Szebeni and Colleagues Discussed (Pro–Tumoral Inflammatory Myeloid Cells as Emerging Therapeutic Targets) … p.4487

Inflammation. New Inflammation Findings from German Cancer Research Center Described (Natural killer cell memory in infection, inflammation and cancer) … p.4488

Inflammation. New Inflammation Findings from National Center for Scientific Research (CNRS) Discussed (Pan PPAR agonist IVA337 is effective in prevention and treatment of experimental skin fibrosis) … p.4489

Inflammation. New Inflammation Findings from Y.J. Lee and Co–Authors Described (Acquired Bilateral Dyspigmentation on Face and Neck: Clinically Appropriate Approaches) … p.4490

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. New Inflammatory Bowel Disease Findings from Mercy Hospital Reported (Identification of Factors Impacting Recurrent Clostridium difficile Infection and Development of a Risk Evaluation Tool) … p.4491

RNA Viruses - Influenza A Virus. New Influenza A Virus Findings Has Been Reported by Researchers at University of Melbourne (Apocynin and ebselen reduce influenza A virus–induced lung inflammation in cigarette smoke–exposed mice) … p.4492

RNA Viruses - Influenza A Virus Subtype H1N1. New Influenza A Virus Subtype H1N1 Study Findings Have Been Reported from Howard Hughes Medical Institute (Influenza immunization elicits antibodies specific for an egg–adapted vaccine strain) … p.4493

Immunology - Innate Immunity. New Innate Immunity Data Have Been Reported by Researchers at Medical University [Paul Ehrlich (1854–1915) and His Contributions to the Foundation and Birth of Translational Medicine] … p.4494

Health and Medicine - Integrative Medicine. New Integrative Medicine Findings from D. Damaske and Co–Authors Described (The beliefs and attitudes of chiropractors and their patients utilising an open practice environment) … p.4495

Immunology - Interleukin Receptors. New Interleukin Receptors Study Results from Ajou University Described (Recent Progress in the Molecular Recognition and Therapeutic Importance of Interleukin–1 Receptor–Associated Kinase 4) … p.4496

Intermediate Filament Proteins. New Intermediate Filament Proteins Findings Has Been Reported by Investigators at Veterans Affairs Medical Center (Disruption of desmin–mitochondrial architecture in patients with regurgitant mitral valves and preserved ventricular function) … p.4497
January 14, 2017

Lung Diseases and Conditions - Interstitial Lung Disease. New Interstitial Lung Disease Study Results from Fukushima Medical University Described (Clinicopathological analysis of mechanic's hand associated with dermatomyositis) ... p.4498

Central Nervous System Diseases and Conditions - Intracranial Aneurysm. New Intracranial Aneurysm Findings Has Been Reported by Investigators at Zhengzhou University (Safety and efficacy of a new prophylactic tirofiban protocol without oral intraoperative antplatelet therapy for endovascular treatment of ruptured ...) ... p.4499

Central Nervous System Diseases and Conditions - Intracranial Hypertension. New Intracranial Hypertension Study Findings Reported from Stanford University Hospital (Detection and characterization of intracranial aneurysms: a 10–year multidetector CT angiography experience in a large center) ... p.4500

Membrane Proteins - Ion Channels. New Ion Channels Data Have Been Reported by Researchers at University of Turku (L–type calcium channels regulate filopodia stability and cancer cell invasion downstream of integrin signalling) ... p.4502

Nutritional and Metabolic Diseases and Conditions - Iron Deficiency. New Iron Deficiency Study Results from University of the Free State Described (Iron status determination in pregnancy using the Thomas plot) ... p.4503

Carrier Proteins - Iron-Binding Proteins. New Iron–Binding Proteins Study Findings Recently Were Reported by Researchers at University of Pennsylvania (Vascular Accessibility of Endothelial Targeted Ferritin Nanoparticles) ... p.4504

Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia. New Iron–Deficiency Anemia Findings from Pamukkale University Reported (Response to parenteral iron therapy distinguish unexplained refractory iron deficiency anemia from iron–refractory iron deficiency anemia) ... p.4505

Ischemia. New Ischemia Findings from Royal Melbourne Institute of Technology University Reported (Highly Sensitive Detection of Minimal Cardiac Ischemia using Positron Emission Tomography Imaging of Activated Platelets) ... p.4506

Ischemia. New Ischemia Study Findings Have Been Reported by Investigators at Kyushu University (Protective Effects of Imatinib on Ischemia/Reperfusion Injury in Rat Lung) ... p.4507

Ischemia. New Ischemia Study Findings Have Been Reported by Investigators at University Medical Center, Hamburg Eppendorf (Lymphocyte–specific deletion of IKK2 or NEMO mediates an increase in intrarenal Th17 cells and accelerates renal damage in an ...) ... p.4508

Oncology - Kidney Cancer. New Kidney Cancer Data Have Been Reported by Investigators at Cancer Hospital (Newly–presented potential targeted drugs in the treatment of renal cell cancer) ... p.4509

Transplant Medicine - Kidney Transplants. New Kidney Transplants Data Have Been Reported by A.S. Benjumea and Co–Authors (Hepatitis C Virus in Kidney Transplant Recipients: A Problem on the Path to Eradication) ... p.4510
Transplant Medicine - Kidney Transplants.
New Kidney Transplants Findings Has Been Reported by E. Luna et al [Effect of Cytomegalovirus Infection on Survival of Older Kidney Transplant Patients (D plus /R plus ): Impact of Valganciclovir Prophylaxis Versus Preemptive Therapy] ... p.4511

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Findings Has Been Reported by Investigators at Yonsei University (Low–dose mycophenolate mofetil in tablet form or capsule form combined with tacrolimus in the early period after kidney transplantation: a prospective ...) ... p.4512

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Findings Reported from Roma Tor Vergata University (Everolimus and Advagraf Ab Initio in Combined Liver and Kidney Transplant With Donor–Specific Antibodies: A Case Report) ... p.4513

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Findings from Institute for Cancer Research and Treatment (IRCCS) Described (Mesenchymal stromal cells in renal transplantation: opportunities and challenges) ... p.4514

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Study Findings Reported from Rovigo General Hospital Described (ECG parameters predict left ventricular conduction delay in patients with left ventricular dysfunction) ... p.4515

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Study Findings Have Been Reported from Istanbul University (A Solid Mass in the Chest Wall: An Unusual Presentation of Posttransplant Lymphoproliferative Disorder in a Renal Transplant Recipient) ... p.4516

Transplant Medicine - Kidney Transplants.
New Kidney Transplants Study Results from University Medical Center Described (A high intrapatient variability in tacrolimus exposure is associated with poor long–term outcome of kidney transplantation) ... p.4517

Gram-Negative Bacteria - Klebsiella.
New Klebsiella Data Have Been Reported by Investigators at Federal University (Outbreaks of colistin–resistant and colistin–susceptible KPC–producing Klebsiella pneumoniae in a Brazilian intensive care unit) ... p.4518

Gram-Negative Bacteria - Klebsiella.
New Klebsiella Study Findings Recently Were Reported by Researchers at Oswaldo Cruz Institute (mgrB Mutations Mediating Polymyxin B Resistance in Klebsiella pneumoniae Isolates from Rectal Polymyxin B Resistance in Klebsiella pneumoniae Isolates from Rectal Surveillance Swabs in Brazil) ... p.4519

Oncology - Laryngeal Cancer.
New Laryngeal Cancer Study Findings Have Been Reported by Investigators at University of California (Prognostic significance of p16 in squamous cell carcinoma of the larynx and hypopharynx) ... p.4520

Heart Disorders and Diseases - Left Ventricular Dysfunction.
New Left Ventricular Dysfunction Findings from Rovigo General Hospital Described (ECG parameters predict left ventricular conduction delay in patients with left ventricular dysfunction) ... p.4521

Leiomyosarcomas.
New Leiomyosarcomas Findings from University of Texas Discussed (Survival of patients with metastatic leiomyosarcoma: the MD Anderson Clinical Center for targeted therapy experience) ... p.4522

Leptospira.
New Leptospira Study Results Reported from S.M. Faisal et al [Leptospira surface adhesin (Lsa21) induces Toll like receptor 2 and 4 mediated inflammatory responses in macrophages] ... p.4523
January 14, 2017

Drugs and Therapies - Lercanidipine Therapy. New Lercanidipine Therapy Data Have Been Reported by Investigators at China Pharmaceutical University (Simultaneous Determination of a Fixed–Dose Combination of Lercanidipine and Valsartan in Human Plasma by LC–MS–MS: Application to a ... ) ... p.4524

Neurodegenerative Diseases and Conditions - Lewy Body Disease. New Lewy Body Disease Data Have Been Reported by G. Perini and Co–Authors (Misidentification Delusions Prevalence in Different Types of Dementia and Validation of a Structured Questionnaire) ... p.4525

Life Science Research. New Life Science Research Findings Has Been Reported by Researchers at Federal University (Monoconjugation of Human Amylin with Methylpolyethylene glycol) ... p.4526

Nutritional and Metabolic Diseases and Conditions - Lipid Metabolism Disorders. New Lipid Metabolism Disorders Findings from University of Manitoba Discussed (HNF–4 alpha regulated miR–122 contributes to development of gluconeogenesis and lipid metabolism disorders in Type 2 diabetic mice and in palmitate–treated HepG2 ...) ... p.4527

Lipid Research. New Lipid Research Study Findings Have Been Reported by Investigators at Linkoping University (Alterations in high–density lipoprotein proteome and function associated with persistent organic pollutants) ... p.4528

Lipid Research. New Lipid Research Study Findings Have Been Reported by Researchers at Quebec Heart and Lung Institute (Coronary atheroma progression rates in men and women following high–intensity statin therapy: A pooled analysis of REVERSAL, ASTEROID and ...) ... p.4529

www.NewsRx.com

Lipid Research. New Lipid Research Study Findings Have Been Reported from Veterans Affairs Medical Center (Does Dietary Cholesterol Matter?) ... p.4530

Nutritional and Metabolic Diseases and Conditions - Lipodystrophy. New Lipodystrophy Findings from University of Leipzig Discussed (Progranulin is increased in human and murine lipodystrophy) ... p.4531

Oncology - Liposarcomas. New Liposarcomas Study Findings Reported from General Hospital (Liposarcoma scroti: a rare paratesticular tumor) ... p.4532

Biotechnology - Liposomes. New Liposomes Study Findings Reported from Nagoya University (Septin Interferes with the Temperature–Dependent Domain Formation and Disappearance of Lipid Bilayer Membranes) ... p.4533

Oncology - Liver Cancer. New Liver Cancer Data Have Been Reported by Investigators at Henan University (MicroRNA–27b exerts an oncogenic function by targeting Fbxw7 in human hepatocellular carcinoma) ... p.4534

Oncology - Liver Cancer. New Liver Cancer Data Have Been Reported by Researchers at Xi’an Jiaotong University (MicroRNA–519a promotes tumor growth by targeting PTEN/PI3K/AKT signaling in hepatocellular carcinoma) ... p.4535

Oncology - Liver Cancer. New Liver Cancer Findings Has Been Reported by Researchers at Pusan National University (Development and Applicability of the A–P 200 Criteria for Liver Transplantation for Hepatocellular Carcinoma) ... p.4536

Oncology - Liver Cancer. New Liver Cancer Findings from University of Bologna Described (Length time bias in surveillance for hepatocellular carcinoma and how to avoid it) ... p.4537
Oncology - Liver Cancer. New Liver Cancer Study Findings Have Been Reported by Investigators at University of Palermo (Hepatocellular carcinoma recurrence in patients with curative resection or ablation: impact of HCV eradication does not depend on the use of interferon) … p.4538

Oncology - Liver Cancer. New Liver Cancer Study Findings Have Been Reported by Researchers at University of Illinois (Carotenoid Nanovector for Efficient Therapeutic Gene Knockdown of Transcription Factor FOXC1 in Liver Cancer) … p.4539

Oncology - Liver Cancer. New Liver Cancer Study Findings Have Been Reported by Researchers at Xiamen University (The preventative effect of Akt knockout on liver cancer through modulating NF–kB–regulated inflammation and Bad–related apoptosis signaling pathway) … p.4540

Oncology - Liver Cancer. New Liver Cancer Study Findings Recently Were Reported by Researchers at Department of Radiology (Hepatocellular carcinoma: modern image–guided therapies) … p.4541

Oncology - Liver Cancer. New Liver Cancer Study Results Reported from National Research Center (Relationship Between Serum microRNA155 and Telomerase Expression in Hepatocellular Carcinoma) … p.4543

Oncology - Liver Cancer. New Liver Cancer Study Results Reported from Second Military Medical University (Low expression of DCXR protein indicates a poor prognosis for hepatocellular carcinoma patients) … p.4544

Liver Diseases and Conditions - Liver Fibrosis. New Liver Fibrosis Study Findings Have Been Reported by G. Bain and Colleagues (Selective Inhibition of Autotaxin Is Efficacious in Mouse Models of Liver Fibrosis) … p.4545

Liver Diseases and Conditions - Liver Fibrosis. New Liver Fibrosis Study Findings Have Been Reported by Researchers at Theodor Bilharz Research Institute (Wharton’s jelly–derived mesenchymal stem cells combined with praziquantel as a potential therapy for Schistosoma mansoni–induced liver ...) … p.4546

Transplant Medicine - Liver Transplants. New Liver Transplants Study Findings Have Been Reported from M.G. Chen et al (Left branch of portal vein thrombosis in a liver transplant recipient with donation after cardiac death donor A case report) … p.4547

Oncology - Lung Cancer. New Lung Cancer Data Have Been Reported by Investigators at Oregon Health and Science University (The Roles of Dyadic Appraisal and Coping in Couples With Lung Cancer) … p.4548

Oncology - Lung Cancer. New Lung Cancer Data Have Been Reported by Researchers at Chinese Peoples’ Liberation Army General Hospital (Ratio of lymph node to primary tumor SUVmax multiplied by maximal tumor diameter on positron emission tomography/integrated computed ...) … p.4549

Oncology - Lung Cancer. New Lung Cancer Study Findings Have Been Reported by Investigators at University of Louisville (Normalization of Exhaled Carbonyl Compounds After Lung Cancer Resection) … p.4550
January 14, 2017

Oncology - Lung Cancer. New Lung Cancer Study Findings Have Been Reported by Investigators at University of North Carolina (Lysyl Hydroxylase 2 Is Secreted by Tumor Cells and Can Modify Collagen in the Extracellular Space) … p.4551

Oncology - Lung Cancer. New Lung Cancer Study Findings Have Been Reported by Researchers at CHA University (Genomic profiling of lung adenocarcinoma patients reveals therapeutic targets and confers clinical benefit when standard molecular testing is negative) … p.4552

Oncology - Lung Cancer. New Lung Cancer Study Findings Have Been Reported from International Agency for Research on Cancer (Descriptive epidemiology of lung cancer and current status of tobacco control measures in Central and South America) … p.4553

Oncology - Lung Cancer. New Lung Cancer Study Findings Recently Were Reported by Researchers at Cochin Hospital (Intratumoral Immune Cell Densities Are Associated with Lung Adenocarcinoma Gene Alterations) … p.4554

Oncology - Lung Cancer. New Lung Cancer Study Findings Recently Were Reported by Researchers at George Mason University (Functional signaling pathway analysis of lung adenocarcinomas identifies novel therapeutic targets for KRAS mutant tumors) … p.4555

Oncology - Lung Cancer. New Lung Cancer Study Results Reported from University of California (Preclinical efficacy of a RAF inhibitor that evades paradoxical MAPK pathway activation in protein kinase BRAF–mutant lung cancer) … p.4556

Lung Diseases. New Lung Diseases Study Findings from Peking University Cancer Hospital and Institute Described (Quantification of mutant alleles in circulating tumor DNA can predict survival in lung cancer) … p.4558

Lung Diseases. New Lung Diseases Study Findings Reported from P.N. Lee et al Described (The effect of time changes in diagnosing lung cancer type on its recorded distribution, with particular reference to adenocarcinoma) … p.4557

Lung Diseases. New Lung Diseases Study Findings From Yonsei University Described (Implication of vitamin D–associated factors in patients with non tuberculous mycobacterial lung disease) … p.4559

Lung Diseases. New Lung Diseases Study Findings Have Been Reported by Investigators at Harvard School of Medicine (Soluble epoxide hydrolase deficiency or inhibition enhances murine hypoxic pulmonary vasoconstriction after lipopolysaccharide challenge) … p.4560

Lung Diseases. New Lung Diseases Study Findings Have Been Reported by Investigators at Shaheed Beheshti University of Medical Sciences (The roles of miRNAs as potential biomarkers in lung diseases) … p.4561

Lung Diseases. New Lung Diseases Study Findings Have Been Reported by Investigators at Sungkyunkwan University (Peak Plasma Concentration of Azithromycin and Treatment Responses in Mycobacterium avium Complex Lung Disease) … p.4562

Autoimmune Diseases and Conditions - Lupus. New Lupus Findings from Central Hospital Reported (Expression of BAFF and BR3 in patients with systemic lupus erythematosus) … p.4563
Autoimmune Diseases and Conditions - Lupus. New Lupus Study Findings Have Been Reported by Researchers at King’s College (Urinary congo philia in women with hypertensive disorders of pregnancy and preexisting proteinuria or hypertension) … p.4564

Peptide Proteins - Luteinizing Hormone. New Luteinizing Hormone Findings from National Research Institute of Aquaculture Discussed (Development of a homologous radioimmunoassay for red seabream follicle stimulating hormone and regulation of gonadotropins by GnRH in red seabream, …) … p.4566

Immunology - Lymphocytes. New Lymphocytes Study Findings Recently Were Reported by Researchers at University Hospital (Moving Immune Checkpoint Blockade in Thoracic Tumors beyond NSCLC) … p.4567

Immunology - Lymphoid Tissue. New Lymphoid Tissue Findings from School of Medicine Described (Pelvic Lymph Node Dissection in Patients Treated for Testis Cancer: The Memorial Sloan Kettering Cancer Center Experience) … p.4569

Oncology - Lymphoma. New Lymphoma Study Results from School of Rochester Described (ACR Appropriateness Criteria (R) Hodgkin Lymphoma–Favorable Prognosis Stage I and II] … p.4570

Machine Learning. New Machine Learning Findings from University of California Outlined (Molecular Properties of Drugs Interacting with SLC22 Transporters OAT1, OAT3, OCT1, and OCT2: A Machine–Learning Approaches) … p.4571

Mosquito-Borne Diseases - Malaria. New Malaria Study Findings Have Been Reported from J.I. Nankabirwa et al (Intermittent Preventive Treatment with Dihydroartemisinin–Piperazine in Ugandan Schoolchildren Selects for Plasmodium falciparum Transporter Polymorphisms That Modify …) … p.4572

Mosquito-Borne Diseases - Malaria. New Malaria Study Findings Recently Were Reported by Researchers at Clemson University (Identification of Novel Plasmodium falciparum Hexokinase Inhibitors with Antiparasitic Activity) … p.4573

Mosquito-Borne Diseases - Malaria. New Malaria Study Results Reported from GlaxoSmithKline (Development of a Novel High–Density [H–3] Hypoxanthine Scintillation Proximity Assay To Assess Plasmodium falciparum Growth) … p.4574

Mosquito-Borne Diseases - Malaria. New Malaria Study Results from M.W. Vos et al Described (A semi–automated luminescence based standard membrane feeding assay identifies novel small molecules that inhibit transmission of malaria parasites by mosquitoes) … p.4575

Oncology - Malignant Mesothelioma. New Malignant Mesothelioma Data Have Been Reported by Investigators at Seoul National University (Hypomethylation reduced the aggressive potential of human malignant mesothelioma cells) … p.4576

DNA Viruses - Mastadenovirus. New Mastadenovirus Study Results Reported from University of Manitoba (The interaction of adenovirus E1A with the mammalian protein Ku70/XRCC6) … p.4577
January 14, 2017

Infectious Diseases and Conditions - Measles. New Measles Findings Reported from Paul Ehrlich Institute (Enhanced lysis by bispecific oncolytic measles viruses simultaneously using HER2/neu or EpCAM as target receptors) … p.4578

Genetics - Medical Genetics. New Medical Genetics Findings from School of Psychiatry Described (Sleep disturbance in Mowat–Wilson syndrome) … p.4579

Genetics - Medical Genetics. New Medical Genetics Study Findings Reported from Technion–Israel Institute of Technology (Is One Diagnosis the Whole Story? Patients with Double Diagnoses) … p.4580

Health and Medicine - Medicinal Chemistry. New Medicinal Chemistry Findings Has Been Reported by Investigators at Shanghai Jiao–Tong University (Screening and biological evaluation of a novel STAT3 signaling pathway inhibitor against cancer) … p.4581

Health and Medicine - Medicinal Chemistry. New Medicinal Chemistry Findings from University of Birmingham Outlined (Nucleoside Phosphate and Phosphonate Prodrug Clinical Candidates) … p.4582

Health and Medicine - Medicinal Chemistry. New Medicinal Chemistry Study Findings Have Been Reported by Investigators at Academy of Sciences (Synthesis and biological evaluation of novel 2–imino–4–thiazolidinone derivatives as potent anti–cancer agents) … p.4583

Oncology - Melanoma. New Melanoma Data Have Been Reported by Researchers at University of Sao Paulo (Genotyping and differential expression analysis of inflammasome genes in sporadic malignant melanoma reveal novel contribution of CARD8, IL1B and IL18 in melanoma ...) … p.4584

www.NewsRx.com

Oncology - Melanoma. New Melanoma Findings Reported from Tufts University (Brachytherapy vs. external beam radiotherapy for choroidal melanoma: Survival and patterns–of–care analyses) … p.4585

Oncology - Melanoma. New Melanoma Study Findings Reported from University of Chicago (Density of immunogenic antigens does not explain the presence or absence of the T–cell–inflamed tumor microenvironment in melanoma) … p.4586

Oncology - Melanoma. New Melanoma Study Results from University Hospital Described (Noncutaneous Melanomas: A Single–Center Analysis) … p.4587

Membrane Proteins - Membrane Glycoproteins. New Membrane Glycoproteins Findings Have Been Reported by Investigators at University of Melbourne [Novel mechanism of modulation at a ligand–gated ion channel; action of 5–Cl–indole at the 5–HT(3)A receptor] … p.4588

Proteins - Membrane Proteins. New Membrane Proteins Findings from University of California Described (Modeling Membrane Protein–Ligand Binding Interactions: The Human Purinergic Platelet Receptor) … p.4589

Central Nervous System Diseases and Conditions - Meningeal Neoplasms. New Meningeal Neoplasms Findings from King's College Hospital Discussed (Comparative gene expression profiling of ADAMs, MMPs, TIMPs, EMMPRIN, EGF–R and VEGFA in low grade meningioma) … p.4590

Central Nervous System Diseases and Conditions - Meningeal Neoplasms. New Meningeal Neoplasms Study Findings Have Been Reported from University of California (Expression and prognostic impact of immune modulatory molecule PD–L1 in meningioma) … p.4591
Mental Health. New Mental Health Study Findings Recently Were Reported by Researchers at College of Nursing (Interventions to encourage uptake of cancer screening for people with severe mental illness) … p.4592

Stem Cell Research - Mesenchymal Stem Cells. New Mesenchymal Stem Cells Study Findings Have Been Reported by Investigators at Biotechnology Research Institute (Human umbilical cord–derived mesenchymal stem cells in acute liver injury: Hepatoprotective efficacy, subchronic toxicity, ...) … p.4593

Stem Cell Research - Mesenchymal Stem Cells. New Mesenchymal Stem Cells Study Results Reported from C. Pontikoglou et al Described (CD200 expression in human cultured bone marrow mesenchymal stem cells is induced by pro–osteogenic and pro–inflammatory cues) … p.4594

Metabolic Diseases. New Metabolic Diseases Findings from Salk Institute for Biological Studies Outlined (Circadian physiology of metabolism) … p.4595

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. New Metabolic Syndrome Study Findings Have Been Reported by Investigators at Weill Cornell Medical College (The Metabolic Role of the Microbiome: Implications for NAFLD and the Metabolic Syndrome) … p.4596

Central Nervous System - Metencephalon. New Metencephalon Study Results Reported from University of Salerno (Synthesis and pharmacological evaluation of functionalized isoindolinones on GABA–activated chloride currents in rat cerebellum granule cells in culture) … p.4597

Life Science Research - Microbiology. New Microbiology Study Findings Recently Were Reported by Researchers at University of Santiago (Characterization of the microbiota associated to Pecten maximus gonads using 454–pyrosequencing) … p.4598

Central Nervous System Diseases and Conditions - Middle Cerebral Artery Infarction. New Middle Cerebral Artery Infarction Data Have Been Reported by Investigators at Mashhad University of Medical Sciences (Aqueous and Ethanolic Extracts of Boswellia serrata Protect Against Focal Cerebral Ischemia and Reperfusion Injury in Rats) … p.4599

Drugs and Therapies - Mitotic Inhibitors. New Mitotic Inhibitors Study Results Reported from University of Tehran (Specific targeting delivery to MUC1 overexpressing tumors by albumin–chitosan nanoparticles conjugated to DNA aptamer) … p.4600

Life Science Research - Molecular Biology. New Molecular Biology Findings Reported from Fujian Agriculture and Forestry University (Cytotoxic, Antitumor and Immunomodulatory Effects of the Water–Soluble Polysaccharides from Lotus (Nelumbo nucifera Gaertn.) Seeds) … p.4601

Oncology - Molecular Cancer and Carcinogenesis. New Molecular Cancer and Carcinogenesis Data Have Been Reported by Researchers at Kinki University (Significance of FGF9 gene in resistance to anti–EGFR therapies targeting colorectal cancer: A subset of colorectal cancer patients with FGF9 ...) … p.4602

Proteins - Molecular Chaperones. New Molecular Chaperones Study Findings Reported from J. Lee and Co–Authors (Heat Shock Protein 90 Regulates Subcellular Localization of Smads in Mv1Lu Cells) … p.4603

Life Science Research - Molecular Genetics. New Molecular Genetics Findings from Gazi University Described (Molecular analysis of the AGXT gene in patients suspected with hyperoxaluria type 1 and three novel mutations from Turkey) … p.4604
Jan 14, 2017

Biotechnology - Molecular Pharmaceutics.
New Molecular Pharmaceutics Data Have Been Reported by Researchers at Guangzhou University (Improving Therapeutic Potential of Farnesylthiosalicylic Acid: Tumor Specific Delivery via Conjugation with Heptamethine Cyanine Dye) … p.4605

Biotechnology - Molecular Therapeutics.
New Molecular Therapeutics Findings from I. Petta and Co–Researchers Described (Modulation of Protein–Protein Interactions for the Development of Novel Therapeutics) … p.4606

Biotechnology - Molecular Therapeutics.
New Molecular Therapeutics Findings from University of Minnesota Described (Evaluation of TCR Gene Editing Achieved by TALENs, CRISPR/Cas9, and megaTAL Nucleases) … p.4606

Life Science Research - Molecular and Cellular Biology.
New Molecular and Cellular Biology Data Have Been Reported by A. Gubern and Co–Authors (The N–Terminal Phosphorylation of RB by p38 Bypasses Its Inactivation by CDKs and Prevents Proliferation in Cancer Cells) … p.4607

Drugs and Therapies - Monoclonal Antibodies.
New Monoclonal Antibodies Data Have Been Reported by Investigators at University of Verona (Teriparatide and denosumab combination therapy and skeletal metabolism) … p.4608

Immunology - Mononuclear Phagocyte System.
New Mononuclear Phagocyte System Study Findings Have Been Reported by Researchers at University of Kansas Medical Center (Serine 574 phosphorylation alters transcriptional programming of FOXO3 by selectively enhancing apoptotic gene expression) … p.4609

Neurodegenerative Diseases and Conditions - Motor Neuron Disease.
New Motor Neuron Disease Findings from University of Science and Technology Reported (cIAPs promote the proteasomal degradation of mutant SOD1 linked to familial amyotrophic lateral sclerosis) … p.4610

Central Nervous System Diseases and Conditions - Moyamoya Disease.
New Moyamoya Disease Study Results Reported from Keio University (Homozygosity for Moyamoya Disease Risk Allele Leads to Moyamoya Disease with Extracranial Systemic and Pulmonary Vasculopathy) … p.4611

Oncology - Multiple Myeloma.
New Multiple Myeloma Findings Has Been Reported by Investigators at University of Belgrade (Prognostic Significance of Cereblon Expression in Patients With Multiple Myeloma) … p.4613

Oncology - Multiple Myeloma.
New Multiple Myeloma Findings from Celgene Outlined (A Dual Color Immunohistochemistry Assay for Measurement of Cereblon in Multiple Myeloma Patient Samples) … p.4614

Oncology - Multiple Myeloma.
New Multiple Myeloma Findings from Southern Medical University Described (Characterization of gamma delta regulatory T cells from peripheral blood in patients with multiple myeloma) … p.4615

Oncology - Multiple Myeloma.
New Multiple Myeloma Study Findings Have Been Reported by Investigators at University College (17P deleted multiple myeloma presenting with intracranial disease: durable remission after tailored management) … p.4616

Multiple Myeloma.
New Multiple Myeloma Study Findings Have Been Reported by J.K. Zhang and Colleagues (Design, synthesis and biological evaluation of novel non–covalent piperidine–containing peptidyl proteasome inhibitors) … p.4617
Oncology - Multiple Myeloma. New Multiple Myeloma Study Findings Have Been Reported by Researchers at Division of Genetics and Cell Biology (Assessing Heterogeneity of Osteolytic Lesions in Multiple Myeloma by H–1 HR–MAS NMR Metabolomics) … p.4618

Oncology - Multiple Myeloma. New Multiple Myeloma Study Findings Reported from Mayo Clinic (Myelomatous Involvement of the Central Nervous System) … p.4619

Oncology - Multiple Myeloma. New Multiple Myeloma Study Findings Reported from Tongji University (Pterostilbene Inhibits Human Multiple Myeloma Cells via ERK1/2 and JNK Pathway In Vitro and In Vivo) … p.4620

Autoimmune Diseases and Conditions - Multiple Sclerosis. New Multiple Sclerosis Findings from Harvard School of Medicine Discussed (Environmental control of autoimmune inflammation in the central nervous system) … p.4621

Autoimmune Diseases and Conditions - Multiple Sclerosis. New Multiple Sclerosis Study Findings Reported from University of Rijeka (Angiotensin–converting enzyme insertion/deletion gene polymorphism in multiple sclerosis: a meta–analysis) … p.4622

Autoimmune Diseases and Conditions - Multiple Sclerosis. New Multiple Sclerosis Study Results from NeuroCure Clinical Research Center Described (Analysis of Lymphocytic DNA Damage in Early Multiple Sclerosis by Automated Gamma–H2AX and 53BP1 Foci Detection: A Case Control Study) … p.4623

Musculoskeletal Diseases and Conditions - Muscular Atrophy. New Muscular Atrophy Findings from Cleveland Clinic Outlined (Sarcopenia from mechanism to diagnosis and treatment in liver disease) … p.4624

www.NewsRx.com

Autoimmune Diseases and Conditions - Myasthenia Gravis. New Myasthenia Gravis Findings from University of Athens School of Medicine Reported (Future perspectives in target–specific immunotherapies of myasthenia gravis) … p.4625

Myeloid Cells. New Myeloid Cells Findings from Chinese Academy of Sciences Described [Crucial Role of P2X(7) Receptor in Regulating Exocytosis of Single–Walled Carbon Nanotubes in Macrophages] … p.4626

Oncology - Myeloid Leukemia. New Myeloid Leukemia Findings from University of Munster Reported (Myeloid leukemia with transdifferentiation plasticity developing from T–cell progenitors) … p.4627

Heart Disorders and Diseases - Myocardial Ischemia. New Myocardial Ischemia Findings from Ehime University Described (Optimal Scan Time for Single–Phase Myocardial Computed Tomography Perfusion to Detect Myocardial Ischemia – Derivation Cohort From Dynamic Myocardial Computed Tomography Perfusion) … p.4628

Nanotechnology - Nanomaterials. New Nanomaterials Study Findings Recently Were Reported by Researchers at Research Institute (Effects of dose volume and delivery device on bronchoalveolar lavage parameters of intratracheally administered nano–sized TiO2 in rats) … p.4629

Nanotechnology - Nanoparticles. New Nanoparticles Findings from Academy of Sciences Described (Amplified Fluorescence from Polyfluorene Nanoparticles with Dual State Emission and Aggregation Caused Red Shifted Emission for Live Cell Imaging and Cancer Theraonostics) … p.4630
January 14, 2017

Nanotechnology - Nanoparticles. New Nanoparticles Findings from Swinburne University of Technology Described (Microwave–assisted formulation of solid lipid nanoparticles loaded with non–steroidal anti–inflammatory drugs) … p.4631

Nanotechnology. New Nanotechnology Study Findings Reported from State Key Laboratory of Environmental Chemistry and Ecotoxicology [Improved In Vitro and In Vivo Biocompatibility of Graphene Oxide through Surface Modification: Poly(Acrylic …] … p.4632

Neovascularization. New Neovascularization Findings from Department of Ophthalmology Discussed (Lack of netrin–4 modulates pathologic neovascularization in the eye) … p.4633

Nephrology. New Nephrology Study Findings Have Been Reported by Investigators at University of Crete (Micro–RNA analysis of renal biopsies in human lupus nephritis demonstrates up–regulated miR–422a driving reduction of kallikrein–related peptidase 4) … p.4634

Nephrology. New Nephrology Study Findings Have Been Reported by Investigators at University of Palermo (Association Between Uric Acid and Renal Hemodynamics: Pathophysiological Implications for Renal Damage in Hypertensive Patients) … p.4635

Nephrology. New Nephrology Study Findings Have Been Reported by Researchers at Medical University (Renal microRNA– and RNA–profiles in progressive chronic kidney disease) … p.4636

Nephropathy. New Nephropathy Study Findings Have Been Reported from Jilin University [Increased ratio of ICOS(+) /PD–1(+) follicular helper T cells positively correlates with the development of human idiopathic membranous nephropathy] … p.4637

www.NewsRx.com

Oncology - Neuroblastomas. New Neuroblastomas Findings from Fudan University Discussed (Wip1 inhibitor GSK2830371 inhibits neuroblastoma growth by inducing Chk2/p53–mediated apoptosis) … p.4639

Oncology - Neuroblastomas. New Neuroblastomas Study Results Reported from University of Rome (Neuroblastoma: oncogenic mechanisms and therapeutic exploitation of necroptosis) … p.4640

Oncology - Neuroectodermal Tumors. New Neuroectodermal Tumors Findings from University of Texas Outlined (Activity of c–Met/ALK Inhibitor Crizilinib and Multi–Kinase VEGF Inhibitor Pazopanib in Metastatic Gastrointestinal Neuroectodermal Tumor Harboring EINSR1–CREB1 Fusion) … p.4642

Oncology - Neuroendocrine Cancer. New Neuroendocrine Cancer Data Have Been Reported by Researchers at Chiba University (Expression of Sex Determining Region Y–Box 2 and Pancreatic and Duodenal Homeobox 1 in Pancreatic Neuroendocrine Tumors) … p.4643
Oncology - Neuroendocrine Cancer. New Neuroendocrine Cancer Findings from Uppsala University Outlined (Somatostatin analogues in acromegaly and gastroenteropancreatic neuroendocrine tumours: past, present and future) … p.4644

Neuroimaging. New Neuroimaging Study Findings Have Been Reported by Investigators at National Hospital (Megalencephaly, polymicrogyria and ribbon–like band heterotopia: A new cortical malformation) … p.4646

Autoimmune Diseases and Conditions - Neuromyelitis Optica. New Neuromyelitis Optica Study Findings Reported from Central South University [CD14(+) CD16(++) monocytes are increased in patients with NMO and are selectively suppressed by glucocorticoids therapy] … p.4649

www.NeurosRx.com

Neurons. New Neurons Data Have Been Reported by Investigators at Israel Naval Medical Institute (Evidence for the infiltration of gas bubbles into the arterial circulation and neuronal injury following "yo–yo" dives in pigs) … p.4650

Neuroscience - Neurophysiology. New Neurophysiology Study Findings Recently Were Reported by Researchers at Vanderbilt University (Developmental experience–dependent plasticity in the first synapse of the Drosophila olfactory circuit) … p.4650

Neutral Amino Acids. New Neutral Amino Acids Findings from University of Texas Discussed (Targeting Stromal Glutamine Synthetase in Tumors Disrupts Tumor Microenvironment–Regulated Cancer Cell Growth) … p.4651

Leukocyte Diseases and Conditions - Neutropenia. New Neutropenia Findings from M. Aapro and Colleagues Discussed (Predictive modeling of the outcomes of chemotherapy–induced (febrile) neutropenia prophylaxis with biosimilar filgrastim (MONITOR–GCSF study)) … p.4652

Nitrosourea Compounds. New Nitrosourea Compounds Findings from H. Fisli and Co–Researchers Reported (Spectrofluorimetric determination of the antineoplastic agent lomustine based on the sensitizing effect of b–cyclodextrin) … p.4654

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Data Have Been Reported by I. Sullivan and Co–Authors (ALK inhibitors in non–small cell lung cancer: the latest evidence and developments) … p.4656

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Data Have Been Reported by Researchers at University of Texas (Auranofin–mediated inhibition of PI3K/AKT/mTOR axis and anticancer activity in non–small cell lung cancer cells) … p.4657

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Findings from Arnau de Vilanova University Hospital Described (Eventual role of EGFR–tyrosine kinase inhibitors in early–stage non–small–cell lung cancer) … p.4658

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Findings from Kyung Hee University Described (Decursin enhances TRAIL–induced apoptosis through oxidative stress mediated– endoplasmic reticulum stress signalling in non–small cell lung cancers) … p.4659

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Findings from Kyushu University Described (Clinical implications of sarcopenia in patients undergoing complete resection for early non–small cell lung cancer) … p.4660

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Findings from School of Life Science and Technology Described (MARVELD1 Modulates Cell Surface Morphology and Suppresses Epithelial–Mesenchymal Transition in Non–Small Cell Lung Cancer) … p.4661

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Findings from University of Palermo Reported (Exosomes isolation and characterization in serum is feasible in non–small cell lung cancer patients: critical analysis of evidence and potential role in clinical ...) … p.4662

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Findings Have Been Reported by Investigators at Huazhong University of Science and Technology (HMGB1 induces human non–small cell lung cancer cell motility by activating integrin alpha v beta 3/FAK through ...) … p.4663

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Findings Have Been Reported by Investigators at Oslo University Hospital (Estrogen receptor expression and gene promoter methylation in non–small cell lung cancer – a short report) … p.4664

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Findings Recently Were Reported by Researchers at China Medical University and Hospital (Overexpression of CASS4 promotes invasion in non–small cell lung cancer by activating the AKT signaling pathway and ...) … p.4665

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Findings Recently Were Reported by Researchers at Faculty of Medicine (MEK inhibitors against MET–amplified non–small cell lung cancer) … p.4666

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Findings Recently Were Reported by Researchers at Jiangsu University (The functional status of DNA repair pathways determines the sensitization effect to cisplatin in non–small cell lung cancer cells) … p.4667
Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Results Reported from Department of Surgery (Clinical Staging of Stage I Non–Small Cell Lung Cancer in the Netherlands–Need for Improvement in an Era With Expanding Nonsurgical Treatment Options: Data From ...) … p.4668

Oncology - Non-Small Cell Lung Cancer.
New Non–Small Cell Lung Cancer Study Results from Shanghai Jiao–Tong University Described (Nrf2 but not autophagy inhibition is associated with the survival of wild–type epidermal growth factor receptor non–small cell lung cancer cells) … p.4669

Nosocomial Infections. New Nosocomial Infections Study Findings Reported from Shanghai Jiao–Tong University (Systematic Mutational Analysis of Histidine Kinase Genes in the Nosocomial Pathogen Stenotrophomonas maltophilia Identifies BfmAK System Control of Biofilm ...) … p.4670

Proteins - Nucleoproteins. New Nucleoproteins Findings from Fudan University Described (Distinct roles of the histone chaperones NAP1 and NRP and the chromatin–remodeling factor INO80 in somatic homologous recombination in Arabidopsis thaliana) … p.4672

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings Has Been Reported by Investigators at Biomedical Research Institute (Prenatal nutrition and the risk of adult obesity: Long–term effects of nutrition on epigenetic mechanisms regulating gene expression) … p.4675

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings Has Been Reported by Investigators at Kuwait Institute for Scientific Research (Total Energy Expenditure in Obese Kuwaiti Primary School Children Assessed by the Doubly–Labeled Water Technique) … p.4676

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from Centers for Disease Control and Prevention Discussed (The role of obesity in the relation between total water intake and urine osmolality in US adults, 2009–2012) … p.4677

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from Monash University Described (Circadian regulation of lipid metabolism) … p.4678

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from Rutgers State University Outlined (High phenolics Rutgers Scarlet Lettuce improves glucose metabolism in high fat diet–induced obese mice) … p.4679

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from University of Chicago Described (Relationship Between Obesity, Hypertension, and Aldosterone Production in Postmenopausal African American Women: A Pilot Study) … p.4680
Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Findings from University of Minnesota Outlined (Meal Replacements Followed by Topiramate for the Treatment of Adolescent Severe Obesity: A Pilot Randomized Controlled Trial) ... p.4681

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Have Been Reported by Researchers at Auckland University of Technology (Family-Centered Brief Intervention for Reducing Obesity and Cardiovascular Disease Risk: A Randomized Controlled Trial) ... p.4682

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Findings Have Been Reported from Department of Pediatrics (Setting Adolescents Up for Success: Promoting a Policy to Delay High School Start Times) ... p.4683

Nutritional and Metabolic Diseases and Conditions - Obesity. New Obesity Study Results from University of Arkansas Described (Obese Mice Fed a Diet Supplemented with Enzyme–Treated Wheat Bran Display Marked Shifts in the Liver Metabolome Concurrent with Altered Gut Bacteria) ... p.4684

Obesity, Fitness and Wellness. New Obesity, Fitness and Wellness Findings from KACST Discussed (Revisiting the morbid genome of Mendelian disorders) ... p.4685

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. New Obstructive Sleep Apnea Findings from Fujian Medical University Discussed (Assessment of Upper–Airway Configuration in Obstructive Sleep Apnea Syndrome With Computed Tomography Imaging During Muller Maneuver) ... p.4687

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. New Obstructive Sleep Apnea Findings from Jilin University Described (Obstructive sleep apnea syndrome is a risk factor of hypertension) ... p.4689

Eye Diseases and Conditions - Ocular Hypertension. New Ocular Hypertension Study Findings Reported from University of Iowa (Glaucoma Risk Alleles in the Ocular Hypertension Treatment Study) ... p.4690

Oncology. New Oncology Findings from Sun Yat Sen University Described (FABP5 correlates with poor prognosis and promotes tumor cell growth and metastasis in cervical cancer) ... p.4691

Oncology. New Oncology Study Findings Have Been Reported by Investigators at University of Turku (Measuring trust in nurses – Psychometric properties of the Trust in Nurses Scale in four countries) ... p.4692

Oncology. New Oncology Study Findings Have Been Reported by Researchers at Institute for Cancer Research and Treatment (IRCCS) (Toward the molecular dissection of peritoneal pseudomyxoma) ... p.4693

Oncology. New Oncology Study Findings Have Been Reported by Researchers at Warsaw University of Life Sciences (The biology of extracellular vesicles with focus on platelet microparticles and their role in cancer development and progression) ... p.4694
Oncology. New Oncology Study Findings Have Been Reported from University of Torino (Oncogenic kinase fusions: an evolving arena with innovative clinical opportunities) … p.4695

Oncology. New Oncology Study Findings Recently Were Reported by Researchers at University of Oxford (Notch signaling: its roles and therapeutic potential in hematological malignancies) … p.4695

Eye Diseases and Conditions - Open–Angle Glaucoma. New Open–Angle Glaucoma Findings from Brigham and Women’s Hospital Outlined (Prospective Study of Oral Health and Risk of Primary Open–Angle Glaucoma in Men Data from the Health Professionals Follow–up Study) … p.4696

Drugs and Therapies - Ophthalmic Glaucoma Agents. New Ophthalmic Glaucoma Agents Study Results Reported from King’s College (Reversal of cardiac vagal effects of physostigmine by adjunctive muscarinic blockade) … p.4697

Eye Diseases and Conditions - Optic Neuritis. New Optic Neuritis Study Findings Have Been Reported from University of Buenos Aires (Neuroprotective effect of melatonin in experimental optic neuritis in rats) … p.4699

Oncology - Oral Cancer. New Oral Cancer Study Results Reported from Fukuoka Dental College (Factors affecting volume change of myocutaneous flaps in oral cancer) … p.4702

Oncology - Oral Squamous Cell Carcinoma. New Oral Squamous Cell Carcinoma Findings from University of Coimbra Outlined (WT1, MSH6, GATA5 and PAX5 as epigenetic oral squamous cell carcinoma biomarkers – a short report) … p.4703

Oncology - Oral Squamous Cell Carcinoma. New Oral Squamous Cell Carcinoma Study Findings Recently Were Reported by Researchers at Shanghai Jiao–Tong University (High Vimentin Expression Associated with Lymph Node Metastasis and Predicated a Poor Prognosis in Oral Squamous Cell …) … p.4704

Organelles. New Organelles Findings Reported from Rutgers State University (Toxicity of ricin A chain is reduced in mammalian cells by inhibiting its interaction with the ribosome) … p.4705

Musculoskeletal Diseases and Conditions - Osteogenesis Imperfecta. New Osteogenesis Imperfecta Study Results Reported from McGill University (DNA sequence analysis in 598 individuals with a clinical diagnosis of osteogenesis imperfecta: diagnostic yield and mutation spectrum) … p.4706

Musculoskeletal Diseases and Conditions - Osteoporosis. New Osteoporosis Findings from University of Putra Malaysia Described (Piper sarmentosum Effects on 11 beta–Hydroxysteroid Dehydrogenase Type 1 Enzyme in Serum and Bone in Rat Model of Glucocorticoid–Induced Osteoporosis) … p.4707
January 14, 2017

**Oncology - Osteosarcomas. New**

**Oncology - Osteosarcomas. New**
Osteosarcomas Study Findings Have Been Reported by Investigators at Zhengzhou University (Upregulation of miR–192 inhibits cell growth and invasion and induces cell apoptosis by targeting TCF7 in human osteosarcoma) … p.4709

**Oncology - Osteosarcomas. New**
Osteosarcomas Study Findings Have Been Reported from Guangzhou University (Curcumin Promotes Osteosarcoma Cell Death by Activating miR–125a/ERR Signal Pathway) … p.4710

**Pacemakers. New Pacemakers Study**
Findings Recently Were Reported by Researchers at Emory University (How to Implant a Leadless Pacemaker With a Tine–Based Fixation) … p.4711

**Pacemakers. New Pacemakers Study**

**Neurologic Manifestations - Pain. New**
Pain Findings from School of Medicine Described (Propacetamol–Induced Injection Pain Is Associated with Activation of Transient Receptor Potential Vanilloid 1 Channels) … p.4712

**Neurologic Manifestations - Pain. New**
Pain Study Findings Have Been Reported by Investigators at Federal University (Pain–depression dyad induced by reserpine is relieved by p,p’–methoxyl–diphenyl diselenide in rats) … p.4720

www.NewsRx.com

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Data Have Been Reported by Researchers at Osaka City University Graduate School of Medicine (Molecular targets for the treatment of pancreatic cancer: Clinical and experimental studies) … p.4714

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Findings Reported from Skane University Hospital (Immune checkpoint therapy for pancreatic cancer) … p.4715

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Findings from National Taiwan University Described (Association of radiotherapy with favorable prognosis in daily clinical practice for treatment of locally advanced and metastatic pancreatic cancer) … p.4716

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Findings from Tongji University Outlined (Hippo transducer TAZ promotes epithelial mesenchymal transition and supports pancreatic cancer progression) … p.4717

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Findings from University of Cambridge Described (GEMMs as preclinical models for testing pancreatic cancer therapies) … p.4718

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Study Findings Have Been Reported by Investigators at Kyushu University (CD146 Attenuation in Cancer–Associated Fibroblasts Promotes Pancreatic Cancer Progression) … p.4719

**Oncology - Pancreatic Cancer. New**
Pancreatic Cancer Study Findings Have Been Reported by Investigators at Shanghai Jiao–Tong University (Arginine Methylation of MDH1 by CARM1 Inhibits Glutamine Metabolism and Suppresses Pancreatic Cancer) … p.4720
Oncology - Pancreatic Cancer. New Pancreatic Cancer Study Findings Have Been Reported by Investigators at University of Witwatersrand (Anti–LRP/LR–specific antibody IgG1–iS18 impedes adhesion and invasion of pancreatic cancer and neuroblastoma cells) ... p.4721

Oncology - Pancreatic Cancer. New Pancreatic Cancer Study Findings Have Been Reported by T. Han and Colleagues (Long Non–Coding RNA: An Emerging Paradigm of Pancreatic Cancer) ... p.4722

Oncology - Pancreatic Cancer. New Pancreatic Cancer Study Results Reported from Nagasaki University (No–touch isolation techniques for pancreatic cancer) ... p.4723

Oncology - Pancreatic Cancer. New Pancreatic Cancer Study Results from Turgut Ozal University Described (Investigation of the expression of RIF1 gene on head and neck, pancreatic and brain cancer and cancer stem cells) ... p.4724

Tumor Virus Infections - Papillomavirus Infections. New Papillomavirus Infections Findings from Beijing University Reported (Human papillomavirus infection mechanism and vaccine of vulva carcinoma) ... p.4725

Nervous System Diseases and Conditions - Paralysis. New Paralysis Findings Recently Were Reported by C. Ingels and Co–Researchers (The pattern recognition molecule collectin–L1 in critically ill children) ... p.4729

Inflammatory Diseases and Conditions - Pelvic Inflammatory Disease. New Pelvic Inflammatory Disease Study Findings Recently Were Reported by Researchers at University of Copenhagen (Increased risk of borderline ovarian tumors in women with a history of pelvic inflammatory disease: A nationwide population–based ...) ... p.4730

Enzymes and Coenzymes - Peptide Hydrolases. New Peptide Hydrolases Study Findings Have Been Reported from University of Oxford (Metalloprotease SPRTN/DVC1 Orchestrates Replication–Coupled DNA–Protein Crosslink Repair) ... p.4731

Peptides and Proteins. New Peptides and Proteins Findings Has Been Reported by Investigators at Yeungnam University (Therapeutic importance of peptides from marine source: A mini review) ... p.4732

Peptides and Proteins. New Peptides and Proteins Findings from University of Oxford Discussed (Drosophila sensory cilia lacking MKS proteins exhibit striking defects in development but only subtle defects in adults) ... p.4733
Peptides and Proteins. New Peptides and Proteins Findings from Virginia Commonwealth University Reported (Multi–kinase inhibitors can associate with heat shock proteins through their NH2–termini by which they suppress chaperone function) … p.4734

Percutaneous Coronary Intervention. New Percutaneous Coronary Intervention Study Findings Recently Were Reported by Researchers at Johns Hopkins University (Patients without ST elevation after return of spontaneous circulation may benefit from emergent percutaneous intervention: ...) … p.4735

Health and Medicine - Peripheral Nervous System Research. New Peripheral Nervous System Research Data Have Been Reported by Researchers at Xiangya Hospital (MFN2–related genetic and clinical features in a cohort of Chinese CMT2 patients) … p.4736

Personalized Medicine. New Personalized Medicine Study Results from KRIBB Described (Application of cancer–associated glycoforms and glycan–binding probes to an in vitro diagnostic multivariate index assay for precise diagnoses of cancer) … p.4737

Drugs and Therapies - Pharmaceutical Research. New Pharmaceutical Research Findings Has Been Reported by Investigators at University of Hamburg (Multispectral UV imaging for surface analysis of MUPS tablets with special focus on the pellet distribution) … p.4738

Drugs and Therapies - Pharmaceutical Research. New Pharmaceutical Research Study Findings Have Been Reported by Investigators at Ewha Woman's University (Transcriptional modulation of regulatory T cell development by novel regulators NR4As) … p.4739

Drugs and Therapies - Pharmacoepidemiology and Drug Safety. New Pharmacoepidemiology and Drug Safety Data Have Been Reported by Researchers at Ajou University (Provider risk factors for medication administration error alerts: analyses of a large–scale closed–loop medication administration system using ...) … p.4740

Pharmacokinetics. New Pharmacokinetics Findings from Wenzhou Medical University Discussed (A Simple and Rapid UPLC Method for the Determination of Rosavin in Rat Plasma and Its Application to a Pharmacokinetic Study) … p.4741

Pharmacokinetics. New Pharmacokinetics Study Findings Have Been Reported by Investigators at Taussig Cancer Institute (Pharmacokinetically Guided Dosing of Oral Drugs: True Precision Oncology?) … p.4742

Pharmacokinetics. New Pharmacokinetics Study Findings Reported from University Medical Center (Heritability of Caffeine Metabolism: Environmental Effects Masking Genetic Effects on CYP1A2 Activity but Not on NAT2) … p.4742

Drugs and Therapies - Pharmacology and Physiology. New Pharmacology and Physiology Study Findings Have Been Reported by Researchers at Georgia State University [17–(allylamino)−17–demethoxygeldanamycin drives Hsp70 expression but fails to improve morphological or functional recovery in injured …] … p.4743

Drugs and Therapies - Pharmacy Practice. New Pharmacy Practice Findings from M.E. Sanders and Co–Researchers Described (Probiotic use in at–risk populations) … p.4744

Phenothiazines. New Phenothiazines Findings Reported from University of Tehran (Evaluation of photo–activated disinfection effectiveness with methylene blue against Porphyromonas gingivalis involved in endodontic infection: An in vitro study) … p.4746

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). New Phosphotransferases (Alcohol Group Acceptor) Study Findings Reported from Federal University (QSAR Models Guided by Molecular Dynamics Applied to Human Glucokinase Activators) … p.4747

Chemistry - Physical Chemistry. New Physical Chemistry Data Have Been Reported by Researchers at University of Maryland (Constant pH Molecular Dynamics Reveals pH–Modulated Binding of Two Small–Molecule BACE1 Inhibitors) … p.4748

Physical Fitness. New Physical Fitness Study Results Reported from Aalborg University (Association Between Physical Fitness and Academic Achievement in a Cohort of Danish School Pupils) … p.4749

Physiology, Nutrition and Metabolism. New Physiology, Nutrition and Metabolism Study Findings Have Been Reported by Researchers at University of Porto (Exercise mitigates mitochondrial permeability transition pore and quality control mechanisms alterations in nonalcoholic …) … p.4750

Platinum Compounds. New Platinum Compounds Findings Reported from Department of Pharmacology (Edaravone alleviates cisplatin–induced neurobehavioral deficits via modulation of oxidative stress and inflammatory mediators in the rat hippocampus) … p.4755

Platinum Compounds. New Platinum Compounds Study Findings Have Been Reported from City University of Hong Kong [A Platinum(IV) Anticancer Prodrug Targeting Nucleotide Excision Repair To Overcome Cisplatin Resistance] … p.4756

Lung Diseases and Conditions - Pneumonia. New Pneumonia Study Findings Reported from J. Hoffmann and Co–Authors (Viral and bacterial co–infection in severe pneumonia triggers innate immune responses and specifically enhances IP–10: a
January 14, 2017

**Hematologic Diseases and Conditions - Polycythemia.** New Polycythemia Study Findings Recently Were Reported by Researchers at Eunice Kennedy Shriver National Institute of Child Health and Human Development (Novel insights into the polycythemia–paraganglioma–somatostatinoma syndrome) ... p.4758

**Polyethylene Glycols.** New Polyethylene Glycols Findings from University of Belgrade Outlined (Lignin model compound in alginate hydrogel: a strong antimicrobial agent with high potential in wound treatment) ... p.4760

**Membrane Proteins - Polymyxins.** New Polymyxins Findings from Monash University Discussed (p53 Mediates Colistin–Induced Autophagy and Apoptosis in PC–12 Cells) ... p.4761

**Membrane Proteins - Porins.** New Porins Study Findings Recently Were Reported by M.M. Al–bataineh and Co–Researchers (Activation of the metabolic sensor AMP–activated protein kinase inhibits aquaporin–2 function in kidney principal cells) ... p.4762

**Post-Traumatic Stress Disorders.** New Post–Traumatic Stress Disorders Study Findings Have Been Reported from University of Cape Town (Pharmacology for sleep disturbance in PTSD) ... p.4763

**Clinical Trials and Studies - Post-Trial Research.** New Post–Trial Research Findings from University Hospital Discussed (Diagnostic contribution of a second percutaneous needle biopsy in patients with spontaneous diskitis and negative blood cultures and first biopsy) ... p.4764

**Clinical Trials and Studies - Post-Trial Research.** New Post–Trial Research Study Findings Recently Were Reported by Researchers at Lankenau Institute for Medical Research (Insights from HuR biology point to potential improvement for second–line ovarian cancer therapy) ... p.4765

**Clinical Trials and Studies - Pre-Trial Research.** New Pre–Trial Research Data Have Been Reported by Investigators at University of Chicago (Treatment with methylaltrexone is associated with increased survival in patients with advanced cancer) ... p.4766

**Pregnancy Complications - Pregnancy-Induced Hypertension.** New Pregnancy–Induced Hypertension Study Findings Have Been Reported from Shandong University (Serum Beta–Trace Protein as a Novel Predictor of Pregnancy–Induced Hypertension) ... p.4767

**Peptide Proteins - Proglucagon.** New Proglucagon Findings Reported from Wageningen University (The Noncaloric Sweetener Rebaudioside A Stimulates Glucagon–Like Peptide 1 Release and Increases Enteroendocrine Cell Numbers in 2–Dimensional Mouse Organoids Derived from Different ...) ... p.4768

**Peptide Proteins - Proinsulin.** New Proinsulin Study Results Reported from E. Maseroli et al (Cardiometabolic Risk and Female Sexuality: Focus on Clitoral Vascular Resistance) ... p.4769

**Propanolamines.** New Propanolamines Findings from Indian Institute of Technology Discussed (Amino Functionalized Graphene Oxide and Polymer Nanocomposite Based Electrochemical Platform for Sensitive Assay of Anti–Doping Drug Atenolol in Biological Fluids) ... p.4770

**Propanolamines.** New Propanolamines Study Findings Recently Were Reported by Researchers at School of Medicine (Influence of CYP2D6 and b2–adrenergic receptor gene polymorphisms on the hemodynamic response to propranolol in Chinese Han patients with cirrhosis) ... p.4771
Oncology - Prostate Cancer. New Prostate Cancer Data Have Been Reported by Researchers at University Health Network (Limitations in Predicting Organ Confined Prostate Cancer in Patients with Gleason Pattern 4 on Biopsy: Implications for Active Surveillance) … p.4773

Oncology - Prostate Cancer. New Prostate Cancer Data Have Been Reported by Researchers at University of Quebec (Association between lifetime alcohol consumption and prostate cancer risk: A case–control study in Montreal, Canada) … p.4774

Oncology - Prostate Cancer. New Prostate Cancer Findings Has Been Reported by Investigators at Emory University (Neurovascular bundle–sparing radiotherapy for prostate cancer using MRI–CT registration: A dosimetric feasibility study) … p.4775

Oncology - Prostate Cancer. New Prostate Cancer Findings Reported from Nanjing University (Contrast–enhanced transrectal ultrasound for prediction of prostate cancer aggressiveness: The role of normal peripheral zone time–intensity curves) … p.4776

Oncology - Prostate Cancer. New Prostate Cancer Findings Reported from Emory University (Contrast–enhanced transrectal ultrasound for prediction of prostate cancer aggressiveness: The role of normal peripheral zone time–intensity curves) … p.4776

Oncology - Prostate Cancer. New Prostate Cancer Findings Reported from Nanjing University (Contrast–enhanced transrectal ultrasound for prediction of prostate cancer aggressiveness: The role of normal peripheral zone time–intensity curves) … p.4776

Oncology - Prostate Cancer. New Prostate Cancer Findings Reported from Emory University (Contrast–enhanced transrectal ultrasound for prediction of prostate cancer aggressiveness: The role of normal peripheral zone time–intensity curves) … p.4776

Oncology - Prostate Cancer. New Prostate Cancer Findings Has Been Reported by Researchers at University Health Network (Limitations in Predicting Organ Confined Prostate Cancer in Patients with Gleason Pattern 4 on Biopsy: Implications for Active Surveillance) … p.4773

Oncology - Prostate Cancer. New Prostate Cancer Study Findings Have Been Reported from University of Michigan (Noninvasive Ablation of Prostate Cancer Spheroids Using Acoustically–Activated Nanodroplets) … p.4780

Oncology - Prostate Cancer. New Prostate Cancer Study Findings Recently Were Reported by T. Horrill and Co–Researchers (Active surveillance in prostate cancer: a concept analysis) … p.4781

Oncology - Prostate Cancer. New Prostate Cancer Study Findings Reported from Nagoya Central Hospital (Photoselective Vaporization of the Prostate: Long–Term Outcomes and Safety During 10 Years of Follow–Up) … p.4782

Oncology - Prostate Cancer. New Prostate Cancer Study Findings Reported from Queensland University of Technology (Sex Hormone Binding Globulin Modifies Testosterone Action and Metabolism in Prostate Cancer Cells) … p.4783

Oncology - Prostate Cancer. New Prostate Cancer Study Results Reported from Johns Hopkins University (Detection of aggressive prostate cancer associated glycoproteins in urine using glycoproteomics and mass spectrometry) … p.4784

Oncology - Prostate Cancer. New Prostate Cancer Study Results Reported from Xi'an Jiao Tong University (Expression of netrin–1 by hypoxia contributes to the invasion and migration of prostate carcinoma cells by regulating YAP activity) … p.4785

Oncology - Prostate Cancer. New Prostate Cancer Study Results Reported from Technical University Described (p38 MAPK regulates the Wnt inhibitor Dickkopf–1 in osteotropic prostate cancer cells) … p.4786
Drugs and Therapies - Protease Inhibitors. New Protease Inhibitors Data Have Been Reported by Investigators at Dalian Ocean University [Polymorphism in a serine protease inhibitor gene and its association with the resistance of bay scallop (Argopecten irradians) to Listonella anguillarum …] … p.4787

Proteomics. New Proteomics Findings Reported from Houston Community College (Stimulation of Protein Expression Through the Harmonic Resonance of Frequency–Specific Music) … p.4788

Skin Diseases and Conditions - Pruritus. New Pruritus Study Findings Have Been Reported by Researchers at University of Freiburg (Pharmacological interventions for pruritus in adult palliative care patients) … p.4789

Gram-Negative Bacteria - Pseudomonas aeruginosa. New Pseudomonas aeruginosa Study Findings Have Been Reported by Researchers at University of Wisconsin (A Comparative Analysis of Synthetic Quorum Sensing Modulators in Pseudomonas aeruginosa: New Insights into Mechanism, Active Efflux …) … p.4791

Gram-Negative Bacteria - Pseudomonas aeruginosa. New Pseudomonas aeruginosa Study Findings Have Been Reported from Hartford Hospital (Population Pharmacokinetics and Safety of Ceftolozane–Tazobactam in Adult Cystic Fibrosis Patients Admitted with Acute Pulmonary Exacerbation) … p.4792

Gram-Negative Bacteria - Pseudomonas aeruginosa. New Pseudomonas aeruginosa Study Findings Reported from Sapienza University (Positively charged biopolymeric nanoparticles for the inhibition of Pseudomonas aeruginosa biofilms) … p.4793

Skin Diseases and Conditions - Psoriasis. New Psoriasis Findings from Federal University Described (Increased IL17A, IFNG, and FOXP3 Transcripts in Moderate–Severe Psoriasis: A Major Influence Exerted by IL17A in Disease Severity) … p.4794

Health and Medicine - Public Health. New Public Health Findings Has Been Reported by Investigators at University of Surrey (The impact of body vigilance on help–seeking for cancer ‘alarm’ symptoms: a community–based survey) … p.4796

Health and Medicine - Public Health Nutrition. New Public Health Nutrition Findings from University of Bergen Discussed (Local spatial clustering of stunting and wasting among children under the age of 5 years: implications for intervention strategies) … p.4797

Health and Medicine - Public Health. New Public Health Study Findings Have Been Reported by Investigators at University of Twente [Study protocol for a non–inferiority trial of a blended smoking cessation treatment versus face–to–face treatment (LiveSmokefree–Study)] … p.4798

Lung Diseases and Conditions - Pulmonary Embolism. New Pulmonary Embolism Data Have Been Reported by Researchers at McMaster University (Rapid quantitative D–dimer to exclude pulmonary embolism: a prospective cohort management study) … p.4799
Lung Diseases and Conditions - Pulmonary Embolism. New Pulmonary Embolism Findings Reported from Kyungpook National University School of Medicine (Factors determining clot resolution in patients with acute pulmonary embolism) … p.4800

Lung Diseases and Conditions - Pulmonary Embolism. New Pulmonary Embolism Findings from Juntendo University Described (CT pulmonary angiography–based scoring system to predict the prognosis of acute pulmonary embolism) … p.4801

Lung Diseases and Conditions - Pulmonary Fibrosis. New Pulmonary Fibrosis Study Findings Have Been Reported by Researchers at Central South University (TGF–b1 Upregulates the Expression of Triggering Receptor Expressed on Myeloid Cells 1 in Murine Lungs) … p.4802

Lung Diseases and Conditions - Pulmonary Hypertension. New Pulmonary Hypertension Study Results Reported from University of Chile (2–Aminoethyldiphenylborinate modifies the pulmonary circulation in pulmonary hypertensive newborn lambs partially gestated at high altitude) … p.4803

Sleep Diseases and Conditions - REM Sleep Behavior Disorder. New REM Sleep Behavior Disorder Findings from Second Military Medical UniversityOutlined (Effects of Rotigotine on REM Sleep Behavior Disorder in Parkinson Disease) … p.4804

Drugs and Therapies - Radiation Therapy. New Radiation Therapy Study Findings Recently Were Reported by Researchers at Prince of Wales Clinical School (Radiation therapy for people with cancer: what do written information materials tell them?) … p.4806

Oncology - Rectal Cancer. New Rectal Cancer Findings from University of Ulsan Described (Phase II Study of Preoperative Capecitabine and Oxaliplatin–based Intensified Chemoradiotherapy With or Without Induction Chemotherapy in Patients With Locally Advanced Rectal …) … p.4807

Oncology - Rectal Cancer. New Rectal Cancer Study Findings Have Been Reported by Investigators at Ohio State University (Neoadjuvant Therapy for Rectal Cancer Affects Lymph Node Yield and Status Without Clear Implications on Outcome: The Case for Eliminating a Metric …) … p.4809

Rehabilitation. New Rehabilitation Study Findings Have Been Reported by Investigators at Baylor University College of Medicine (Anesthetizing a child for a large compressive mediastinal mass with distraction techniques and music therapies as the sole agents) … p.4810

Reproductive Techniques. New Reproductive Techniques Findings from School of Public Health Described (Contraceptive practices among women: the second Australian study of health and relationships) … p.4811

January 14, 2017

Drugs and Therapies - Respiratory

RNA Viruses - Respiratory Syncytial Viruses. New Respiratory Syncytial Viruses Study Results from Imperial College Described (T cell responses are elicited against Respiratory Syncytial Virus in the absence of signalling through TLRs, RLRs and IL–1R/IL–18R) … p.4814

Eye Diseases and Conditions - Retinal Vein Occlusion. New Retinal Vein Occlusion Study Findings Have Been Reported by Investigators at Cukurova University (Choroidal Thickness Changes After Intravitreal Dexamethasone Implant Injection For The Treatment Of Macular Edema Due To Retinal Vein Occlusion) … p.4815

Eye Diseases and Conditions - Retinal Vein Occlusion. New Retinal Vein Occlusion Study Findings Have Been Reported from Department of Ophthalmology (Lysophosphatidic Acids And Autotaxin In Retinal Vein Occlusion) … p.4816

Eye Diseases and Conditions - Retinoblastoma. New Retinoblastoma Study Findings Reported from University of Utah [Cell–specific Kaiso (ZBTB33) Regulation of Cell Cycle through Cyclin D1 and Cyclin E1] … p.4817

Heart Disorders and Diseases - Rheumatic Heart Disease. New Rheumatic Heart Disease Findings from M.S. Sreekanth and Co–Researchers Reported (Association of IL–1 beta+ 3953 C and HLA–DRB1*15 with Coronary Artery and Rheumatic Heart Diseases in South India) … p.4819

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Rheumatoid Arthritis Findings from M. Dougados and Co–Researchers Described (Evaluation of the Disease Activity Score in Twenty–Eight Joints–Based Flare Definitions in Rheumatoid Arthritis: Data From a Three–Year Clinical Trial) … p.4820

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Rheumatoid Arthritis Study Findings Have Been Reported by Researchers at Veterans General Hospital (Rheumatoid Arthritis Risk Associated with Periodontitis Exposure: A Nationwide, Population–Based Cohort Study) … p.4822

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Rheumatoid Arthritis Study Results Reported from A. Balasubramanian et al (Glucocorticoid exposure and fracture risk in patients with new–onset rheumatoid arthritis) … p.4823

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. New Rheumatoid Arthritis Study Results from Institute for Rehabilitation Described [The–2518 A/G polymorphism in the monocyte chemoattractant protein 1 gene (MCP–1) is associated with an
increased risk of rheumatoid arthritis in Argentine ...] ... p.4824

Gram-Negative Bacteria - Rickettsia. New Rickettsia Findings Reported from Center for Disease Control and Prevention (Development of a Rickettsia bellii–Specific TaqMan Assay Targeting the Citrate Synthase Gene) ... p.4825

Rickettsia. New Rickettsia Study Findings Recently Were Reported by Researchers at Collaborative Innovation Center for Diagnosis and Treatment of Infectious Disease (Extensive genetic diversity of Rickettsiales bacteria in multiple mosquito species) ... p.4826

Risk Management. New Risk Management Study Findings Recently Were Reported by S.C. Anenberg and Co–Researchers (Survey of Ambient Air Pollution Health Risk Assessment Tools) ... p.4827

Engineering - Safety Engineering. New Safety Engineering Findings from Valencia Polytechnic University Described (Motor vehicles overtaking cyclists on two–lane rural roads: Analysis on speed and lateral clearance) ... p.4828

Gram-Negative Bacteria - Salmonella enterica. New Salmonella enterica Study Results Reported from Osaka University (Phenotype microarray analysis of the drug efflux systems in Salmonella enterica serovar Typhimurium) ... p.4829

Gram-Negative Bacteria - Salmonella typhimurium. New Salmonella typhimurium Study Findings Have Been Reported by Investigators at VIT University (Identification of Potential Therapeutics to Conquer Drug Resistance in Salmonella typhimurium: Drug Repurposing Strategy) ... p.4830

Mental Health Diseases and Conditions - Schizophrenia. New Schizophrenia Study Findings Have Been Reported from Center for Addiction and Mental Health (Genetic association analysis of N–methyl–D–aspartate receptor subunit gene GRIN2B and clinical response to clozapine) ... p.4832

Science. New Science Data Have Been Reported by Investigators at Institute of Physical Chemistry [Antibacterial and anticancer PDMS surface for mammalian cell growth using the Chinese herb extract paeonol (4–methoxy–2–hydroxyacetophenone)] ... p.4833

Science. New Science Data Have Been Reported by Investigators at University of Claude Bernard (Phosphatidylinositol 3–kinase inhibition restores Ca2+ release defects and prolongs survival in myotubularin–deficient mice) ... p.4834

Science. New Science Data Have Been Reported by Researchers at University of Tsukuba (BMP–SMAD–ID promotes reprogramming to pluripotency by inhibiting p16/INK4A–dependent senescence) ... p.4835

Science. New Science Findings Has Been Reported by Investigators at University of Seville (The role of PIM1/PIM2 kinases in tumors of the male reproductive system) ... p.4836

Science. New Science Findings Reported from Johns Hopkins University (Evolution of cellular morpho–phenotypes in cancer metastasis) ... p.4837

Science. New Science Findings from Institute of Immunology and Experimental Therapy Outlined (Mammalian Host–Versus–Phage immune response determines phage fate in vivo) ... p.4838
Science. New Science Findings from University of Gothenburg Reported (Global analysis of somatic structural genomic alterations and their impact on gene expression in diverse human cancers) ... p.4838

Science. New Science Study Findings Have Been Reported by Investigators at Institute of Animal Science (Co–expression analysis and identification of fecundity–related long non–coding RNAs in sheep ovaries) ... p.4840

Science. New Science Study Findings Have Been Reported by Researchers at Ulsan National Institute of Science and Technology (Cell Nucleus–Targeting Zwitterionic Carbon Dots) ... p.4841

Science. New Science Study Findings Recently Were Reported by Researchers at Johns Hopkins University (Evaluating the evaluation of cancer driver genes) ... p.4841

Science. New Science Study Results from Beijing Normal University Described (Applicability of drinking water treatment residue for lake restoration in relation to metal/metalloid risk assessment) ... p.4843

Proteins - Scleroproteins. New Scleroproteins Findings from University of Oslo Reported (The effect of culture medium and carrier on explant culture of human limbal epithelium: A comparison of ultrastructure, keratin profile and gene expression) ... p.4844

www.NewsRx.com

Sclerotherapy. New Sclerotherapy Study Results Reported from Children's Hospital (A Vulvovaginal Mass in a 16–Year–Old Adolescent: A Case Report) ... p.4846

Blood Diseases and Conditions - Sepsis. New Sepsis Findings from G. Rolando and Co–Researchers Described (Prognostic value of ventricular diastolic dysfunction in patients with severe sepsis and septic shock) ... p.4846

Blood Diseases and Conditions - Sepsis. New Sepsis Study Findings Have Been Reported by Researchers at Loyola University (Modulation of Interleukins in Sepsis–Associated Clotting Disorders: Interplay With Hemostatic Derangement) ... p.4847

Oncology - Serous Carcinoma. New Serous Carcinoma Data Have Been Reported by Researchers at Cleveland Clinic (Racial disparity in survival of patients with uterine serous carcinoma: Changes in clinical characteristics, patterns of care and outcomes over time from 1988 to ...) ... p.4848

Immune System Diseases and Conditions - Severe Combined Immunodeficiency. New Severe Combined Immunodeficiency Findings from University of Colorado Described (Single–Dose Primaquine in a Preclinical Model of Glucose–6–Phosphate Dehydrogenase Deficiency: Implications for Use in Malaria Transmission–Blocking Programs) ... p.4849

Digestive System Diseases and Conditions - Short Bowel Syndrome. New Short Bowel Syndrome Study Findings Recently Were Reported by Researchers at Children's Hospital (Liver steatosis induced by small bowel resection is prevented by oral vancomycin) ... p.4850
Autoimmune Diseases and Conditions - Sjogren's Syndrome. New Sjogren's Syndrome Findings from Institute of Psychology Reported (Network–assisted analysis of primary Sjogren's syndrome GWAS data in Han Chinese) … p.4851

Oncology - Skin Cancer. New Skin Cancer Data Have Been Reported by Researchers at Cancer Center (The European Status Quo in legal recognition and patient–care services of occupational skin cancer) … p.4852

Skin Diseases. New Skin Diseases Findings from Yale University Described (The X–Ray Crystal Structure of the Keratin 1–Keratin 10 Helix 2B Heterodimer Reveals Molecular Surface Properties and Biochemical Insights into Human Skin Disease) … p.4854

Small Interference RNAs (siRNAs). New Small Interference RNAs (siRNAs) Data Have Been Reported by Researchers at National University (NON–VIRAL XYLOSYLTRANSFERASE–1 siRNA DELIVERY AS AN EFFECTIVE ALTERNATIVE TO CHONDROITINASE IN AN IN VITRO MODEL OF REACTIVE ASTROCYTES) … p.4855

Small Interference RNAs (siRNAs). New Small Interference RNAs (siRNAs) Study Findings Reported from Institute of Obstetrics and Gynecology (CXCR4–targeted modular peptide carriers for efficient anti–VEGF siRNA delivery) … p.4856

Oncology - Solid Cancer. New Solid Cancer Findings Reported from R. Bahleda and Co–Authors (Phase I study of afatinib combined with nintedanib in patients with advanced solid tumours) … p.4857

Spermatozoa. New Spermatozoa Study Results Reported from University of Texas (The regulatory repertoire of PLZF and SALL4 in undifferentiated spermatogonia) … p.4858

Musculoskeletal Diseases and Conditions - Spinal Stenosis. New Spinal Stenosis Study Findings Recently Were Reported by Researchers at Tianjin Medical University General Hospital (MicroRNA–221 Regulates Hypertrophy of Ligamentum Flavum in Lumbar Spinal Stenosis by Targeting TIMP–2) … p.4859

Oncology - Squamous Cell Carcinoma. New Squamous Cell Carcinoma Findings from Faculty of Medicine Discussed (FGFR gene alterations in lung squamous cell carcinoma are potential targets for the multitargeted kinase inhibitor nintedanib) … p.4860

Oncology - Squamous Cell Carcinoma. New Squamous Cell Carcinoma Findings from Second Military Medical University Discussed (miR–214 inhibits invasion and migration via downregulating GALNT7 in esophageal squamous cell cancer) … p.4861

Oncology - Squamous Cell Carcinoma. New Squamous Cell Carcinoma Findings from Sun Yat Sen University Reported (Integrin alpha 7 is a functional cancer stem cell surface marker in esophageal squamous cell carcinoma) … p.4862

Oncology - Squamous Cell Carcinoma. New Squamous Cell Carcinoma Study Findings Recently Were Reported by F.P. Xu and Co–Researchers (Overexpression of SRC–3 promotes esophageal squamous cell carcinoma aggressiveness by enhancing cell growth and invasiveness) … p.4863

Oncology - Squamous Cell Carcinoma. New Squamous Cell Carcinoma Study Findings Recently Were Reported by Researchers at Tianjin Medical University (The unusual yin–yang fashion of RIZ1/RIZ2 contributes to the progression of esophageal squamous cell carcinoma) … p.4864
January 14, 2017

Gram-Positive Bacteria - Staphylococcus aureus. New Staphylococcus aureus Findings Reported from Department of Medicine (Diagnostic accuracy of methicillin–resistant Staphylococcus aureus nasal colonization to predict methicillin–resistant S aureus soft tissue infections) … p.4865

Gram-Positive Bacteria - Staphylococcus aureus. New Staphylococcus aureus Findings Reported from University Medical Center (Staphylococcus aureus protects its immune–evasion proteins against degradation by neutrophil serine proteases) … p.4866

Stem Cell Research. New Stem Cell Research Findings Has Been Reported by Investigators at University of California (Comparison of Endothelial Differentiation Capacities of Human and Rat Adipose–Derived Stem Cells) … p.4867

Stem Cell Research. New Stem Cell Research Findings Reported from Western Michigan University [Human B–1 and B–2 B Cells Develop from Lin (–)CD34(+)CD38(lo) Stem Cells] … p.4868

Stilbenes. New Stilbenes Findings Reported from Panjab University (QbD–Driven Development and Validation of a HPLC Method for Estimation of Tamoxifen Citrate with Improved Performance) … p.4869

Oncology - Stomach Cancer. New Stomach Cancer Findings from International Agency for Research on Cancer Outlined (Stomach cancer burden in Central and South America) … p.4870

Mouth Diseases and Conditions - Stomatitis. New Stomatitis Findings Reported from Janssen Pharmaceuticals KK [A comparison of overall survival with 40 and 50 mg/m(2) pegylated liposomal doxorubicin treatment in patients with recurrent epithelial ovarian cancer: Propensity score–matched …] … p.4871

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. New Subarachnoid Hemorrhage Study Findings Have Been Reported by M. Balbi and Co–Researchers (Acute changes in neurovascular reactivity after subarachnoid hemorrhage in vivo) … p.4872

Central Nervous System Diseases and Conditions - Subdural Hematoma. New Subdural Hematoma Findings from Virginia Commonwealth University Outlined (Tranexamic Acid for Recurring Subdural Hematomas Following Surgical Evacuation: A Clinical Case Series) … p.4873

Sudden Death. New Sudden Death Findings from Cedars–Sinai Medical Center Reported (Tpeak–to–Tend interval corrected for heart rate: A more precise measure of increased sudden death risk?) … p.4874

Sulfanilamides. New Sulfanilamides Findings from Hoshi University Described (The effect of structurally related impurities on crystallinity reduction of sulfamethazine by grinding) … p.4875

Sulfur Amino Acids. New Sulfur Amino Acids Findings from University of Geneva Described (Cysteine–specific Chemical Proteomics: From Target Identification to Drug Discovery) … p.4876

Sulfur Amino Acids. New Sulfur Amino Acids Study Results from University of Louisville Described (Homocysteine, Alcoholism, and Its Potential Epigenetic Mechanism) … p.4877

Sulfur Compounds. New Sulfur Compounds Study Findings Have Been Reported by Researchers at Anadolu University (Synthesis and Evaluation of New Benzdioxole–Based Thiosemicarbazone Derivatives as Potential Antitumor Agents) … p.4878
Sweat Gland Diseases. New Sweat Gland Diseases Study Findings Have Been Reported by Investigators at National Institutes of Health (Foxc1 Ablated Mice Are Anhidrotic and Recapitulate Features of Human Miliaria Sweat Retention Disorder) … p.4879

Takayasu’s Arteritis. New Takayasu’s Arteritis Study Findings Have Been Reported by Investigators at Beijing Union Medical College Hospital (The efficacy of Mycophenolate mofetil for the treatment of Chinese Takayasu’s arteritis) … p.4880

Heart Disorders and Diseases - Takotsubo Cardiomyopathy. New Takotsubo Cardiomyopathy Findings from University of Foggia Reported (Serum interleukin 6 and 10 levels in Takotsubo cardiomyopathy: Increased admission levels may predict adverse events at follow–up) … p.4881

Heart Disorders and Diseases - Takotsubo Cardiomyopathy. New Takotsubo Cardiomyopathy Study Results from DZHK German Center for Cardiovascular Research Described (Management of arrhythmias in patients with Takotsubo cardiomyopathy: Is the implantation of permanent devices necessary?) … p.4882

Nutritional and Metabolic Diseases and Conditions - Tay-Sachs Disease. New Tay–Sachs Disease Study Findings Have Been Reported by Researchers at University of Pennsylvania (Tay–Sachs disease mutations in HEXA target the alpha chain of hexosaminidase A to endoplasmic reticulum–associated degradation) … p.4883

Central Nervous System - Tegmentum Mesencephali. New Tegmentum Mesencephali Study Findings Have Been Reported by Investigators at RIKEN (Isoforms of the Erythropoietin receptor in dopaminergic neurons of the Substantia Nigra) … p.4884

Oncology - Testicular Cancer. New Testicular Cancer Findings Reported from University of Turin (Baldness and testicular cancer: the EPSAM case–control study) … p.4885

Tetracyclines. New Tetracyclines Study Findings Have Been Reported from Tehran University of Medical Sciences (Minocycline Attenuates Depressive–Like Behaviour Induced by Rat Model of Testicular Torsion: Involvement of Nitric Oxide Pathway) … p.4886

Heart Disorders and Diseases - Tetralogy of Fallot. New Tetralogy of Fallot Study Results Reported from Children’s Hospital (Assessment of Microvolt T Wave Alternans in Children with Repaired Tetralogy of Fallot during 24–Hour Holter Electrocardiography) … p.4887

Drugs and Therapies - Therapeutic Drug Monitoring. New Therapeutic Drug Monitoring Data Have Been Reported by M.D.R. Fernandez and Co–Authors (Determination of Antidepressants in Hair via UHPLC–MS/MS as a Complementary Informative Tool for Clinical and Forensic Toxicological Assessments) … p.4888

Therapeutics. New Therapeutics Findings from Nagoya City University Discussed (Whole–pelvic radiotherapy with spot–scanning proton beams for uterine cervical cancer: a planning study) … p.4889

Therapeutics. New Therapeutics Findings from National Institute of Mental Health Described (Concise Review: Progress and Challenges in Using Human Stem Cells for Biological and Therapeutics Discovery: Neuropsychiatric Disorders) … p.4890
Thrombolysis. New Thrombolysis Findings
Reported from Department of Neurology
[Stroke Thrombolysis in a Centralized and a Decentralized System (Helsinki and Telemedical Project for Integrative Stroke Care Network)] … p.4891

Thrombopoietin. New Thrombopoietin Findings Reported from Waseda University (Thrombopoietin induces production of nucleated thrombocytes from liver cells in Xenopus laevis) … p.4892

Cardiovascular Diseases and Conditions - Thrombosis. New Thrombosis Findings from Brigham and Women’s Hospital Discussed (Thrombosis, Hypercoagulable States, and Anticoagulants) … p.4893

Cardiovascular Diseases and Conditions - Thrombosis. New Thrombosis Study Findings Have Been Reported by Researchers at Second Affiliated Hospital (Extensive blooming artifact predicts no recanalization after intravenous thrombolysis) … p.4894

Cardiovascular Diseases and Conditions - Thrombosis. New Thrombosis Study Findings Recently Were Reported by Researchers at Juntendo University (A Case Report of Severe Hepatic Artery Vasospasm Induced by Hepatic Arterial Buffer Response After Liver Transplantation) … p.4895

Cardiovascular Diseases and Conditions - Thrombosis. New Thrombosis Study Results from School of Medicine Described (Sinus thrombectomy for purulent cerebral venous sinus thrombosis utilizing a novel combination of the Trevo stent retriever and the Penumbra ACE aspiration catheter: the stent ...) … p.4896

Thrombotic Microangiopathy. New Thrombotic Microangiopathy Findings Has Been Reported by Investigators at French National Institute of Health and Medical Research (INSERM) (Collapsing glomerulopathy is common in the setting of thrombotic microangiopathy of the native ...) … p.4897

Lymphatic Diseases and Conditions - Thymoma. New Thymoma Study Findings Have Been Reported by Researchers at Yonsei University (Spontaneous rupture of hepatic metastasis from a thymoma: A case report) … p.4898

Oncology - Thyroid Cancer. New Thyroid Cancer Findings Reported from Department of Medical Oncology (Three cases of thyroid cancer following the diagnosis of testicular cancer: treatment–related complication or genetics?) … p.4899

Oncology - Thyroid Cancer. New Thyroid Cancer Study Findings Have Been Reported by S.P. Yang and Co–Researchers (Familial non–medullary thyroid cancer: unraveling the genetic maze) … p.4899

Biomedical Engineering - Tissue Engineering. New Tissue Engineering Findings from School of Chemical Engineering Discussed (Stimuli–Sensitive Injectable Hydrogels Based on Polysaccharides and Their Biomedical Applications) … p.4902

Toluene. New Toluene Findings from Kangwon National University Described (3D Visualization of Developmental Toxicity of 2,4,6–Trinitrotoluene in Zebrafish Embryogenesis Using Light–Sheet Microscopy) … p.4904

Drugs and Therapies - Toxicology and Pharmacology. New Toxicology and Pharmacology Findings Reported from University of Hertfordshire (A comparison of the results from intra–pleural and intra–peritoneal studies with those from inhalation and intratracheal tests for the assessment of pulmonary ...) … p.4905

Drugs and Therapies - Toxicology and Pharmacology. New Toxicology and Pharmacology Findings from Incyte Discussed [Results from oral gavage carcinogenicity studies of ruxolitinib in Tg.rasH2 mice and Sprague–Dawley (Crl:CD) rats] … p.4906

Drugs and Therapies - Toxicology and Pharmacology. New Toxicology and Pharmacology Findings from Merck & Company Reported [Use of an in vitro human skin permeation assay to assess bioequivalence of two topical cream formulations containing butenafine hydrochloride (1%, w/w)] … p.4907

Drugs and Therapies - Toxicology and Pharmacology. New Toxicology and Pharmacology Study Findings Recently Were Reported by N. Lin and Co–Researchers [Comparison of in vivo immunomodulatory effects of 5–hydroxymethylfurural and 5, 5 '–oxydimethylenebis (2–furfural)] … p.4908

Respiratory Tract Diseases and Conditions - Tracheal Stenosis. New Tracheal Stenosis Study Findings Recently Were Reported by Researchers at University of Miami (Two lost airways and one unexpected problem: undiagnosed tracheal stenosis in a morbidly obese patient) … p.4909

Proteins - Transcription Factors. New Transcription Factors Findings Has Been Reported by Investigators at University of Ljubljana [Transcription factor HIF1A: downstream targets, associated pathways, polymorphic hypoxia response element (HRE) sites, and initiative for ...] … p.4910

Transfusion Medicine. New Transfusion Medicine Findings from Singapore National University Described (Farnesoid X Receptor and Its Ligands Inhibit the Function of Platelets) … p.4912

Cardiovascular Diseases and Conditions - Transient Ischemic Attack. New Transient Ischemic Attack Study Findings Reported from University of Oxford (Hemodynamic correlates of transient cognitive impairment after transient ischemic attack and minor stroke: A transcranial Doppler study) … p.4913

Triterpenes. New Triterpenes Findings Has Been Reported by Investigators at Nanjing University (Simultaneous determination of notoginsenoside R1 and ginsenoside Re in rat plasma by ultra high performance liquid chromatography with tandem mass spectrometry ...) … p.4914
Parasitic Diseases and Conditions - Trypanosomiasis. New Trypanosomiasis Study Findings Recently Were Reported by Researchers at Swiss Tropical and Public Health Institute (Efficacy, Safety, and Dose of Pafuramidine, a New Oral Drug for Treatment of First Stage Sleeping Sickness, in a Phase 2a ...) … p.4915

Tryptamines. New Tryptamines Findings from ARUP Described (A high–performance liquid chromatography method for the serotonin release assay is equivalent to the radioactive method) … p.4916

Mycobacterium Infections - Tuberculosis. New Tuberculosis Data Have Been Reported by H.H. Soutter and Co–Authors (Discovery of cofactor-specific, bactericidal Mycobacterium tuberculosis InhA inhibitors using DNA–encoded library technology) … p.4917

Mycobacterium Infections - Tuberculosis. New Tuberculosis Data Have Been Reported by Researchers at Center for Disease Control and Prevention (Discovery and Optimization of Two Eis Inhibitor Families as Kanamycin Adjuvants against Drug-Resistant M. tuberculosis) … p.4918

Mycobacterium Infections - Tuberculosis. New Tuberculosis Findings from University of Alabama Described (8–Hydroxyquinolines Are Boosting Agents of Copper–Related Toxicity in Mycobacterium tuberculosis) … p.4922

Mycobacterium Infections - Tuberculosis. New Tuberculosis Findings from University of Kentucky Reported (Sulfonamide–Based Inhibitors of Aminoglycoside Acrystyltransferase Eis Abolish Resistance to Kanamycin in Mycobacterium tuberculosis) … p.4923

Mycobacterium Infections - Tuberculosis. New Tuberculosis Study Findings Recently Were Reported by Researchers at Global Alliance for TB Drug Development (TB Alliance regimen development for multidrug–resistant tuberculosis) … p.4924

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. New Type 1 Diabetes Mellitus Findings Reported from University of Helsinki (Endotoxins are associated with visceral fat mass in type 1 diabetes) … p.4925

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. New Type 1 Diabetes Mellitus Study Findings Have Been Reported by Researchers at Sapienza University (Saxagliptin improves glycaemic control and C–peptide secretion in latent autoimmune diabetes in adults (LADA)] … p.4926

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Type 2 Diabetes Data Have Been Reported by Investigators at Shandong University (Association between DPP4 gene polymorphism and serum lipid levels in Chinese type 2 diabetes individuals) … p.4927
Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.

New Type 2 Diabetes Findings from McGill University Described
(Pharmacosurveillance without borders: electronic health records in different countries can be used to address important methodological issues in estimating the risk of adverse events) … p.4928

New Type 2 Diabetes Findings from Poznan University of Medical Sciences Outlined
(The Impact of Pharmacotherapy of Type 2 Diabetes Mellitus on IL–1β, IL–6 and IL–10 Secretion) … p.4929

New Type 2 Diabetes Study Findings Have Been Reported by Investigators at Instituto de Salud Carlos III [A dysregulation of glucose metabolism control is associated with carotid atherosclerosis in patients with coronary heart disease …] … p.4930

New Type 2 Diabetes Study Findings Have Been Reported by Investigators at Magna Graecia University (A polymorphism of HMGA1 protects against proliferative diabetic retinopathy by impairing HMGA1-induced VEGFA expression) … p.4931

New Type 2 Diabetes Study Findings Have Been Reported by Investigators at University of Basel Hospital (Fibrates for primary prevention of cardiovascular disease events) … p.4932

New Type 2 Diabetes Study Findings Have Been Reported by Investigators at University of Florida (Hepatic ZIP14–mediated Zinc Transport Contributes to Endosomal Insulin Receptor Trafficking and Glucose Metabolism) … p.4934

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Type 2 Diabetes Study Findings Have Been Reported by Investigators at Wageningen University (Intake of different types of dairy and its prospective association with risk of type 2 diabetes: The Rotterdam Study) … p.4935

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Type 2 Diabetes Study Results from Federal University Described (Therapeutic potential of green tea on risk factors for type 2 diabetes in obese adults – a review) … p.4936

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. New Type 2 Diabetes Study Results from University of California Described (Impaired Collateral Flow Compensation During Chronic Cerebral Hypoperfusion in the Type 2 Diabetic Mice) … p.4937

Inflammatory Bowel Diseases and Conditions - Ulcerative Colitis.

New Ulcerative Colitis Study Results Reported from Poznan University of Medical Sciences (Bone Metabolism and the c.–223C > T Polymorphism in the 5’UTR Region of the Osteoprotegerin Gene in Patients with Inflammatory Bowel Disease) … p.4938

Gram-Positive Bacteria - Clostridium difficile.

New University of Lisbon Reports Findings in Clostridium difficile (The SpoIIQ–SpoIIIAH complex of Clostridium difficile controls forespore engulfment and late stages of gene expression and spore morphogenesis) … p.4939

Surgery - Urethrotomy.

New Urethrotomy Study Findings Have Been Reported by Investigators at Research Hospital (Modified platelet–rich plasma with transforming growth factor beta 1 neutralization antibody injection may reduce recurrence rate of urethral
January 14, 2017

Urologic Diseases and Conditions - Urinary Tract Infections. New Urinary Tract Infections Study Findings Have Been Reported by Investigators at Nara Medical University (Bacteremia secondary to Alloscardovia omnicolens urinary tract infection) … p.4941

Health and Medicine - Urology. New Urology Study Findings Have Been Reported by Investigators at University Hospital (The translational potential of microRNAs as biofluid markers of urological tumours) … p.4943

Immunization - Vaccines. New Vaccines Findings from Free University Described (Intralymphatic mRNA vaccine induces CD8 T–cell responses that inhibit the growth of mucosally located tumours) … p.4944

Immunization - Vaccines. New Vaccines Findings from K. Oddsson and Co–Researchers Described (Attitudes and knowledge among parents or guardians of 12–year–old girls about HPV vaccination – A population–based survey in Iceland) … p.4945

Immunization - Vaccines. New Vaccines Study Findings Have Been Reported by C. Willame and Colleagues (Importance of feasibility assessments before implementing non–interventional pharmacoepidemiologic studies of vaccines: lessons learned and recommendations for future …) … p.4946

Immunization - Vaccines. New Vaccines Study Findings Have Been Reported by Researchers at University of California (Novel cancer antigens for personalized immunotherapies: latest evidence and clinical potential) … p.4947

www.NewsRx.com

Immunization - Vaccines. New Vaccines Study Results from Leiden University Described (Repeated fractional intradermal dosing of an inactivated polio vaccine by a single hollow microneedle leads to superior immune responses) … p.4948

Cardiovascular Diseases and Conditions - Vasculitis. New Vasculitis Study Findings Recently Were Reported by Researchers at Hospital Clinic (Antibody–Mediated Acute Vascular Rejection of Kidney Allografts: Fifteen–Year Follow–up) … p.4949

Cardiovascular Diseases and Conditions - Venous Thromboembolism. New Venous Thromboembolism Data Have Been Reported by Investigators at Department of Orthopedic Surgery (Rate of Transfusions After Total Knee Arthroplasty in Patients Receiving Lovenox or High–Dose Aspirin) … p.4950

Cardiovascular Diseases and Conditions - Venous Thromboembolism. New Venous Thromboembolism Study Results Reported from Institute Gulbenkian de Ciencia (Mitochondrial genome association study with peripheral arterial disease and venous thromboembolism) … p.4952

Heart Disorders and Diseases - Ventricular Tachycardia. New Ventricular Tachycardia Study Findings Recently Were Reported by Researchers at Na Homolce Hospital (Catheter Ablation of Ischemic Ventricular Tachycardia With Remote Magnetic Navigation: STOP–VT Multicenter Trial) … p.4953
Heart Disorders and Diseases - Ventricular Tachycardia. New Ventricular Tachycardia Study Findings Recently Were Reported by Researchers at Tomsk Polytechnic University (Radionuclide Assessment of Cardiac Function and Dyssynchrony in Children with Idiopathic Ventricular Tachycardia) … p.4955

Membrane Proteins - Vesicular Transport Proteins. New Vesicular Transport Proteins Study Findings Reported from Vanderbilt University (Caveolin–1 is an aggresome–inducing protein) … p.4956

Gram-Negative Bacteria - Vibrio alginolyticus. New Vibrio alginolyticus Findings Reported from South China Normal University [Identification, characterization and expression analysis of tumor suppressor protein p53 from pufferfish (Takifugu obscurus) after the Vibrio alginolyticus challenge] … p.4957

Viral Load. New Viral Load Study Findings Have Been Reported by Researchers at School of Medicine (Effects of Chronic Diurnal Disruption and Acute Inflammatory Challenge on Mice with Latent Murine Gammaherpesvirus Infection) … p.4958

Neurodevelopmental Diseases and Conditions - Williams Syndrome. New Williams Syndrome Study Findings Have Been Reported by Investigators at Department of Pediatrics (Williams syndrome and mature B–Leukemia: A random association?) … p.4959

Oncology - Testicular Cancer. New pharmacon allows testicular tumors to shrink … p.4961

Amyotrophic Lateral Sclerosis. New tool shines light on protein condensation in living cells … p.4962

Heart Disorders and Diseases - Heart Disease. North Bristol NHS Trust Details Findings in Heart Disease (Low–dose intensive insulin therapy in patients with Acute Coronary Syndrome accompanied by Left Ventricular Failure: audit of two UK hospitals) … p.4964

Biotechnology - Pharmacogenomics. NorthShore University Health System Details Findings in Pharmacogenomics (Implementation of a multidisciplinary pharmacogenomics clinic in a community health system) … p.4965

Heart Disorders and Diseases - Heart Failure. Novel drug may help repair failing hearts … p.4967

Foodborne Diseases and Conditions - Listeria. Off–switch for CRISPR–Cas9 gene editing system discovered … p.4968

January 14, 2017

Clinical Research - Clinical Trials and Studies. Ottawa Hospital Research Institute Details Findings in Clinical Trials and Studies (A Phase II Study of PF–03446962 in Patients with Advanced Malignant Pleural Mesothelioma. CCTG Trial IND.207) … p.4971

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Overweight affects DNA methylation … p.4972

C Reactive Protein. Peking Union Medical College Details Findings in C Reactive Protein (Enhanced pro–protein convertase subtilisin/kexin type 9 expression by C–reactive protein through p38MAPK–HNF1 alpha pathway in HepG2 cells) … p.4973

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Penn expert : Human genome sequences linked to health data will change clinical medicine … p.4974

Oncology - Breast Cancer. Peter MacCallum Cancer Center Reports Findings in Breast Cancer (Clinical relevance of host immunity in breast cancer: from TILs to the clinic) … p.4975

Oncology - Small Cell Lung Cancer. PharmaMar and Chugai enter into a license and commercialization agreement for PM1183 … p.4976

Autoimmune Diseases and Conditions. Preventing too much immunity … p.4977

Heart Disorders and Diseases - Heart Attack. Rate of death, heart attack after noncardiac surgery decreases, although risk of stroke increases … p.4978

Skin Diseases and Conditions - Tinea pedis. Recent Data from A. Shemer and Co–Authors Highlight Findings in Tinea pedis (Increased Risk of Tinea Pedis and Onychomycosis Among Swimming Pool Employees in Netanya Area, Israel) … p.4979

Oncology - Prostate Cancer. Recent Data from E.H. Wang and Co–Authors Highlight Findings in Prostate Cancer (Disparities in Treatment of Patients With High–risk Prostate Cancer: Results From a Population–based Cohort) … p.4980

Cardiology. Recent Data from N. Benyounes and Co–Authors Highlight Findings in Cardiology (Could quantitative longitudinal peak systolic strain help in the detection of left ventricular wall motion abnormalities in our daily echocardiographic practice?) … p.4982

Transplant Medicine - Liver Transplants. Recent Findings by A. Prytula and Colleagues in Liver Transpls Provides New Insights (Tacrolimus Predose Concentration Is Associated With Hypertension in Pediatric Liver Transplant Recipients) … p.4983

Clinical Research - Clinical Trials and Studies. Recent Findings by E.M. Roth and Colleagues in Clinical Trials and Studies Provides New Insights (A phase III randomized trial evaluating alirocumab 300 mg every 4 weeks as monotherapy or add–on to statin: ODYSSEY CHOICE I) … p.4984

Kidney Diseases and Conditions - Chronic Kidney Disease. Recent Findings by F. Aziz and Colleagues in Chronic Kidney Disease Provides New Insights (The Triad of Sleep Apnea, Hypertension, and Chronic Kidney Disease: A Spectrum of Common Pathology) … p.4985
January 14, 2017

Oncology - Cancer Care. Recent Findings from A. Amundsen and Co–Researchers Yields New Information on Cancer Care (Adapting an Australian question prompt list in oncology to a Norwegian setting–a combined method approach) … p.4986

Skin Diseases and Conditions - Psoriasis. Recent Findings from A. Herman and Co–Researchers Yields New Information on Psoriasis (Topically Used Herbal Products for the Treatment of Psoriasis – Mechanism of Action, Drug Delivery, Clinical Studies) … p.4987

Drugs and Therapies - Drug Delivery Systems. Recent Findings from Abo Akademi University Has Provided New Information about Drug Delivery Systems (Printed Drug–Delivery Systems for Improved Patient Treatment) … p.4988

Hematologic Diseases and Conditions - Sickle Cell Anemia. Recent Findings from Ain Shams University Provides New Insights into Sickle Cell Anemia (Tartrate–Resistant Acid Phosphatase 5b in Young Patients With Sickle Cell Disease and Trait Siblings: Relation to Vasculopathy and Bone Mineral Density) … p.4988

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. Recent Findings from Ajou University Provides New Insights into Antineoplastic Monoclonal Antibodies [Bacterial production and structure–functional validation of a recombinant antigen–binding fragment (Fab) of an anti–cancer therapeutic antibody …] … p.4990

Cardiology. Recent Findings from Albert Einstein College of Medicine Has Provided New Data on Cardiology (Remote Magnetic Navigation: A Focus on Catheter Ablation of Ventricular Arrhythmias) … p.4991

www.NewsRx.com

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Recent Findings from Ankara Numune Training and Research Hospital Provides New Insights into Abdominal Aortic Aneurysm (Transient Ischemic Attacks of Spinal Cord due to Abdominal Aortic Aneurysm Thrombus) … p.4992

Biomedical Engineering - Tissue Engineering. Recent Findings from Auburn University Provides New Insights into Tissue Engineering (Polymeric Biomaterials for In Vitro Ccass Tissue Engineering and Drug Testing Applications) … p.4993

Nuclear Medicine. Recent Findings from Bhabha Atomic Research Center Has Provided New Information about Nuclear Medicine [Industrial–Scale Synthesis of Intrinsically Radiolabeled (CuS)–Cu–64 Nanoparticles for Use in Positron Emission Tomography (PET) Imaging of …] … p.4994

Transfusion Medicine - Blood Transfusion. Recent Findings from Biomedical Research Institute Provides New Insights into Blood Transfusion (Brain hemorrhage after endovascular reperfusion therapy of ischemic stroke: a threshold–finding whole–brain perfusion CT study) … p.4995

Clinical Research - Clinical Trials and Studies. Recent Findings from Burdwan Medical College Provides New Insights into Clinical Trials and Studies (Role of olanzapine in chemotherapy–induced nausea and vomiting on platinum–based chemotherapy patients: a randomized controlled study) … p.4996

Musculoskeletal Diseases and Conditions - Osteoarthritis. Recent Findings from CHA University Provide New Insights into Osteoarthritis (AIMP1 downregulation restores chondrogenic characteristics of dedifferentiated/degenerated chondrocytes by enhancing TGF–b signal) … p.4997
January 14, 2017

Parasitic Diseases and Conditions - Leishmaniasis. Recent Findings from CSIR Provides New Insights into Leishmaniasis (A Novel Spirooxindole Derivative Inhibits the Growth of Leishmania donovani Parasites both In Vitro and In Vivo by Targeting Type IB Topoisomerase) … p.4998

Oncology - Breast Cancer. Recent Findings from Cancer Research Institute Provides New Insights into Breast Cancer (Evaluation of expression profiles of microRNAs and two target genes, FOXO3a and RUNX2, effectively supports diagnostics and therapy predictions in breast …) … p.4999

Cardiovascular Diseases and Conditions - Hereditary Hemorrhagic Telangiectasia. Recent Findings from Central South University Has Provided New Data on Hereditary Hemorrhagic Telangiectasia (Thalidomide Effects in Patients with Hereditary Hemorrhagic Telangiectasia During Therapeutic Treatment and in Fli–EGFP Transgenic …) … p.5000

Heart Disorders and Diseases - Hypoplastic Left Heart Syndrome. Recent Findings from Children's Hospital Provides New Insights into Hypoplastic Left Heart Syndrome (Understanding the Hybrid Stage I Approach for Hypoplastic Left Heart Syndrome) … p.5001

Oncology - Breast Cancer. Recent Findings from Chongqing Medical University Provide New Insights into Breast Cancer (LncRNA–Hh Strengthen Cancer Cells Generation in Twist–Positive Breast Cancer via Activation of Hedgehog Signaling Pathway) … p.5002

Oncology - Gliomas. Recent Findings from City of Hope National Medical Center Has Provided New Information about Gliomas [Increased Expression of System x(c)(−) in Glioblastoma Confers an Altered Metabolic State and Temozolomide Resistance] … p.5003

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Recent Findings from Cooper Union Has Provided New Information about Obstructive Sleep Apnea (Computational fluid dynamics upper airway effective compliance, critical closing pressure, and obstructive sleep apnea severity in obese adolescent …) … p.5004

Drugs and Therapies - Antibiotics. Recent Findings from Department of Clinical Pharmacology Provide New Insights into Antibiotics (Pharmacokinetics and Pulmonary Distribution of Clarithromycin and Rifampicin after Concomitant and Consecutive Administration in Foals) … p.5005

Oncology - Cancer Risk. Recent Findings from Department of Medicine Has Provided New Information about Cancer Risk (Increased yield of actionable mutations using multi–gene panels to assess hereditary cancer susceptibility in an ethnically diverse clinical cohort) … p.5007

Peptides and Proteins. Recent Findings from Dow AgroSciences LLC Has Provided New Information about Peptides and Proteins (Rapid simulated gastric fluid digestion of in–seed/grain proteins expressed in genetically engineered crops) … p.5008

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. Recent Findings from EMD Serono Advance Knowledge in Metabolic Syndrome (Predictors of Treatment Response to Tesamorelin, a Growth Hormone–Releasing Factor Analog, in HIV–Infected Patients with Excess Abdominal Fat) … p.5009

Drugs and Therapies - Cancer Therapy. Recent Findings from Emory University Has Provided New Information about Cancer Therapy (New Anticancer Drugs Associated With Large Increases In Costs And Life Expectancy) … p.5010
January 14, 2017

Immune System Diseases and Conditions
- HIV/AIDS. Recent Findings from Federal University Provides New Insights into HIV/AIDS (TRIM5 gene polymorphisms in HIV–1–infected patients and healthy controls from Northeastern Brazil) ... p.5011

Life Science Research - Human Reproduction. Recent Findings from Free University Provides New Insights into Human Reproduction (Cryopreservation of testicular tissue or testicular cell suspensions: a pivotal step in fertility preservation) ... p.5012

Heart Disorders and Diseases - Cardiomegaly. Recent Findings from French National Institute of Health and Medical Research (INSERM) Provide New Insights into Cardiomegaly (Endothelial cell dysfunction and cardiac hypertrophy in the STOX1 model of preeclampsia) ... p.5013

Drugs and Therapies - Transdermal Delivery. Recent Findings from Friedrich–Schiller–University Has Provided New Information about Transdermal Delivery (Transdermal delivery from liposomal formulations – Evolution of the technology over the last three decades) ... p.5014

Oncology - Colon Cancer. Recent Findings from Fudan University Shanghai Cancer Center Has Provided New Data on Colon Cancer (RPS7 inhibits colorectal cancer growth via decreasing HIF–1α–mediated glycolysis) ... p.5015

Endothelial Cells. Recent Findings from Fuzhou University Has Provided New Information about Endothelial Cells (S–nitrosocaptopril interrupts adhesion of cancer cells to vascular endothelium by suppressing cell adhesion molecules via inhibition of the NF–kappa B ...) ... p.5016

www.NewsRx.com

Pneumococcal Disease. Recent Findings from G. Errico and Co–Authors Provide New Insights into Pneumococcal Disease [Application of capsular sequence typing (CST) to serotype non–viable Streptococcus pneumoniae isolates from an old collection] ... p.5017

Cardiovascular Diseases and Conditions - Atherosclerosis. Recent Findings from General Hospital Provides New Insights into Atherosclerosis (GDF11 Protects against Endothelial Injury and Reduces Atherosclerotic Lesion Formation in Apolipoprotein E–Null Mice) ... p.5018

Genetics - Human Genetics. Recent Findings from Giannina Gaslini Institute Has Provided New Information about Human Genetics (WES in a family trio suggests involvement of TECPR2 in a complex form of progressive motor neuron disease) ... p.5019

Heart Disorders and Diseases - Heart Disease. Recent Findings from Graduate School Provides New Insights into Heart Disease (Birth weight and risk of ischemic heart disease: A Mendelian randomization study) ... p.5020

Heart Disorders and Diseases - Ventricular Fibrillation. Recent Findings from Guangxi Medical University Has Provided New Information about Ventricular Fibrillation (Edaravone improves survival and neurological outcomes after CPR in a ventricular fibrillation model of rats) ... p.5021

Oncology - Glioblastomas. Recent Findings from Harbin Medical University Has Provided New Data on Glioblastomas (Identification and characterization of IncRNA mediated transcriptional dysregulation dictates IncRNA roles in glioblastoma) ... p.5022
Heart Disorders and Diseases - Heart Failure. Recent Findings from Heart and Vascular Institute Has Provided New Information about Heart Failure (Ventricular Assist Device Therapy in Older Patients With Heart Failure: Characteristics and Outcomes) ... p.5023

Oncology - Thyroid Cancer. Recent Findings from Hebei Medical University Provides New Insights into Thyroid Cancer (Iodine–131: An Effective Method for Treating Lymph Node Metastases of Differentiated Thyroid Cancer) ... p.5024

Ischemia. Recent Findings from Hokkaido University Has Provided New Information about Ischemia (Hydrogen Gas Ameliorates Hepatic Reperfusion Injury After Prolonged Cold Preservation in Isolated Perfused Rat Liver) ... p.5025

Transplant Medicine - Kidney Transplants. Recent Findings from Hokkaido University Hospital Has Provided New Information about Kidney Transplants (Successful treatment with foscarnet for ganciclovir–resistant cytomegalovirus infection in a kidney transplant recipient: A case report) ... p.5026

Gram-Negative Bacteria - Salmonella. Recent Findings from Hong Kong Polytechnic University Has Provided New Information about Salmonella (IncH12 Plasmids Are the Key Vectors Responsible for oqxAB Transmission among Salmonella Species) ... p.5027

Cardiology. Recent Findings from Huazhong University of Science and Technology Has Provided New Information about Cardiology (Inhibitory effects of hesperetin on Nav1.5 channels stably expressed in HEK 293 cells and on the voltage–gated cardiac sodium ...) ... p.5028

Autoimmune Diseases and Conditions - Behcet Disease. Recent Findings from Imperial College Has Provided New Information about Behcet Disease (A low balance between microparticles expressing tissue factor pathway inhibitor and tissue factor is associated with thrombosis in Behcet's Syndrome) ... p.5029

Immunology - Immunoproteins. Recent Findings from Inha University School of Medicine Has Provided New Data on Immunoproteins (Antiallergic effects of anti–interleukin–33 are associated with suppression of immunoglobulin light chain and inducible nitric oxide synthase) ... p.5030

Immunology - Antigens. Recent Findings from Inovio Pharmaceuticals Provides New Insights into Antigens (Augmentation of cellular and humoral immune responses to HPV16 and HPV18 E6 and E7 antigens by VGX–3100) ... p.5031

Drugs and Therapies - Ketoprofen Therapy. Recent Findings from Institute of Research and Development Has Provided New Information about Ketoprofen Therapy (Solid State Interactions Between Ketoprofen and Excipients in Solid Dosage Forms) ... p.5032

Hematologic Diseases and Conditions - Thrombocytopenia. Recent Findings from International University Has Provided New Information about Thrombocytopenia (Linezolid–Induced Thrombocytopenia Is Caused by Suppression of Platelet Production via Phosphorylation of Myosin Light Chain 2) ... p.5033

Nutritional and Metabolic Diseases and Conditions - Obesity. Recent Findings from Iowa State University Has Provided New Information about Obesity (More efficient, perhaps, but at what price? Pleasure and enjoyment responses to high–intensity interval exercise in low–active women with
January 14, 2017

www.NewsRx.com

Oncology. Recent Findings from L. Zitvogel and Co–Authors Yields New Data on Oncology (Mouse models in oncoimmunology) … p.5041

Enzymes and Coenzymes - Esterases. Recent Findings from M.T. Certo and Co–Authors Provide New Insights into Esterases (Salient Features of Endonuclease Platforms for Therapeutic Genome Editing) … p.5042

Arthroplasty. Recent Findings from Mayo Clinic Provides New Insights into Arthroplasty (Survivorship After Primary Total Hip Arthroplasty in Solid–Organ Transplant Patients) … p.5043

Disease Attributes - Disease Progression. Recent Findings from Medical University Provide New Insights into Disease Progression (Biomarkers of evasive resistance predict disease progression in cancer patients treated with antiangiogenic therapies) … p.5044

Nutritional and Metabolic Diseases and Conditions - Acidosis. Recent Findings from Memorial Hospital Provide New Insights into Acidosis (Chronic Metabolic Acidosis Activates Renal Tubular Sodium Chloride Cotransporter through Angiotensin II–dependent WNK4–SPAK Phosphorylation Pathway) … p.5045

Gram-Negative Bacteria - Burkholderia. Recent Findings from N. Castanheira and Co–Authors Provide New Insights into Burkholderia (Plant growth–promoting Burkholderia species isolated from annual ryegrass in Portuguese soils) … p.5046

obesity) … p.5034

Prostheses. Recent Findings from J. Gotte and Co–Researchers Yields New Information on Prostheses (Redo Aortic Valve Implantation After Full Root Replacement Using A Sutureless Valve Prosthesis) … p.5035

Anions. Recent Findings from J.R. Condon and Co–Researchers Yields New Information on Anions (Inhibition of cancer cell mitosis by reducing the availability of phosphate) … p.5036

Musculoskeletal Diseases and Conditions - Duchenne Muscular Dystrophy. Recent Findings from Jichi Medical University Provides New Insights into Duchenne Muscular Dystrophy (Low Six4 and Six5 gene dosage improves dystrophic phenotype and prolongs life span of mdx mice) … p.5037

Cardiovascular Research. Recent Findings from Johns Hopkins University Has Provided New Information about Cardiovascular Research (Cardiovascular implantable electronic device function and longevity at autopsy: an underestimated resource) … p.5038

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Recent Findings from Johns Hopkins University Has Provided New Information about Rheumatoid Arthritis (Measuring transaminases in patients with rheumatoid arthritis on weekly methotrexate: does timing of blood testing matter?) … p.5039

Drugs and Therapies - Human Serum Albumin Therapy. Recent Findings from L. Sulkowski and Co–Researchers Yields New Information on Human Serum Albumin Therapy (Characteristics of the Protoporphyrin IX Binding Sites on Human Serum Albumin Using Molecular Docking) … p.5040
Nutritional and Metabolic Diseases and Conditions - Anorexia. Recent Findings from N. Matsuo and Co–Authors Yields New Data on Anorexia (Predictors of responses to corticosteroids for anorexia in advanced cancer patients: a multicenter prospective observational study) … p.5047

Oncology - Breast Cancer. Recent Findings from Nanchang University Provides New Insights into Breast Cancer (LINCO0978 predicts poor prognosis in breast cancer patients) … p.5049

Oncology. Recent Findings from Nanjing Medical University Provides New Insights into Oncology (Dysregulation of TTP and HuR plays an important role in cancers) … p.5049

Oncology - Lung Cancer. Recent Findings from Nanjing University Provides New Insights into Lung Cancer (Cancer–associated fibroblasts treated with cisplatin facilitates chemoresistance of lung adenocarcinoma through IL–11/IL–11R/STAT3 signaling pathway) … p.5050

Peptide Proteins - Peptide Hormones. Recent Findings from National Chung Hsing University Provides New Insights into Peptide Hormones (Ginkgoghrelins, unique acylated flavonoid diglycosides in Folium Ginkgo, stimulate growth hormone secretion via activation of the ghrelin receptor) … p.5051

Cardiovascular Diseases and Conditions - Thrombosis. Recent Findings from Nordic Bioscience Advance Knowledge in Thrombosis (Collagen–mediated hemostasis) … p.5052

Mental Health. Recent Findings from Nottingham Trent University Has Provided New Information about Mental Health (Pathways through the criminal justice system for prisoners with acute and serious mental illness) … p.5053

Digestive System Diseases and Conditions - Crohn's Disease. Recent Findings from Nottingham University Hospital NHS Trust Provide New Insights into Crohn's Disease (Ustekinumab for the treatment of Crohn's disease: can it find its niche?) … p.5054

Ear Diseases and Conditions - Otitis Media. Recent Findings from Ohio State University Has Provided New Information about Otitis Media (Multi–scale finite element modeling of Eustachian tube function: influence of mucosal adhesion) … p.5055

Oncology - Gastric Cancer. Recent Findings from Osaka City University Graduate School of Medicine Advance Knowledge in Gastric Cancer (Fibroblast growth factor receptor signaling as therapeutic targets in gastric cancer) … p.5056

Heart Disorders and Diseases - Heart Attack. Recent Findings from Osaka University Has Provided New Data on Heart Attack (Myeloid cell–derived LRG attenuates adverse cardiac remodelling after myocardial infarction) … p.5057

Intranuclear Space. Recent Findings from Palacky University Provides New Insights into Intranuclear Space (Chromosomal aberrations in childhood acute lymphoblastic leukemia: 15–year single center experience) … p.5058

Oncology - Colon Cancer. Recent Findings from Peking Union Medical College Has Provided New Information about Colon Cancer (Exploration of the Optimal Minimum Lymph Node Count after Colon Cancer Resection for Patients Aged 80 Years and Older) … p.5059

Pharmacokinetics. Recent Findings from People's Liberation Army Has Provided New Information about Pharmacokinetics (Determination of sophorafavlanone G and kurrarione in rat plasma by UHPLC–MS/MS and its application to a pharmacokinetic study) … p.5060
Oncology - Acute Myeloid Leukemia. Recent Findings from Postgraduate Institute of Medical Education and Research Provide New Insights into Acute Myeloid Leukemia (Immunohistochemical Detection of NPM1 Mutation in Acute Myeloid Leukemia and its Association With Cup–like Nuclear ...) … p.5061

Oncology - Breast Cancer. Recent Findings from San Raffaele Scientific Institute Provide New Insights into Breast Cancer (Effects of the scaffold proteins liprin–a1, b1 and b2 on invasion by breast cancer cells) … p.5063

Oncology - Breast Cancer. Recent Findings from School of Medicine Provide New Insights into Breast Cancer (BRCA1 inhibits AR–mediated proliferation of breast cancer cells through the activation of SIRT1) … p.5064

Health and Medicine - Health and Society. Recent Findings from School of Medicine Provides New Insights into Health and Society (Geographical disparities in access to cancer management and treatment services in England) … p.5065

Skin Diseases and Conditions - Acne Vulgaris. Recent Findings from Seoul National University Provides New Insights into Acne Vulgaris (Recent progress in the research about Propionibacterium acnes strain diversity and acne: pathogen or bystander?) … p.5066

Hematologic Diseases and Conditions - Thrombocytopenia. Recent Findings from Shanghai Jiao–Tong University Provide New Insights into Thrombocytopenia (Interleukin–17–producing CD4+ T lymphocytes are increased in patients with primary immune thrombocytopenia) … p.5067

Oncology - Breast Cancer. Recent Findings from Shanghai Jiao–Tong University School of Medicine Has Provided New Data on Breast Cancer (Structural simulation of adenosine phosphate via plumbagin and zoledronic acid competitively targets JNK/Erk to synergistically ...) … p.5068

Proteins - Carrier Proteins. Recent Findings from ShanghaiTech University Provides New Insights into Carrier Proteins (Unusual Processing Generates SPA LncRNAs that Sequester Multiple RNA Binding Proteins) … p.5069

Surgery - Heart Surgery. Recent Findings from Sir Ganga Ram Hospital Provides New Insights into Heart Surgery (Parachute Tricuspid Valve: A Case Treated by Open Heart Surgery) … p.5071

Brachytherapy. Recent Findings from Soochow University Has Provided New Information about Brachytherapy [CT–guided implantation of I–125 seeds (permanent brachytherapy) for metastatic tumors of the hepatic portal system: Effectiveness and safety in 13 patients] … p.5072
Chalcogens. Recent Findings from Soochow University Provides New Insights into Chalcogens (TaOx decorated perfluorocarbon nanodroplets as oxygen reservoirs to overcome tumor hypoxia and enhance cancer radiotherapy) ... p.5073

Drugs and Therapies - Antiinfectives. Recent Findings from Southern University of Chile Provides New Insights into Antiinfectives (Pentamidine antagonizes the benznidazole's effect in vitro, and lacks of synergy in vivo: Implications about the polyamine transport as an ...) ... p.5074

Oncology - Nasopharyngeal Carcinoma. Recent Findings from Sun Yat Sen University Provides New Insights into Nasopharyngeal Carcinoma (Induction chemotherapy plus concurrent chemoradiotherapy versus concurrent chemoradiotherapy alone in locoregionally advanced nasopharyngeal ...) ... p.5075

Neuropathy. Recent Findings from Taipei Medical University Advance Knowledge in Neuropathy (Melatonin relieves neuropathic allodynia through spinal MT2–enhanced PP2Ac and downstream HDAC4 shuttling–dependent epigenetic modification of hmgb1 transcription) ... p.5076

Science - Neurological Science. Recent Findings from Tel Aviv University Has Provided New Information about Neurological Science (Malformations of Cortical Development: From Postnatal to Fetal Imaging) ... p.5077

Oncology - Prostate Cancer. Recent Findings from Temple University Advance Knowledge in Prostate Cancer (The role of radical prostatectomy in high–risk localized, node–positive and metastatic prostate cancer) ... p.5078

Oncology - Gastric Cancer. Recent Findings from Tokyo Medical and Dental University Provides New Insights into Gastric Cancer (Postoperative Complications of Laparoscopic Total Gastrectomy versus Open Total Gastrectomy for Gastric Cancer in a Meta–Analysis of ...) ... p.5079

Heart Disorders and Diseases - Heart Attack. Recent Findings from Tufts University Has Provided New Information about Heart Attack (The Evolving Paradigm Of Individualized Postresuscitation Care After Cardiac Arrest) ... p.5080

Oncology - Prostate Cancer. Recent Findings from University College Has Provided New Data on Prostate Cancer (The challenging landscape of medical device approval in localized prostate cancer) ... p.5081

Heart Disorders and Diseases - Atrial Fibrillation. Recent Findings from University Duisburg–Essen Has Provided New Data on Atrial Fibrillation (The value of basic research insights into atrial fibrillation mechanisms as a guide to therapeutic innovation: a critical analysis) ... p.5082

Hydroxycorticosteroids. Recent Findings from University Hospital Provide New Insights into Hydroxycorticosteroids (Does Pregnenolone Enhance Exposure Therapy in Obsessive–Compulsive Disorder? – A Pilot, Interim Report of a Randomized, Placebo–Controlled, Double–Blind ...) ... p.5083

Immunology - Immune System. Recent Findings from University Hospital Provide New Insights into Immune System (Stress–Induced In Vivo Recruitment of Human Cytotoxic Natural Killer Cells Favors Subsets with Distinct Receptor Profiles and Associates with Increased ...) ... p.5084
Clinical Research - Clinical Trials and Studies. Recent Findings from University of Agriculture Provides New Insights into Clinical Trials and Studies [A Novel Extract of Fenugreek Husk (FenuSMART (TM)) Alleviates Postmenopausal Symptoms and Helps to Establish the Hormonal Balance: A …] … p.5085

Chemical Research - Chemical Biology. Recent Findings from University of Basel Provides New Insights into Chemical Biology (The best of both worlds: reaping the benefits from mammalian and bacterial therapeutic circuits) … p.5086

Mosquito-Borne Diseases - Dengue Hemorrhagic Fever. Recent Findings from University of California Provides New Insights into Dengue Hemorrhagic Fever (Homotypic Dengue Virus Reinfections in Nicaraguan Children) … p.5086

Proteins - Neuropeptides. Recent Findings from University of Cambridge Has Provided New Information about Neuropeptides (Role of enteroendocrine L–cells in arginine vasopressin–mediated inhibition of colonic anion secretion) … p.5088

Liver Diseases and Conditions - Fatty Liver. Recent Findings from University of Colorado Provides New Insights into Fatty Liver [Perilipin–2 Deletion Impairs Hepatic Lipid Accumulation by Interfering with Sterol Regulatory Element–binding Protein (SREBP) Activation and Altering the Hepatic …] … p.5089

Health and Medicine - Complementary and Alternative Medicine. Recent Findings from University of Delaware Provides New Insights into Complementary and Alternative Medicine (Yoga Helps Put the Pieces Back Together: A Qualitative Exploration of a Community–Based Yoga Program for Cancer Survivors) … p.5090

Drugs and Therapies - Antiretrovirals. Recent Findings from University of Genoa Provides New Insights into Antiretrovirals (Switch from unboosted protease inhibitor to a single–tablet regimen containing rilpivirine improves cholesterol and triglycerides) … p.5092

Health and Medicine - Medical Genetics. Recent Findings from University of Leeds Provide New Insights into Medical Genetics (Deficiency of the myogenic factor MyoD causes a perinatally lethal fetal akinesia) … p.5093

Eye Diseases and Conditions - Proliferative Vitreoretinopathy. Recent Findings from University of Liverpool Provides New Insights into Proliferative Vitreoretinopathy (Controlling drug release from non–aqueous environments: Moderating delivery from ocular silicone oil drug reservoirs to combat …) … p.5094

Hormones - Corpus Luteum Hormones. Recent Findings from University of Melbourne Advance Knowledge in Corpus Luteum Hormones [Time–dependent activation of prostacyclin and nitric oxide pathways during continuous i.v. infusion of serelaxin (recombinant human H2 relaxin)] … p.5095

Life Science Research - Developmental Biology. Recent Findings from University of Michigan Has Provided New Information about Developmental Biology (hPSC–derived lung and intestinal organoids as models of human fetal tissue) … p.5096
January 14, 2017

Eye Diseases and Conditions - Optic Atrophy. Recent Findings from University of Montpellier Has Provided New Information about Optic Atrophy (WFS1 in Optic Neuropathies: Mutation Findings in Nonsyndromic Optic Atrophy and Assessment of Clinical Severity) … p.5097

Clinical Research - Clinical Trials and Studies. Recent Findings from University of Oslo Provides New Insights into Clinical Trials and Studies (Routine vs. on-demand analgesia in colonoscopy: a randomized clinical trial) … p.5098

Myeloid Cells. Recent Findings from University of Sydney Advance Knowledge in Myeloid Cells (Scanning Electron Microscopy Reveals Two Distinct Classes of Erythroblastic Island Isolated from Adult Mammalian Bone Marrow) … p.5099

Musculoskeletal Diseases and Conditions - Osteomyelitis. Recent Findings from University of Technology Has Provided New Data on Osteomyelitis (Calcium phosphate nanocoatings and nanocomposites, part 2: thin films for slow drug delivery and osteomyelitis) … p.5100

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Recent Findings from University of Texas Has Provided New Information about Subarachnoid Hemorrhage [THSD1 (Thrombospondin Type 1 Domain Containing Protein 1) Mutation in the Pathogenesis of Intracranial Aneurysm and Subarachnoid Hemorrhage] … p.5101

Oncology - Cervical Cancer. Recent Findings from University of Texas Provides New Insights into Cervical Cancer (Quality of life after radical trachelectomy for early–stage cervical cancer: A 5–year prospective evaluation) … p.5102

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Recent Findings from University of Tokyo Provides New Insights into Type 2 Diabetes (J–curve relation between daytime nap duration and type 2 diabetes or metabolic syndrome: A dose–response meta–analysis) … p.5103

Pharmacokinetics. Recent Findings from University of Ulsan College of Medicine Has Provided New Data on Pharmacokinetics (Population plasma and urine pharmacokinetics of ivabradine and its active metabolite S18982 in healthy Korean volunteers) … p.5104

Gram-Negative Bacteria - Acinetobacter baumannii. Recent Findings from University of Ulsan Provides New Insights into Acinetobacter baumannii (In Vitro Synergistic Activity of Antimicrobial Agents in Combination against Clinical Isolates of Colistin–Resistant Acinetobacter baumannii) … p.5105

Drugs and Therapies - Antibiotics. Recent Findings from University of Utah Provides New Insights into Antibiotics (A Multi–Center Review of Care Patterns and Outcomes in Necrotizing Soft Tissue Infections) … p.5106

Liver Diseases and Conditions - Hepatitis C Virus. Recent Findings from University of Utrecht Has Provided New Information about Hepatitis C Virus (Tyrphostin AG1478 Inhibits Encephalomyocarditis Virus and Hepatitis C Virus by Targeting Phosphatidylinositol 4–Kinase III alpha) … p.5108

Drugs and Therapies - Adrenal Cortical Steroids. Recent Findings from University of Western Australia Has Provided New Information about Adrenal Cortical Steroids (Maternofetal pharmacokinetics and fetal lung responses in chronically catheterized sheep receiving constant, low–dose… p.5109
**January 14, 2017**

infusions ...) ... p.5108

**Oncology - Cervical Cancer.** Recent Findings from University of Western Sydney Has Provided New Information about Cervical Cancer (Barriers to cervical cancer screening experienced by lesbian women: a qualitative study) ... p.5110

**Nutritional and Metabolic Diseases and Conditions - Obesity.** Recent Findings from University of York Has Provided New Information about Obesity (Simple tests for the diagnosis of childhood obesity: a systematic review and meta-analysis) ... p.5111

**Inflammation.** Recent Findings from Veterans Affairs Medical Center Has Provided New Information about Inflammation (Loss of Junctional Adhesion Molecule A Promotes Severe Steatohepatitis in Mice on a Diet High in Saturated Fat, Fructose, and Cholesterol) ... p.5112

**Central Nervous System Diseases and Conditions - Brain Injuries.** Recent Findings from Walter Reed Army Institute of Research Has Provided New Information about Brain Injuries (Neurochemical changes following combined hypoxemia and hemorrhagic shock in a rat model of penetrating ballistic–like brain injury: A ...) ... p.5113

**Oncology - Prostate Cancer.** Recent Findings from Western University Provides New Insights into Prostate Cancer (Target margins in radiotherapy of prostate cancer) ... p.5114

**Adenocarcinomas.** Recent Findings from Xi'an Jiao Tong University Provides New Insights into Adenocarcinomas (The Management and Prognostic Prediction of Adenocarcinoma of Appendix) ... p.5115

**www.NewsRx.com**

**Oncology - Cancer Research.** Recent Findings from Yale University Provides New Insights into Cancer Research (Era of a Single Population–Based Payment to a Cancer Center Delivering the Value of Interventional Oncology in Accountable Care Organizations) ... p.5116

**Oncology - Pancreatic Cancer.** Recent Findings from Zhejiang University Advance Knowledge in Pancreatic Cancer (IR–780 Loaded Phospholipid Mimicking Homopolymeric Micelles for Near–IR Imaging and Photothermal Therapy of Pancreatic Cancer) ... p.5117

**Neutral Amino Acids.** Recent Findings from Zhejiang University Has Provided New Data on Neutral Amino Acids (Obg–like ATPase 1 regulates global protein serine/threonine phosphorylation in cancer cells by suppressing the GSK3β–inhibitor 2–PP1 positive feedback loop) ... p.5118

**Eye Diseases and Conditions - Age-Related Macular Degeneration.** Recent Findings in Age–Related Macular Degeneration Described by Researchers from Xi'an Jiao Tong University (The Association between LIPC rs493258 Polymorphism and the Susceptibility to Age–Related Macular Degeneration) ... p.5119

**Drugs and Therapies - Alendronate Therapy.** Recent Findings in Alendronate Therapy Described by Researchers from Federal University (Solid–State Phase Transition Mechanism and Physical–Chemical Study of the Crystal Forms of Monosodium Alendronate: Trihydrate versus Anhydrate) ... p.5120

**Hematologic Diseases and Conditions - Anemia.** Recent Findings in Anemia Described by Researchers from University of Florida (End–tidal carbon dioxide and occult injury in trauma patients ETCO2 does not rule out severe injury) ... p.5121
Drugs and Therapies - Antiepileptics.
Recent Findings in Antiepileptics Described by Researchers from Albany College of Pharmacy and Health Sciences (Anticonvulsants Based on the α–Substituted Amide Group Pharmacophore Bind to and Inhibit Function of Neuronal Nicotinic) … p.5122

Drugs and Therapies - Antiretrovirals.
Recent Findings in Antiretrovirals Described by Researchers from University of Toronto (A Multi–State Model Examining Patterns of Transitioning Among States of Engagement in Care in HIV–Positive Individuals Initiating Combination Antiretroviral) … p.5123

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics.
Recent Findings in Anxiolytics Sedatives and Hypnotics Described by L.R. Pinto Jr and Colleagues (Eszopiclone versus zopiclone in the treatment of insomnia) … p.5124

Bone Marrow Diseases and Conditions - Aplastic Anemia.
Recent Findings in Aplastic Anemia Described by Researchers from Kyung Hee University (Invasive Fungal Sinusitis by Lasiodiplodia theobromae in an Patient with Aplastic Anemia: An Extremely Rare Case Report and Literature Review) … p.5125

Applied Bioinformatics.
Recent Findings in Applied Bioinformatics Described by Researchers from Nanjing Medical University (Expression and prognostic value of E2F activators in NSCLC and subtypes: a research based on bioinformatics analysis) … p.5126

Arrhythmia.
Recent Findings in Arrhythmia Described by Researchers from Children's Hospital (Arrhythmias After Stage I Hybrid Palliation in Single–Ventricle Patients) … p.5127

Lung Diseases and Conditions - Asthma.
Recent Findings in Asthma Described by Researchers from Department of Internal Medicine (Autophagy in airway diseases: a new frontier in human asthma?) … p.5128

Cardiovascular Diseases and Conditions - Atherosclerosis.
Recent Findings in Atherosclerosis Described by Researchers from Huazhong University of Science and Technology (Selenoprotein S Is Highly Expressed in the Blood Vessels and Prevents Vascular Smooth Muscle Cells From Apoptosis) … p.5129

Heart Disorders and Diseases - Atrial Fibrillation.
Recent Findings in Atrial Fibrillation Described by Researchers from Henry Ford Hospital (Impact of Preoperative Atrial Fibrillation on Postoperative Thromboembolic Events After Left Ventricular Assist Device Implantation) … p.5130

Biological Factors - Autacoids.
Recent Findings in Autacoids Described by Researchers from Tel Aviv University (Does Polypharmacy in Nursing Homes Affect Long–Term Mortality?) … p.5131

Biomedical Engineering - Bioprosthetics.
Recent Findings in Bioprosthetics Described by Researchers from University of British Columbia (Computed tomography assessment for transcatheter aortic valve in valve implantation: The vancouver approach to predict anatomical risk for coronary …) … p.5132

Bone Research.
Recent Findings in Bone Research Described by Researchers from University of Bristol (Bone Mineral Density Is Positively Related to Carotid Intima–Media Thicness: Findings From a Population–Based Study in Adolescents and Premenopausal Women) … p.5133
Oncology - Brain Cancer. Recent Findings in Brain Cancer Described by Researchers from New York University (Phase I study of temozolomide in combination with thiotepa and carboplatin with autologous hematopoietic cell rescue in patients with malignant brain tumors with ...) ... p.5134

Brain Research. Recent Findings in Brain Research Described by Researchers from University of Groningen (PET Tracers for Imaging of ABC Transporters at the Blood–Brain Barrier: Principles and Strategies) ... p.5135

Heart Disorders and Diseases - Brugada Syndrome. Recent Findings in Brugada Syndrome Described by Researchers from University of Montreal (Predictors of Ventricular Arrhythmias and Sudden Death in a Quebec Cohort With Brugada Syndrome) ... p.5136

Oncology - Cancer Research. Recent Findings in Cancer Research Described by Researchers from University Medical Center (Role of tumour–free margin distance for loco–regional control in vulvar cancer—a subset analysis of the Arbeitsgemeinschaft Gynakologische Onkologie ...) ... p.5137

Drugs and Therapies - Cancer Therapy. Recent Findings in Cancer Therapy Described by Researchers from Silesian Technical University [Miktoarm star copolymers from D–(–)–salicin core aggregated into dandelion–like structures as anticancer drug delivery systems: synthesis, ...] ... p.5138

Oncology - Carcinoid Tumor. Recent Findings in Carcinoid Tumor Described by Researchers from University Hospital (A case of parenchymal–sparing right mainstem bronchial sleeve resection for carcinoid tumor) ... p.5139

Oncology - Carcinoma Ex Pleomorphic Adenoma. Recent Findings in Carcinoma Ex Pleomorphic Adenoma Described by Researchers from University of Copenhagen (The interleukin–6/Janus kinase/STAT3 pathway in pleomorphic adenoma and carcinoma ex pleomorphic adenoma of the lacrimal gland) ... p.5140

Cardiology. Recent Findings in Cardiology Described by Researchers from Ohio State University (Controllable Large–Scale Transfection of Primary Mammalian Cardiomyocytes on a Nanochannel Array Platform) ... p.5141

Drugs and Therapies - Cardiovascular Agents. Recent Findings in Cardiovascular Agents Described by Researchers from College of Pharmacy and Health Sciences (A–803467, a tetrodotoxin–resistant sodium channel blocker, modulates ABCG2–mediated MDR in vitro and in vivo) ... p.5142

Drugs and Therapies - Central Nervous System Agents. Recent Findings in Central Nervous System Agents Described by P.B. Prajapati and Colleagues (y Development and Validation of Stability–Indicating HPTLC Method for Estimation of Naratriptan Hydrochloride in Its Pharmaceutical Dosage Form and Its ...) ... p.5143

Oncology - Cervical Cancer. Recent Findings in Cervical Cancer Described by Researchers from National Cancer Registry (Temporal changes in the cervical cancer burden in Bulgaria: Implications for eastern European countries going through transition) ... p.5144

Drugs and Therapies - Chemotherapy. Recent Findings in Chemotherapy Described by Researchers from Kansai Medical University (Clinical outcomes of pancreatic ductal adenocarcinoma resection following neoadjuvant chemoradiation therapy vs. chemotherapy) ... p.5145
Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Recent Findings in Chronic Obstructive Pulmonary Disease Described by Researchers from Montpellier University Hospital (CCSP G38A polymorphism environment interactions regulate CCSP levels differentially in COPD) … p.5146

Mouth Disease and Conditions - Cleft Lip and Palate. Recent Findings in Cleft Lip and Palate Described by Researchers from University of Regensburg (Van der Woude and Popliteal Pterygium Syndromes: Broad Intrafamilial Variability in a Three Generation Family with Mutation in IRF6) … p.5147

Clinical Research - Clinical Trials and Studies. Recent Findings in Clinical Trials and Studies Described by Researchers from Autonomous University (Cancer randomized trials showed that dissemination bias is still a problem to be solved) … p.5148

Clinical Research - Clinical Trials and Studies. Recent Findings in Clinical Trials and Studies Described by Researchers from Loyola University (Protein kinase G signaling in cardiac pathophysiology: Impact of proteomics on clinical trials) … p.5149

Adrenal Gland Diseases and Conditions - Cushing Syndrome. Recent Findings in Cushing Syndrome Described by Researchers from Medical College of Wisconsin (Post-surgical Recurrent Cushing Disease: Clinical Benefit Of Early Intervention In Patients With Normal Urinary Free Cortisol) … p.5150

Lung Diseases and Conditions - Cystic Fibrosis. Recent Findings in Cystic Fibrosis Described by Researchers from General Hospital (Duration of intravenous antibiotic therapy in people with cystic fibrosis) … p.5151

Dual-Energy X-Ray Absorptiometry. Recent Findings in Dual-Energy X-Ray Absorptiometry Described by Researchers from University of Sao Paulo (Visceral fat measured by DXA is associated with increased risk of non-spine fractures in nonobese elderly women: a population-based …) … p.5152

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. Recent Findings in Epstein-Barr Virus Described by Researchers from Sun Yat-Sen University Cancer Center (Risk stratification based on change in plasma Epstein-Barr virus DNA load after treatment in nasopharyngeal carcinoma) … p.5153

Gram-Negative Bacteria - Escherichia coli. Recent Findings in Escherichia coli Described by Researchers from French National Institute for Agricultural Research (INRA) (Escherichia coli ClbS is a colibactin resistance protein) … p.5155

Neuropeptides - Galanin. Recent Findings in Galanin Described by Researchers from University of Cambridge (Galanin inhibits GLP–1 and GIP secretion via the GAL1 receptor in enteroendocrine L and K cells) … p.5155

Genetics - Genetic Epidemiology. Recent Findings in Genetic Epidemiology Described by Researchers from School of Public Health (A perspective on interaction effects in genetic association studies) … p.5157

Eye Diseases and Conditions - Glaucoma. Recent Findings in Glaucoma Described by Researchers from Oregon Health and Science University (Baseline Fourier–Domain Optical Coherence Tomography Structural Risk Factors for Visual Field Progression in the Advanced Imaging for Glaucoma Study) … p.5158
Drugs and Therapies - Health-System Pharmacy. Recent Findings in Health–System Pharmacy Described by Researchers from Eshelman School of Pharmacy (The layered learning practice model: Lessons learned from implementation) … p.5159

Heart Disorders and Diseases - Heart Attack. Recent Findings in Heart Attack Described by Researchers from Medical College of Wisconsin (Acute Myocardial Infarction in Adult Congenital Patients with Bodily Isomerism) … p.5160

Heart Disorders and Diseases - Heart Attack. Recent Findings in Heart Attack Described by Researchers from Seoul National University (A multicentre observational study of inter–hospital transfer for post–resuscitation care after out–of–hospital cardiac arrest) … p.5161

Heart Disorders and Diseases - Heart Attack. Recent Findings in Heart Attack Described by Researchers from Xi'an Jiaotong University (Chest Pain after Aortic Valve Replacement: Rupture of Right Sinus of Valsalva Presenting as Myocardial Infarction) … p.5162

Heart Disorders and Diseases - Heart Failure. Recent Findings in Heart Failure Described by Researchers from University of Washington (Neonatal Diesel Exhaust Particulate Exposure Does Not Predispose Mice to Adult Cardiac Hypertrophy or Heart Failure) … p.5163

Liver Diseases and Conditions - Hepatitis C Virus. Recent Findings in Hepatitis C Virus Described by V. Knop and Colleagues (Regression of fibrosis and portal hypertension in HCV–associated cirrhosis and sustained virologic response after interferon–free antiviral therapy) … p.5164

Immunology - Immune System. Recent Findings in Immune System Described by Researchers from Sheffield Teaching Hospitals (The therapeutic potential of epigenetic manipulation during infectious diseases) … p.5166

Ischemia. Recent Findings in Ischemia Described by Researchers from Institute of Biomedical Research (Polyethylene Glycol Preconditioning: An Effective Strategy to Prevent Liver Ischemia Reperfusion Injury) … p.5167

Oncology - Liver Cancer. Recent Findings in Liver Cancer Described by Researchers from Saitama Medical University (Long–term outcome of 154 patients receiving balloon–occluded retrograde transvenous obliteration for gastric fundal varices) … p.5168

Oncology - Lung Cancer. Recent Findings in Lung Cancer Described by Researchers from Department of Radiation Oncology (Focal Adhesion Kinase Regulates the DNA Damage Response and Its Inhibition Radiosensitizes Mutant KRAS Lung Cancer) … p.5169

Oncology - Lung Cancer. Recent Findings in Lung Cancer Described by Researchers from Yale University (EGFR–GRB2 Protein Colocalization Is a Prognostic Factor Unrelated to Overall EGFR Expression or EGFR Mutation in Lung Adenocarcinoma) … p.5170

Oncology - Malignant Pleural Effusion. Recent Findings in Malignant Pleural Effusion Described by Researchers from Chinese People's Liberation Army General Hospital (Combination use of paclitaxel and avastin enhances treatment effect for the NSCLC patients with malignant pleural …) … p.5171
Membrane Proteins - Membrane Glycoproteins. Recent Findings in Membrane Glycoproteins Described by Researchers from Baker IDI Heart and Diabetes Institute (Small GTPase ARF6 Regulates Endocytic Pathway Leading to Degradation of ATP–Binding Cassette Transporter A1) ... p.5172

Autoimmune Diseases and Conditions - Multiple Sclerosis. Recent Findings in Multiple Sclerosis Described by Researchers from University of Medicine and Dentistry of New Jersey (UMDNJ) (Predictive cytokine biomarkers of clinical response to glatiramer acetate therapy in multiple sclerosis) ... p.5173

Nutritional and Metabolic Diseases and Conditions - Obesity. Recent Findings in Obesity Described by J. Lopez–Minguez and Colleagues (Circadian rhythms, food timing and obesity) ... p.5174

Nutritional and Metabolic Diseases and Conditions - Obesity. Recent Findings in Obesity Described by Researchers from University of Colorado (Body Mass Index and the Spontaneous Onset of Parturition) ... p.5175

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Recent Findings in Obstructive Sleep Apnea Described by R. Soca and Colleagues (Parasomnia Overlap Disorder with Sexual Behaviors during Sleep in a Patient with Obstructive Sleep Apnea) ... p.5176

Oncology. Recent Findings in Oncology Described by Researchers from Peking University [Crosstalk between autophagy and intracellular radiation response (Review)] ... p.5177

Cardiovascular Diseases and Conditions - Primary Graft Dysfunction. Recent Findings in Primary Graft Dysfunction Described by Researchers from University of Strasbourg (Microparticles: A new insight into lung primary graft dysfunction?) ... p.5178

Oncology - Prostate Cancer. Recent Findings in Prostate Cancer Described by Researchers from CSIR (Disulfiram and Its Novel Derivative Sensitize Prostate Cancer Cells to the Growth Regulatory Mechanisms of the Cell by Re–Expressing the Epigenetically Repressed Tumor ...) ... p.5179

Oncology - Prostate Cancer. Recent Findings in Prostate Cancer Described by Researchers from Case Western Reserve University (Contemporary National Trends of Prostate Cancer Screening Among Privately Insured Men in the United States) ... p.5180

Health and Medicine - Pulmonary Medicine. Recent Findings in Pulmonary Medicine Described by Researchers from University of Turin (Infant weight trajectories and early childhood wheezing: the NINFEA birth cohort study) ... p.5181

Science. Recent Findings in Science Described by Researchers from Leiden University (The effect of standardized food intake on the association between BMI and H–1–NMR metabolites) ... p.5182

Science. Recent Findings in Science Described by T. Yeo and Colleagues (Microfluidic enrichment for the single cell analysis of circulating tumor cells) ... p.5183

Oncology - Squamous Cell Carcinoma. Recent Findings in Squamous Cell Carcinoma Described by Researchers from Southern Medical University (MicroRNA–127 is a tumor suppressor in human esophageal squamous cell carcinoma through the regulation of oncogene FMNL3) … p.5185

Steatosis. Recent Findings in Steatosis Described by Researchers from Veterans General Hospital (Aliskiren Reduces Hepatic steatosis and Epididymal Fat Mass and Increases Skeletal Muscle Insulin Sensitivity in High–Fat Diet–Fed Mice) … p.5186

Respiratory Tract Diseases and Conditions - Thoracic Aortic Aneurysm. Recent Findings in Thoracic Aortic Aneurysm Described by Researchers from University of Pittsburgh (Regional Disruptions in Endothelial Nitric Oxide Pathway Associated With Bicuspid Aortic Valve) … p.5187

Mycobacterium Infections - Tuberculosis. Recent Findings in Tuberculosis Described by Researchers from Ishikawa Prefectural Central Hospital (Paradoxical reaction to antituberculosis therapy after 6 months of treatment for pulmonary tuberculosis: A case report) … p.5188

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Recent Findings in Type 1 Diabetes Mellitus Described by Researchers from Sahlgrenska University Hospital (LDL cholesterol is not a good marker of cardiovascular risk in Type 1 diabetes) … p.5189

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Recent Findings in Type 2 Diabetes Described by Researchers from Johns Hopkins University Bloomberg School of Public Health (Triglycerides to high–density lipoprotein–cholesterol ratio, glycemic control and cardiovascular risk in obese patients …)

Eye Diseases and Conditions - Uveitis. Recent Findings in Uveitis Described by Researchers from University Hospital (Adalimumab for Treatment of Noninfectious Uveitis Immunogenicity and Clinical Relevance of Measuring Serum Drug Levels and Antidrug Antibodies) … p.5191

Liver Diseases and Conditions - Chronic Hepatitis C Virus. Recent Reports from Burnet Institute Highlight Findings in Chronic Hepatitis C Virus (Cost–effectiveness of treating chronic hepatitis C virus with direct–acting antivirals in people who inject drugs in Australia) … p.5193

Oncology - Brain Cancer. Recent Reports from Case Western Reserve University Highlight Findings in Brain Cancer (Crossing the barrier: treatment of brain tumors using nanochain particles) … p.5194

Oncology - Head and Neck Cancer. Recent Reports from Department of Medical Oncology Highlight Findings in Head and Neck Cancer (Cetuximab promotes epithelial to mesenchymal transition and cancer associated fibroblasts in patients with head and neck cancer) … p.5195

Nutritional and Metabolic Diseases and Conditions - Obesity. Recent Reports from Florida State University Highlight Findings in Obesity (Combined whole–body vibration training and l–citrulline supplementation improves pressure wave reflection in obese postmenopausal women) … p.5196
Connective Tissue Cells. Recent Reports from French National Institute of Health and Medical Research (INSERM) Highlight Findings in Connective Tissue Cells (TGF–b1 and GDF5 Act Synergistically to Drive the Differentiation of Human Adipose Stromal Cells toward Nucleus ...) ... p.5197

Liver Diseases and Conditions - Non-Alcoholic Steatohepatitis. Recent Reports from Gradenigo Hospital Highlight Findings in Non–Alcoholic Steatohepatitis (Non–alcoholic steatohepatitis: emerging molecular targets and therapeutic strategies) ... p.5198

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Recent Reports from Okayama University Graduate School of Medicine Highlight Findings in Chronic Hepatitis B Virus (Entecavir Reduces Hepatocarcinogenesis in Chronic Hepatitis B Patients) ... p.5199

Gram-Negative Bacteria - Neisseria meningitidis. Recent Reports from Rice University Highlight Findings in Neisseria meningitidis (The Neisseria meningitidis CRISPR–Cas9 System Enables Specific Genome Editing in Mammalian Cells) ... p.5200

Musculoskeletal Diseases and Conditions - Rheumatic Diseases and Conditions. Recent Reports from Rowan University Highlight Findings in Rheumatic Diseases and Conditions (The role of ANKH in pathologic mineralization of cartilage) ... p.5201

Oncology - Carcinomas. Recent Reports from Taipei Medical University Highlight Findings in Carcinomas (Melatonin inhibits MMP–9 transactivation and renal cell carcinoma metastasis by suppressing Akt–MAPKs pathway and NF–kB DNA–binding activity) ... p.5202

Drugs and Therapies - Anticholinergics. Recent Reports from Tianjin Medical University Highlight Findings in Anticholinergics (a–Melanocyte–stimulating hormone ameliorates ocular surface dysfunctions and lesions in a scopolamine–induced dry eye model via PKA–CREB and MEK–Erk pathways) ... p.5203

Eye Diseases and Conditions - Cataracts. Recent Reports from University of Sydney Highlight Findings in Cataracts (Sporadic and Familial Congenital Cataracts: Mutational Spectrum and New Diagnoses Using Next–Generation Sequencing) ... p.5204

Oncology - Liver Cancer. Recent Reports from University of Ulsan College of Medicine Highlight Findings in Liver Cancer (Inactivation of Hippo Pathway Is Significantly Associated with Poor Prognosis in Hepatocellular Carcinoma) ... p.5205

Polyomavirus. Recent Research from Academic Medical Center Highlight Findings in Polyomavirus (Predominant Tubular Interleukin–18 Expression in Polyomavirus–Associated Nephropathy) ... p.5206

Gram-Negative Bacteria - Serratia. Recent Research from Alagappa University Highlight Findings in Serratia (Piper betle and its bioactive metabolite phytol mitigates quorum sensing mediated virulence factors and biofilm of nosocomial pathogen Serratia marcescens in vitro) ... p.5207

Cardiothoracic. Recent Research from Albert Einstein College of Medicine Highlight Findings in Cardiothoracic (Sex and the Risk of AKI Following Cardio–thoracic Surgery: A Meta–Analysis) ... p.5208

Drugs and Therapies - Antibiotics. Recent Research from Arak University Highlight Findings in Antibiotics (Diaminomaleonitrile–based azo receptors: Synthesis, DFT studies and their antibacterial activities) ... p.5209
Heart Disorders and Diseases - Cardiac Tamponade. Recent Research from Catholic University of Korea Highlight Findings in Cardiac Tamponade (Cardiac Tamponade due to Suprahepatic Surgical Exploration in Liver Retransplantation: A Case Report) ... p.5210

Heart Disorders and Diseases - Atrial Fibrillation. Recent Research from Chonnam National University Hospital Highlight Findings in Atrial Fibrillation (Predictors of reversible severe functional tricuspid regurgitation in patients with atrial fibrillation) ... p.5211

Membrane Proteins - Vesicular Transport Proteins. Recent Research from Chubu University Highlight Findings in Vesicular Transport Proteins (Caveolin–1 facilitates internalization and degradation of ABCA1 and probucol oxidative products interfere with this reaction to increase HDL biogenesis) ... p.5212

Neutral Amino Acids. Recent Research from Dalian Medical University Highlight Findings in Neutral Amino Acids (Evaluation of PFOS–mediated neurotoxicity in rat primary neurons and astrocytes cultured separately or in co–culture) ... p.5213

Pain Medicine - Anesthesiology. Recent Research from Dokkyo Medical University Highlight Findings in Anesthesiology (A proposal for a new scoring system to predict difficult ventilation through a supraglottic airway) ... p.5214

Hematology - Blood Coagulation Factors. Recent Research from Erasmus University Highlight Findings in Blood Coagulation Factors (von Willebrand Factor, ADAMTS13 Activity, and Decline in Kidney Function: A Population–Based Cohort Study) ... p.5215

www.NewsRx.com

Oncology - Esophageal Cancer. Recent Research from Federal University Highlight Findings in Esophageal Cancer (Unchanging pattern of prevalence of esophageal cancer, overall and by histological subtype, in the endoscopy service of the main referral hospital in the central ...) ... p.5216

Terminal Care. Recent Research from Free University Highlight Findings in Terminal Care (Euthanasia in Belgium: trends in reported cases between 2003 and 2013) ... p.5217

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Recent Research from Goethe–University Hospital Highlight Findings in Subarachnoid Hemorrhage (Cerebral vasospasm and delayed cerebral infarctions in 225 patients with non–aneurysmal subarachnoid hemorrhage: the underestimated risk of Fisher 3 ...) ... p.5218

Oncology - Oral Cancer. Recent Research from Gujarat Cancer and Research Institute Highlight Findings in Oral Cancer (Role of miRNA dynamics and cytokine profile in governing CD44v6/Nanog/PTEN axis in oral cancer: modulating the master regulators) ... p.5220

Drugs and Therapies - Phosphodiesterase Inhibitors. Recent Research from H. Lundbeck AS Highlight Findings in Phosphodiesterase Inhibitors (Novel Approach toward 3,3–Difluoropiperidines from Easily Available Starting Materials and Synthesis of a New Phosphodiesterase Inhibitor) ... p.5221

Hematologic Diseases and Conditions - Sickle Cell Anemia. Recent Research from HCPA Highlight Findings in Sickle Cell Anemia (The role of BCL11A and HMIP–2 polymorphisms on endogenous and hydroxyurea induced levels of fetal hemoglobin in sickle cell anemia patients from southern Brazil) ... p.5222
Liver Diseases and Conditions - Hepatitis. Recent Research from Huazhong University of Science and Technology Highlight Findings in Hepatitis (Sustained immune control in HBeAg–positive patients who switched from entecavir therapy to pegylated interferon–alpha 2a: 1 year follow–up of ...) … p.5223

Gram-Negative Bacteria - Vibrio parahaemolyticus. Recent Research from Jimei University Highlight Findings in Vibrio parahaemolyticus (PI3K–AKT signaling pathway is involved in hypoxia/thermal–induced immunosuppression of small abalone Haliotis diversicolor) … p.5224

Lung Diseases and Conditions - Acute Respiratory Distress Syndrome. Recent Research from Ludwig–Maximilians–University Highlight Findings in Acute Respiratory Distress Syndrome (Predictors of Inadequate Linezolid Concentrations after Standard Dosing in Critically Ill Patients) … p.5225

Oncology - Osteosarcomas. Recent Research from Mie University Highlight Findings in Osteosarcomas (STAT3 inhibitor, cucurbitacin I, is a novel therapeutic agent for osteosarcoma) … p.5226

Immune System Diseases and Conditions - HIV/AIDS. Recent Research from National Center for Global Health and Medicine Highlight Findings in HIV/AIDS (Prognosis of ocular syphilis in patients infected with HIV in the antiretroviral therapy era) … p.5227

Peripheral Artery Disease. Recent Research from Queen Margaret Hospital Highlight Findings in Peripheral Artery Disease (Ankle brachial index for the diagnosis of lower limb peripheral arterial disease) … p.5228

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Recent Research from Research Institute Highlight Findings in Type 1 Diabetes Mellitus (The role of FOXP3 in autoimmunity) … p.5230

Vinyl Compounds. Recent Research from Southeast University Highlight Findings in Vinyl Compounds (Use of polyvinlypyrrolidone–iodine solution for sterilisation and preservation improves mechanical properties and osteogenesis of allografts) … p.5231

Oncology - Carcinoma Ex Pleomorphic Adenoma. Recent Research from State University Highlight Findings in Carcinoma Ex Pleomorphic Adenoma (Carcinoma ex–pleomorphic adenoma derived from recurrent pleomorphic adenoma shows important difference by array CGH compared to recurrent pleomorphic ...) … p.5232

Lung Diseases and Conditions - Acute Chest Syndrome. Recent Research from Tabriz University of Medical Sciences Highlight Findings in Acute Chest Syndrome (Blood transfusions for treating acute chest syndrome in people with sickle cell disease) … p.5233

Genetics. Recent Research from Technical University Highlight Findings in Genetics (Design of a molecular support for cryo–EM structure determination) … p.5234

Bone Research. Recent Research from Tokyo Medical and Dental University Highlight Findings in Bone Research (Supramolecular inclusion complexation of simvastatin with methylated beta–cyclodextrins for promoting osteogenic differentiation) … p.5235

Oncology - Colon Cancer. Recent Research from Tokyo University of Agriculture and Technology Highlight Findings in Colon Cancer (Transcriptome and long noncoding RNA sequencing of three extracellular vesicle subtypes released from the human colon cancer LIM1863 cell ...)
January 14, 2017

Oncology - Head and Neck Cancer. Recent Research from Umea University Highlight Findings in Head and Neck Cancer (Motives that head and neck cancer patients have for contacting a specialist nurse – an empirical study) ... p.5237

Platinum Compounds. Recent Research from University of Algarve Highlight Findings in Platinum Compounds (Ecotoxicological assessment of the anticancer drug cisplatin in the polychaete Nereis diversicolor) ... p.5238

Nanotechnology - Nanoparticles. Recent Research from University of Coimbra Highlight Findings in Nanoparticles (Can lipid nanoparticles improve intestinal absorption?) ... p.5241

Information Technology - Information and Data Modeling. Recent Research from University of Heidelberg Highlight Findings in Information and Data Modeling (Comparative evaluation of methods approximating drug prescription durations in claims data: modeling, simulation, and application to real data) ... p.5242

Hematology - Blood Coagulation Factors. Recent Research from University of Malaysia Highlight Findings in Blood Coagulation Factors (Aptamer–based impedimetric determination of the human blood clotting factor IX in serum using an interdigitated electrode modified with a ZnO nanolayer) ... p.5243

www.NewsRx.com

Staph Infections. Recent Research from University of Maryland Highlight Findings in Staph Infections [Staphylococcal chromosomal cassettes mec (SCCmec): A mobile genetic element in methicillin–resistant Staphylococcus aureus] ... p.5244

Oncology - Squamous Cell Carcinoma. Recent Research from University of Nebraska Highlight Findings in Squamous Cell Carcinoma (Comparison of outcomes between rectal squamous cell carcinoma and adenocarcinoma) ... p.5245

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Recent Research from University of Otago Highlight Findings in Type 2 Diabetes (The Type 2 Diabetic Heart: Its Role in Exercise Intolerance and the Challenge to Find Effective Exercise Interventions) ... p.5246

Digestive System Diseases and Conditions - Chronic Pancreatitis. Recent Research from University of Pittsburgh Highlight Findings in Chronic Pancreatitis [A Carboxyl Ester Lipase (CEL) Mutant Causes Chronic Pancreatitis by Forming Intracellular Aggregates That Activate Apoptosis] ... p.5247

Oncology - Ovarian Cancer. Recent Research from University of Pittsburgh Highlight Findings in Ovarian Cancer (Symptom management in women with recurrent ovarian cancer: Do patients and clinicians agree on what symptoms are most important?) ... p.5248

Oncology - Liver Metastasis. Recent Research from University of Tokyo Highlight Findings in Liver Metastasis (The innate immune receptor Dectin–2 mediates the phagocytosis of cancer cells by Kupffer cells for the suppression of liver metastasis) ... p.5249
January 14, 2017

**Chemistry - Coordination Chemistry.**
Recent Research from University of Wroclaw Highlight Findings in Coordination Chemistry (Harnessing the power of fungal siderophores for the imaging and treatment of human diseases) ... p.5250

**Lung Diseases and Conditions - Cystic Fibrosis.** Recent Research from University of the South, Toulon–Var Highlight Findings in Cystic Fibrosis (The 1–Minute Sit–to–Stand Test in Adults With Cystic Fibrosis: Correlations With Cardiopulmonary Exercise Test, 6–Minute Walk Test, and Quadriceps ...) ... p.5251

**Sleep Diseases and Conditions - Sleep Disorders.** Recent Research from VAMC Highlight Findings in Sleep Disorders (Obese Veterans Enrolled in a Veterans Affairs Medical Center Outpatient Weight Loss Clinic Are Likely to Experience Disordered Sleep and Posttraumatic Stress) ... p.5252

**Leukocyte Diseases and Conditions - Leukopenia.** Recent Research from Yale University Highlight Findings in Leukopenia (Novel Developments in Leukopenia and Pancytopenia) ... p.5253

**Drugs and Therapies - Antigonadotropic Agents.** Recent Research from Yamaguchi University Highlight Findings in Antigonadotropic Agents (Development of hepatocellular carcinoma after long–term immunosuppressive therapy including danazol in a dog) ... p.5254

**Drugs and Therapies - Antiretrovirals.** Recent Studies by J. Fox and Co–Authors Add New Data to Antiretrovirals Findings (Pharmacokinetic/Pharmacodynamic Investigation of Single–Dose Oral Maraviroic in the Context of HIV–1 Pre–exposure Prophylaxis) ... p.5255

**www.NewsRx.com**

**Oncology - Non-Small Cell Lung Cancer.** Recent Studies by J.D. Song and Co–Authors Add New Data to Non–Small Cell Lung Cancer Findings (Non–small cell lung cancer: quantitative phenotypic analysis of CT images as a potential marker of prognosis) ... p.5256

**Environmental Health - Environmental Research and Public Health.** Recent Studies by L. Bauld and Co–Authors Add New Data to Environmental Research and Public Health Findings (English Stop–Smoking Services: One–Year Outcomes) ... p.5257

**Tropanes.** Recent Studies by L.V. Vasileva and Co–Authors Add New Data to Tropanes Findings (Beneficial effect of commercial Rhodiola extract in rats with scopolamine induced memory impairment on active avoidance) ... p.5258

**Oncology - Breast Cancer.** Recent Studies by M. Motallebnezhad and Co–Authors Add New Data to Breast Cancer Findings (Antiproliferative and apoptotic effects of a specific anti–insulin–like growth factor I receptor single chain antibody on breast cancer cells) ... p.5259

**Hip Fracture.** Recent Studies by M.S. Bakken and Co–Authors Add New Data to Hip Fracture Findings (Antipsychotic Drugs and Risk of Hip Fracture in People Aged 60 and Older in Norway) ... p.5260

**Immunology - Immunoglobulins.** Recent Studies by R.P. Carroll and Co–Authors Add New Data to Immunoglobulins Findings [Angiotensin II type–1 receptor antibody (AT1Rab) associated humoral rejection and the effect of peri operative plasma exchange and candesartan] ... p.5261
Mycobacterium Infections - Tuberculosis. Recent Studies from CIBERES Add New Data to Tuberculosis (Urgent Implementation in a Hospital Setting of a Strategy To Rule Out Secondary Cases Caused by Imported Extensively Drug–Resistant Mycobacterium tuberculosis Strains at Diagnosis) … p.5262

Heart Disorders and Diseases - Atrial Fibrillation. Recent Studies from Caritas Medical Center Add New Data to Atrial Fibrillation (Anticoagulation for stroke prevention in elderly patients with non–valvular atrial fibrillation: what are the obstacles?) … p.5263

Heart Disorders and Diseases - Heart Failure. Recent Studies from Charles University Add New Data to Heart Failure (Circulating Microparticles as a Predictor of Vascular Properties in Patients on Mechanical Circulatory Support; Hype or Hope?) … p.5264

Glycols. Recent Studies from Daiichi Sankyo Add New Data to Glycols (Evaluation of species difference in peripheral lymphocyte reduction effect of CS–0777, a sphingosine 1–phosphate receptor modulator, based on a pharmacokinetic/pharmacodynamic model ...) … p.5265

Post–Traumatic Stress Disorders. Recent Studies from Dicle University Add New Data to Post–Traumatic Stress Disorders (The Levels of Cortisol and Oxidative Stress and DNA Damage in Child and Adolescent Victims of Sexual Abuse with or without Post–Traumatic Stress Disorder) … p.5266

Central Nervous System Diseases and Conditions - Epilepsy. Recent Studies from Eli Lilly Add New Data to Epilepsy (Forebrain–selective AMPA–receptor antagonism guided by TARP gamma–8 as an antiepileptic mechanism) … p.5267

Blood Pressure. Recent Studies from Erasmus University Medical Center Add New Data to Blood Pressure (Reference Values for Noninvasive Blood Pressure in Children during Anesthesia A Multicentered Retrospective Observational Cohort Study) … p.5268

Oncology - Gastric Cancer. Recent Studies from Federal University Add New Data to Gastric Cancer (Current advances in targeted therapies for metastatic gastric cancer: improving patient care) … p.5269

Oncology - Gliomas. Recent Studies from Fudan University Add New Data to Gliomas (Effect of Hyperbaric Oxygen on the Growth of Intracranial Glioma in Rats) … p.5269

Drugs and Therapies - Immunotherapy. Recent Studies from German Cancer Research Center Add New Data to Immunotherapy (Neurological sequelae of cancer immunotherapies and targeted therapies) … p.5271

Angiology. Recent Studies from Harvard School of Medicine Add New Data to Angiology (Validity assessment of grading scales predicting complications from embolization of cerebral arteriovenous malformations) … p.5272

Salicylic Acid. Recent Studies from Hunan University Add New Data to Salicylic Acid (Salicylic Acid Regulates Pollen Tip Growth through an NPR3/NPR4–Independent Pathway) … p.5273

Drugs and Therapies - Immunotherapy. Recent Studies from Inje University Add New Data to Immunotherapy (Signal transducer and activator of transcription proteins: regulators of myeloid–derived suppressor cell–mediated immunosuppression in cancer) … p.5274
January 14, 2017

Science. Recent Studies from Institute of Food Research Add New Data to Science (Identification of critical paralog groups with indispensable roles in the regulation of signaling flow) … p.5275

Transplant Medicine - Kidney Transplants. Recent Studies from Institute of Science Add New Data to Kidney Transplants (Acute kidney transplant rejection mediated by angiotensin II type 1 receptor antibodies in a pediatric hyperimmune patient) … p.5276

Heart Disorders and Diseases - Atrial Fibrillation. Recent Studies from Istanbul University Add New Data to Atrial Fibrillation (Effects of inspiratory muscle training on pulmonary function, respiratory muscle strength and functional capacity in patients with atrial fibrillation: a randomized ...) … p.5277

Drugs and Therapies - Bromfenac Therapy. Recent Studies from JNT University Add New Data to Bromfenac Therapy (Development and Validation of a New Stability–Indicating RP–UPLC Method for the Quantitative Determination of Bromfenac Sodium and Its Impurities in an Ophthalmic Dosage Form) … p.5278

Ethanol. Recent Studies from Jawaharlal Nehru Technological University Add New Data to Ethanol (Chronic treatment with a selective 5-HT6 receptor antagonist alters the behavioral and neurochemical effects of ethanol in young adult rats) … p.5279

Heart Disorders and Diseases - Atrial Fibrillation. Recent Studies from Jikei University Add New Data to Atrial Fibrillation (Adenosine testing during cryoballoon ablation and radiofrequency ablation of atrial fibrillation: A propensity score–matched analysis) … p.5280

www.NewsRx.com

Heart Disorders and Diseases - Heart Disease. Recent Studies from Johns Hopkins University Add New Data to Heart Disease (The Risk Continuum of Atherosclerosis and its Implications for Defining CHD by Coronary Angiography) … p.5281

Apoptosis. Recent Studies from Konkuk University Add New Data to Apoptosis (Loss of PGL–1 and PGL–3, members of a family of constitutive germ–granule components, promotes germline apoptosis in C. elegans) … p.5282

Lipopolysaccharides. Recent Studies from Kunming Medical University Add New Data to Lipopolysaccharides (Protective effect of Xuebijing injection on D–galactosamine– and lipopolysaccharide–induced acute liver injury in rats through the regulation of p38 MAPK, MMP–9 ...) … p.5283

Heart Disorders and Diseases - Reciprocating Tachycardia. Recent Studies from Mahidol University Add New Data to Reciprocating Tachycardia (Determining the Site of Accessory Pathways in Orthodromic Reciprocating Tachycardia by Using the Response to Right Ventricular Pacing) … p.5284

Gram-Positive Bacteria - Clostridium difficile. Recent Studies from Manipal University Add New Data to Clostridium difficile (Characterization Of Clostridium Difficile Isolated From Diarrheal Patients In A Tertiary–care Hospital, Karnataka, South India) … p.5285

Drugs and Therapies - Natural Penicillins. Recent Studies from McMaster University Add New Data to Natural Penicillins (Structural and Kinetic Characterization of Diazabicyclooctanes as Dual Inhibitors of Both Serine–b–Lactamases and Penicillin–Binding Proteins) … p.5286
Suicide. Recent Studies from McMaster University Add New Data to Suicide (Body Mass Index Is an Important Predictor for Suicide: Results from a Systematic Review and Meta–Analysis) ... p.5287

Central Nervous System Diseases and Conditions - Meningitis. Recent Studies from Ministry of Health Add New Data to Meningitis (Population Pharmacokinetics and Dosing Regimen Optimization of Meropenem in Cerebrospinal Fluid and Plasma in Patients with Meningitis after Neurosurgery) ... p.5288

Oncology - Colon Cancer. Recent Studies from Nanjing University Add New Data to Colon Cancer (MicroRNAs as Regulators, Biomarkers and Therapeutic Targets in the Drug Resistance of Colorectal Cancer) ... p.5289

Drugs and Therapies - Antineoplastics. Recent Studies from National Defense Medical College Add New Data to Antineoplastics (Impact of UGT1A1 genotype upon toxicities of combination with low–dose irinotecan plus platinum) ... p.5290

Neurons. Recent Studies from National University Add New Data to Neurons (Evidence for a role of glycoprotein M6a in dendritic spine formation and synaptogenesis) ... p.5291

Drugs and Therapies - Antiepileptics. Recent Studies from Oslo University Hospital Add New Data to Antiepileptics (Discrepancies between physicians’ prescriptions and patients’ use of antiepileptic drugs) ... p.5292

Life Science Research - Molecular Biology. Recent Studies from Peking Union Medical College Add New Data to Molecular Biology (Semisynthetic and SAR Studies of Amide Derivatives of Neocrotocembraneic Acid as Potential Antitumor Agents) ... p.5293

www.NewsRx.com

Nursing - Oncology Nursing. Recent Studies from People’s Hospital Add New Data to Oncology Nursing (The Chinese version of hospital anxiety and depression scale: Psychometric properties in Chinese cancer patients and their family caregivers) ... p.5294

Drugs and Therapies - Central Nervous System Agents. Recent Studies from Purdue University Add New Data to Central Nervous System Agents (Improved Release of Celecoxib from High Drug Loading Amorphous Solid Dispersions Formulated with Polyacrylic Acid and Cellulose Derivatives) ... p.5295

Surgery - Heart Bypass Surgery. Recent Studies from Research Hospital Add New Data to Heart Bypass Surgery (Preoperative Platelet to Lymphocyte Ratio Is Associated with Early Morbidity and Mortality after Coronary Artery Bypass Grafting) ... p.5296

Oncology - Ovarian Cancer. Recent Studies from Sacred Heart Catholic University Add New Data to Ovarian Cancer (Laparoscopic Versus Laparotomic Surgical Staging for Early–Stage Ovarian Cancer: A Case–Control Study) ... p.5297

Cardiovascular Diseases and Conditions - Atherosclerosis. Recent Studies from School of Medicine Add New Data to Atherosclerosis (Intraoperative middle cerebral artery pressure measurements during superficial temporal artery to middle cerebral artery bypass procedures in patients with cerebral ...) ... p.5298

Life Science Research - Molecular and Cellular Biology. Recent Studies from Scripps Research Institute Add New Data to Molecular and Cellular Biology (CRY2 and FBXL3 Cooperatively Degrade c–MYC) ... p.5299
Oncology - Pancreatic Cancer. Recent Studies from Shanghai Jiao–Tong University Add New Data to Pancreatic Cancer (Periostin promotes the chemotherapy resistance to gemcitabine in pancreatic cancer) … p.5300

Heart Disorders and Diseases - Heart Failure. Recent Studies from St Anselm College Add New Data to Heart Failure (Planning for Deactivation of Implantable Cardioverter Defibrillators at the End of Life in Patients With Heart Failure) … p.5302

Blood Diseases and Conditions - Sepsis. Recent Studies from Sungkyunkwan University Add New Data to Sepsis (Genipin alleviates sepsis–induced liver injury by restoring autophagy) … p.5303

Life Science Research - Molecular and Cellular Biology. Recent Studies from Swiss Federal Institute of Technology Add New Data to Molecular and Cellular Biology (The MMS22L–TONSL heterodimer directly promotes RAD51–dependent recombination upon replication stress) … p.5304

Apoptosis. Recent Studies from Takeda Pharmaceutical Add New Data to Apoptosis [An inhibitor of apoptosis protein antagonist T–3256336 potentiates the antitumor efficacy of the Ned8–activating enzyme inhibitor pevonedistat (TAK–924/MLN4924)] … p.5305

Therapeutics. Recent Studies from University Health Network Add New Data to Therapeutics (Investigation of the 4D composite MR image distortion field associated with tumor motion for MR–guided radiotherapy) … p.5306

Oncology - Gastric Cancer. Recent Studies from University Hospital Add New Data to Gastric Cancer (In the nick of time: arterial thrombosis on starting combination chemotherapy in metastatic gastric adenocarcinoma) … p.5307

Oncology - Liver Cancer. Recent Studies from University Hospital Add New Data to Liver Cancer (Prognostic Value of Pre–transplantation Serum Alpha–Fetoprotein Levels in Hepatocellular Carcinoma Recurrence) … p.5308

Cardiovascular Research. Recent Studies from University Medical Center Add New Data to Cardiovascular Research (Bisphosphonates for cardiovascular risk reduction: A systematic review and meta–analysis) … p.5309

Drugs and Therapies - Central Nervous System Agents. Recent Studies from University Medical Center Add New Data to Central Nervous System Agents [Counter–flow suggests transport of dantrolene and 5–OH dantrolene by the organic anion transporters 2 (OAT2) and 3 (OAT3)] … p.5310

Biotechnology - Cancer Gene Therapy. Recent Studies from University of Alberta Add New Data to Cancer Gene Therapy (Single and Combinational siRNA Therapy of Cancer Cells: Probing Changes in Targeted and Nontargeted Mediators after siRNA Treatment) … p.5311

Oncology. Recent Studies from University of Bath Add New Data to Oncology (MEK1 and MEK2 inhibitors and cancer therapy: the long and winding road) … p.5312

Diabetes. Recent Studies from University of California Add New Data to Diabetes (Simultaneous in vivo assessment of cardiac and hepatic metabolism in the diabetic rat using hyperpolarized MRS) … p.5313
Mosquito-Borne Diseases - Zika Virus. Recent Studies from University of California Add New Data to Zika Virus (Zika virus cell tropism in the developing human brain and inhibition by azithromycin) ... p.5314

Oncology - Thyroid Cancer. Recent Studies from University of Catania Add New Data to Thyroid Cancer (Outcome of the Diffuse Sclerosing Variant of Papillary Thyroid Cancer: A Meta–Analysis) ... p.5315

Drugs and Therapies - Antifungals. Recent Studies from University of Texas Add New Data to Antifungals (Albumin Enhances Caspofungin Activity against Aspergillus Species by Facilitating Drug Delivery to Germinating Hyphae) ... p.5317

Gram-Negative Bacteria - Pseudomonas aeruginosa. Recent Studies from University of Texas Add New Data to Pseudomonas aeruginosa (Ceftazidime/Avibactam: Who Says You Can't Teach an Old Drug New Tricks?) ... p.5318

Kidney Diseases and Conditions - Chronic Kidney Disease. Recent Studies from University of Tokyo Add New Data to Chronic Kidney Disease (Expanding roles of the hypoxia–response network in chronic kidney disease) ... p.5320

Oncology - Gastric Cancer. Recent Studies from University of Tokyo Add New Data to Gastric Cancer (Production of Cisplatin–Incorporating Hyaluronan Nanogels via Chelating Ligand–Metal Coordination) ... p.5321

www.NewsRx.com

Hereditary Angioedema. Recent Studies from University of Toronto Add New Data to Hereditary Angioedema (C1–esterase inhibitor for short–term prophylaxis in a patient with hereditary angioedema with normal C1 inhibitor function) ... p.5322

Vaccination. Recent Studies from University of Wollongong Add New Data to Vaccination (Australian general practice nurse's knowledge, attitudes and practices regarding influenza vaccination: a cross–sectional survey) ... p.5323

Drugs and Therapies - Cancer Therapy. Recent Studies from Xi'an Jiao Tong University Add New Data to Cancer Therapy (HMGB1–mediated autophagy decreases sensitivity to oxymatrine in SW982 human synovial sarcoma cells) ... p.5324

Parkinson's Disease. Recent Studies from Yantai University Add New Data to Parkinson's Disease (Intranasal delivery of rotigotine to the brain with lactoferrin–modified PEG–PLGA nanoparticles for Parkinson's disease treatment) ... p.5325

Drugs and Therapies - Cardiovascular Agents. Recent Studies from Yonsei University Add New Data to Cardiovascular Agents (Simultaneous Determination of Sildenafil, Tadalafil, and Vardenafil in Pharmaceutical Preparations by High–Temperature Gas Chromatography/Mass Spectrometry) ... p.5326

Ischemia. Recent Studies from Zhongnan Hospital of Wuhan University Add New Data to Ischemia (Effect Of Intraperitoneal Resuscitation With Different Concentrations Of Sodium Pyruvate On Intestinal Ischemia Reperfusion Injury In Hemorrhagic Shock Rat) ... p.5327
Airborne Disease. Report Summarizes Airborne Disease Study Findings from N. Ogata and Co–Researchers (Inactivation of Airborne Bacteria and Viruses Using Extremely Low Concentrations of Chlorine Dioxide Gas) … p.5328

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Report Summarizes Alzheimer Disease Study Findings from University of Jinan (RPS23RG1 reduces Ab oligomer–induced synaptic and cognitive deficits) … p.5329

Drugs and Therapies - Antibiotics. Report Summarizes Antibiotics Study Findings from Medical University (Robust HPLC–MS/MS method for levofloxacin and ciprofloxacin determination in human prostate tissue) … p.5331

Drugs and Therapies - Antibiotics. Report Summarizes Antibiotics Study Findings from Shenyang Pharmaceutical University (Determination of Doxorubicin in Stealth Hyaluronic Acid–Based Nanoparticles in Rat Plasma by the Liquid–Liquid Nanoparticles–Breaking Extraction Method: ...) … p.5332

Drugs and Therapies - Antiemetic-Antivertigo Agents. Report Summarizes Antiemetic–Antivertigo Agents Study Findings from University of Bari (Carbon monoxide contributes to the constipating effects of granisetron in rat colon) … p.5333

Drugs and Therapies - Antiretrovirals. Report Summarizes Antiretrovirals Study Findings from Academic Medical Center (White matter hyperintensities in relation to cognition in HIV–infected men with sustained suppressed viral load on combination antiretroviral therapy) … p.5334

Heart Disorders and Diseases - Arrhythmogenic Right Ventricular Dysplasia. Report Summarizes Arrhythmogenic Right Ventricular Dysplasia Study Findings from University Medical Center (Prolonged Electromechanical Interval Unmasks Arrhythmogenic Right Ventricular Dysplasia/Cardiomyopathy in the Subclinical Stage) … p.5337

Oncology - Astrocytomas. Report Summarizes Astrocytomas Study Findings from Copenhagen University Hospital (A new NFIA:RAF1 fusion activating the MAPK pathway in pilocytic astrocytoma) … p.5338

Heart Disorders and Diseases - Atrial Fibrillation. Report Summarizes Atrial Fibrillation Study Findings from University Health Network (Identifying Patients With Atrial Fibrillation in Administrative Data) … p.5340
Heart Disorders and Diseases - Atrial Fibrillation. Report Summarizes Atrial Fibrillation Study Findings from Zhejiang University (Perindopril for the prevention of atrial fibrillation recurrence after radiofrequency catheter ablation: One–year experience) … p.5341

Chemistry - Biochemistry. Report Summarizes Biochemistry Study Findings from Dental Research Institute (Epigenetic regulation of CFTR in salivary gland) … p.5342

Blood Pressure. Report Summarizes Blood Pressure Study Findings from School of Medicine (The response of the vestibulosympathetic reflex to linear acceleration in the rat) … p.5343

Blood Pressure. Report Summarizes Blood Pressure Study Findings from University of Nove Julho (Resistance or aerobic training decreases blood pressure and improves cardiovascular autonomic control and oxidative stress in hypertensive menopausal rats) … p.5344

Drugs and Therapies - Botulinum Toxin Therapy. Report Summarizes Botulinum Toxin Therapy Study Findings from Aristotle University (Do we understand how botulinum toxin works and have we optimized the way it is administered to the bladder? ICI–RS 2014) … p.5345

Oncology - Bowel Cancer. Report Summarizes Bowel Cancer Study Findings from Department of Medical Oncology (Survival impact of the Australian National Bowel Cancer Screening Programme) … p.5346

Cardiology. Report Summarizes Cardiology Study Findings from Monash University (Benign Cardiac Effects of Hemoglobin H Disease) … p.5348

Cardiology. Report Summarizes Cardiology Study Findings from University Hospital (Symptoms Of Cardiac Anxiety In Family Members Of Intensive Care Unit Patients) … p.5349

Central Nervous System Diseases and Conditions - Cerebral Infarction. Report Summarizes Cerebral Infarction Study Findings from Zhejiang University (Serial Attacks: Contralateral Hematoma Secondary to Decompressive Cranietomy for Traumatic Brain Injury Led to Posttraumatic Cerebral Infarction) … p.5351

Eye Diseases and Conditions - Coloboma. Report Summarizes Coloboma Study Findings from University of Pittsburgh (The hyaloid vasculature facilitates basement membrane breakdown during choroid fissure closure in the zebrafish eye) … p.5353

Oncology - Cutaneous Melanoma. Report Summarizes Cutaneous Melanoma Study Findings from Laboratory for Molecular Cancer Biology (The emerging role of long non–coding RNAs in cutaneous melanoma) … p.5354
Drugs and Therapies - Dermatological Agents. Report Summarizes Dermatological Agents Study Findings from McGill University (Confounding by drug formulary restriction in pharmacoepidemiologic research) … p.5355

Hematologic Diseases and Conditions - Disseminated Intravascular Coagulation. Report Summarizes Disseminated Intravascular Coagulation Study Findings from University of Ulsan [Performance Evaluation of Five Different Disseminated Intravascular Coagulation (DIC) Diagnostic Criteria for Predicting Mortality in Patients with …] … p.5356

Oncology - Epithelial Ovarian Cancer. Report Summarizes Epithelial Ovarian Cancer Study Findings from Delaware State University (Age–specific discrimination of blood plasma samples of healthy and ovarian cancer prone mice using laser–induced breakdown spectroscopy) … p.5360

Gram–Negative Bacteria - Escherichia coli. Report Summarizes Escherichia coli Study Findings from University of Oxford [Complete Sequencing of Plasmids Containing bla(OXA–163) and bla(OXA–48) in Escherichia coli Sequence Type 131] … p.5361

Ethylamines. Report Summarizes Ethylamines Study Findings from University of Oregon (Evidence of a broad histamine footprint on the human exercise transcriptome) … p.5362

Immune System Diseases and Conditions - HIV/AIDS. Report Summarizes HIV/AIDS Study Findings from Royal Free Hospital (Clinical characteristics and outcomes of HIV–associated immune complex kidney disease) … p.5364

Immune System Diseases and Conditions - HIV/AIDS. Report Summarizes HIV/AIDS Study Findings from University of Missouri (NMR detection of intermolecular interaction sites in the dimeric 5’–leader of the HIV–1 genome) … p.5365

Heart Disorders and Diseases - Heart Failure. Report Summarizes Heart Failure Study Findings from Department of Internal Medicine (The Lymphocyte Count and Neutrophil/Lymphocyte Ratio are Independent Predictors for Adverse Cardiac Events in Ischemic Heart Failure but not with Non–ischemic …) … p.5366
Heart Disorders and Diseases - Heart Failure. Report Summarizes Heart Failure Study Findings from University of Pittsburgh (Growing Relevance of Cardiac Rehabilitation for an Older Population With Heart Failure) … p.5367

Central Nervous System Diseases and Conditions - Intracranial Aneurysm. Report Summarizes Intracranial Aneurysm Study Findings from University Hospital (Unruptured intracranial aneurysms: development, rupture and preventive management) … p.5369

Ischemia. Report Summarizes Ischemia Study Findings from Catholic University of Leuven (Steroids can reduce warm ischemic reperfusion injury in a porcine donation after circulatory death model with ex vivo lung perfusion evaluation) … p.5370

Oncology - Liver Cancer. Report Summarizes Liver Cancer Study Findings from University of Franche–Comte (Tumor control by human cytomegalovirus in a murine model of hepatocellular carcinoma) … p.5371

Oncology - Lung Cancer. Report Summarizes Lung Cancer Study Findings from Fujita Health University (Classification of 27 Tumor–Associated Antigens by Histochemical Analysis of 36 Freshly Resected Lung Cancer Tissues) … p.5372

Immune System Diseases and Conditions - Lymphopenia. Report Summarizes Lymphopenia Study Findings from IDIBAPS (Selective Sphingosine 1–Phosphate Receptor 1 Agonist Is Protective Against Ischemia/Reperfusion in Mice) … p.5373

Oncology - Melanoma. Report Summarizes Melanoma Study Findings from University of California (Inhibition of oncogenic BRAF activity by indole–3-carbinol disrupts microphthalmia–associated transcription factor expression and arrests melanoma cell proliferation) … p.5374

Heart Disorders and Diseases - Myocardial Ischemia. Report Summarizes Myocardial Ischemia Study Findings from Shanghai Jiao–Tong University (The nuclear melatonin receptor RORa is a novel endogenous defender against myocardial ischemia/reperfusion injury) … p.5376

Nutritional and Metabolic Diseases and Conditions - Obesity. Report Summarizes Obesity Study Findings from University of Verona (Considerations for Systemic Treatment of Psoriasis in Obese Patients) … p.5377

Oncology - Pancreatic Cancer. Report Summarizes Pancreatic Cancer Study Findings from University of Southern Denmark (Lipid–modified G4–decoy oligonucleotide anchored to nanoparticles: delivery and bioactivity in pancreatic cancer cells) … p.5378
January 14, 2017

Drugs and Therapies - Pharmacoepidemiology and Drug Safety. Report Summarizes Pharmacoepidemiology and Drug Safety Study Findings from Brown University (Consensus of recommendations guiding comparative effectiveness research methods) … p.5380

Peptide Proteins - Proinsulin. Report Summarizes Proinsulin Study Findings from Baylor University College of Medicine (The History Of Insulin Technology: A Brief Review Of The Updates In Basal Insulin Therapy Through The Years) … p.5383

Oncology - Prostate Cancer. Report Summarizes Prostate Cancer Study Findings from T. Todenhofer and Co–Researchers (AR–V7 Transcripts in Whole Blood RNA of Patients with Metastatic Castration Resistant Prostate Cancer Correlate with Response to Abiraterone Acetate) … p.5384

Oncology - Renal Cell Carcinoma. Report Summarizes Renal Cell Carcinoma Study Findings from Veterans Affairs Medical Center (An Empiric Evaluation of the Effect of Variation in Intensity of Followup for Surgically Treated Renal Neoplasms on Cancer Specific Survival) … p.5385

Salicylic Acid. Report Summarizes Salicylic Acid Study Findings from University of Pisa (Experimental and DFT Characterization of Halloysite Nanotubes Loaded with Salicylic Acid) … p.5386

Salicylic Acids. Report Summarizes Salicylic Acids Study Findings from Harbin Medical University (Anti–cancer activity and potential mechanism of a novel aspirin derivative) … p.5387

Oncology - Squamous Cell Carcinoma. Report Summarizes Squamous Cell Carcinoma Study Findings from Institute for Cancer Research and Treatment (IRCCS) (Whole exome sequencing of independent lung adenocarcinoma, lung squamous cell carcinoma, and malignant peritoneal mesothelioma A ...) … p.5388

Oncology - Testicular Cancer. Report Summarizes Testicular Cancer Study Findings from K. Litchfield and Co–Researchers (Rare disruptive mutations in ciliary function genes contribute to testicular cancer susceptibility) … p.5389

Oncology - Thyroid Cancer. Report Summarizes Thyroid Cancer Study Findings from Cancer Hospital (Association between neutrophil–to–lymphocyte ratio and differentiated thyroid cancer: a meta–analysis) … p.5390

Drugs and Therapies - Toxicology and Pharmacology. Report Summarizes Toxicology and Pharmacology Study Findings from Procter & Gamble (Exposure Factor considerations for safety evaluation of modern disposable diapers) … p.5391

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Report Summarizes Type 2 Diabetes Study Findings from Mahidol University (PAX4 R192H and P321H polymorphisms in type 2 diabetes and
January 14, 2017

www.NewsRx.com

their functional defects) ... p.5392

Gram-Negative Bacteria - Acinetobacter baumannii. Reports Outline Acinetobacter baumannii Study Findings from Institute for Biology Research (Wide spread of OXA–23–producing carbapenem–resistant Acinetobacter baumannii belonging to clonal complex II in different hospitals in Lebanon) ... p.5393

Intercellular Signaling Peptides and Proteins - Adipokines. Reports Outline Adipokines Study Results from V. Mela et al (Blockage of neonatal leptin signaling induces changes in the hypothalamus associated with delayed pubertal onset and modifications in neuropeptide expression during adulthood in male ...) ... p.5394

Drugs and Therapies - Alendronate Therapy. Reports Outline Alendronate Therapy Study Findings from Kyoto Pharmaceutical University (Enhanced oral delivery of alendronate by sucrose fatty acids esters in rats and their absorption–enhancing mechanisms) ... p.5395

Drugs and Therapies - Alkylating Agents. Reports Outline Alkylating Agents Study Findings from University of Yamanashi (AMPK Suppresses Connexin43 Expression in the Bladder and Ameliorates Voiding Dysfunction in Cyclophosphamide–induced Mouse Cystitis) ... p.5396

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Reports Outline Alzheimer Disease Findings from Johns Hopkins University (Cortical thickness in relation to clinical symptom onset in preclinical AD) ... p.5397

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Reports Outline Alzheimer Disease Study Results from Institute for Cancer Research and Treatment (IRCGS) (Tackling amyloidogenesis in Alzheimer's disease with A2V variants of ... p.5398

Life Science Research - Amino Acids Research. Reports Outline Amino Acids Research Study Results from Ulm University Hospital (CK1d activity is modulated by CDK2/E– and CDK5/p35–mediated phosphorylation) ... p.5399

Amino Acids. Reports Outline Amino Acids Study Findings from Medical University (Design, Synthesis, and Antimycobacterial Activity of Novel Theophylline–7–Acetic Acid Derivatives With Amino Acid Moieties) ... p.5400

Oncology - Anal Cancer. Reports Outline Anal Cancer Findings from Wake Forest University (Early dose-dependent cortical thinning of the femoral neck in anal cancer patients treated with pelvic radiation therapy) ... p.5401

Drugs and Therapies - Antiarrhythmic Agents. Reports Outline Antiarrhythmic Agents Study Results from Adnan Menderes University (Phenytoin intoxication with no symptoms correlated with serum drug level: a case study) ... p.5402

Drugs and Therapies - Antibiotics. Reports Outline Antibiotics Study Findings from Soochow University (Enhanced Cellular Internalization and On–Demand Intracellular Release of Doxorubicin by Stepwise pH–/Reduction–Responsive Nanoparticles) ... p.5403

Drugs and Therapies - Antidiabetic Agents. Reports Outline Antidiabetic Agents Study Results from Jiangsu University (Pioglitazone inhibits EGFR/MDM2 signaling–mediated PPAR gamma degradation) ... p.5404

Drugs and Therapies - Antifungals. Reports Outline Antifungals Findings from University of Medicine and Dentistry of New Jersey (UMDNJ) (Rapid Detection of FKS–Associated Echinocandin Resistance in Candida glabrata) ... p.5405
Drugs and Therapies - Antiinfectives.
Reports Outline Antiinfectives Study
Findings from X.F. Liu and Colleagues
(Synergistic killing by meropenem and
colistin combination of
carbapenem–resistant Acinetobacter
baumannii isolates from Chinese
patients in an in vitro ...) ... p.5405

Drugs and Therapies - Antimicrobials.
Reports Outline Antimicrobials Study
Findings from Institute for Physical
Science and Technology Center
(Size–dependent antimicrobial
properties of the cobalt ferrite
nanoparticles) ... p.5407

Drugs and Therapies - Antirheumatics.
Reports Outline Antirheumatics Findings
from Pfizer (Monoclonal Antibody and
Fusion Protein Biosimilars Across
Therapeutic Areas: A Systematic
Review of Published Evidence)
... p.5407

Drugs and Therapies - Antirheumatics.
Reports Outline Antirheumatics Findings
from William Harvey Research Institute
(Rational design of antirheumatic
prodrugs specific for sites of
inflammation) ... p.5408

Life Science Research - Aquatic
Toxicology. Reports Outline Aquatic
Toxicology Study Findings from
University of Insubria (Evaluation of
tissue morphology and gene expression
as biomarkers of pollution in mussel
Mytilus galloprovincialis caging
experiment) ... p.5410

Heart Disorders and Diseases - Atrial
Fibrillation. Reports Outline Atrial
Fibrillation Study Results from Heart
Center (Cryoballoon ablation for
persistent atrial fibrillation – Large
single–center experience) ... p.5412

Autografts. Reports Outline Autografts Study
Findings from Department of Surgery
(Outcomes of Reintervention on the
Autograft After Ross Procedure)
... p.5413

Chemistry - Biochemistry. Reports Outline
Biochemistry Study Results from
University of Manchester (Cytoskeletal
Filamin A Differentially Modulates RNA
Polymerase III Gene Transcription in
Transformed Cell Lines) ... p.5414

Chemistry - Biophysical Chemistry.
Reports Outline Biophysical Chemistry
Study Results from Indian Institute of
Technology [Binding of the alkaloid
coralyne to parallel G–quadruplex DNA
[d(TTGGGGT)](4) studied by
multi–spectroscopic techniques]
... p.5415

Hematology - Blood Coagulation Factors.
Reports Outline Blood Coagulation
Factors Study Findings from Research
Center (The contribution of von
Willebrand factor–GPIba interactions to
persistent aggregate formation in
apheresis platelet concentrates)
... p.5416

Blood Pressure. Reports Outline Blood
Pressure Findings from State University
of Campinas [New 2–Aminothiazoline
derivatives lower blood pressure of
spontaneously hypertensive rats (SHR)
via I–1–imidazoline and alpha–2
adrenergic receptors activation]
... p.5417

Proteins - Blood Proteins. Reports Outline
Blood Proteins Study Results from
Uppsala University [The lectin
complement pathway serine proteases
(MASPs) represent a possible crossroad
between the coagulation and
complement systems in
thromboinflammation] ... p.5418
Lung Diseases and Conditions - Bronchopulmonary Dysplasia.
Reports Outline Bronchopulmonary Dysplasia Study Results from University of Colorado (Endothelin-1–Rho kinase interactions impair lung structure and cause pulmonary hypertension after bleomycin exposure in neonatal rat pups) … p.5425

Oncology - Cancer Epidemiology. Reports Outline Cancer Epidemiology Study Results from University of Toronto (Cancer screening barriers and facilitators for under and never screened populations: A mixed methods study) … p.5426

Drugs and Therapies - Carbamazepine Therapy. Reports Outline Carbamazepine Therapy Study Findings from Medical University (Isobolographic Analysis of Interaction for Three–Drug Combination of Carbamazepine, Phenobarbital and Topiramate in the Mouse Maximal Electroshock–Induced Seizure ...) … p.5428

Oncology - Carcinomas. Reports Outline Carcinomas Findings from Adolfo Lutz Institute (Breast Carcinoma–associated Fibroblasts Share Similar Biomarker Profiles in Matched Lymph Node Metastasis) … p.5429

Oncology - Carcinomas. Reports Outline Carcinomas Study Results from Kyoto University (Population Pharmacokinetics of Everolimus in Relation to Clinical Outcomes in Patients With Advanced Renal Cell Carcinoma) … p.5430

Cardiology. Reports Outline Cardiology Findings from University of Hong Kong (Transcatheter Leadless Cardiac Pacing in Renal Failure with Limited Venous Access) … p.5431
Cardiology. Reports Outline Cardiology Study Findings from Heart Center (Performance of allogeneic bioengineered replacement pulmonary valves in rapidly growing young lambs) … p.5432

Cardiology. Reports Outline Cardiology Study Findings from University of Picardie (Role of echocardiography before cardiac resynchronization therapy: new advances and current developments) … p.5433

Cardiovascular Diseases. Reports Outline Cardiovascular Diseases Study Findings from George Institute for Global Health (Inaccurate risk perceptions contribute to treatment gaps in secondary prevention of cardiovascular disease) … p.5435

Cardiovascular Research. Reports Outline Cardiovascular Research Study Results from Sahlgrenska University Hospital (Contemporary cardiovascular risk and secondary preventive drug treatment patterns in peripheral artery disease patients undergoing revascularization) … p.5436

Cardiovascular Research. Reports Outline Cardiovascular Research Study Results from Yonsei University (Prognostic value of urine dipstick proteinuria on mortality after acute ischemic stroke) … p.5437

Cell Proliferation. Reports Outline Cell Proliferation Study Results from Genomics Research Center (The nucleolar protein NIFK promotes cancer progression via CK1α/b–catenin in metastasis and Ki–67–dependent cell proliferation) … p.5438

Cell Surface Extensions. Reports Outline Cell Surface Extensions Findings from New University of Lisbon (Ar13b and the exocyst interact synergistically in ciliogenesis) … p.5439

Kidney Diseases and Conditions - Chronic Kidney Disease. Reports Outline Chronic Kidney Disease Study Findings from University of Belgrade (Oxidized Low–Density Lipoprotein Predicts the Development of Renal Dysfunction in Atrial Fibrillation) … p.5440

Kidney Diseases and Conditions - Chronic Kidney Disease. Reports Outline Chronic Kidney Disease Study Results from Karolinska Institute (Lipophilic index, kidney function, and kidney function decline) … p.5441

Health and Medicine - Clinical Dysmorphology. Reports Outline Clinical Dysmorphology Study Findings from University Hospital (A rare example of germ–line chromothripsis resulting in large genomic imbalance) … p.5442

Drugs and Therapies - Clinical Pharmacology and Therapeutics. Reports Outline Clinical Pharmacology and Therapeutics Study Findings from Massachusetts Institute of Technology (Benefit–Risk Analysis for Decision–Making: An Approach) … p.5443

Clinical Research - Clinical Trials and Studies. Reports Outline Clinical Trials and Studies Study Findings from Dicle University (Efficiency of therapeutic ultrasound on pain, disability, anxiety, depression, sleep and quality of life in patients with subacromial impingement syndrome: A randomized ...) … p.5444

Clinical Research - Clinical Trials and Studies. Reports Outline Clinical Trials and Studies Study Findings from Health Science Center (Effect of increased water intake on plasma copeptin in patients with chronic kidney disease: results from a pilot randomised controlled trial) … p.5445
Gram-Positive Bacteria - Clostridium difficile. Reports Outline Clostridium difficile Study Results from L.K. Kociolek et al (Breakthroughs in the treatment and prevention of Clostridium difficile infection) … p.5446

Digestive System Diseases and Conditions - Colitis. Reports Outline Colitis Study Results from University of Leeds (The relationship between different information sources and disease–related patient knowledge and anxiety in patients with inflammatory bowel disease) … p.5447

Oncology - Colon Cancer. Reports Outline Colon Cancer Findings from Radboud University (The genetic heterogeneity of colorectal cancer predisposition – guidelines for gene discovery) … p.5448

Oncology - Colon Cancer. Reports Outline Colon Cancer Findings from University of California (Differential Radiographic Appearance of BRAF V600E–Mutant Metastatic Colorectal Cancer in Patients Matched by Primary Tumor Location) … p.5449

Oncology - Colon Cancer. Reports Outline Colon Cancer Study Results from Shiraz University of Medical Sciences (Determination of a CD4(+)CD25(–) FoxP3(+) T cells subset in tumor–draining lymph nodes of colorectal cancer secreting IL–2 and IFN–gamma) … p.5450

Oncology - Colon Cancer. Reports Outline Colon Cancer Study Results from Soochow University (Total laparoscopic right hemicolectomy with 3–step stapled intracorporeal isoperistaltic ileocolic anastomosis for colon cancer An evaluation of short–term outcomes) … p.5451

Oncology - Colon Cancer. Reports Outline Colon Cancer Study Results from University of South Carolina (IL–33 promotes growth and liver metastasis of colorectal cancer in mice by remodeling the tumor microenvironment and inducing angiogenesis) … p.5452

Oncology - Colorectal Cancer. Reports Outline Colorectal Cancer Study Findings from General Hospital (Increased risk of colorectal neoplasia in patients with primary sclerosing cholangitis and inflammatory bowel disease: a meta–analysis of 16 observational studies) … p.5453

Cardiovascular Diseases and Conditions - Cor Triatriatum. Reports Outline Cor Triatriatum Study Results from University of Toronto (Catheter–Based Palliation in an Infant With Obstructed Cor Triatriatum) … p.5455

Cystic Fibrosis. Reports Outline Cystic Fibrosis Findings from Catholic University of Louvain (High–level resistance to meropenem in clinical isolates of Pseudomonas aeruginosa in the absence of carbapenemases: role of active efflux and porin alterations) … p.5455

Lung Diseases and Conditions - Cystic Fibrosis. Reports Outline Cystic Fibrosis Study Findings from Erasmus University Medical Center (Correction of lung inflammation in a F508del CFTR murine cystic fibrosis model by the sphingosine–1–phosphate lyase inhibitor LX2931) … p.5457

Lung Diseases and Conditions - Cystic Fibrosis. Reports Outline Cystic Fibrosis Study Results from D. Fraser–Pitt et al (Activity of Cysteamine against the Cystic Fibrosis Pathogen Burkholderia cepacia Complex) … p.5458

Neurodegenerative Diseases and Conditions - Dementia. Reports Outline Dementia Study Findings from Asia University (Diverticular disease and additional comorbidities associated with increased risk of dementia) … p.5459
Mental Health Diseases and Conditions - Depression. Reports Outline Depression Findings from University of Montpellier (Patterns of selective serotonin reuptake inhibitor use and risk of falls and fractures in community–dwelling elderly people: the Three–City cohort) … p.5460

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Reports Outline Diabetic Angiopathies Study Findings from Yang Ming National University (Regulatory SNPs Alter the Gene Expression of Diabetic Retinopathy Associated Secretory Factors) … p.5461

Diabetic Neuropathy. Reports Outline Diabetic Neuropathy Study Findings from Roma Tor Vergata University (Recent advances in exploring the genetic susceptibility to diabetic neuropathy) … p.5462

Diarylheptanoids. Reports Outline Diarylheptanoids Findings from Nanjing University (Nrf2 Knockdown Disrupts the Protective Effect of Curcumin on Alcohol–Induced Hepatocyte Necroptosis) … p.5463

Drugs and Therapies - Drug Delivery Systems. Reports Outline Drug Delivery Systems Study Findings from Chinese Academy of Sciences (Multitriggered Tumor–Responsive Drug Delivery Vehicles Based on Protein and Polypeptide Coassembly for Enhanced Photodynamic Tumor Ablation) … p.5464

Drugs and Therapies - Drugs Used In Alcohol Dependence. Reports Outline Drugs Used In Alcohol Dependence Study Results from Changchun Institute of Applied Chemistry [Pharmacological characterization of the opioid inactive isomers (+)–naltrexone and (+)–naloxone as antagonists of toll–like receptor 4] … p.5466

Oncology - Duodenal Cancer. Reports Outline Duodenal Cancer Study Findings from University of Pennsylvania (Lymph node evaluation and survival after curative–intent resection of duodenal adenocarcinoma: A matched cohort study) … p.5467

End Stage Renal Disease. Reports Outline End Stage Renal Disease Study Findings from People’s Hospital (Resveratrol Ameliorated Vascular Calcification by Regulating Sirt–1 and Nrf2) … p.5468

Environmental Health - Environmental Research and Public Health. Reports Outline Environmental Research and Public Health Findings from Southeast University (Crash Risk Prediction Modeling Based on the Traffic Conflict Technique and a Microscopic Simulation for Freeway Interchange Merging Areas) … p.5469

Enzymes and Coenzymes. Reports Outline Enzymes and Coenzymes Findings from National Reference Laboratory of Veterinary Drug Residues SCAU (Comparative Characterization of CTX–M–64 and CTX–M–14 Provides Insights into the Structure and Catalytic Activity of the CTX–M …) … p.5470

Central Nervous System Diseases and Conditions - Epilepsy. Reports Outline Epilepsy Study Findings from LUMC (Mortality in Dravet syndrome: A review) … p.5471
Gram-Negative Bacteria - Escherichia coli. Reports Outline Escherichia coli Study Findings from Third Military Medical University (Design of New Antibacterial Enhancers Based on AcrB's Structure and the Evaluation of Their Antibacterial Enhancement Activity) ... p.5472

Drugs and Therapies - Ethnopharmacology. Reports Outline Ethnopharmacology Study Results from Research Institute (Standardization of the manufacturing procedure for Pinelliae Rhizoma Praeparatum cum Zingibere et Alumine) ... p.5473

Enzymes and Coenzymes - Fatty Acid Desaturases. Reports Outline Fatty Acid Desaturases Findings from Southwestern Medical Center (Discovery of tumor–specific irreversible inhibitors of stearoyl CoA desaturase) ... p.5475

Oncology - Gallbladder Cancer. Reports Outline Gallbladder Cancer Findings from International Agency for Research on Cancer (Burden of gallbladder cancer in Central and South America) ... p.5476

Oncology - Gastric Cancer. Reports Outline Gastric Cancer Study Results from China Medical University and Hospital (Establishment of a gastric cancer subline with high metastatic potential using a novel microfluidic system) ... p.5477

Hormones - Gastrointestinal Hormones. Reports Outline Gastrointestinal Hormones Findings from Dalian Medical University (Novel Quinazoline Derivatives Bearing Various 4–Aniline Moieties as Potent EGFR Inhibitors with Enhanced Activity Against NSCLC Cell Lines) ... p.5478

Hormones - Gastrointestinal Hormones. Reports Outline Gastrointestinal Hormones Study Findings from University of Miami [Fluorescent Kinase Probes Enabling Identification and Dynamic Imaging of HER2(+) Cells] ... p.5479

Biotechnology - Gene Therapy. Reports Outline Gene Therapy Study Findings from State University of New Jersey (Practical Issues with the Use of Stem Cells for Cancer Gene Therapy) ... p.5480

Life Science Research - Genetics. Reports Outline Genetics Study Findings from University of California School of Medicine (TGFb and BMP Dependent Cell Fate Changes Due to Loss of Filamin B Produces Disc Degeneration and Progressive Vertebral Fusions) ... p.5481

Genetics. Reports Outline Genetics Study Results from PEBC (Epigenetic inactivation of the p53–induced long noncoding RNA TP53 target 1 in human cancer) ... p.5483

Life Science Research - Genetics and Development. Reports Outline Genetics and Development Study Findings from University of Manchester [Transcriptional regulation of the proto–oncogene Zfp521 by SPI1 (PU.1) and HOXC13] ... p.5484

Oncology - Glioblastomas. Reports Outline Glioblastomas Study Results from University of Kebangsaan (Silencing of PROS1 induces apoptosis and inhibits migration and invasion of glioblastoma multiforme cells) ... p.5485
Oncology - Gliomas. Reports Outline
Gliomas Findings from First Affiliated Hospital (Tumor–suppressive function of long noncoding RNA MALAT1 in glioma cells by downregulation of MMP2 and inactivation of ERK/MAPK signaling) … p.5486

Oncology - Gliomas. Reports Outline
Gliomas Study Results from Medical University of South Carolina (Delivery of a drug cache to glioma cells overexpressing platelet–derived growth factor receptor using lipid nanocarriers) … p.5487

Oncology - Gliomas. Reports Outline
Gliomas Study Results from University of Jinan (Tailoring Particle Size of Mesoporous Silica Nanosystem To Antagonize Glioblastoma and Overcome Blood–Brain Barrier) … p.5488

Immune System Diseases and Conditions
- HIV/AIDS. Reports Outline HIV/AIDS Findings from Loyola University (Dynamic conformational changes in the rhesus TRIM5 alpha dimer dictate the potency of HIV–1 restriction) … p.5489

Immune System Diseases and Conditions
- HIV/AIDS. Reports Outline HIV/AIDS Study Findings from University of Antioquia (Precursor Forms of Vitamin D Reduce HIV–1 Infection In Vitro) … p.5490

Immune System Diseases and Conditions
- HIV/AIDS. Reports Outline HIV/AIDS Study Findings from University of KwaZulu–Natal (Binding Free Energy Calculations of Nine FDA–approved Protease Inhibitors Against HIV–1 Subtype C I36T&uarr;T Containing 100 Amino Acids Per Monomer) … p.5491

Immune System Diseases and Conditions
- HIV/AIDS. Reports Outline HIV/AIDS Study Findings from University of Michigan (Transcriptional start site heterogeneity modulates the structure and function of the HIV–1 genome) … p.5492

Heart Disorders and Diseases - Heart Attack. Reports Outline Heart Attack Findings from University of British Columbia (Sudden cardiac death: A reappraisal) … p.5493

Heart Disorders and Diseases - Heart Disease. Reports Outline Heart Disease Findings from Erasmus University (Genetic Research and Women’s Heart Disease: a Primer) … p.5494

Heart Disorders and Diseases - Heart Failure. Reports Outline Heart Failure Study Results from University of Groningen (Worsening renal function and outcome in heart failure patients with reduced and preserved ejection fraction and the impact of angiotensin receptor blocker treatment: data …) … p.5495

Transplant Medicine - Heart Transplants. Reports Outline Heart Transplants Study Findings from Baylor University College of Medicine (Durable Mechanical Circulatory Support versus Organ Transplantation: Past, Present, and Future) … p.5496

Stem Cell Research - Hematopoietic Stem Cells. Reports Outline Hematopoietic Stem Cells Findings from New York University (Hematopoietic Stem Cells Are the Major Source of Multilineage Hematopoiesis in Adult Animals) … p.5498

Drugs and Therapies - Heparin Therapy. Reports Outline Heparin Therapy Study Findings from Texas Health Presbyterian Hospital Dallas (Managing transitions from oral factor Xa inhibitors to unfractionated heparin infusions) … p.5499
January 14, 2017

Immunology - Human Immunology. Reports Outline Human Immunology Study Findings from University of Strasbourg (Innate immune receptors in solid organ transplantation) … p.5500

Hyperlipidemia. Reports Outline Hyperlipidemia Findings from Seoul National University (Parks and Green Areas Are Associated with Decreased Risk for Hyperlipidemia) … p.5501

Cardiovascular Diseases and Conditions - Hypertension. Reports Outline Hypertension Study Results from University of California (The Use of Qualitative Methods in Developing Implementation Strategies in Prevention Research for Stroke Survivors in Nigeria) … p.5501

Cardiovascular Diseases and Conditions - Hypertension. Reports Outline Hypertension Study Findings from University of Notre Dame (A cross-sectional study of preoperative medication adherence and early postoperative recovery) … p.5502

Nutritional and Metabolic Diseases and Conditions - Hypoglycemia. Reports Outline Hypoglycemia Study Findings from Veterans Affairs Medical Center (A case of extragastrointestinal stromal tumor complicated by severe hypoglycemia: a unique presentation of a rare tumor) … p.5504

Drugs and Therapies - Immunotherapy. Reports Outline Immunotherapy Study Findings from Tel Aviv University (A Harmonization Study for the Use of 22C3 PD–L1 Immunohistochemical Staining on Ventana’s Platform) … p.5505

Influenza A Virus Subtype H1N1. Reports Outline Influenza A Virus Subtype H1N1 Study Findings from Manipal University [Genetic analysis of neuraminidase gene of influenza A(H1N1)pdm09 virus circulating in Southwest India from 2009 to 2012] … p.5506

Central Nervous System Diseases and Conditions - Intracranial Aneurysm. Reports Outline Intracranial Aneurysm Study Findings from Second Military Medical University [The safety and efficacy of low profile visualized intraluminal support (LVIS) stents in assisting coil embolization of intracranial saccular aneurysms: …] … p.5507

Transplant Medicine - Kidney Transplants. Reports Outline Kidney Transplants Findings from Hospital Clinic (Presence of T–275A and C–2152T Polymorphisms of the Promoter Region of Uridine Diphosphate–Glucuronosyltransferase 1A9 Increases Mortality From Digestive Tumors: Results After 10 …) … p.5509

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Reports Outline Left Ventricular Hypertrophy Findings from National Center for Scientific Research (CNRS) (Increased mean aliphatic lipid chain length in left ventricular hypertrophy secondary to arterial hypertension A cross-sectional study) … p.5510

Life Science Research. Reports Outline Life Science Research Findings from University of British Columbia (The Effect of Statins on Blood Gene Expression in COPD) … p.5511

Biotechnology - Liposomes. Reports Outline Liposomes Study Findings from Russian Academy of Science (Biopolymer nanovehicles for essential polyunsaturated fatty acids: Structure–functionality relationships) … p.5512
Oncology - Liver Cancer. Reports Outline Liver Cancer Findings from Chang Gung Memorial Hospital (Thyroid hormone suppresses expression of stathmin and associated tumor growth in hepatocellular carcinoma) … p.5513

Oncology - Liver Cancer. Reports Outline Liver Cancer Study Results from Chinese University of Hong Kong (Alternative splicing of estrogen receptor alpha in hepatocellular carcinoma) … p.5514

Oncology - Liver Cancer. Reports Outline Liver Cancer Study Results from University of Rennes (Regulation of Transdifferentiation and Retrodifferentiation by Inflammatory Cytokines in Hepatocellular Carcinoma) … p.5515

Transplant Medicine - Liver Transplants. Reports Outline Liver Transplants Study Results from University of Alberta (Hepatitis C in non–hepatic solid organ transplant candidates and recipients: A new horizon) … p.5516

Oncology - Lung Cancer. Reports Outline Lung Cancer Findings from Harbin Medical University (Gene expression profiling analysis of lung adenocarcinoma) … p.5517

Oncology - Lung Cancer. Reports Outline Lung Cancer Study Results from German Center Lung Research (Treatment–related experiences and preferences of patients with lung cancer: a qualitative analysis) … p.5519

Oncology - Lung Cancer. Reports Outline Lung Cancer Study Results from National Chiayi University (Astaxanthin enhances pemetrexed–induced cytotoxicity by downregulation of thymidylate synthase expression in human lung cancer cells) … p.5520

Autoimmune Diseases and Conditions - Lupus. Reports Outline Lupus Study Results from Pontifical Catholic University (Contribution of dendritic cells to the autoimmune pathology of systemic lupus erythematosus) … p.5522

Oncology - Lymphoma. Reports Outline Lymphoma Findings from Dana–Farber Cancer Institute (Next–generation sequencing–based detection of circulating tumour DNA After allogeneic stem cell transplantation for lymphoma) … p.5523

Eye Diseases and Conditions - Macular Degeneration. Reports Outline Macular Degeneration Study Findings from University of Ljubljana (Clinical and genetic heterogeneity in Slovenian patients with BEST disease) … p.5524

Eye Diseases and Conditions - Macular Edema. Reports Outline Macular Edema Study Findings from Kyoto University (Restoration of foveal photoreceptors after intravitreal ranibizumab injections for diabetic macular edema) … p.5525

Magnetic Resonance. Reports Outline Magnetic Resonance Study Findings from Molecular Imaging Program at Stanford (Molecular Magnetic Resonance Imaging of Tumor Response to Therapy) … p.5526

Oncology - Melanoma. Reports Outline Melanoma Study Findings from University Hospital (Novel Drugs and Combination Therapies for the Treatment of Metastatic Melanoma) … p.5527
Merkel Cells. Reports Outline Merkel Cells Findings from University of California (Genomic portfolio of Merkel cell carcinoma as determined by comprehensive genomic profiling; implications for targeted therapeutics) … p.5528

Mesylates. Reports Outline Mesylates Findings from Bharathiar University (Gas Chromatographic Method for the Quantitative Determination of a Hydrolytic Degradation Impurity in Busulfan Injectable Products) … p.5529

Neoplasms. Reports Outline Neoplasms Study Findings from University of Algarve (Salivary gland hybrid tumour revisited: could they represent high-grade transformation in a low-grade neoplasm?) … p.5529

Nephropathy. Reports Outline Nephropathy Study Findings from RWTH Aachen University (The mucosa–kidney axis in IgA nephropathy) … p.5531

Health and Medicine - Neurooncology. Reports Outline Neurooncology Findings from NHS Foundation Trust (Surgical management of posterior fossa metastases) … p.5532

Neutral Amino Acids. Reports Outline Neutral Amino Acids Findings from University of Glasgow (A Highly Conserved Bacterial D–Serine Uptake System Links Host Metabolism and Virulence) … p.5533

Oncology - Non-Small Cell Lung Cancer. Reports Outline Non–Small Cell Lung Cancer Study Results from University of Chicago (Systemic therapies in the treatment of non–small–cell lung cancer brain metastases) … p.5534

Life Science Research - Nucleic Acids Research. Reports Outline Nucleic Acids Research Study Findings from University of North Carolina (Selective single cell isolation for genomics using microraf arrays) … p.5534

Proteins - Nucleoproteins. Reports Outline Nucleoproteins Study Results from Tokyo Women's Medical University (Action mechanisms of histone deacetylase inhibitors in the treatment of hematological malignancies) … p.5535

Nutritional and Metabolic Diseases and Conditions - Obesity. Reports Outline Obesity Findings from Children's Hospital (Disentangling Overlapping Influences of Neighborhoods and Schools on Adolescent Body Mass Index) … p.5536

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Reports Outline Obstructive Sleep Apnea Study Results from Fudan University (A Novel Method for Sensitive Determination of Subclinical Left–Ventricular Systolic Dysfunction in Subjects With Obstructive Sleep Apnea) … p.5537

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Reports Outline Obstructive Sleep Apnea Study Results from State University of Campinas (Morbidity and Mortality Rates After Maxillomandibular Advancement for Treatment of Obstructive Sleep Apnea) … p.5538

Oncology. Reports Outline Oncology Study Findings from University of Insubria (RNASET2 silencing affects miRNAs and target gene expression pattern in a human ovarian cancer cell model) … p.5540

Oncology - Osteosarcomas. Reports Outline Osteosarcomas Study Findings from Hebei Medical University (The tumor suppressor miR–124 inhibits cell proliferation and invasion by targeting B7–H3 in osteosarcoma) … p.5540

Membrane Proteins - Pattern Recognition Receptors. Reports Outline Pattern Recognition Receptors Study Findings from Oregon Health and Science University (Mesenchymal Stromal Cell–derived Extracellular Vesicles)
January 14, 2017

Promote Myeloid–biased Multipotent Hematopoietic Progenitor Expansion via Toll–Like ...) … p.5542

Drugs and Therapies - Penicillins. Reports Outline Penicillins Study Findings from University of Notre Dame (In Vitro and In Vivo Synergy of the Oxadiazole Class of Antibacterials with beta–Lactams) … p.5543

Peptides and Proteins. Reports Outline Peptides and Proteins Study Findings from National Heart Lung and Blood Institute (Peptide affinity analysis of proteins that bind to an unstructured region containing the transactivating domain of the osmoprotective ...) … p.5544

Drugs and Therapies - Pharmaceutical Research. Reports Outline Pharmaceutical Research Study Results from Ben–Gurion University of the Negev (Segmental–dependent permeability throughout the small intestine following oral drug administration: Single–pass vs. Doluisio approach to in–situ rat ...) … p.5545

Pharmacogenetics. Reports Outline Pharmacogenetics Study Findings from University of Auckland (CYP2C19 and CYP2D6 genotypes in Pacific peoples) … p.5546

Pharmacokinetics. Reports Outline Pharmacokinetics Study Results from Chengdu University (y Effect of Chemical Profiling Change of Processed Magnolia officinalis on the Pharmacokinetic Profiling of Honokiol and Magnolol in Rats) … p.5546

www.NewsRx.com

Drugs and Therapies - Pharmacy Practice. Reports Outline Pharmacy Practice Findings from University of Mississippi (Understanding pharmacist success in practice: A scoping review) … p.5548

Phenothiazines. Reports Outline Phenothiazines Findings from Department of Psychology (Methylene Blue Facilitates Memory Retention in Zebrafish in a Dose–Dependent Manner) … p.5549

Life Science Research - Physiology. Reports Outline Physiology Study Results from Lund University (Emerging roles of the myocardin family of proteins in lipid and glucose metabolism) … p.5550

Lung Diseases and Conditions - Pneumonia. Reports Outline Pneumonia Findings from Army General Hospital (Healthcare–associated Pneumonia: Clinical Features and Retrospective Analysis Over 10 Years) … p.5551

Lung Diseases and Conditions - Pneumonia. Reports Outline Pneumonia Study Results from University of Zagreb (Macrolones Are a Novel Class of Macrolide Antibiotics Active against Key Resistant Respiratory Pathogens In Vitro and In Vivo) … p.5552

Liver Diseases and Conditions - Portal Hypertension. Reports Outline Portal Hypertension Study Findings from University of Nottingham (Non–invasive assessment of portal hypertension using quantitative magnetic resonance imaging) … p.5553

Peptide Proteins - Posterior Pituitary Hormones. Reports Outline Posterior Pituitary Hormones Study Findings from Tamagawa University (Relationship between Salivary Oxytocin Levels and Generosity in Preschoolers) … p.5555
Oncology - Prostate Cancer. Reports
Outline Prostate Cancer Findings from Thomas Jefferson University (c–Src, Insulin–Like Growth Factor I Receptor, G–Protein–Coupled Receptor Kinases and Focal Adhesion Kinase are Enriched Into Prostate Cancer Cell Exosomes) … p.5555

Oncology - Prostate Cancer. Reports
Outline Prostate Cancer Study Findings from Rosalind Franklin University of Medicine and Science (Racial Disparities in Prostate Cancer Mortality in the 50 Largest US Cities) … p.5557

Oncology - Prostate Cancer. Reports
Outline Prostate Cancer Study Results from Shandong University (LncRNA PVT1 regulates prostate cancer cell growth by inducing the methylation of miR–146a) … p.5558

Oncology - Prostate Cancer. Reports
Outline Prostate Cancer Study Results from University of California (Rectourethral Fistulas Secondary to Prostate Cancer Treatment: Management and Outcomes from a Multi–Institutional Combined Experience) … p.5559

Psychiatric Disorders. Reports Outline
Psychiatric Disorders Study Findings from M. Andrews and Colleagues (Early Therapeutic Alliance, Treatment Retention, and 12–Month Outcomes in a Healthy Lifestyles Intervention for People with Psychotic Disorders) … p.5560

Oncology - Rectal Cancer. Reports Outline
Rectal Cancer Findings from Chinese University of Hong Kong (Clinical outcome of neoadjuvant chemoradiation in locally advanced rectal cancer at a tertiary hospital) … p.5561

Eye Diseases and Conditions - Retinal Vein Occlusion. Reports Outline
Retinal Vein Occlusion Findings from Eye Research Institute (Ambulatory Blood Pressure Patterns In Patients With Retinal Vein Occlusion) … p.5562

Salicylic Acids. Reports Outline Salicylic Acids Study Results from Boston University (Spectral biomarkers for chemoprevention of colonic neoplasia: a placebo–controlled double–blinded trial with aspirin) … p.5563

Mental Health Diseases and Conditions - Schizophrenia. Reports Outline Schizophrenia Findings from Mustafa Kemal University (DNA Methylation of BDNF Gene in Schizophrenia) … p.5564

Science. Reports Outline Science Findings from Yale University (Adolescents growing up amidst intractable conflict attenuate brain response to pain of outgroup) … p.5566

Science. Reports Outline Science Study Results from Swiss Federal Institute of Technology (Foxa1 is essential for development and functional integrity of the subthalamic nucleus) … p.5567

Blood Diseases and Conditions - Sepsis. Reports Outline Sepsis Study Findings from Wayne State University (Daptomycin Improves Outcomes Regardless of Vancomycin MIC in a Propensity–Matched Analysis of Methicillin–Resistant Staphylococcus aureus Bloodstream Infections) … p.5567

Intracellular Signaling Peptides and Proteins - Sirtuins. Reports Outline Sirtuins Study Findings from Karolinska Institute (Sirtuins are Unaffected by PARP Inhibitors Containing Planar Nicotinamide Bioisosteres) … p.5569
January 14, 2017

Diseases and Conditions - Smith-Magenis Syndrome. Reports Outline Smith-Magenis Syndrome Study Findings from National Institutes of Health (Delayed Diagnosis in a House of Correction: Smith–Magenis Syndrome Due to a De Novo Nonsense RAI1 Variant) … p.5570

Stem Cell Research. Reports Outline Stem Cell Research Findings from ShanghaiTech University (SUMO regulates somatic cyst stem cell maintenance and directly targets the Hedgehog pathway in adult Drosophila testis) … p.5571

Stilbenes. Reports Outline Stilbenes Findings from Central University (Chitosan–modified PLGA polymeric nanocarriers with better delivery potential for tamoxifen) … p.5572

Subcellular Fractions. Reports Outline Subcellular Fractions Study Results from Wistar Institute (A neuronal network of mitochondrial dynamics regulates metastasis) … p.5573

Central Nervous System Diseases and Conditions - Subdural Hematoma. Reports Outline Subdural Hematoma Study Results from Department of Neurosurgery (Spontaneously rapid and complete resolution of acute subdural hemorrhage in a 1–year–old patient) … p.5574

Biological Factors - Synthetic Prostaglandins E. Reports Outline Synthetic Prostaglandins E Study Results from Liverpool Women’s Hospital (Short versus Standard Mifepristone and Misoprostol Regimen for Second– and Third–Trimester Termination of Pregnancy for Fetal Anomaly) … p.5574

Surgery - Thoracic Surgical Procedures. Reports Outline Thoracic Surgical Procedures Findings from St. Anne’s University Hospital (Resting End–Tidal Carbon Dioxide Predicts Respiratory Complications in Patients Undergoing Thoracic Surgical Procedures)

www.NewsRx.com

Biomedical Engineering - Tissue Engineering. Reports Outline Tissue Engineering Findings from University of Tampere (Human Adipose Stem Cells Differentiated on Braided Polylactide Scaffolds Is a Potential Approach for Tendon Tissue Engineering) … p.5577

Biomedical Engineering - Tissue Engineering. Reports Outline Tissue Engineering Study Findings from Duke University (Tissue–engineered 3–dimensional (3D) microenvironment enhances the direct reprogramming of fibroblasts into cardiomyocytes by microRNAs) … p.5578

Proteins - Transcription Factors. Reports Outline Transcription Factors Study Findings from University of Toulouse (Foxo3 Transcription Factor Drives Pathogenic T Helper 1 Differentiation by Inducing the Expression of Eomes) … p.5579

Enzymes and Coenzymes - Transferases. Reports Outline Transferases Study Findings from Takeda Pharmaceutical (Pharmacological characterization of a series of aryl–sulfonamide derivatives that potently and selectively inhibit monoacylglycerol acyltransferase 2) … p.5579

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports Outline Type 2 Diabetes Findings from Florida Hospital (Adipose tissue natriuretic peptide receptor expression is related to insulin sensitivity in obesity and diabetes) … p.5580

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports Outline Type 2 Diabetes Study Results from Zhongshan Ophthalmic Center (Association of monocyte chemoattractant protein–1 gene 2518A/G polymorphism with diabetic retinopathy in type 2 diabetes mellitus: A meta–analysis) … p.5582
Inflammatory Bowel Diseases and Conditions - Ulcerative Colitis.
Reports Outline Ulcerative Colitis Study Findings from Institute of Digestive Diseases (Expression of Transcription Factor FOXO3a is Decreased in Patients with Ulcerative Colitis) … p.5583

Urinary Tract. Reports Outline Urinary Tract Study Results from Zhejiang University (Performance of the Sysmex UF–1000i urine analyser in the rapid diagnosis of urinary tract infections in hospitalized patients) … p.5584

Immunization - Vaccines. Reports Outline Vaccines Study Results from National Institute for Communicable Diseases (Variability at the FCGR locus: characterization in Black South Africans and evidence for ethnic variation in and out of Africa) … p.5585

Varicose Veins. Reports Outline Varicose Veins Findings from Erzincan University (Effects of Fentanyl and Morphine on Shivering During Spinal Anesthesia in Patients Undergoing Endovenous Ablation of Varicose Veins) … p.5586

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Reports Outline Venous Thromboembolism Findings from Institute of Epidemiology (Testosterone treatment and risk of venous thromboembolism: population based case–control study) … p.5587

Heart Disorders and Diseases - Ventricular Tachycardia. Reports Outline Ventricular Tachycardia Findings from Brigham and Women's Hospital (Substrate–Based Ablation Versus Ablation Guided by Activation and Entrainment Mapping for Ventricular Tachycardia: A Systematic Review and Meta–Analysis) … p.5588

www.NewsRx.com

Gram-Negative Bacteria - Vibrionaceae. Reports Outline Vibrionaceae Study Results from University of Pittsburgh (Vibrio cholerae LeuO Links the ToxR Regulon to Expression of Lipid A Remodeling Genes) … p.5589

Skin Diseases and Conditions - Vitiligo. Reports Outline Vitiligo Study Results from University of Massachusetts (Understanding mechanisms of autoimmunity through translational research in vitiligo) … p.5590

Gram-Negative Bacteria - Acinetobacter. Reports Summarize Acinetobacter Study Results from University of Maryland (Structural Diversity in the Type IV Pili of Multidrug–resistant Acinetobacter) … p.5591

Gram-Negative Bacteria - Acinetobacter baumannii. Reports Summarize Acinetobacter baumannii Findings from School of Pharmacy and Pharmaceutical Science (Comparative pharmacodynamics of four different carbapenems in combination with polymyxin B against carbapenem–resistant Acinetobacter …) … p.5592

Heart Disorders and Diseases - Acute Coronary Syndrome. Reports Summarize Acute Coronary Syndrome Findings from Third Military Medical University (Higher Plasma Concentrations of Platelet Microparticles in Patients With Acute Coronary Syndrome: A Systematic Review and Meta–analysis) … p.5593

Acute Kidney Injury. Reports Summarize Acute Kidney Injury Findings from Nanjing Medical University (Meta–analysis for outcomes of acute kidney injury after cardiac surgery) … p.5594
Oncology - Acute Myeloid Leukemia.
Reports Summarize Acute Myeloid Leukemia Findings from Haukeland University Hospital (Targeting of cell metabolism in human acute myeloid leukemia—more than targeting of isocitrate dehydrogenase mutations and PI3K/AKT/mTOR signaling?) … p.5595

Oncology - Acute Myeloid Leukemia.
Reports Summarize Acute Myeloid Leukemia Study Results from Ohio State University (Inherited variation in OATP1B1 is associated with treatment outcome in acute myeloid leukemia) … p.5596

Oncology - Acute Myeloid Leukemia.
Reports Summarize Acute Myeloid Leukemia Study Results from University of Texas [Whole–arm translocation of der(5;17)(p10;q10) with concurrent TP53 mutations in acute myeloid leukemia (AML) and myelodysplastic syndrome (MDS): A unique …] … p.5597

Proteins - Albumins. Reports Summarize Albumins Findings from Mashhad University of Medical Sciences (Induction of a balanced Th1/Th2 immune responses by co–delivery of PLGA/ovalbumin nanospheres and CpG ODNs/PEI–SWCNT nanoparticles as TLR9 agonist in BALB/c mice) … p.5598

Lung Diseases and Conditions - Allergic Bronchopulmonary Aspergillosis. Reports Summarize Allergic Bronchopulmonary Aspergillosis Findings from Sheffield Children's Hospital (Antifungal therapies for allergic bronchopulmonary aspergillosis in people with cystic fibrosis) … p.5599

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Reports Summarize Alzheimer Disease Findings from Aarhus University (Stereological investigation of the CA1 pyramidal cell layer in untreated and lithium–treated 3xTg–AD and wild–type mice) … p.5601

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Reports Summarize Alzheimer Disease Findings from P.R. Manzine and Co–Authors (BACE1 levels are increased in plasma of Alzheimer's disease patients compared with matched cognitively healthy controls) … p.5602

Drugs and Therapies - Antiretrovirals. Reports Summarize Antiretrovirals Findings from Novartis Institutes for Biomedical Research (Assessment of pharmacokinetic drug–drug interaction between pradigastat and atazanavir or probenecid) … p.5607
January 14, 2017

www.NewsRx.com

Apoptosis. Reports Summarize Apoptosis Study Results from Peking Union Medical College (ISG12a inhibits HCV replication and potentiates the anti–HCV activity of IFN–alpha through activation of the Jak/STAT signaling pathway independent of autophagy ...) … p.5608

Science - Applied Sciences. Reports Summarize Applied Sciences Study Results from University of Technology (Numerical Study of Photoacoustic Pressure for Cancer Therapy) … p.5609

Life Science Research - Applied Toxicology. Reports Summarize Applied Toxicology Findings from VIT University (Natural remedies for non–steroidal anti–inflammatory drug–induced toxicity) … p.5609

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports Summarize Atherosclerosis Study Results from Radboud University (Innate immune cell activation and epigenetic remodeling in symptomatic and asymptomatic atherosclerosis in humans in vivo) … p.5610

Heart Disorders and Diseases - Atrial Fibrillation. Reports Summarize Atrial Fibrillation Study Results from Grigore T. Popa University of Medicine and Pharmacy (The Interplay between Cardiomyocytes and Non–cardiomyocytes in Postoperative Atrial Fibrillation) … p.5611

Heart Disorders and Diseases - Atrial Fibrillation. Reports Summarize Atrial Fibrillation Study Results from Wenzhou Medical University (Resolution of massive left atrial appendage thrombi with rivaroxaban before balloon mitral commissurotomy in severe mitral stenosis A case report and ...) … p.5612

Diseases and Conditions - Basilar Aneurysm. Reports Summarize Basilar Aneurysm Study Results from Strasbourg University Hospital (Spontaneous thrombosis of a basilar tip aneurysm after ventriculoperitoneal shunting) … p.5613

Drugs and Therapies - Beta-Adrenergic Blocking Agents. Reports Summarize Beta–Adrenergic Blocking Agents Findings from Dalian University (Carvedilol suppresses cartilage matrix destruction) … p.5614

Life Science Research - Biological Macromolecules. Reports Summarize Biological Macromolecules Findings from School of Chemistry and Chemical Engineering (Response surface methodology for the synthesis of an Auricularia auriculajudae polysaccharides–CDDP complex) … p.5615

Blood Pressure. Reports Summarize Blood Pressure Study Results from University College (Blood Pressure and the Capacity–Load Model in 8–Year–Old Children from Nepal: Testing the Contributions of Kidney Size and Intergenerational Effects) … p.5616

Musculoskeletal Diseases and Conditions - Bone Resorption. Reports Summarize Bone Resorption Study Results from Nagasaki University (Glucocorticoid Signaling and Bone Biology) … p.5617

Brachytherapy. Reports Summarize Brachytherapy Study Results from Taussig Cancer Institute (Outcomes for prostate glands > 60 cc treated with low–dose–rate brachytherapy) … p.5618

Oncology - Breast Cancer. Reports Summarize Breast Cancer Findings from Northwestern University (Cytologic atypia in the contralateral unaffected breast is related to parity and estrogen–related genes) … p.5619
January 14, 2017

Oncology - Breast Cancer. Reports Summarize Breast Cancer Study Results from University of Belgrade (Case with triple–negative breast cancer shows overexpression of both cFOS and TGF–beta 1 in node–positive tissue) … p.5620

Cachexia. Reports Summarize Cachexia Study Results from University of Ottawa (CCAAT/enhancer binding protein beta protects muscle satellite cells from apoptosis after injury and in cancer cachexia) … p.5621

Oncology - Cancer Epidemiology. Reports Summarize Cancer Epidemiology Findings from International Agency for Research on Cancer (Cancer patterns and trends in Central and South America) … p.5622

Cardiology. Reports Summarize Cardiology Study Results from Mayo Clinic (Synchronous ventricular pacing with direct capture of the atrioventricular conduction system: Functional anatomy, terminology, and challenges) … p.5623

Cardiovascular Diseases and Conditions - Cavernous Hemangioma. Reports Summarize Cavernous Hemangioma Findings from Istanbul University (Diffuse Cavernous Hemangioma of the Colon) … p.5624

Respiratory Tract Diseases and Conditions - Central Sleep Apnea. Reports Summarize Central Sleep Apnea Study Results from University Health Network (Sleep Apnea and Left Atrial Phasic Function in Heart Failure With Reduced Ejection Fraction) … p.5625

Drugs and Therapies - Chemometrics. Reports Summarize Chemometrics Findings from Norwegian University of Life Sciences (ROSA—a fast extension of partial least squares regression for multiblock data analysis) … p.5626

Disease Attributes - Chronic Disease. Reports Summarize Chronic Disease Study Results from D. Hennessy and Co–Researchers (Out–of–pocket spending on drugs and pharmaceutical products and cost–related prescription non–adherence among Canadians with chronic disease) … p.5627

Drugs and Therapies - Citalopram Therapy. Reports Summarize Citalopram Therapy Findings from University of Copenhagen (Structure–activity relationship studies of citalopram derivatives: examining substituents conferring selectivity for the allosteric site in the 5–HT transporter) … p.5628

Clinical Research - Clinical Trials and Studies. Reports Summarize Clinical Trials and Studies Findings from University of Munster (Corneal Densitometry as a Novel Technique for Monitoring Amiodarone Therapy) … p.5629

Clinical Research - Clinical Trials and Studies. Reports Summarize Clinical Trials and Studies Study Results from University Hospital (Nuclear Factor of Activated T Cells–Regulated Gene Expression as Predictive Biomarker of Personal Response to Calcineurin Inhibitors) … p.5630

Drugs and Therapies - Clopidogrel Therapy. Reports Summarize Clopidogrel Therapy Study Results from Shenzhen University (Effect of Ginkgo Biloba Extract on the Pharmacokinetics and Metabolism of Clopidogrel in Rats) … p.5631

Oncology - Colon Cancer. Reports Summarize Colon Cancer Findings from Hospital del Mar (Acquired RAS or EGFR mutations and duration of response to EGFR blockade in colorectal cancer) … p.5632
Oncology - Colon Cancer. Reports
Summarize Colon Cancer Findings from Leiden University (Are disseminated tumor cells in bone marrow and tumor–stroma ratio clinically applicable for patients undergoing surgical resection of primary colorectal cancer? The Leiden MRD ...) ... p.5633

Oncology - Colon Cancer. Reports
Summarize Colon Cancer Study Results from Institute for Cancer Research and Treatment (IRCCS) (MM–151 overcomes acquired resistance to cetuximab and panitumumab in colorectal cancers harboring EGFR extracellular domain mutations) ... p.5634

Congenital Diseases and Conditions - Congenital Heart Disease. Reports
Summarize Congenital Heart Disease Findings from Tokyo Women's Medical University (Vitamin D Kinetics and Parathyroid Gland Function in Patients with Congenital Heart Disease) ... p.5635

Coronavirus. Reports Summarize Coronavirus Findings from University of Tokyo (Identification of Nafamostat as a Potent Inhibitor of Middle East Respiratory Syndrome Coronavirus S Protein–Mediated Membrane Fusion Using the Split–Protein–Based Cell–Cell ...) ... p.5636

DNA Research. Reports Summarize DNA Research Findings from University of British Columbia (Dosage Mutator Genes in Saccharomyces cerevisiae: A Novel Mutator Mode–of–Action of the Mph1 DNA Helicase) ... p.5637

Nutritional and Metabolic Diseases and Conditions - Diabetic Foot. Reports
Summarize Diabetic Foot Study Results from University of Manchester (Development of a Novel Collagen Wound Model To Simulate the Activity and Distribution of Antimicrobials in Soft Tissue during Diabetic Foot Infection) ... p.5638

Drugs and Therapies - Drug Delivery Systems. Reports Summarize Drug Delivery Systems Findings from University of Missouri (Design of Lipophilic Prodrugs to Improve Drug Delivery and Efficacy) ... p.5639

Drugs and Therapies - Drug Delivery Systems. Reports Summarize Drug Delivery Systems Study Results from Free University (Tailored dendritic core–multishell nanocarriers for efficient dermal drug delivery: A systematic top–down approach from synthesis to preclinical testing) ... p.5640

RNA Viruses - Encephalitis Virus. Reports Summarize Encephalitis Virus Study Results from University of Florida (Evaluation of the Honey–Card Technique for Detection of Transmission of Arboviruses in Florida and Comparison With Sentinel Chicken Seroconversion) ... p.5641

Enterovirus. Reports Summarize Enterovirus Study Results from Chang Gung University (Enterovirus 71 induces dsRNA/PKR–dependent cytoplasmic redistribution of GRP78/BiP to promote viral replication) ... p.5642

Environmental Research. Reports Summarize Environmental Research Study Results from Polytechnic University (Removal of pharmaceutical industry pollutants by coal–based activated carbons) ... p.5643

Oncology - Epithelial Cancer. Reports Summarize Epithelial Cancer Study Results from Institute for Cancer Research and Treatment (IRCCS) (Mesenchymal Stem/Stromal Cells in Stromal Evolution and Cancer Progression) ... p.5644

Drugs and Therapies - Ethnopharmacology. Reports Summarize Ethnopharmacology Study Results from Nanjing University (Antitumor activity of Annona squamosa seed oil) ... p.5645
January 14, 2017  

Drugs and Therapies - Fexofenadine Therapy. Reports Summarize Fexofenadine Therapy Findings from University of Warmia & Mazury (Cytokine production by PBMC and serum from allergic and non–allergic subjects following in vitro histamine stimulation to test fexofenadine and osthole ...) … p.5646

Oncology - Gastric Cancer. Reports Summarize Gastric Cancer Findings from Tianjin Medical University (Direct targeting of HGF by miR–16 regulates proliferation and migration in gastric cancer) … p.5647

Genetics. Reports Summarize Genetics Findings from Korea Advanced Institute of Science and Technology (KAIST) (Model–driven experimental approach reveals the complex regulatory distribution of p53 by the circadian factor Period 2) … p.5648

Oncology - Glioblastomas. Reports Summarize Glioblastomas Findings from Capital Medical University (IDH mutation and MGMT promoter methylation are associated with the pseudoprogression and improved prognosis of glioblastoma multiforme patients who have undergone ...) … p.5649

Oncology - Gliomas. Reports Summarize Gliomas Study Results from Fudan University (miR–491 regulates glioma cells proliferation by targeting TRIM28 in vitro) … p.5651

Immunology - Granulocytes. Reports Summarize Granulocytes Findings from Huazhong Agricultural University [Acute Exposure to Tris(1,3–dichloro–2–propyl) Phosphate (TDCIPP) Causes Hepatic Inflammation and Leads to Hepatotoxicity in Zebrafish] … p.5652

Immunology - Granulocytes. Reports Summarize Granulocytes Study Results from University of Oxford (Blood eosinophils and inhaled corticosteroid/long–acting b–2 agonist efficacy in COPD) … p.5653

Heart Disorders and Diseases - Heart Attack. Reports Summarize Heart Attack Study Results from K. Chaikriangkrai and Co–Researchers (Prognostic Value of Coronary Artery Calcium Score in Acute Chest Pain Patients Without Known Coronary Artery Disease: Systematic Review and Meta–analysis) … p.5654

Liver Diseases and Conditions - Hepatitis B Virus. Reports Summarize Hepatitis B Virus Study Results from Bassett Medical Center (Hepatitis B virus infection and risk of gallstones: a systematic review and meta–analysis) … p.5655

Liver Diseases and Conditions - Hepatitis C Virus. Reports Summarize Hepatitis C Virus Study Results from University of Auckland (High Efficacy of ABT–493 and ABT–530 Treatment in Patients With HCV Genotype 1 or 3 Infection and Compensated Cirrhosis) … p.5656

Genetics - Human Genetics. Reports Summarize Human Genetics Study Results from University of Saarland (What Drives the Development of Social Inequality Over the Life Course? The German Twin Life Study) … p.5657

Nutritional and Metabolic Diseases and Conditions - Hypokalemia. Reports Summarize Hypokalemia Findings from Chinese People's Liberation Army General Hospital (Preoperative Diagnosis of Juxtaglomerular Cell Tumors in Eight Patients) … p.5658

Cardiovascular Diseases and Conditions - Hypotension. Reports Summarize Hypotension Study Results from Army Medical Center (Dialysate–induced hypocalcemia presenting as acute intradialytic hypotension: A case report, safety review, and recommendations)
Membrane Proteins - Ion Channels. Reports Summarize Ion Channels Study Results from University College (Nav1.7 and other voltage–gated sodium channels as drug targets for pain relief) … p.5660

Transplant Medicine - Kidney Transplants. Reports Summarize Kidney Transplants Study Results from Tokyo Women's Medical University (Two cases of kidney transplantation–associated thrombotic microangiopathy successfully treated with eculizumab) … p.5661

Transplant Medicine - Kidney Transplants. Reports Summarize Kidney Transplants Study Results from University of Miami Miller School of Medicine (Lower tacrolimus trough levels are associated with subsequently higher acute rejection risk during the first 12 months after kidney ...) … p.5662

Drugs and Therapies - Levothyroxine Therapy. Reports Summarize Levothyroxine Therapy Findings from Oregon Health and Science University (Effect of Thyroid Function Variations Within the Laboratory Reference Range on Health Status, Mood, and Cognition in Levothyroxine–Treated Subjects) … p.5663

Biotechnology - Liposomes. Reports Summarize Liposomes Study Results from National Heart Lung and Blood Institute (Mammalian Nonmuscle Myosin II Binds to Anionic Phospholipids with Concomitant Dissociation of the Regulatory Light Chain) … p.5664

Oncology - Liver Cancer. Reports Summarize Liver Cancer Findings from Third Military Medical University (Effect of ST2825 on the proliferation and apoptosis of human hepatocellular carcinoma cells) … p.5666

Transplant Medicine - Liver Transplants. Reports Summarize Liver Transplants Findings from French National Institute of Health and Medical Research (INSERM) (Role of Sorafenib in Patients With Recurrent Hepatocellular Carcinoma After Liver Transplantation) … p.5667

Cardiovascular Diseases and Conditions - Malignant Hypertension. Reports Summarize Malignant Hypertension Findings from Institute for Clinical and Experimental Medicine (Intrarenal alterations of the angiotensin–converting enzyme type 2/angiotensin 1–7 complex of the renin–angiotensin system do not alter the ...) … p.5668

Mass Spectrometry. Reports Summarize Mass Spectrometry Study Results from Uppsala University (Identification of transformation products from β–blocking agents formed in wetland microcosms using LC–Q–ToF) … p.5669

Oncology - Melanoma. Reports Summarize Melanoma Findings from Sapienza University (A Case of Sinonasal Melanoma With Unusual Primary Exon 17 KIT D820G Mutation) … p.5670

Oncology - Melanoma. Reports Summarize Melanoma Findings from University of Saskatchewan (Evaluation of beta–cyclodextrin–modified gemini surfactant–based delivery systems in melanoma models) … p.5671

Otorhinolaryngologic Diseases and Conditions - Meniere's Disease. Reports Summarize Meniere's Disease Findings from Imperial College (Intratympanic methylprednisolone versus gentamicin in patients with unilateral Meniere's disease: a randomised, double-blind, comparative effectiveness trial) … p.5672
January 14, 2017

Life Science Research - Molecular Biology. Reports Summarize Molecular Biology Study Results from Emory University (Arl13b regulates Shh signaling from both inside and outside the cilium) ... p.5673

Myeloid Cells. Reports Summarize Myeloid Cells Findings from Research Center (Depletion of CLL–associated patrolling monocytes and macrophages controls disease development and repairs immune dysfunction in vivo) ... p.5674

Gram-Negative Bacteria - Neisseria lactamica. Reports Summarize Neisseria lactamica Findings from Children's University Hospital (Resolution of a Protracted Serogroup B Meningococcal Outbreak with Whole–Genome Sequencing Shows Interspecies Genetic Transfer) ... p.5675

Surgery - Neurosurgery. Reports Summarize Neurosurgery Findings from University of Minnesota (Three–dimensional assessment of the effects of high–density embolization material on the absorbed dose in the target for Gamma Knife radiosurgery of arteriovenous ...) ... p.5676

Oncology - Non-Small Cell Lung Cancer. Reports Summarize Non–Small Cell Lung Cancer Study Results from M.S. Anker and Co–Researchers (Resting heart rate is an independent predictor of death in patients with colorectal, pancreatic, and non–small cell lung cancer: results of a ...) ... p.5679

Oncology - Non-Small Cell Lung Cancer. Reports Summarize Non–Small Cell Lung Cancer Study Results from Research Hospital (Retrospective analysis of third–line chemotherapy in advanced non–small cell lung cancer) ... p.5680

Respiratory Tract Diseases and Conditions - Obesity Hypoventilation Syndrome. Reports Summarize Obesity Hypoventilation Syndrome Findings from CIBERES (The Effect of Supplemental Oxygen in Obesity Hypoventilation Syndrome) ... p.5681

Nutritional and Metabolic Diseases and Conditions - Obesity. Reports Summarize Obesity Study Results from Deakin University (Can policy ameliorate socioeconomic inequities in obesity and obesity–related behaviours? A systematic review of the impact of universal policies on adults and children) ... p.5682

Oncology - Oral Cancer. Reports Summarize Oral Cancer Study Results from Barretos Cancer Hospital (Tapirira guianensis Aubl. Extracts Inhibit Proliferation and Migration of Oral Cancer Cells Lines) ... p.5683

Musculoskeletal Diseases and Conditions - Osteopetrosis. Reports Summarize Osteopetrosis Findings from Shandong University (Characterization of a Relatively Malignant Form of Osteopetrosis Caused by a Novel Mutation in the PLEKHM1 Gene) ... p.5684
January 14, 2017

Pacemakers. Reports Summarize Pacemakers Findings from University of Washington (Concomitant Use of the Subcutaneous Implantable Cardioverter Defibrillator and a Permanent Pacemaker) ... p.5685

Oncology - Pancreatic Cancer. Reports Summarize Pancreatic Cancer Study Results from University of Glasgow (mTORC2 Signaling Drives the Development and Progression of Pancreatic Cancer) ... p.5686

Pharmacokinetics. Reports Summarize Pharmacokinetics Study Results from Wenzhou Medical University (Determination of Apremilast in Rat Plasma by UPLC–MS–MS and Its Application to a Pharmacokinetic Study) ... p.5687

Pharmacology. Reports Summarize Pharmacology Findings from A. Mayburd and Co–Authors (Predicting High–Impact Pharmacological Targets by Integrating Transcriptome and Text–Mining Features) ... p.5688

Photodynamics. Reports Summarize Photodynamics Study Results from Beihang University (Synthesis and conjugation of Sr2MgSi2O7:Eu2+, Dy3+ water soluble afterglow nanoparticles for photodynamic activation) ... p.5690

Liver Diseases and Conditions - Portal Hypertension. Reports Summarize Portal Hypertension Study Results from Hacettepe University (Outcomes of partial splenic embolization in patients with massive splenomegaly due to idiopathic portal hypertension) ... p.5691

www.NewsRx.com

Oncology - Prostate Cancer. Reports Summarize Prostate Cancer Findings from J.F. Zheng and Co–Authors (The up–regulation of long non–coding RNA CCAT2 indicates a poor prognosis for prostate cancer and promotes metastasis by affecting epithelial–mesenchymal transition) ... p.5692

Skin Diseases and Conditions - Psoriasis. Reports Summarize Psoriasis Findings from University of Sao Paulo (Biological therapies (immunomodulatory drugs), worsening of psoriasis and rebound effect: new evidence of similitude) ... p.5693

Oncology - Rectal Cancer. Reports Summarize Rectal Cancer Findings from Fourth Military Medical University (Comparison of non–Gaussian and Gaussian diffusion models of diffusion weighted imaging of rectal cancer at 3.0 T MRI) ... p.5694

Eye Diseases and Conditions - Retinoblastoma. Reports Summarize Retinoblastoma Study Results from All India Institute of Medical Sciences [Multimodal Therapy for Stage III Retinoblastoma (International Retinoblastoma Staging System) A Prospective Comparative Study] ... p.5695

Mental Health Diseases and Conditions - Schizophrenia. Reports Summarize Schizophrenia Findings from Shanxi Medical University (Altered expression of mRNA profiles in blood of early–onset schizophrenia) ... p.5696

Science. Reports Summarize Science Findings from University of Texas Southwestern (Multistep regulation of autophagy by WNK1) ... p.5697

Science - Separation Science. Reports Summarize Separation Science Findings from Northwest Institute of Plateau Biology (Application of chromatography technology in the separation of active alkaloids from Hypecoum leptocarpum and their
inhibitory effect on fatty acid ...) … p.5698

Heart Disorders and Diseases - Takotsubo Cardiomyopathy. Reports Summarize Takotsubo Cardiomyopathy Findings from School of Medicine (Severe respiratory depression and bradycardia before induction of anesthesia and onset of Takotsubo cardiomyopathy after cardiopulmonary resuscitation) … p.5699

Terpenes. Reports Summarize Terpenes Study Results from School of Medicine (The Emerging Role of the Cannabinoid Receptor Family in Peripheral and Neuro–immune Interactions) … p.5700

Drugs and Therapies - Toxicology and Pharmacology. Reports Summarize Toxicology and Pharmacology Study Results from L.A. Cox and Co–Researchers (How accurately and consistently do laboratories measure workplace concentrations of respirable crystalline silica?) … p.5701

Mycobacterium Infections - Tuberculosis. Reports Summarize Tuberculosis Findings from Johns Hopkins University (Evolving strategies for dose optimization of linezolid for treatment of tuberculosis) … p.5702

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports Summarize Type 2 Diabetes Study Results from University of California (The relationship of social support with treatment adherence and weight loss in Latinos with type 2 diabetes) … p.5703

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports Summarize Type 2 Diabetes Study Results from Xiamen University (Changes in blood monocyte Toll–like receptor and serum surfactant protein A reveal a pathophysiological mechanism for community–acquired pneumonia in patients with type 2 ...) … p.5704

Liver Diseases and Conditions - Hepatitis C Virus. Reports by M. Gambato and Co–Researchers Describe Recent Advances in Hepatitis C Virus (Hepatitis C Virus RNA Persists in Liver Explants of Most Patients Awaiting Liver Transplantation Treated With an Interferon–Free Regimen) … p.5705

Drugs and Therapies - Diclofenac Therapy. Reports by M. Rowcliffe and Co–Researchers Describe Recent Advances in Diclofenac Therapy (Topical diclofenac does not affect the antiplatelet properties of aspirin as compared to the intermediate effects of oral diclofenac: A prospective, ...) … p.5706

Skin Diseases and Conditions - Alopecia. Reports by M.M.C. Komen and Co–Researchers Describe Recent Advances in Alopecia (Results of scalp cooling during anthracycline containing chemotherapy depend on scalp skin temperature) … p.5707

Drugs and Therapies - Clinical Pharmacology and Toxicology. Reports by T. Nagayama and Co–Researchers Describe Recent Advances in Clinical Pharmacology and Toxicology (Adverse Drug Reactions for Medicines Newly Approved in Japan from 1999 to 2013: Hypertension and Hypotension) … p.5708

Oncology - Chronic Lymphocytic Leukemia. Reports from A.R. Almeida et al Highlight Recent Findings in Chronic Lymphocytic Leukemia (Delta One T Cells for Immunotherapy of Chronic Lymphocytic Leukemia: Clinical–Grade Expansion/Differentiation and Preclinical Proof of Concept) … p.5709

Drugs and Therapies - Toxicology and Pharmacology. Reports from A.R. Boobis and Colleagues Advance Knowledge in Toxicology and Pharmacology (Classification schemes for carcinogenicity based on hazard – identification have become outmoded
January 14, 2017

and serve neither science nor society) … p.5711

Environmental Water Research. Reports from Aalborg University Provide New Insights into Environmental Water Research (Evaluation of a membrane bioreactor system as post-treatment in waste water treatment for better removal of micropollutants) … p.5713

Cyclohexanes. Reports from Aarhus University Add New Data to Findings in Cyclohexanes (Gene expression related to serotonergic and glutamatergic neurotransmission is altered in the flinders sensitive line rat model of depression: Effect of ketamine) … p.5714

Drugs and Therapies - Pharmacoepidemiology and Drug Safety. Reports from Aarhus University Add New Data to Findings in Pharmacoepidemiology and Drug Safety (Determining prescription durations based on the parametric waiting time distribution) … p.5715

Heart Disorders and Diseases - Heart Attack. Reports from Aarhus University Advance Knowledge in Heart Attack (Clinical predictors of shockable versus non-shockable rhythms in patients with out-of-hospital cardiac arrest) … p.5716

Parkinson’s Disease. Reports from Aarhus University Hospital Describe Recent Advances in Parkinson's Disease (Adjustment disorder and risk of Parkinson's disease) … p.5717

www.NewsRx.com

Drugs and Therapies - Antibiotics. Reports from Aix-Marseille University Advance Knowledge in Antibiotics (Molecular mechanisms of polymyxin resistance: knowns and unknowns) … p.5718

Gram-Negative Bacteria - Acinetobacter baumannii. Reports from Aix-Marseille University Describe Recent Advances in Acinetobacter baumannii [Acquisition of a High Diversity of Bacteria during the Hajj Pilgrimage, Including Acinetobacter baumannii with bla(OXA–72) and Escherichia coli with …] … p.5719

Cardiovascular Research. Reports from Aix-Marseille University Describe Recent Advances in Cardiovascular Research (WES/WGS Reporting of Mutations from Cardiovascular "Actionable" Genes in Clinical Practice: A Key Role for UMD Knowledgebases in the Era of Big Databases) … p.5720

Heart Disorders and Diseases - Bradycardia. Reports from Akdeniz University Provide New Insights into Bradycardia (The efficacy of transcutaneous cardiac pacing in ED) … p.5721

Cardiovascular Diseases and Conditions - Vasculitis. Reports from Akita University Provide New Insights into Vasculitis (Different Expression Patterns of Toll-Like Receptor mRNAs in Blood Mononuclear Cells of IgA Nephropathy and IgA Vasculitis with Nephritis) … p.5722

Oncology - Acute Myeloid Leukemia. Reports from Albert Einstein College of Medicine Advance Knowledge in Acute Myeloid Leukemia (New IDH1 mutant inhibitors for treatment of acute myeloid leukemia) … p.5723

Liver Diseases and Conditions - Hepatitis B Virus. Reports from American Red Cross Describe Recent Advances in Hepatitis B Virus (Development of a multisystem surveillance database for transfusion-transmitted infections among blood donors in the United States) … p.5724
Central Nervous System Diseases and Conditions - Brain Injuries. Reports from American University Add New Data to Findings in Brain Injuries (A Quantification of the Injury–Induced Changes in Central Aromatase, Oestrogenic Milieu and Steroid Receptor Expression in the Zebra Finch) ... p.5725

Oncology - Lymphoma. Reports from Asahi General Hospital Highlight Recent Findings in Lymphoma (Residual FDG uptake of primary thyroid lymphoma after treatment may overestimate residual lymphoma) ... p.5726

Drugs and Therapies - Cancer Therapy. Reports from Asia University Provide New Insights into Cancer Therapy (Hericium erinaceus Inhibits TNF–α–Induced Angiogenesis and ROS Generation through Suppression of MMP–9/NF–kB Signaling and Activation of Nrf2–Mediated Antioxidant Genes in ...) ... p.5727

Urinary Tract. Reports from Baqiyatallah University of Medical Sciences Advance Knowledge in Urinary Tract [Distribution of virulence genes and genotyping of CTX–M–15–producing Klebsiella pneumoniae isolated from patients with community–acquired urinary tract ...] ... p.5728

Chemistry - Biochemistry. Reports from Baylor University College of Medicine Highlight Recent Findings in Biochemistry (Conditional knockout of retinal determination genes in differentiating cells in Drosophila) ... p.5729

Drugs and Therapies - Toxicology and Pharmacology. Reports from Beijing Academy of Agriculture and Forestry Science Add New Data to Findings in Toxicology and Pharmacology [Residue behavior and dietary intake risk assessment of three fungicides in tomatoes (Lycopersicon esculentum Mill.) under ...] ... p.5730

Cardiology. Reports from Beijing Institute of Transfusion Medicine Highlight Recent Findings in Cardiology (Energy metabolism regulated by HDAC inhibitor attenuates cardiac injury in hemorrhagic rat model) ... p.5731

Proteins - Eye Proteins. Reports from Biomedical Research Foundation Add New Data to Findings in Eye Proteins (Desmin and alpha B–crystallin interplay in the maintenance of mitochondrial homeostasis and cardiomyocyte survival) ... p.5732

Heart Disorders and Diseases - Heart Failure. Reports from Brooks College of Health Describe Recent Advances in Heart Failure (Associations between heart failure and physical function in US adults) ... p.5733

Gram-Positive Bacteria - Enterococcus faecium. Reports from Brown University Provide New Insights into Enterococcus faecium (Homologous Recombination within Large Chromosomal Regions Facilitates Acquisition of beta–Lactam and Vancomycin Resistance in Enterococcus faecium) ... p.5734

Drugs and Therapies - Antibiotics. Reports from Brussels Free University Describe Recent Advances in Antibiotics (Evaluation of total body weight and body mass index cut–offs for increased cefazolin dose for surgical prophylaxis) ... p.5735

Drugs and Therapies - Health-System Pharmacy. Reports from C. Walko et al Highlight Recent Findings in Health–System Pharmacy (Precision medicine in oncology: New practice models and roles for oncology pharmacists) ... p.5736

Musculoskeletal Diseases and Conditions - Alveolar Bone Loss. Reports from C.L.M. Storrer et al Highlight Recent Findings in Alveolar Bone Loss [Effect of alendronate on the progression of periodontitis induced by Porphyromonas gingivalis and Fusobacterium
Heart Disorders and Diseases - Atrial Fibrillation. Reports from Case Western Reserve University Add New Data to Findings in Atrial Fibrillation (Impact of Voltage Mapping to Guide Whether to Perform Ablation of the Posterior Wall in Patients With Persistent Atrial Fibrillation) ... p.5745

Neutral Amino Acids. Reports from Case Western Reserve University Add New Data to Findings in Neutral Amino Acids (Phosphorylation at Connexin43 Serine–368 Is Necessary for Myocardial Conduction During Metabolic Stress) ... p.5746

Ebola Virus. Reports from Centers for Disease Control and Prevention Highlight Recent Findings in Ebola Virus (Ebola Virus Disease Diagnostics, Sierra Leone: Analysis of Real–time Reverse Transcription–Polymerase Chain Reaction Values for Clinical Blood and ... ) ... p.5747

Oncology - Colon Cancer. Reports from Central Hospital Advance Knowledge in Colon Cancer (Enhanced expression of long non–coding RNA Sox2ot promoted cell proliferation and motility in colorectal cancer) ... p.5748

Peptides - Glycopeptides. Reports from Central South University Advance Knowledge in Glycopeptides (p53 activates miR–192–5p to mediate vancomycin induced AKI) ... p.5749

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Reports from Chang Gung University Describe Recent Advances in Chronic Hepatitis B Virus (Clinical Relapse After Cessation of Tenofovir Therapy in Hepatitis B e Antigen–Negative Patients) ... p.5750

Intercellular Signaling Peptides and Proteins - Cytokines. Reports from Changhai Hospital Describe Recent Advances in Cytokines (MicroRNA–126a Directs Lymphangiogenesis Through Interacting With Chemokine and Flt4 Signaling in Zebrafish) ... p.5751

14 January 2017

nucleatum: a study in rats) ... p.5737

Immunology - Antigen-Presenting Cells. Reports from CNIC Advance Knowledge in Antigen-Presenting Cells [Optimal Generation of Tissue-Resident but Not Circulating Memory T Cells during Viral Infection Requires Crosspriming by DNGR–1(+) Dendritic Cells] ... p.5738

Life Science Research - Cell Biology. Reports from CNIO Advance Knowledge in Cell Biology (Extracellular Vesicles in Cancer: Cell–to–Cell Mediators of Metastasis) ... p.5739

Oncology - Prostate Cancer. Reports from Cancer Center Advance Knowledge in Prostate Cancer (Androgen–glucocorticoid interactions in the era of novel prostate cancer therapy) ... p.5740

Oncology - Pancreatic Cancer. Reports from Cancer Center Describe Recent Advances in Pancreatic Cancer (Meta–analyses of treatment standards for pancreatic cancer) ... p.5741

Nose Diseases and Conditions - Nasal Polyps. Reports from Capital Medical University Describe Recent Advances in Nasal Polyps (Role of IFN–g, IL–13, and IL–17 on mucociliary differentiation of nasal epithelial cells in chronic rhinosinusitis with nasal polyps) ... p.5742

Transplant Medicine - Kidney Transplants. Reports from Careggi University Hospital Describe Recent Advances in Kidney Transplants (1,25 Dihydroxyvitamin D circulating levels, calcitriol administration, and incidence of acute rejection, CMV infection, and polyoma virus infection in ...) ... p.5743

Eye Diseases and Conditions - Conjunctivitis. Reports from Carthage University Describe Recent Advances in Conjunctivitis (Molecular detection and characterization through analysis of the hexon and fiber genes of Adenoviruses causing conjunctivitis in Tunisia, North Africa) ... p.5744

www.NewsRx.com
Cardiology. Reports from Children's Medical Center Describe Recent Advances in Cardiology (Smaller–Sized Expanded Polytetrafluoroethylene Conduits With a Fan–Shaped Valve and Bulging Sinuses for Right Ventricular Outflow Tract Reconstruction) ... p.5752

Pregnancy Complications - Twin-to-Twin Transfusion Syndrome. Reports from Children's Memorial Hermann Hospital Highlight Recent Findings in Twin–to–Twin Transfusion Syndrome (Aortic distensibility as a surrogate for intertwin pulse pressure differences in monochorionic pregnancies with and without ...) ... p.5753

Hematology - Blood Coagulation Factors. Reports from Chinese Academy of Sciences Advance Knowledge in Blood Coagulation Factors (Determination of the platelet–derived growth factor BB by a competitive thrombin–linked aptamer–based Fluorometric assay) ... p.5754

Drugs and Therapies - Chemotherapy. Reports from Chinese Academy of Sciences Provide New Insights into Chemotherapy (Intracellularly Acid–Switchable Multifunctional Micelles for Combinational Photo/Chemotherapy of the Drug–Resistant Tumor) ... p.5755

Oncology - Esophageal Cancer. Reports from Chinese People's Liberation Army General Hospital Advance Knowledge in Esophageal Cancer (Silencing NKD2 by Promoter Region Hypermethylation Promotes Esophageal Cancer Progression by Activating Wnt Signaling) ... p.5756

Lung Diseases and Conditions - Pneumonia. Reports from Chung Shan Medical University Provide New Insights into Pneumonia (Utility of Plasma Osteopontin Levels in Management of Community–Acquired Pneumonia) ... p.5758

Cardiology. Reports from Cleveland Clinic Add New Data to Findings in Cardiology (Etomidate and the Risk of Complications After Cardiac Surgery: A Retrospective Cohort Analysis) ... p.5759

Oncology - Prostate Cancer. Reports from Cleveland Clinic Add New Data to Findings in Prostate Cancer (Molecular Analysis of Low Grade Prostate Cancer Using a Genomic Classifier of Metastatic Potential) ... p.5760

Heart Disorders and Diseases - Atrioventricular Block. Reports from Cleveland Clinic Provide New Insights into Atrioventricular Block (Incidence and predictors of right ventricular pacing–induced cardiomyopathy in patients with complete atrioventricular block and preserved left ventricular systolic ...) ... p.5761

Aortic Dissection. Reports from Cleveland Clinic Provide New Insights into Aortic Dissection (Stent Grafting Acute Aortic Dissection: Comparison of DeBakey Extent IIIA Versus IIIB) ... p.5762

Drugs and Therapies - Bisphosphonates. Reports from Columbia University Add New Data to Findings in Bisphosphonates (Differential Effects of Teriparatide and Zoledronic Acid on Bone Mineralization Density Distribution at 6 and 24 Months in the SHOTZ Study) ... p.5763

Amphetamines. Reports from Columbia University Advance Knowledge in Amphetamines (Mechanisms of amphetamine action illuminated through optical monitoring of dopamine synaptic vesicles in Drosophila brain) ... p.5764

Cardiology. Reports from Complutense University Highlight Recent Findings in Cardiology (Transposition of the Great Arteries in Fetal Life: Accuracy of Diagnosis and Short–Term Outcome) ... p.5765
January 14, 2017

Heart Disorders and Diseases -
Hypertrophic Cardiomyopathy.  
Reports from Concord Repatriation General Hospital Provide New Insights into Hypertrophic Cardiomyopathy  
(Fixed left ventricular outflow tract obstruction mimicking hypertrophic obstructive cardiomyopathy: pitfalls in diagnosis) … p.5766

Genetics - Human Mutation. Reports from Copenhagen University Hospital Describe Recent Advances in Human Mutation (Germline Chromothripsis Driven by L1–Mediated Retrotransposition and Alu/Alu Homologous Recombination) … p.5767

Mental Health Diseases and Conditions -
Bipolar Disorders. Reports from D. Dima and Colleagues Advance Knowledge in Bipolar Disorders (The polygenic risk for bipolar disorder influences brain regional function relating to visual and default state processing of emotional information) … p.5768

Clinical Research - Clinical Trials and Studies. Reports from D.F. Abbas and Colleagues Advance Knowledge in Clinical Trials and Studies (Simultaneous Administration Compared With a 24–Hour Mifepristone–Misoprostol Interval in Second–Trimester Abortion A Randomized Controlled Trial) … p.5769

Stem Cell Research - Mesenchymal Stem Cells. Reports from Dalian University of Technology Highlight Recent Findings in Mesenchymal Stem Cells (Synergistic effect of bioactive lipid and condition medium on cardiac differentiation of human mesenchymal stem cells from different tissues) … p.5770

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from Dartmouth College Advance Knowledge in Type 2 Diabetes (A global test for gene–gene interactions based on random matrix theory) … p.5771

www.NewsRx.com

Aneuploidy. Reports from Dartmouth–Hitchcock Medical Center Highlight Recent Findings in Aneuploidy (Human embryo mosaicism: did we drop the ball on chromosomal testing?) … p.5772

Animal Diseases and Conditions -
Bluetongue. Reports from Department of Agriculture Advance Knowledge in Bluetongue (Effect of Culicoides sonorensis salivary proteins on clinical disease outcome in experimental bluetongue virus serotype 8 infection of Dorset sheep) … p.5773

Drugs and Therapies - Glucagon Therapy. Reports from Department of Anesthesiology Highlight Recent Findings in Glucagon Therapy (Glucagon–induced hypertensive emergency: a case report) … p.5774

Hydrochloric Acid. Reports from Department of Biochemistry & Molecular Biology Highlight Recent Findings in Hydrochloric Acid (Occupational exposures at a polyvinyl chloride production facility are associated with significant changes to the plasma metabolome) … p.5775

Nutritional and Metabolic Diseases and Conditions - Hemochromatosis. Reports from Department of Cardiology Add New Data to Findings in Hemochromatosis (Successful Treatment of Iron–Overload Cardiomyopathy in Hereditary Hemochromatosis With Deferoxamine and Deferiprone) … p.5776

Health and Medicine - Cardiovascular Interventions. Reports from Department of Cardiology Describe Recent Advances in Cardiovascular Interventions (Early experience of percutaneous paravalvular leak closure using a novel Occlutech occluder) … p.5777
Heart Disorders and Diseases - Heart Failure. Reports from Department of Cardiovascular Medicine Provide New Insights into Heart Failure (Subspecialisation in cardiology care and outcome: should clinical services be redesigned, again?) … p.5778

Hematologic Diseases and Conditions - Disseminated Intravascular Coagulation. Reports from Department of Emergency and Critical Care Advance Knowledge in Disseminated Intravascular Coagulation (Efficacy and safety of anticoagulant therapy in three specific populations with sepsis: a meta–analysis of randomized controlled …) … p.5779

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Reports from Department of Gastroenterology Highlight Recent Findings in Inflammatory Bowel Disease (Characterisation and therapeutic manipulation of the gut microbiome in inflammatory bowel disease) … p.5781

RNA Viruses - Norovirus. Reports from Department of Internal Medicine Advance Knowledge in Norovirus (Clinical outcome of norovirus infection in renal transplant patients) … p.5782

Oncology - Melanoma. Reports from Department of Radiation Oncology Describe Recent Advances in Melanoma (Prognostic factors for melanoma brain metastases treated with stereotactic radiosurgery) … p.5783

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Reports from Department of Rheumatology Add New Data to Findings in Rheumatoid Arthritis (Risk of postoperative infections and the discontinuation of TNF inhibitors in patients with rheumatoid arthritis: A meta–analysis) … p.5784

Transfusion Medicine - Blood Transfusion. Reports from Dixie Regional Medical Center Advance Knowledge in Blood Transfusion (Bilirubin levels and phototherapy use before and after neonatal red blood cell transfusions) … p.5785

Drugs and Therapies - Angiotensin II Inhibitors. Reports from Dongguk University Highlight Recent Findings in Angiotensin II Inhibitors (Alteration of the intravenous and oral pharmacokinetics of valsartan via the concurrent use of gemfibrozil in rats) … p.5786

Digestive System Diseases and Conditions - Crohn's Disease. Reports from E.D. Deeks and Colleagues Advance Knowledge in Crohn's Disease (Certolizumab Pegol: A Review in Inflammatory Autoimmune Diseases) … p.5787

Dermatology - Clinical Dermatology. Reports from E.D. Deeks et al Highlight Recent Findings in Clinical Dermatology (Deoxycholic Acid: A Review in Submental Fat Contouring) … p.5788

Immunology - Immunoglobulins. Reports from Eli Lilly Advance Knowledge in Immunoglobulins (Therapeutic Antibody Engineering To Improve Viscosity and Phase Separation Guided by Crystal Structure) … p.5789

Pharmacokinetics. Reports from Erasmus University Medical Center Add New Data to Findings in Pharmacokinetics (Facilitating the implementation of pharmacokinetic–guided dosing of prophylaxis in haemophilia care by discrete choice experiment) … p.5790

Environmental Health - Environmental Health Research. Reports from Exponent Add New Data to Findings in Environmental Health Research (Systematic review and meta–analysis of glyphosate exposure and risk of lymphohematopoietic cancers) … p.5791
Nutritional and Metabolic Diseases and Conditions - Dyslipidemias. Reports from Faculty of Medicine Describe Recent Advances in Dyslipidemias (Retinal oximetry during treatment of retina vein occlusion by ranibizumab in patients with high blood pressure and dyslipemia) … p.5792

Oncology - Non-Hodgkin Lymphoma. Reports from Faculty of Sciences Advance Knowledge in Non–Hodgkin Lymphoma (Early manifestation of mild cognitive impairment in B–cell non–Hodgkin’s lymphoma patients receiving CHOP and rituximab–CHOP chemotherapy) … p.5793

Biological Factors - Metalloporphyrins. Reports from Federal University Add New Data to Findings in Metalloporphyrins (Protein aggregation as a cellular response to oxidative stress induced by heme and iron) … p.5794

Nutritional and Metabolic Diseases and Conditions - Obesity. Reports from Federal University Add New Data to Findings in Obesity (Chewing in adolescents with overweight and obesity: An exploratory study with behavioral approach) … p.5795

Oncology - Breast Cancer. Reports from Federal University Provide New Insights into Breast Cancer (Physical activity, fatigue and quality of life in breast cancer patients) … p.5796

Autoimmune Diseases and Conditions - Experimental Autoimmune Encephalomyelitis. Reports from First Affiliated Hospital Highlight Recent Findings in Experimental Autoimmune Encephalomyelitis [Enhanced Neuroprotective Effects of Combination Therapy with Bone Marrow–Derived Mesenchymal Stem Cells and Ginkgo biloba Extract …] … p.5797
January 14, 2017

Kidney Diseases and Conditions - Chronic Kidney Disease. Reports from Gazi University Advance Knowledge in Chronic Kidney Disease (Prevalence of Chronic Kidney Disease in Turkish Adults With Obesity and Metabolic Syndrome: A Post Hoc Analysis from Chronic Renal Disease in Turkey Study) ... p.5805

Immunology - Immunoglobulins. Reports from Genentech, Inc. Advance Knowledge in Immunoglobulins [Custom–Designed Affinity Capture LC–MS F(ab ')2 Assay for Biotransformation Assessment of Site–Specific Antibody Drug Conjugates] ... p.5806

Health and Medicine - Medicinal Chemistry. Reports from Genentech, Inc. Highlight Recent Findings in Medicinal Chemistry [Discovery of a Potent and Selective in Vivo Probe (GNE–272) for the Bromodomains of CBP/EP300] ... p.5807

Lung Diseases and Conditions - Acute Lung Injury. Reports from General Hospital Add New Data to Findings in Acute Lung Injury (Acute lung injury induced by lipopolysaccharide is inhibited by wogonin in mice via reduction of Akt phosphorylation and RhoA activation) ... p.5808

Musculoskeletal Diseases and Conditions - Arthritis. Reports from General Hospital Advance Knowledge in Arthritis (Tuberculous arthritis of the hip with Staphylococcus aureus superinfection) ... p.5809

Oncology - Breast Cancer. Reports from General Hospital Describe Recent Advances in Breast Cancer (Comparison of the Adipose and Luminal Mammary Gland Compartment as Orthotopic Inoculation Sites in a 4T1–Based Immunocompetent Preclinical Model for Triple–Negative Breast ...) ... p.5810

www.NewsRx.com

Palliative and Supportive Care. Reports from Ghent University Describe Recent Advances in Palliative and Supportive Care (Palliative care needs at different phases in the illness trajectory: a survey study in patients with cancer) ... p.5811

Cardiovascular Diseases and Conditions - Hypertension. Reports from Guangzhou University Describe Recent Advances in Hypertension (Cerebral Targeting of Acupuncture at Combined Acupoints in Treating Essential Hypertension: An Rs–fMRI Study and Curative Effect Evidence) ... p.5812

Lung Diseases and Conditions - Pulmonary Emphysema. Reports from Gyeongsang National University Add New Data to Findings in Pulmonary Emphysema (Severity of pulmonary emphysema and lung cancer: analysis using quantitative lobar emphysema scoring) ... p.5813

Proteins - Heparan Sulfate Proteoglycans. Reports from Hackensack University Medical Center Provide New Insights into Heparan Sulfate Proteoglycans (Molecular and clinical profiles of syndecan–1 in solid and hematological cancer for prognosis and precision medicine) ... p.5815

Autoimmune Diseases and Conditions - Lupus. Reports from Harvard School of Medicine Add New Data to Findings in Lupus (T cells in Systemic Lupus Erythematosus) ... p.5816
January 14, 2017

Cardiovascular Diseases and Conditions - Aneurysm. Reports from Health Science Center Add New Data to Findings in Aneurysm (LVIS Jr 'shelf' technique: an alternative to Y stent–assisted aneurysm coiling) ... p.5817

Apoptosis. Reports from Hebei Medical University Highlight Recent Findings in Apoptosis (Role of Sirtuin3 in high glucose–induced apoptosis in renal tubular epithelial cells) ... p.5818

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from Helmholtz–Zentrum Describe Recent Advances in Type 2 Diabetes (Altered relation of the renin–aldosterone system and vasoactive peptides in type 2 diabetes: The KORA F4 study) ... p.5819

Biotechnology - Liposomes. Reports from Hiroshima University Highlight Recent Findings in Liposomes (Photodynamic Activity of Fullerenes and Other Molecules Incorporated into Lipid Membranes by Exchange) ... p.5820

Digestive System Diseases and Conditions - Colitis. Reports from Hokkaido University Provide New Insights into Colitis (Cytomegalovirus colitis in a patient undergoing postoperative adjuvant chemotherapy for lung adenocarcinoma with uracil–tegafur) ... p.5821

Oncology - Colon Cancer. Reports from Hospital Center Describe Recent Advances in Colon Cancer (Endogenous erythropoietin and erythropoetin receptors in colorectal cancer; can we answer the questions?) ... p.5822

Oncology - Breast Cancer. Reports from Huazhong University of Science and Technology Advance Knowledge in Breast Cancer (Epidemiology of breast cancer: retrospective study in the Central African Republic) ... p.5823

www.NewsRx.com

Oncology - Pancreatic Cancer. Reports from Huazhong University of Science and Technology Describe Recent Advances in Pancreatic Cancer (Blocking NF–kappa B Is Essential for the Immunotherapeutic Effect of Recombinant IL18 in Pancreatic Cancer) ... p.5824

Health and Medicine. Reports from Human Oncology and Pathogenesis Program Add New Data to Findings in Health and Medicine (Loss of BAP1 function leads to EZH2–dependent transformation) ... p.5825

Drugs and Therapies - Antimicrobials. Reports from IIT Advance Knowledge in Antimicrobials (Cyclization Improves Membrane Permeation by Antimicrobial Peptoids) ... p.5826

Diarylheptanoids. Reports from ISF College of Pharmacy Add New Data to Findings in Diarylheptanoids (Neuroprotective Activity of Curcumin in Combination with Piperine against Quinolinic Acid Induced Neurodegeneration in Rats) ... p.5827

Amenorrhea. Reports from Indiana University Provide New Insights into Amenorrhea (Association of baseline bleeding pattern on amenorrhea with levonorgestrel intrauterine system use) ... p.5828

Nutritional and Metabolic Diseases and Conditions - Diabetes Mellitus. Reports from Inha University Add New Data to Findings in Diabetes Mellitus (Temporal changes in physiological parameters of systemic inflammatory response syndrome during the three days prior to a diagnosis of sepsis: a case–control study) ... p.5829

Central Nervous System Diseases and Conditions - Cerebral Infarction. Reports from Inha University Describe Recent Advances in Cerebral Infarction (Sleep Disturbances at 3 Months after Cerebral Infarction) ... p.5830
Oncology - Renal Cell Carcinoma. Reports from Institute Gustave Roussy Advance Knowledge in Renal Cell Carcinoma (Open–label phase 2 trial of first–line everolimus monotherapy in patients with papillary metastatic renal cell carcinoma: RAPTOR final analysis) … p.5831

Oncology - Gastric Cancer. Reports from Institute for Biology Research Describe Recent Advances in Gastric Cancer (MiR–16 mediates trastuzumab and lapatinib response in ErbB–2–positive breast and gastric cancer via its novel targets CCNJ and FUBP1) … p.5832

Central Nervous System Diseases and Conditions - Epilepsy. Reports from Institute for Cancer Research and Treatment (IRCCS) Add New Data to Findings in Epilepsy (The direct costs of epilepsy in Russia. A prospective cost–of–illness study from a single center in Moscow) … p.5833

Mycobacterium Infections - Tuberculosis. Reports from Institute of Applied Microbiology Highlight Recent Findings in Tuberculosis (A Physiologically Based Pharmacokinetic Model of Isoniazid and Its Application in Individualizing Tuberculosis Chemotherapy) … p.5834

Enzymes and Coenzymes - ADP Ribose Transferases. Reports from Institute of Cancer Describe Recent Advances in ADP Ribose Transferases [Leveraging an NQO1 Bioactivatable Drug for Tumor–Selective Use of Poly (ADP–ribose) Polymerase Inhibitors] … p.5835

Heart Disorders and Diseases - Heart Failure. Reports from Institute of Cardiology Describe Recent Advances in Heart Failure (Positive Effects of the Reversion of Depression on the Sympathovagal Balance after Telerehabilitation in Heart Failure Patients) … p.5836

Oncology. Reports from Institute of Himalayan Bioresource Technology Highlight Recent Findings in Oncology (Impact of point mutation P29S in RAC1 on tumorigenesis) … p.5838

Oncology - Breast Cancer. Reports from Institute of Molecular Cell Biology Provide New Insights into Breast Cancer (Transposon mutagenesis identifies genes that cooperate with mutant Pten in breast cancer progression) … p.5839

Nervous System Research - Neuroscience. Reports from Institute of Neurology Describe Recent Advances in Neuroscience (Copy number variations and stroke) … p.5840

Health and Medicine - Integrative Medicine. Reports from Integral University Advance Knowledge in Integrative Medicine (Evaluation of cytotoxic potential and apoptotic effect of a methanolic extract of Bauhinia racemosa Lam. against a human cancer cell line, HeLa) … p.5840

Pyruvate Kinase Deficiency. Reports from Intermountain Healthcare Describe Recent Advances in Pyruvate Kinase Deficiency (Siblings with Severe Pyruvate Kinase Deficiency and a Complex Genotype) … p.5841

Oncology - Thyroid Cancer. Reports from International Agency for Research on Cancer Highlight Recent Findings in Thyroid Cancer (Thyroid cancer burden in Central and South America) … p.5842

Lung Diseases and Conditions - Pulmonary Embolism. Reports from J.M. Margolis and Co–Researchers Add New Data to Findings in Pulmonary Embolism (Pulmonary Embolism Inpatients Treated With Rivaroxaban Had Shorter Hospital Stays and Lower Costs Compared With Warfarin) … p.5843
January 14, 2017

Drugs and Therapies - Antibiotics. Reports from J.M. Sanders and Colleagues
Advance Knowledge in Antibiotics
(Inclusion of Vancomycin as Part of Broad–Spectrum Coverage Does Not Improve Outcomes in Patients with Intra–Abdominal Infections: A Post Hoc Analysis) ... p.5845

Oncology - Liver Cancer. Reports from James Cook University Advance Knowledge in Liver Cancer
(Hepatocellular carcinoma and non–alcoholic steatohepatitis: The state of play) ... p.5846

Lung Diseases and Conditions - Pulmonary Hypertension. Reports from Japan Women's University
Advance Knowledge in Pulmonary Hypertension (Fluidic Culture and Analysis of Pulmonary Artery Smooth Muscle Cells for the Study of Pulmonary Hypertension) ... p.5847

Cardiovascular Diseases and Conditions - Hypertension. Reports from Jichi Medical University Describe Recent Advances in Hypertension (Add–On Use of Eplerenone Is Effective for Lowering Home and Ambulatory Blood Pressure in Drug–Resistant Hypertension) ... p.5847

Drugs and Therapies - Combination Therapy. Reports from Jikei University Provide New Insights into Combination Therapy (Three–year visual outcomes of intravitreal ranibizumab with or without photodynamic therapy for polypoidal choroidal vasculopathy) ... p.5848

Peptide Proteins - Proinsulin. Reports from Jilin University Add New Data to Findings in Proinsulin [Effects of Di–(2–ethylhexyl) Phthalate on Lipid Metabolism by the JAK/STAT Pathway in Rats] ... p.5849

www.NewsRx.com

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). Reports from Jilin University Advance Knowledge in Phosphotransferases (Alcohol Group Acceptor) [The Role of Deoxycytidine Kinase (dCK) in Radiation–Induced Cell Death] ... p.5850

Abdominal Aortic Aneurysm. Reports from Johns Hopkins University Add New Data to Findings in Abdominal Aortic Aneurysm (Abdominal aortic aneurysm repair in octogenarians is associated with higher mortality compared with nonoctogenarians) ... p.5851

Heart Disorders and Diseases - Myocarditis. Reports from Johns Hopkins University Advance Knowledge in Myocarditis (Pathogenic IL–23 signaling is required to initiate GM–CSF–driven autoimmune myocarditis in mice) ... p.5852

Heart Disorders and Diseases - Heart Attack. Reports from Karolinska Institute Add New Data to Findings in Heart Attack (Time Trends in Incidence and Mortality of Acute Myocardial Infarction, and All–Cause Mortality following a Cardiovascular Prevention Program in Sweden) ... p.5856
Cardiovascular Diseases and Conditions - Venous Thromboembolism. Reports from Karolinska Institute Describe Recent Advances in Venous Thromboembolism (Development and validation of risk prediction model for venous thromboembolism in postpartum women: multinational cohort study) … p.5857

Skin Diseases and Conditions - Pruritus. Reports from Kerman University of Medical Sciences Highlight Recent Findings in Pruritus (Role of Pregabalin in Management of Pruritus: A Literature Review) … p.5858

Oncology - Non-Small Cell Lung Cancer. Reports from Kinki University Faculty of Medicine Provide New Insights into Non–Small Cell Lung Cancer (Clinical development of nintedanib for advanced non–small–cell lung cancer) … p.5859

Liver Diseases and Conditions - Hepatitis. Reports from Kirby Institute Provide New Insights into Hepatitis (Tenofovir–based antiretroviral therapy in HBV–HIV coinfection: results from the TREAT Asia HIV Observational Database) … p.5860

Oncology - Lung Cancer. Reports from Korea Institute of Radiological and Medical Sciences Highlight Recent Findings in Lung Cancer (TGF–b and Hypoxia/Reoxygenation Promote Radioresistance of A549 Lung Cancer Cells through Activation of Nrf2 and EGFR) … p.5861

Granulocytes. Reports from Korea University Highlight Recent Findings in Granulocytes (Silibinin Inhibits Neutrophilic Inflammation and Mucus Secretion Induced by Cigarette Smoke via Suppression of ERK–SP1 Pathway) … p.5862

Liver Diseases and Conditions - Hepatitis C Virus. Reports from Kunming General Hospital Highlight Recent Findings in Hepatitis C Virus (Inhibition of STAT Pathway Impairs Anti Hepatitis C Virus Effect of Interferon Alpha) … p.5863

Immune System Diseases and Conditions - Hypersensitivity. Reports from Kyorin University Provide New Insights into Hypersensitivity (Importance of Water Content of the Stratum Corneum in Mouse Models for Contact Hypersensitivity) … p.5864

Drugs and Therapies - Camptothecin Therapy. Reports from Laboratory for Molecular Biology Advance Knowledge in Camptothecin Therapy [Poly (ADP–ribose) polymers regulate DNA topoisomerase I (Top1) nuclear dynamics and camptothecin sensitivity in living cells] … p.5865

Neurology - Neurodegeneration. Reports from Lanzhou University Add New Data to Findings in Neurodegeneration (DNA damage preceding dopamine neuron degeneration in A53T human alpha–synuclein transgenic mice) … p.5866

Immunology - Immunoglobulins. Reports from Leiden University Describe Recent Advances in Immunoglobulins (Type I CD20 Antibodies Recruit the B Cell Receptor for Complement–Dependent Lysis of Malignant B Cells) … p.5867

Cytometry. Reports from Linkoping University Add New Data to Findings in Cytometry (Platelet Function Determined by Flow Cytometry: New Perspectives?) … p.5868

Drugs and Therapies - Immunotherapy. Reports from Lombardi Comprehensive Cancer Center Highlight Recent Findings in Immunotherapy (Predictive biomarkers for checkpoint inhibitor–based immunotherapy) … p.5869
Intercellular Signaling Peptides and Proteins - Cytokines. Reports from Lovelace Respiratory Research Institute Advance Knowledge in Cytokines (Quercetin Inhibits Multiple Pathways Involved in Interleukin 6 Secretion From Human Lung Fibroblasts and Activity in Bronchial Epithelial Cell Transformation) … p.5870

Antioxidants. Reports from M. Dattilo and Colleagues Advance Knowledge in Antioxidants (Improvement of gamete quality by stimulating and feeding the endogenous antioxidant system: mechanisms, clinical results, insights on gene–environment interactions and ...) … p.5871

Liver Diseases and Conditions - Hepatitis C Virus. Reports from M. El–Bendary and Colleagues Advance Knowledge in Hepatitis C Virus (Associations of human leucocyte antigen class II–DQB1 alleles with hepatitis C virus infection in Egyptian population: a multicentre family–based study) … p.5872

Oncology - Pancreatic Cancer. Reports from M. Seifert and Co–Researchers Add New Data to Findings in Pancreatic Cancer (Inducing a humoral immune response to pancreatic cancer antigen) … p.5873

Heptanes. Reports from Mahidol University Add New Data to Findings in Heptanes (Protective Effects of a Diarylheptanoid from Curcuma comosa Against Hydrogen Peroxide–Induced Astroglial Cell Death) … p.5874

Influenza A Virus Subtype H1N1. Reports from Makerere University Advance Knowledge in Influenza A Virus Subtype H1N1 [Whole–genome analysis of influenza A(H1N1)pdm09 viruses isolated in Uganda from 2009 to 2011] … p.5876

Oncology - Carcinomas. Reports from Mayo Clinic Add New Data to Findings in Carcinomas (In vivo anti–tumor activity of the PARP inhibitor niraparib in homologous recombination deficient and proficient ovarian carcinoma) … p.5877

Digestive System Diseases and Conditions - Crohn's Disease. Reports from Mayo Clinic Advance Knowledge in Crohn's Disease (Safety of Long–term Treatment With Certolizumab Pegol in Patients With Crohn's Disease, Based on a Pooled Analysis of Data From Clinical Trials) … p.5878

Drugs and Therapies - Smoking Cessation Agents. Reports from Mayo Clinic Describe Recent Advances in Smoking Cessation Agents (Varenicline for Smoking Cessation in Light Smokers) … p.5879

Heart Disorders and Diseases - Heart Disease. Reports from Mayo Clinic Provide New Insights into Heart Disease (Outcomes After Curative Thoracic Radiotherapy in Patients With Coronary Artery Disease and Existing Cardiac Stents) … p.5880

Gram–Positive Bacteria - Clostridium difficile. Reports from Medical College Advance Knowledge in Clostridium difficile (Rifamycin Resistance in Clostridium difficile Is Generally Associated with a Low Fitness Burden) … p.5881

Oncology - Non–Small Cell Lung Cancer. Reports from Memorial Sloan–Kettering Cancer Center Highlight Recent Findings in Non–Small Cell Lung Cancer (Cranial irradiation in patients with EGFR–mutant non–small cell lung cancer brain metastases) … p.5882
January 14, 2017

Transplant Medicine - Cell Transplants. Reports from N. Mirza and Colleagues Advance Knowledge in Cell Transplants [Graft versus self (GvS) against T–cell autoantigens is a mechanism of graft–host interaction] ... p.5883

Chemistry - Biochemistry. Reports from Nanchang University Advance Knowledge in Biochemistry (CUL4A functions as an oncogene in ovarian cancer and is directly regulated by miR–494) ... p.5884

Oncology - Colon Cancer. Reports from Nanchang University Describe Recent Advances in Colon Cancer (Prognostic value of the lymphocyte monocyte ratio in patients with colorectal cancer A meta–analysis) ... p.5885

Gram-Negative Bacteria - Helicobacter pylori. Reports from Nanjing Medical University Describe Recent Advances in Helicobacter pylori (The Association between Arrhythmia and Helicobacter pylori Infection: A Meta–Analysis of Case–Control Studies) ... p.5886

Stem Cell Research - Hematopoietic Stem Cells. Reports from National Cancer Center Hospital Highlight Recent Findings in Hematopoietic Stem Cells (Analysis of non–relapse mortality and causes of death over 15 years following allogeneic hematopoietic stem cell transplantation) ... p.5887

Cardiovascular Diseases. Reports from National Institute of Cardiology Provide New Insights into Cardiovascular Diseases (Possible role of intronic polymorphisms in the PHACTR1 gene on the development of cardiovascular disease) ... p.5888

Oncology - Small Cell Lung Cancer. Reports from National Koranyi Institute of Pulmonology Highlight Recent Findings in Small Cell Lung Cancer [From Bench to Bedside: Attempt to Evaluate Repositioning of Drugs in the Treatment of Metastatic Small Cell Lung Cancer (SCLC)] ... p.5889

Neuropeptides - Bradykinin. Reports from National Polytechnic Institute Describe Recent Advances in Bradykinin (Early kidney damage induced by subchronic exposure to PM2.5 in rats) ... p.5890

Heart Disorders and Diseases - Arrhythmogenic Right Ventricular Dysplasia. Reports from National Yang Ming University Advance Knowledge in Arrhythmogenic Right Ventricular Dysplasia (The Application of Ambulatory Electrocardiographically–Based T–Wave Alternans in Patients with Arrhythmogenic Right Ventricular ...) ... p.5891

Chemistry - Inorganic Chemistry. Reports from New University of Lisbon Add New Data to Findings in Inorganic Chemistry (Inhibition of the STAT3 Protein by a Dinuclear Macrocyclic Complex) ... p.5892

Drugs and Therapies - Genistein Therapy. Reports from Northeast Agriculture University Add New Data to Findings in Genistein Therapy [The Cooperative Effect of Genistein and Protein Hydrolysates on the Proliferation and Survival of Osteoblastic Cells (hFOB 1.19)] ... p.5893

Science - Materials Science. Reports from Northeast Forestry University Add New Data to Findings in Materials Science (Fluorescence Probe Based on an Amino–Functionalized Fluorescent Magnetic Nanocomposite for Detection of Folic Acid in Serum) ... p.5894

Gram-Negative Bacteria - Salmonella enterica. Reports from Novartis Animal Health Highlight Recent Findings in Salmonella enterica (Toll–Like Receptor Activation by Generalized Modules for Membrane Antigens from Lipid A Mutants of Salmonella enterica Serovars Typhimurium and Enteritidis) ... p.5895
Oncology - Pancreatic Cancer. Reports from Ohio State University Advance Knowledge in Pancreatic Cancer (Treatment–related Hypertension as a Pharmacodynamic Biomarker for the Efficacy of Bevacizumab in Advanced Pancreas Cancer A Pooled Analysis of 4 Prospective Trials of ...) … p.5896

Oncology - Esophageal Cancer. Reports from Oregon Health and Science University Add New Data to Findings in Esophageal Cancer (Preoperative carboplatin and paclitaxel–based chemoradiotherapy for esophageal carcinoma: results of a modified CROSS regimen utilizing radiation ...) … p.5897

Oncology - Thyroid Cancer. Reports from Osaka City University Highlight Recent Findings in Thyroid Cancer (The Safety and Efficacy of Weekly Paclitaxel Administration for Anaplastic Thyroid Cancer Patients: A Nationwide Prospective Study) … p.5898

Nursing - Evidence-Based Nursing. Reports from Ottawa Hospital Research Institute Describe Recent Advances in Evidence–Based Nursing (Implementation of Symptom Protocols for Nurses Providing Telephone–Based Cancer Symptom Management: A Comparative Case Study) … p.5899

Nephrology. Reports from Panjab University Advance Knowledge in Nephrology (Bergenin attenuates renal injury by reversing mitochondrial dysfunction in ethylene glycol induced hyperoxaluric rat model) … p.5900

Heart Disorders and Diseases - Heart Attack. Reports from Paris–Descartes University Highlight Recent Findings in Heart Attack (Use of Neuromuscular Blockers During Therapeutic Hypothermia After Cardiac Arrest: A Nursing Protocol) … p.5901

Nosocomial Infections. Reports from Pathology and Laboratory Medicine Describe Recent Advances in Nosocomial Infections (Investigation of a suspected nosocomial transmission of blaKPC3–mediated carbapenem–resistant Klebsiella pneumoniae by whole genome sequencing) … p.5902

Oncology - Lymphoma. Reports from Peking Union Medical College Advance Knowledge in Lymphoma (Decreased Prognostic Value of International Prognostic Score in Chinese Advanced Hodgkin Lymphoma Patients Treated in the Contemporary Era) … p.5903

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from Peking University People’s Hospital Advance Knowledge in Type 2 Diabetes (Prevalence of Obesity and Its Influence on Achievement of Cardiometabolic Therapeutic Goals in Chinese Type 2 Diabetes Patients: An Analysis of the ...) … p.5904

Oncology - Liver Cancer. Reports from People’s Hospital Provide New Insights into Liver Cancer (Harm and Benefits of Salvage Transplantation for Hepatocellular Carcinoma: An Updated Meta–analysis) … p.5905

Oncology - Skin Cancer. Reports from Pohang University of Science and Technology (POSTECH) Advance Knowledge in Skin Cancer (Hyaluronate–Gold Nanorod/DR5 Antibody Complex for Noninvasive Theranosis of Skin Cancer) … p.5906

Surgery - Foot and Ankle Surgery. Reports from Pontifical Catholic University Highlight Recent Findings in Foot and Ankle Surgery (Gender–based violence and sexual and reproductive health among low–income youth in three Brazilian cities) … p.5907
January 14, 2017

Science - Chromatography. Reports from Public Health Institute Add New Data to Findings in Chromatography (Analysis of 25 C NBOMe in Seized Blotters by HPTLC and GC-MS) … p.5908

Oncology - Liver Cancer. Reports from Regional Hospital Highlight Recent Findings in Liver Cancer (Up–to–7 Criteria for Hepatocellular Carcinoma Liver Transplantation: A Retrospective Analysis of Experiences) … p.5910

Immunology - Immunoglobulins. Reports from Research Institute Highlight Recent Findings in Immunoglobulins [Substitution of Heavy Complementarity Determining Region 3 (CDR–H3) Residues Can Synergistically Enhance Functional Activity of Antibody and Its Binding Affinity to …] … p.5915

Hematologic Diseases and Conditions - Hemophilia A. Reports from Royal Free Hospital Highlight Recent Findings in Hemophilia A (Congenital factor V and VIII deficiency in women: a systematic review of literature and report of two new cases) … p.5916

Infectious Diseases. Reports from Royal Holloway–University of London Advance Knowledge in Infectious Diseases (The evolution of sex–specific virulence in infectious diseases) … p.5917

Heart Disorders and Diseases - Atrial Fibrillation. Reports from Ruhr University Describe Recent Advances in Atrial Fibrillation (Performance of an Implantable Cardiac Monitor to Detect Atrial Fibrillation: Results of the DETECT AF Study) … p.5918

Oncology - Prostate Cancer. Reports from Rutgers State University Provide New Insights into Prostate Cancer (delta–Tocopherol Inhibits Receptor Tyrosine Kinase–Induced AKT Activation in Prostate Cancer Cells) … p.5919

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports from Salford Royal NHS Foundation Trust Provide New Insights into Atherosclerosis (Progress in the treatment of atherosclerotic renovascular disease: the conceptual journey and the unanswered questions) … p.5920

Biological Factors - Inflammation Mediators. Reports from San Raffaele Scientific Institute Add New Data to Findings in Inflammation Mediators (NF–kB oscillations translate into functionally related patterns of gene expression) … p.5921
Musculoskeletal Diseases and Conditions
- Muscular Dystrophy. Reports from School of Medicine Advance Knowledge in Muscular Dystrophy (Identification and Function of Fibrocytes in Skeletal Muscle Injury Repair and Muscular Dystrophy) … p.5922

Ethylamines. Reports from School of Medicine Provide New Insights into Ethylamines (Dose–response and Cardiopulmonary Side Effects of the Novel Neuromuscular–blocking Drug CW002 in Man) … p.5923

Oncology - Liver Cancer. Reports from School of Pharmacy Add New Data to Findings in Liver Cancer (The Antitumor Effect of DYC–279 on Human Hepatocellular Carcinoma HepG2 Cells) … p.5924

Oncology - Colon Cancer. Reports from School of Public Health Add New Data to Findings in Colon Cancer (Systematic review with meta–analysis: the comparative effectiveness of aspirin vs. screening for colorectal cancer prevention) … p.5925

Education - School Health. Reports from School of Public Health Highlight Recent Findings in School Health (School Health Promotion Policies and Adolescent Risk Behaviors in Israel: A Multilevel Analysis) … p.5926

Cardiology. Reports from Science Institute Describe Recent Advances in Cardiology (Absolute Measurement of Cardiac Injury–Induced microRNAs in Biofluids across Multiple Test Sites) … p.5927

Oncology - Colon Cancer. Reports from Second Military Medical University Provide New Insights into Colon Cancer (gamma–Aminobutyric acid inhibits the proliferation and increases oxaliplatin sensitivity in human colon cancer cells) … p.5928

Oncology - Acute Myeloid Leukemia. Reports from Shaheed Beheshti University of Medical Sciences Advance Knowledge in Acute Myeloid Leukemia (Expression analysis of BECN1 in acute myeloid leukemia: association with distinct cytogenetic and molecular abnormalities) … p.5929

Oncology - Colon Cancer. Reports from Shanghai Jiao–Tong University Add New Data to Findings in Colon Cancer (Overexpression of LARP1 predicts poor prognosis of colorectal cancer and is expected to be a potential therapeutic target) … p.5930

Neurodegenerative Diseases. Reports from Shanghai Jiao–Tong University Advance Knowledge in Neurodegenerative Diseases (Isoflurane neurotoxicity involves activation of hypoxia inducible factor–1 alpha via intracellular calcium in neonatal rodents) … p.5931

Heart Disorders and Diseases - Cardiomyopathies. Reports from Shinshu University Add New Data to Findings in Cardiomyopathies (Regression of left ventricular hypertrabeculation is associated with improvement in systolic function and favorable prognosis in adult patients with non–ischemic …) … p.5932

Gastroenterology. Reports from Showa University Advance Knowledge in Gastroenterology (Oxygenated Static Preservation of Donation after Cardiac Death Liver Grafts Improves Hepatocyte Viability and Function) … p.5933

Cardiology. Reports from Sibley Heart Center Advance Knowledge in Cardiology (Echocardiographic Predictors of Left Ventricular Outflow Tract Obstruction following Repair of Atrioventricular Septal Defect) … p.5934

www.NewsRx.com
Oncology - Esophageal Cancer. Reports from Sichuan University Advance Knowledge in Esophageal Cancer (Early enteral nutrition compared with parenteral nutrition for esophageal cancer patients after esophagectomy: a meta–analysis) … p.5935

Viral RNA. Reports from Singapore National University Provide New Insights into Viral RNA (RNA–binding protein CPEB1 remodels host and viral RNA landscapes) … p.5936

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from Soochow University Provide New Insights into Diabetes (Increased angiotensin–like protein 8 levels in patients with type 2 diabetes and cardiovascular disease) … p.5937

Mycobacterium Infections - Tuberculosis. Reports from Southern Medical University Advance Knowledge in Tuberculosis (Microarray analysis of long noncoding RNA and mRNA expression profiles in human macrophages infected with Mycobacterium tuberculosis) … p.5938

Digestive System Diseases and Conditions - Crohn’s Disease. Reports from Southern Medical University Highlight Recent Findings in Crohn’s Disease (Involvement of Activated Cdc42 Kinase1 in Colitis and Colorectal Neoplasms) … p.5939

Oncology - Small Cell Lung Cancer. Reports from Southern Medical University Provide New Insights into Small Cell Lung Cancer (New application of an old drug: Antitumor activity and mechanisms of doxycycline in small cell lung cancer) … p.5940

Cardiovascular Diseases and Conditions - Aneurysm. Reports from Spine Institute Provide New Insights into Aneurysm (Separating the wheat from the chaff: region of interest combined with metal artifact reduction for completion angiography following cerebral aneurysm treatment) … p.5941

Proteins - DNA-Binding Proteins. Reports from St. James Hospital Describe Recent Advances in DNA–Binding Proteins (Molecular Mechanisms of Natural Honey Against H. pylori Infection Via Suppression of NF–kappa B and AP–1 Activation in Gastric Epithelial Cells) … p.5942

Biguanides. Reports from St. John's University Add New Data to Findings in Biguanides (Activation of AMP–activated Protein Kinase by Metformin Induces Protein Acetylation in Prostate and Ovarian Cancer Cells) … p.5943

Cardiovascular Diseases and Conditions - Arteriosclerosis. Reports from Stanford University Describe Recent Advances in Arteriosclerosis (Protective Effects of Statins in Cancer: Should They Be Prescribed for High–Risk Patients?) … p.5944

Drugs and Therapies - Antifungals. Reports from Statens Serum Institute Add New Data to Findings in Antifungals (Resistance in human pathogenic yeasts and filamentous fungi: prevalence, underlying molecular mechanisms and link to the use of antifungals in humans and the ...) … p.5945

Cardiovascular Diseases. Reports from Sultan Qaboos University Hospital Highlight Recent Findings in Cardiovascular Diseases (Dyslipidaemia in the Middle East: Current status and a call for action) … p.5947

Oncology - Lung Cancer. Reports from Sun Yat Sen University Describe Recent Advances in Lung Cancer (PTEN expression is associated with the outcome of lung cancer: evidence from a meta–analysis) … p.5948

Heart Disorders and Diseases - Ventricular Fibrillation. Reports from Sun Yat Sen University Describe Recent Advances in Ventricular Fibrillation (Long–term treatment of spontaneously hypertensive rats with PD123319 and
January 14, 2017

electrophysiological remodeling of left ventricular myocardium) … p.5949

Oncology - Breast Cancer. Reports from Sun Yat Sen University Highlight Recent Findings in Breast Cancer (Clinical features of brain metastases in breast cancer: an implication for hippocampal–sparing whole–brain radiation therapy) … p.5950

Drugs and Therapies - Cancer Therapy. Reports from Sun Yat–Sen University Advance Knowledge in Cancer Therapy (Discovering new mTOR inhibitors for cancer treatment through virtual screening methods and in vitro assays) … p.5951

Drugs and Therapies - Histone Deacetylase Inhibitors. Reports from Sungkyunkwan University Provide New Insights into Histone Deacetylase Inhibitors (Compound 9a, a novel synthetic histone deacetylase inhibitor, protects against septic injury in mice by suppressing MAPK signalling) … p.5952

Oncology - Lymphoma. Reports from Sungkyunkwan University School of Medicine Describe Recent Advances in Lymphoma (Successful Management of Primary Cardiac Lymphoma with Minimal Debulking Surgery Combined with Adjuvant Chemotherapy) … p.5953

Cardiology. Reports from Technical University Provide New Insights into Cardiology (Relation between detection rate and inappropriate shocks in single versus dual chamber cardioverter–defibrillator—an analysis from the OPTION trial) … p.5954

Oncology - Melanoma. Reports from Technical University Provide New Insights into Melanoma (Tumour stage distribution and survival of malignant melanoma in Germany 2002–2011) … p.5955

www.NewsRx.com

Digestive System Diseases and Conditions - Colitis. Reports from Texas A&M University Add New Data to Findings in Colitis (Mango polyphenolics reduce inflammation in intestinal colitis involvment of the miR–126/PI3K/AKT/mTOR axis in vitro and in vivo) … p.5956

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports from Third Military Medical University Add New Data to Findings in Atherosclerosis (Elevated Type II Secretory Phospholipase A2 Increases the Risk of Early Atherosclerosis in Patients with Newly Diagnosed Metabolic Syndrome) … p.5957

Oncology - Melanoma. Reports from Thomas Jefferson University Describe Recent Advances in Melanoma [Autologous melanoma cell vaccine using monocyte–derived dendritic cells (NBS20/eltrapulden–T)] … p.5958

Diseases and Conditions - Febrile Seizures. Reports from Thomas Jefferson University Highlight Recent Findings in Febrile Seizures (Mesial temporal lobe epilepsy with childhood febrile seizure) … p.5959

Lung Diseases and Conditions - Hemoptysis. Reports from Thomas Jefferson University Hospital Add New Data to Findings in Hemoptysis (Management considerations of massive hemoptysis while on extracorporeal membrane oxygenation) … p.5960

Leiomyosarcomas. Reports from Tianjin Medical University Add New Data to Findings in Leiomyosarcomas (Myxoid leiomyosarcoma of the uterus: a case report and review of the literature) … p.5961

Life Science Research - Anatomy. Reports from Tianjin Medical University Describe Recent Advances in Anatomy [Detachment–Based Equilibrium of Anoikic Cell Death and Autophagic Cell Survival Through Adaptor Protein p66 (Shc)] … p.5962
January 14, 2017

Oncology - Breast Cancer. Reports from Tianjin Medical University Highlight Recent Findings in Breast Cancer (Advancement of Wnt signal pathway and the target of breast cancer) … p.5963

Heart Disorders and Diseases - Heart Failure. Reports from Tokyo Women's Medical University Add New Data to Findings in Heart Failure (Effect of Taurine on Hemodialfiltration in Patients With Chronic Heart Failure) … p.5963

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports from Tufts Medical Center Add New Data to Findings in Atherosclerosis (Effects of Race and Sex on Measured GFR: The Multi–Ethnic Study of Atherosclerosis) … p.5964

Angiology. Reports from Tulane University Provide New Insights into Angiology (Serum 25–hydroxyvitamin D deficiency predicts poor outcome amongst acute ischaemic stroke patients with low high density lipoprotein cholesterol) … p.5966

Immunology - Lymphoid Tissue. Reports from University Clinic Highlight Recent Findings in Lymphoid Tissue (Endobronchial ultrasound elastography strain ratio for mediastinal lymph node diagnosis) … p.5967

Nervous System Diseases and Conditions - Tuberous Sclerosis. Reports from University College Highlight Recent Findings in Tuberous Sclerosis (Variants Within TSC2 Exons 25 and 31 Are Very Unlikely to Cause Clinically Diagnosable Tuberous Sclerosis) … p.5968

Nutritional and Metabolic Diseases and Conditions - Diabetes Insipidus. Reports from University Hospital Add New Data to Findings in Diabetes Insipidus (Copeptin in the diagnosis of vasopressin–dependent disorders of fluid homeostasis) … p.5969

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Reports from University Hospital Add New Data to Findings in Rheumatoid Arthritis (Methotrexate selectively targets human proinflammatory macrophages through a thymidylate synthase/p53 axis) … p.5970

Oncology - Head and Neck Cancer. Reports from University Hospital Advance Knowledge in Head and Neck Cancer (CT–based follow–up following radiotherapy or radiochemotherapy for locally advanced head and neck cancer; outcome and development of a prognostic model for regional ...) … p.5971

Heart Disorders and Diseases - Atrial Fibrillation. Reports from University Medical Center Advance Knowledge in Atrial Fibrillation (Long–Term Success for the Convergent Atrial Fibrillation Procedure: 4–Year Outcomes) … p.5972

DNA Research. Reports from University of Alabama Advance Knowledge in DNA Research (Poxvirus uracil–DNA glycosylase–An unusual member of the family I uracil–DNA glycosylases) … p.5973

Drugs and Therapies - Paracetamol Therapy. Reports from University of Ataturk Add New Data to Findings in Paracetamol Therapy (Mitigation of paracetamol–induced reproductive damage by chrysin in male rats via reducing oxidative stress) … p.5974

Peptide Proteins - Proinsulin. Reports from University of Auckland Highlight Recent Findings in Proinsulin (A Critical Role for beta–Catenin in Modulating Levels of Insulin Secretion from beta–Cells by Regulating Actin Cytoskeleton and Insulin Vesicle Localization) … p.5975
January 14, 2017

Heart Disorders and Diseases - Heart Disease. Reports from University of Bergen Add New Data to Findings in Heart Disease (Prevention and treatment of cardiovascular disease in Ethiopia: a cost–effectiveness analysis) … p.5976

Cardiology. Reports from University of British Columbia Describe Recent Advances in Cardiology (Sequential Right and Left Ventricular Assessment in Posttetralogy of Fallot Patients with Significant Pulmonary Regurgitation) … p.5977

Enzymes and Coenzymes - ADP Ribose Transferases. Reports from University of Calabria Provide New Insights into ADP Ribose Transferases [Poly (ADP–ribose) polymerase is not involved in the neuroprotection exerted by azithromycin against ischemic stroke in mice] … p.5978

Atrial Fibrillation. Reports from University of Calgary Provide New Insights into Atrial Fibrillation (Enhanced Cytosolic Ca2+ Activation Underlies a Common Defect of Central Domain Cardiac Ryanodine Receptor Mutations Linked to Arrhythmias) … p.5979

Bacterial Infections and Mycoses - Bacteremia. Reports from University of California Add New Data to Findings in Bacteremia (Vancomycin MIC Does Not Predict 90–Day Mortality, Readmission, or Recurrence in a Prospective Cohort of Adults with Staphylococcus aureus Bacteremia) … p.5980

Polyomavirus. Reports from University of California Add New Data to Findings in Polyomavirus (Intragraft Antiviral–Specific Gene Expression as a Distinctive Transcriptional Signature for Studies in Polyomavirus–Associated Nephropathy) … p.5982

www.NewsRx.com

Oncology - Prostate Cancer. Reports from University of California Describe Recent Advances in Prostate Cancer (Cell type–specific abundance of 4EBP1 primes prostate cancer sensitivity or resistance to PI3K pathway inhibitors) … p.5983

Chemical Research - Chemical Biology. Reports from University of California Highlight Recent Findings in Chemical Biology (Engineering Soluble Human Paraoxonase 2 for Quorum Quenching) … p.5984

Oncology - Gliomas. Reports from University of California Highlight Recent Findings in Gliomas (Hyperpolarized C–13 MR imaging detects no lactate production in mutant IDH1 gliomas: Implications for diagnosis and response monitoring) … p.5985

Science. Reports from University of Cambridge Describe Recent Advances in Science (CCT complex restricts neuropathogenic protein aggregation via autophagy) … p.5986

Health and Medicine. Reports from University of Central Lancashire Highlight Recent Findings in Health and Medicine (Repetitive task training for improving functional ability after stroke) … p.5987

Oncology - Urothelial Cancer. Reports from University of Chicago Highlight Recent Findings in Urothelial Cancer (Clinical Evaluation of Cisplatin Sensitivity of Germline Polymorphisms in Neoadjuvant Chemotherapy for Urothelial Cancer) … p.5988

Cardiovascular Diseases and Conditions - Aneurysm. Reports from University of Cincinnati Highlight Recent Findings in Aneurysm (Aneurysm growth and de novo aneurysms during aneurysm surveillance) … p.5990
Pharmacokinetics. Reports from University of Cincinnati Highlight Recent Findings in Pharmacokinetics (ABCC3 genetic variants are associated with postoperative morphine–induced respiratory depression and morphine pharmacokinetics in children) ... p.5991

Drugs and Therapies - Antibiotics. Reports from University of Claude Bernard Provide New Insights into Antibiotics (Delivery system for berberine chloride based on the nanocarrier ZnAl–layered double hydroxide: Physicochemical characterization, release behavior and evaluation of ...) ... p.5991

Nutritional and Metabolic Diseases and Conditions - Obesity. Reports from University of Colorado Advance Knowledge in Obesity (Pharmacokinetic and Pharmacodynamic Evaluation of a Weight–Based Dosing Regimen of Cefoxitin for Perioperative Surgical Prophylaxis in Obese and Morbidly Obese Patients) ... p.5993

Immunology - Immunoproteins. Reports from University of Connecticut Advance Knowledge in Immunoproteins (Effect of Excipients on Liquid–Liquid Phase Separation and Aggregation in Dual Variable Domain Immunoglobulin Protein Solutions) ... p.5994

Heart Disorders and Diseases - Heart Attack. Reports from University of Copenhagen Describe Recent Advances in Heart Attack (Association between prehospital physician involvement and survival after out–of–hospital cardiac arrest: A Danish nationwide observational study) ... p.5995

Nutritional and Metabolic Diseases and Conditions - Obesity. Reports from University of Debrecen Highlight Recent Findings in Obesity (Paraoxonase–1 and adipokines: Potential links between obesity and atherosclerosis) ... p.5996

www.NewsRx.com

Drugs and Therapies - Antineoplastics. Reports from University of Dundee Describe Recent Advances in Antineoplastics (The Role of Folate Transport in Antifolate Drug Action in Trypanosoma brucei) ... p.5997

Enzymes and Coenzymes - Carboxylic Ester Hydrolases. Reports from University of Eastern Finland Describe Recent Advances in Carboxylic Ester Hydrolases (In Vivo Characterization of the Ultrapotent Monoacylglycerol Lipase Inhibitor ...) ... p.5998

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from University of Exeter Add New Data to Findings in Type 2 Diabetes (beta–cell differentiation status in type 2 diabetes) ... p.5999

Cyclohexanes. Reports from University of Florida College of Medicine Advance Knowledge in Cyclohexanes (Ketamine suppresses hypoxia–induced inflammatory responses in the late–gestation ovine fetal kidney cortex) ... p.6000

Skin Diseases and Conditions - Cholesteatoma. Reports from University of Florida Highlight Recent Findings in Cholesteatoma (Efficacy of Antibiotic Prophylaxis Prior to Tympanoplasty for Contaminated Cholesteatoma) ... p.6001

Drugs and Therapies - Antimicrobials. Reports from University of Freiburg Highlight Recent Findings in Antimicrobials (Nonwoven Carboxylated Agarose–Based Fiber Meshes with Antimicrobial Properties) ... p.6002

Heart Disorders and Diseases - Heart Failure. Reports from University of Glasgow Advance Knowledge in Heart Failure (Loop diuretics, renal function and clinical outcome in patients with heart failure and reduced ejection fraction) ... p.6003
January 14, 2017

Oncology - Colon Cancer. Reports from University of Gothenburg Highlight Recent Findings in Colon Cancer (Development and validation of the preparedness for Colorectal Cancer Surgery Questionnaire: PCSQ–pre 24) … p.6004

Oncology - Leukemia. Reports from University of Hong Kong Highlight Recent Findings in Leukemia (Nanomechanical measurement of adhesion and migration of leukemia cells with phorbol 12–myristate 13–acetate treatment) … p.6005

Nervous System Diseases and Conditions - Charcot-Marie-Tooth Disease. Reports from University of Illinois Advance Knowledge in Charcot–Marie–Tooth Disease (Bicyclic–Capped Histone Deacetylase 6 Inhibitors with Improved Activity in a Model of Axonal Charcot–Marie–Tooth Disease) … p.6006

Enzymes and Coenzymes - Ligases. Reports from University of Illinois Advance Knowledge in Ligases (The mitochondrial ubiquitin ligase plays an anti–apoptotic role in cardiomyocytes by regulating mitochondrial fission) … p.6007

Clinical Research - Clinical Trials and Studies. Reports from University of Illinois Describe Recent Advances in Clinical Trials and Studies (A Meta–Intervention to Increase Completion of an HIV–Prevention Intervention: Results From a Randomized Controlled Trial in the State of Florida) … p.6008

Oncology - Colon Cancer. Reports from University of Kansas Provide New Insights into Colon Cancer (Prevalence and survival benefit of adjuvant chemotherapy in stage III colon cancer patients: Comparison of overall and age–stratified results by multivariable modeling …) … p.6009

www.NewsRx.com

Angiology - Blood Coagulation and Fibrinolysis. Reports from University of Karachi Highlight Recent Findings in Blood Coagulation and Fibrinolysis (Anticoagulant, antiplatelet and antianemic effects of Punica granatum (pomegranate) juice in rabbits) … p.6010

Neurodegenerative Diseases and Conditions - Motor Neuron Disease. Reports from University of Kebangsaan Advance Knowledge in Motor Neuron Disease (Cell–based therapies for amyotrophic lateral sclerosis/motor neuron disease) … p.6011

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports from University of Kerala Provide New Insights into Atherosclerosis (Quercetin attenuates atherosclerotic inflammation and adhesion molecule expression by modulating TLR–NF–kappa B signaling pathway) … p.6012

Heart Disorders and Diseases - Heart Attack. Reports from University of Ljubljana Advance Knowledge in Heart Attack (Cross–talk between the dipeptidyl peptidase–4 and stromal cell–derived factor–1 in stem cell homing and myocardial repair: Potential impact of dipeptidyl peptidase–4 …) … p.6013

Oncology - Breast Cancer. Reports from University of Macau Add New Data to Findings in Breast Cancer (A Novel Danshensu Derivative Prevents Cardiac Dysfunction and Improves the Chemotherapeutic Efficacy of Doxorubicin in Breast Cancer Cells) … p.6014

Immunology - Granulocytes. Reports from University of Manchester Add New Data to Findings in Granulocytes (The Associations of Blood Kidney Injury Molecule–1 and Neutrophil Gelatinase–Associated Lipocalin with Progression from CKD to ESRD) … p.6015
Musculoskeletal Diseases and Conditions - Parkinsonian Disorders. Reports from University of Melbourne Advance Knowledge in Parkinsonian Disorders (Effects of Neonatal Iron Feeding and Chronic Clioquinol Administration on the Parkinsonian Human A53T Transgenic Mouse) … p.6016

Oncology - Breast Cancer. Reports from University of Michigan Advance Knowledge in Breast Cancer (Maternal Embryonic Leucine Zipper Kinase (MELK) as a Novel Mediator and Biomarker of Radioreistance in Human Breast Cancer) … p.6017

Bone Research. Reports from University of Michigan Describe Recent Advances in Bone Research (FAK Promotes Osteoblast Progenitor Cell Proliferation and Differentiation by Enhancing Wnt Signaling) … p.6018

Drugs and Therapies - Antiretrovirals. Reports from University of Missouri Highlight Recent Findings in Antiretrovirals (Tenofovir Containing Thiolated Chitosan Core/Shell Nanofibers: In Vitro and in Vivo Evaluations) … p.6019

Cardiology. Reports from University of Montpellier Describe Recent Advances in Cardiology (Inter–individual variability and modeling of electrical activity: a possible new approach to explore cardiac safety?) … p.6020

Science. Reports from University of North Carolina Describe Recent Advances in Science (Nicotinamide benefits both mothers and pups in two contrasting mouse models of preeclampsia) … p.6021

Cardiovascular Diseases. Reports from University of Oxford Describe Recent Advances in Cardiovascular Diseases (Sympathetic neurons are a powerful driver of myocyte function in cardiovascular disease) … p.6022

Heart Disorders and Diseases - Atrial Fibrillation. Reports from University of Oxford Highlight Recent Findings in Atrial Fibrillation (Recent time trends in incidence, outcome and premorbid treatment of atrial fibrillation–related stroke and other embolic vascular events: a population–based …) … p.6023

Proteins - Cell Cycle Proteins. Reports from University of Paris Provide New Insights into Cell Cycle Proteins (IMP–3 protects the mRNAs of cyclins D1 and D3 from GW182/AGO2–dependent translational repression) … p.6024

Cardiovascular Diseases and Conditions - Aneurysm. Reports from University of Pennsylvania Provide New Insights into Aneurysm (At the Root of the Repair Debate: Outcomes After Elective Aortic Root Replacements for Aortic Insufficiency With Aneurysm) … p.6025

Pharmacology. Reports from University of Picardie Highlight Recent Findings in Pharmacology (Recent Advances in Oncogenic Roles of the TRPM7 Chanzyme) … p.6026

Catecholamines. Reports from University of Pittsburgh Provide New Insights into Catecholamines (Antiferroptotic activity of non–oxidative dopamine) … p.6027

Antithrombotics. Reports from University of Queensland Describe Recent Advances in Antithrombotics (The role of cGMP and its signaling pathways in kidney disease) … p.6028

Cardiovascular Diseases and Conditions - Hypertension. Reports from University of Reading Add New Data to Findings in Hypertension (Whey protein lowers blood pressure and improves endothelial function and lipid biomarkers in adults with prehypertension and mild hypertension: results from the …) … p.6029
Oncology - Liver Cancer. Reports from University of Sherbrooke Advance Knowledge in Liver Cancer [An Unbiased Mass Spectrometry Approach Identifies Glypican–3 as an Interactor of Proprotein Convertase Subtilisin/Kexin Type 9 (PCSK9) and Low Density Lipoprotein Receptor ...] … p.6030

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports from University of Shizuoka Describe Recent Advances in Type 2 Diabetes (Lead discovery for mammalian elongation of long chain fatty acids family 6 using a combination of high–throughput fluorescent–based assay and RapidFire mass ...) … p.6031

Autoimmune Diseases and Conditions - Experimental Autoimmune Encephalomyelitis. Reports from University of Strathclyde Provide New Insights into Experimental Autoimmune Encephalomyelitis (MAP kinase phosphatase 2 deficient mice develop attenuated experimental autoimmune encephalomyelitis through regulating dendritic cells ...) … p.6033

Liver Diseases and Conditions - Hepatitis B Virus. Reports from University of Tehran Advance Knowledge in Hepatitis B Virus (HBsAg mutations related to occult hepatitis B virus infection in HIV–positive patients result in a reduced secretion and conformational changes of HBsAg) … p.6035

Oncology - Acute Lymphoblastic Leukemia. Reports from University of Texas Add New Data to Findings in Acute Lymphoblastic Leukemia (Adult Acute Lymphoblastic Leukemia) … p.6036

Drugs and Therapies - Pharmaceutical Research. Reports from University of Texas Advance Knowledge in Pharmaceutical Research (Influence of process parameters on the preparation of pharmaceutical films by electrostatic powder deposition) … p.6037

Drugs and Therapies - Immunosuppressive Agents. Reports from University of Texas Advance Knowledge in Immunosuppressive Agents (Stability of tacrolimus injection diluted in 0.9% sodium chloride injection and stored in Excel bags) … p.6038

Drugs and Therapies - Pharmacology and Experimental Therapeutics. Reports from University of Texas Advance Knowledge in Pharmacology and Experimental Therapeutics (Discriminative Stimulus Effects of Binary Drug Mixtures: Studies with Cocaine, MDPV, and Caffeine) … p.6039

Cardiovascular Diseases. Reports from University of Texas Southwestern Highlight Recent Findings in Cardiovascular Diseases [A Test in Context Hemoglobin A(1c) and Cardiovascular Disease] … p.6040

Immunology - Mononuclear Phagocyte System. Reports from University of Tokyo Advance Knowledge in Mononuclear Phagocyte System (Pim–1L Protects Cell Surface–Resident ABCA1 From Lysosomal Degradation in Hepatocytes and Thereby Regulates Plasma High–Density Lipoprotein Level) … p.6041

DNA Research. Reports from University of Toronto Describe Recent Advances in DNA Research (Controlling DNA–nanoparticle serum interactions) … p.6042
Heart Disorders and Diseases - Heart Attack. Reports from University of Toronto Provide New Insights into Heart Attack (Association of Pre–hospital ECG Administration With Clinical Outcomes in ST–Segment Myocardial Infarction: A Systematic Review and Meta–analysis) ... p.6043

Nanotechnology - Nanoparticles. Reports from University of Turin Highlight Recent Findings in Nanoparticles (Enhanced selective sonosensitizing efficacy of ultrasound–based anticancer treatment by targeted gold nanoparticles) ... p.6044

Drugs and Therapies - Pharmacoepidemiology. Reports from University of Utrecht Highlight Recent Findings in Pharmacoepidemiology (The effect of exposure misclassification in spontaneous ADR reports on the time to detection of product–specific risks for biologicals: a simulation study) ... p.6045

Oncology - Prostate Cancer. Reports from University of Verona Describe Recent Advances in Prostate Cancer (p16 Expression in Prostate Cancer and Nonmalignant Lesions: Novel Findings and Review of the Literature) ... p.6046

Heart Disorders and Diseases - Heart Failure. Reports from University of Washington Provide New Insights into Heart Failure (Different components of blood pressure are associated with increased risk of atherosclerotic cardiovascular disease versus heart failure in advanced chronic kidney ...) ... p.6047

Transplant Medicine - Liver Transplants. Reports from University of the Basque Country Advance Knowledge in Liver Transplts (Octogenarian Donors in Liver Transplantation) ... p.6048

Glycoconjugates. Reports from Uppsala University Advance Knowledge in Glycoconjugates (Kinetic Models for Measuring P–glycoprotein Function at the Blood–Brain Barrier with Positron Emission Tomography) ... p.6049

Cardiovascular Diseases and Conditions - Thrombosis. Reports from Vancouver General Hospital Advance Knowledge in Thrombosis (Test Characteristics Of Emergency Physician–performed Limited Compression Ultrasound For Lower–extremity Deep Vein Thrombosis) ... p.6050

Oncology - Multiple Myeloma. Reports from Vanderbilt University School of Medicine Add New Data to Findings in Multiple Myeloma (Evolving paradigms in the treatment of relapsed/refractory multiple myeloma: increased options and increased complexity) ... p.6051

Surgery - Embolectomy. Reports from W.B. Keeling and Co–Researchers Add New Data to Findings in Embolectomy (Outcomes After Surgical Pulmonary Embolectomy for Acute Pulmonary Embolus: A Multi–Institutional Study) ... p.6052

Oncology - Small Cell Lung Cancer. Reports from Weill Cornell Medical College Describe Recent Advances in Small Cell Lung Cancer (Anatomical Segmentectomy and Wedge Resections Are Associated with Comparable Outcomes for Patients with Small cT1N0 Non–Small Cell Lung Cancer) ... p.6053

Animal Diseases and Conditions - Avian Influenza (Bird Flu). Reports from Wroclaw University of Technology Add New Data to Findings in Avian Influenza (Bird Flu) [Rapid detection of highly pathogenic A(H7N7) avian influenza virus genetic markers in heterogenic samples utilizing on–chip SSCP–CE method] ... p.6054
January 14, 2017

**Muscle Cells.** Reports from Xi'an Jiao Tong University Add New Data to Findings in Muscle Cells (Activation of AMPK alpha 2 inhibits airway smooth muscle cells proliferation) … p.6056

**Genetics.** Reports from Xuzhou Medical College Provide New Insights into Genetics (p53 coordinates DNA repair with nucleotide synthesis by suppressing PFKFB3 expression and promoting the pentose phosphate pathway) … p.6056

**Oncology - Endometrial Cancer.** Reports from Y.L. Wan et al Highlight Recent Findings in Endometrial Cancer (Working together to shape the endometrial cancer research agenda: The top ten unanswered research questions) … p.6057

**Cardiology.** Reports from Yildirim Beyazit University Add New Data to Findings in Cardiology (Autonomic Cardiac Activity in Patients with Smoking and Alcohol Addiction by Heart Rate Variability Analysis) … p.6059

**Cardiovascular Research.** Reports from Yonsei University Advance Knowledge in Cardiovascular Research (Low Dentin Matrix Protein 1 Is Associated With Incident Cardiovascular Events in Peritoneal Dialysis Patients) … p.6060

**Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia.** Reports from Zagazig University Advance Knowledge in Iron–Deficiency Anemia (Impact of iron deficiency anemia on the function of the immune system in children) … p.6061

**Cardiovascular Diseases and Conditions - Thrombosis.** Reports from Zagazig University Highlight Recent Findings in Thrombosis (Cu–blood flow model through a catheterized mild stenotic artery with a thrombosis) … p.6062

**Oncology - Gliomas.** Reports from Zhengzhou University Describe Recent Advances in Gliomas (Lentivirus–mediated silencing of HSDL2 suppresses cell proliferation in human gliomas) … p.6063

**Heart Disorders and Diseases - Acute Coronary Syndrome.** Reports on Acute Coronary Syndrome Findings from Department of Public Health Provide New Insights (Ventricular fibrillation waveform measures and the etiology of cardiac arrest) … p.6064

**Heart Disorders and Diseases - Acute Coronary Syndrome.** Reports on Acute Coronary Syndrome from Medical University Provide New Insights (Endothelial lipase plasma levels are increased in both sexes in stable coronary artery disease and only in women with acute coronary syndrome but not associated ...) … p.6065

**Eye Diseases and Conditions - Age-Related Macular Degeneration.** Reports on Age–Related Macular Degeneration from University of Southampton Provide New Insights (A rare penetrant TIMP3 mutation confers relatively late onset choroidal neovascularisation which can mimic age–related macular degeneration) … p.6066

**Pregnancy Complications - Amniotic Fluid Embolism.** Reports on Amniotic Fluid Embolism from Baylor University College of Medicine Provide New Insights (Amniotic Fluid Embolism) … p.6067

**Drugs and Therapies - Antibiotics.** Reports on Antibiotics Findings from Sichuan Normal University Provide New Insights (Staurosporine as an agonist for induction of GLUT4 translocation, identified by a pH–sensitive fluorescent IRAP–mOrange2 probe) … p.6068
Drugs and Therapies - Antibiotics. Reports on Antibiotics from University of Toyama Provide New Insights (Antibiotic Therapy Increases the Risk of Preterm Birth in Preterm Labor without Intra–Amniotic Microbes, but may Prolong the Gestation Period in Preterm Labor with Microbes, ...) … p.6069

Immunology - Antigens. Reports on Antigens from Johns Hopkins University Provide New Insights (Systematic autoantigen analysis identifies a distinct subtype of scleroderma with coincident cancer) … p.6070

Drugs and Therapies - Antineoplastics. Reports on Antineoplastics from Central Hospital Provide New Insights (A Simple High–Performance Liquid Chromatography for Determining Lapatinib and Erlotinib in Human Plasma) … p.6071

Antioxidants. Reports on Antioxidants Findings from Daegu Haany University Provide New Insights (Isoliquiritigenin in licorice functions as a hepatic protectant by induction of antioxidant genes through extracellular signal–regulated kinase–mediated ...) … p.6072

Drugs and Therapies - Antiretrovirals. Reports on Antiretrovirals from Purdue University Provide New Insights (Nanoscale Infrared, Thermal, and Mechanical Characterization of Telaprevir–Polymer Miscibility in Amorphous Solid Dispersions Prepared by Solvent Evaporation) … p.6073

Apoptosis. Reports on Apoptosis Findings from Sabanci University Provide New Insights (AMP–Activated Protein Kinase Couples 3–Bromopyruvate–Induced Energy Depletion to Apoptosis via Activation of FoxO3a and Upregulation of Proapoptotic Bcl–2 Proteins) … p.6074

Lung Diseases and Conditions - Asthma. Reports on Asthma from University of California Provide New Insights (GSDMB induces an asthma phenotype characterized by increased airway responsiveness and remodeling without lung inflammation) … p.6075

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports on Atherosclerosis Findings from Southern Medical University Provide New Insights (Identification of novel genes and pathways in carotid atheroma using integrated bioinformatic methods) … p.6076

Cardiovascular Diseases and Conditions - Atherosclerosis. Reports on Atherosclerosis Findings from University of Washington Provide New Insights (Cutting Edge: BAFF Overexpression Reduces Atherosclerosis via TACI–Dependent B Cell Activation) … p.6077

Heart Disorders and Diseases - Atrial Fibrillation. Reports on Atrial Fibrillation from Tokyo Medical and Dental University Provide New Insights (The impact of B–type natriuretic peptide levels on the suppression of accompanying atrial fibrillation in Wolff–Parkinson–White syndrome patients ...) … p.6078

Urogenital Diseases and Conditions - Azoospermia. Reports on Azoospermia Findings from Al–Azhar University Provide New Insights (Oestrogen receptors beta genotype in infertile Egyptian men with nonobstructive azoospermia) … p.6079

Cell Research - Blood Cells. Reports on Blood Cells from Beijing University of Chemical Technology Provide New Insights (Fatty acid profiling of blood cell membranes by gas chromatography with mass spectrometry) … p.6080
January 14, 2017

Blood Pressure. Reports on Blood Pressure Findings from University College Cork Provide New Insights (Correlation between short–term blood pressure variability and left–ventricular mass index: a meta–analysis) ... p.6081

Bone Research. Reports on Bone Research Findings from Nagasaki University Provide New Insights (Overexpression of BCLXL in Osteoblasts Inhibits Osteoblast Apoptosis and Increases Bone Volume and Strength) ... p.6082

Oncology - Breast Cancer. Reports on Breast Cancer Findings from Guangdong University of Technology Provide New Insights (Moment Stability For Nonlinear Stochastic Growth Kinetics Of Breast Cancer Stem Cells With Time–delays) ... p.6083

Oncology - Breast Cancer. Reports on Breast Cancer Findings from United BioSource Corporation Provide New Insights (A time and motion study of subcutaneous versus intravenous trastuzumab in patients with HER2–positive early breast cancer) ... p.6084

Oncology - Cancer Risk. Reports on Cancer Risk Findings from University of Turin Provide New Insights (Skin phenotypes can offer some insight about the association between telomere length and cancer susceptibility) ... p.6085

Enzymes and Coenzymes - Carboxy-Lyases. Reports on Carboxy–Lyases Findings from Jichi Medical University Provide New Insights (A female case of aromatic L–amino acid decarboxylase deficiency responsive to MAO–B inhibition) ... p.6086

Carcinomas. Reports on Carcinomas Findings from Department of Surgery Provide New Insights (Systemic treatment of patients with metachronous peritoneal carcinomatosis of colorectal origin) ... p.6087

www.NewsRx.com

Cardiology. Reports on Cardiology Findings from University of Helsinki Provide New Insights (Simvastatin Treatment Upregulates Anti–Fibrotic Bone Morphogenetic Protein–7 Expression at Rat Cardiac Allograft Rejection) ... p.6088

Cardiology. Reports on Cardiology from University of Bergen Provide New Insights (Natriuretic peptide levels taken following unplanned admission to a cardiology department predict the duration of hospitalization) ... p.6089

Cardiovascular Research. Reports on Cardiovascular Research Findings from National Institutes of Health Provide New Insights [Pharmacological mechanisms underlying the cardiovascular effects of the "bath salt" constituent 3,4–methylenedioxyxypyrvalerone (MDPV)] ... p.6090

Cardiovascular Research. Reports on Cardiovascular Research Findings from University of Florida Provide New Insights (Angiotensin type 1a receptors in the paraventricular nucleus of the hypothalamus control cardiovascular reactivity and anxiety–like behavior in male ...) ... p.6091

Cardiovascular Research. Reports on Cardiovascular Research Findings from University of Geneva Provide New Insights (Wanting and liking in dysphoria: Cardiovascular and facial EMG responses during incentive processing) ... p.6092

Science - Cell Science. Reports on Cell Science Findings from Nanyang Technological University Provide New Insights (A ternary complex comprising transportin1, Rab8 and the ciliary targeting signal directs proteins to ciliary membranes) ... p.6093
Transplant Medicine - Cell Transplants.
Reports on Cell Transplants from Mossakowski Medical Research Center Provide New Insights (Induction of Endothelial Phenotype From Wharton’s Jelly–Derived MSCs and Comparison of Their Vasoprotective and Neuroprotective Potential With Primary ...) … p.6094

Membrane Proteins - Cholinergic Receptors. Reports on Cholinergic Receptors from University of Shizuoka Provide New Insights (Urinary Excretion Contributes to Long–Lasting Blockade of Bladder Muscarinic Receptors by Imidafenacin: Effect of Bilateral Ureteral Ligation) … p.6095

Clinical Research - Clinical Trials and Studies. Reports on Clinical Trials and Studies Findings from Genentech, Inc. Provide New Insights (Two Phase 1, Randomized, Double–Blind, Placebo–Controlled, Single–Ascending–Dose Studies To Investigate the Safety, Tolerability, and Pharmacokinetics of ...) … p.6096

Oncology - Colon Cancer. Reports on Colon Cancer Findings from Tokyo Medical and Dental University Provide New Insights (Overexpression of the S100A2 protein as a prognostic marker for patients with stage II and III colorectal cancer) … p.6097

Oncology - Colon Cancer. Reports on Colon Cancer from Kyushu University Provide New Insights (High expression of the Notch ligand Jagged–1 is associated with poor prognosis after surgery for colorectal cancer) … p.6098

Connective Tissue Cells. Reports on Connective Tissue Cells Findings from Yale University Provide New Insights (Skin Adipocyte Stem Cell Self–Renewal Is Regulated by a PDGFA/AKT–Signaling Axis) … p.6099

Contraception. Reports on Contraception Findings from University of Ottawa Provide New Insights (Assessing abortion coverage in nurse practitioner programs in Canada: a national survey of program directors) … p.6100

Herpesvirus Diseases and Conditions - Cytomegalovirus. Reports on Cytomegalovirus Findings from National Research Center Provide New Insights (Recombinant MHC tetramers for isolation of virus–specific CD8(+) cells from healthy donors: Potential approach for cell therapy of posttransplant ...) … p.6101

Musculoskeletal Diseases and Conditions - Dermatomyositis. Reports on Dermatomyositis Findings from University of Suleyman Demirel Provide New Insights (A case of Amyopathic Dermatomyositis associated with Interstitial Pulmonary Disease) … p.6102

Diabetes. Reports on Diabetes Findings from University of Porto Provide New Insights (The role of prenatal exposures on body fat patterns at 7 years: Intrauterine programming or birthweight effects?) … p.6103

Dimethylamines. Reports on Dimethylamines Findings from University of Oxford Provide New Insights (Single fixed–dose oral dexketoprofen plus tramadol for acute postoperative pain in adults) … p.6104

Drugs and Therapies - Drug Delivery Systems. Reports on Drug Delivery Systems Findings from Tezpur University Provide New Insights (Effect of crosslinker on drug delivery properties of curcumin loaded starch coated iron oxide nanoparticles) … p.6106

Emphysema. Reports on Emphysema from Central Hospital Provide New Insights (The impact of emphysema on dosimetric parameters for stereotactic body radiotherapy of the lung) … p.6107

Epidemiology. Reports on Epidemiology from Erasmus MC University Medical Center Provide New Insights (Epidemiological trends among the population with chronic HCV infection in the Netherlands) … p.6108

Central Nervous System Diseases and Conditions - Epilepsy. Reports on Epilepsy Findings from College of Pharmaceutical Sciences Provide New Insights (Effects of UGT1A6 and GABRA1 on Standardized Valproic Acid Plasma Concentrations and Treatment Effect in Children With Epilepsy in China) … p.6109

Central Nervous System Diseases and Conditions - Epilepsy. Reports on Epilepsy Findings from Wenzhou Medical University Provide New Insights (Risk of seizure relapse after antiepileptic drug withdrawal in adult patients with focal epilepsy) … p.6110

Oncology - Epithelial Ovarian Cancer. Reports on Epithelial Ovarian Cancer Findings from University Medical Center Provide New Insights (E-Cadherin fragments as potential mediators for peritoneal metastasis in advanced epithelial ovarian cancer) … p.6112

Enzymes and Coenzymes - Exopeptidases. Reports on Exopeptidases from National Human Genome Research Institute Provide New Insights [A single endoplasmic reticulum aminopeptidase–1 protein allotype is a strong risk factor for Behcet's disease in HLA–B(star)51 carriers] … p.6113

Digestive System Diseases and Conditions - Gastrointestinal Bleeding. Reports on Gastrointestinal Bleeding from University Hospital Provide New Insights (Spontaneous retroperitoneal hematoma in a patient under anticoagulant agents presenting as upper gastrointestinal bleeding) … p.6115

Genetics. Reports on Genetics from Northwestern University Feinberg School of Medicine Provide New Insights (Role of miR–182 in response to oxidative stress in the cell fate of human fallopian tube epithelial cells) … p.6116

Biotechnology - Genomics. Reports on Genomics Findings from Fred Hutchinson Cancer Research Center Provide New Insights (Translational plasticity facilitates the accumulation of nonsense genetic variants in the human population) … p.6117

Aging Research - Geriatrics and Gerontology. Reports on Geriatrics and Gerontology Findings from University of California Provide New Insights (Detained and Distressed: Persistent Distressing Symptoms in a Population of Older Jail Inmates) … p.6118

Oncology - Gliomas. Reports on Gliomas Findings from People's Hospital Provide New Insights (B–cell CLL/lymphoma 3 promotes glioma cell proliferation and inhibits apoptosis through the oncogenic STAT3 pathway) … p.6119
January 14, 2017

Oncology - Gliomas. Reports on Gliomas from Methodist Hospital Provide New Insights (Monoamine oxidase B levels are highly expressed in human gliomas and are correlated with the expression of HIF–1α and with transcription factors Sp1 and Sp3) … p.6120

Immune System Diseases and Conditions - HIV/AIDS. Reports on HIV/AIDS Findings from University of Milan Provide New Insights (T–cell phenotype and function following a first cART regimen containing either a protease inhibitor or a non–nucleoside reverse transcriptase inhibitor in HIV–infected ...) … p.6121

Oncology - Head and Neck Cancer. Reports on Head and Neck Cancer Findings from University Medical Center Provide New Insights (Effect of sorafenib on cisplatin–based chemoradiation in head and neck cancer cells) … p.6122

Hearing Diseases and Conditions - Hearing Loss. Reports on Hearing Loss from University of Helsinki Central Hospital Provide New Insights (Spondyloocular Syndrome: Novel Mutations in XYL2 Gene and Expansion of the Phenotypic Spectrum) … p.6123

Heart Disorders and Diseases - Heart Disease. Reports on Heart Disease from Emory University Provide New Insights (Circulating progenitor cells and coronary microvascular dysfunction: Results from the NHLBI–sponsored Women’s Ischemia Syndrome Evaluation – Coronary Vascular Dysfunction Study ...) … p.6124

Heart Disorders and Diseases - Heart Failure. Reports on Heart Failure Findings from Heart and Vascular Institute Provide New Insights (Biomarkers: Their potential in the diagnosis and treatment of heart failure) … p.6125

www.NewsRx.com

Drugs and Therapies - Hematologic Agents. Reports on Hematologic Agents from University of Debrecen Provide New Insights (A Modular Synthetic Approach to Isosteric Sulfonic Acid Analogues of the Anticoagulant Pentasaccharide Idraparinux) … p.6126

Liver Diseases and Conditions - Hepatitis C Virus. Reports on Hepatitis C Virus from University of Alberta Provide New Insights (Prevention of hepatitis C virus infection using a broad cross–neutralizing monoclonal antibody (AR4A) and epigallocatechin gallate] … p.6126

Hepatocytes. Reports on Hepatocytes from Amway Corp. Provide New Insights (Magnolia officinalis (Hou Po) bark extract stimulates the Nrf2–pathway in hepatocytes and protects against oxidative stress] … p.6127

Hybridomas. Reports on Hybridomas from University of Massachusetts Provide New Insights (Effect of amino acid supplementation on titer and glycosylation distribution in hybridoma cell culturesSystems biology–based interpretation using genome–scale ...) … p.6128

Immunology - Immunoglobulins. Reports on Immunoglobulins Findings from University of Sydney Provide New Insights (Aptamers: A promising chemical antibody for cancer therapy) … p.6129

Lung Diseases and Conditions - Interstitial Lung Disease. Reports on Interstitial Lung Disease from University of Lille Provide New Insights (Cardiorespiratory Response to Different Exercise Tests in Interstitial Lung Disease) … p.6130

Surgery - Intraoperative Care. Reports on Intraoperative Care Findings from M.A. Terekhov and Co–Researchers Provide New Insights (Intraoperative Care Transitions Are Not Associated with Postoperative Adverse Outcomes) … p.6131
Membrane Proteins - Ion Channels.
Reports on Ion Channels Findings from L. Lara–Valderrabano and Co–Researchers Provide New Insights
(Propylparaben reduces the excitability of hippocampal neurons by blocking sodium channels) ... p.6132

Ischemia. Reports on Ischemia Findings from Heart Institute Provide New Insights
(Subacute limb ischemia induces skeletal muscle injury in genetically susceptible mice independent of vascular density) ... p.6133

Oncology - Liver Cancer. Reports on Liver Cancer from Nantong University Provide New Insights (Modification of p27 with O–linked N–acetylglucosamine regulates cell proliferation in hepatocellular carcinoma) ... p.6134

Oncology - Lung Cancer. Reports on Lung Cancer from Zhejiang University Provide New Insights [Costunolide induces lung adenocarcinoma cell line A549 cells apoptosis through ROS (reactive oxygen species)–mediated endoplasmic reticulum stress] ... p.6135

Oncology - Melanoma. Reports on Melanoma Findings from Thomas Jefferson University Provide New Insights (Conjunctival Tumors in 5002 Cases. Comparative Analysis of Benign Versus Malignant Counterparts. The 2016 James D. Allen Lecture) ... p.6136

Biological Factors - Metalloporphyrins. Reports on Metalloporphyrins Findings from University of Illinois Provide New Insights (Nrf2–AKT interactions regulate heme oxygenase 1 expression in kidney epithelia during hypoxia and hypoxia–reoxygenation) ... p.6137

Mononuclear Leukocytes. Reports on Mononuclear Leukocytes Findings from Juntendo University Provide New Insights (Pathology of healing: what else might we look at?) ... p.6138

Kidney Diseases and Conditions - Multicystic Dysplastic Kidney. Reports on Multicystic Dysplastic Kidney Findings from Guangzhou Medical University Provide New Insights (Prenatal diagnosis of fetal multicystic dysplastic kidney via high–resolution whole–genome array) ... p.6139

Nephrology. Reports on Nephrology Findings from University Hospital Provide New Insights (Therapeutic nuclear shuttling of YB–1 reduces renal damage and fibrosis) ... p.6140

Neuroscience - Neurochemistry. Reports on Neurochemistry Findings from Technical University Provide New Insights (Chronic consumption of Annona muricata juice triggers and aggravates cerebral tau phosphorylation in wild–type and MAPT transgenic mice) ... p.6141

Leukocyte Diseases and Conditions - Neutropenia. Reports on Neutropenia from Erasmus University Provide New Insights (Role of genetic variation in docetaxel–induced neutropenia and pharmacokinetics) ... p.6143

Oncology - Non–Small Cell Lung Cancer. Reports on Non–Small Cell Lung Cancer Findings from Wake Forest Baptist Medical Center Provide New Insights (Recurrence and Survival After Segmentectomy in Patients With Prior Lung Resection for Early–Stage Non–Small Cell Lung Cancer) ... p.6144

Oncology - Non–Small Cell Lung Cancer. Reports on Non–Small Cell Lung Cancer from Hebei Medical University Provide New Insights (Detection of cancer specific mutations in early–stage non–small cell lung cancer using cell–free DNA by targeted sequencing) ... p.6145
Drugs and Therapies - Orlistat Therapy. Reports on Orlistat Therapy from University of Nebraska Medical Center Provide New Insights (Development of a Self–Assembled Nanoparticle Formulation of Orlistat, Nano–ORL, with Increased Cytotoxicity against Human Tumor Cell Lines) … p.6146

Muscloskeletal Diseases and Conditions - Osteoarthritis. Reports on Osteoarthritis Findings from University of Bristol Provide New Insights (Differential effects of altered patterns of movement and strain on joint cell behaviour and skeletal morphogenesis) … p.6147

Health and Medicine - Palliative and Supportive Care. Reports on Palliative and Supportive Care Findings from J. Lambden and Co–Researchers Provide New Insights (Accuracy of Oncologists’ Life–Expectancy Estimates Recalled by Their Advanced Cancer Patients: Correlates and Outcomes) … p.6148

Oncology - Pancreatic Cancer. Reports on Pancreatic Cancer Findings from M.D. Anderson Cancer Center Provide New Insights (Benefit and risk of primary thromboprophylaxis in ambulatory patients with advanced pancreatic cancer receiving chemotherapy: a systematic review and ...) … p.6149

Peptides and Proteins. Reports on Peptides and Proteins Findings from State University of New York Provide New Insights (The DNA Damage Transducer RNF8 Facilitates Cancer Chemoresistance and Progression through Twist Activation) … p.6150

Peptides and Proteins. Reports on Peptides and Proteins from University of Kent Provide New Insights (Efficient targeting of recombinant proteins to the thylakoid lumen in Chlamydomonas reinhardtii using a bacterial Tat signal peptide) … p.6151

Periodontal Diseases and Conditions - Periodontitis. Reports on Periodontitis Findings from Okayama University Provide New Insights (Visualization of Oxidative Stress Induced by Experimental Periodontitis in Keap1–Dependent Oxidative Stress Detector–Luciferase Mice) … p.6152

Proteins - Peroxisome Proliferator–Activated Receptors. Reports on Peroxisome Proliferator–Activated Receptors Findings from Harvard School of Medicine Provide New Insights (Molecular Pathways: Dietary Regulation of Stemness and Tumor Initiation by the PPAR–delta Pathway) … p.6153

Pharmacokinetics. Reports on Pharmacokinetics Findings from Central University Provide New Insights (Promises of a biocompatible nanocarrier in improved brain delivery of quercetin: Biochemical, pharmacokinetic and biodistribution evidences) … p.6154

Pharmacokinetics. Reports on Pharmacokinetics from Center for Disease Control and Prevention Provide New Insights (Co–administration of St. John’s wort and hormonal contraceptives: a systematic review) … p.6156

Pharmacology. Reports on Pharmacology from Jagiellonian University Provide New Insights (The unethical use of ethical rhetoric: the case of flibanserin and pharmacologisation of female sexual desire) … p.6157
Life Science Research - Physiology.
Reports on Physiology from University of Melbourne Provide New Insights
(Programming of maternal and offspring disease: impact of growth restriction, fetal sex and transmission across generations) ... p.6158

Platinum Compounds. Reports on Platinum Compounds from All India Institute of Medical Sciences Provide New Insights
(Safety assessment and attenuation of cisplatin induced nephrotoxicity by tuberous roots of Boerhaavia diffusa) ... p.6159

Pneumococcal Disease. Reports on Pneumococcal Disease from University of Bern Provide New Insights
(Polysaccharide Capsule Composition of Pneumococcal Serotype 19A Subtypes Is Unaltered among Subtypes and Independent of the Nutritional Environment) ... p.6160

Hematologic Diseases and Conditions - Polycythemia. Reports on Polycythemia Findings from Tel Aviv University Provide New Insights
(Can middle cerebral artery peak systolic velocity predict polycythemia in monochorionic–diamniotic twins? Evidence from a prospective cohort study) ... p.6161

Oncology - Prostate Cancer. Reports on Prostate Cancer Findings from National Cancer Institute Provide New Insights
(ABO blood type correlates with survival on prostate cancer vaccine therapy) ... p.6162

Oncology - Prostate Cancer. Reports on Prostate Cancer Findings from University of Tehran Provide New Insights
(The comparison of 5–field conformal radiotherapy techniques for the treatment of prostate cancer: The best for femoral head sparing) ... p.6163

www.NewsRx.com

Oncology - Prostate Cancer. Reports on Prostate Cancer from Huazhong University of Science and Technology Provide New Insights [miR–34C Disrupts the Stemness of Purified CD133(+) Prostatic Cancer Stem Cells] ... p.6164

Gram-Negative Bacteria - Pseudomonas aeruginosa. Reports on Pseudomonas aeruginosa Findings from Spanish National Research Council (CSIC) Provide New Insights (Purification and characterization of Pseudomonas aeruginosa LasR expressed in acyl–homoserine lactone free Escherichia coli cultures) ... p.6165

Gram-Negative Bacteria - Pseudomonas aeruginosa. Reports on Pseudomonas aeruginosa from University of Manitoba Provide New Insights (The role of the temperature–regulated acyltransferase (PA3242) on growth, antibiotic resistance and virulence in Pseudomonas aeruginosa) ... p.6166

Lung Diseases and Conditions - Pulmonary Fibrosis. Reports on Pulmonary Fibrosis Findings from China Pharmaceutical University Provide New Insights (Madecassoside ameliorates bleomycin–induced pulmonary fibrosis in mice through promoting the generation of hepatocyte growth factor via PPAR–g in ...) ... p.6167

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Reports on Rheumatoid Arthritis from Mayo Clinic Provide New Insights (Suppression of Inflammatory Arthritis by Human Gut–Derived Prevotella histicola in Humanized Mice) ... p.6168

Parasitic Diseases and Conditions - Schistosomiasis. Reports on Schistosomiasis from Marshall University Provide New Insights (Discovery of Antischistosomal Drug Leads Based on Tetraazamacrocyclic Derivatives and Their Metal Complexes) ... p.6169
Science. Reports on Science from Zuse Institute Berlin Provide New Insights (Acfs: accurate circRNA identification and quantification from RNA–Seq data) … p.6170

Heart Disorders and Diseases - Sinus Arrhythmia. Reports on Sinus Arrhythmia Findings from A.L. Shim and Co–Researchers Provide New Insights (Serum interleukin–6: Association with circulating cytokine serum levels in patients with sinus arrhythmia and patients with coronary artery disease) … p.6172

Central Nervous System Diseases and Conditions - Spinal Cord Compression. Reports on Spinal Cord Compression from Academy of Military Medical Sciences Provide New Insights (A validated preoperative score predicting survival and functional outcome in lung cancer patients operated with posterior decompression and ...) … p.6174

Oncology - Squamous Cell Carcinoma. Reports on Squamous Cell Carcinoma from Kyoto Pharmaceutical University Provide New Insights (Effects of bisphosphonates on human esophageal squamous cell carcinoma cell survival) … p.6175

Stainless Steel. Reports on Stainless Steel Findings from Northeastern University Provide New Insights (Biological behaviour of human umbilical artery smooth muscle cell grown on nickel–free and nickel–containing stainless steel for stent implantation) … p.6176

www.NewsRx.com

Gram-Positive Bacteria - Staphylococcus aureus. Reports on Staphylococcus aureus from Gifu University Provide New Insights (Development of a rapid diagnostic method for identification of Staphylococcus aureus and antimicrobial resistance in positive blood culture bottles using a ...) … p.6178

Stem Cell Research - Stem Cell Factors. Reports on Stem Cell Factors from Ahvaz Jundishapur University Provide New Insights (Role of stem cell factor in the placental niche) … p.6179

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Reports on Subarachnoid Hemorrhage from University of Heidelberg Provide New Insights (Use of GABAergic sedatives after subarachnoid hemorrhage is associated with worse outcome–preliminary findings) … p.6180

Sulfides. Reports on Sulfides Findings from Research Hospital Provide New Insights (Plasma thiols and thiol–disulfide homeostasis in patients with isolated coronary artery ectasia) … p.6181

Systemic Lupus Erythematosus. Reports on Systemic Lupus Erythematosus from Aarhus University Provide New Insights (Follicular T helper cells and IL–21 in Rheumatic Diseases) … p.6182

Biomedical Engineering - Tissue Engineering. Reports on Tissue Engineering Findings from University of Pecs Provide New Insights (Increased Wnt5a in squamous cell lung carcinoma inhibits endothelial cell motility) ... p.6184

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Reports on Type 2 Diabetes Findings from Uppsala University Provide New Insights (Mortality and cardiovascular disease outcomes among 740 patients with new–onset Type 2 diabetes detected by screening or clinically diagnosed in general practice) ... p.6185

Oncology - Verrucous Cancer. Reports on Verrucous Cancer from All India Institute of Medical Sciences Provide New Insights (Expression of Cell Cycle–associated Proteins p53, pRb, p16, p27, and Correlation With Survival: A Comparative Study on Oral Squamous Cell Carcinoma ...) ... p.6186

Cardiovascular Diseases and Conditions - Vertebral Artery Dissection. Reports on Vertebral Artery Dissection Findings from Jena University Hospital Provide New Insights (Clinical Presentation, Magnetic Resonance Angiography, Ultrasound Findings, and Stroke Patterns in Patients with Vertebral Artery Dissection) ... p.6188

Enzymes and Coenzymes - Oxidoreductases. Research Conducted at Asahikawa Medical University Has Provided New Information about Oxidoreductases (P450 oxidoreductase deficiency with maternal virilization during pregnancy) ... p.6189

Oncology - Cancer Care. Research Conducted at Azienda Ospedaliera University Has Provided New Information about Cancer Care (Impact of a supportive care service for cancer outpatients: management and reduction of hospitalizations. Preliminary results of an integrated ...) ... p.6189

Transplant Medicine - Kidney Transplants. Research Conducted at Barts Health NHS Trust Has Updated Our Knowledge about Kidney Transplants (The characteristics and outcome of bacteraemia in renal transplant recipients and non–transplant renal patients) ... p.6190

Drugs and Therapies - Androgens. Research Conducted at Beth Israel Deaconess Medical Center and Harvard University School of Medicine Has Updated Our Knowledge about Androgens (Protein phosphatase 1 suppresses androgen receptor ubiquitylation and degradation) ... p.6192

Drugs and Therapies - Drug Delivery Systems. Research Conducted at Boston University Has Provided New Information about Drug Delivery Systems (Microvessels–on–a–Chip to Assess Targeted Ultrasound–Assisted Drug Delivery) ... p.6193

Atrial Fibrillation. Research Conducted at Broad Institute of MIT and Harvard Has Updated Our Knowledge about Atrial Fibrillation (A Functional Variant Associated with Atrial Fibrillation Regulates PITX2c Expression through TFAP2a) ... p.6194

Pheochromocytomas. Research Conducted at CIBERER Has Provided New Information about Pheochromocytomas (ATRX driver mutation in a composite malignant pheochromocytoma) ... p.6195

Diseases and Conditions - Russell Silver Syndrome. Research Conducted at California State University Has Updated Our Knowledge about Russell Silver Syndrome (Twin Legacies: Victor and Vincent McKusick/Twin Studies: Twinning Rates I; Twinning Rates II; MZ Twin Discordance for Russell–Silver ...) ... p.6196
Nanotechnology - Nanomedicine. Research Conducted at Catholic University of Louvain Has Provided New Information about Nanomedicine (To exploit the tumor microenvironment: Since the EPR effect fails in the clinic, what is the future of nanomedicine?) … p.6197

Congenital Diseases and Conditions - Congenital Heart Disease. Research Conducted at Central South University Has Provided New Information about Congenital Heart Disease (Reduced fetal brain fissures depth in fetuses with congenital heart diseases) … p.6198

Cardiovascular Diseases and Conditions - Phlebitis. Research Conducted at Central South University Has Provided New Information about Phlebitis (Peripheral intravenous catheters in situ for more than 96h in adults: What factors affect removal?) … p.6199

Pregnancy Complications - Hydrops Fetalis. Research Conducted at Chiang Mai University Has Updated Our Knowledge about Hydrops Fetalis [Ventricular Diastolic Function in Normal Fetuses and Fetuses with Hb Bart’s Disease Assessed by Color M–Mode Propagation Velocity using Cardio–STIC–M …] … p.6200

Oncology - Colon Cancer. Research Conducted at China Medical University and Hospital Has Provided New Information about Colon Cancer (Efficacy of Bevacizumab in the First–Line Treatment of Patients with RAS Mutations Metastatic Colorectal Cancer: a Systematic Review …) … p.6201

Oncology - Breast Cancer. Research Conducted at Chinese Academy of Medical Sciences Has Provided New Information about Breast Cancer (Functions of miR–146a and miR–222 in Tumor–associated Macrophages in Breast Cancer) … p.6202

Hearing Diseases and Conditions - Conductive Hearing Loss. Research Conducted at Chinese People’s Liberation Army General Hospital Has Updated Our Knowledge about Conductive Hearing Loss (SIX2 haploinsufficiency causes conductive hearing loss with ptosis in humans) … p.6203

Health and Medicine. Research Conducted at Dana–Farber Cancer Institute Has Updated Our Knowledge about Health and Medicine (Targeting EZH2 in cancer) … p.6204

Enzymes and Coenzymes - Tissue Plasminogen Activator. Research Conducted at Eastern Virginia School of Medicine Has Provided New Information about Tissue Plasminogen Activator (The Effect of Levonorgestrel on Fibrinolytic Factors in Human Endometrial Endothelial Cells) … p.6204

Physical Fitness. Research Conducted at Faculty of Physical Education Has Provided New Information about Physical Fitness (Biological Aging and Physical Fitness in Men Aged 20–70 Years from Krakow, Poland) … p.6206

Biological Factors - Autacoids. Research Conducted at Federal University Has Provided New Information about Autacoids (Cyclo–Gly–Pro, a cyclic dipeptide, attenuates nociceptive behaviour and inflammatory response in mice) … p.6206

January 14, 2017

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Research Conducted at Friedrich–Alexander–University Has Updated Our Knowledge about Inflammatory Bowel Disease (Molecular mechanism of action of anti–tumor necrosis factor antibodies in inflammatory bowel diseases) ... p.6209

Oncology - Ring Cell Cancer. Research Conducted at Fudan University Has Provided New Information about Ring Cell Cancer (Younger Age Is Associated with Poorer Survival in Patients with Signet–Ring Cell Carcinoma of the Colon without Distant Metastasis) ... p.6210

Oncology - Solid Cancer. Research Conducted at Genentech, Inc. Has Updated Our Knowledge about Solid Cancer (Safety of Onartuzumab in Patients with Solid Tumors: Experience to Date from the Onartuzumab Clinical Trial Program) ... p.6211

Peptides and Proteins. Research Conducted at Georg–August–University Has Updated Our Knowledge about Peptides and Proteins [The Oncogenic Fusion Proteins SET–Nup214 and Sequestosome–1 (SQSTM1)–Nup214 Form Dynamic Nuclear Bodies and Differentially Affect Nuclear ...] ... p.6212

Oncology - Breast Cancer. Research Conducted at German Institute of Human Nutrition Potsdam–Rehbrucke Has Provided New Information about Breast Cancer (Evaluating the Applicability of Data–Driven Dietary Patterns to Independent Samples with a Focus on Measurement Tools ...) ... p.6213

Diarylheptanoids. Research Conducted at Ghent University Has Updated Our Knowledge about Diarylheptanoids [Synthesis and biological assessment of novel N–(hydroxy/methoxy) alkyl beta–enaminone curcuminoids] ... p.6214

www.NewsRx.com

Intracellular Membranes. Research Conducted at Graduate School of Biomedical Sciences Has Updated Our Knowledge about Intracellular Membranes (The deadly landscape of pro–apoptotic BCL–2 proteins in the outer mitochondrial membrane) ... p.6215

Cardiovascular Diseases and Conditions - Thrombosis. Research Conducted at Guy's and St. Thomas' NHS Foundation Trust Has Provided New Information about Thrombosis (Sudden death of a patient with polycystic kidneys due to acute inferior vena cava thrombosis) ... p.6216

Drugs and Therapies - Antibiotics. Research Conducted at Hartford Hospital Has Updated Our Knowledge about Antibiotics (Continuous and Prolonged Intravenous beta–Lactam Dosing: Implications for the Clinical Laboratory) ... p.6217

Heart Disorders and Diseases - Heart Disease. Research Conducted at Heart Hospital Has Provided New Information about Heart Disease (The relationship between heart rate and mortality of patients with acute coronary syndromes in the coronary intervention era Meta–analysis) ... p.6218

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Research Conducted at Henry Ford Hospital Has Provided New Information about Type 2 Diabetes (White matter changes after stroke in type 2 diabetic rats measured by diffusion magnetic resonance imaging) ... p.6219

Oncology - Cancer Risk. Research Conducted at Instituto de Salud Carlos III Has Provided New Information about Cancer Risk (Association Between Western and Mediterranean Dietary Patterns and Mammographic Density) ... p.6220
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Research Conducted at International Islamic University Has Updated Our Knowledge about Type 2 Diabetes (Safety profiling of pioglitazone and telmisartan combination by sub–chronic toxicity study in rat) … p.6221

Lymphoproliferative Diseases and Conditions - Granuloma. Research Conducted at Johannes Gutenberg–University Has Provided New Information about Granuloma (DNA Damage Signaling Instructs Polyploid Macrophage Fate in Granulomas) … p.6222

Aortic Dissection. Research Conducted at Johns Hopkins University Has Updated Our Knowledge about Aortic Dissection (Diagnosis and treatment of uncomplicated type B aortic dissection) … p.6223

Clinical Research - Clinical Trials and Studies. Research Conducted at Johns Hopkins University School of Medicine Has Provided New Information about Clinical Trials and Studies (Recruitment techniques for alcohol pharmacotherapy clinical trials: A cost–benefit analysis) … p.6224

Oncology - Prostate Cancer. Research Conducted at Kaiser Permanente Has Provided New Information about Prostate Cancer (5–Alpha Reductase Inhibitors and the Risk of Prostate Cancer Mortality in Men Treated for Benign Prostatic Hyperplasia) … p.6225

Hematologic Diseases and Conditions - Fanconi Anemia. Research Conducted at King Saud University Has Updated Our Knowledge about Fanconi Anemia (Clinical characteristics and genetic subtypes of Fanconi anemia in Saudi patients) … p.6226

Neoplasms. Research Conducted at Korea University Guro Hospital Has Updated Our Knowledge about Neoplasms (Guidelines for the management of myeloproliferative neoplasms) … p.6227

Keratinocytes. Research Conducted at Kyung Hee University Has Provided New Information about Keratinocytes (Protection on Skin Aging Mediated by Antiapoptosis Effects of the Water Lily (Nymphaea Tetragona Georgi) via Reactive Oxygen Species Scavenging in Human …] … p.6228

Central Nervous System Diseases and Conditions - Cerebral Amyloid Angiopathy. Research Conducted at Leiden University Has Updated Our Knowledge about Cerebral Amyloid Angiopathy (Early Magnetic Resonance Imaging and Cognitive Markers of Hereditary Cerebral Amyloid Angiopathy) … p.6229

Drugs and Therapies - Central Nervous System Agents. Research Conducted at London Health Sciences Center Has Provided New Information about Central Nervous System Agents (Real–World, Long–Term Quality of Life Following Therapeutic OnabotulinumtoxinA Treatment) … p.6230

Oncology - Breast Cancer. Research Conducted at Ludwig–Maximilians–University Has Updated Our Knowledge about Breast Cancer (Metastatic mammary carcinoma despite histologically negative sentinel lymph nodes: are there any indicators for estimating recurrence and …) … p.6231

Subcellular Fractions. Research Conducted at Malaghan Institute of Medical Research Has Updated Our Knowledge about Subcellular Fractions (Horizontal transfer of mitochondria between mammalian cells: beyond co–culture approaches) … p.6232
Heart Disorders and Diseases - Atrial Fibrillation. Research Conducted at Northwestern University Feinberg School of Medicine Has Updated Our Knowledge about Atrial Fibrillation (Simulation of Daily Snapshot Rhythm Monitoring to Identify Atrial Fibrillation in Continuously Monitored Patients ...) ... p.6239

Mycobacterium Infections - Tuberculosis. Research Conducted at Norwegian Institute of Public Health Has Provided New Information about Tuberculosis (Armed conflict and population displacement as drivers of the evolution and dispersal of Mycobacterium tuberculosis) ... p.6240

Eye Diseases and Conditions - Retinitis Pigmentosa. Research Conducted at Oregon Health and Science University Has Provided New Information about Retinitis Pigmentosa (Structure–Function Modeling of Optical Coherence Tomography and Standard Automated Perimetry in the Retina of Patients with ...) ... p.6241

Life Science Research - Botany. Research Conducted at Osaka Prefecture University Has Provided New Information about Botany (Diversification of sterol methyltransferase enzymes in plants and a role for b–sitosterol in oriented cell plate formation and polarized growth) ... p.6242

Drugs and Therapies - Antiinfectives. Research Conducted at Pasteur Institute Has Provided New Information about Antiinfectives (Antileishmanial Mechanism of Diamidines Involves Targeting Kinetoplasts) ... p.6243

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Research Conducted at Pfizer Has Provided New Information about Type 2 Diabetes (Benefits and challenges of a QSP approach through case study: Evaluation of a hypothetical GLP–1/GIP dual agonist therapy) ... p.6244
January 14, 2017

Drugs and Therapies - Drug Resistance.
Research Conducted at Pusan National University Has Provided New Information about Drug Resistance (Autotaxin Regulates Maintenance of Ovarian Cancer Stem Cells through Lysophosphatidic Acid–Mediated Autocrine Mechanism) … p.6245

Kidney Diseases and Conditions - Gitelman Syndrome. Research Conducted at Radboud University Has Provided New Information about Gitelman Syndrome (Functionomics of NCC mutations in Gitelman syndrome using a novel mammalian cell–based activity assay) … p.6246

Radiology - Neuroradiology. Research Conducted at School of Medicine Has Provided New Information about Neuroradiology (Safety and efficacy of antiplatelet response assay and drug adjustment in coil embolization: a propensity score analysis) … p.6247

Cardiovascular Diseases and Conditions - Hypertension. Research Conducted at School of Medicine Has Updated Our Knowledge about Hypertension (An augmented CO2 chemoreflex and overactive orexin system are linked with hypertension in young and adult spontaneously hypertensive rats) … p.6248

Oncology - Breast Cancer. Research Conducted at Second Military Medical University Has Updated Our Knowledge about Breast Cancer (Long noncoding RNA linc00617 exhibits oncogenic activity in breast cancer) … p.6249

Drugs and Therapies - Chemotherapy. Research Conducted at Soochow University Has Provided New Information about Chemotherapy (Tie2 Expression on Macrophages Is Required for Blood Vessel Reconstruction and Tumor Relapse after Chemotherapy) … p.6250

www.NewsRx.com

Drugs and Therapies - Adenosine Therapy. Research Conducted at Soochow University Has Updated Our Knowledge about Adenosine Therapy (Ubiquitin–dependent Turnover of Adenosine Deaminase Acting on RNA 1 (ADAR1) Is Required for Efficient Antiviral Activity of Type I Interferon) … p.6251

Kidney Diseases and Conditions - Lupus Nephritis. Research Conducted at Sun Yat Sen University Has Updated Our Knowledge about Lupus Nephritis (Nuclear Factor Erythroid 2–related Factor 2 Deficiency Exacerbates Lupus Nephritis in B6/lpr mice by Regulating Th17 Cell Function) … p.6252

Drugs and Therapies - Antirheumatics. Research Conducted at Tel Aviv University Has Updated Our Knowledge about Antirheumatics (Addition of an immunomodulator can reverse antibody formation and loss of response in patients treated with adalimumab) … p.6253

Environmental Health - Environmental Research and Public Health. Research Conducted at Tsinghua University Has Provided New Information about Environmental Research and Public Health (DALY–Based Health Risk Assessment of Construction Noise in Beijing, China) … p.6254

Optic Nerve Diseases. Research Conducted at University College Has Provided New Information about Optic Nerve Diseases (A neurodegenerative perspective on mitochondrial optic neuropathies) … p.6255

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. Research Conducted at University Hospital Has Updated Our Knowledge about Hypertrophic Cardiomyopathy (Comparison of hypertrophic cardiomyopathy in Afro–Caribbean versus white patients in the UK) … p.6256
Coagulation. Research Conducted at University of Birmingham Has Provided New Information about Coagulation (Determinants of Time in Therapeutic Range in Patients Receiving Oral Anticoagulants: A Substudy of IMPACT) … p.6264

Drugs and Therapies - Antivirals. Research Conducted at University of Bologna Has Updated Our Knowledge about Antivirals (Plants Producing Ribosome-Inactivating Proteins in Traditional Medicine) … p.6265

Environmental Pollution. Research Conducted at University of Bourgogne Has Provided New Information about Environmental Pollution (Occurrence of pharmaceuticals in WWTP effluents and their impact in a karstic rural catchment of Eastern France) … p.6266

Kidney Diseases and Conditions - Chronic Kidney Disease. Research Conducted at University of California Has Updated Our Knowledge about Chronic Kidney Disease (Effects of dietary iron intake and chronic kidney disease on fibroblast growth factor 23 metabolism in wild-type and hepcidin knockout mice) … p.6267

DNA Research. Research Conducted at University of California Has Updated Our Knowledge about DNA Research (Structural basis for DNA recognition by STAT6) … p.6268

Mosquito-Borne Diseases - Malaria. Research Conducted at University of Delhi Has Provided New Information about Malaria (Stearylamine Liposomal Delivery of Monensin in Combination with Free Artemisinin Eliminates Blood Stages of Plasmodium falciparum in Culture and P. berghei …) … p.6269

Oncology - Gastric Cancer. Research Conducted at University of Dresden Has Provided New Information about Gastric Cancer (Free intraperitoneal tumor cells and outcome in gastric cancer patients: a systematic review and meta-analysis) … p.6271
Drugs and Therapies - Ethnopharmacology. Research Conducted at University of Faisalabad Has Updated Our Knowledge about Ethnopharmacology (Anti–cholinergic and Ca2+–antagonist mechanisms explain the pharmacological basis for folkloric use of Sisymbrium irio Linn. in gastrointestinal, ...) … p.6272

Gram-Positive Bacteria - Streptococcus pneumoniae. Research Conducted at University of Giessen Has Provided New Information about Streptococcus pneumoniae (Host–derived extracellular RNA promotes adhesion of Streptococcus pneumoniae to endothelial and epithelial cells) … p.6273

Smoking. Research Conducted at University of Hawaii Cancer Center Has Updated Our Knowledge about Smoking (Longitudinal study of e–cigarette use and onset of cigarette smoking among high school students in Hawaii) … p.6274

Oncology - Gynecologic Oncology. Research Conducted at University of Hawaii Has Provided New Information about Gynecologic Oncology (Long non–coding RNAs, ASAP1–IT1, FAM215A, and LINC00472, in epithelial ovarian cancer) … p.6275

Neutral Amino Acids. Research Conducted at University of Lyon Has Updated Our Knowledge about Neutral Amino Acids (A Eukaryotic–like Serine/Threonine Kinase Protects Staphylococci against Phages) … p.6276

Central Nervous System Diseases and Conditions - Brain Injuries. Research Conducted at University of Maryland School of Medicine Has Provided New Information about Brain Injuries (miR–711 upregulation induces neuronal cell death after traumatic brain injury) … p.6277

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. Research Conducted at University of Milan Has Provided New Information about Hypercholesterolemia (Drug treatment and adherence of subjects < 40 years with diagnosis of heterozygous familial hypercholesterolemia) … p.6278

Oncology - Melanoma. Research Conducted at University of Minho Has Updated Our Knowledge about Melanoma (Fluorescent quantification of melanin) … p.6279

Neurodegenerative Diseases and Conditions - Ataxia Telangiectasia. Research Conducted at University of Oxford Has Provided New Information about Ataxia Telangiectasia (MEK inhibitors block growth of lung tumours with mutations in ataxia–telangiectasia mutated) … p.6280

Heart Disorders and Diseases - Atrial Fibrillation. Research Conducted at University of Queensland Has Updated Our Knowledge about Atrial Fibrillation (The State of the Art: Atrial Fibrillation Epidemiology, Prevention, and Treatment) … p.6282

Query Fever. Research Conducted at University of Sassari Has Provided New Information about Query Fever (Mediterranean spotted fever–like illness in Sardinia, Italy: a clinical and microbiological study) … p.6283

Enzymes and Coenzymes - Cysteine Endopeptidases. Research Conducted at University of Sonora Has Provided New Information about Cysteine Endopeptidases (Apoptotic activities of cardenolide glycosides from Asclepias subulata) … p.6284
Proteomics. Research Conducted at University of Technology Has Updated Our Knowledge about Proteomics (Systematic Analysis of Protein Interaction Network Associated with Azoospermia) … p.6285

Oncology - B-Cell Lymphoma. Research Conducted at University of Texas Has Provided New Information about B-Cell Lymphoma (Prognostic significance of baseline peripheral absolute neutrophil, monocyte and serum 2-microglobulin level in patients with diffuse large b-cell ...) … p.6286

Oncology - Urothelial Cancer. Research Conducted at University of Texas Has Provided New Information about Urothelial Cancer (Nivolumab monotherapy in recurrent metastatic urothelial carcinoma (CheckMate 032): a multicentre, open-label, two-stage, multi-arm, phase 1/2 trial) … p.6287

Myeloid Cells. Research Conducted at University of Tokyo Has Updated Our Knowledge about Myeloid Cells (Conditional Rod Photoreceptor Ablation Reveals Sall1 as a Microglial Marker and Regulator of Microglial Morphology in the Retina) … p.6288

Heart Disorders and Diseases - Ebstein Anomaly. Research Conducted at University of Toronto Has Updated Our Knowledge about Ebstein Anomaly (Contemporary Outcomes and Factors Associated With Mortality After a Fetal or Neonatal Diagnosis of Ebstein Anomaly and Tricuspid Valve Disease) … p.6289

Heart Disorders and Diseases - Heart Attack. Research Conducted at University of Toronto Has Updated Our Knowledge about Heart Attack (Anesthesia Technique and Mortality after Total Hip or Knee Arthroplasty A Retrospective, Propensity Score-matched Cohort Study) … p.6290

Cardiology. Research Conducted at University of Tours Has Updated Our Knowledge about Cardiology (Position paper for management of elderly patients with pacemakers and implantable cardiac defibrillators: Groupe de Rythmologie et Stimulation Cardiaque de la ...) … p.6291

Genetics - Medical Genetics. Research Conducted at University of Washington Has Provided New Information about Medical Genetics (CADD score has limited clinical validity for the identification of pathogenic variants in noncoding regions in a hereditary cancer panel) … p.6292

Enzymes and Coenzymes - Cholinesterases. Research Conducted at University of Zagreb Has Updated Our Knowledge about Cholinesterases (A comprehensive evaluation of novel oximes in creation of butyrylcholinesterase-based nerve agent bioscavengers) … p.6293

Drugs and Therapies - Chemotherapy. Research Conducted at Wellesley College Has Provided New Information about Chemotherapy (Bacterial Spheroplasts as a Model for Visualizing Membrane Translocation of Antimicrobial Peptides) … p.6295

Intranuclear Space. Research Conducted at Wistar Institute Has Updated Our Knowledge about Intranuclear Space (EBNA2 Drives Formation of New Chromosome Binding Sites and Target Genes for B-Cell Master Regulatory Transcription Factors RBP-jk and EBF1) … p.6295

Naphthaleneacetic Acids. Research Conducted at Wroclaw University Has Updated Our Knowledge about Naphthaleneacetic Acids (Synthesis and Formulation of Thermosensitive Drug Carrier for Temperature Triggered Delivery of Naproxen Sodium) … p.6296
Oncology - Esophageal Cancer. Research Conducted at Yokohama City University Has Provided New Information about Esophageal Cancer (Evaluation of the Glasgow Prognostic Score in patients receiving chemoradiotherapy for stage III and IV esophageal cancer) … p.6297

Drugs and Therapies - Antibiotics. Research Conducted at Zagazig University Has Provided New Information about Antibiotics (Rifaximin and midodrine improve clinical outcome in refractory ascites including renal function, weight loss, and short–term survival) … p.6298

Hematologic Diseases and Conditions - Anemia. Research Conducted by C. von Heymann and Co–Researchers Has Updated Our Knowledge about Anemia (Does the severity of preoperative anemia or blood transfusion have a stronger impact on long–term survival after cardiac surgery?) … p.6299

Drugs and Therapies - Drug Resistance. Research Conducted by E. Jagielska and Co–Researchers Has Updated Our Knowledge about Drug Resistance (LytM Fusion with SH3b–Like Domain Expands Its Activity to Physiological Conditions) … p.6300

Nanotechnology - Nanoparticles. Research Conducted by G. Choi and Co–Researchers Has Updated Our Knowledge about Nanoparticles (A cost–effective chemiluminescent biosensor capable of early diagnosing cancer using a combination of magnetic beads and platinum nanoparticles) … p.6301

Hearing Diseases and Conditions - Hearing Loss. Research Conducted by G. Girotto and Co–Authors Has Provided New Information about Hearing Loss (PSIP1/LEDGF: a new gene likely involved in sensorineuronal progressive hearing loss) … p.6302

www.NewsRx.com

Pheochromocytomas. Research Conducted by L.A. Guardo and Co–Authors Has Provided New Information about Pheochromocytomas (Known difficult airway in a patient with pheochromocytoma: a case report) … p.6303

Blood Pressure. Research Conducted by Q. Wang and Co–Authors Has Provided New Information about Blood Pressure (Environmental ambient temperature and blood pressure in adults: A systematic review and meta–analysis) … p.6304

Central Nervous System Diseases and Conditions - Epilepsy. Research Conducted by R.V. Soares and Co–Researchers Has Updated Our Knowledge about Epilepsy (Ontogeny of ABC and SLC transporters in the microvessels of developing rat brain) … p.6305

Autoimmune Diseases and Conditions - Sjogren’s Syndrome. Research Conducted by S. Haskett and Co–Researchers Has Updated Our Knowledge about Sjogren’s Syndrome (Identification of Novel CD4(+) T Cell Subsets in the Target Tissue of Sjogren’s Syndrome and Their Differential Regulation by the …) … p.6306

Ebola Virus. Research Conducted by S.J. Smither and Co–Authors Has Provided New Information about Ebola Virus (Ebola Virus Makona Shows Reduced Lethality in an Immune–deficient Mouse Model) … p.6307

Skin Diseases. Research Data from Boston University Update Understanding of Skin Diseases (A Proteome–Derived Longitudinal Pharmacodynamic Biomarker for Diffuse Systemic Sclerosis Skin) … p.6309

Abdominal Aortic Aneurysm. Research Data from CNIC Update Understanding of Abdominal Aortic Aneurysm (Quantitative HDL Proteomics Identifies Peroxiredoxin–6 as a Biomarker of Human Abdominal Aortic Aneurysm) … p.6310

Oncology - Gastric Cancer. Research Data from Cancer Institute Update Understanding of Gastric Cancer (Cytoreductive surgery and hyperthermic intraperitoneal chemotherapy in gastric cancer) … p.6311

Oncology - Lung Cancer. Research Data from China Medical University and Hospital Update Understanding of Lung Cancer (Antitumor effects of deguelin on H460 human lung cancer cells in vitro and in vivo: Roles of apoptotic cell death and H460 tumor xenografts model) … p.6312

Oncology - Breast Cancer. Research Data from China Pharmaceutical University Update Understanding of Breast Cancer (Wogonoside Inhibits Angiogenesis in Breast Cancer Via Supressing Wnt/beta–Catenin Pathway) … p.6313

Liver Diseases and Conditions - Portal Hypertension. Research Data from Chongqing Medical University Update Understanding of Portal Hypertension (Balloon–occluded retrograde transvenous obliteration versus transjugular intrahepatic portosystemic shunt for treatment of gastric varices due to …) … p.6314

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Research Data from Department of Cardiology Update Understanding of Left Ventricular Hypertrophy (Ventricular Hinge Point Fibrosis as a Pathological Marker of Hypertrophic Cardiomyopathy in the Absence of Significant Left Ventricular …) … p.6315

Cardiovascular Diseases and Conditions - No–Reflow Phenomenon. Research Data from Department of Cardiology Update Understanding of No–Reflow Phenomenon (A simple and rapid method for identification of lesions at high risk for the no–reflow phenomenon immediately before elective coronary stent implantation) … p.6316

Drugs and Therapies - Paracetamol Therapy. Research Data from Department of Emergency Medicine Update Understanding of Paracetamol Therapy (Evidence for the changing regimens of acetylcysteine) … p.6317

Bacterial Infections and Mycoses - Bacteremia. Research Data from Division of Infectious Diseases Update Understanding of Bacteremia (Risk factors for persistent bacteremia in infants with catheter–related bloodstream infection due to coagulase–negative Staphylococcus in the neonatal …) … p.6318

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Research Data from Faculty of Health Sciences Update Understanding of Venous Thromboembolism (The Role of Platelets in Venous Thromboembolism) … p.6319

Hematologic Diseases and Conditions - Alpha Thalassemia. Research Data from George Washington University Update Understanding of Alpha Thalassemia (Homozygous alpha–thalassemia: Challenges surrounding early identification, treatment, and cure) … p.6320

Clinical Research - Clinical Trials and Studies. Research Data from Harvard School of Medicine Update Understanding of Clinical Trials and Studies (Carbon Dioxide–Based versus Saline Tissue Expansion for Breast Reconstruction: Results of the XPAND Prospective, Randomized Clinical Trial)
Potassium Compounds. Research Data from Harvard–MIT Division of Health Sciences and Technology Update Understanding of Potassium Compounds (Broad–Spectrum Antimicrobial Effects of Photocatalysis Using Titanium Dioxide Nanoparticles Are Strongly Potentiated by ...)

Drugs and Therapies - Cancer Therapy. Research Data from Inje University Update Understanding of Cancer Therapy (An alpha–quaternary chiral latam derivative, YH–304 as a novel broad–spectrum anticancer agent)

Cardiovascular Diseases and Conditions - Hypertension. Research Data from Johns Hopkins University Update Understanding of Hypertension [Effects of the Dietary Approaches to Stop Hypertension (DASH) Diet and Sodium Intake on Serum Uric Acid]

Heart Disorders and Diseases - Heart Failure. Research Data from Maastricht University Update Understanding of Heart Failure (Metabolic support for the heart: complementary therapy for heart failure?)

Drugs and Therapies - Pharmacology. Research Data from Mahidol University Update Understanding of Pharmacology (Morus alba L. Stem Extract Attenuates Pain and Articular Cartilage Damage in the Anterior Cruciate Ligament Transection–Induced Rat Model of Osteoarthritis)

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Research Data from Manipal University Update Understanding of Type 1 Diabetes Mellitus (Small molecules exert anti–apoptotic effect and reduce oxidative stress augmenting insulin secretion in stem cells engineered islets against hypoxia)

Transfusion Medicine - Blood Transfusion. Research Data from McGill University Update Understanding of Blood Transfusion (Role of the deubiquitinating enzyme ubiquitin–specific protease–14 in proteostasis in renal cells)

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Research Data from Nanjing Medical University Update Understanding of Alzheimer Disease (Different Expression Patterns of Amyloid–b Protein Precursor Secretases in Human and Mouse Hippocampal Neurons: A Potential Contribution to Species ...)

Chemical Research. Research Data from National Center for Radiation Research and Technology Update Understanding of Chemical Research (Novel Sulfonamide Derivatives Carrying a Biologically Active 3,4–Dimethoxyphenyl Moiety as VEGFR–2 Inhibitors)

Drugs and Therapies - Cancer Therapy. Research Data from National Center for Scientific Research (CNRS) Update Understanding of Cancer Therapy (The anti–tumor NC1 domain of collagen XIX inhibits the FAK/PI3K/Akt/mTOR signaling pathway through avb3 integrin interaction)

Lung Diseases and Conditions - Cystic Fibrosis. Research Data from National Health Service Lothian Update Understanding of Cystic Fibrosis (Eradication therapy for Burkholderia cepacia complex in people with cystic fibrosis)

Oncology - Rectal Cancer. Research Data from New York University Update Understanding of Rectal Cancer (Role of belly board device in the age of intensity modulated radiotherapy for pelvic irradiation)
January 14, 2017

Digestive System Diseases and Conditions - Duodenal Ulcers. Research Data from Oita University. Update Understanding of Duodenal Ulcers (Vonoprazan, a novel potassium–competitive acid blocker, as a component of first–line and second–line triple therapy for Helicobacter pylori eradication: a phase III, ...) … p.6334

Biomedical Engineering - Tissue Engineering. Research Data from Polytechnic University. Update Understanding of Tissue Engineering (Physical properties imparted by genipin to chitosan for tissue regeneration with human stem cells: A review) … p.6335

Drugs and Therapies - Antiretrovirals. Research Data from Radboud University. Update Understanding of Antiretrovirals (Pharmacokinetic drug–drug interaction study between raltegravir and citalopram) … p.6336

Oncology - Rectal Cancer. Research Data from Research Institute and Hospital. Update Understanding of Rectal Cancer (Adjuvant radiotherapy for the treatment of stage IV rectal cancer after curative resection A propensity score–matched analysis and meta–analysis) … p.6337

Transplant Medicine - Liver Transplants. Research Data from Royal Infirmary Edinburgh NHS Trust Update Understanding of Liver Transplants (Preformed donor–specific HLA antibodies are associated with increased risk of early mortality after liver transplantation) … p.6338

Oncology - Colon Cancer. Research Data from Second Military Medical University. Update Understanding of Colon Cancer (Colonoscopy Reduces Colorectal Cancer Incidence and Mortality in Patients With Non–Malignant Findings: A Meta–Analysis) … p.6339

www.NewsRx.com

Oncology - Melanoma. Research Data from Sharett Institute of Oncology. Update Understanding of Melanoma [Clinical Significance of Circulating CD33(+)CD11b(+)|HLA–DR– Myeloid Cells in Patients with Stage IV Melanoma Treated with Ipilimumab] … p.6340

Arrhythmia. Research Data from Shiga University of Medical Sciences. Update Understanding of Arrhythmia (Phenotypic Variability of ANK2 Mutations in Patients With Inherited Primary Arrhythmia Syndromes) … p.6341

Oncology - Breast Cancer. Research Data from Sungkyunkwan University. Update Understanding of Breast Cancer (High Ki67/BCL2 index is associated with worse outcome in early stage breast cancer) … p.6342

Oncology - Squamous Cell Carcinoma. Research Data from Sungkyunkwan University. Update Understanding of Squamous Cell Carcinoma (Overexpression of beta–Catenin and Cyclin D1 is Associated with Poor Overall Survival in Patients with Stage IA–IIA Squamous Cell Lung Cancer ...) … p.6343

Cardiovascular Diseases and Conditions - Vasculitis. Research Data from Tallaght Hospital Update Understanding of Vasculitis (Changes in urinary metabolomic profile during relapsing renal vasculitis) … p.6344

Hematology - Blood Coagulation Factors. Research Data from Tel Aviv University. Update Understanding of Blood Coagulation Factors (Thrombin And Protein C Pathway In Peripheral Nerve Schwann Cells) … p.6345

Musculoskeletal Diseases and Conditions - Arthritis. Research Data from Tokyo University of Pharmacy and Life Sciences Update Understanding of Arthritis (Systemic delivery of small interfering RNA targeting nuclear factor kappa B in mice with collagen–induced arthritis using ...) … p.6346
January 14, 2017

Adenocarcinomas. Research Data from University Hospital Update Understanding of Adenocarcinomas (Positioning of second–line treatment for advanced gastric and gastroesophageal junction adenocarcinoma) ... p.6347

DNA Research. Research Data from University Hospital Update Understanding of DNA Research (DNA Damage–Induced HSPC Malfunction Depends on ROS Accumulation Downstream of IFN–I Signaling and Bid Mobilization) ... p.6348

Breast Diseases and Conditions - Gynecomastia. Research Data from University Hospital Update Understanding of Gynecomastia (Endocrine and molecular investigations in a cohort of 25 adolescent males with prominent/persistent pubertal gynecomastia) ... p.6349

Enterovirus. Research Data from University of Agriculture Update Understanding of Enterovirus (Enterovirus 71 inhibits cellular type I interferon signaling by inhibiting host RIG–I ubiquitination) ... p.6350

Peptide Proteins - Proinsulin. Research Data from University of California Update Understanding of Proinsulin (Circadian variation of the pancreatic islet transcriptome) ... p.6352

DNA Research. Research Data from University of Chile Update Understanding of DNA Research (2–hydroxyoestradiol and 2–methoxyoestradiol, two endogenous oestradiol metabolites, induce DNA fragmentation in Sertoli cells) ... p.6353

www.NewsRx.com

Oncology - Colon Cancer. Research Data from University of Colorado Update Understanding of Colon Cancer (Topoisomerase IIa mediates TCF–dependent epithelial–mesenchymal transition in colon cancer) ... p.6354

Cardiovascular Diseases and Conditions - Atherosclerosis. Research Data from University of Genoa School of Medicine Update Understanding of Atherosclerosis (Role of neutrophils in atherogenesis: an update) ... p.6355

Myeloid Cells. Research Data from University of Guadalajara Update Understanding of Myeloid Cells (Culture supernatants of cervical cancer cells induce an M2 phenotypic profile in THP–1 macrophages) ... p.6356

Autoimmune Diseases and Conditions - Experimental Autoimmune Encephalomyelitis. Research Data from University of New Mexico Update Understanding of Experimental Autoimmune Encephalomyelitis (Nrf2–dysregulation correlates with reduced synthesis and low glutathione levels in experimental autoimmune encephalomyelitis) ... p.6357

Angiology. Research Data from University of Padua Update Understanding of Angiology (PCSK9 knock–out mice are protected from neointimal formation in response to perivascular carotid collar placement) ... p.6359

Membrane Proteins - Ion Channels. Research Data from University of Pannonia Update Understanding of Ion Channels (Potential L–Type Voltage–Operated Calcium Channel Blocking Effect of Drotaverine on Functional Models) ... p.6360

Whipple's Disease. Research Data from University of Paris Update Understanding of Whipple's Disease (Whipple's arthritis) ... p.6361
Central Nervous System Diseases and Conditions - Epilepsy. Research Data from University of Pavia Update Understanding of Epilepsy (Development and Validation of an HPLC–UV Assay for the Therapeutic Monitoring of the New Antiepileptic Drug Perampanel in Human Plasma) ... p.6362

Respiratory Tract Diseases and Conditions - Primary Ciliary Dyskinesia. Research Data from University of Pisa Update Understanding of Primary Ciliary Dyskinesia (Gene editing of DNAH11 restores normal cilia motility in primary ciliary dyskinesia) ... p.6363

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Research Data from University of Rochester Update Understanding of Chronic Obstructive Pulmonary Disease (Gene expression profiling of epigenetic chromatin modification enzymes and histone marks by cigarette smoke: implications for COPD and ...) ... p.6364

Musculoskeletal Diseases and Conditions - Osteoarthritis. Research Data from University of Southampton Update Understanding of Osteoarthritis (Demethylation of an NF–kappa B enhancer element orchestrates iNOS induction in osteoarthritis and is associated with altered chondrocyte cell cycle) ... p.6365

Infant, Newborn Diseases and Conditions - Neonatal Abstinence Syndrome. Research Data from University of Southern Florida Update Understanding of Neonatal Abstinence Syndrome (Neonatal abstinence syndrome and the gastrointestinal tract) ... p.6366

Immunology - Granulocytes. Research Data from University of Sydney Update Understanding of Granulocytes (Neutrophils recruited to the myocardium after acute experimental myocardial infarct generate hypochlorous acid that oxidizes cardiac myoglobin) ... p.6367

Gram-Positive Bacteria - Staphylococcus aureus. Research Data from University of the Pacific Update Understanding of Staphylococcus aureus (Impact of Infectious Diseases Consultation on Clinical Outcomes of Patients with Staphylococcus aureus Bacteremia in a Community Health System) ... p.6368

Drugs and Therapies - Alkylation Agents. Research Data from Victoria University Update Understanding of Alkylation Agents (Role of oxidative stress in oxaliplatin–induced enteric neuropathy and colonic dysmotility in mice) ... p.6369

Oncology - Solid Cancer. Research Data from Wake Forest University Update Understanding of Solid Cancer (Conservation of immune gene signatures in solid tumors and prognostic implications) ... p.6370

Oncology - Liver Cancer. Research Data from Wuhan University Update Understanding of Liver Cancer (Reanalysis of microRNA expression profiles identifies novel biomarkers for hepatocellular carcinoma prognosis) ... p.6371

Liver Diseases and Conditions - Budd-Chiari Syndrome. Research Data from Zhengzhou University Update Understanding of Budd–Chiari Syndrome (Accuracy of computed tomographic angiography in the diagnosis of patients with inferior vena cava partial obstruction in Budd–Chiari syndrome) ... p.6372

Oncology - Non-Small Cell Lung Cancer. Research Institute and Hospital Details Findings in Non–Small Cell Lung Cancer (Prognostic Differences in Subgroups of Patients With Surgically Resected T3 Non–Small Cell Lung Cancer) ... p.6373
Oncology - MALT Lymphoma. Research Results from Aga Khan University Hospital Update Understanding of MALT Lymphoma (MALT lymphoma of the base of the tongue: a rare case entity) … p.6374

Oncology - Glioblastomas. Research Results from Columbia University Medical Center Update Knowledge of Glioblastomas (Reassessing the Role of Intra–Arterial Drug Delivery for Glioblastoma Multiforme Treatment) … p.6375

Respiratory Tract Diseases and Conditions - Respiratory Acidosis. Research Results from Complutense University Update Understanding of Respiratory Acidosis (Readmissions following an initial hospitalization by COPD exacerbation in Spain from 2006 to 2012) … p.6376

Oncology - Acute Myeloid Leukemia. Research Results from Department of Internal Medicine III Update Knowledge of Acute Myeloid Leukemia (IL–8 as mediator in the microenvironment–leukaemia network in acute myeloid leukaemia) … p.6377

Cardiology. Research Results from Dongguk University Ilsan Hospital Update Understanding of Cardiology (Diastolic Dysfunction and Outcome in Acute Ischemic Stroke) … p.6378

Oncology - Malignant Pleural Effusion. Research Results from Fudan University Update Understanding of Malignant Pleural Effusion (Potential diagnostic value of serum/pleural fluid IL–31 levels for tuberculous pleural effusion) … p.6379

Herpesvirus Diseases and Conditions - Herpes Simplex Virus. Research Results from Graduate School Update Knowledge of Herpes Simplex Virus (OASL1 deficiency promotes antiviral protection against genital herpes simplex virus type 2 infection by enhancing type I interferon production) … p.6380

Pregnancy Complications - Preeclampsia. Research Results from Harvard School of Medicine Update Knowledge of Preeclampsia (Analysis of changes in maternal circulating angiogenic factors throughout pregnancy for the prediction of preeclampsia) … p.6381

Oncology - Small Cell Lung Cancer. Research Results from Henan University Update Understanding of Small Cell Lung Cancer (Association between polymorphisms in the XRCC1 gene and the risk of non–small cell lung cancer) … p.6382

Oncology - Lung Cancer. Research Results from Kaohsiung Medical University Update Knowledge of Lung Cancer (Distinct CPT–induced deaths in lung cancer cells caused by clathrin–mediated internalization of CP micelles) … p.6383

Endocrine System Diseases and Conditions - Polycystic Ovary Syndrome. Research Results from Monash University Update Understanding of Polycystic Ovary Syndrome (Polycystic Ovary Syndrome, Obesity, and Pregnancy) … p.6384

Heart Disorders and Diseases - Angina Pectoris. Research Results from Morbid Obesity Center Update Knowledge of Angina Pectoris (Association between Body Mass Index, Asymmetric Dimethylarginine and Risk of Cardiovascular Events and Mortality in Norwegian Patients with Suspected Stable Angina ...) … p.6385

Nutritional and Metabolic Diseases and Conditions - Obesity. Research Results from Newcastle University Update Knowledge of Obesity (Physical activity attenuates the effect of the FTO genotype on obesity traits in European adults: The Food4Me study) … p.6386
Oncology - Carcinomas. Research Results from Seoul National University Update Knowledge of Carcinomas (Mica Nanoparticle, STB–HO Eliminates the Human Breast Carcinoma Cells by Regulating the Interaction of Tumor with its Immune Microenvironment) … p.6387

Biological Therapy. Research Results from Toronto Western Hospital Update Understanding of Biological Therapy (A Systematic Study of the Effect of Different Molecular Weights of Hyaluronic Acid on Mesenchymal Stromal Cell–Mediated Immunomodulation) … p.6388

Nutritional and Metabolic Diseases and Conditions - Iron Deficiency. Research Results from University Hospital Update Understanding of Iron Deficiency (A fast–track anaemia clinic in the Emergency Department: feasibility and efficacy of intravenous iron administration for treating sub–acute iron deficiency ...) … p.6389

Heart Disorders and Diseases - Heart Failure. Research Results from University of Antwerp Update Knowledge of Heart Failure (Circulating Stromal Cell–Derived Factor 1a Levels in Heart Failure: A Matter of Proper Sampling) … p.6390

Enzymes and Coenzymes - Oxidoreductases. Research Results from University of Bologna Update Understanding of Oxidoreductases (Xanthine oxidoreductase in cancer: more than a?differentiation marker) … p.6391

Environmental Microbiology. Research Results from University of Cambridge Update Understanding of Environmental Microbiology (Molecular genetic and physical analysis of gas vesicles in buoyant enterobacteria) … p.6392

www_newsrx.com

Immunization - Vaccines. Research Results from University of Dschang Update Knowledge of Vaccines [Improving community based AEFI (Adverse Events Following Immunization) reporting rate through telephone “beep” in a Cameroon health district: a randomized field trial] … p.6393

Cardiology. Research Results from University of Melbourne Update Understanding of Cardiology [CaMKId and cardiomyocyte Ca(2+) signalling new perspectives on splice variant targeting] … p.6394

Science. Research Results from University of Milan Update Knowledge of Science (Embelin binds to human neuroserpin and impairs its polymerisation) … p.6395

Oncology - B–Cell Lymphoma. Research Results from University of Texas Health Science Center Update Knowledge of B–Cell Lymphoma (A phosphodiesterase 4B–dependent interplay between tumor cells and the microenvironment regulates angiogenesis in B–cell lymphoma) … p.6396

Oncology - Acute Myeloid Leukemia. Research Results from University of Toronto Update Understanding of Acute Myeloid Leukemia (Targeting mitochondrial RNA polymerase in acute myeloid leukemia) … p.6397

Drugs and Therapies - Immunosuppressive Agents. Research Results from Wright State University Boonshoft School of Medicine Update Knowledge of Immunosuppressive Agents (A
Randomized 2x2 Factorial Clinical Trial of Renal Transplantation: Steroid-Free Maintenance Immunosuppression with ... p.6399

Acute Myocardial Infarction. Research Results from Xinxiang Medical University Update Understanding of Acute Myocardial Infarction (Protective mechanism of quercetin on acute myocardial infarction in rats) ... p.6400

Neurologic Manifestations - Pain. Research Results from Zhejiang University Update Understanding of Pain (Oral Administration of Pregabalin in Rats before or after Nerve Injury Partially Prevents Spontaneous Neuropathic Pain and Long Outlasts the Treatment Period) ... p.6401

Cardiology. Research from Chinese Academy of Medical Sciences Yields New Findings on Cardiology (Multiple Intercostal Space Electrocardiogram Allows Accurate Localization of Outflow Tract Ventricular Arrhythmia Origin) ... p.6402

Drugs and Therapies - Electrochemotherapy. Research from Copenhagen University Hospital Reveals New Findings on Electrochemotherapy (Calcium Electroporation: Evidence for Differential Effects in Normal and Malignant Cell Lines, Evaluated in a 3D Spheroid Model) ... p.6403

Epidemiology. Research from Fourth Military Medical University Reveals New Findings on Epidemiology (Epidemiological characteristics of the carriers with coexistence of HBsAg and anti–HBs based on a community cohort study) ... p.6405

Neurology - Neurodegeneration. Research from Genome Institute Reveals New Findings on Neurodegeneration (MiR–375 is Essential for Human Spinal Motor Neuron Development and May Be Involved in Motor Neuron Degeneration) ... p.6406

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Research from King Saud University Yields New Findings on Type 2 Diabetes (Ischemic Stroke and Its Risk Factors in a Registry–Based Large Cross–Sectional Diabetic Cohort in a Country Facing a Diabetes Epidemic) ... p.6407

Oncology - Breast Cancer. Research from Lund University Yields New Findings on Breast Cancer (Comparative breast cancer molecular subtypes across serial tumor progression stages: biological and prognostic implications) ... p.6408

Butyrophenones. Research from Medical University Reveals New Findings on Butyrophenones (Long–term treatment with haloperidol affects neuropeptide S and NPSR mRNA levels in the rat brain) ... p.6409

Oncology - Colon Cancer. Research from Medical University Reveals New Findings on Colon Cancer (Colorectal cancer tumour markers and biomarkers: Recent therapeutic advances) ... p.6410

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Research from Michigan State University Reveals New Findings on Diabetic Angiopathies (Role of Acid Sphingomyelinase in Shifting the Balance Between Proinflammatory and Reparative Bone Marrow Cells in Diabetic Retinopathy) ... p.6411

Drugs and Therapies - Antibiotics. Research from Military Medical Academy Reveals New Findings on Antibiotics (Cardiac troponin–I, brain natriuretic peptide and endothelin–1 levels in a rat model of doxorubicin–induced cardiac injury)
Eye Diseases and Conditions - Age-Related Macular Degeneration. Research from Moorfields Eye Hospital Yields New Findings on Age–Related Macular Degeneration (A retrospective study of the real–life utilization and effectiveness of ranibizumab therapy for neovascular age–related macular degeneration in the UK) … p.6413

Addiction Research. Research from National Institute on Drug Abuse Reveals New Findings on Addiction Research (A role for sigma receptors in stimulant self–administration and addiction) … p.6414

Nephrology. Research from Novartis Pharma Yields New Findings on Nephrology (Pharmacokinetics of serelaxin in patients with severe renal impairment or end–stage renal disease requiring hemodialysis: A single–dose, open–label, parallel–group study) … p.6415

Oncology - Breast Cancer. Research from Peking Union Medical College Hospital Yields New Findings on Breast Cancer (Ultrasound–Assisted Thoracic Paravertebral Block Reduces Intraoperative Opioid Requirement and Improves Analgesia after Breast Cancer Surgery: A …) … p.6416

Blood Pressure. Research from Peking University People's Hospital Reveals New Findings on Blood Pressure (Efficacy and Safety of Fixed–Dose Perindopril Arginine/Amlodipine in Hypertensive Patients Not Adequately Controlled with Amlodipine 5 mg or Perindopril …) … p.6417

Oncology - Colon Cancer. Research from Shanghai Jiao–Tong University Yields New Findings on Colon Cancer (LncRNA–ATB mediated E–cadherin repression promotes the progression of colon cancer and predicts poor prognosis) … p.6418

Liver Diseases and Conditions - Hepatitis B Virus. Research from Southern Medical University Yields New Findings on Hepatitis B Virus (A comparison of lamivudine vs entecavir for prophylaxis of hepatitis B virus reactivation in allogeneic hematopoietic stem cell transplantation recipients: a …) … p.6419

Oncology - Colon Cancer. Research from Sun Yat–sen University Cancer Center Reveals New Findings on Colon Cancer (Downregulation of CDC27 inhibits the proliferation of colorectal cancer cells via the accumulation of p21Cip1/Waf1) … p.6420

Environmental Epidemiology. Research from Taipei Medical University Reveals New Findings on Environmental Epidemiology (Soil ingestion rates for children under 3 years old in Taiwan) … p.6421

Cardiovascular Diseases and Conditions - Hypertension. Research from University Hospital Reveals New Findings on Hypertension (Investigating kidney donation as a risk factor for hypertension and microalbuminuria: findings from the Swiss prospective follow–up of living kidney donors) … p.6422

Cardiovascular Diseases and Conditions - Aneurysm. Research from University of Arizona Reveals New Findings on Aneurysm (2–Photon Characterization of Optical Proteolytic Beacons for Imaging Changes in Matrix–Metalloprotease Activity in a Mouse Model of Aneurysm) … p.6424

Oncology. Research from University of Cincinnati Yields New Findings on Oncology (Impact of molecular profiling on overall survival of patients with advanced ovarian cancer) … p.6425
January 14, 2017

Gram-Negative Bacteria - Helicobacter pylori. Research from University of Erlangen Yields New Findings on Helicobacter pylori (Characterisation of worldwide Helicobacter pylori strains reveals genetic conservation and essentiality of serine protease HtrA) … p.6426

Life Science Research. Research from University of Rostock Reveals New Findings on Life Science Research (Functional Characterization and Drug Response of Freshly Established Patient–Derived Tumor Models with CpG Island Methylator Phenotype) … p.6428

Addiction Research. Research from University of Sao Paulo Yields New Findings on Addiction Research (Early social isolation increases persistence of alcohol–seeking behavior in alcohol–related contexts) … p.6429

Stem Cell Research - Hematopoietic Stem Cells. Research from University of Ulsan Reveals New Findings on Hematopoietic Stem Cells (Evaluation of parameters obtained from the Sysmex XN–2000 for predicting the recovery of the absolute neutrophil count and platelets after hematopoietic stem ...) … p.6430

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Research from University of Ulster Reveals New Findings on Inflammatory Bowel Disease (Natural Nuclear Factor Kappa Beta Inhibitors: Safe Therapeutic Options for Inflammatory Bowel Disease) … p.6431

www.NewsRx.com

Immunization - Vaccines. Research from Xiamen University Yields New Findings on Vaccines (Functional assessment and structural basis of antibody binding to human papillomavirus capsid) … p.6433

Heart Disorders and Diseases - Atrial Fibrillation. Researchers at AEMPS Target Atrial Fibrillation (Causes of Death in Anticoagulated Patients With Atrial Fibrillation) … p.6434

Cardiovascular Research. Researchers at Aalborg University Target Cardiovascular Research (Cardiovascular control during whole body exercise) … p.6436

Nutritional and Metabolic Diseases and Conditions - Obesity and Diabetes. Researchers at Aarhus University Have Reported New Data on Obesity and Diabetes (Effects of insulin–induced hypoglycaemia on lipolysis rate, lipid oxidation and adipose tissue signalling in human volunteers: a randomised clinical study) … p.6437

Membrane Proteins - Vesicular Transport Proteins. Researchers at Academic Medical Center Have Reported New Data on Vesicular Transport Proteins (Helium postconditioning regulates expression of caveolin–1 and–3 and induces RISK pathway activation after ischaemia/reperfusion in cardiac tissue of ...) … p.6438
Oncology - T-Cell Lymphoma. Researchers at Aichi Cancer Center Hospital Release New Data on T-Cell Lymphoma [Anti–CCR4 Monoclonal Antibody Mogamulizumab Followed by the GDP (Gemcitabine, Dexamethasone and Cisplatin) Regimen in Primary Refractory Angioimmunoblastic T-Cell ...] … p.6439

Hematologic Diseases and Conditions - Thrombocytopenia. Researchers at Albert Einstein College of Medicine Report New Data on Thrombocytopenia (Thrombocytopenia in MDS: epidemiology, mechanisms, clinical consequences and novel therapeutic strategies) … p.6442

Oncology - Colon Cancer. Researchers at Amphia Hospital Target Colon Cancer (What is the Risk of Colorectal Cancer After an Episode of Acute Diverticulitis in Conservatively Treated Patients?) … p.6443

Amphetamines. Researchers at Arizona State University Target Amphetamines (Early life stress and chronic variable stress in adulthood interact to influence methamphetamine self–administration in male rats) … p.6444

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Researchers at Autonomous University Detail Findings in Alzheimer Disease (PTEN recruitment controls synaptic and cognitive function in Alzheimer’s models) … p.6445

Liver Diseases and Conditions - Fatty Liver. Researchers at Bassett Medical Center Have Reported New Data on Fatty Liver (Short sleep duration and risk of nonalcoholic fatty liver disease: A systematic review and meta–analysis) … p.6446

Drugs and Therapies - Hormones. Researchers at Bayer Pharma AG Target Hormones (Pharmacokinetics, safety and tolerability of the novel, selective mineralocorticoid receptor antagonist finerenone – results from first–in–man and relative bioavailability studies) … p.6447

Oncology - Oropharyngeal Cancer. Researchers at Baylor University College of Medicine Target Oropharyngeal Cancer (Racial disparities in incidence of human papillomavirus–associated oropharyngeal cancer in an urban population) … p.6448

Nervous System Diseases and Conditions - Narcolepsy. Researchers at Bern University Hospital Target Narcolepsy (Post–H1N1 Flu Vaccination Narcolepsy in Switzerland: A Retrospective Survey in the 30 Sleep–Certified Swiss Centers) … p.6449

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at Boston University Have Reported New Data on Obesity (A Randomized Trial Examining the Impact of Communicating Genetic and Lifestyle Risks for Obesity) … p.6450

Mycobacterium Infections - Tuberculosis. Researchers at Brigham and Women’s Hospital Have Reported New Data on Tuberculosis [(R)e)moving the needle: prospects for all–oral treatment for multidrug–resistant tuberculosis] … p.6451
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at Brown University Have Reported New Data on Obesity (Inflammatory Obesity Phenotypes, Gender Effects, and Subclinical Atherosclerosis in African Americans The Jackson Heart Study) … p.6452

Heart Disorders and Diseases - Cardiomegaly. Researchers at CNIC Target Cardiomegaly (p38g and d promote heart hypertrophy by targeting the mTOR–inhibitory protein DEPTOR for degradation) … p.6453

Oncology - Breast Cancer. Researchers at CSIR Target Breast Cancer (Centchroman Altered the Expressions of Tumor–Related Genes Through Active Chromatin Modifications in Mammary Cancer) … p.6454

Drugs and Therapies - Antineoplastics. Researchers at Cambridge University Hospitals NHS Foundation Trust Target Antineoplastics (Photodynamic therapy: current role in the treatment of chorioretinal conditions) … p.6456

Oncology - Gastric Cancer. Researchers at Cancer Center Describe Findings in Gastric Cancer (Subgroup analysis of East Asians in RAINBOW: A phase 3 trial of ramucirumab plus paclitaxel for advanced gastric cancer) … p.6457

Pathology. Researchers at Cancer Center Describe Findings in Pathology [Pathology of advanced buccal mucosa cancer involving masticator space (T4b)] … p.6458

Drugs and Therapies - Chemotherapy. Researchers at Cancer Center Report Findings in Chemotherapy (Does the use of induction chemotherapy in oral cavity cancer compromise subsequent loco–regional treatment delivery: Results from a matched pair analysis) … p.6459

Drugs and Therapies - Polymer Therapy. Researchers at Cardiff University Target Polymer Therapy (A New Class of Safe Oligosaccharide Polymer Therapy To Modify the Mucus Barrier of Chronic Respiratory Disease) … p.6461

Hematopoietic. Researchers at Case Western Reserve University Have Reported New Data on Hematopoietic (Comparison of two apheresis systems during hematopoietic progenitor stem cell collections at a tertiary medical center) … p.6462

Oncology - Pancreatic Cancer. Researchers at Case Western Reserve University Report New Data on Pancreatic Cancer (The role of neoadjuvant therapy in pancreatic cancer: a review) … p.6463

Hormones - Gastrointestinal Hormones. Researchers at Cedars–Sinai Medical Center Release New Data on Gastrointestinal Hormones (Simultaneous blockade of interacting CK2 and EGFR pathways by tumor–targeting nanobioconjugates increases therapeutic efficacy against glioblastoma …) … p.6463

Bone Research. Researchers at Center for Regenerative Therapies Dresden Release New Data on Bone Research (Increased EPO Levels Are Associated With Bone Loss in Mice Lacking PHD2 in EPO–Producing Cells) … p.6465
Restenosis. Researchers at Central Hospital Report Findings in Restenosis (Paclitaxel–coated balloon catheter compared with drug–eluting stent for drug–eluting stent restenosis in routine clinical practice) ... p.6466

Oncology - Lung Cancer. Researchers at Central Hospital Target Lung Cancer (Drug interaction between erlotinib and phenytoin for brain metastases in a patient with nonsmall cell lung cancer) ... p.6467

Oncology - Gastric Cancer. Researchers at Central South University Discuss Findings in Gastric Cancer (Repertaxin, an inhibitor of the chemokine receptors CXCR1 and CXCR2, inhibits malignant behavior of human gastric cancer MKN45 cells in vitro and in vivo and enhances ...) ... p.6468

Oncology - Liver Cancer. Researchers at Central South University Target Liver Cancer (Hypoxia–induced NIPP1 activation enhances metastatic potential and predicts poor prognosis in hepatocellular carcinoma) ... p.6469

Biomedical Engineering - Tissue Engineering. Researchers at Changchun Institute of Applied Chemistry Have Reported New Data on Tissue Engineering (Injectable Polypeptide Hydrogels with Tunable Microenvironment for 3D Spreading and Chondrogenic Differentiation of Bone–Marrow–Derived ...) ... p.6470

Oncology - Liver Cancer. Researchers at Changhua Christian Hospital Detail Findings in Liver Cancer (Dioscorea nipponica Attenuates Migration and Invasion by Inhibition of Urokinase–Type Plasminogen Activator through Involving PI3K/Akt and Transcriptional Inhibition of ...) ... p.6471

Oncology - Pancreatic Cancer. Researchers at Chiba University Report Findings in Pancreatic Cancer (Low Stromal Area and High Stromal Microvessel Density Predict Poor Prognosis in Pancreatic Cancer) ... p.6472

Clinical Research - Clinical Trials and Studies. Researchers at China Academy of Chinese Medical Sciences Have Reported New Data on Clinical Trials and Studies (Acupuncture for Smoking Cessation in Hong Kong: A Prospective Multicenter Observational Study) ... p.6473

Oncology - Breast Cancer. Researchers at China Medical University and Hospital Detail Findings in Breast Cancer (Lapatinib increases motility of triple–negative breast cancer cells by decreasing miRNA–7 and inducing Raf–1/MAPK–dependent interleukin–6) ... p.6474

Apoptosis. Researchers at China Pharmaceutical University Report New Data on Apoptosis (Effect of CPU–XT–008, a combretastatin A–4 analogue, on the proliferation, apoptosis and expression of vascular endothelial growth factor and basic fibroblast growth factor and basic fibroblast growth ...) ... p.6475

Clinical Research - Clinical Trials and Studies. Researchers at Chinese Academy of Medical Sciences Report Findings in Clinical Trials and Studies (Open three–stage transthoracic oesophagostomy versus minimally invasive thoraco–laparoscopic oesophagectomy for oesophageal cancer: protocol for ...) ... p.6476

Biological Factors - Porphyrins. Researchers at Chinese Academy of Medical Sciences Report Findings in Porphyrins (Real–Time Fluorescence Tracking of Protoporphyrin Incorporated Thermosensitive Hydrogel and Its Drug Release in Vivo) ... p.6477
January 14, 2017

Inflammation. Researchers at Columbia University Have Reported New Data on Inflammation (A Novel Link between Inflammation and Cancer) … p.6480

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at Creighton University School of Medicine Release New Data on Type 2 Diabetes (FOXO1 Mediates Vitamin D Deficiency–Induced Insulin Resistance in Skeletal Muscle) … p.6481

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. Researchers at Cukurova University Report New Data on Metabolic Syndrome (Carotid Intima–Media Thickness as the Cardiometabolic Risk Indicator in Patients with Nonfunctional Adrenal Mass and Metabolic Syndrome Screening) … p.6482

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at Daiichi Sankyo Have Reported New Data on Type 2 Diabetes (A thorough QTc study demonstrates that olmesartan medoxomil does not prolong the QTc interval) … p.6483

Kidney Diseases and Conditions - Chronic Kidney Disease. Researchers at Daini Hospital Target Chronic Kidney Disease (Association between 1,25–dihydroxyvitamin D and left atrial diameter in pre–dialysis chronic kidney disease patients) … p.6484

Oncology - Acute Leukemia. Researchers at Department of Hematology Release New Data on Acute Leukemia (Influence of pre–existing invasive aspergillosis on allo–HSCT outcome: a retrospective EBMT analysis by the Infectious Diseases and Acute Leukemia Working Parties) … p.6485

Oncology - Cancer Risk. Researchers at Department of Oral Pathology Discuss Findings in Cancer Risk (Role of podoplanin in potentially malignant disorders and oral squamous cell carcinoma and its correlation with lymphangiogenesis) … p.6486

Health and Medicine - Medical Research. Researchers at Department of Pediatrics Have Reported New Data on Medical Research [The FTO rs9939609 and LEPR rs1137101 mothers–newborns gene polymorphisms and maternal fat mass index effects on anthropometric characteristics in newborns A …] … p.6487

Drugs and Therapies - Drug Delivery Systems. Researchers at Department of Pharmaceuticals Target Drug Delivery Systems (Citric acid crosslinked cyclodextrin/hydroxypropylmethylcellulose hydrogel films for hydrophobic drug delivery) … p.6488

Immune System Diseases and Conditions - HIV/AIDS. Researchers at Department of Pharmacology Target HIV/AIDS (Prime, Shock, and Kill: Priming CD4 T Cells from HIV Patients with a BCL–2 Antagonist before HIV Reactivation Reduces HIV Reservoir Size) … p.6489
Immunology - Lymphoid Tissue. Researchers at Department of Respiratory Release New Data on Lymphoid Tissue (Endobronchial Ultrasound Elastography for Diagnosing Mediastinal and Hilar Lymph Nodes) ... p.6490

Gram-Negative Bacteria - Pseudomonas syringae. Researchers at Department of Soil Microbiology and Symbiotic Systems Target Pseudomonas syringae (AmrZ regulates cellulose production in Pseudomonas syringae pv. tomato DC3000) ... p.6491

Oncology - Acute Myeloid Leukemia. Researchers at Department of Specialty Medicine Target Acute Myeloid Leukemia (Stem Cell Modeling of Core Binding Factor Acute Myeloid Leukemia) ... p.6492

Clinical Trials and Studies - Post-Trial Research. Researchers at Department of Surgery Detail Findings in Post–Trial Research (The relationship between serum vitamin D and chronic rhinosinusitis: A systematic review) ... p.6493

Drugs and Therapies - Heparin Therapy. Researchers at Department of Veterans Affairs Target Heparin Therapy (Specific endothelial heparin–binding EGF–like growth factor deletion ameliorates renal injury induced by chronic angiotensin II infusion) ... p.6494

Cardiovascular Diseases and Conditions - Hypertension. Researchers at Drexel University Target Hypertension (Changes in the prevalence of hospitalization and comorbidity in US adults with stroke: A three decade cross–sectional and birth cohort analysis) ... p.6495

Oncology - Liver Cancer. Researchers at Edith Cowan University Release New Data on Liver Cancer (Nurse–led hepatocellular carcinoma surveillance clinic provides an effective method of monitoring patients with cirrhosis) ... p.6496

Drugs and Therapies - Vancomycin Resistance. Researchers at Edouard Herriot Hospital Report Findings in Vancomycin Resistance (Outbreaks of Vancomycin–Resistant Enterococci in Hospital Settings: A Systematic Review and Calculation of the Basic Reproductive Number) ... p.6497

Hemophilia. Researchers at Erasmus University Medical Center Release New Data on Hemophilia (Perioperative treatment of hemophilia A patients: blood group O patients are at risk of bleeding complications) ... p.6498

Blood Pressure. Researchers at FUMEC University Report New Data on Blood Pressure (Methods for reliable estimation of pulse transit time and blood pressure variations using smartphone sensors) ... p.6499

Lung Diseases and Conditions - Asthma. Researchers at Federal University Have Reported New Data on Asthma (The tyrosine kinase inhibitor dasatinib reduces lung inflammation and remodelling in experimental allergic asthma) ... p.6502

Granulosa Cells. Researchers at Federal University Have Reported New Data on Granulosa Cells (Protein expression in human cumulus cells as an indicator of blastocyst formation and pregnancy success) ... p.6503

Hormones. Researchers at First Affiliated Hospital Release New Data on Hormones (Melatonin inhibits AP–2b/hTERT, NF–kB/COX–2 and Akt/ERK and activates caspase/Cyto C signaling to enhance the antitumor activity of berberine in lung cancer cells) ... p.6504
Oncology - Pancreatic Cancer.
Researchers at Florida Hospital Release New Data on Pancreatic Cancer (Intraprocedural increase in heart rate during EUS–guided celiac plexus neurolysis: Clinically relevant or just a physiologic change?) … p.6505

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.
Researchers at Florida International University Have Reported New Data on Type 2 Diabetes (Biologic activity of cyclic and caged phosphates: a review) … p.6506

Heart Disorders and Diseases - Heart Failure. Researchers at Florida International University Target Heart Failure (Left ventricular area on non–contrast cardiac computed tomography as a predictor of incident heart failure The Multi–Ethnic Study of Atherosclerosis) … p.6507

Lung Diseases and Conditions - Pulmonary Hypertension.
Researchers at Fourth Military Medical University Report New Data on Pulmonary Hypertension (Role of dynorphin in hypoxic pulmonary hypertension) … p.6508

Oncology - Glioblastomas. Researchers at Fourth Military Medical University Target Glioblastomas (Toosendanin Exerts an Anti–Cancer Effect in Glioblastoma by Inducing Estrogen Receptor beta–and p53–Mediated Apoptosis) … p.6509

Oncology - Cancer Epidemiology.
Researchers at Free University Have Reported New Data on Cancer Epidemiology (Quantitative and qualitative assessment of real world data comparative effectiveness research of systemic therapies in lung oncology: A systematic review) … p.6510

Oncology - Chronic Myelomonocytic Leukemia. Researchers at French National Institute of Health and Medical Research (INSERM) Describe Findings in Chronic Myelomonocytic Leukemia (Mutation allele burden remains unchanged in chronic myelomonocytic leukaemia responding to hypomethylating ...) … p.6511

Oncology - Liver Cancer. Researchers at Fudan University Describe Findings in Liver Cancer (Shizukaol D, a Dimeric Sesquiterpene Isolated from Chloranthus serratus, Represses the Growth of Human Liver Cancer Cells by Modulating Wnt Signalling Pathway) … p.6513

Oncology - Pancreatic Cancer.
Researchers at Fudan University Discuss Findings in Pancreatic Cancer (Nab–Paclitaxel Plus S–1 Shows Increased Antitumor Activity in Patient–Derived Pancreatic Cancer Xenograft Mouse Models) … p.6514

Heart Disorders and Diseases - Atrial Fibrillation. Researchers at Fudan University Release New Data on Atrial Fibrillation (Contact force–guided catheter ablation for the treatment of atrial fibrillation: a meta–analysis of randomized, controlled trials) … p.6515

Chemistry - Cell Biochemistry.
Researchers at Fudan University Release New Data on Cell Biochemistry (Imbalance of Th17/Treg in Different Subtypes of Autoimmune Thyroid Diseases) … p.6516
Oncology - Gliomas. Researchers at Fudan University Release New Data on Gliomas (Amino Acid Metabolism Abnormality and Microenvironment Variation Mediated Targeting and Controlled Glioma Chemotherapy) … p.6517

Oncology - Cancer Risk. Researchers at Fudan University Report New Data on Cancer Risk (Protective effect of mild endoplasmic reticulum stress on radiation-induced bystander effects in hepatocyte cells) … p.6518

Transplant Medicine - Cell Transplants. Researchers at Fundeni Clinical Institute Have Reported New Data on Cell Transplants (Haploidentical Donors: Can Faster Transplantation Be Life-Saving for Patients with Advanced Disease?) … p.6519

Drugs and Therapies - Clinical Therapeutics. Researchers at General Hospital Report New Data on Clinical Therapeutics (Nemonoxacin has potent activity against gram-positive, but not gram-negative clinical isolates) … p.6520

Bone Research. Researchers at Goethe-University Have Reported New Data on Bone Research (Low-dose irradiation prior to bone marrow transplantation results in ATM activation and increased lethality in Atm-deficient mice) … p.6520

Oncology - Non-Small Cell Lung Cancer. Researchers at Graduate School of Medicine Report New Data on Non-Small Cell Lung Cancer (miR–200/ZEB axis regulates sensitivity to nintedanib in non-small cell lung cancer cells) … p.6521

Apoptosis. Researchers at Guilin Medical University Report New Data on Apoptosis (Bauhinia championii Flavone Attenuates Hypoxia-Reoxygenation Induced Apoptosis in H9c2 Cardiomyocytes by Improving Mitochondrial Dysfunction) … p.6523

www.NewsRx.com

Clinical Trial Research. Researchers at Hallym University Report Findings in Clinical Trial Research (PLK–1 Targeted Inhibitors and Their Potential against Tumorigenesis) … p.6524

Oncology - Breast Cancer. Researchers at Harbin Medical University Describe Findings in Breast Cancer (Identifying the crosstalk of dysfunctional pathways mediated by IncRNAs in breast cancer subtypes) … p.6525

Drugs and Therapies - Antibiotics. Researchers at Hartford Hospital Release New Data on Antibiotics (Pharmacodynamic and pharmacokinetic profiling of delafloxacin in a murine lung model against community-acquired respiratory tract pathogens) … p.6526

Digestive System Diseases and Conditions - Eosinophilic Esophagitis. Researchers at Harvard School of Medicine Have Reported New Data on Eosinophilic Esophagitis (Allergic skin sensitization promotes eosinophilic esophagitis through the IL–33–basophil axis in mice) … p.6527

Proteins - Nucleoproteins. Researchers at Harvard School of Medicine Report New Data on Nucleoproteins (Toward development of epigenetic drugs for central nervous system disorders: Modulating neuroplasticity via H3K4 methylation) … p.6529

Cardiovascular Diseases and Conditions - Atherosclerosis. Researchers at Harvard School of Medicine Target Atherosclerosis (Dendritic Cell KLF2 Expression Regulates T Cell Activation and Proatherogenic Immune Responses) … p.6530
January 14, 2017

Heart Disorders and Diseases - Heart Attack. Researchers at Health Center Target Heart Attack (Sleep Disruption is Associated with Increased Ventricular Ectopy and Cardiac Arrest in Hospitalized Adults) ... p.6531

Myeloproliferative Diseases and Conditions - Polycythemia Vera. Researchers at Health Science Center Release New Data on Polycythemia Vera [Diagnosis and Management of Polycythemia Vera in a Ferret (Mustela putorius faro)] ... p.6532

Heart Disorders and Diseases - Acute Coronary Syndrome. Researchers at Heart Center Report New Data on Acute Coronary Syndrome (Cardiovascular Mortality in Chest Pain Patients: Comparison of Natriuretic Peptides With Novel Biomarkers of Cardiovascular Stress) ... p.6533

Hormones - Gastrointestinal Hormones. Researchers at Hebei Medical University Target Gastrointestinal Hormones (Cholecystokinin–8 inhibits methamphetamine–induced neurotoxicity via an anti–oxidative stress pathway) ... p.6534

Pharmacology. Researchers at Hebrew University Detail Findings in Pharmacology (Comparing Class A? GPCRs to bitter taste receptors: Structural motifs, ligand interactions and agonist–to–antagonist ratios) ... p.6535

Drugs and Therapies - Pharmaceutical Research. Researchers at Heinrich–Heine–University Target Pharmaceutical Research (Impact of sodium lauryl sulfate in oral liquids on e–tongue measurements) ... p.6536

Oncology - Prostate Cancer. Researchers at Henry Ford Hospital Target Prostate Cancer (Do Sociodemographic Factors Influence Outcome in Prostate Cancer Patients Treated With External Beam Radiation Therapy?) ... p.6537

www.NewsRx.com

Intercellular Signaling Peptides and Proteins - Cytokines. Researchers at Hiroasaki University School of Medicine Have Reported New Data on Cytokines (Interferon–Stimulated Gene 15, a Type I Interferon–Dependent Transcript, Is Involved in a Negative Feedback Loop in Innate Immune Reactions in Human ...) ... p.6538

Peptide Proteins - Proinsulin. Researchers at Hiroshima University Have Reported New Data on Proinsulin (Metabolomic profiling reveals differential effects of glucagon–like peptide–1 and insulin on nutrient partitioning in ovine liver) ... p.6539

Amyotrophic Lateral Sclerosis. Researchers at Hokkaido University Release New Data on Amyotrophic Lateral Sclerosis (Interaction of RNA with a C–terminal fragment of the amyotrophic lateral sclerosis–associated TDP43 reduces cytotoxicity) ... p.6540

Biotechnology - Liposomes. Researchers at Hokkaido University Release New Data on Liposomes (Topology of Surface Ligands on Liposomes: Characterization Based on the Terms, Incorporation Ratio, Surface Anchor Density, and Reaction Yield) ... p.6541

Digestive System Diseases and Conditions - Colitis. Researchers at Hong Kong Baptist University Detail Findings in Colitis (Addition of Berberine to 5–Aminosalicylic Acid for Treatment of Dextran Sulfate Sodium–Induced Chronic Colitis in C57BL/6 Mice) ... p.6542

Digestive System Diseases and Conditions - Cholecystitis. Researchers at Hospital Italiano Release New Data on Cholecystitis [Protocol for extended antibiotic therapy after laparoscopic cholecystectomy for acute calculous cholecystitis (Cholecystectomy Antibiotic Randomised Trial, CHART)] ... p.6543
January 14, 2017

Transplant Medicine - Liver Transplants. Researchers at Hospital Universitario 12 de Octubre Target Liver Transplants (Trabecular bone score in patients with liver transplants after 1 year of risendronate treatment) … p.6544

Health and Medicine - Urology. Researchers at Human Oncology and Pathogenesis Program Have Reported New Data on Urology (A river model to map convergent cancer evolution and guide therapy in RCC) … p.6545

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. Researchers at Imperial College Target Inflammatory Bowel Disease (Dendritic Cell–T–Cell Circuitry in Health and Changes in Inflammatory Bowel Disease and Its Treatment) … p.6546

Drugs and Therapies - Pharmacoepidemiology. Researchers at Imperial College Target Pharmacoepidemiology (Literature review of visual representation of the results of benefit–risk assessments of medicinal products) … p.6547

Chemistry. Researchers at Indian Institute of Technology Have Reported New Data on Chemistry (Metal Ion Ornamented Ultrafast Light–Sensitive Nanogel for Potential in Vivo Cancer Therapy) … p.6548

Hormones - Estradiol Congeners. Researchers at Institute of Burn Research Release New Data on Estradiol Congeners (Estrogen Accelerates Cutaneous Wound Healing by Promoting Proliferation of Epidermal Keratinocytes via Erk/Akt Signaling Pathway) … p.6549

Nanotechnology - Nanoparticles. Researchers at Institute of Polymer Science and Technology Target Nanoparticles (Mitochondrially Targeted Nanoparticles Based on a–TOS for the Selective Cancer Treatment) … p.6550

www.NewsRx.com

Neuroinflammation. Researchers at Institute of Science and Technology Discuss Findings in Neuroinflammation (Extracts from Dendropanax morbifera Leaves Have Modulatory Effects on Neuroinflammation in Microglia) … p.6551

Mycobacterium Infections - Tuberculosis. Researchers at International Center for Genetic Engineering and Biotechnology Target Tuberculosis (Global Urine Metabolomics in Patients Treated with First–Line Tuberculosis Drugs and Identification of a Novel Metabolite of Ethambutol) … p.6552

Biotechnology - Genomics. Researchers at Iwate University Target Genomics (Effects of dietary forage and calf starter on ruminal pH and transcriptomic adaptation of the rumen epithelium in Holstein calves during the weaning transition) … p.6553

Heart Disorders and Diseases - Atrial Fibrillation. Researchers at Jikei University Target Atrial Fibrillation (Filling defects of the left atrial appendage on multidetector computed tomography: their disappearance following catheter ablation of atrial fibrillation and the detection of LAA ...) … p.6554

Drugs and Therapies - Antiepileptics. Researchers at Jilin University Report Findings in Antiepileptics (Simultaneous determination of ten antiepileptic drugs in human plasma by liquid chromatography and tandem mass spectrometry with positive/negative ion–switching electrospray ...) … p.6556

Cystic Fibrosis. Researchers at Johns Hopkins University Have Reported New Data on Cystic Fibrosis (Sources of Variation in Sweat Chloride Measurements in Cystic Fibrosis) … p.6557
Peptide Proteins - Proinsulin. Researchers at Johns Hopkins University Report New Data on Proinsulin (The TORC1–activated Proteins, p70S6K and GRB10, Regulate IL–4 Signaling and M2 Macrophage Polarization by Modulating Phosphorylation of Insulin Receptor Substrate–2) … p.6558

Oncology - Solid Cancer. Researchers at Johns Hopkins University Target Solid Cancer (Association of PD–1/PD–L axis expression with cytolytic activity, mutational load, and prognosis in melanoma and other solid tumors) … p.6559

Oncology - Non–Small Cell Lung Cancer. Researchers at Juntendo University Target Non–Small Cell Lung Cancer (The impact on the prognosis of unsuspected N2 disease in non–small–cell lung cancer: indications for thorough mediastinal staging in the modern era) … p.6560

Bacterial RNA. Researchers at KIBBB Report New Data on Bacterial RNA (Bacterial RNAs activate innate immunity in Arabidopsis) … p.6561

Nervous System Diseases and Conditions - Seizures. Researchers at Kangwon National University School of Medicine Target Seizures (Inflammatory markers associated with seizures) … p.6562

Obstructive Sleep Apnea. Researchers at Kaohsiung Chang Gung Memorial Hospital Target Obstructive Sleep Apnea (Whole Genome DNA Methylation Analysis of Obstructive Sleep Apnea: IL1R2, NPR2, AR, SP140 Methylation and Clinical Phenotype) … p.6563

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Researchers at Karolinska University Hospital Discuss Findings in Rheumatoid Arthritis (Is rheumatoid arthritis an autoimmune disease?) … p.6564

Heart Disorders and Diseases - Heart Failure. Researchers at Karolinska University Hospital Have Reported New Data on Heart Failure (Cardioprotection and lifespan extension by the natural polyamine spermidine) … p.6565

Oncology - Kidney Cancer. Researchers at Keimyung University Report Findings in Kidney Cancer (Galangin sensitizes TRAIL–induced apoptosis through down–regulation of anti–apoptotic proteins in renal carcinoma Caki cells) … p.6566

Nutritional and Metabolic Diseases and Conditions - Diabetic Nephropathy. Researchers at King Saud University Report New Data on Diabetic Nephropathy (Ruboxistaurin attenuates diabetic nephropathy via modulation of TGF–b1/Smad and GRAP pathways) … p.6567

Neuropathic Pain. Researchers at Kitasato University School of Medicine Target Neuropathic Pain (Elevation of Microglial Basic Fibroblast Growth Factor Contributes to Development of Neuropathic Pain after Spinal Nerve Ligation in Rats) … p.6569

Angiogenesis. Researchers at Kobe University Report New Data on Angiogenesis (PKN3 is the major regulator of angiogenesis and tumor metastasis in mice) … p.6570

Diarylheptanoids. Researchers at Konkuk University Have Reported New Data on Diarylheptanoids (Complexation of curcumin with 2–aminoethyl diphenyl borate and implications for spatiotemporal fluorescence monitoring) … p.6571
January 14, 2017

Hematology - Plasma. Researchers at Korea Basic Science Institute Target Plasma [Investigation of relative metabolic changes in the organs and plasma of rats exposed to X–ray radiation using HR–MAS (1)H NMR and solution (1)H NMR] ... p.6572

Oncology - Liver Cancer. Researchers at Korea University School of Medicine Target Liver Cancer (The management and prognosis of patients with hepatocellular carcinoma: what has changed in 20 years?) ... p.6573

Aromatic Amino Acids. Researchers at Kumamoto University Target Aromatic Amino Acids (Nuclear magnetic resonance analysis of the conformational state of cancer mutant of fibroblast growth factor receptor 1 tyrosine kinase domain) ... p.6574

Apoptosis. Researchers at Kyung Hee University Release New Data on Apoptosis (Blockage of STAT3 Signaling Pathway by Morusin Induces Apoptosis and Inhibits Invasion in Human Pancreatic Tumor Cells) ... p.6575

Macropinocytosis. Researchers at Lanzhou Veterinary Research Institute Target Macropinocytosis (Productive Entry of Foot–and–Mouth Disease Virus via Macropinocytosis Independent of Phosphatidylinositol 3–Kinase) ... p.6576

DNA Research. Researchers at Lipscomb University Release New Data on DNA Research [Examination of the Impact of Copper(II) a–(N)–Heterocyclic Thiosemicarbazone Complexes on DNA Topoisomerase IIa] ... p.6577

Oncology - Prostate Cancer. Researchers at Lister Hospital Release New Data on Prostate Cancer [The Role of Positron Emission Tomography With (68)Gallium (Ga)–Labeled Prostate–specific Membrane Antigen (PSMA) in the Management of Patients With Organ–confined and Locally ...] ... p.6578

www.NewsRx.com

Oncology - Leukemia. Researchers at Loma Linda University School of Medicine Target Leukemia (Fine–tuning patient–derived xenograft models for precision medicine approaches in leukemia) ... p.6579

Nutritional and Metabolic Diseases and Conditions - Hypertriglyceridemia. Researchers at Los Angeles Biomedical Research Institute Detail Findings in Hypertriglyceridemia (Effects of eicosapentaenoic acid and docosahexaenoic acid on lipoproteins in hypertriglyceridemia) ... p.6580

Lung Diseases and Conditions - Asthma. Researchers at Lund University Release New Data on Asthma (Osteopontin binds and modulates functions of eosinophil–recruiting chemokines) ... p.6581

Intracellular Signaling Peptides and Proteins - Apoptosis Regulatory Proteins. Researchers at M.D. Anderson Cancer Center Target Apoptosis Regulatory Proteins (Genetic characterization of two gain–of–function alleles of the effector caspase DrICE in Drosophila) ... p.6582

Implantable Cardioverter Defibrillator. Researchers at Marche Polytechnic University Report New Data on Implantable Cardioverter Defibrillator [Implantable cardioverter–defibrillator programming and electrical storm: Results of the OBSERVational registry On long–term outcome of ICD ...] ... p.6583

Atrial Fibrillation. Researchers at Massachusetts General Hospital Have Reported New Data on Atrial Fibrillation (Atrial Fibrillation Genetics: Is There a Practical Clinical Value Now or in the Future?) ... p.6584
January 14, 2017

Nanotechnology and Microtechnology. Researchers at Massachusetts General Hospital Have Reported New Data on Nanotechnology and Microtechnology (A Size–Selective Intracellular Delivery Platform) … p.6585

RNA Viruses - Mosaic Viruses. Researchers at Massachusetts Institute of Technology Release New Data on Mosaic Viruses (Tobacco Mosaic Virus Delivery of Phenanthriplatin for Cancer therapy) … p.6586

Cardiovascular Diseases and Conditions - Aneurysm. Researchers at Mayo Clinic Have Reported New Data on Aneurysm (Clinical interpretation of high–resolution vessel wall MRI of intracranial arterial diseases) … p.6587

Oncology. Researchers at Mayo Clinic Release New Data on Oncology (Chromoplectic TPM3–ALK rearrangement in a patient with inflammatory myofibroblastic tumor who responded to ceritinib after progression on crizotinib) … p.6588

Genetics - DNA Research. Researchers at Mayo Clinic Report New Data on DNA Research (Epigenetic Studies Point to DNA Replication/Repair Genes as a Basis for the Heritable Nature of Long Term Complications in Diabetes) … p.6589

Neurodegenerative Diseases and Conditions - Dementia. Researchers at Mayo Graduate School Release New Data on Dementia (MAPT haplotype H1G is associated with increased risk of dementia with Lewy bodies) … p.6590

Oncology - Cancer Research. Researchers at Medical College Release New Data on Cancer Research (Increasing Role of Image–Guided Ablation in the Treatment of Musculoskeletal Tumors) … p.6592

Opioid Dependence. Researchers at Medical University Report Findings in Opioid Dependence (DISC1 as a Possible Genetic Contribution to Opioid Dependence in a Polish Sample) … p.6593

Transplant Medicine - Liver Transplants. Researchers at Medical University Report New Data on Liver Transplants (The use of nonsteroidal anti–inflammatory drugs and analgesics by liver transplant recipients) … p.6594

Enzymes and Coenzymes. Researchers at Medical University Target Enzymes and Coenzymes (Effect of Evodiamine on CYP Enzymes in Rats by a Cocktail Method) … p.6595

Heart Disorders and Diseases - Heart Attack. Researchers at Medical University Target Heart Attack (Interindividual variability of atorvastatin treatment influence on the MPO gene expression in patients after acute myocardial infarction) … p.6596

Oncology - Multiple Myeloma. Researchers at Medical University of South Carolina Report New Data on Multiple Myeloma (Systemic therapy with oncolytic myxoma virus cures established residual multiple myeloma in mice) … p.6597

Oncology - Head and Neck Cancer. Researchers at Memorial Hospital Detail Findings in Head and Neck Cancer (Efficacy of second–line erlotinib in patients postprogression of first–line chemotherapy in head and neck cancers) … p.6598

www.NewsRx.com
Oncology - Angiosarcomas. Researchers at Memorial Sloan–Kettering Cancer Center Target Angiosarcomas (Targeted massively parallel sequencing of angiosarcomas reveals frequent activation of the mitogen activated protein kinase pathway) … p.6599

Trimethyl Ammonium Compounds. Researchers at Memorial Sloan–Kettering Cancer Center Target Trimethyl Ammonium Compounds (L–Carnitine for Treatment of Pegasparaginase–Induced Hepatotoxicity) … p.6600

Gram-Positive Bacteria - Clostridium difficile. Researchers at Merck & Company Have Reported New Data on Clostridium difficile (Disease Progression and Resolution in Rodent Models of Clostridium difficile Infection and Impact of Antitoxin Antibodies and Vancomycin) … p.6601

Oncology - Soft Tissue Sarcomas. Researchers at Mie University School of Medicine Have Reported New Data on Soft Tissue Sarcomas (The value of trabectedin in the treatment of soft tissue sarcoma) … p.6602

Herpesvirus Diseases and Conditions - Herpes Simplex Virus. Researchers at Mustafa Kemal University Have Reported New Data on Herpes Simplex Virus (Antiviral Activity of Hayat Propolis Against Replication of Herpes Simplex Virus Type 1 and Type 2) … p.6603

Heart Disorders and Diseases - Atrial Fibrillation. Researchers at Nagoya University Have Reported New Data on Atrial Fibrillation (An ECG Index of P–Wave Force Predicts the Recurrence of Atrial Fibrillation after Pulmonary Vein Isolation) … p.6604

Caenorhabditis elegans. Researchers at Nagoya University Target Caenorhabditis elegans (Chaperone complex BAG2–HSC70 regulates localization of Caenorhabditis elegans leucine–rich repeat kinase LRK–1 to the Golgi) … p.6605

Oncology. Researchers at Nanjing Medical University Report Findings in Oncology (Tumor–derived exosomes in cancer progression and treatment failure) … p.6606

Oncology - Multiple Myeloma. Researchers at Nantong University Discuss Findings in Multiple Myeloma (The role of ubiquitin–specific protease 14 (USP14) in cell adhesion–mediated drug resistance (CAM–DR) of multiple myeloma cells] … p.6606

Oncology - Epithelial Ovarian Cancer. Researchers at Nantong University Release New Data on Epithelial Ovarian Cancer (Expression of preoperative KISS1 gene in tumor tissue with epithelial ovarian cancer and its prognostic value) … p.6607

Connective Tissue Cells. Researchers at Nanyang Technological University Release New Data on Connective Tissue Cells (Conditional knockout of N–WASP in mouse fibroblast caused keratinocyte hyper proliferation and enhanced wound closure) … p.6608

Hematologic Diseases and Conditions - Sideroblastic Anemia. Researchers at National Center for Nanoscience and Technology Release New Data on Sideroblastic Anemia (Functional Analysis of GLRX5 Mutants Reveals Distinct Functionalities of GLRX5 Protein) … p.6609

Nutritional and Metabolic Diseases and Conditions - Acidosis. Researchers at National Central University Target Acidosis (Involvement of TRPV1 and TDAG8 in Pruriception Associated with Noxious Acidosis) … p.6610

Diabetes. Researchers at National Heart Lung and Blood Institute Target Diabetes (Identifying Probable Diabetes Mellitus Among Hispanics/latinos From Four Us Cities: Findings From The Hispanic Community Health Study/study Of Latinos) … p.6611
Oncology - Breast Cancer. Researchers at National Hospital Organization Target Breast Cancer (Impact of Expression of Vimentin and Axl in Breast Cancer) … p.6612

Autoimmune Diseases and Conditions - Guillain-Barré Syndrome. Researchers at National Hospital for Neurology and Neurosurgery Release New Data on Guillain–Barre Syndrome (Pharmacological treatment other than corticosteroids, intravenous immunoglobulin and plasma exchange for Guillain–Barre syndrome) … p.6614

Myeloid Cells. Researchers at National Institutes of Health Sciences Report New Data on Myeloid Cells (Cell Type–Specific Responses of Peripheral Blood CD14–Positive Monocytes to Liposome–Encapsulated Immunostimulatory siRNA) … p.6616

Liver Diseases and Conditions - Hepatitis C Virus. Researchers at National Sun Yat Sen University Target Hepatitis C Virus (Four weeks of paritaprevir/ritonavir/ombitasvir plus dasabuvir encountering dengue fever resulted in sustained virological response in an HCV patient A case report) … p.6617

Peptide Proteins - Proinsulin. Researchers at National University Report New Data on Proinsulin (Targeting genes in insulin–associated signalling pathway, DNA damage, cell proliferation and cell differentiation pathways by tocotrienol–rich fraction in preventing cellular …) … p.6618

Health and Medicine - Nuclear Medicine. Researchers at Netherlands Cancer Institute Discuss Findings in Nuclear Medicine (Intraoperative 3D Navigation for Single or Multiple 125I–Seed Localization in Breast–Preserving Cancer Surgery) … p.6619

Heart Disorders and Diseases - Heart Disease. Researchers at Northern Hospital Report New Data on Heart Disease (Radiation dose difference between state of the art myocardial perfusion scintigraphy and computed tomography coronary angiography in patients undergoing evaluation for suspected …) … p.6620

Drugs and Therapies - Genitourinary Tract Agents. Researchers at Northwick Park Hospital Report New Data on Genitourinary Tract Agents (The role of carbetocin in the prevention and management of postpartum haemorrhage) … p.6621

Inflammatory Bowel Diseases and Conditions - Ulcerative Colitis. Researchers at Norwegian University of Science and Technology (NTNU) Report Findings in Ulcerative Colitis (Expression of CCL20 and Its Corresponding Receptor CCR6 Is Enhanced in Active Inflammatory Bowel Disease, and TLR3 Mediates CCL20 …) … p.6621

Genetics - Human Genetics. Researchers at Ohio State University Have Reported New Data on Human Genetics (Noncoding RNA: Current Deep Sequencing Data Analysis Approaches and Challenges) … p.6623

Life Science Research - Molecular Oral Microbiology. Researchers at Ohio State University Have Reported New Data on Molecular Oral Microbiology (Periodontal and peri–implant diseases: identical or fraternal infections?) … p.6624
Biotechnology - Biologics. Researchers at Okayama University Target Biologics (Tumor–specific delivery of biologics by a novel T–cell line HOZOT) … p.6624

Digestive System Diseases and Conditions - Chronic Periodontitis. Researchers at Oral Health Center Report Findings in Chronic Periodontitis (Comparison of adjunctive azithromycin and amoxicillin/metronidazole for patients with chronic periodontitis: preliminary randomized control trial) … p.6625

Inflammation. Researchers at Osaka University Graduate School of Medicine Discuss Findings in Inflammation (Placental examination: prognosis after delivery of the growth–restricted fetus) … p.6626

Stem Cell Research. Researchers at Osaka University Graduate School of Medicine Report Findings in Stem Cell Research (A glycoproteomic approach to identify novel glycomarkers for cancer stem cells) … p.6627

Oncology - Breast Cancer. Researchers at Oxford Brookes University Release New Data on Breast Cancer (Breast cancer osteomimicry and its role in bone specific metastasis; an integrative, systematic review of preclinical evidence) … p.6628

Eye Diseases and Conditions - Optic Atrophy. Researchers at Paracelsus Medical University Report New Data on Optic Atrophy (Disturbed mitochondrial and peroxisomal dynamics due to loss of MFF causes Leigh–like encephalopathy, optic atrophy and peripheral neuropathy) … p.6629

Oncology - Neuroblastomas. Researchers at Pediatric Research Institute Have Reported New Data on Neuroblastomas (Combating autophagy is a strategy to increase cytotoxic effects of novel ALK inhibitor entrectinib in neuroblastoma cells) … p.6631

www.NewsRx.com

Oncology - Non-Small Cell Lung Cancer. Researchers at Peking Union Medical College Hospital Release New Data on Non–Small Cell Lung Cancer (Relationship between circulating tumour cell count and prognosis following chemotherapy in patients with advanced non–small–cell lung cancer) … p.6632

Oncology - Colon Cancer. Researchers at Peking Union Medical College Hospital Report Findings in Colon Cancer (Molecular spectrum of KRAS, NRAS, BRAF and PIK3CA mutations in Chinese colorectal cancer patients: analysis of 1,110 cases) … p.6633

Pheochromocytomas. Researchers at Peking Union Medical College Target Pheochromocytomas (The Roles of PI3K/AKT/mTOR and MAPK/ERK Signaling Pathways in Human Pheochromocytomas) … p.6634

Drugs and Therapies - Antipsychotics. Researchers at Peking University Describe Findings in Antipsychotics (A pharmacogenomic study revealed an association between SLC6A4 and risperidone–induced weight gain in Chinese Han population) … p.6635

Oncology - Esophageal Cancer. Researchers at People's Hospital Release New Data on Esophageal Cancer (miR–200a–3p promotes the proliferation of human esophageal cancer cells by post–transcriptionally regulating cytoplasmic collapsin response mediator protein–1) … p.6636
Skin Diseases and Conditions - Cutaneous Lupus Erythematosus. Researchers at Pfizer have reported new data on cutaneous lupus erythematosus. Monoclonal antibody against macrophage colony-stimulating factor suppresses circulating monocytes and tissue macrophage function but does not alter cell ... p.6637

Disease Attributes - Chronic Disease. Researchers at Public Health Agency of Canada describe findings in chronic disease. Advancing health equity to improve health: the time is now) p.6638

Acetanilides. Researchers at Qinghai University discuss findings in acetanilides. Pharmacokinetics of lidocaine hydrochloride metabolized by CYP3A4 in Chinese Han volunteers living at low altitude and in native Han and Tibetan Chinese volunteers living at ...) p.6639

Transplant Medicine - Kidney Transplants. Researchers at Queen Elizabeth Hospital target kidney transplants. Cardiovascular, muscular and perceptual contributions to physical fatigue in prevalent kidney transplant recipients) p.6640

Speech, Language and Learning Diseases and Conditions - Learning Disorders. Researchers at Radboud University Medical Center discuss findings in learning disorders. Healthy living according to adults with intellectual disabilities: towards tailoring health promotion initiatives) p.6641

Musculoskeletal Diseases and Conditions - Noonan Syndrome. Researchers at Radboud University target Noonan syndrome. Perceived motor problems in daily life: focus group interviews with people with Noonan syndrome and their relatives) p.6645

Oncology - Gastric Cancer. Researchers at Razi University have reported new data on gastric cancer. PlGF knockdown inhibited tumor survival and migration in gastric cancer cell via PI3K/Akt and p38MAPK pathways) p.6646

Parkinson’s Disease. Researchers at Research Foundation describe findings in Parkinson’s disease. Autophagy and alpha–synuclein: relevance to Parkinson’s disease and related synucleopathies) p.6647

Hematopoietic. Researchers at Research Institute have reported new data on hematopoietic. (Hematopoietic derived cells do not contribute to osteogenesis as osteoblasts) p.6650
Parkinson's Disease. Researchers at Research Institute Report New Data on Parkinson's Disease (Medical Management of Parkinson's Disease after Initiation of Deep Brain Stimulation) … p.6651

Skin Diseases and Conditions - Psoriasis. Researchers at Rockefeller University Report Findings in Psoriasis (A Randomized, Placebo–Controlled Study of SRT2104, a SIRT1 Activator, in Patients with Moderate to Severe Psoriasis) … p.6652

Oncology - Prostate Cancer. Researchers at Roswell Park Cancer Institute Target Prostate Cancer (Therapeutic Rationales, Progresses, Failures, and Future Directions for Advanced Prostate Cancer) … p.6653

Cardiology. Researchers at Rui Jin Hospital Target Cardiology (Aortic Artery and Cardiac Valve Calcification are Associated with Mortality in Chinese Hemodialysis Patients: A 3.5 Years Follow–up) … p.6653

Stem Cell Research. Researchers at Russian Federation Report New Data on Stem Cell Research (Regulation of Adipose Tissue Stem Cells Angiogenic Potential by Tumor Necrosis Factor–Alpha) … p.6655

Heart Valves. Researchers at San Carlo Hospital Release New Data on Heart Valves (Effective percutaneous "edge–to–edge" mitral valve repair with mitraclip in a patient with acute post–MI regurgitation not related to papillary muscle rupture) … p.6656

Genetics - Medical Genetics. Researchers at Sapienza–University Report New Data on Medical Genetics (Which BRCA genetic testing programs are ready for implementation in health care? A systematic review of economic evaluations) … p.6657

Oncology - Liver Cancer. Researchers at Sapporo Medical University Have Reported New Data on Liver Cancer (Insulin–like growth factor–related components and the risk of liver cancer in a nested case–control study) … p.6658

Drugs and Therapies - Chemical Biology and Drug Design. Researchers at School of Materials Science Target Chemical Biology and Drug Design (Chemical RNA Editing for Genetic Restoration: The Relationship between the Structure and Deamination Efficiency of Carboxyvinyleoxyuridine Oligodeoxynucleotides) … p.6659

Oncology - Kidney Cancer. Researchers at School of Medicine Detail Findings in Kidney Cancer (Comparative efficacy and safety of first–line treatments in patients with metastatic renal cell cancer: a network meta–analysis based on phase 3 RCTs) … p.6660

Lung Diseases and Conditions - Asthma. Researchers at School of Medicine Report Findings in Asthma (Polygonum multiflorum Decreases Airway Allergic Symptoms in a Murine Model of Asthma) … p.6661

Biological Factors - Eicosanoids. Researchers at School of Medicine Target Eicosanoids (Rostral Ventrolateral Medulla EP3 Receptor Mediates the Sympathoexcitatory and Pressor Effects of Prostaglandin E–2 in Conscious Rats) … p.6662

Life Science Research - Chemical Biology. Researchers at Scripps Research Institute Target Chemical Biology (Synthetic RORγt Agonists Enhance Protective Immunity) … p.6663

Oncology - Pancreatic Cancer. Researchers at Second Military Medical University Release New Data on Pancreatic Cancer (Association between vitamin A, retinol and carotenoid intake and pancreatic cancer risk: Evidence from epidemiologic studies) … p.6664
Heart Disorders and Diseases - Heart Failure. Researchers at Second Military Medical University Target Heart Failure (Blockade of receptor for advanced glycation end products protects against systolic overload–induced heart failure after transverse aortic constriction in mice) … p.6665

Hepatology - Liver Volume. Researchers at Semmelweis University Target Liver Volume (Identification of cofactors influencing hypertrophy of the future liver remnant after portal vein embolization–the effect of collaterals on embolized liver volume) … p.6666

Stroke. Researchers at Seoul National University Hospital Release New Data on Stroke (Novel echocardiographic indicator for potential cardioembolic stroke) … p.6667

Heart Disorders and Diseases - Heart Attack. Researchers at Seoul National University Target Heart Attack (The role of prehospital advanced airway management on outcomes for out–of–hospital cardiac arrest patients: a meta–analysis) … p.6668

Drugs and Therapies - Antineoplastics. Researchers at Shanghai Jiao–Tong University Have Reported New Data on Antineoplastics (Self–Delivery Nanoparticles of Amphiphilic Methotrexate–Gemcitabine Prodrug for Synergistic Combination Chemotherapy via Effect of Deoxyribonucleotide Pools) … p.6669

Drugs and Therapies - Antiretrovirals. Researchers at Sichuan University Report Findings in Antiretrovirals (Lack of Efficacy of Ulinastatin Therapy During Cardiopulmonary Bypass Surgery) … p.6670

Digestive System Diseases and Conditions - Gastrointestinal Neoplasms. Researchers at Sichuan University Target Gastrointestinal Neoplasms (A lower dosage of imatinib in patients with gastrointestinal stromal tumors with toxicity of the treatment) … p.6671

Lung Diseases and Conditions - Pulmonary Hypertension. Researchers at Soochow University Release New Data on Pulmonary Hypertension (Risk factors for pulmonary hypertension in patients receiving maintenance peritoneal dialysis) … p.6672

Oncology - Colon Cancer. Researchers at Southern Medical University Report New Data on Colon Cancer (Analysis of the predictive efficiency of MOP on adverse prognosis and the pathogenesis of S100P–mediated invasion and metastasis of colon adenocarcinoma) … p.6673

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at Southern Medical University Report New Data on Obesity (The effects of resveratrol intervention on risk markers of cardiovascular health in overweight and obese subjects: a pooled analysis of randomized controlled trials) … p.6674

Oncology - Liver Cancer. Researchers at Stanford University Hospital Target Liver Cancer (Hepatocellular Carcinoma Screening and Surveillance: Practice Guidelines and Real–Life Practice) … p.6676
January 14, 2017

Digestive System Diseases and Conditions - Colitis. Researchers at State University of New York Release New Data on Colitis (Alkaline ceramidase 3 deficiency aggravates colitis and colitis–associated tumorigenesis in mice by hyperactivating the innate immune system) … p.6677

Hematology - Blood Coagulation Factors. Researchers at State University of New York Upstate Medical University Report New Data on Blood Coagulation Factors (Fibrinogen Reduction and Motor Function Improvement by Hematopoietic Growth Factor Treatment in Chronic Stroke in Aged Mice: A ...) … p.6678

Drugs and Therapies - Chemotherapy. Researchers at Sun Yat–Sen University Cancer Center Report New Data on Chemotherapy (The effect of chemotherapy on programmed cell death 1/programmed cell death 1 ligand axis: some chemotherapeutical drugs may finally work through immune ...) … p.6680

Oncology - Lung Cancer. Researchers at Sun Yat–Sen University Have Reported New Data on Lung Cancer (Aberrantly expressed miR–582–3p maintains lung cancer stem cell–like traits by activating Wnt/b–catenin signalling) … p.6681

Drugs and Therapies - Drug Targets. Researchers at Sun Yat–Sen University Target Drug Targets (Chemical Structure Similarity Search for Ligand–based Virtual Screening: Methods and Computational Resources) … p.6682

www.NewsRx.com

Oncology - Gastric Cancer. Researchers at Sungkyunkwan University School of Medicine Target Gastric Cancer [Prospective phase II trial of pazopanib plus CapeOX (capecitabine and oxaliplatin) in previously untreated patients with advanced gastric cancer] … p.6683

Peptide Proteins - Peptide Hormones. Researchers at Taipei Medical University Have Reported New Data on Peptide Hormones (B–Type Natriuretic Peptide Modulates Pulmonary Vein Arrhythmogenesis: A Novel Potential Contributor to the Genesis of Atrial Tachyarrhythmia in Heart Failure) … p.6684

Stem Cell Research - Mesenchymal Stem Cells. Researchers at Tarbiat Modares University Release New Data on Mesenchymal Stem Cells (Inhibition of breast tumor growth and abnormal angiogenesis in mice treated with endothelial cells and their progenitor mesenchymal stem cells derived from ...) … p.6685

Biological Factors - Biological Pigments. Researchers atTechnical University Target Biological Pigments (Stress responses of human retinal pigment epithelial cells to glyoxal) … p.6687

Hormones. Researchers at Third Military Medical University Report New Data on Hormones (Melatonin prevents abnormal mitochondrial dynamics resulting from the neurotoxicity of cadmium by blocking calcium–dependent translocation of Drp1 to the mitochondria) … p.6688
January 14, 2017

Genetic Diseases and Conditions - Down Syndrome. Researchers at Third Military Medical University Target Down Syndrome (Two kinds of common prenatal screening tests for Down's syndrome: a systematic review and meta-analysis) ... p.6689

Autoimmune Diseases and Conditions - Multiple Sclerosis. Researchers at Tianjin Medical University General Hospital Target Multiple Sclerosis (Expression Profile of Long Noncoding RNAs in Peripheral Blood Mononuclear Cells from Multiple Sclerosis Patients) ... p.6690

Blood Diseases and Conditions - Sepsis. Researchers at Tianjin Medical University Report New Data on Sepsis (Clinical prognostic factors for time to positivity in cancer patients with bloodstream infections) ... p.6691

Transport Vesicles. Researchers at Tianjin University Target Transport Vesicles (Blood Exosomes Endowed with Magnetic and Targeting Properties for Cancer Therapy) ... p.6693

Immune System Diseases and Conditions - Autoimmune Diseases and Conditions. Researchers at Tokyo Medical and Dental University Report New Data on Autoimmune Diseases and Conditions [Intravital imaging of Ca (2+) signals in lymphocytes of Ca(2+) biosensor transgenic mice: indication of autoimmune diseases before the ...] ... p.6694

Immune System Diseases and Conditions - HIV/AIDS. Researchers at Tokyo Medical and Dental University Report New Data on HIV/AIDS (Fate of HIV–1 cDNA intermediates during reverse transcription is dictated by transcription initiation site of virus genomic RNA) ... p.6695

Heart Disorders and Diseases - Pericardial Effusion. Researchers at Tufts Medical Center Have Reported New Data on Pericardial Effusion (Pericarditis and Pericardial Effusions in End–Stage Renal Disease) ... p.6696

Peptides and Proteins. Researchers at Tufts University Have Reported New Data on Peptides and Proteins (Proteomic analysis of the gamma human papillomavirus type 197 E6 and E7 associated cellular proteins) ... p.6697

Cardiology. Researchers at Turgut Ozal University Report New Data on Cardiology (Potential beneficial effects of foot bathing on cardiac rhythm) ... p.6697

Liver Diseases and Conditions - Hepatitis. Researchers at Turkiye Yuksek Ihtisas Hospital Have Reported New Data on Hepatitis (Long term efficacy of pegylated interferone in the treatment of delta hepatitis: a single center experience) ... p.6698

Drugs and Therapies - Antibiotics. Researchers at United States Navy Report New Data on Antibiotics (Prevalence of Quinolone Resistance in Enterobacteriaceae from Sierra Leone and the Detection of qnrB Pseudogenes and Modified LexA Binding Sites) ... p.6699

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Researchers at University College Detail Findings in Rheumatoid Arthritis (Rheumatoid Arthritis and Incidence of Twelve Initial Presentations of Cardiovascular Disease: A Population Record–Linkage Cohort Study in England) ... p.6700

Oncology - Cancer Research. Researchers at University College Report Findings in Cancer Research (PARP inhibitors in ovarian cancer: Clinical evidence for informed treatment decisions) ... p.6701
Heart Disorders and Diseases - Endocarditis. Researchers at University Hospital Describe Findings in Endocarditis (Incidence and clinical impact of infective endocarditis after transcatheater aortic valve implantation) … p.6702

Kidney Diseases and Conditions - Chronic Kidney Disease. Researchers at University Hospital Discuss Findings in Chronic Kidney Disease [Baseline Characteristics and Prescription Patterns of Standard Drugs in Patients with Angiographically Determined Coronary Artery Disease and Renal Failure (CAD–REF …)] … p.6703

Mammary Gland Biology and Neoplasia. Researchers at University Hospital Have Reported New Data on Mammary Gland Biology and Neoplasia (Epithelial Plasticity During Human Breast Morphogenesis and Cancer Progression) … p.6704

Heart Disorders and Diseases - Heart Disease. Researchers at University Hospital Release New Data on Heart Disease (Assessing the cardiology community position on transradial intervention and the use of bivalirudin in patients with acute coronary syndrome undergoing invasive management: …) … p.6705

Parkinson's Disease. Researchers at University Hospital Release New Data on Parkinson's Disease (DAT imaging and clinical biomarkers in relatives at genetic risk for LRRK2 R1441G Parkinson's disease) … p.6706

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Researchers at University Hospital Release New Data on Venous Thromboembolism (Thrombin Generation Assay in Hospitalized Nonsurgical Patients: A New Tool to Assess Venous Thromboembolism Risk?) … p.6707

www.NewsRx.com

Oncology - Prostate Cancer. Researchers at University Hospital Report Findings in Prostate Cancer (Adaptive responses of androgen receptor signaling in castration–resistant prostate cancer) … p.6708

Neuroscience - Neurochemistry. Researchers at University Hospital Report New Data on Neurochemistry (The mitochondrial kinase PINK1: functions beyond mitophagy) … p.6709

Cardiovascular Diseases and Conditions - Aneurysm. Researchers at University Hospital Target Aneurysm (Management of true visceral artery aneurysms in 31 cases) … p.6710

Drugs and Therapies - Antiretrovirals. Researchers at University Hospital Target Antiretrovirals (Treatment of autochthonous acute hepatitis E with short–term ribavirin: a multicenter retrospective study) … p.6711

Transfusion Medicine - Blood Transfusion. Researchers at University Hospital Target Blood Transfusion (Coagulation management in trauma–associated coagulopathy: allogenic blood products versus coagulation factor concentrates in trauma care) … p.6712

Eye Diseases and Conditions - Retinitis Pigmentosa. Researchers at University Hospital Target Retinitis Pigmentosa (Panel–based NGS Reveals Novel Pathogenic Mutations in Autosomal Recessive Retinitis Pigmentosa) … p.6713

Lung Diseases and Conditions - Bronchitis. Researchers at University Luterana do Brasil Release New Data on Bronchitis (A Real–Time Reverse–Transcription Polymerase Chain Reaction for Differentiation of Massachusetts Vaccine and Brazilian Field Genotypes of Avian Infectious Bronchitis …) … p.6714
January 14, 2017

Heart Disorders and Diseases - Heart Failure. Researchers at University Medical Center Report New Data on Heart Failure (Epidemiology of heart failure: the prevalence of heart failure and ventricular dysfunction in older adults over time. A systematic review) … p.6715

Oncology - Neuroectodermal Tumors. Researchers at University Medical Center Report New Data on Neuroectodermal Tumors (Pediatric Primitive Neuroectodermal Tumors of the Central Nervous System Differentially Express Granzyme Inhibitors) … p.6716

Drugs and Therapies - Alkylating Agents. Researchers at University of Alabama Describe Findings in Alkylating Agents (Targeting the Wnt/b-catenin pathway in primary ovarian cancer with the porcupine inhibitor WNT974) … p.6717

Friedreich's Ataxia. Researchers at University of Alabama Release New Data on Friedreich's Ataxia (Alleviating GAA Repeat Induced Transcriptional Silencing of the Friedreich’s Ataxia Gene During Somatic Cell Reprogramming) … p.6718

Oncology - Gliomas. Researchers at University of Alabama Release New Data on Gliomas (Identification of Small Molecule Inhibitors of Human Cytochrome c Oxidase That Target Chemoresistant Glioma Cells) … p.6720

Hematology - Laboratory Hematology. Researchers at University of Alberta Hospital Describe Findings in Laboratory Hematology (The use of serial outpatient complete blood count (CBC) results to derive biologic variation: a new tool to gauge the acceptability of hematology testing) … p.6721

Vascular Medicine - Vascular Health. Researchers at University of Amsterdam Target Vascular Health (Fractional flow reserve-guided percutaneous coronary intervention: where to after FAME 2?) … p.6722

Heart Disorders and Diseases - Heart Disease. Researchers at University of Arizona Have Reported New Data on Heart Disease (Genetics—Current and Future Role in the Prevention and Management of Coronary Artery Disease) … p.6723

Drugs and Therapies - Cancer Therapy. Researchers at University of Arizona Target Cancer Therapy (Cardiovascular adverse effects of targeted antiangiogenic drugs: mechanisms and management) … p.6724

Bone Research. Researchers at University of Bern Have Reported New Data on Bone Research [Pre–coating deproteinized bovine bone mineral (DBBM) with bone–conditioned medium (BCM) improves osteoblast migration, adhesion, and differentiation in vitro] … p.6724

Drugs and Therapies - Androgens and Anabolic Steroids. Researchers at University of Bologna Release New Data on Androgens and Anabolic Steroids (Disposition of Stanozolol in Plasma After Intra–articular Administration in the Horse) … p.6725

Proteomics. Researchers at University of Brescia Target Proteomics (Acute Footshock Stress Induces Time–Dependent Modifications of AMPA/NMDA Protein Expression and AMPA Phosphorylation) … p.6726

Cardiovascular Diseases and Conditions - Atherosclerosis. Researchers at University of British Columbia Discuss Findings in Atherosclerosis (So Much Cholesterol: the unrecognized importance of smooth muscle cells in atherosclerotic foam cell formation) … p.6727
Oncology - Carcinomas. Researchers at University of Cairo Detail Findings in Carcinomas (The Predictive and Prognostic Role of Topoisomerase IIa and Tissue Inhibitor of Metalloproteinases 1 Expression in Locally Advanced Breast Carcinoma of Egyptian Patients Treated ...) … p.6728

Oncology - Ovarian Cancer. Researchers at University of California Discuss Findings in Ovarian Cancer (Protein–Specific Differential Glycosylation of Immunoglobulins in Serum of Ovarian Cancer Patients) … p.6730

Atrial Septal Defects. Researchers at University of California Have Reported New Data on Atrial Septal Defects (Preprocedural Transthoracic Echocardiography Can Predict Amplatzer Septal Occluder Device Size for Transcatheter Atrial Septal Defect Closure) … p.6731

Life Science Research - Molecular and Cellular Biology. Researchers at University of California Have Reported New Data on Molecular and Cellular Biology (Characterization of Hippo Pathway Components by Gene Inactivation) … p.6732

Oncology - Cancer Care. Researchers at University of California Release New Data on Cancer Care (What do adolescents and young adults want from cancer resources? Insights from a Delphi panel of AYA patients) … p.6733

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Researchers at University of California Release New Data on Venous Thromboembolism (If some is good, more is better: An enoxaparin dosing strategy to improve pharmacologic...

venous thromboembolism prophylaxis) … p.6734

Neurodegenerative Diseases and Conditions - Huntington Disease. Researchers at University of California Report New Data on Huntington Disease (Allele–Specific Reduction of the Mutant Huntingtin Allele Using Transcription Activator–Like Effectors in Human Huntington's Disease Fibroblasts) … p.6735

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at University of California School of Medicine Report Findings in Type 2 Diabetes [Lipoprotein(a): novel target and emergence of novel therapies to lower cardiovascular disease risk] … p.6736

Biotechnology - Liposomes. Researchers at University of California Target Liposomes (Novel Application of Cellulose Paper As a Platform for the Macromolecular Self–Assembly of Biomimetic Giant Liposomes) … p.6737

Oncology - Breast Cancer. Researchers at University of Cambridge Release New Data on Breast Cancer (Incorporating truncating variants in PALB2, CHEK2, and ATM into the BOADICEA breast cancer risk model) … p.6738

Phagocytosis. Researchers at University of Cambridge Target Phagocytosis (Retinoid X receptor activation reverses age–related deficiencies in myelin debris phagocytosis and remyelination) … p.6739

17-Hydroxycorticosteroids. Researchers at University of Cape Town Release New Data on 17–Hydroxycorticosteroids (Salivary Cortisol and Cortisone do not Appear to be Useful Biomarkers for Monitoring Hydrocortisone Replacement in Addison's Disease) … p.6740
January 14, 2017

**Mycobacterium Infections - Tuberculosis.** Researchers at University of Cape Town Release New Data on Tuberculosis (Bioluminescent Reporters for Rapid Mechanism of Action Assessment in Tuberculosis Drug Discovery) … p.6741

**Methyl Ethers.** Researchers at University of Cincinnati Target Methyl Ethers (Long–term Fate Mapping to Assess the Impact of Postnatal Isoflurane Exposure on Hippocampal Progenitor Cell Productivity) … p.6742

**Oncology - Squamous Cell Carcinoma.** Researchers at University of Colorado Have Reported New Data on Squamous Cell Carcinoma (Cancer Stem Cells in Squamous Cell Carcinoma) … p.6743

**Oncology - Colon Cancer.** Researchers at University of Colorado Release New Data on Colon Cancer (Antitumor activity of a potent MEK inhibitor, TAK–733, against colorectal cancer cell lines and patient derived xenografts) … p.6744

**Intranuclear Space.** Researchers at University of Connecticut School of Medicine Report New Data on Intranuclear Space (Ethical and practical challenges in providing noninvasive prenatal testing for chromosome abnormalities: an update) … p.6745

**Oncology - Neuroblastomas.** Researchers at University of Copenhagen Release New Data on Neuroblastomas (PKA, novel PKC isoforms, and ERK is mediating PACAP auto–regulation via PAC(1)R in human neuroblastoma NB–1 cells) … p.6746

**Digestive System Diseases and Conditions - Peritonitis.** Researchers at University of Copenhagen Release New Data on Peritonitis (Pathology and Molecular Characterization of Escherichia Coli Associated With the Avian Salpingitis–Peritonitis Disease Syndrome) … p.6747

www.NewsRx.com

**Heart Disorders and Diseases - Hypertrophic Cardiomyopathy.** Researchers at University of Defense Have Reported New Data on Hypertrophic Cardiomyopathy (Identification of Novel Biomarker Candidates for Hypertrophic Cardiomyopathy and Other Cardiovascular Diseases Leading to Heart Failure) … p.6748

**Clinical Research - Clinical Trials and Studies.** Researchers at University of Edinburgh Describe Findings in Clinical Trials and Studies (Implications of the BIA–102474–101 study for review of first–into–human clinical trials) … p.6749

**Neurodegenerative Diseases and Conditions - Amyotrophic Lateral Sclerosis.** Researchers at University of Edinburgh Discuss Findings in Amyotrophic Lateral Sclerosis (Maturation and electrophysiological properties of human pluripotent stem cell–derived oligodendrocytes) … p.6750

**Cardiovascular Diseases and Conditions - Hypertension.** Researchers at University of Edinburgh Release New Data on Hypertension (Sunlight Has Cardiovascular Benefits Independently of Vitamin D) … p.6751

**Drugs and Therapies - Aromatase Inhibitors.** Researchers at University of Florence Report New Data on Aromatase Inhibitors (TRPA1 Mediates Aromatase Inhibitor–Evoked Pain by the Aromatase Substrate Androstenedione) … p.6752

**Diseases and Conditions - Compartment Syndrome.** Researchers at University of Georgia Report New Data on Compartment Syndrome (Comparison of NIRS, serum biomarkers, and muscle damage in a porcine balloon compression model of acute compartment syndrome) … p.6753
January 14, 2017

Oncology - Acute Myeloid Leukemia. Researchers at University of Heidelberg Release New Data on Acute Myeloid Leukemia (Pretreatment d-2-hydroxyglutarate serum levels negatively impact on outcome in IDH1–mutated acute myeloid leukemia) … p.6755

Oncology - Glioblastomas. Researchers at University of Heidelberg Target Glioblastomas (Large-scale Radiomic Profiling of Recurrent Glioblastoma Identifies an Imaging Predictor for Stratifying Anti-Angiogenic Treatment Response) … p.6756

Cardiovascular Diseases and Conditions - Aneurysm. Researchers at University of Hong Kong Release New Data on Aneurysm (Mycotic Aneurysm of the Common Carotid Artery as a Presenting Symptom for Early Colorectal Malignancy) … p.6757

Gram-Positive Bacteria - Staphylococcus. Researchers at University of Hong Kong Report New Data on Staphylococcus (Emergence of ileS2–Carrying, Multidrug-Resistant Plasmids in Staphylococcus lugdunensis) … p.6758

Salicylic Acids. Researchers at University of Illinois Have Reported New Data on Salicylic Acids (Development of Poly Unsaturated Fatty Acid Derivatives of Aspirin for Inhibition of Platelet Function) … p.6759

Drugs and Therapies - Antibiotics. Researchers at University of Iowa Hospitals Report New Data on Antibiotics (Infection control in the operating room: is it more than a clean dish?) … p.6760

Lung Diseases and Conditions - Asthma. Researchers at University of Jordan Target Asthma (Statins in Asthma: A Closer Look into the Pharmacological Mechanism of Action) … p.6761

Oncology - Colon Cancer. Researchers at University of Kragujevac Target Colon Cancer (Real-time monitoring of cytotoxic effects of electroporation on breast and colon cancer cell lines) … p.6762

Heart Disorders and Diseases - Ventricular Fibrillation. Researchers at University of Lille Report New Data on Ventricular Fibrillation (Long-term outcome of implantable cardioverter-defibrillator implantation in secondary prevention of sudden cardiac death) … p.6764

Oncology - Breast Cancer. Researchers at University of Ljubljana Detail Findings in Breast Cancer (gKlotho is a novel marker and cell survival factor in a subset of triple negative breast cancers) … p.6765

Hormones - Anterior Pituitary Hormones. Researchers at University of Manchester Target Anterior Pituitary Hormones (Effect of summer daylight exposure and genetic background on growth in growth hormone-deficient children) … p.6766

Nursing - Oncology Nursing. Researchers at University of Massachusetts Report New Data on Oncology Nursing (Advantages and Limitations of Wearable Activity Trackers: Considerations for Patients and Clinicians) … p.6767
Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Researchers at University of Medicine and Dentistry of New Jersey (UMDNJ) have reported new data on arteriovenous fistula (Endovascular Management of Spinal Dural Arteriovenous Fistulas) ... p.6768

Health and Medicine - Dermatology. Researchers at University of Medicine and Dentistry of New Jersey (UMDNJ) report new data on dermatology (Basal cell naevus syndrome: an update on genetics and treatment) ... p.6769

Heart Disorders and Diseases - Heart Failure. Researchers at University of Melbourne discuss findings in heart failure (Comorbidity of atrial fibrillation and heart failure) ... p.6769

Anesthesia. Researchers at University of Miami have reported new data on anesthesia (Case report: management of differential diagnosis and treatment of severe anaphylaxis in the setting of spinal anesthesia) ... p.6770

Acetanilides. Researchers at University of Miami release new data on acetanilides (Understanding the large solubility of lidocaine in 1–n–butyl–3–methylimidazolium based ionic liquids using molecular simulation) ... p.6771

Age-Related Macular Degeneration. Researchers at University of Miami target age–related macular degeneration (Heritability of choroidal thickness in the Amish) ... p.6772

Meniere's Disease. Researchers at University of Michigan target Meniere's disease (SLC44A2 single nucleotide polymorphisms, isoforms, and expression: Association with severity of Meniere's disease?) ... p.6773

Hormones - Estradiol Congeners. Researchers at University of Milan release new data on estradiol congeners (Hormonal influence on the effect of mirabegron treatment for overactive bladder) ... p.6774

Anions. Researchers at University of Milan release new data on anions (Iron citrate reduces high phosphate–induced vascular calcification by inhibiting apoptosis) ... p.6775

Genetics. Researchers at University of Montpellier have reported new data on genetics (The use of the NEDD8 inhibitor MLN4924 (Pevonedistat) in a cyclotherapy approach to protect wild–type p53 cells from MLN4924 induced toxicity) ... p.6776

Science. Researchers at University of Montreal target science (Social status alters immune regulation and response to infection in macaques) ... p.6777

Oncology - Squamous Cell Carcinoma. Researchers at University of Naples Federico II have reported new data on squamous cell carcinoma (Neck dissection versus "watchful–waiting" in early squamous cell carcinoma of the tongue our experience on 127 cases) ... p.6778

Immune System Diseases and Conditions - HIV/AIDS. Researchers at University of New South Wales target HIV/AIDS (Circulating microRNAs in Sera Correlate with Soluble Biomarkers of Immune Activation but Do Not Predict Mortality in ART Treated Individuals with HIV–1 Infection: A Case Control Study) ... p.6779

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at University of Niigata Target Type 2 Diabetes (The fruit of Acanthopanax senticosus (Rupr. et Maxim.) Harms improves insulin resistance and hepatic lipid accumulation by modulation of liver adenosine monophosphate–activated protein ...) ... p.6780
Stroke. Researchers at University of North Carolina Report New Data on Stroke (Variants of Rab GTPase–Effector Binding Protein–2 Cause Variation in the Collateral Circulation and Severity of Stroke) ... p.6781

Drugs and Therapies - Drug Delivery Systems. Researchers at University of North Carolina Target Drug Delivery Systems (Tumor Microenvironment–Mediated Construction and Deconstruction of Extracellular Drug–Delivery Depots) ... p.6782

Drugs and Therapies - Cancer Therapy. Researchers at University of Oklahoma Report New Data on Cancer Therapy (Label–Free Real–Time Microarray Imaging of Cancer Protein–Protein Interactions and Their Inhibition by Small Molecules) ... p.6783

Drugs and Therapies - Alimentary Pharmacology and Therapeutics. Researchers at University of Orebro Report New Data on Alimentary Pharmacology and Therapeutics (Consensus report: faecal microbiota transfer – clinical applications and procedures) ... p.6784

Transport Vesicles. Researchers at University of Oslo Report New Data on Transport Vesicles (Bidirectional traffic between the Golgi and the endosomes – machineries and regulation) ... p.6785

Central Nervous System Diseases and Conditions - Epilepsy. Researchers at University of Otago Report New Data on Epilepsy (Alterations In Ampa Receptor Subunit Expression In Cortical Inhibitory Interneurons In The Epileptic Stargazer Mutant Mouse) ... p.6786

Suicide. Researchers at University of Ottawa Report New Data on Suicide (Child abuse and the prevalence of suicide attempts among those reporting suicide ideation) ... p.6787

Clinical Research - Clinical Trials and Studies. Researchers at University of Oxford Report Findings in Clinical Trials and Studies (Targeting the CCL2–CCR2 signaling axis in cancer metastasis) ... p.6788

Heart Disorders and Diseases - Atrial Fibrillation. Researchers at University of Padova Describe Findings in Atrial Fibrillation (A Randomized Trial of Pharmacogenetic Warfarin Dosing in Na?ve Patients with Non–Valvular Atrial Fibrillation) ... p.6789

Imino Acids. Researchers at University of Padua Target Imino Acids (Natural Deep Eutectic Solvents (NADES) as a Tool for Bioavailability Improvement: Pharmacokinetics of Rutin Dissolved in Proline/Glycine after Oral Administration in Rats: Possible ...) ... p.6790

Oncology - Osteosarcomas. Researchers at University of Palermo Target Osteosarcomas (The secreted protein acidic and rich in cysteine is a critical mediator of cell death program induced by WIN/TRAIL combined treatment in osteosarcoma cells) ... p.6791

Oncology. Researchers at University of Paris Report Findings in Oncology (Genetic polymorphisms associated with increased risk of developing chronic myelogenous leukemia) ... p.6792

Prothrombin. Researchers at University of Paris Report Findings in Prothrombin (Repeat liver retransplantation: rationale and outcomes) ... p.6793

Clinical Research - Clinical Research in Anesthesia. Researchers at University of Parma Release New Data on Clinical Research in Anesthesia (Perineural catheter infection: a systematic review of the literature) ... p.6794

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at University of Pennsylvania Report New Data on Type 2 Diabetes (Roles of Fe–S proteins: from cofactor synthesis to iron)
January 14, 2017

homeostasis to protein synthesis) ... p.6795

Drugs and Therapies - Health-System Pharmacy. Researchers at University of Pittsburgh Have Reported New Data on Health–System Pharmacy (Educational strategies to enable expansion of pharmacogenomics–based care) ... p.6795

Oncology - Ovarian Cancer. Researchers at University of Pittsburgh Release New Data on Ovarian Cancer (Cancer and treatment–related symptoms are associated with mobility disability in women with ovarian cancer: A cross–sectional study) ... p.6797

Ischemia. Researchers at University of Primorska Target Ischemia (Chronic exposure to zinc oxide nanoparticles increases ischemic–reperfusion injuries in isolated rat hearts) ... p.6798

Membrane Proteins - Membrane Glycoproteins. Researchers at University of Queensland Target Membrane Glycoproteins (Xenopus borealis as an alternative source of oocytes for biophysical and pharmacological studies of neuronal ion channels) ... p.6799

Heart Disorders and Diseases - Heart Failure. Researchers at University of Sao Paulo Have Reported New Data on Heart Failure (Aerobic Exercise and Pharmacological Therapies for Skeletal Myopathy in Heart Failure: Similarities and Differences) ... p.6800

Stem Cell Research - Hematopoietic Stem Cells. Researchers at University of Sao Paulo Report Findings in Hematopoietic Stem Cells (Does ex vivo CD34+ positive selection influence outcome after autologous hematopoietic stem cell transplantation in systemic sclerosis patients?) ... p.6801

www.NewsRx.com

Human Herpesvirus Diseases and Conditions - Human Herpesvirus 8. Researchers at University of Sao Paulo Report New Data on Human Herpesvirus 8 (Genotypic distribution of HHV–8 in AIDS individuals without and with Kaposi sarcoma Is genotype B associated with better prognosis of AIDS–KS?) ... p.6802

Oncology - Ovarian Cancer. Researchers at University of Sao Paulo Target Ovarian Cancer (Germline mutations in BRCA1 and BRCA2 in epithelial ovarian cancer patients in Brazil) ... p.6803

Oncology - Squamous Cell Carcinoma. Researchers at University of Seville Report New Data on Squamous Cell Carcinoma (Is there an association between dental implants and squamous cell carcinoma?) ... p.6804

Gram-Negative Bacteria - Vibrionaceae. Researchers at University of Sfax Target Vibrionaceae (Molecular Detection of the Three Major Pathogenic Vibrio Species from Seafood Products and Sediments in Tunisia Using Real–Time PCR) ... p.6805

Drugs and Therapies - Drug Delivery Systems. Researchers at University of South Australia Describe Findings in Drug Delivery Systems ("Thunderstruck"Plasma–Polymer–Coated Porous Silicon Microparticles As a Controlled Drug Delivery System) ... p.6806

Proteomics. Researchers at University of South Florida Target Proteomics (g–AAPeptides: Design, Structure, and Applications) ... p.6807

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at University of Sydney Report Findings in Type 2 Diabetes [Low alanine aminotransferase levels and higher number of cardiovascular events in people with Type 2 diabetes: analysis of the Fenofibrate Intervention and Event Lowering in ...] ... p.6808
Physiology, Nutrition and Metabolism. Researchers at University of Sydney Target Physiology, Nutrition and Metabolism (Associations between CD36 gene polymorphisms and metabolic response to a short–term endurance–training program in a young–adult population) … p.6809

Hematology - Blood Coagulation Factors. Researchers at University of Tasmania Target Blood Coagulation Factors [Platelet–activating factor receptor (PAFr) is upregulated in small airways and alveoli of smokers and COPD patients] … p.6810

Oncology - Acute Myeloid Leukemia. Researchers at University of Texas Release New Data on Acute Myeloid Leukemia (Double minute chromosomes in acute myeloid leukemia, myelodysplastic syndromes, and chronic myelomonocytic leukemia are associated with micronuclei, MYC or MLL ...) … p.6811

Oncology - Melanoma. Researchers at University of Texas Southwestern Have Reported New Data on Melanoma (Immune–mediated Disease in Ipilimumab Immunotherapy of Melanoma with FDG PET–CT) … p.6813

K-Nearest Neighbor. Researchers at University of Toronto Detail Findings in K–Nearest Neighbor (Sample size requirements for knowledge–based treatment planning) … p.6814

Oncology - Breast Cancer. Researchers at University of Tours Target Breast Cancer (Intrinsic and extrinsic flaws of the nomogram predicting bone–only metastasis in women with early breast cancer: An external validation study) … p.6815

Oncology - Mantle Cell Lymphoma. Researchers at University of Utah Have Reported New Data on Mantle Cell Lymphoma (Ibrutinib in mantle cell lymphoma patients: glass half full? Evidence and opinion) … p.6816

Heart Disorders and Diseases - Angina Pectoris. Researchers at University of Valencia Target Angina Pectoris (Cardiovascular and Renal Outcomes of Renin–Angiotensin System Blockade in Adult Patients with Diabetes Mellitus: A Systematic Review with Network Meta–Analyses) … p.6818

Oncology - Pancreatic Cancer. Researchers at University of Verona Release New Data on Pancreatic Cancer (Percutaneous ablation of pancreatic cancer) … p.6819

Oncology - Breast Cancer. Researchers at University of Vienna Report Findings in Breast Cancer (NF–kB contributes to MMP1 expression in breast cancer spheroids causing paracrine PAR1 activation and disintegrations in the lymph endothelial barrier in vitro) … p.6820

Oncology - Lung Cancer. Researchers at University of Washington Release New Data on Lung Cancer (Lung Cancer Subtypes Generate Unique Immune Responses) … p.6821

Lung Diseases and Conditions - Asthma. Researchers at University of Western Australia Detail Findings in Asthma (Rhinovirus–induced asthma exacerbations and risk populations) … p.6822

Membrane Proteins - Ion Channels. Researchers at University of Western Australia Target Ion Channels (Evidence for redox sensing by a human cardiac calcium channel) … p.6823
January 14, 2017

Oncology - Breast Cancer. Researchers at University of les Illes Balears Release New Data on Breast Cancer (The Phytoestrogen Genistein Affects Breast Cancer Cells Treatment Depending on the ERα/ERβ Ratio) … p.6824

Endocrine Research. Researchers at Uppsala University Detail Findings in Endocrine Research (Progranulin Stimulates Proliferation of Mouse Pancreatic Islet Cells and Is Overexpressed in the Endocrine Pancreatic Tissue of an MEN1 Mouse Model) … p.6825

Immune System Diseases and Conditions - Allergies. Researchers at Upstate Medical University Have Reported New Data on Allergies (Impact of a pharmacist-driven beta-lactam allergy interview on inpatient antimicrobial therapy: A pilot project) … p.6826

Immunization - Vaccines. Researchers at Vaccine and Gene Therapy Institute Release New Data on Vaccines (Pre-vaccination inflammation and B-cell signalling predict age-related hyporesponse to hepatitis B vaccination) … p.6827

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Researchers at Vanderbilt University Discuss Findings in Venous Thromboembolism (Venous thromboembolism in hematopoietic stem cell transplant recipients) … p.6828

Oncology - Cancer Risk. Researchers at Vanderbilt University Have Reported New Data on Cancer Risk (Pathogenic Helicobacter pylori strains translocate DNA and activate TLR9 via the cancer-associated cag type IV secretion system) … p.6829

Life Science Research - Genetics. Researchers at Vanderbilt University Have Reported New Data on Genetics (Heterozygosity Ratio, a Robust Global Genomic Measure of Autozygosity and Its Association with Height and Disease Risk) … p.6830

Cardiovascular Diseases and Conditions - Hypertension. Researchers at Vanderbilt University Target Hypertension [Redox biology in pulmonary arterial hypertension (2013 Grover Conference Series)] … p.6831

Oncology - Colon Cancer. Researchers at Vikram University Release New Data on Colon Cancer (Study of apoptosis-related interactions in colorectal cancer) … p.6832

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers at Washington University Have Reported New Data on Obesity (Provider Training to Screen and Initiate Evidence-Based Pediatric Obesity Treatment in Routine Practice Settings: A Randomized Pilot Trial) … p.6833

Gram-Positive Bacteria - Staphylococcus aureus. Researchers at Washington University Target Staphylococcus aureus (Impact of Time to Appropriate Therapy on Mortality in Patients with Vancomycin–Intermediate Staphylococcus aureus Infection) … p.6834

Life Science Research - Molecular and Cellular Biology. Researchers at Wuhan University Release New Data on Molecular and Cellular Biology (Polo-like Kinase–1 Regulates Myc Stabilization and Activates a Feedforward Circuit Promoting Tumor Cell Survival) … p.6835

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers at Yale University School of Medicine Describe Findings in Type 2 Diabetes (Metabolic syndrome: genetic insights into disease pathogenesis) … p.6836
Oncology - Bladder Cancer. Researchers at Yokohama City University Graduate School of Medicine Report Findings in Bladder Cancer (Expression of androgen receptor in non–muscle–invasive bladder cancer predicts the preventive effect of androgen deprivation therapy on tumor ...) … p.6837

Oncology - Small Cell Lung Cancer. Researchers at Yokohama City University Graduate School of Medicine Target Small Cell Lung Cancer (Amrubicin for relapsed small–cell lung cancer: a systematic review and meta–analysis of 803 patients) … p.6838

Biomedical Engineering - Regenerative Medicine. Researchers at Zhejiang University Have Reported New Data on Regenerative Medicine (Coating with spermine–pullulan polymer enhances adenoviral transduction of mesenchymal stem cells) … p.6839

Viral RNA. Researchers at Zhejiang University School of Medicine Target Viral RNA (Bcl6 Sets a Threshold for Antiviral Signaling by Restraining IRF7 Transcriptional Program) … p.6840

Gram-Negative Bacteria - Escherichia coli. Researchers from ANSES Detail New Studies and Findings in the Area of Escherichia coli [Sequence Type 48 Escherichia coli Carrying the bla (CTX–M–1) IncI1/ST3 Plasmid in Drinking Water in France] … p.6841

Nursing - Clinical Nursing. Researchers from AUT University Discuss Findings in Clinical Nursing (The condom imperative in anal sex – one size may not fit all: a qualitative descriptive study of men who have sex with men) … p.6841

Heart Disorders and Diseases - Heart Failure. Researchers from Aarhus University Detail Findings in Heart Failure (A rare presentation of cardiac amyloid deposits isolated to intramural vessels) ... p.6842

Cardiology. Researchers from Aarhus University Hospital Report Recent Findings in Cardiology (Relocation of patients after cardiac surgery: is it worth the effort?) ... p.6843

Oncology - Prostate Cancer. Researchers from Addenbrooke's Hospital Report Findings in Prostate Cancer (Multiparametric Prostate Magnetic Resonance Imaging and Cognitively Targeted Transperineal Biopsy in Patients With Previous Abdominoperineal Resection and Suspicion of ...) ... p.6844

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Researchers from Advanced Institute of Convergence Technology Describe Findings in Fabry Disease (alpha–Galactosidase delivery using 30Kc19–human serum albumin nanoparticles for effective treatment of Fabry disease) ... p.6845

Oncology - Thyroid Cancer. Researchers from Affiliated Hospital Detail Findings in Thyroid Cancer (Tall cell variant of papillary thyroid carcinoma: current evidence on clinicopathologic features and molecular biology) ... p.6846

Oncology - Gliomas. Researchers from Affiliated Hospital Detail New Studies and Findings in the Area of Gliomas (Low Expression of CAPON in Glioma Contributes to Cell Proliferation via the Akt Signaling Pathway) ... p.6847

Ischemia. Researchers from Affiliated Hospital of Nanjing University School of Medicine Report Findings in Ischemia (Endoplasmic reticulum stress of Kupffer cells involved in the conversion of natural regulatory T cells to Th17 cells in liver ...) ... p.6848
Hematology - Laboratory Hematology.
Researchers from Aga Khan University Hospital Detail Findings in Laboratory Hematology (Analytical performance evaluation of a high–volume hematology laboratory utilizing sigma metrics as standard of excellence) … p.6849

Phenethylamines. Researchers from Ain Shams University Report Details of New Studies and Findings in the Area of Phenethylamines (Composite chitosan–transfersomal vesicles for improved transnasal permeation and bioavailability of verapamil) … p.6850

Genetics - Human Genetics. Researchers from Aix–Marseille University Provide Details of New Studies and Findings in the Area of Human Genetics (Actionable Genes, Core Databases, and Locus–Specific Databases) … p.6851

Peptide Proteins - Proinsulin. Researchers from Albert Einstein College of Medicine Describe Findings in Proinsulin (Genetic Variation near IRS1 is Associated with Adiposity and a Favorable Metabolic Profile in US Hispanics/Latinos) … p.6852

Oncology - Glioblastomas. Researchers from All India Institute of Medical Sciences Report Findings in Glioblastomas (Therapy and progression–induced O6–methylguanine–DNA methyltransferase and mismatch repair alterations in recurrent glioblastoma multiforme) … p.6853

Cardiology. Researchers from Amirkabir University of Technology Describe Findings in Cardiology (Nanomaterials–based electrochemical immunosensors for cardiac troponin recognition: An illustrated review) … p.6854

Heart Disorders and Diseases - Coronary Vasospasm. Researchers from Angers University Hospital Detail Findings in Coronary Vasospasm (Acute coronary vasospasm in a patient with eosinophilic granulomatosis with polyangiitis following NSAID administration A case report) … p.6855

Clinical Research - Clinical Trials and Studies. Researchers from Aristotle University Report on Findings in Clinical Trials and Studies (Echocardiographic Parameters During Long and Short Interdialytic Intervals in Hemodialysis Patients) … p.6855

Psychology - Community Psychology. Researchers from Arizona State University Detail Findings in Community Psychology (Rural–urban Disparities In Adolescent Risky Behaviors: A Family Social Capital Perspective) … p.6857

Life Science Research - Cell Biology. Researchers from Asia University Provide Details of New Studies and Findings in the Area of Cell Biology (Deubiquitination and Stabilization of PD–L1 by CSN5) … p.6858

Ethers. Researchers from AstraZeneca Report on Findings in Ethers (Discovery of indazole ethers as novel, potent, non–steroidal glucocorticoid receptor modulators) … p.6859

Mosquito-Borne Diseases - Malaria. Researchers from Australian Army Malaria Institute Detail New Studies and Findings in the Area of Malaria (The Spiroindolone KAE609 Does Not Induce Dormant Ring Stages in Plasmodium falciparum Parasites) … p.6860

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Researchers from Autonomous University Describe Findings in Alzheimer Disease (Simultaneous monitoring of monoamines, amino acids, nucleotides and neuropeptides by liquid chromatography–tandem mass spectrometry and its application to …) … p.6862
Angiology. Researchers from Baylor University College of Medicine Discuss Findings in Angiology (Alterations in gait parameters with peripheral artery disease: The importance of pre-frailty as a confounding variable) ... p.6863

Gram-Negative Bacteria - Escherichia coli. Researchers from Beaujon Hospital Detail New Studies and Findings in the Area of Escherichia coli (Prospective Cohort Study of the Relative Abundance of Extended-Spectrum-Beta-Lactamase-Producing Escherichia coli in the Gut of Patients Admitted ...) ... p.6864

Oncology - Prostate Cancer. Researchers from Beckman Research Institute Detail Findings in Prostate Cancer (High-Throughput Screen for Inhibitors of Androgen Receptor-RUNX2 Transcriptional Regulation in Prostate Cancer) ... p.6865

Medical Imaging - Neuroimaging. Researchers from Beijing Normal University Detail New Studies and Findings in the Area of Neuroimaging (Effects of craving behavioral intervention on neural substrates of cue-induced craving in Internet gaming disorder) ... p.6866

Cardiovascular Diseases. Researchers from Ben-Gurion University of the Negev Detail New Studies and Findings in the Area of Cardiovascular Diseases (Novel Compounds Targeting the Mitochondrial Protein VDAC1 Inhibit Apoptosis and Protect against Mitochondrial Dysfunction) ... p.6867

Cardiology. Researchers from Bhabha Atomic Research Center Report Recent Findings in Cardiology (Ga-68 labeled fatty acids for cardiac metabolic imaging: Influence of different bifunctional chelators) ... p.6868

Oxalates. Researchers from Biomedical Center Report New Studies and Findings in the Area of Oxalates (Massive excretion of calcium oxalate from late prepupal salivary glands of Drosophila melanogaster demonstrates active nephridial-like anion transport) ... p.6869

Drugs and Therapies - Chemotherapy. Researchers from Biotechnology Institute Report New Studies and Findings in the Area of Chemotherapy (Characterization of Two Multidrug-Resistant IncA/C Plasmids from the 1960s by Using the MinION Sequencer Device) ... p.6870

Heart Disorders and Diseases - Heart Attack. Researchers from Brigham and Women’s Hospital Describe Findings in Heart Attack (Effect of stimulus type and temperature on EEG reactivity in cardiac arrest) ... p.6871

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. Researchers from Brigham and Women's Hospital Detail New Studies and Findings in the Area of Hypertrophic Cardiomyopathy (Evolution of hypertrophic cardiomyopathy in sarcomere mutation carriers) ... p.6872

Drug Development. Researchers from Bristol-Myers Squibb Discuss Findings in Drug Development (Improving Drug Design: An Update on Recent Applications of Efficiency Metrics, Strategies for Replacing Problematic Elements, and Compounds in Nontraditional Drug Space) ... p.6873

Drugs and Therapies - Toxicology and Applied Pharmacology. Researchers from Bristol-Myers Squibb Report Details of New Studies and Findings in the Area of Toxicology and Applied Pharmacology (MicroRNA as biomarkers of mitochondrial toxicity) ... p.6874
Membrane Proteins - Immunologic Receptors. Researchers from British Columbia Cancer Research Center Report Findings in Immunologic Receptors (Oncofetal Chondroitin Sulfate Glycosaminoglycans Are Key Players in Integrid Signaling and Tumor Cell Motility) ... p.6875

Central Nervous System Diseases and Conditions - Spinal Cord Injury. Researchers from Brock University Describe Findings in Spinal Cord Injury (Non–invasive electrocardiographic assessments of cardiac autonomic modulation in individuals with spinal cord injury) ... p.6877

Mycobacterium Infections - Tuberculosis. Researchers from Brussels Free University Describe Findings in Tuberculosis (Effects of Lipid–Lowering Drugs on Vancomycin Susceptibility of Mycobacteria) ... p.6878

Surgery - Pancreaticoduodenectomy. Researchers from Cancer Hospital Describe Findings in Pancreaticoduodenectomy (Widespread lymph node recurrence of major duodenal papilla cancer following pancreaticoduodenectomy) ... p.6880

Oncology - Lung Cancer. Researchers from Cancer Institute Detail New Studies and Findings in the Area of Lung Cancer (Lung cancer biomarkers, targeted therapies and clinical assays) ... p.6881

Opportunistic Infections - HIV/AIDS and Cytomegalovirus. Researchers from Capital Medical University Provide Details of New Studies and Findings in the Area of HIV/AIDS and Cytomegalovirus (Frosted branch angiitis in an AIDS patient with cytomegalovirus retinitis) ... p.6881

Heart Disorders and Diseases - Heart Disease. Researchers from Capital Medical University Report New Studies and Findings in the Area of Heart Disease [Genetic Polymorphism of CYP2C19 and Inhibitory Effects of Ticagrelor and Clopidogrel Towards Post–Percutaneous Coronary Intervention (PCI) ...] ... p.6883

Heart Disorders and Diseases - Atrial Fibrillation. Researchers from Careggi Hospital Detail Findings in Atrial Fibrillation (Percutaneous left atrial appendage occlusion in patients with non–valvular atrial fibrillation: implantation and up to four years follow–up of the AMPLATZER Cardiac Plug) ... p.6887

Heart Disorders and Diseases - Pneumonia. Researchers from Carolinas Medical Center Report Recent Findings in Pneumonia (Antifungal use in immunocompetent, critically ill patients with pneumonia does not improve clinical outcomes) ... p.6888
January 14, 2017

Digestive System Diseases and Conditions - Gastrointestinal Neoplasms. Researchers from Catholic University Report Details of New Studies and Findings in the Area of Gastrointestinal Neoplasms (Divergent gastrointestinal stromal tumors in syndromic settings) … p.6889

Cardiovascular Diseases and Conditions - Systemic Vasculitis. Researchers from Catholic University Report on Findings in Systemic Vasculitis [The prognostic significance of the Birmingham Vasculitis Activity Score (BVAS) with systemic vasculitis patients transferred to the intensive care unit (ICU)] … p.6890

Cardiology. Researchers from Catholic University of Korea Report New Studies and Findings in the Area of Cardiology (3D printed complex tissue construct using stem cell–laden decellularized extracellular matrix bioinks for cardiac repair) … p.6891

Biological Factors - Endotoxins. Researchers from Catholic University of Leuven Report Details of New Studies and Findings in the Area of Endotoxins (MMP–3 Deficiency Alleviates Endotoxin–Induced Acute Inflammation in the Posterior Eye Segment) … p.6892

Oncology - Thyroid Cancer. Researchers from Catholic University of Leuven School of Medicine Describe Findings in Thyroid Cancer (Post–Chernobyl incidence of papillary thyroid cancer among Belgian children less than 15 years of age in April 1986: a 30–year surgical …) … p.6893

Health and Medicine - Cardiovascular Interventions. Researchers from Cedars–Sinai Heart Institute Describe Findings in Cardiovascular Interventions (Feasibility and safety of balloon–expandable transcatheter aortic valve implantation with moderate or without predilatation) … p.6894

www.NewsRx.com

Oncology - Cancer Research. Researchers from Center Hospitalier Lyon Sud Report New Studies and Findings in the Area of Cancer Research (Conflicting Signals for Cancer Treatment) … p.6895

Immunology. Researchers from Center for Research and Advanced Studies of the National Polytechnic Institute (CINVESTAV) Report Details of New Studies and Findings in the Area of Immunology (Inflammasomes and its importance in viral infections) … p.6895

Cardiovascular Research. Researchers from Centers for Disease Control and Prevention Report Recent Findings in Cardiovascular Research (Modification of the effects of air pollutants on mortality by temperature: A systematic review and meta–analysis) … p.6897

Oncology - Non–Small Cell Lung Cancer. Researchers from Central Hospital Report Recent Findings in Non–Small Cell Lung Cancer (The impact of epidermal growth factor receptor mutations on patterns of disease recurrence after chemoradiotherapy for locally advanced non–small cell lung …) … p.6898

Oncology - Leukemia. Researchers from Central South University Describe Findings in Leukemia (STIP Regulates ERK1/2 Signaling Pathway Involved in Interaction with PP1 gamma in Lymphoblastic Leukemia) … p.6899

January 14, 2017

Oncology - Colon Cancer. Researchers from Chang Gung Memorial Hospital Describe Findings in Colon Cancer (Antidepressants and colorectal cancer: A population–based nested case–control study) … p.6901

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from Chang Gung University Describe Findings in Obesity (Effectiveness of community–based exercise intervention programme in obese adults with metabolic syndrome) … p.6902

Liver Diseases and Conditions - Hepatitis B Virus. Researchers from Chang Gung University Report Details of New Studies and Findings in the Area of Hepatitis B Virus (Hepatitis B viremia in completely immunized individuals negative for anti–hepatitis B core antibody) … p.6903

Angiology. Researchers from Chang Gung University Report on Findings in Angiology (Effect of dehydration on the development of collaterals in acute middle cerebral artery occlusion) … p.6904

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from Chang Gung University Report on Findings in Type 2 Diabetes (Impact of baseline body mass index status on glucose lowering and weight change during sitagliptin treatment for type 2 diabetics) … p.6905

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. Researchers from Charite University Hospital and School of Medicine Report on Findings in Hypercholesterolemia (Clinical characterization and mutation spectrum of German patients with familial hypercholesterolemia) … p.6906

Cardiovascular Research. Researchers from Charles University Report Findings in Cardiovascular Research (Obstruction after alcohol septal ablation is associated with cardiovascular mortality events) … p.6908

Oncology - Breast Cancer. Researchers from Chengdu University Report New Studies and Findings in the Area of Breast Cancer (Regulation of epithelial–mesenchymal transition through microRNAs: clinical and biological significance of microRNAs in breast cancer) … p.6909

Endocrine Cells. Researchers from Children's Hospital Report Details of New Studies and Findings in the Area of Endocrine Cells (Evidence for feasibility of fetal trophoblastic cell–based noninvasive prenatal testing) … p.6910

Hematologic Diseases and Conditions - Sickle Cell Anemia. Researchers from Children's Research Institute Report New Studies and Findings in the Area of Sickle Cell Anemia (Substance P is increased in patients with sickle cell disease and associated with haemolysis and hydroxy-carbamide use) … p.6911

Oncology - Multiple Myeloma. Researchers from China Medical University and Hospital Detail New Studies and Findings in the Area of Multiple Myeloma (Expression and significance of miR–21 in multiple myeloma patients) … p.6912

Oncology - Oral Cancer. Researchers from China Medical University and Hospital Report Findings in Oral Cancer (Dithiothreitol enhanced arsenic–trioxide–induced cell apoptosis in cultured oral cancer cells via mitochondrial dysfunction and endoplasmic reticulum stress) … p.6913
Steatosis. Researchers from China Pharmaceutical University Discuss Findings in Steatosis (Long-term Stress with Hyperglucocorticoidemia-induced Hepatic Steatosis with VLDL Overproduction Is Dependent on both 5-HT2 Receptor and 5-HT Synthesis in Liver) … p.6914

Clinical Research - Clinical Trials and Studies. Researchers from Chinese Academy of Fishery Sciences Describe Findings in Clinical Trials and Studies (Comparative Study on Physical–Chemical and Biological Characteristics of Grass Carp Reovirus From Different Genotypes) … p.6915

Immunology - Human Immunology. Researchers from Chinese Academy of Medical Sciences Detail Findings in Human Immunology (Association study of rs924080 and rs11209032 polymorphisms of IL23R–IL12RB2 in a Northern Chinese Han population with Behcet's disease) … p.6916

Cardiovascular Diseases and Conditions - Aneurysm. Researchers from Chinese Academy of Medical Sciences Report Details of New Studies and Findings in the Area of Aneurysm (Endovascular stenting for extracranial carotid artery aneurysms Experiences and mid-term results) … p.6917

Oncology - Non-Small Cell Lung Cancer. Researchers from Chinese Academy of Medical Sciences Report Details of New Studies and Findings in the Area of Non–Small Cell Lung Cancer (The Efficacy and Safety of Icotinib in Patients with Advanced Non–Small Cell Lung Cancer Previously ...) … p.6918

Hematologic Diseases and Conditions - Thrombocytopenia. Researchers from Chinese Peoples' Liberation Army General Hospital Detail New Studies and Findings in the Area of Thrombocytopenia (Efficacy and safety of thrombopoietin receptor agonists in patients with primary immune thrombocytopenia: A ...) … p.6919

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from Chinese University of Hong Kong Report Findings in Type 2 Diabetes (Retinal Information is Independently Associated with Cardiovascular Disease in Patients with Type 2 diabetes) … p.6920

Cardiology. Researchers from Christiana Care Health Systems Describe Findings in Cardiology (Impact of a Multidisciplinary Team Approach Including an Intensivist on the Outcomes of Critically Ill Patients in the Cardiac Care Unit) … p.6921

Heart Disorders and Diseases - Angina Pectoris. Researchers from Chung Ang University Discuss Findings in Angina Pectoris (Percutaneous Coronary Intervention Is More Beneficial Than Optimal Medical Therapy in Elderly Patients with Angina Pectoris) … p.6922

Health and Medicine - Medical Research. Researchers from Chung Ang University Hospital Detail New Studies and Findings in the Area of Medical Research (Intra–Articular Injections in Patients with Femoroacetabular Impingement: a Prospective, Randomized, Double–blind, Cross–over Study) … p.6923

Immunology - Mononuclear Phagocyte System. Researchers from Chung Ang University Report New Studies and Findings in the Area of Mononuclear Phagocyte System (Thunbergia alata inhibits inflammatory responses through the inactivation of ERK and STAT3 in macrophages) … p.6924

Drugs and Therapies - Toxicology and Pharmacology. Researchers from Chungnam National University Report Recent Findings in Toxicology and Pharmacology (Subacute toxicity evaluation of KR–33493, FAF1 inhibitor for a new anti–parkinson's disease agent, after oral administration in rats and dogs) … p.6925
Human Immunodeficiency Virus.
Researchers from College of Medicine Report on Findings in Human Immunodeficiency Virus (Plasmablastic lymphoma in HIV patients: Experience at a tertiary care hospital in eastern India) … p.6926

Nutritional and Metabolic Diseases and Conditions - Amyloidosis.
Researchers from Columbia University Detail New Studies and Findings in the Area of Amyloidosis (Transthyretin Cardiac Amyloidosis in Older Americans) … p.6927

Cardiology. Researchers from Columbia University Report Recent Findings in Cardiology (Frameless Stereotactic Ommaya Reservoir Placement: Efficacy and Complication Comparison with Frame–Based Technique) … p.6929

Connective Tissue Diseases and Conditions - Alpha 1-Antitrypsin Deficiency. Researchers from Copenhagen University Hospital Provide Details of New Studies and Findings in the Area of Alpha 1–Antitrypsin Deficiency (Intravenous alpha–1 antitrypsin augmentation therapy for treating patients with alpha–1 antitrypsin …) … p.6930

Nervous System Diseases and Conditions - Hyperalgesia. Researchers from Copenhagen University Hospital Report New Studies and Findings in the Area of Hyperalgesia (Effects of target–controlled infusion of high–dose naloxone on pain and hyperalgesia in a human thermal injury model: a study protocol …) … p.6932

Drugs and Therapies - Antidepressants. Researchers from Cukurova University Discuss Findings in Antidepressants (Dipyrone ameliorates behavioural changes induced by unpredictable chronic mild stress: gender differences) … p.6933

Heart Disorders and Diseases - Takotsubo Cardiomyopathy.
Researchers from DZHK German Center for Cardiovascular Research Discuss Findings in Takotsubo Cardiomyopathy (Prognostic Usefulness of the Ballooning Pattern in Patients With Takotsubo Cardiomyopathy) … p.6934

Biotechnology - Gene Therapy.
Researchers from DZHK German Center for Cardiovascular Research Report New Studies and Findings in the Area of Gene Therapy (Viral Vector–Based Targeting of miR–21 in Cardiac Nonmyocyte Cells Reduces Pathologic Remodeling of the Heart) … p.6935

Heart Disorders and Diseases - Cardiac Arrhythmias. Researchers from Denver Health Medical Center Report on Findings in Cardiac Arrhythmias (Evaluation and Management of Maternal Cardiac Arrhythmias) … p.6936

Mosquito-Borne Diseases - West Nile Fever.
Researchers from Department of Biological Science Describe Findings in West Nile Fever (TLR8 Couples SOCS–1 and Restrains TLR7–Mediated Antiviral Immunity, Exacerbating West Nile Virus Infection in Mice) … p.6937

Heart Disorders and Diseases - Heart Attack. Researchers from Department of Cardiology Provide Details of New Studies and Findings in the Area of Heart Attack (Fragmented QRS on Admission Electrocardiography Predicts Long–Term Mortality in Patients with Non–ST–Segment Elevation Myocardial ...) … p.6938
Heart Disorders and Diseases -
Endocarditis. Researchers from Department of Cardiology Report Findings in Endocarditis (Comparison of prognoses of Staphylococcus aureus left–sided prosthetic endocarditis and prosthetic endocarditis caused by other pathogens) … p.6939

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Researchers from Department of Cellular Biology Describe Findings in Alzheimer Disease (Overexpression of Metallothionein–1 Modulates the Phenotype of the Tg2576 Mouse Model of Alzheimer's Disease) … p.6940

Biotechnology. Researchers from Department of Chemical Engineering Report on Findings in Biotechnology (Controlling the time evolution of mAb N–linked glycosylation, Part I: Microbioreactor experiments) … p.6941

Drugs and Therapies - Antifungals. Researchers from Department of Infectious Disease Detail Findings in Antifungals (Posaconazole Therapeutic Drug Monitoring in a Regional Hospital Setting) … p.6943

Hematologic Diseases and Conditions - Thrombocytopenia. Researchers from Department of Medicine Provide Details of New Studies and Findings in the Area of Thrombocytopenia (Platelets in Critical Illness) … p.6944

Liver Diseases and Conditions - Hepatitis C Virus. Researchers from Department of Medicine Report New Studies and Findings in the Area of Hepatitis C Virus (Eighteen– to 30–year–olds more likely to link to hepatitis C virus care: an opportunity to decrease transmission) … p.6945

Drugs and Therapies - Antibiotics. Researchers from Department of Microbiology and Immunology Detail New Studies and Findings in the Area of Antibiotics (Protein aggregation as an antibiotic design strategy) … p.6946

Transplant Medicine - Kidney Transplants. Researchers from Department of Nephrology Provide Details of New Studies and Findings in the Area of Kidney Transplants (Desensitization Protocol in Recipients of Deceased Kidney Donor With Donor–Specific Antibody–Low Titers) … p.6947

Herpesvirus Diseases and Conditions - Herpes Zoster. Researchers from Department of Neurology Describe Findings in Herpes Zoster (Detection of varicella–zoster virus DNA during medullary and brainstem relapses in multiple sclerosis) … p.6948

Parkinson's Disease. Researchers from Department of Neurology Report Recent Findings in Parkinson's Disease (Polyneuropathy in levodopa–treated Parkinson's patients) … p.6949

Therapeutics. Researchers from Department of Safety Assessment Report on Findings in Therapeutics (Safety Lead Optimization and Candidate Identification: Integrating New Technologies into Decision–Making) … p.6951

Peripheral Artery Disease. Researchers from Department of Surgery Report Details of New Studies and Findings in the Area of Peripheral Artery Disease (Short stature in men is associated with subclinical peripheral arterial disease) … p.6952
**January 14, 2017**

**Central Nervous System Diseases and Conditions - Cranial Nerve Injuries.** Researchers from Department of Surgery Report on Findings in Cranial Nerve Injuries (Cranial nerve injury is associated with dual antiplatelet therapy use and cervical hematoma after carotid endarterectomy) … p.6953

**Gastroenterology.** Researchers from Department of Surgery Report on Findings in Gastroenterology (The role of surgical gastrostomy in the age of endoscopic gastrostomy: a 13 years and 543 patients retrospective study) … p.6954

**Nervous System Diseases and Conditions - Myoclonus.** Researchers from Department of Surgery Report on Findings in Myoclonus (Cerebral hyperperfusion syndrome: A rare postoperative complication of carotid endarterectomy) … p.6955

**Oncology - Liver Cancer.** Researchers from Dokuz Eylul University Detail Findings in Liver Cancer (Role of Fanconi anemia/BRCA pathway genes in hepatocellular carcinoma chemoresistance) … p.6956

**Gram-Negative Bacteria - Escherichia coli.** Researchers from Dongguk University Detail New Studies and Findings in the Area of Escherichia coli (Cell–SELEX Based Identification of an RNA Aptamer for Escherichia coli and Its Use in Various Detection Formats) … p.6957

**Hormones.** Researchers from Dr. Hari Singh Gour University Report Recent Findings in Hormones (Luteinizing hormone–releasing hormone peptide tethered nanoparticulate system for enhanced antitumoral efficacy of paclitaxel) … p.6958

**Immune System Diseases and Conditions - HIV/AIDS.** Researchers from Duke University Describe Findings in HIV/AIDS (Immunization with an SIV–based IDLV Expressing HIV–1 Env 1086 Clade C Elicits Durable Humoral and Cellular Responses in Rhesus Macaques) … p.6959

**Peripheral Artery Disease.** Researchers from Duke University Describe Findings in Peripheral Artery Disease (Concomitant Thoracic Aortobifemoral Bypass With Left Ventricular Assist Device Implantation) … p.6960

**Central Nervous System Diseases and Conditions - Epilepsy.** Researchers from Emory University Report Findings in Epilepsy (Mechanistic Insight into NMDA Receptor Dysregulation by Rare Variants in the GluN2A and GluN2B Agonist Binding Domains) … p.6962

**Myeloid Cells.** Researchers from Emory University Report Recent Findings in Myeloid Cells (Novel Multifunctional Nanomatrix Reduces Inflammation in Dynamic Conditions in Vitro and Dilates Arteries ex Vivo) … p.6963

**Cardiovascular Research.** Researchers from Erasmus University Detail Findings in Cardiovascular Research (Vitamin D and retinal microvascular damage The Rotterdam Study) … p.6964

**Eye Diseases and Conditions - Exfoliation Syndrome.** Researchers from Eskisehir Osmangazi University Report on Findings in Exfoliation Syndrome (Comparison of Rotational Thromboelastography Findings in Pseudoxfoliation Syndrome Patients and Healthy Controls) … p.6965
Hematology - Blood Coagulation Factors. Researchers from Faculty of Medicine Detail Findings in Blood Coagulation Factors (Homozgyosity for a factor XII mutation in one female and one male patient with hereditary angio–oedema) … p.6966

Drugs and Therapies - Disulfiram Therapy. Researchers from Faculty of Pharmacy Report Findings in Disulfiram Therapy (An Ophthalamic Formulation of Disulfiram Nanoparticles Prolongs Drug Residence Time in Lens) … p.6967

Angiogenesis. Researchers from Federal University Describe Findings in Angiogenesis (Chemopreventive effect and angiogenic activity of punicalagin isolated from leaves of Lafoensia pacari A. St.–Hil) … p.6968

Oncology - Osteosarcomas. Researchers from Federal University Detail Findings in Osteosarcomas (MAPK7 Gene Controls Proliferation, Migration and Cell Invasion in Osteosarcoma) … p.6969

Mental Health Diseases and Conditions - Affective Disorders. Researchers from Federal University Provide Details of New Studies and Findings in the Area of Affective Disorders (Liraglutide promotes improvements in objective measures of cognitive dysfunction in individuals with mood disorders: A pilot, …) … p.6970

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from Federal University Report on Findings in Obesity (No difference in acute effects of supplemental v. dietary calcium on blood pressure and microvascular function in obese women challenged with a high–fat meal: a cross–over …) … p.6971

Digestive System Diseases and Conditions - Acid Reflux Disease. Researchers from First Affiliated Hospital Describe Findings in Acid Reflux Disease (Proton Pump Inhibitor Therapy for the Treatment of Laryngopharyngeal Reflux: A

www.NewsRx.com

Meta–Analysis of Randomized Controlled Trials) … p.6972

Oncology - Colon Cancer. Researchers from Fourth Military Medical University Describe Findings in Colon Cancer (High expression of CREPT promotes tumor growth and is correlated with poor prognosis in colorectal cancer) … p.6974

Oncology. Researchers from Fourth Military Medical University Report Findings in Oncology (ALK and ROS1 as targeted therapy paradigms and clinical implications to overcome crizotinib resistance) … p.6975

Oncology - Non–Small Cell Lung Cancer. Researchers from Free University Describe Findings in Non–Small Cell Lung Cancer (Utilising the EGFR interactome to identify mechanisms of drug resistance in non–small cell lung cancer – Proof of concept towards a systems pharmacology approach) … p.6976

DNA Research. Researchers from Free University Discuss Findings in DNA Research (Engineering biodegradable micelles of polyethylenimine–based amphiphilic block copolymers for efficient DNA and siRNA delivery) … p.6977

Oncology - Breast Cancer. Researchers from French National Institute of Health and Medical Research (INSERM) Detail Findings in Breast Cancer (Pathological complete response and prognosis after neoadjuvant chemotherapy for HER2–positive breast cancers before and after …) … p.6978
Liver Diseases and Conditions - Hepatitis B Virus. Researchers from French National Institute of Health and Medical Research (INSERM) Report on Findings in Hepatitis B Virus (Hepatitis B surface antigen quantification as a predictor of seroclearance during treatment in HIV–hepatitis B virus ...) … p.6979

Cardiovascular Diseases and Conditions - Hypertension. Researchers from Fudan University Describe Findings in Hypertension (Short sleep duration is associated with increased risk of pre–hypertension and hypertension in Chinese early middle–aged females) … p.6981

Musculoskeletal Diseases and Conditions - Osteonecrosis. Researchers from Fudan University Report Recent Findings in Osteonecrosis (Involvement of MicroRNA–210 Demethylation in Steroid–associated Osteonecrosis of the Femoral Head) … p.6982

Drugs and Therapies - Antineoplastics. Researchers from Fujian Medical University Provide Details of New Studies and Findings in the Area of Antineoplastics (The mitochondrion interfering compound NPC–26 exerts potent anti–pancreatic cancer cell activity in vitro and in vivo) … p.6983

Cardiology. Researchers from Gazes Cardiac Research Institute Report Recent Findings in Cardiology (Dasatinib Attenuates Pressure Overload Induced Cardiac Fibrosis in a Murine Transverse Aortic Constriction Model) … p.6984

Oncology - Cancer Risk. Researchers from General Hospital Discuss Findings in Cancer Risk (Unprovoked venous thromboembolism and subsequent cancer risk: a population–based cohort study) … p.6985

Oncology - Osteosarcomas. Researchers from General Hospital Report Recent Findings in Osteosarcomas (Effect of Unplanned Therapy on the Prognosis of Patients with Extremity Osteosarcoma) … p.6986

Neurons. Researchers from George Washington University Discuss Findings in Neurons (Direct Projections From Hypothalamic Orexin Neurons To Brainstem Cardiac Vagal Neurons) … p.6987

Oncology - Pancreatic Cancer. Researchers from Georgetown University Describe Findings in Pancreatic Cancer (Circulating microRNA profile predicts disease progression in patients receiving second–line treatment of lapatinib and capecitabine for metastatic pancreatic cancer) … p.6988

Nanotechnology. Researchers from Georgia Institute of Technology and Emory University Detail Findings in Nanotechnology (⁶&B#8308;Cu–Doped PdCu@Au Tripods: A Multifunctional Nanomaterial for Positron Emission Tomography and Image–Guided Photothermal ...) … p.6989

Nutritional and Metabolic Diseases and Conditions - Starvation. Researchers from German Cancer Consortium Report Recent Findings in Starvation (FOXO3a orchestrates glioma cell responses to starvation conditions and promotes hypoxia–induced cell death) … p.6990

Heart Disorders and Diseases - Left Ventricular Hypertrophy. Researchers from German Center Lung Research Report Findings in Left Ventricular Hypertrophy (Cardiomyocyte loss is not required for the progression of left ventricular hypertrophy induced by pressure overload in female mice) … p.6991
Oncology - Gliomas. Researchers from Gifu Pharmaceutical University Report Findings in Gliomas [Glycoprotein nonmetastatic melanoma protein B (GPNMB) promotes the progression of brain glioblastoma via Na+/K+–ATPase] … p.6992

Oncology. Researchers from H. Lee Moffitt Cancer Center and Research Institute Report on Findings in Oncology (A phase I study of indoximod in patients with advanced malignancies) … p.6993

Oncology - Thyroid Cancer. Researchers from Hacettepe University School of Medicine Detail Findings in Thyroid Cancer (Genetic Alterations in Differentiated Thyroid Cancer Patients with Acromegaly) … p.6994

Digestive System Diseases and Conditions - Acid Reflux Disease. Researchers from Hamamatsu University School of Medicine Detail New Studies and Findings in the Area of Acid Reflux Disease (Rapid metabolizer genotype of CYP2C19 is a risk factor of being refractory to proton pump inhibitor therapy for reflux ...) … p.6995

Apoptosis. Researchers from Harbin Medical University Describe Findings in Apoptosis [Lysine–Specific Demethylase 1 (LSD1) Inhibitor S2101 Induces Autophagy via the AKT/mTOR Pathway in SKOV3 Ovarian Cancer Cells] … p.6996

Cardiology. Researchers from Harvard School of Medicine Describe Findings in Cardiology (A Systematic Review of Mitral Valve Repair With Autologous Pericardial Leaflet Augmentation for Rheumatic Mitral Regurgitation) … p.6997

www.NewsRx.com

Cardiovascular Diseases. Researchers from Harvard School of Medicine Report Details of New Studies and Findings in the Area of Cardiovascular Diseases (Thyroid function and cardiovascular disease risk factors in euthyroid adults: a cross-sectional and longitudinal study) … p.6999

Eye Diseases. Researchers from Harvard School of Medicine Report Findings in Eye Diseases (Orbital Angiogenesis and Lymphangiogenesis in Thyroid Eye Disease An Analysis of Vascular Growth Factors with Clinical Correlation) … p.7000

Hematopoiesis. Researchers from Harvard Stem Cell Institute Detail New Studies and Findings in the Area of Hematopoiesis (Understanding the regulation of vertebrate hematopoiesis and blood disorders – big lessons from a small fish) … p.7001

Oncology - Lung Cancer. Researchers from Hasselt University Report Recent Findings in Lung Cancer (Postoperative radiotherapy for lung cancer: Is it worth the controversy?) … p.7002

Digestive System Diseases and Conditions - Cholestasis. Researchers from Health Institute Detail Findings in Cholestasis [Liver Transplantation in Polish Children With alpha(1)–Antitrypsin Deficiency: A Single–Center Experience] … p.7003

Drugs and Therapies - Antiarrhythmic Agents. Researchers from Health Research Institute Detail Findings in Antiarrhythmic Agents (Short-term esmolol attenuates remodeling of the thoracic aorta in hypertensive rats by decreasing concentrations of ADMA down-regulated by oxidative stress) … p.7005
Drugs and Therapies - Antiretrovirals. 
Researchers from Health Science Center Report Recent Findings in Antiretrovirals (Population Pharmacokinetics of Tenofovir in HIV–1–Uninfected Members of Serodiscordant Couples and Effect of Dose Reporting Methods) … p.7006

Surgery - Heart Bypass Surgery. 
Researchers from Heart Center Report New Studies and Findings in the Area of Heart Bypass Surgery (Long–Term Follow–Up of Patients With Previous Coronary Artery Bypass Grafting Undergoing Percutaneous Coronary Intervention for Chronic Total ...) … p.7007

Cardiovascular Diseases and Conditions - Thrombosis. Researchers from Hebei Medical University Report New Studies and Findings in the Area of Thrombosis (Efficacy and safety of therapeutic anticoagulation for the treatment of isolated calf muscle vein thrombosis – a systematic review and ...) … p.7008

Oncology - Gliomas. Researchers from Henan University Provide Details of New Studies and Findings in the Area of Gliomas (Long non–coding RNA CCAT1 promotes glioma cell proliferation via inhibiting microRNA–410) … p.7009

Tumor Markers - Carcinoeembryonic Antigens. Researchers from Henan University of Technology Report New Studies and Findings in Carcinoeembryonic Antigens (Differential pulse voltammetric assay for the carcinoembryonic antigen using a glassy carbon electrode modified with layered molybdenum ...) … p.7010

Heart Disorders and Diseases - Endocarditis. Researchers from Henry Ford Hospital Discuss Findings in Endocarditis (False–positive cerebrospinal fluid cryptococcus antigen in Libman–Sacks endocarditis) … p.7011

Oncology - Gastric Cancer. Researchers from Hokkaido University School of Medicine Report New Studies and Findings in the Area of Gastric Cancer (Concomitant neoplasms in the skin and stomach unveil the role of type IV collagen and E–cadherin in mucin core protein 5AC ...) … p.7012

Drugs and Therapies - Antiinfectives. Researchers from Hospital Clinic Report Details of New Studies and Findings in the Area of Antiinfectives (Genomic and in silico analyses of CRBN gene and thalidomide embryopathy in humans) … p.7013

Cardiovascular Diseases and Conditions - Hypertension. Researchers from Hospital del Mar Describe Findings in Hypertension (Renal volume and cardiovascular risk assessment in normotensive autosomal dominant polycystic kidney disease patients) … p.7014

Drugs and Therapies - Chemotherapy. Researchers from Hospital of Santa Maria Discuss Findings in Chemotherapy (2016 updated MASCC/ESMO consensus recommendations: Prevention of nausea and vomiting following moderately emetogenic chemotherapy) … p.7015

Drugs and Therapies - Drug Delivery Systems. Researchers from Huazhong University of Science and Technology Provide Details of New Studies and Findings in the Area of Drug Delivery Systems (Shear Stress–sensitive Carriers for Localized Drug Delivery) … p.7016

Oncology - Carcinomas. Researchers from Huazhong University of Science and Technology Report Details of New Studies and Findings in the Area of Carcinomas (HSP27 Knockdown Increases Cytoplasmic p21 and Cisplatin Sensitivity in Ovarian Carcinoma Cells) … p.7017
Liver Diseases and Conditions - Hepatitis B Virus. Researchers from Huazhong University of Science and Technology Report Recent Findings in Hepatitis B Virus [Multidrug resistance protein 4 is a critical protein associated with the antiviral efficacy of nucleos(t)ide analogues] ... p.7018

Influenza A Virus Subtype H1N1. Researchers from Hunan Normal University Report on Findings in Influenza A Virus Subtype H1N1 (Computational screen and experimental validation of anti–influenza effects of quercetin and chlorogenic acid from traditional Chinese medicine) ... p.7019

Oncology - Cancer Imaging. Researchers from Hunan University Report New Studies and Findings in the Area of Cancer Imaging (Nature–Inspired Smart DNA Nanodocotor for Activatable In Vivo Cancer Imaging and In Situ Drug Release Based on Recognition–Triggered Assembly of ...) ... p.7020

Biomedical Engineering - Regenerative Medicine. Researchers from IRCSS Detail New Studies and Findings in the Area of Regenerative Medicine (Epigenetic Reprogramming of Muscle Progenitors: Inspiration for Clinical Therapies) ... p.7021

Oncology - Prostate Cancer. Researchers from Imperial College Detail Findings in Prostate Cancer (Diet, body size, physical activity and risk of prostate cancer: An umbrella review of the evidence) ... p.7022

Immune System Diseases and Conditions - HIV/AIDS. Researchers from Imperial College Report Recent Findings in HIV/AIDS (How do HIV–negative individuals in sub–Saharan Africa change their sexual risk behaviour upon learning their serostatus? A systematic review) ... p.7023

www.NewsRx.com

Oncology - Colon Cancer. Researchers from Indian Institute of Chemical Biology Report on Findings in Colon Cancer (DNA damage–induced ephrin–B2 reverse signaling promotes chemoresistance and drives EMT in colorectal carcinoma harboring mutant p53) ... p.7024

Congenital Diseases and Conditions - Congenital Heart Defects. Researchers from Indiana University Detail New Studies and Findings in the Area of Congenital Heart Defects (A Three–Way Interaction among Maternal and Fetal Variants Contributing to Congenital Heart Defects) ... p.7025

Oncology - Breast Cancer. Researchers from Institut Universitaire de France Discuss Findings in Breast Cancer (SCN4B acts as a metastasis–suppressor gene preventing hyperactivation of cell migration in breast cancer) ... p.7026

Blood Pressure. Researchers from Institute for Cancer Research and Treatment (IRCCS) Provide Details of New Studies and Findings in the Area of Blood Pressure (Threshold and Target for Blood Pressure Lowering in the Elderly) ... p.7027

Heart Disorders and Diseases - Heart Failure. Researchers from Institute for Medical Research Describe Findings in Heart Failure (Meta–Analysis of Association Between Mediastinal Radiotherapy and Long–Term Heart Failure) ... p.7028

Drugs and Therapies - Chemical Biology and Drug Design. Researchers from Institute of Bioorganic Chemistry and Petrochemistry Describe Findings in Chemical Biology and Drug Design (A New, Improved Hybrid Scoring Function for Molecular Docking and Scoring Based on AutoDock and AutoDock Vina) ... p.7029
January 14, 2017

Transverse Aortic Constriction. Researchers from Institute of Health Sciences Discuss Findings in Transverse Aortic Constriction (Ascending aortic adventitial remodeling and fibrosis are ameliorated with Apelin–13 in rats after TAC via suppression of the miRNA–122 and ... ) ... p.7030

Life Science Research - Developmental Biology. Researchers from Institute of Human Genetics Detail New Studies and Findings in the Area of Developmental Biology (Developmental inhibition of miR–iab8–3p disrupts mushroom body neuron structure and adult learning ability) ... p.7031

Oncology - Cancer Genetics. Researchers from Institute of Medicine Report Findings in Cancer Genetics [A der(11)t (4;11)(q21;p15) in a T–ALL/LBL patient] ... p.7032

Drugs and Therapies - Phytotherapy. Researchers from Institute of Medicine Report New Studies and Findings in the Area of Phytotherapy (In Vitro Assessment of Plants Growing in Cuba Belonging to Solanaceae Family Against Leishmania amazonensis) ... p.7033

Biotechnology - Liposomes. Researchers from Institute of Physical Chemistry Report on Findings in Liposomes (Imidazolium–Based Lipid Analogues and Their Interaction with Phosphatidylcholine Membranes) ... p.7034

Urologic Diseases and Conditions - Urinary Incontinence. Researchers from Institute of Urology Provide Details of New Studies and Findings in the Area of Urinary Incontinence (Urinary Incontinence Following Prostate Brachytherapy) ... p.7035

www.NewsRx.com

Oncology - Breast Cancer. Researchers from Isfahan University of Medical Sciences Detail Findings in Breast Cancer (Targeted delivery of doxorubicin to breast cancer cells by magnetic LHRH chitosan biocorjugated nanoparticles) ... p.7036

Hematologic Diseases and Conditions - Hemophilia. Researchers from Istanbul University Detail New Studies and Findings in the Area of Hemophilia (Benefits of radial head excision in patients with haemophilia: mid–term functional results) ... p.7037

Gram-Negative Bacteria - Haemophilus influenzae. Researchers from JMI Laboratories Discuss Findings in Haemophilus influenzae (In Vitro Activity of Delafloxacin Tested against Isolates of Streptococcus pneumoniae, Haemophilus influenzae, and Moraxella catarrhalis) ... p.7038

Skin Diseases and Conditions - Psoriasis. Researchers from Jichi Medical University Discuss Findings in Psoriasis (Effects of maxacalcitol ointment on skin lesions in patients with psoriasis receiving treatment with adalimumab) ... p.7039

Oncology - Colon Cancer. Researchers from Jilin University Describe Findings in Colon Cancer (Silencing of ATPase family AAA domain–containing protein 2 inhibits migration and invasion of colorectal cancer cells) ... p.7040

Oncology - Non-Small Cell Lung Cancer. Researchers from Jilin University Report Recent Findings in Non–Small Cell Lung Cancer (Upregulation of LncRNA–HIT promotes migration and invasion of non–small cell lung cancer cells by association with ZEB1) ... p.7041

Oncology - Prostate Cancer. Researchers from Jilin University Report on Findings in Prostate Cancer (Flavonoids intake and risk of prostate cancer: a meta–analysis of observational studies) ... p.7042
Gram-Negative Bacteria - Acinetobacter. Researchers from Johann Wolfgang Goethe–University Report Details of New Studies and Findings in the Area of Acinetobacter (Osmotic stress response in Acinetobacter baylyi: identification of a glycine–betaine biosynthesis pathway and regulation ...) ... p.7043

Oncology - Gastric Cancer. Researchers from Johns Hopkins University Hospital Discuss Findings in Gastric Cancer (Patterns of PD–L1 expression and CD8 T cell infiltration in gastric adenocarcinomas and associated immune stroma) ... p.7044

Immune System Diseases and Conditions - HIV/AIDS. Researchers from Johns Hopkins University Report Findings in HIV/AIDS (A Medical Care Missed Opportunity: Preexposure Prophylaxis and Young Black Men Who Have Sex With Men) ... p.7045

Nanotechnology - Nanoparticles. Researchers from Johns Hopkins University Report on Findings in Nanoparticles (Polysaccharide–based nanoparticles for theranostic nanomedicine) ... p.7046

Genetics - Medical Genetics. Researchers from Jonkoping University Describe Findings in Medical Genetics (Abnormal primary and permanent dentitions with ectodermal symptoms predict WNT10A deficiency) ... p.7047

Drugs and Therapies - Coumarins and Indandiones. Researchers from Juntendo University Report Recent Findings in Coumarins and Indandiones (Adequate time in therapeutic INR range using triple antithrombotic therapy is not associated with long-term cardiovascular events and major bleeding ...) ... p.7048

Immunology - Antibodies. Researchers from KIIT University Describe Findings in Antibodies (The Hha–TomB Toxin–Antitoxin System Shows Conditional Toxicity and Promotes Persister Cell Formation by Inhibiting Apoptosis–Like Death in S. Typhimurium) ... p.7049

Heart Disorders and Diseases - Heart Failure. Researchers from Kameda Medical Center Detail Findings in Heart Failure (Renal function on admission modifies prognostic impact of diuretics in acute heart failure: a propensity score matched and interaction analysis) ... p.7050

Oncology - Liver Cancer. Researchers from Kanazawa Medical University Report Details of New Studies and Findings in the Area of Liver Cancer (Association between transforming growth factor–beta 1–509 C > T variants and hepatocellular carcinoma susceptibility: a ...) ... p.7051

Hematologic Diseases and Conditions - Thrombocytopenia. Researchers from Kanazawa University Report Details of New Studies and Findings in the Area of Thrombocytopenia (Hypomegakaryocytic thrombocytopenia (HMT): an immune–mediated bone marrow failure characterized by an increased number of ...) ... p.7052

Cardiovascular Diseases and Conditions - Hypertension. Researchers from Kansai Medical University Report Findings in Hypertension (A Practical Training Program for Peripheral Radial Artery Catheterization in Adult Patients A Prospective, Randomized Controlled Trial) ... p.7053

Liver Diseases and Conditions - Hepatitis C Virus. Researchers from Kaohsiung Medical University Hospital Report Recent Findings in Hepatitis C Virus (Long–term efficacy of Peg–Interferon/Ribavirin with and without Lamivudine therapy for HBeAg–positive hepatitis B and C dual ...
January 14, 2017

Ethanol. Researchers from Karnatak University Report Recent Findings in Ethanol (Evaluation of wound healing property of Caesalpinia mimosoides Lam) … p.7055

Genetics - Human Genetics. Researchers from Karolinska Institute Detail New Studies and Findings in the Area of Human Genetics (One CNV Discordance in NRXN1 Observed Upon Genome–wide Screening in 38 Pairs of Adult Healthy Monozygotic Twins) … p.7057

Drugs and Therapies - Toxicology and Pharmacology. Researchers from Karolinska Institute Detail New Studies and Findings in Toxicology and Pharmacology (Surface passivity largely governs the bioaccessibility of nickel–based powder particles at human exposure conditions) … p.7058

Biological Factors - Inflammation Mediators. Researchers from Karolinska Institute Report on Findings in Inflammation Mediators (Dysfunctions in the migratory phenotype and properties of circulating immature transitional B cells during HIV–1 infection) … p.7059

Digestive System Diseases and Conditions - Dysphagia. Researchers from Karolinska University Hospital Detail Findings in Dysphagia (Relief of dysphagia during neoadjuvant treatment for cancer of the esophagus or gastroesophageal junction) … p.7060

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from Kashan University of Medical Sciences Report Recent Findings in Type 2 Diabetes (The effects of coenzyme Q10 administration on glucose homeostasis parameters, lipid profiles, biomarkers of inflammation and oxidative stress in ...) … p.7061

www.NewsRx.com

Oncology - Lymphoma. Researchers from Kasturba Medical College Detail Findings in Lymphoma (Distribution of nodal lymphomas in a referral hospital of Mangalore city) … p.7062

Drugs and Therapies - Central Nervous System Agents. Researchers from Kerman University of Medical Sciences Report on Findings in Central Nervous System Agents (Chemical Composition, Anticonvulsant Activity, and Toxicity of Essential Oil and Methanolic Extract of Elettaria cardamomum) … p.7063

Oncology - Acute Lymphoblastic Leukemia. Researchers from King Abdul–Aziz University Detail Findings in Acute Lymphoblastic Leukemia (L–Asparaginase Isolated from Phaseolus vulgaris Seeds Exhibited Potent Anti–Acute Lymphoblastic Leukemia Effects In–Vitro and Low Immunogenic ...) … p.7064

Drugs and Therapies - Antidepressants. Researchers from King’s College Discuss Findings in Antidepressants [S–adenosyl methionine (SAMe) for depression in adults] … p.7065

Immune System Diseases and Conditions - HIV/AIDS. Researchers from Kirby Institute Provide Details of New Studies and Findings in the Area of HIV/AIDS (Hospitalization for Anxiety and Mood Disorders in HIV–Infected and –Uninfected Gay and Bisexual Men) … p.7067

Cardiology. Researchers from Kitasato University Provide Details of New Studies and Findings in the Area of Cardiology (Contributions of Respiration and Heartbeat to the Pulmonary Blood Flow in the Fontan Circulation) … p.7068

Drugs and Therapies - Indomethacin Therapy. Researchers from Kobe University Detail Findings in Indomethacin Therapy (Preventative Effects of Sodium Alginate on Indomethacin–induced Small–intestinal Injury in Mice) … p.7069
Nanotechnology - Molecular Imaging. Researchers from Korea Institute of Radiological and Medical Sciences Provide Details of New Studies and Findings in the Area of Molecular Imaging (Detection of metastatic tumors after g-irradiation using longitudinal molecular imaging and gene ...)

Digestive System Diseases and Conditions - Peptic Ulcers. Researchers from Korea University Ansan Hospital Report Details of New Studies and Findings in the Area of Peptic Ulcers (Risk of Vascular Thrombotic Events Following Discontinuation of Antithrombotics After Peptic Ulcer Bleeding) ... p.7071

Liver Diseases and Conditions - Hepatomas. Researchers from Kurume University Report Recent Findings in Hepatomas (Inhibition of hypoxia-inducible factor via upregulation of von Hippel-Lindau protein induces "angiogenic switch off" in a hepatoma mouse model) ... p.7072

Immunology - CD Antigens. Researchers from Kyoto University Describe Findings in CD Antigens (Regeneration of CD8 alpha beta T Cells from T-cell-Derived iPSC Imparts Potent Tumor Antigen-Specific Cytotoxicity) ... p.7073

Proteins - Microtubule-Associated Proteins. Researchers from Kyoto University Discuss Findings in Microtubule-Associated Proteins (Microtubule density and landing rate as parameters to analyze tau protein in the MT-kinesin "gliding" assay) ... p.7074

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from Kyoto University Report New Studies and Findings in the Area of Type 2 Diabetes (Xanthoangelol and 4-Hydroxyderrcin Suppress Obesity-Induced Inflammatory Responses) ... p.7075

Phosphates. Researchers from Kyungpook National University Provide Details of New Studies and Findings in the Area of Phosphates (Suppressive effects of methylthiouracil on polyphosphate-mediated vascular inflammatory responses) ... p.7076

Kidney Diseases and Conditions - Chronic Kidney Disease. Researchers from Kyushu University Report Findings in Chronic Kidney Disease (Cardiorenal Syndrome in End-Stage Kidney Disease) ... p.7077

Autoimmune Diseases and Conditions - Multiple Sclerosis. Researchers from Kyushu University Report New Studies and Findings in the Area of Multiple Sclerosis (Th1 cells downregulate connexin 43 gap junctions in astrocytes via microglial activation) ... p.7078

Membrane Proteins - Antimicrobial Cationic Peptides. Researchers from La Trobe University Report Details of New Studies and Findings in the Area of Antimicrobial Cationic Peptides (Nicotiana alata Defensin Chimeras Reveal Differences in the Mechanism of Fungal and Tumor Cell Killing and an ...) ... p.7079

Rhabdoviridae Infections - Rabies. Researchers from Laboratory of Molecular Microbiology Report Details of New Studies and Findings in the Area of Rabies (Molecular optimization of rabies virus glycoprotein expression in Pichia pastoris) ... p.7080

Oncology - Non-Small Cell Lung Cancer. Researchers from Leiden University Medical Center Describe Findings in Non-Small Cell Lung Cancer (The positive prognostic effect of stromal CD8+ tumor-infiltrating T cells is restrained by the expression of HLA-E in non-small cell lung ...) ... p.7081
Neurodegenerative Diseases and Conditions - Alzheimer Disease. Researchers from Leonard Davis School of Gerontology Describe Findings in Alzheimer Disease (Interactions between inflammation, sex steroids, and Alzheimer's disease risk factors) ... p.7082

Oncology - Prostate Cancer. Researchers from Linkoping University Detail New Studies and Findings in the Area of Prostate Cancer (Predictors of early androgen deprivation treatment failure in prostate cancer with bone metastases) ... p.7083

Quality of Life. Researchers from Linkoping University Report New Studies and Findings in the Area of Quality of Life (Experiences of incontinence and pelvic floor muscle training after gynaecologic cancer treatment) ... p.7084

Myeloid Cells. Researchers from Logan College of Chiropractic Report New Studies and Findings in the Area of Myeloid Cells (Progesterone Receptor–Mediated Actions Regulate Remodeling of the Cervix in Preparation for Preterm Parturition) ... p.7085

Oncology - Cancer Care. Researchers from London Health Sciences Center Describe Findings in Cancer Care (Patient– and family–centered care: a qualitative exploration of oncologist perspectives) ... p.7086

Oncology - Melanoma. Researchers from Maharishi Markandeshwar University Report New Studies and Findings in the Area of Melanoma (Immunogenic decapeptide in melanoma immunotherapy) ... p.7088

Hormones - Anterior Pituitary Hormones. Researchers from Mahidol University Report on Findings in Anterior Pituitary Hormones (Prolactin receptor and osteogenic induction of prolactin in human periodontal ligament fibroblasts) ... p.7089

Drugs and Therapies - Central Nervous System Stimulants. Researchers from Manipal University Report Recent Findings in Central Nervous System Stimulants [Standardised extract of safed musli (Chlorophytum borivilianum) increases aphrodisiac potential besides being safe in male Wistar rats] ... p.7090

Oncology - Endometrial Cancer. Researchers from Mayo Clinic Report Details of New Studies and Findings in the Area of Endometrial Cancer (Disparities in Surgical Care Among Women With Endometrial Cancer) ... p.7091

Heart Disorders and Diseases - Heart Disease. Researchers from Mayo Clinic Report Recent Findings in Heart Disease (Association between coronary microvascular function and the vasa vasorum in patients with early coronary artery disease) ... p.7092

Life Science Research - Cell Biology. Researchers from McGill University Discuss Findings in Cell Biology (Genetic Drivers of Epigenetic and Transcriptional Variation in Human Immune Cells) ... p.7093

Pharmacology. Researchers from McGill University Discuss Findings in Pharmacology [D–Lysergic Acid Diethylamide (LSD) as a Model of Psychosis: Mechanism of Action and Pharmacology] ... p.7094
January 14, 2017

Drugs and Therapies - Coumarins and Indandiones. Researchers from McMaster University Describe Findings in Coumarins and Indandiones (Bleeding with direct oral anticoagulants vs warfarin: clinical experience) … p.7095

Nutritional and Metabolic Diseases and Conditions - Celiac Disease. Researchers from McMaster University Discuss Findings in Celiac Disease (Duodenal Bacteria From Patients With Celiac Disease and Healthy Subjects Distinctly Affect Gluten Breakdown and Immunogenicity) … p.7096

Oncology - Medulloblastomas. Researchers from Medical College Describe Findings in Medulloblastomas (An analysis of medulloblastoma: 10 year experience of a referral institution in South India) … p.7097

Drugs and Therapies - Cholinergic Muscle Stimulants. Researchers from Medical College Detail Findings in Cholinergic Muscle Stimulants [Hopeahainol A binds reversibly at the acetylcholinesterase (AChE) peripheral site and inhibits enzyme activity with a novel higher order concentration dependence] … p.7098

Leukocyte Diseases and Conditions - Eosinophilia. Researchers from Medical College Discuss Findings in Eosinophilia (BCR–JAK2 fusion in a myeloproliferative neoplasm with associated eosinophilia) … p.7099

Nutritional and Metabolic Diseases and Conditions - Vitamin D Deficiency. Researchers from Medical University Describe Findings in Vitamin D Deficiency (Association of vitamin D receptor gene polymorphisms and serum 25–hydroxyvitamin D levels with Crohn's disease in Chinese patients) … p.7100

Life Science Research - Apoptosis and Cell Death. Researchers from Medical University Detail Findings in Apoptosis and Cell Death (Conditional knockdown of BCL2A1 reveals rate–limiting roles in BCR–dependent B–cell survival) … p.7101

Genetics - Medical Genetics. Researchers from Medical University Detail Findings in Medical Genetics (SETD5 Loss–of–Function Mutation as a Likely Cause of a Familial Syndromic Intellectual Disability with Variable Phenotypic Expression) … p.7102

Skin Diseases and Conditions - Melanosis. Researchers from Medical University Discuss Findings in Melanosis (Comparison of efficacy of products containing azelaic acid in melasma treatment) … p.7103

Oncology - Multiple Myeloma. Researchers from Memorial Sloan–Kettering Cancer Center Detail New Studies and Findings in the Area of Multiple Myeloma (Upfront plerixafor plus G–CSF versus cyclophosphamide plus G–CSF for stem cell mobilization in multiple myeloma: efficacy ...) … p.7104

Oncology - Thyroid Cancer. Researchers from Memorial Sloan–Kettering Cancer Center Discuss Findings in Thyroid Cancer (Nodal metastases in thyroid cancer: prognostic implications and management) … p.7105

Digestive System Diseases and Conditions - Mucositis. Researchers from Memorial Sloan–Kettering Cancer Center Report Findings in Mucositis (Role of Gabapentin in Managing Mucositis Pain in Patients Undergoing Radiation Therapy to the Head and Neck) … p.7106

Cardiovascular Diseases and Conditions - Vascular Malformations. Researchers from Memorial Sloan–Kettering Cancer Center Report Findings in Vascular Malformations (Vascular malformation with phleboliths involving the parotid gland: A case
January 14, 2017

www.NewsRx.com

Heart Disorders and Diseases - Heart Disease. Researchers from Morristown Medical Center Report Recent Findings in Heart Disease (Bleeding Events Before Coronary Angiography in Patients With Non–ST–Segment Elevation Acute Coronary Syndrome) … p.7113

Enzymes and Coenzymes - Hydro-Lyases. Researchers from Mukogawa Women's University Describe Findings in Hydro-Lyases (Reduced Production of Hydrogen Sulfide and Sulfane Sulfur Due to Low Cystathionine beta–Synthase Levels in Brain Astrocytes of Stroke–Prone Spontaneously ...) … p.7115

Arteriovenous Malformation. Researchers from NHS Foundation Trust Discuss Findings in Arteriovenous Malformation (Novel use of 4D–CTA in imaging of intranidal aneurysms in an acutely ruptured arteriovenous malformation: is this the way forward?) … p.7116

Reproductive Medicine - Male Infertility. Researchers from Nanjing Medical University Report Details of New Studies and Findings in the Area of Male Infertility (Common SNP in hsa–miR–196a–2 increases hsa–miR–196a–5p expression and predisposes to idiopathic male infertility in Chinese ...) … p.7117

Oncology - Cancer Risk. Researchers from Nanjing Medical University Report Recent Findings in Cancer Risk (CXC motif chemokine receptor 4 gene polymorphism and cancer risk) … p.7118

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. Researchers from Metabolic and Atherosclerosis Research Center Report on Findings in Hypercholesterolemia (What role will proprotein convertase subtilisin/kexin type 9 inhibitors play in hyperlipidemia management?) … p.7107

Cardiology. Researchers from Midwestern University Report Details of New Studies and Findings in the Area of Cardiology (Sex–Dependent Effects of Dietary Genistein on Echocardiographic Profile and Cardiac GLUT4 Signaling in Mice) … p.7108

Brachytherapy. Researchers from Misericordia Hospital Discuss Findings in Brachytherapy (Recurrences and toxicity after adjuvant vaginal brachytherapy in Stage I–II endometrial cancer: A monoinstitutional experience) … p.7109

Central Nervous System. Researchers from Missouri State University Report Recent Findings in Central Nervous System (Elevated Levels Of Calcitonin Gene–related Peptide In Upper Spinal Cord Promotes Sensitization Of Primary Trigeminal Nociceptive Neurons) … p.7110

Oncology - Prostate Cancer. Researchers from Molecular Oncology Research Institute Discuss Findings in Prostate Cancer (Synthetic Lethality in PTEN–Mutant Prostate Cancer Is Induced by Combinatorial PI3K/Akt and BCL–X–L Inhibition) … p.7111

Viral RNA. Researchers from Montana State University Report Findings in Viral RNA (Programmed Self–Assembly of an Active P22–Cas9 Nanocarrier System) … p.7112

report with a review of the literature) … p.7107
Drugs and Therapies - Clopidogrel Therapy. Researchers from Nanjing Medical University Report Recent Findings in Clopidogrel Therapy (Interleukin–10 does not modulate clopidogrel platelet response in mice) … p.7120

Oncology - Lung Cancer. Researchers from Nanjing Medical University Report Recent Findings in Lung Cancer (Adverse events risk associated with anti–VEGFR agents in the treatment of advanced nonsmall–cell lung cancer A meta–analysis) … p.7121

Oncology - Non–Small Cell Lung Cancer. Researchers from Nanjing University Discuss Findings in Non–Small Cell Lung Cancer (Inhibition of autophagy by andrographolide resensitizes cisplatin–resistant non–small cell lung carcinoma cells via activation of the Akt/mTOR pathway) … p.7122

Materials Research - Applied Materials & Interfaces. Researchers from Nanjing University Report Findings in Applied Materials & Interfaces (Highly Sensitive Colorimetric Cancer Cell Detection Based on Dual Signal Amplification) … p.7123

Oncology - Colon Cancer. Researchers from Nanjing University Report New Studies and Findings in the Area of Colon Cancer (Andrographolide reversed 5–FU resistance in human colorectal cancer by elevating BAX expression) … p.7124

Oncology - Liver Cancer. Researchers from Nantong University Report on Findings in Liver Cancer (High expression of TRIM44 is associated with enhanced cell proliferation, migration, invasion, and resistance to doxorubicin in hepatocellular carcinoma) … p.7125

Digestive System Diseases and Conditions - Colorectal Neoplasms. Researchers from National Cancer Center Report Recent Findings in Colorectal Neoplasms (Sensitivity of 2–[F–18]fluoro–2–deoxyglucose positron emission tomography for advanced colorectal neoplasms: a large–scale analysis of 7505 asymptomatic …) … p.7126

Oncology - Liver Cancer. Researchers from National Cancer Institute Describe Findings in Liver Cancer (Drug–eluting beads versus conventional chemoembolization for the treatment of unresectable hepatocellular carcinoma) … p.7127

Pharmacokinetics. Researchers from National Cancer Institute Detail Findings in Pharmacokinetics (Effects of UGT1A1 genotype on the pharmacokinetics, pharmacodynamics, and toxicities of belinostat administered by 48–hour continuous infusion in patients with …) … p.7128

Genetics - Medical Genetics. Researchers from National Cancer Institute Report New Studies and Findings in the Area of Medical Genetics (Research participant interest in primary, secondary, and incidental genomic findings) … p.7129

Life Science Research - Molecular and Cellular Biology. Researchers from National Cancer Institute Report New Studies and Findings in the Area of Molecular and Cellular Biology (Direct Regulation of Alternative Splicing by SMAD3 through PCBP1 Is Essential to the Tumor–Promoting Role of TGF–beta) … p.7130

Pharmacokinetics. Researchers from National Cancer Institute Report New Studies and Findings in the Area of Pharmacokinetics (UGT1A1 genotype–dependent dose adjustment of belinostat in patients with advanced cancers using population pharmacokinetic modeling and …) … p.7131
January 14, 2017

Heart Disorders and Diseases - Heart Attack. Researchers from National Cerebral and Cardiovascular Center Describe Findings in Heart Attack (Lipoprotein apheresis is essential for managing pregnancies in patients with homozygous familial hypercholesterolemia: Seven case series and ...) ... p.7132

Oncology - Lung Cancer. Researchers from National Dong Hwa University Report Findings in Lung Cancer (Excavatolide B inhibits nonsmall cell lung cancer proliferation by altering peroxisome proliferator activated receptor gamma expression and PTEN/AKT/NF–Kb expression) ... p.7133

Mental Health Diseases and Conditions - Bipolar Disorders. Researchers from National Institute of Neuroscience Report Findings in Bipolar Disorders (Effects of ankyrin 3 gene risk variants on brain structures in patients with bipolar disorder and healthy subjects) ... p.7134

Neurodegenerative Diseases and Conditions - Amyotrophic Lateral Sclerosis. Researchers from National Institute of Sensory Organs Report Findings in Amyotrophic Lateral Sclerosis (Significance of optineurin mutations in glaucoma and other diseases) ... p.7135

Apoptosis. Researchers from National Institute of Technology Report Details of New Studies and Findings in the Area of Apoptosis (Bacopa monnieri–Induced Protective Autophagy Inhibits Benzo[a]pyrene–Mediated Apoptosis) ... p.7137

Nutritional and Metabolic Diseases and Conditions - Smith–Lemli–Opitz Syndrome. Researchers from National Institutes of Health Detail New Studies and Findings in the Area of Smith–Lemli–Opitz Syndrome (Modeling Smith–Lemli–Opitz syndrome with induced pluripotent stem cells reveals a causal role for Wnt/b–catenin defects in ...) ... p.7138

Drugs and Therapies - Adrenal Cortical Steroids. Researchers from National Institutes of Health Provide Details of New Studies and Findings in the Area of Adrenal Cortical Steroids (Effects of Systemically Administered Hydrocortisone on the Human Immunome) ... p.7139

Science. Researchers from National Institutes of Health Report Details of New Studies and Findings in the Area of Science (WRN regulates pathway choice between classical and alternative non–homologous end joining) ... p.7140

Nutritional and Metabolic Diseases and Conditions - Vitamin D Deficiency. Researchers from National Institutes of Health Report Recent Findings in Vitamin D Deficiency (Vitamin D Deficiency Is Associated With Endothelial Dysfunction and Increases Type I Interferon Gene Expression in a Murine Model of Systemic Lupus ...) ... p.7140

Perceptual Diseases and Conditions - Prosopagnosia. Researchers from National Neurology Institute Report Findings in Prosopagnosia (Congenital Prosopagnosia Is Associated With A Genetic Variation In The Oxytocin Receptor (oxtr) Gene: An Exploratory Study) ... p.7141

Central Nervous System Diseases and Conditions - Moyamoya Disease. Researchers from Neurological Institute Detail New Studies and Findings in the Area of Moyamoya Disease (Research Progresses in Understanding the Pathophysiology of Moyamoya Disease) ... p.7142

Health and Medicine - Sexual and Reproductive Health. Researchers from New York University Detail New Studies and Findings in the Area of Sexual and Reproductive Health (Contextual factors in geosocial–networking smartphone application use and engagement in condomless anal intercourse among gay, ...) … p.7144

Life Science Research - Biosocieties. Researchers from New York University Report Details of New Studies and Findings in the Area of Biosocieties (Big data, small kids: Medico–scientific, familial and advocacy visions of human brains) … p.7145

Drugs and Therapies - Antimicrobials. Researchers from Nicolaus Copernicus University Describe Findings in Antimicrobials (Antimicrobial properties of biosynthesized silver nanoparticles studied by flow cytometry and related techniques) … p.7146

Drugs and Therapies - Mitotic Inhibitors. Researchers from Ningxia Medical University Describe Findings in Mitotic Inhibitors (CD44 Receptor Targeting and Endosomal pH–Sensitive Dual Functional Hyaluronic Acid Micelles for Intracellular Paclitaxel Delivery) … p.7147

Surgery - Hysterectomy. Researchers from Northeast Normal University Provide Details of New Studies and Findings in the Area of Hysterectomy (The Association between Endometriosis, Tubal Ligation, Hysterectomy and Epithelial Ovarian Cancer: Meta–Analyses) … p.7148

Eye Diseases and Conditions - Age-Related Macular Degeneration. Researchers from Northwestern University Detail Findings in Age-Related Macular Degeneration (Macular atrophy in patients with long–term anti–VEGF treatment for neovascular age–related macular degeneration) … p.7149

www.NewsRx.com

Angiology. Researchers from Northwestern University Discuss Findings in Angiology (Lack of Association Between Extracranial Carotid and Vertebral Artery Disease and Stroke After Transcatheter Aortic Valve Replacement) … p.7150

Heart Disorders and Diseases - Atrial Fibrillation. Researchers from Northwestern University Feinberg School of Medicine Discuss Findings in Atrial Fibrillation [Targeted Anticoagulation for Atrial Fibrillation Guided by Continuous Rhythm Assessment With an Insertable Cardiac Monitor: The Rhythm ...] … p.7151

Oncology - Gliomas. Researchers from Northwestern University Report Details of New Studies and Findings in the Area of Gliomas (Mutant IDH1 and thrombosis in gliomas) … p.7153

Heart Disorders and Diseases - Andersen-Tawil Syndrome. Researchers from Northwestern University Report Findings in Andersen–Tawil Syndrome (Novel calmodulin mutations associated with congenital long QT syndrome affect calcium current in human cardiomyocytes) … p.7154

Oncology - Liver Cancer. Researchers from Northwestern University Report Findings in Liver Cancer (Current Guidelines for the Diagnosis and Management of Hepatocellular Carcinoma: A Comparative Review) … p.7155

Gram-Negative Bacteria - Acinetobacter baumannii. Researchers from Ohio State University Discuss Findings in Acinetobacter baumannii (Correlation of Checkerboard Synergy Testing with Time–Kill Analysis and Clinical Outcomes of Extensively Drug–Resistant Acinetobacter baumannii Respiratory ...) … p.7156
January 14, 2017

Life Science Research - Physiology. Researchers from Oregon Health and Science University Report Findings in Physiology (SPAK and OSR1 play essential roles in potassium homeostasis through actions on the distal convoluted tubule) ... p.7157

Oncology - Liver Cancer. Researchers from Osaka Medical College Describe Findings in Liver Cancer (Rosuvastatin as a potential preventive drug for the development of hepatocellular carcinoma associated with non-alcoholic fatty liver disease in mice) ... p.7158

Therapeutics. Researchers from Osaka University Graduate School of Medicine Describe Findings in Therapeutics (Predictors of Survival in Patients With FIGO Stage IVB Cervical Cancer) ... p.7159

Oncology - Colon Cancer. Researchers from Osaka University Report New Studies and Findings in the Area of Colon Cancer (Metabolic Adaptation to Nutritional Stress in Human Colorectal Cancer) ... p.7160

Cardiology. Researchers from PRESTO Report Findings in Cardiology (TRPC3–GEF–H1 axis mediates pressure overload–induced cardiac fibrosis) ... p.7161

Enzymes and Coenzymes - Cysteine Endopeptidases. Researchers from Peking Union Medical College Describe Findings in Cysteine Endopeptidases (Interferon alpha Induces the Apoptosis of Cervical Cancer HeLa Cells by Activating both the Intrinsic Mitochondrial Pathway and Endoplasmic Reticulum ...) ... p.7162

Musculoskeletal Diseases and Conditions - Gout. Researchers from Peking Union Medical College Provide Details of New Studies and Findings in the Area of Gout (Clinical characteristics of early– and late–onset gout A cross–sectional observational study from a Chinese gout clinic) ... p.7163

Oncology - Rectal Cancer. Researchers from Peking Union Medical College Report Recent Findings in Rectal Cancer (Interim analysis of postoperative chemoradiotherapy with capecitabine and oxaliplatin versus capecitabine alone for pathological stage II and III rectal ...) ... p.7164

Inflammation. Researchers from Peking University Detail New Studies and Findings in the Area of Inflammation [Intermedin(1–53) Protects Against Myocardial Fibrosis by Inhibiting Endoplasmic Reticulum Stress and Inflammation Induced by Homocysteine in ...] ... p.7165

Oncology - Anaplastic Large Cell Lymphoma. Researchers from Peking University Provide Details of New Studies and Findings in the Area of Anaplastic Large Cell Lymphoma (Primary central nervous system ALK–positive anaplastic large cell lymphoma in an adult A rare case report) ... p.7166

Amyotrophic Lateral Sclerosis. Researchers from Peking University Third Hospital Detail Findings in Amyotrophic Lateral Sclerosis (Single–nucleotide Polymorphism rs2275294 in ZNF512B is not Associated with Susceptibility to Amyotrophic Lateral Sclerosis in a Large Chinese ...) ... p.7167

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from Pennington Biomedical Research Center Report Details of New Studies and Findings in the Area of Obesity (Change in Obesity Prevalence across the United States Is Influenced by
January 14, 2017

Recreational and Healthcare Contexts, Food ...) ... p.7168

Oncology - Squamous Cell Carcinoma. Researchers from People’s Hospital Describe Findings in Squamous Cell Carcinoma (Association of genetic polymorphisms in PTEN and additional gene–gene interaction with risk of esophageal squamous cell carcinoma in Chinese Han population) ... p.7169

Drugs and Therapies - Antiretrovirals. Researchers from People’s Hospital Detail Findings in Antiretrovirals (Increased occurrence of mutant rtI233V of HBV in patients receiving adefovir therapy) ... p.7170

Drugs and Therapies - Pharmacoepidemiology. Researchers from Pfizer Report New Studies and Findings in the Area of Pharmacoepidemiology (Recommendations for benefit–risk assessment methodologies and visual representations) ... p.7171

Immune System Diseases and Conditions - HIV/AIDS. Researchers from Pontifical Catholic University Discuss Findings in HIV/AIDS (Structural domains within the HIV–1 mRNA and the ribosomal protein S25 influence cap–independent translation initiation) ... p.7173

Cardiology. Researchers from Porto Alegre Hospital Clinic Discuss Findings in Cardiology (Comparing medication adherence tools scores and number of controlled diseases among low literacy patients discharged from a Brazilian cardiology ward) ... p.7174

Nosocomial Infections. Researchers from Public Health Agency of Canada Report Details of New Studies and Findings in the Area of Nosocomial Infections (Results from the Canadian Nosocomial Infection Surveillance Program on Carbapenemase–Producing Enterobacteriaceae, ...) ... p.7175

www.NewsRx.com

Oncology - Cancer Biomarkers. Researchers from Purdue University Report Details of New Studies and Findings in the Area of Cancer Biomarkers (Three–Dimensionally Functionalized Reverse Phase Glycoprotein Array for Cancer Biomarker Discovery and Validation) ... p.7176

Oncology - Liver Cancer. Researchers from Putian University Provide Details of New Studies and Findings in the Area of Liver Cancer (Tissue Levels of Stefin A and Stefin B in Hepatocellular Carcinoma) ... p.7177

Immune System Diseases and Conditions - Allergic Rhinitis. Researchers from Qilu Hospital of Shandong University Report Recent Findings in Allergic Rhinitis (Role of interleukin–6 polymorphisms in the development of allergic rhinitis) ... p.7178

Mental Health Diseases and Conditions - Depression. Researchers from Queensland University of Technology Describe Findings in Depression (Shared Genetic Factors in the Co–Occurrence of Depression and Fatigue) ... p.7179

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Researchers from Queensland University of Technology Report Recent Findings in Type 1 Diabetes Mellitus (Vision Recovery Despite Retinal Ganglion Cell Loss in Leber’s Hereditary Optic Neuropathy) ... p.7180

Biotechnology - Microbiology and Biotechnology. Researchers from RWTH Aachen University Detail Findings in Microbiology and Biotechnology (Ustilago maydis produces itaconic acid via the unusual intermediate trans–aconitate) ... p.7181
Parkinson's Disease. Researchers from RWTH Aachen University Report on Findings in Parkinson's Disease (Mice lacking Faim2 show increased cell death in the MPTP mouse model of Parkinson disease) … p.7182

Women's Health - Obstetrics and Gynecology. Researchers from Rabin Medical Center Report Recent Findings in Obstetrics and Gynecology (Pregnancy Outcome in Women with Decreased Sensation of Fetal Movements at Term According to Parity) … p.7183

Heart Disorders and Diseases - Aortitis. Researchers from Ramon y Cajal Hospital Report on Findings in Aortitis (Aortitis With Associated Left Main Coronary Artery Stenosis: Role of Cardiac Computed Tomography) … p.7184

Apoptosis. Researchers from Regina Elena Cancer Institute Report Findings in Apoptosis (Apoptosis induced by a HIPK2 full–length–specific siRNA is due to off–target effects rather than prevalence of HIPK2–De8 isoform) … p.7185

Oncology - Acute Lymphoblastic Leukemia. Researchers from Regina Elena National Institute for Cancer Treatment and Research Report Details of New Studies and Findings in the Area of Acute Lymphoblastic Leukemia (Ponatinib Induces a Persistent Molecular Response and Graft–versus–Host ...) … p.7186

Oncology - Cancer Prevention. Researchers from Research Institute for Clinical Oncology Detail New Studies and Findings in the Area of Cancer Prevention (Biophysical Approach to Mechanisms of Cancer Prevention and Treatment with Green Tea Catechins) … p.7188

Lung Diseases and Conditions - Cystic Fibrosis. Researchers from Royal Brisbane and Women's Hospital Describe Findings in Cystic Fibrosis (Bayesian Estimation of Tobramycin Exposure in Patients with Cystic Fibrosis) … p.7189

Cardiovascular Research. Researchers from Royal College of Surgeons in Ireland Discuss Findings in Cardiovascular Research (Impact analysis studies of clinical prediction rules relevant to primary care: a systematic review) … p.7190

Lung Diseases and Conditions - Pulmonary Hypertension. Researchers from Royal Melbourne Hospital Report Recent Findings in Pulmonary Hypertension (Normalisation of hypoxaemia following successful percutaneous closure of a bidirectional shunting secundum atrial septal defect without pulmonary ...) … p.7191

Diabetes. Researchers from Royal North Shore Hospital Provide Details of New Studies and Findings in the Area of Diabetes [Management of patients with diabetes and CKD: conclusions from a "Kidney Disease: Improving Global Outcomes" (KDIGO) Controversies ...] … p.7192

Heart Disorders and Diseases - Heart Disease. Researchers from Royal Perth Hospital Provide Details of New Studies and Findings in the Area of Heart Disease (Angiographic progression of coronary atherosclerosis in patients with familial hypercholesterolaemia treated with non–statin ...) … p.7192
Surgical Procedures - Thoracoscopy.
Researchers from Saga University Describe Findings in Thoracoscopy (Survival outcomes of 220 consecutive patients with three–staged thoracoscopic esophagectomy) ... p.7194

Oncology - Acute Myeloid Leukemia.
Researchers from Saga University Report Findings in Acute Myeloid Leukemia (Preclinical activity of the novel B–cell–specific Moloney murine leukemia virus integration site 1 inhibitor PTC–209 in acute myeloid leukemia: Implications for ...) ... p.7195

Eye Diseases and Conditions - Blindness.
Researchers from Salus University Detail Findings in Blindness [The R838S Mutation in Retinal Guanylyl Cyclase 1 (RetGC1) Alters Calcium Sensitivity of cGMP Synthesis in the Retina and Causes Blindness in Transgenic Mice] ... p.7196

Heart Disorders and Diseases - Takotsubo Cardiomyopathy.
Researchers from San Raffaele University Hospital Detail New Studies and Findings in the Area of Takotsubo Cardiomyopathy (Takotsubo Cardiomyopathy Following Percardiocentesis After Aortic Valve Repair and Ascending Aorta Replacement) ... p.7197

Genetics - Genetics and Cancer.
Researchers from Santa Chiara Hospital Describe Findings in Genetics and Cancer (Different Prognostic Roles of Tumor Suppressor Gene BAP1 in Cancer: A Systematic Review with Meta–Analysis) ... p.7198

Angiotensins.
Researchers from Sao Paulo State University Describe Findings in Angiotensins (Overexpression of AT2R in the solitary–vagal complex improves baroreflex in the spontaneously hypertensive rat) ... p.7199

Cardiovascular Diseases and Conditions - Hypertension.
Researchers from Sao Paulo State University Provide Details of New Studies and Findings in the Area of Hypertension (Sodium hydrosulfide prevents hypertension and increases in vascular endothelial growth factor and soluble fms–like tyrosine ...) ... p.7200

Health and Medicine - Nephrology.
Researchers from Sapporo City General Hospital Discuss Findings in Nephrology (De novo proliferative glomerulonephritis with monoclonal IgG deposits of the IgG1 kappa subtype in a kidney allograft) ... p.7201

Drugs and Therapies - Drug Delivery Systems.
Researchers from School of Chemistry Describe Findings in Drug Delivery Systems (Profluorescent PPV–Based Micellar System as a Versatile Probe for Bioimaging and Drug Delivery) ... p.7202

Proteomics.
Researchers from School of Chemistry and Biochemistry Discuss Findings in Proteomics (Simultaneous Time–Dependent Surface–Enhanced Raman Spectroscopy, Metabolomics, and Proteomics Reveal Cancer Cell Death Mechanisms Associated with Gold Nanorod ...) ... p.7203

Drugs and Therapies - Codeine Therapy.
Researchers from School of Health Sciences Describe Findings in Codeine Therapy (Best Practices and Innovations for Managing Codeine Misuse and Dependence) ... p.7204

Query Fever.
Researchers from School of Medical Sciences Provide Details of New Studies and Findings in the Area of Query Fever (The natural history of acute Q fever: a prospective Australian cohort) ... p.7205

Drugs and Therapies - Coagulation Modifiers.
Researchers from School of Medicine Describe Findings in Coagulation Modifiers (Methods to decrease blood loss during liver resection: a network meta–analysis) ... p.7206
January 14, 2017

Health and Medicine - Gastroenterology. Researchers from School of Medicine Report New Studies and Findings in the Area of Gastroenterology (Bisphosphonates as potential adjuvants for patients with cancers of the digestive system) … p.7208

Oncology - Gastric Cancer. Researchers from School of Pharmaceutical Science Detail Findings in Gastric Cancer (Auranofin induces apoptosis by ROS–mediated ER stress and mitochondrial dysfunction and displayed synergistic lethality with piperlongumine in gastric cancer) … p.7209

Mental Health Diseases and Conditions - Bipolar Disorders. Researchers from School of Psychiatry Describe Findings in Bipolar Disorders (Study design and methodology for a multicentre, randomised controlled trial of transcranial direct current stimulation as a treatment for unipolar and bipolar ...) … p.7210

Drugs and Therapies - Immunotherapy. Researchers from Second Military Medical University Discuss Findings in Immunotherapy (Antitumor Activity of cGAMP via Stimulation of cGAS–cGAMP–STING–IRF3 Mediated Innate Immune Response) … p.7212

Cardiology. Researchers from Semmelweis University Report Recent Findings in Cardiology (Fracture and Lung Penetration of a Left Ventricular Lead Stabilized by Retained Stylet) … p.7213

www.NewsRx.com

Aldehydes. Researchers from Seoul National University Report Findings in Aldehydes (Cystathionine metabolic enzymes play a role in the inflammation resolution of human keratinocytes in response to sub–cytotoxic formaldehyde exposure) … p.7214

Oncology - Breast Cancer. Researchers from Shaheed Beheshti University of Medical Sciences Report Details of New Studies and Findings in the Area of Breast Cancer (Breast cancer classification and prognostication through diverse systems along with recent emerging ...) … p.7215

Drugs and Therapies - Antibiotics. Researchers from Shandong University Detail Findings in Antibiotics (A bicyclo–hairpin probe mediated strand displacement amplification strategy for label–free and sensitive detection of bleomycin) … p.7216

Biotechnology - Xenografts. Researchers from Shanghai Jiao–Tong University Provide Details of New Studies and Findings in the Area of Xenografts (The Marine–Derived Oligosaccharide Sulfate MS80, a Novel Transforming Growth Factor beta 1 Inhibitor, Reverses Epithelial ...) … p.7217

Oncology - Liver Cancer. Researchers from Shanghai Jiao–Tong University Report Findings in Liver Cancer (NRBP2 Overexpression Increases the Chemosensitivity of Hepatocellular Carcinoma Cells via Akt Signaling) … p.7218

Oncology - Lung Cancer. Researchers from Shanghai University Report Details of New Studies and Findings in the Area of Lung Cancer (Panax notoginseng saponins attenuate lung cancer growth in part through modulating the level of Met/miR–222 axis) … p.7219
January 14, 2017

Science - Food Science. Researchers from Shanxi University Discuss Findings in Food Science (Resveratrol Induces Cancer Cell Apoptosis through MiR–326/PKM2–Mediated ER Stress and Mitochondrial Fission) … p.7220

Musculoskeletal Diseases and Conditions - Osteolysis. Researchers from Shaoxing University Report Details of New Studies and Findings in the Area of Osteolysis (Puerarin Prevents LPS–Induced Osteoclast Formation and Bone Loss via Inhibition of Akt Activation) … p.7221

Inflammatory Bowel Diseases and Conditions - Ulcerative Colitis. Researchers from Sheba Medical Center Report on Findings in Ulcerative Colitis (Combination of Corticosteroids with 5–Aminosalicylic Acids Compared to Corticosteroids Alone for Hospitalized Patients with Active Ulcerative Colitis) … p.7222

Reproductive Medicine - Female Infertility. Researchers from Shiraz University of Medical Sciences Report New Studies and Findings in the Area of Female Infertility (Effects of estradiol injection on outcome of in–vitro fertilization: a randomized, double–blind, placebo controlled trial) … p.7223

Drugs and Therapies - Ethnopharmacology. Researchers from Shiraz University of Medical Sciences Report on Findings in Ethnopharmacology (Ethnomedicine for neonatal jaundice: A cross–sectional survey in Qom, Iran) … p.7224

Drugs and Therapies - Cancer Therapy. Researchers from Sichuan University Report Details of New Studies and Findings in Cancer Therapy (Small Molecule TH–39 Potentially Targets Hecl/Nek2 Interaction and Exhibits Antitumor Efficacy in K562 Cells via G0/G1 Cell Cycle ...) … p.7225

www.NewsRx.com

Acetanilides. Researchers from Sichuan University Report Recent Findings in Acetanilides (Effects of Liposomes Charge on Extending Sciatic Nerve Blockade of N–ethyl Bromide of Lidocaine in Rats) … p.7226

Oncology - Cancer Prevention. Researchers from Sloan Kettering Institute Discuss Findings in Cancer Prevention (The future of clinical cancer genomics) … p.7227

Oncology - Prostate Cancer. Researchers from Soochow University Discuss Findings in Prostate Cancer (Inhibition of EZH2 by chemo– and radiotherapy agents and small molecule inhibitors induces cell death in castration–resistant prostate cancer) … p.7228

Cardiovascular Diseases and Conditions - Aneurysm. Researchers from Soonchunhyang University Provide Details of New Studies and Findings in the Area of Aneurysm (Direct Carotid Exposure for Neuroendovascular Approaches) … p.7229

Drugs and Therapies - Antiretrovirals. Researchers from Sorbonne University Report Recent Findings in Antiretrovirals (Influence of geographic origin, sex, and HIV transmission group on the outcome of first–line combined antiretroviral therapy in France) … p.7230

Oncology - Non-Small Cell Lung Cancer. Researchers from Southern Medical University Describe Findings in Non–Small Cell Lung Cancer (Randomized Adjuvant Chemotherapy of EGFR–Mutated Non–Small Cell Lung Cancer Patients with or without Icotinib Consolidation Therapy) … p.7231

Oncology - Breast Cancer. Researchers from Southern Medical University Provide Details of New Studies and Findings in the Area of Breast Cancer (Doublecortin–like kinase 1 expression associates with breast cancer with neuroendocrine differentiation) … p.7232
January 14, 2017

Oncology - Pancreatic Cancer. Researchers from Southern Medical University Report Details of New Studies and Findings in the Area of Pancreatic Cancer (Twist promotes angiogenesis in pancreatic cancer by targeting miR–497/VEGFA axis) ... p.7233

Oncology - Liver Cancer. Researchers from Southern Medical University Report New Studies and Findings in the Area of Liver Cancer (Hyperthermia enhances 17–DMAG efficacy in hepatocellular carcinoma cells with aggravated DNA damage and impaired G2/M transition) ... p.7234

Fluids Research. Researchers from Southwest Jiaotong University Provide Details of New Studies and Findings in the Area of Fluids Research (Geometry design of herringbone structures for cancer cell capture in a microfluidic device) ... p.7235

Drugs and Therapies - Controlled Release Research. Researchers from Southwest Jiaotong University Report New Studies and Findings in the Area of Controlled Release Research (Shape effects of electrospun fiber rods on the tissue distribution and antitumor efficacy) ... p.7236

Health and Medicine - Retinal and Eye Research. Researchers from Spanish National Research Council (CSIC) Detail New Studies and Findings in the Area of Retinal and Eye Research (Autophagy in the eye: Development, degeneration, and aging) ... p.7237

Drugs and Therapies - Pharmacology. Researchers from St. George's University of London Provide Details of New Studies and Findings in the Area of Pharmacology (The calcilytics Calhex–231 and NPS 2143 and the calcimimetic Calindol reduce vascular reactivity via inhibition of ...) ... p.7238

Peptides and Proteins. Researchers from St. James University Report Findings in Peptides and Proteins (Immunogenicity of self tumor associated proteins is enhanced through protein truncation) ... p.7239

Heart Disorders and Diseases - Atrial Fibrillation. Researchers from St. Louis University Detail Findings in Atrial Fibrillation (A randomized, prospective pilot comparison of 3 atrial appendage elimination techniques: Internal ligation, stapled excision, and surgical excision) ... p.7240

Oncology - Gastric Cancer. Researchers from Stanford University Describe Findings in Gastric Cancer (Genetic predisposition to gastric cancer) ... p.7241

Ebola Virus. Researchers from Stanford University Detail New Studies and Findings in the Area of Ebola Virus (Diagnosis of Ebola Virus Disease: Past, Present, and Future) ... p.7242

Biotechnology - Biologics. Researchers from Stanford University Discuss Findings in Biologics (Emerging Strategies for Developing Next–Generation Protein Therapeutics for Cancer Treatment) ... p.7243

Drugs and Therapies - Drug Delivery Systems. Researchers from Stanford University Discuss Findings in Drug Delivery Systems (Engineered knottin peptides as diagnostics, therapeutics, and drug delivery vehicles) ... p.7244

Oncology - Lymphoid Leukemia. Researchers from Stanford University Discuss Findings in Lymphoid Leukemia (E2A–PBX1 Remodels Oncogenic Signaling Networks in B–cell Precursor Acute Lymphoid Leukemia) ... p.7245

Machado-Joseph Disease. Researchers from State University of Campinas Provide Details of New Studies and Findings in the Area of Machado–Joseph Disease (Lithium carbonate and coenzyme Q10 reduce
cell death in a cell model of Machado–Joseph disease) … p.7246
Gram-Positive Bacteria - Streptococcus. Researchers from State University of Campinas Report Recent Findings in Streptococcus (CovR Regulates Streptococcus mutans Susceptibility To Complement Immunity and Survival in Blood) … p.7247
Oncology - Breast Cancer. Researchers from State University of New York Provide Details of New Studies and Findings in the Area of Breast Cancer (Clinical outcomes in patients with brain metastases from breast cancer treated with single-session radiosurgery or whole ...) … p.7248
Drugs and Therapies - Ophthalmic Antiinfectives. Researchers from Stevens Institute of Technology Describe Findings in Ophthalmic Antiinfectives (Extreme Activity of Drug Nanocrystals Coated with A Layer of Non–Covalent Polymers from Self–Assembled Boric Acid) … p.7249
Oncology - Tongue Cancer. Researchers from Sun Yat Sen University Report Recent Findings in Tongue Cancer (Dysphagia in Tongue Cancer Patients Before and After Surgery) … p.7251
Oncology - Neuroblastomas. Researchers from Sun Yat Sen University Report on Findings in Neuroblastomas (Low dose of arsenic trioxide inhibits multidrug resistant–related P–glycoprotein expression in human neuroblastoma cell line) … p.7252

www.NewsRx.com

Drugs and Therapies - Chemotherapy. Researchers from Sunway University Report Recent Findings in Chemotherapy (The Development of Drugs against Acanthamoeba Infections) … p.7253
Cyclohexanes. Researchers from Takeda Pharmaceutical Detail New Studies and Findings in the Area of Cyclohexanes (TAK–063, A PHOSPHODIESTERASE 10A INHIBITOR, MODULATES NEURONAL ACTIVITY IN VARIOUS BRAIN REGIONS IN pHMRI AND EEG STUDIES WITH AND WITHOUT ...) … p.7254
Endocrine Cells. Researchers from Tel Aviv University Describe Findings in Endocrine Cells [Impaired function of trophoblast cells derived from translocated hESCs may explain pregnancy loss in women with balanced translocation (11;22)] … p.7255
Lung Diseases and Conditions - Altitude Sickness. Researchers from Third Military Medical University Detail New Studies and Findings in the Area of Altitude Sickness (Analysis of High–altitude Syndrome and the Underlying Gene Polymorphisms Associated with Acute Mountain Sickness after a Rapid ...) … p.7256
Biological Factors - Autacoids. Researchers from Third Military Medical University Report Findings in Autacoids (Xinqin exhibits the anti–allergic effect through the JAK2/STAT5 signaling pathway) … p.7257
Liver Diseases and Conditions - Liver Failure. Researchers from Thomas Jefferson University Provide Details of New Studies and Findings in the Area of Liver Failure (Gestational Alloimmune Liver Disease A Devastating Condition Preventable With Maternal Intravenous Immunoglobulin) … p.7258
Oncology - Lymphoma. Researchers from Tianjin Medical University Cancer Institute and Hospital Discuss Findings in Lymphoma (Evaluation of primary thyroid lymphoma by ultrasonography combined with contrast–enhanced ultrasonography: A pilot study) ... p.7259

Enzymes and Coenzymes - Glycoside Hydrolases. Researchers from Tianjin University of Science and Technology Report Recent Findings in Glycoside Hydrolases (Multivalent S–sialoside protein conjugates block influenza hemagglutinin and neuraminidase) ... p.7260

Heart Disorders and Diseases - Heart Disease. Researchers from Toho University Ohashi Medical Center Report on Findings in Heart Disease (Ischemic Heart Disease in Patients with End–Stage Kidney Disease) ... p.7261

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Researchers from Tongji University Report Details of New Studies and Findings in the Area of Venous Thromboembolism (d–Dimer as a Screening Marker for Venous Thromboembolism After Surgery Among Patients Younger Than 50 With Lower Limb Fractures) ... p.7262

Oncology - Gastric Cancer. Researchers from Tongji University School of Medicine Report on Findings in Gastric Cancer (Tumor–suppressive functions of long–chain acyl–CoA synthetase 4 in gastric cancer) ... p.7263

Oncology - Cancer Risk. Researchers from ToxStrategies Describe Findings in Cancer Risk (Inhalation cancer risk assessment of hexavalent chromium based on updated mortality for Painesville chromate production workers) ... p.7264

Hemorrhagic Fever Virus. Researchers from Tsinghua University Report New Studies and Findings in the Area of Hemorrhagic Fever Virus (Molecular basis for the formation of ribonucleoprotein complex of Crimean–Congo hemorrhagic fever virus) ... p.7265

Biotechnology - Pharmacogenomics. Researchers from Tubingen University Hospital Report Recent Findings in Pharmacogenomics (Gene copy number variation analysis reveals dosage–insensitive expression of CYP2E1) ... p.7266

Peripheral Neuropathy. Researchers from Tufts University Report Recent Findings in Peripheral Neuropathy (Transcobalamin 776C –> G polymorphism is associated with peripheral neuropathy in elderly individuals with high folate intake) ... p.7267

Musculoskeletal Diseases and Conditions - Osteoporosis. Researchers from Tulane University Describe Findings in Osteoporosis (Association of 3q13.32 variants with hip trochanter and intertrochanter bone mineral density identified by a genome–wide association study) ... p.7268

Oncology - Head and Neck Cancer. Researchers from Turgut Ozal University Detail New Studies and Findings in the Area of Head and Neck Cancer (Investigation of MACC1 Gene Expression in Head and Neck Cancer and Cancer Stem Cells) ... p.7269

Drugs and Therapies - Antiinfectives. Researchers from URMITE Provide Details of New Studies and Findings in the Area of Antiinfectives [Assessment of oral ivermectin versus shampoo in the treatment of pediculosis (head lice infestation) in rural areas of Sine–Saloum, Senegal] ... p.7270
Oncology - Lymphoma. Researchers from Ulm University Report Details of New Studies and Findings in the Area of Lymphoma (Suppressor of cytokine signaling 1 gene mutation status as a prognostic biomarker in classical Hodgkin lymphoma) … p.7271

Veterinary Medicine. Researchers from United States Department of Agriculture Report Recent Findings in Veterinary Medicine (Impact of the blood meal on humoral immunity and microbiota in the gut of female Culicoides sonorensis) … p.7272

Oncology - Esophageal Cancer. Researchers from University Health Network Discuss Findings in Esophageal Cancer (Adjuvant sunitinib following chemoradiotherapy and surgery for locally advanced esophageal cancer: a phase II trial) … p.7274

Oncology - Melanoma. Researchers from University Hospital Describe Findings in Melanoma (Preferences of German melanoma patients for interferon (IFN) alpha-2b toxicities (the DeCOG "GERMELATOX survey") versus melanoma recurrence to quantify patients' relative values …) … p.7275

Drugs and Therapies - Toxicology and Pharmacology. Researchers from University Hospital Describe Findings in Toxicology and Pharmacology (Evaluation of the toxicokinetics and apoptotic potential of ethanol extract from Echinodorus macrophyllus leaves in vivo) … p.7276

Oncology - Glioblastomas. Researchers from University Hospital Detail New Studies and Findings in the Area of Glioblastomas (Cilengitide in newly diagnosed glioblastoma: biomarker expression and outcome) … p.7277

Autoimmune Diseases and Conditions - Psoriatic Arthritis. Researchers from University Hospital Detail New Studies and Findings in the Area of Psoriatic Arthritis (Apremilast, an oral phosphodiesterase 4 inhibitor, in patients with psoriatic arthritis and current skin involvement: a phase III, …) … p.7278

Anesthesia. Researchers from University Hospital Provide Details of New Studies and Findings in the Area of Anesthesia (Anesthetic considerations in HELLP syndrome) … p.7279

Oncology - Gastric Cancer. Researchers from University Hospital Report Details of New Studies and Findings in the Area of Gastric Cancer (Identification of IL11RA and MELK amplification in gastric cancer by comprehensive genomic profiling of gastric cancer cell lines) … p.7280

Skin Diseases and Conditions - Psoriasis. Researchers from University Hospital Report Details of New Studies and Findings in the Area of Psoriasis (Anti–tumor necrosis factor–alpha therapy improves endothelial function and arterial stiffness in patients with moderate to severe …) … p.7281

Prostheses. Researchers from University Hospital Report Findings in Prostheses (Complete Transversal Disc Fracture in a Bjork–Shiley Delrin Mitral Valve Prosthesis 43 Years After Implantation) … p.7282

Immune System Diseases and Conditions - HIV/AIDS. Researchers from University Nova of Lisboa Detail New Studies and Findings in the Area of HIV/AIDS (HIV–1 Nef Impairs the Formation of Calcium Membrane Territories Controlling the Signaling
Nanoarchitecture at the Immunological Synapse) ... p.723

Oncology - Pancreatic Cancer. Researchers from University Teaching Hospital Provide Details of New Studies and Findings in the Area of Pancreatic Cancer (Second–line therapy for advanced pancreatic cancer: evaluation of prognostic factors and review of current literature) ... p.724

Drugs and Therapies - Chymotrypsin Therapy. Researchers from University of Adelaide Report New Studies and Findings in the Area of Chymotrypsin Therapy (New Peptidomimetic Boronates for Selective Inhibition of the Chymotrypsin–like Activity of the 26S Proteasome) ... p.725

Trimethyl Ammonium Compounds. Researchers from University of Agriculture Detail New Studies and Findings in the Area of Trimethyl Ammonium Compounds (Choline supplementation alleviates fluoride–induced testicular toxicity by restoring the NGF and MEK expression in mice) ... p.726

Oncology - Cancer Risk. Researchers from University of Alabama Discuss Findings in Cancer Risk (Metabolic risk factors and mechanisms of disease in epithelial ovarian cancer: A review) ... p.727

Drugs and Therapies - Antineoplastics. Researchers from University of Alexandria Describe Findings in Antineoplastics (HPLC Methods for Quantitation of Exemestane–Luteolin and Exemestane–Resveratrol Mixtures in Nanoformulations) ... p.728

Nursing - Clinical Nursing. Researchers from University of Alicante Report Recent Findings in Clinical Nursing (Comparison of menstrual disorders in hospital nursing staff according to shift work pattern) ... p.729

www.NewsRx.com

Digestive System Diseases and Conditions - Pancreatitis. Researchers from University of Amsterdam Provide Details of New Studies and Findings in the Area of Pancreatitis (Clinical outcomes and prevalence of cancer in patients with possible groove pancreatitis) ... p.729

Catheterization. Researchers from University of Ataturk Report on Findings in Catheterization (Should we change the cannulation site for right subclavian artery cannulation? An experimental study with a newly designed cannula) ... p.729

Transplant Medicine - Kidney Transplants. Researchers from University of Barcelona Detail New Studies and Findings in the Area of Kidney Transplants (Effect of mammalian target of rapamycin inhibitors on cytomegalovirus infection in kidney transplant recipients receiving polyclonal ...) ... p.729

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Researchers from University of Bari Report on Findings in Rheumatoid Arthritis (Early clinical response predicts low disease activity at one year in rheumatoid arthritis patients on treatment with certolizumab in real–life settings. An ...) ... p.729

Immunology. Researchers from University of Basel Discuss Findings in Immunology (T–cell metabolism governing activation, proliferation and differentiation; a modular view) ... p.729

Clinical Research - Clinical Trials and Studies. Researchers from University of Bern Discuss Findings in Clinical Trials and Studies (Cerebral Microembolization During Aortic Valve Replacement Using Minimally Invasive or Conventional Extracorporeal Circulation: A Randomized Trial) ... p.729
Oncology - Multiple Myeloma. Researchers from University of Bologna Describe Findings in Multiple Myeloma [The genetic and genomic background of multiple myeloma patients achieving complete response after induction therapy with bortezomib, thalidomide and dexamethasone] … p.7296

Central Nervous System Diseases and Conditions - Limbic Encephalitis. Researchers from University of Bonn Describe Findings in Limbic Encephalitis (Suspected antibody negative autoimmune limbic encephalitis: outcome of immunotherapy) … p.7297

Proteins - Armadillo Domain Proteins. Researchers from University of Bordeaux Provide Details of New Studies and Findings in the Area of Armadillo Domain Proteins [Fzd7 (Frizzled–7) Expressed by Endothelial Cells Controls Blood Vessel Formation Through Wnt/beta–Catenin Canonical …] … p.7299

Oncology - Cancer Genetics. Researchers from University of Bremen Describe Findings in Cancer Genetics (Hyperhaploid uterine mesenchymal tumors—a novel genetic subgroup?) … p.7301

Oncology - Colon Cancer. Researchers from University of Brest Detail Findings in Colon Cancer (Acquisition of anticancer drug resistance is partially associated with cancer sternness in human colon cancer cells) … p.7302

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from University of Buckingham Report Details of New Studies and Findings in the Area of Obesity [Circulating Levels of the Adipokines Monocyte Chemotactic Protein–4 (MCP–4), Macrophage Inflammatory Protein–1 beta (MIP–1 beta), and …] … p.7303

Membrane Proteins - G-Protein-Coupled Receptors. Researchers from University of Cagliari Detail New Studies and Findings in the Area of G–Protein–Coupled Receptors (In vitro and in vivo pharmacological characterization of SSD114, a novel GABAB positive allosteric modulator) … p.7304

Clinical Research - Clinical Trials and Studies. Researchers from University of California Describe Findings in Clinical Trials and Studies (Randomised controlled trial evaluation of Tweet2Quit: a social network quit–smoking intervention) … p.7305

Oncology - Breast Cancer. Researchers from University of California Detail Findings in Breast Cancer (Comparing Coordinated Versus Sequential Salpingo–Oophorectomy for BRCA1 and BRCA2 Mutation Carriers With Breast Cancer) … p.7306

Mental Health Diseases and Conditions - Depression. Researchers from University of California Discuss Findings in Depression (Efficacy And Long–term Clinical Outcome Of Comorbid Posttraumatic Stress Disorder And Major Depressive Disorder After Electroconvulsive Therapy) … p.7307

Biomedical Engineering - Regenerative Medicine. Researchers from University of California Report Details of New Studies and Findings in the Area of Regenerative Medicine (Identification of novel genes and networks governing hematopoietic stem cell development) … p.7308
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from University of California Report Findings in Type 2 Diabetes (Piperine's mitigation of obesity and diabetes can be explained by its up-regulation of the metabolic rate of resting muscle) ... p.7309

Musculoskeletal Diseases and Conditions - Arthritis. Researchers from University of California Report New Studies and Findings in the Area of Arthritis [Epipolymorphisms associated with the clinical outcome of autoimmune arthritis affect CD4(+) T cell activation pathways] ... p.7310

Liver Diseases and Conditions - Chronic Hepatitis C Virus. Researchers from University of California Report New Studies and Findings in the Area of Chronic Hepatitis C Virus (Impact of gender and menopausal status on metabolic parameters in chronic hepatitis C infection) ... p.7312

Pediatrics - Child and Adolescent Development. Researchers from University of California Report Recent Findings in Child and Adolescent Development (Sexual Risk–Taking Among Recently Emancipated Female Foster Youth: Sexual Trauma and Failed Family Reunification Experiences) ... p.7313

Epithelial Cells. Researchers from University of California Report Recent Findings in Epithelial Cells (Downregulation of 26S proteasome catalytic activity promotes epithelial–mesenchymal transition) ... p.7314

Cardiovascular Diseases and Conditions - Hypertension. Researchers from University of California Report on Findings in Hypertension (White matter disease in midlife is heritable, related to hypertension, and shares some genetic influence with systolic blood pressure) ... p.7315

www.NewsRx.com

Pharmacology. Researchers from University of Camerino Discuss Findings in Pharmacology (Pharmacological Effects of Capparis spinosa L) ... p.7316

Autoimmune Diseases and Conditions - Multiple Sclerosis. Researchers from University of Catania Detail Findings in Multiple Sclerosis (Risk factors in multiple sclerosis: a population–based case–control study in Sicily. Background and methods) ... p.7317

Musculoskeletal Diseases and Conditions - Essential Tremor. Researchers from University of Catania Report Details of New Studies and Findings in the Area of Essential Tremor (Pregabalin for essential tremor) ... p.7318

Liver Diseases. Researchers from University of Catania Report Recent Findings in Liver Diseases (Intracellular and extracellular miRNome deregulation in cellular models of NAFLD or NASH: Clinical implications) ... p.7319

Nursing - Oncology Nursing. Researchers from University of Chicago Detail New Studies and Findings in the Area of Oncology Nursing (Interdisciplinary Pain Education: Moving From Discipline–Specific to Collaborative Practice) ... p.7320

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from University of Chicago Report Recent Findings in Obesity (The Gut Microbiota The Gateway to Improved Metabolism) ... p.7321

Nanotechnology - Nanocarriers. Researchers from University of Chile Describe Findings in Nanocarriers (Potential use of nanocarriers with pentacyclic triterpenes in cancer treatments) ... p.7322

Liver Diseases and Conditions - Fatty Liver. Researchers from University of Colorado Report Findings in Fatty Liver [Sevelamer Improves Steatohepatitis, Inhibits Liver and Intestinal Farnesoid X Receptor (FXR), and Reverses Innate
January 14, 2017

www.NewsRx.com

Immune Dysregulation in a Mouse Model of Non–alcoholic ...] ... p.7322

Drugs and Therapies - Angiotensin Converting Enzyme Inhibitors. Researchers from University of Concepcion Discuss Findings in Angiotensin Converting Enzyme Inhibitors (Comparison of Stability–Indicating LC Methods Using Light Scattering and Photodiode Array Detection with Monolithic Column for Determination ...) ... p.7323

Oncology - Breast Cancer. Researchers from University of Connecticut Report Details of New Studies and Findings in the Area of Breast Cancer (Relationships among psychoneurological symptoms and levels of C–reactive protein over 2 years in women with early–stage breast ...) ... p.7325

Heart Disorders and Diseases - Heart Failure. Researchers from University of Copenhagen Detail Findings in Heart Failure (Clinical and prognostic correlates of pulmonary congestion in coronary computed tomography angiography data sets) ... p.7326

Heart Disorders and Diseases - Acute Coronary Syndrome. Researchers from University of Copenhagen Report Findings in Acute Coronary Syndrome (Depression following acute coronary syndrome: a Danish nationwide study of potential risk factors) ... p.7327

Drugs and Therapies - Anxiolytics Sedatives and Hypnotics. Researchers from University of Copenhagen Report on Findings in Anxiolytics Sedatives and Hypnotics (Buccal absorption of diazepam is improved when administered in bioadhesive tablets–An in vivo study in conscious Gottingen mini–pigs) ... p.7328

Oncology - Breast Cancer. Researchers from University of Crete Report New Studies and Findings in the Area of Breast Cancer (IGF–I/EGF and E2 signaling crosstalk through IGF–IR conduit point affects breast cancer cell adhesion) ... p.7329

Developmental Diseases and Conditions - Attention Deficit Hyperactivity Disorders. Researchers from University of Exeter Detail Findings in Attention Deficit Hyperactivity Disorders (End–user involvement in a systematic review of quantitative and qualitative research of non–pharmacological interventions for attention deficit ...) ... p.7330

Cardiovascular Research. Researchers from University of G. d'Annunzio Detail Findings in Cardiovascular Research [Lp (a) and cardiovascular risk: Investigating the hidden side of the moon] ... p.7331

Ischemia. Researchers from University of Geneva Detail New Studies and Findings in the Area of Ischemia (NADPH oxidase 4 deficiency increases tubular cell death during acute ischemic reperfusion injury) ... p.7332

Gram-Positive Bacteria - Staphylococcus aureus. Researchers from University of Gothenburg Describe Findings in Staphylococcus aureus [Being Met as marked – patients' experiences of being infected with community–acquired methicillin–resistant Staphylococcus aureus (MRSA)] ... p.7333

Cardiovascular Diseases and Conditions - Thrombosis. Researchers from University of Heidelberg Provide Details of New Studies and Findings in the Area of Thrombosis (Frequency and temporal profile of recanalization after cerebral vein and sinus thrombosis) ... p.7334
Heart Disorders and Diseases - Heart Failure. Researchers from University of Helsinki Central Hospital Discuss Findings in Heart Failure (Contemporary management of acute right ventricular failure: a statement from the Heart Failure Association and the Working Group on Pulmonary ...) ... p.7335

Central Nervous System Diseases and Conditions - Brain Injuries. Researchers from University of Helsinki Report Details of New Studies and Findings in the Area of Brain Injuries (Peroxisome proliferator-activated receptor–g coactivator–1a mediates neuroprotection against excitotoxic brain injury in ...) ... p.7336

Thrombolysis. Researchers from University of Helsinki Report Findings in Thrombolysis (Cutting the Prehospital On–Scene Time of Stroke Thrombolysis in Helsinki A Prospective Interventional Study) ... p.7337

Heart Disorders and Diseases - Myocarditis. Researchers from University of Helsinki Report on Findings in Myocarditis (Long–term outcome and its predictors in giant cell myocarditis) ... p.7338

Cardiovascular Diseases. Researchers from University of Hong Kong Report Recent Findings in Cardiovascular Diseases (The smoke–free legislation in Hong Kong: its impact on mortality) ... p.7339

Cell Research - Cell Adhesion Molecules. Researchers from University of Illinois Provide Details of New Studies and Findings in the Area of Cell Adhesion Molecules (MicroRNA Regulation of Endothelial Junction Proteins and Clinical Consequence) ... p.7340

Oncology - Colon Cancer. Researchers from University of Kansas Report Recent Findings in Colon Cancer (RNA Binding Protein RBM3 Increases beta–Catenin Signaling to Increase Stem Cell Characteristics in Colorectal Cancer Cells) ... p.7341

Oncology - Multiple Myeloma. Researchers from University of Kuopio Hospital Detail New Studies and Findings in the Area of Multiple Myeloma (A randomized phase II study of stem cell mobilization with cyclophosphamide+G–CSF or G–CSF alone after lenalidomide–based induction ...) ... p.7342

Cardiovascular Diseases and Conditions - Hypotension. Researchers from University of KwaZulu–Natal Detail New Studies and Findings in the Area of Hypotension (Recipes for obstetric spinal hypotension: The clinical context counts) ... p.7343

Heart Disorders and Diseases - Heart Failure. Researchers from University of Leicester Detail New Studies and Findings in the Area of Heart Failure (Plasma growth hormone is a strong predictor of risk at 1 year in acute heart failure) ... p.7344

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Researchers from University of Liege Provide Details of New Studies and Findings in the Area of Type 1 Diabetes Mellitus (Practical aspects of gene regulatory inference via conditional inference forests from expression data) ... p.7345

Peptide Proteins - Posterior Pituitary Hormones. Researchers from University of Liverpool Detail New Studies and Findings in the Area of Posterior Pituitary Hormones (The combination tocolytic effect of magnesium sulfate and an oxytocin receptor antagonist in myometrium from singleton and ...) ... p.7346

Lung Diseases and Conditions - Pneumonia. Researchers from University of Liverpool Provide Details of New Studies and Findings in the Area of Pneumonia (Impact of feeding and housing systems on disease incidence in dairy calves) ... p.7348
January 14, 2017

Enzymes and Coenzymes - One-Carbon Group Transferases. Researchers from University of Lodz Report Details of New Studies and Findings in the Area of One–Carbon Group Transferases (Pharmacological inhibition of arginine and lysine methyltransferases induces nuclear abnormalities and suppresses ...) … p.7349

Oncology - Bladder Cancer. Researchers from University of Lodz Report New Studies and Findings in the Area of Bladder Cancer (Genetic diversity of urinary bladder cancer and the risk of recurrence based on mutation analysis) … p.7350

Diabetes. Researchers from University of Louisville Describe Findings in Diabetes (Diabetic Microvascular Disease and Pulmonary Fibrosis: The Contribution of Platelets and Systemic Inflammation) … p.7351

Parkinson's Disease. Researchers from University of Lubeck Describe Findings in Parkinson's Disease (Genetics of Parkinson's disease) … p.7352

Drugs and Therapies - Toxicology and Pharmacology. Researchers from University of Lyon Discuss Findings in Toxicology and Pharmacology (Optimizing the design of a reproduction toxicity test with the pond snail Lymnaea stagnalis) … p.7353

DNA Research. Researchers from University of Malaysia Detail Findings in DNA Research (Gold nanoparticle mediated method for spatially resolved deposition of DNA on nano–gapped interdigitated electrodes, and its application to the detection of the human ...) … p.7354

Pharmacology. Researchers from University of Manchester Describe Findings in Pharmacology [First–in–Class Chemical Probes against Poly(ADP–ribose) Glycohydrolase (PARG) Inhibit DNA Repair with Differential Pharmacology to Olaparib] … p.7355

www.NewsRx.com

Transplant Medicine - Kidney Transplants. Researchers from University of Manchester Detail New Studies and Findings in the Area of Kidney Transplants (Renal Allograft Failure After Ipilimumab Therapy for Metastatic Melanoma: A Case Report and Review of the Literature) … p.7356

Oncology - Breast Cancer. Researchers from University of Manchester Provide Details of New Studies and Findings in the Area of Breast Cancer (Patient–derived Mammosphere and Xenograft Tumour Initiation Correlates with Progression to Metastasis) … p.7357

Phenethylamines. Researchers from University of Manitoba Provide Details of New Studies and Findings in the Area of Phenethylamines (Reduction of blood pressure by store–operated calcium channel blockers) … p.7358

Gram-Negative Bacteria - Acinetobacter baumannii. Researchers from University of Maryland Provide Details of New Studies and Findings in the Area of Acinetobacter baumannii (Use of Comparative Genomics To Characterize the Diversity of Acinetobacter baumannii Surveillance Isolates in a Health ...) … p.7359

Hematologic Diseases and Conditions - Anemia. Researchers from University of Maryland Report Details of New Studies and Findings in the Area of Anemia [Clinical Trypanosoma cruzi Disease after Cardiac Transplantation in a Cynomolgus Macaque (Macaca fascicularis)] … p.7360

Drugs and Therapies - Antiretrovirals. Researchers from University of Maryland Report Recent Findings in Antiretrovirals (HIV drug resistance mutations among patients failing second–line antiretroviral therapy in Rwanda) … p.7361
Pharmacoepidemiology. Researchers from University of Massachusetts Report on Findings in Pharmacoepidemiology (Probabilistic bias analysis in pharmacoepidemiology and comparative effectiveness research: a systematic review) … p.7362

Liver Diseases and Conditions - Hepatitis C Virus. Researchers from University of Massachusetts School of Medicine Describe Findings in Hepatitis C Virus (Structural and Thermodynamic Effects of Macrocyclization in HCV NS3/4A Inhibitor MK–5172) … p.7363

Vascular Diseases. Researchers from University of Melbourne Detail Findings in Vascular Diseases (Fetuin–A–containing calciprotein particles in mineral trafficking and vascular disease) … p.7364

Central Nervous System Diseases and Conditions - Cerebellar Ataxia. Researchers from University of Messina Discuss Findings in Cerebellar Ataxia (Cerebellar ataxia and severe muscle CoQ(10) deficiency in a patient with a novel mutation in ADCK3) … p.7365

Enzymes and Coenzymes - RNA-Directed DNA Polymerase. Researchers from University of Michigan Detail New Studies and Findings in the Area of RNA–Directed DNA Polymerase (Structural and functional consequences of a disease mutation in the telomere protein TPP1) … p.7366

Heart Disorders and Diseases - Heart Failure. Researchers from University of Michigan Report Findings in Heart Failure (Recruitment And Retention Challenges Of Examining Cognitive Dysfunction In Older Adults Hospitalized For Acute Heart Failure) … p.7368

Hematology - Plasma. Researchers from University of Michigan Report Findings in Plasma [Comparative analysis of circulating tumor DNA stability In K(3) EDTA, Streck, and CellSave blood collection tubes] … p.7369

Oncology - Lymphoma. Researchers from University of Milan Report Details of New Studies and Findings in the Area of Lymphoma (Multimodal Imaging of Vitreoretinal Lymphoma) … p.7370

Gram-Negative Bacteria - Citrobacter freundii. Researchers from University of Minho Report Details of New Studies and Findings in the Area of Citrobacter freundii (Characterization and genome sequencing of a Citrobacter freundii phage CfP1 harboring a lysin active against ...) … p.7371

Inborn Errors of Metabolism. Researchers from University of Minnesota Describe Findings in Inborn Errors of Metabolism (Inborn Errors of Metabolism Collaborative: large–scale collection of data on long–term follow–up for newborn–screened conditions) … p.7372

Health and Medicine - Medicinal Chemistry. Researchers from University of Minnesota Detail Findings in Medicinal Chemistry (Eeyarestatin I derivatives with improved aqueous solubility) … p.7373

Oncology - Lymphoma. Researchers from University of Miyazaki Report Findings in Lymphoma (New–onset haematoproteinuria in a 63–year–old man with intraperitoneal lymph node enlargement) … p.7374
Connective Tissue Diseases and Conditions - Mixed Connective Tissue Disease. Researchers from University of Montpellier Report New Studies and Findings in the Area of Mixed Connective Tissue Disease (Clinical association of mixed connective tissue disease and granulomatosis with polyangiitis: a case report and ...)

Adrenal Gland Diseases and Conditions - Cushing Syndrome. Researchers from University of Munich Describe Findings in Cushing Syndrome (Pasireotide can induce sustained decreases in urinary cortisol and provide clinical benefit in patients with Cushing's disease: results from an open–ended, open–label ...)

Electrolytes. Researchers from University of Naples Discuss Findings in Electrolytes (Diseases associated with electrolyte imbalance in the ED: age–related differences)

Infectious Diseases. Researchers from University of New Hampshire Report Details of New Studies and Findings in the Area of Infectious Diseases (Microbial Genomics of Ancient Plagues and Outbreaks)

Nutritional and Metabolic Diseases and Conditions - Vitamin A Deficiency. Researchers from University of Nice Sophia–Antipolis Report New Studies and Findings in the Area of Vitamin A Deficiency (Oral tolerance is inefficient in neonatal mice due to a physiological vitamin A deficiency)

Drugs and Therapies - Chemotherapy. Researchers from University of Niigata Detail Findings in Chemotherapy (Structural and Mutagenic Analysis of Metallo–beta–Lactamase IMP–18)

Enzymes and Coenzymes - RNA-Directed DNA Polymerase. Researchers from University of Niigata Detail Findings in RNA–Directed DNA Polymerase (A Combination of delta–Tocotrienol and Ferulic Acid Synergistically Inhibits Telomerase Activity in DLD–1 Human Colorectal Adenocarcinoma Cells)

Drugs and Therapies - Antiretrovirals. Researchers from University of North Carolina Describe Findings in Antiretrovirals (Time Preferences Predict Mortality among HIV–Infected Adults Receiving Antiretroviral Therapy in Kenya)

Drugs and Therapies - Antiretrovirals. Researchers from University of North Carolina Detail New Studies and Findings in the Area of Antiretrovirals (Neurocognition with maraviroc compared with tenofovir in HIV)

Congenital Diseases and Conditions - Congenital Heart Defects. Researchers from University of Nottingham Describe Findings in Congenital Heart Defects (Cardiac troponin T is necessary for normal development in the embryonic chick heart)

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. Researchers from University of Occupational and Environmental Health Describe Findings in Hypertrophic Cardiomyopathy (Cumulative Burden of Myocardial Dysfunction in Cardiac Amyloidosis Assessed Using Four–Chamber Cardiac Strain)

Oncology - Cervical Cancer. Researchers from University of Oklahoma Detail New Studies and Findings in the Area of Cervical Cancer (Is age a prognostic biomarker for survival among women with locally advanced cervical cancer treated with chemoradiation? An NRG ...)

www.NewsRx.com
Adolescence. Researchers from University of Oslo Report Details of New Studies and Findings in the Area of Adolescence (Associations Between Sibling Relationship Quality and Friendship Quality in Early Adolescence: Looking at the Case of Twins) … p.7387

Drugs and Therapies - Glucagon Therapy. Researchers from University of Palermo Report Findings in Glucagon Therapy (Influence of glucagon–like peptide 2 on energy homeostasis) … p.7389

Oncology. Researchers from University of Palermo Report on Findings in Oncology (What links BRAF to the heart function? New insights from the cardiotoxicity of BRAF inhibitors in cancer treatment) … p.7390

Arsenic. Researchers from University of Paris Discuss Findings in Arsenic (Exposure assessment of arsenic speciation in different rice types depending on the cooking mode) … p.7391

Dynamic Light Scattering. Researchers from University of Paris–Sud Report Recent Findings in Dynamic Light Scattering (Size of monodispersed nanomaterials evaluated by dynamic light scattering: Protocol validated for measurements of 60 and 203 nm diameter nanomaterials …) … p.7392

Enzymes and Coenzymes - Oxidoreductases. Researchers from University of Parma Detail Findings in Oxidoreductases (Catalysis and Structure of Zebrafish Urate Oxidase Provide Insights into the Origin of Hyperuricemia in Hominoids) … p.7393

Nutritional and Metabolic Diseases and Conditions - Obesity. Researchers from University of Pennsylvania Describe Findings in Obesity (Primary Care Interventions to Reduce Childhood Obesity in Latino Families) … p.7394

Lung Diseases and Conditions - Pulmonary Embolism. Researchers from University of Pennsylvania Report Findings in Pulmonary Embolism (Risk of pulmonary embolism after a prior negative CT pulmonary angiogram) … p.7395

Developmental Diseases and Conditions - Attention Deficit Hyperactivity Disorders. Researchers from University of Pittsburgh Report Findings in Attention Deficit Hyperactivity Disorders (Gestational weight gain, prepregnancy body mass index and offspring attention–deficit hyperactivity disorder symptoms and behaviour at age 10) … p.7396

Genetics - Genetic Epidemiology. Researchers from University of Pittsburgh Report on Findings in Genetic Epidemiology (A Pipeline for Classifying Relationships Using Dense SNP/SNV Data and Putative Pedigree Information) … p.7397

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Researchers from University of Pittsburgh Report on Findings in Type 1 Diabetes Mellitus (Are Regulatory T Cells Defective in Type 1 Diabetes and Can We Fix Them?) … p.7398

Mycobacterium Infections - Tuberculosis. Researchers from University of Pretoria Describe Findings in Tuberculosis (Antimycobacterial Activity and Low Cytotoxicity of Leaf Extracts of Some African Anacardiaceae Tree Species) … p.7399
January 14, 2017

Oncology - Oral Cancer. Researchers from University of Queensland Describe Findings in Oral Cancer (Knowledge of oral cancer risk factors amongst high-risk Australians: findings from the LESIONS programme) ... p.7400

Life Science Research - Biotheoretics. Researchers from University of Rennes Report Recent Findings in Biotheoretics (Recursive Model Identification for the Evaluation of Baroreflex Sensitivity) ... p.7401

Oncology - Epithelial Ovarian Cancer. Researchers from University of Rome Describe Findings in Epithelial Ovarian Cancer [Brain metastases in patients with EOC: Clinico–pathological and prognostic factors. A multicentric retrospective analysis from the MITO group (MITO 19)] ... p.7402

Carrier Proteins - Membrane Transport Proteins. Researchers from University of Rome Detail Findings in Membrane Transport Proteins (Two molecular assays for the rapid and inexpensive detection of GJB2 and GJB6 mutations) ... p.7403

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Researchers from University of Saarland Describe Findings in Alzheimer Disease (Tocotrienol Affects Oxidative Stress, Cholesterol Homeostasis and the Amyloidogenic Pathway in Neuroblastoma Cells: Consequences for Alzheimer's Disease) ... p.7404

Myeloid Cells. Researchers from University of Saarland Discuss Findings in Myeloid Cells [Induction of Glucocorticoid–induced Leucine Zipper (GILZ) Contributes to Anti–inflammatory Effects of the Natural Product Curcumin in Macrophages] ... p.7405

Genetics - Human Genetics. Researchers from University of Sao Paulo Discuss Findings in Human Genetics (Twinning and Multiple Birth Rates According to Maternal Age in the City of Sao Paulo, Brazil: 2003–2014) ... p.7406

Oncology - Pituitary Cancer. Researchers from University of Sao Paulo Report New Studies and Findings in the Area of Pituitary Cancer (P27/CDKN1B Translational Regulators in Pituitary Tumorigenesis) ... p.7407

Drug Administration Routes. Researchers from University of Seoul Report Details of New Studies and Findings in the Area of Drug Administration Routes [Induction of Flavin–Containing Monoxygenase in Mice by Oral Administration of Phellinus baumii (Agaricomycetes) Extract] ... p.7408

Biological Factors - Biological Tumor Markers. Researchers from University of Shandong Describe Findings in Biological Tumor Markers (Reference Intervals of Alpha–Fetoprotein and Carcinoembryonic Antigen in the Apparently Healthy Population) ... p.7409

Immunology - Lymphoid Tissue. Researchers from University of South Australia Describe Findings in Lymphoid Tissue (Toward Intraoperative Detection of Disseminated Tumor Cells in Lymph Nodes with Silicon Nanowire Field Effect Transistors) ... p.7410

Drugs and Therapies - Clinical Pharmacology. Researchers from University of South Florida Describe Findings in Clinical Pharmacology (Addressing potential role of magnesium dyshomeostasis to improve treatment efficacy for epilepsy: A reexamination of the literature) ... p.7411
January 14, 2017

Genetics - Human Genetics. Researchers from University of Southern Denmark Report Recent Findings in Human Genetics (Change in Depression Symptomatology and Cognitive Function in Twins: A 10-Year Follow-Up Study) ... p.7412

Stem Cell Research - Hematopoietic Stem Cells. Researchers from University of Strasbourg Report Findings in Hematopoietic Stem Cells (Origin of the hematopoietic system in the human embryo) ... p.7413

Materials Research - Applied Materials & Interfaces. Researchers from University of Sydney Detail Findings in Applied Materials & Interfaces (Fabrication of Semordered Nanopatterned Diamond–like Carbon and Titania Films for Blood Contacting Applications) ... p.7414

Heart Disorders and Diseases - Sinus Tachycardia. Researchers from University of Sydney Detail Findings in Sinus Tachycardia (Inappropriate sinus tachycardia: focus on ivabradine) ... p.7415

Mental Health. Researchers from University of Sydney Provide Details of New Studies and Findings in the Area of Mental Health (The Mental Health of British Adults with Intellectual Impairments Living in General Households) ... p.7416

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from University of Sydney Report Details of New Studies and Findings in the Area of Type 2 Diabetes (Impact of Perturbed Pancreatic beta–Cell Cholesterol Homeostasis on Adipose Tissue and Skeletal Muscle Metabolism) ... p.7417

Gram-Negative Bacteria - Escherichia coli. Researchers from University of Tartu Report Findings in Escherichia coli (Plasmid with Colistin Resistance Gene mcr–1 in Extended–Spectrum–beta–Lactamase–Producing Escherichia coli Strains Isolated from Pig Slurry in Estonia) ... p.7418

Clinical Research - Clinical Trials and Studies. Researchers from University of Tehran Detail New Studies and Findings in the Area of Clinical Trials and Studies (Minocycline combination therapy with fluvoxamine in moderate–to–severe obsessive–compulsive disorder: A placebo–controlled, ...) ... p.7419

Oncology - Acute Lymphoblastic Leukemia. Researchers from University of Tehran Report on Findings in Acute Lymphoblastic Leukemia (Inhibition of tachykinin NK1 receptor using aprepitant induces apoptotic cell death and G1 arrest through Aktip53 axis in pre–B acute lymphoblastic ...) ... p.7420

Cardiovascular Diseases and Conditions - Aneurysm. Researchers from University of Tennessee Report Findings in Aneurysm (The first North American use of the Pipeline Flex flow diverter) ... p.7421

Oncology - Glioblastomas. Researchers from University of Texas Describe Findings in Glioblastomas (Epigenetic Activation of WNT5A Drives Glioblastoma Stem Cell Differentiation and Invasive Growth) ... p.7422

Enzymes and Coenzymes - Prostaglandin-Endoperoxide Synthases. Researchers from University of Texas Medical Branch Detail Findings in Prostaglandin–Endoperoxide Synthases (Bortezomib Effects on Human Microvascular Endothelium in vitro) ... p.7423
January 14, 2017

Cardiology. Researchers from University of Texas Southwestern Discuss Findings in Cardiology (Healthy aging does not compromise the augmentation of cardiac function during heat stress) … p.7424

Cardiovascular Diseases and Conditions - Hypertension. Researchers from University of Texas Southwestern Medical Center Report Recent Findings in Hypertension (Mechanisms and Treatment of Intradialytic Hypertension) … p.7425

Enzymes and Coenzymes - Oxygenases. Researchers from University of Thessaly Report Details of New Studies and Findings in the Area of Oxygenases [Indoleamine 2,3–dioxygenase, by degrading L–tryptophan, enhances carnitine palmitoyltransferase I activity and fatty acid oxidation, …] … p.7426

Science. Researchers from University of Tokushima Report on Findings in Science (Novel human mutation and CRISPR/Cas genome–edited mice reveal the importance of C–terminal domain of MSX1 in tooth and palate development) … p.7427

Uterine Diseases and Conditions - Endometriosis. Researchers from University of Tokyo Report Details of New Studies and Findings in the Area of Endometriosis (Resveratrol Enhances Apoptosis in Endometriotic Stromal Cells) … p.7428

Science. Researchers from University of Tokyo Report Recent Findings in Science (Osmotic stress induces the phosphorylation of WNK4 Ser575 via the p38MAPK–MK pathway) … p.7429

Hematology - Blood Coagulation Factor Inhibitors. Researchers from University of Tokyo School of Medicine Describe Findings in Blood Coagulation Factor Inhibitors (Fli1 deficiency contributes to the downregulation of endothelial protein C receptor in systemic sclerosis: a possible role in …) … p.7430

www.NewsRx.com

Oncology - Breast Cancer. Researchers from University of Toronto Describe Findings in Breast Cancer (Modelling mammography screening for breast cancer in the Canadian context: Modification and testing of a microsimulation model) … p.7431

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. Researchers from University of Toronto Detail New Studies and Findings in the Area of Hypertrophic Cardiomyopathy (Myocardial Dimensions in Children With Hypertrophic Cardiomyopathy: A Comparison Between Echocardiography and Cardiac Magnetic …) … p.7432

Oncology - Acute Myeloid Leukemia. Researchers from University of Toulouse Detail New Studies and Findings in the Area of Acute Myeloid Leukemia (Prognostic impact of viral reactivations in acute myeloid leukemia patients undergoing allogeneic stem cell transplantation in first …) … p.7433

Oncology - Liver Cancer. Researchers from University of Trieste Provide Details of New Studies and Findings in the Area of Liver Cancer (Rapid and cost–effective xenograft hepatocellular carcinoma model in Zebrafish for drug testing) … p.7434

Biological Factors - Venoms. Researchers from University of Tunis Detail New Studies and Findings in the Area of Venoms (Lebein, a snake venom disintegrin, suppresses human colon cancer cells proliferation and tumor–induced angiogenesis through cell cycle arrest, apoptosis …) … p.7435

January 14, 2017

Oncology - Prostate Cancer. Researchers from University of Ulm Report on Findings in Prostate Cancer (Prognostic Factors for Biochemical Recurrence More than 10 Years after Radical Prostatectomy) … p.7437

Drugs and Therapies - Enzyme Replacement Therapy. Researchers from University of Ulsan Detail New Studies and Findings in the Area of Enzyme Replacement Therapy (Long-term enzyme replacement therapy for Fabry disease: efficacy and unmet needs in cardiac and renal outcomes) … p.7438

Oncology - Rectal Cancer. Researchers from University of Utah Report on Findings in Rectal Cancer (Association of cigarette smoking and microRNA expression in rectal cancer: Insight into tumor phenotype) … p.7439

Cytoskeleton. Researchers from University of Utrecht Discuss Findings in Cytoskeleton (Control of apico–basal epithelial polarity by the microtubule minus–end–binding protein CAMSAP3 and spectraplakin ACF7) … p.7440

Hematology - Plasma. Researchers from University of Verona Detail New Studies and Findings in the Area of Plasma (Estimation of the imprecision on clinical chemistry testing due to fist clenching and maintenance during venipuncture) … p.7441

Drugs and Therapies - Adrenal Corticosteroid Inhibitors. Researchers from University of Vienna Report on Findings in Adrenal Corticosteroid Inhibitors (Metal–Free meta–Selective Alkyne Oxyarylation with Pyridine N–Oxides: Rapid Assembly of Metyrapone Analogues) … p.7442

Neurons. Researchers from University of Virginia Report Details of New Studies and Findings in the Area of Neurons (An NXF1 mRNA with a retained intron is expressed in hippocampal and neocortical neurons and is translated into a protein that functions …)

www.NewsRx.com

Cardiovascular Diseases and Conditions - Atherosclerosis. Researchers from University of Virginia Report New Studies and Findings in the Area of Atherosclerosis (Genetic analysis of atherosclerosis identifies a major susceptibility locus in the major histocompatibility complex of mice) … p.7444

Neurodegenerative Diseases and Conditions - Dementia. Researchers from University of Warwick Report Recent Findings in Dementia (Expression and purification of tau protein and its frontotemporal dementia variants using a cleavable histidine tag) … p.7445

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Researchers from University of Washington Describe Findings in Myelodysplastic Syndromes (Jumping translocations in myelodysplastic syndromes) … p.7446

Vascular Diseases. Researchers from University of Washington Detail Findings in Vascular Diseases (Vessel wall imaging for intracranial vascular disease evaluation) … p.7447

Oncology - Penile Cancer. Researchers from University of Washington Detail New Studies and Findings in the Area of Penile Cancer (Predictors of Nodal Upstaging in Clinical Node Negative Patients With Penile Carcinoma: A National Cancer Database Analysis) … p.7448

Nanotechnology - Nanoparticles. Researchers from University of Washington Discuss Findings in Nanoparticles (Approach to Rapid Synthesis and Functionalization of Iron Oxide Nanoparticles for High Gene Transfection) … p.7449
Peptides and Proteins. Researchers from University of Washington Report New Studies and Findings in the Area of Peptides and Proteins (Designed proteins induce the formation of nanocage–containing extracellular vesicles) … p.7450

Pesticides. Researchers from University of Washington Report New Studies and Findings in the Area of Pesticides (Urinary microRNAs as potential biomarkers of pesticide exposure) … p.7451

Digestive System Diseases and Conditions - Crohn's Disease. Researchers from University of Western Ontario Describe Findings in Crohn's Disease (Anti–IL–12/23p40 antibodies for induction of remission in Crohn's disease) … p.7452

Drugs and Therapies - Antineoplastics. Researchers from University of Wurzburg Report Findings in Antineoplastics (Evaluation of dose–dependent effects of the proteasome inhibitor bortezomib in human platelets) … p.7454

Gram-Negative Bacteria - Pseudomonas aeruginosa. Researchers from University of Zagreb Detail Findings in Pseudomonas aeruginosa (RpoN Modulates Carbapenem Tolerance in Pseudomonas aeruginosa through Pseudomonas Quinolone Signal and PqsE) … p.7455

Hematology - Plasma. Researchers from University of Zurich Describe Findings in Plasma (Effect of alterations in blood volume with bed rest on glucose tolerance) … p.7456

Oncology - Melanoma. Researchers from University of Zurich Detail Findings in Melanoma (When cancer cannot be cured: A qualitative study on relationship changes in couples facing advanced melanoma) … p.7457

Peripheral Artery Disease. Researchers from University of Zurich Provide Details of New Studies and Findings in the Area of Peripheral Artery Disease (beta–Blockers and Vascular Hemodynamics in Patients With Peripheral Arterial Disease) … p.7458

Bacterial Infections and Mycoses - Bacteremia. Researchers from University of the Ryukyus Detail Findings in Bacteremia (Bacteremia due to Citrobacter braakii: A case report and literature review) … p.7459

Heart Disorders and Diseases - Cardiomegaly. Researchers from Uppsala University Provide Details of New Studies and Findings in the Area of Cardiomegaly (PDGF–A and PDGF–B induces cardiac fibrosis in transgenic mice) … p.7460

Neurology - Spasticity. Researchers from Valdman Institute of Pharmacology Discuss Findings in Spasticity (Morphine–induced Straub tail reaction in mice treated with serotonergic compounds) … p.7461

Drugs and Therapies - Antiemetic-Antivertigo Agents. Researchers from Valencia Polytechnic University Describe Findings in Antiemetic–Antivertigo Agents [Enhanced photo(geno)toxicity of demethylated chlorpromazine metabolites] … p.7462

Oncology - Lung Cancer. Researchers from Vanderbilt University School of Medicine Describe Findings in Lung Cancer (Chronic NF–kB activation links COPD and lung cancer through generation of an immunosuppressive microenvironment in the lungs) … p.7463

Oncology - Prostate Cancer. Researchers from Viborg Hospital Report Recent Findings in Prostate Cancer (Parkinson's disease and risk of prostate cancer: A Danish population–based case–control study, 1995–2010) … p.7464
January 14, 2017

Drugs and Therapies - Behavioural Pharmacology. Researchers from Virginia Commonwealth University Discuss Findings in Behavioural Pharmacology (Cocaine–like discriminative stimulus effects of phendimetrazine and phenmetrazine in rats) … p.7465

Gastroenterology - Colorectal Research. Researchers from Virginia Commonwealth University Discuss Findings in Colorectal Research (Primary Care Physicians’ Support of Shared Decision Making for Different Cancer Screening Decisions) … p.7466

Lung Diseases and Conditions - Asthma. Researchers from Virginia Polytechnic Institute and State University Describe Findings in Asthma (Tollip SNP rs5743899 modulates human airway epithelial responses to rhinovirus infection) … p.7468

Heart Disorders and Diseases - Heart Attack. Researchers from Wakayama Medical University Report on Findings in Heart Attack [Optical frequency domain imaging vs. intravascular ultrasound in percutaneous coronary intervention (OPINION trial): Study protocol for a randomized controlled …] … p.7471

www.NewsRx.com

Drugs and Therapies - Cetirizine Therapy. Researchers from Warsaw University of Technology Report on Findings in Cetirizine Therapy (Tasting cetirizine–based microspheres with an electronic tongue) … p.7472

Oncology. Researchers from Washington University Describe Findings in Oncology [Signatures of prostate–derived Ets factor (PDEF) in cancer] … p.7473

Heart Disorders and Diseases - Atrial Fibrillation. Researchers from Washington University Detail Findings in Atrial Fibrillation (Potassium and Magnesium Supplementation Do Not Protect Against Atrial Fibrillation After Cardiac Operation: A Time–Matched Analysis) … p.7474

Musculoskeletal Diseases and Conditions - Clubfoot. Researchers from Washington University Provide Details of New Studies and Findings in the Area of Clubfoot (Deletions of 5’ HOXC genes are associated with lower extremity malformations, including clubfoot and vertical talus) … p.7475

Heart Disorders and Diseases - Heart Failure. Researchers from Washington University School of Medicine Describe Findings in Heart Failure (One–year follow–up results from AUGMENT–HF: a multicentre randomized controlled clinical trial of the efficacy of left ventricular augmentation with …) … p.7476

Oncology - Lymphoma. Researchers from Washington University School of Medicine Report Details of New Studies and Findings in the Area of Lymphoma (Allogeneic hematopoietic stem cell transplantation in Hodgkin lymphoma: a systematic review and meta–analysis) … p.7477
Oncology - Prostate Cancer. Researchers from Wayne State University Describe Findings in Prostate Cancer: [The Amino-terminal Domain of the Androgen Receptor Co-opts Extracellular Signal-regulated Kinase (ERK) Docking Sites in ELK1 Protein to Induce Sustained Gene ...] ... p.7478

Oncology - Epithelial Ovarian Cancer. Researchers from Wayne State University Report Details of New Studies and Findings in the Area of Epithelial Ovarian Cancer: (The Role of Angiogenesis in the Persistence of Chemoresistance in Epithelial Ovarian Cancer) ... p.7479

Hip Fracture. Researchers from Weifang Medical University Report Details of New Studies and Findings in the Area of Hip Fracture: (Stroke increases the risk of hip fracture: a systematic review and meta-analysis) ... p.7480

Influenza. Researchers from Weizmann Institute of Science Report Findings in Influenza: (Extracellular Matrix Proteolysis by MT1-MMP Contributes to Influenza-Related Tissue Damage and Mortality) ... p.7481

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Researchers from Western University Describe Findings in Type 2 Diabetes: [Combined hyperlipidemia: familial but not (usually) monogenic] ... p.7482

Central Nervous System Diseases and Conditions - Rett Syndrome. Researchers from Whitehead Institute for Biomedical Research Report Details of New Studies and Findings in the Area of Rett Syndrome: (Jointly reduced inhibition and excitation underlies circuit-wide changes in cortical processing in Rett ...) ... p.7483

Skin Diseases and Conditions - Eczema. Researchers from Winthrop University Hospital Describe Findings in Eczema: (Treatment of Eczema: Corticosteroids and Beyond) ... p.7484

Oncology - Ovarian Cancer. Researchers from Women's College Research Institute Report Recent Findings in Ovarian Cancer: (Low-grade serous ovarian cancer: A review) ... p.7485

Pharmacology. Researchers from Woolcock Institute of Medical Research Provide Details of New Studies and Findings in the Area of Pharmacology: (People with insomnia: experiences with sedative hypnotics and risk perception) ... p.7486

Mycobacterium Infections - Tuberculosis. Researchers from World Health Organization Describe Findings in Tuberculosis: (Evaluation of the Abbott RealTime MTB and RealTime MTB INH/RIF Assays for Direct Detection of Mycobacterium tuberculosis Complex and Resistance Markers in Respiratory ...) ... p.7487

Biotechnology - Biomaterials Research. Researchers from Wuhan University Describe Findings in Biomaterials Research: (Drug self-delivery systems for cancer therapy) ... p.7488

Drugs and Therapies - Cancer Therapy. Researchers from Wuhan University Detail New Studies and Findings in the Area of Cancer Therapy: (Gossypol with Hydrophobic Linear Esters Exhibits Enhanced Antitumor Activity as an Inhibitor of Antiapoptotic Proteins) ... p.7489

Disease Attributes - Chronic Disease. Researchers from Wuhan University Discuss Findings in Chronic Disease: (Estimation of the Disease Burden Attributable to 11 Risk Factors in Hubei Province, China: A Comparative Risk Assessment) ... p.7490

Gram-Negative Bacteria - Acinetobacter baumannii. Researchers from Xi’an Jiao Tong University Provide Details of New Studies and Findings in the Area of Acinetobacter baumannii (Extensively drug–resistant Acinetobacter baumannii outbreak cross–transmitted in an intensive care unit and ...) … p.7492

Oncology - Liver Cancer. Researchers from Xiamen University Report New Studies and Findings in the Area of Liver Cancer (HOX Antisense lincRNA HOXA–AS2 Promotes Tumorigenesis of Hepatocellular Carcinoma) … p.7493

Clinical Trials and Studies - Post-Trial Research. Researchers from Yale–New Haven Hospital Report Details of New Studies and Findings in the Area of Post–Trial Research (The use of basiliximab–infliximab combination for the treatment of severe gastrointestinal acute GvHD) … p.7495

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Researchers from Yamaguchi University Provide Details of New Studies and Findings in the Area of Diabetic Angiopathies (Basigin can be a therapeutic target to restore the retinal vascular barrier function in the mouse model of diabetic ...) … p.7496

Liver Diseases and Conditions - Hepatitis B Virus. Researchers from Zhejiang University Describe Findings in Hepatitis B Virus (Comparison of Telbivudine and Entecavir Therapy on Nephritic Function and Drug Resistance in Patients with Hepatitis B Virus–Related Compensated Cirrhosis) … p.7498

Inflammation. Researchers from Zhejiang University Report Recent Findings in Inflammation (Epithelial disruption of Gab1 perturbs surfactant homeostasis and predisposes mice to lung injuries) … p.7499

Mycobacterium Infections - Tuberculosis. Researchers from Zhejiang University Report on Findings in Tuberculosis (A Group of Novel Serum Diagnostic Biomarkers for Multidrug–Resistant Tuberculosis by iTRAQ–2D LC–MS/MS and Solexa Sequencing) … p.7500

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Researchers’ Work from Autonomous University Focuses on Rheumatoid Arthritis (STAT4 rs7574865 G/T polymorphism is associated with rheumatoid arthritis and disease activity, but not with anti–CCP antibody levels in a Mexican population) … p.7501

Smoking. Researchers’ Work from Central South University Focuses on Smoking (Facilitators and Barriers of Smokers’ Compliance with Smoking Bans in Public Places: A Systematic Review of Quantitative and Qualitative Literature) … p.7504

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Researchers’ Work from Cleveland Clinic Focuses on Obstructive Sleep Apnea (Positive Airway Pressure–Induced Conversion of Atrial Fibrillation to Normal Sinus Rhythm in Severe Obstructive Sleep Apnea) … p.7505

Oncology - Thyroid Cancer. Researchers’ Work from Department of General Surgery Focuses on Thyroid Cancer (Combretastatin A4 Regulates Proliferation, Migration, Invasion, and Apoptosis of Thyroid Cancer Cells via PI3K/Akt Signaling Pathway) … p.7506

Pharmacokinetics. Researchers’ Work from Eli Lilly Focuses on Pharmacokinetics [Synthesis and Characterization of a Novel gamma–Aminobutyric Acid Type A (GABA(A)) Receptor Ligand That Combines Outstanding Metabolic Stability, Pharmacokinetics, and Anxiolytic …] … p.7508

www.NewsRx.com

Apoptosis. Researchers’ Work from Fudan University Focuses on Apoptosis (Exenatide Reduces Tumor Necrosis Factor–α–induced Apoptosis in Cardiomyocytes by Alleviating Mitochondrial Dysfunction) … p.7509

Enzymes and Coenzymes - NADPH Oxidoreductases NADH. Researchers’ Work from Goethe–University Focuses on NADPH Oxidoreductases NADH (The NADPH Oxidase Nox4 mediates tumour angiogenesis) … p.7511

Peptides - Oligopeptides. Researchers’ Work from IISER Focuses on Oligopeptides (Glutathione depletion activates the yeast vacuolar transient receptor potential channel, Yvc1p, by reversible glutathionylation of specific cysteines) … p.7512

Gram-Negative Bacteria - Pseudomonas aeruginosa. Researchers’ Work from Imperial College Focuses on Pseudomonas aeruginosa (A Novel RNase 3/ECP Peptide for Pseudomonas aeruginosa Biofilm Eradication That Combines Antimicrobial, Lipopolysaccharide Binding, and Cell–Agglutinating Activities) … p.7513

Antibiotics - Cephalosporins. Researchers’ Work from Indian Institute of Technology Focuses on Cephalosporins (Decayluation Mechanism and Kinetics of Acyl–Enzyme Complex of Class C b–Lactamase and Cephalothin) … p.7514

Musculoskeletal Diseases and Conditions - Osteoporosis. Researchers’ Work from Institute for Clinical Research Focuses on Osteoporosis (Nephrolithiasis, bone mineral density, osteoporosis, and fractures: a systematic review and comparative meta–analysis) … p.7515
Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.
Researchers' Work from Jinzhou Medical University Focuses on Type 2 Diabetes (MicroRNA–463–3p/ABCG4: A New Axis in Glucose–Stimulated Insulin Secretion) … p.7516

Immunology - Immunoglobulins.
Researchers' Work from Karlsruhe Institute of Technology Focuses on Immunoglobulins (Fast Targeting and Cancer Cell Uptake of Luminescent Antibody–Nanozeolite Bioconjugates) … p.7517

Autoimmune Diseases and Conditions - Multiple Sclerosis. Researchers' Work from Karolinska Institute Focuses on Multiple Sclerosis (Hereditary diffuse leukoencephalopathy with spheroids – a volumetric and radiological comparison with multiple sclerosis patients and healthy controls) … p.7518

Hematologic Diseases and Conditions - Hemolytic Anemia. Researchers' Work from Keio University Hospital Focuses on Hemolytic Anemia (Kinked Graft and Anastomotic Stenosis–Induced Hemolytic Anemia Requiring Reoperation) … p.7519

Palliative and Supportive Care.
Researchers' Work from King Hussein Cancer Center Focuses on Palliative and Supportive Care [Impact of outpatient palliative care (PC) on symptom burden in patients with advanced cancer at a tertiary cancer center in Jordan] … p.7520

Skin Diseases and Conditions - Psoriasis.
Researchers' Work from Kobe University Focuses on Psoriasis (Genetic prediction of the effectiveness of biologics for psoriasis treatment) … p.7521

Cardiovascular Diseases and Conditions - Thrombosis. Researchers' Work from Maastricht University Hospital Focuses on Thrombosis (Eliciting patients' preferences for elastic compression stocking therapy after deep vein thrombosis: potential for improving compliance) … p.7522

Genetics. Researchers' Work from Magee–Women's Research Institute Focuses on Genetics (Signal–Oriented Pathway Analyses Reveal a Signaling Complex as a Synthetic Lethal Target for p53 Mutations) … p.7523

Oncology - Kidney Cancer. Researchers' Work from Medical University Focuses on Kidney Cancer (Gender differences in incidence and outcomes of urothelial and kidney cancer) … p.7524

Oncology - Neuroblastomas. Researchers' Work from National Cancer Institute Focuses on Neuroblastomas (Aurora B kinase is a potent and selective target in MYCN–driven neuroblastoma) … p.7525

DNA Research. Researchers' Work from National Center for Nanoscience and Technology Focuses on DNA Research (A Photosensitizer–Loaded DNA Origami Nanosystem for Photodynamic Therapy) … p.7526

Drugs and Therapies - Antiinfectives.
Researchers' Work from National Sun Yat Sen University Focuses on Antiinfectives (Characterisation of fosfomycin resistance mechanisms and molecular epidemiology in extended–spectrum beta–lactamase–producing Klebsiella pneumoniae isolates) … p.7527

Connective Tissue Diseases and Conditions - Cutis Laxa.
Researchers' Work from Oita University Focuses on Cutis Laxa (Functional consequence of fibulin–4 missense mutations associated with vascular and skeletal abnormalities and cutis laxa) … p.7528
Nephrology. Researchers' Work from Pfizer Focuses on Nephrology (Nephron segment specific microRNA biomarkers of pre-clinical drug-induced renal toxicity: Opportunities and challenges) … p.7529

Drugs and Therapies - Immunotherapy. Researchers' Work from Research Institute Focuses on Immunotherapy (Combination cancer immunotherapies tailored to the tumour microenvironment) … p.7530

Drugs and Therapies - Heparin Therapy. Researchers' Work from Ruprecht–Karls University Focuses on Heparin Therapy (Biosimilars of low–molecular–weight heparin products: fostering competition or reducing ‘biodiversity’?) … p.7531

Oncology - Oral Cancer. Researchers’ Work from School of Science Focuses on Oral Cancer (Genotypic distribution of single nucleotide polymorphisms in oral cancer: global scene) … p.7532

Oncology - Bladder Cancer. Researchers’ Work from Shantou University Focuses on Bladder Cancer (Comparison of the combination therapy of bacillus Calmette–Guerin and mitomycin C with the monotherapy for non–muscle–invasive bladder cancer: a meta–analysis) … p.7533

Oncology - Breast Cancer. Researchers’ Work from Sun Yat Sen Memorial Hospital Focuses on Breast Cancer (Comparison of the Therapeutic Efficacy of the Early and the Delayed Use of Vinorelbine–Based Regimens for Patients with Advanced Breast Cancer) … p.7534

Cardiology. Researchers' Work from Taipei Veterans General Hospital Focuses on Cardiology (Light to Moderate Habitual Alcohol Consumption Is Associated with Subclinical Ventricular and Left Atrial Mechanical Dysfunction in an Asymptomatic Population: ...) … p.7535

Oncology - Multiple Myeloma. Researchers' Work from University College Focuses on Multiple Myeloma (Multiple myeloma: patient outcomes in real–world practice) … p.7536

Health and Medicine - Prenatal Research. Researchers' Work from University College Focuses on Prenatal Research (Intra–familial variability associated with recessive RYR1 mutation diagnosed prenatally by exome sequencing) … p.7537

Oncology - Cancer Detection. Researchers' Work from University Federico II Focuses on Cancer Detection (Biparametric 3T Magentic Resonance Imaging for prostatic cancer detection in a biopsy–naive patient population: a further improvement of PI–RADS v2?) … p.7538

Endocrine System Diseases and Conditions - Insulin Resistance. Researchers' Work from University Hospital Focuses on Insulin Resistance (Effects of aerobic exercise on ectopic lipids in patients with growth hormone deficiency before and after growth hormone replacement therapy) … p.7539

Blood Pressure. Researchers' Work from University of Arizona Focuses on Blood Pressure (Substituting systolic blood pressure with shock index in the National Trauma Triage Protocol) … p.7540

Drugs and Therapies - Drug Delivery Systems. Researchers' Work from University of Copenhagen Focuses on Drug Delivery Systems (Solid cellulose nanofiber based foams – Towards facile design of sustained drug delivery systems) … p.7541

Gram–Negative Bacteria - Escherichia coli. Researchers’ Work from University of Hyderabad Focuses on Escherichia coli (Molecular Epidemiology and Genome Dynamics of New Delhi Metallo–beta–Lactamase–Producing
January 14, 2017

Extraintestinal Pathogenic Escherichia coli Strains from India) … p.7542

Apoptosis. Researchers' Work from University of New Mexico Focuses on Apoptosis (Cold–inducible RNA binding protein in mouse mammary gland development) … p.7543

Oncology - Colon Cancer. Researchers' Work from University of Queensland Focuses on Colon Cancer (PI3K/Akt/mTOR pathway dual inhibitor BEZ235 suppresses the stemness of colon cancer stem cells) … p.7544

Cardiovascular Diseases and Conditions - Atherosclerosis. Researchers' Work from University of Tokushima Focuses on Atherosclerosis (Combination of n–3 polyunsaturated fatty acids reduces atherogenesis in apolipoprotein E–deficient mice by inhibiting macrophage activation) … p.7545

Heart Disorders and Diseases - Heart Disease. Researchers' Work from University of Twente Focuses on Heart Disease (Very thin strut biodegradable polymer everolimus–eluting and sirolimus–eluting stents versus durable polymer zotarolimus–eluting stents in allcomers with coronary artery …] … p.7546

Propiophenones. Researchers' Work from Virginia Commonwealth University Focuses on Propiophenones (Methamphetamine–like discriminative stimulus effects of bupropion and its two hydroxy metabolites in male rhesus monkeys) … p.7548

Musculoskeletal Diseases and Conditions - Arthritis. Researchers' Work from Washington University Focuses on Arthritis (Immune–Mediated Protection and Pathogenesis of Chikungunya Virus) … p.7549

www.NewsRx.com

Immunology - Immunoglobulins. Researchers' Work from Weill Cornell Medical College Focuses on Immunoglobulins (An MH–restricted antibody–based chimeric antigen receptor requires TCR–like affinity to maintain antigen specificity) … p.7550

Oncology - Breast Cancer. Royal Marsden NHS Foundation Trust Details Findings in Breast Cancer (Rates of major complications during neoadjuvant and adjuvant chemotherapy for early breast cancer: An off study population) … p.7551

Gram–Negative Bacteria - Escherichia coli. Rutgers School of Dental Medicine Details Findings in Escherichia coli (Surface display of Aggregatibacter actinomycetemcomitans autotransporter Aae and dispersin B hybrid act as antibiofilm agents) … p.7552

Pharmaceutical Companies. SEATTLE GENETICS NOTIFICATION: Faruqi & Faruqi, LLP Encourages Investors Who Suffered Losses In Excess Of $100,000 Investing In Seattle Genetics, Inc. To Contact The Firm … p.7553

Biotechnology Companies. SHAREHOLDER ALERT: Bronstein, Gewirtz & Grossman, LLC Announces Investigation of Seattle Genetics, Inc. and Encourages Investors with Losses to Contact the Firm … p.7553

Pharmaceutical Companies. SHAREHOLDER ALERT: Lundin Law PC Announces an Investigation of Seattle Genetics, Inc. – SGEN … p.7554

Pharmaceutical Companies. SHAREHOLDER ALERT: Pomerantz Law Firm Investigates Claims On Behalf of Investors of Seattle Genetics, Inc. – SGEN … p.7555
January 14, 2017

Heart Disorders and Diseases - Cardiomyopathies. Salford Royal Hospital Reports Findings in Cardiomyopathies (An Update on Intradialytic Cardiac Dysfunction) ... p.7555

Central Nervous System Diseases and Conditions - Moyamoya Disease. Samsung Medical Center Reports Findings in Moyamoya Disease (Caveolin–1, Ring finger protein 213, and endothelial function in Moyamoya disease) ... p.7556

Central Nervous System Diseases and Conditions - Spinal Cord Injury. School of Medicine Details Findings in Spinal Cord Injury (Mice with sclerostin gene deletion are resistant to the severe sublesional bone loss induced by spinal cord injury) ... p.7558

Angiogenesis. School of Medicine Reports Findings in Angiogenesis (Targeting the angio–proteostasis network: Combining the forces against cancer) ... p.7559

Oncology - Breast Cancer. School of Medicine Reports Findings in Breast Cancer (Management and Outcomes in Metaplastic Breast Cancer) ... p.7560

Oncology - Breast Cancer. Scripps Florida scientists develop drug discovery approach to predict health impact of endocrine–disruptors ... p.7561

Clinical Research - Clinical Trials and Studies. Seattle Genetics Announces Clinical Hold on Several Phase 1 Trials of Vadastuximab Talirine SGN–CD33A ... p.7562

Immunology - Lymphoid Tissue. Second Military Medical University Reports Findings in Lymphoid Tissue (Identification of a novel alternative splicing transcript variant of the suppressor of fused: Relationship with lymph node metastasis in pancreatic ductal adenocarcinoma) ... p.7563

www.NewsRx.com

Centro Nacional de Investigaciones Oncologicas CNIO. Secrets of human protein interactions unveiled by massive sequencing and coevolution ... p.7564

Atrial Fibrillation. Shanghai Jiao–Tong University School of Medicine Reports Findings in Atrial Fibrillation (TBX5 mutations contribute to early–onset atrial fibrillation in Chinese and Caucasians) ... p.7565

Clinical Research - Clinical Trials and Studies. Shinhu University School of Medicine Reports Findings in Clinical Trials and Studies (McGRATH MAC video laryngoscope for insertion of a transoesophageal echocardiography probe: A randomised controlled trial) ... p.7567

Heart Disorders and Diseases - Heart Disease. Shoulder pain linked to increased heart disease risk ... p.7568

Cardiovascular Diseases and Conditions - Abdominal Aortic Aneurysm. Sichuan University Reports Findings in Abdominal Aortic Aneurysm (Abdominal compartment syndrome after endovascular repair for ruptured abdominal aortic aneurysm leads to acute intestinal necrosis Case report) ... p.7569

Neurodegenerative Diseases and Conditions - Amyotrophic Lateral Sclerosis. Single protein may hold secret to treating Parkinson's disease and more ... p.7570
Slayback Pharma Llc. announces the final approval and launch of Generic Zovirax Acyclovir Ointment 5% ... p.7571

Oncology - Liver Cancer. Southern Medical University Details Findings in Liver Cancer (Ten–year follow–up analysis of chronic hepatitis C patients after getting sustained virological response to pegylated interferon–alpha and ribavirin therapy) ... p.7572

Blood Diseases and Conditions - Sepsis. Specific Technologies and FIND announce strategic collaboration ... p.7573

Ischemia. Stanford University Reports Findings in Ischemia (Transient Receptor Potential Ankyrin 1 Activation within the Cardiac Myocyte Limits Ischemia–reperfusion Injury in Rodents) ... p.7574

Genetics - Human Genetics. Studies Conducted at Aix–Marseille University on Human Genetics Recently Reported (How to Identify Pathogenic Mutations among All Those Variations: Variant Annotation and Filtration in the Genome Sequencing Era) ... p.7575

Oncology - Bladder Cancer. Studies Conducted at Children's Medical Center on Bladder Cancer Recently Reported (Sarcomatoid Carcinoma of the Bladder in a Child: Case Report of a Successful Treatment Including Gemcitabine and Cisplatin) ... p.7576

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies Conducted at Erasmus University Medical Center on Alzheimer Disease Recently Reported (From ARB to ARNI in Cardiovascular Control) ... p.7581

Kidney Diseases and Conditions - Chronic Kidney Disease. Studies Conducted at General Hospital on Chronic Kidney Disease Recently Reported (Effects of Cardiovascular Events on End–Stage Renal Disease and Mortality in Patients With Chronic Kidney Disease Before Dialysis) ... p.7582

Immune System. Studies Conducted at Harvard School of Medicine on Immune System Recently Reported (IL–33 promotes food anaphylaxis in epicutaneously sensitized mice by targeting mast cells) ... p.7583
Bacteriophages. Studies Conducted at Indiana University on Bacteriophages Recently Reported (Virus Matryoshka: A Bacteriophage Particle–Guided Molecular Assembly Approach to a Monodisperse Model of the Immature Human Immunodeficiency Virus) ... p.7584

Health and Medicine - Cardiovascular Electrophysiology. Studies Conducted at Johns Hopkins University on Cardiovascular Electrophysiology Recently Reported (Insights from Novel Noninvasive CT and ECG Imaging Modalities on Electromechanical Myocardial Activation in a Canine Model of Ischemic ...) ... p.7585

Gastroenterology - Gastrectomy. Studies Conducted at Karolinska University Hospital on Gastrectomy Recently Reported (The surgical management of esophago–gastric junctional cancer) ... p.7586

Nervous System Diseases and Conditions - Cubital Tunnel Syndrome. Studies Conducted at Keio University on Cubital Tunnel Syndrome Recently Reported (Cigarette Smoking Is Associated With Cubital Tunnel Syndrome) ... p.7587

Heart Disorders and Diseases - Acute Coronary Syndrome. Studies Conducted at Kyorin University School of Medicine on Acute Coronary Syndrome Recently Reported (Barthel Index as a Predictor of 1–Year Mortality in Very Elderly Patients Who Underwent Percutaneous Coronary Intervention for Acute ...) ... p.7588

Oncology - Pancreatic Cancer. Studies Conducted at La Paz University Hospital on Pancreatic Cancer Recently Reported (Management of pancreatic cancer in the elderly) ... p.7589

Mental Health. Studies Conducted at Macquarie University on Mental Health Recently Reported (Screening for Mental Health Risk in High Schools: The Development of the Youth RADAR) ... p.7590

Caenorhabditis elegans. Studies Conducted at Marist College on Caenorhabditis elegans Recently Reported [CRISPR Technology Reveals RAD(51)–ical Mechanisms of Repair in Roundworms: An Educational Primer for Use with “Promotion of Homologous Recombination by SWS–1 in [...] ... p.7591

Oncology - Small Cell Lung Cancer. Studies Conducted at Massachusetts General Hospital on Small Cell Lung Cancer Recently Reported (Clinical Activity of Alectinib in Advanced RET–Rearranged Non–Small Cell Lung Cancer) ... p.7592

Enzymes and Coenzymes - Cholinesterases. Studies Conducted at Mayo Clinic on Cholinesterases Recently Reported (Physiological roles for butyrylcholinesterase: A BChE–ghrelin axis) ... p.7593

Genetics - Medical Genetics. Studies Conducted at Medical College of Wisconsin on Medical Genetics Recently Reported (8q21.11 Microdeletion in Two Patients with Syndromic Peters Anomaly) ... p.7594

Respiratory Tract Diseases and Conditions - Obstructive Sleep Apnea. Studies Conducted at Nanjing Medical University on Obstructive Sleep Apnea Recently Reported (Obstructive Sleep Apnea Increases the Perioperative Risk of Cardiac Valve Replacement Surgery: A Prospective Single–Center Study) ... p.7595
January 14, 2017

Lung Diseases and Conditions - Radiation Pneumonitis. Studies Conducted at Nanjing University on Radiation Pneumonitis Recently Reported (TGF–beta 1 rs1982073 polymorphism contributes to radiation pneumonitis in lung cancer patients: a meta–analysis) … p.7596

Congenital Abnormalities - Situs Inversus. Studies Conducted at National Center for Child Health and Development on Situs Inversus Recently Reported (Reno– and splenportal anastomosis for a retransplant patient with situs inversus) … p.7597

Drugs and Therapies - Drug Delivery Systems. Studies Conducted at National Center for Scientific Research (CNRS) on Drug Delivery Systems Recently Reported (Self–Assembled Gold Nanoclusters for Bright Fluorescence Imaging and Enhanced Drug Delivery) … p.7598

Neurodegenerative Diseases and Conditions - Huntington Disease. Studies Conducted at National University Hospital on Huntington Disease Recently Reported (Identification of Novel Microsatellite Markers <1 Mb from the HTT CAG Repeat and Development of a Single–Tube Tridecaplex PCR Panel of Highly Polymorphic ...) … p.7599

Science. Studies Conducted at Niigata University Graduate School of Medical and Dental Science on Science Recently Reported (Novel kinase fusion transcripts found in endometrial cancer) … p.7600

Cardiovascular Diseases. Studies Conducted at Qingdao University on Cardiovascular Diseases Recently Reported (Pinoresinol Diglucoside Alleviates oxLDL–Induced Dysfunction in Human Umbilical Vein Endothelial Cells) … p.7601

www.NewsRx.com

Oncology - Small Cell Lung Cancer. Studies Conducted at Research Center on Small Cell Lung Cancer Recently Reported (Immunotherapy for small–cell lung cancer: emerging evidence) … p.7602

Genetics - Assisted Reproduction and Genetics. Studies Conducted at Sapienza–University on Assisted Reproduction and Genetics Recently Reported (Freeze/thaw stress induces organelle remodeling and membrane recycling in cryopreserved human mature oocytes) … p.7603

Mycobacterium Infections - Tuberculosis. Studies Conducted at School of Public Health on Tuberculosis Recently Reported (Stringent Response Factors PPX1 and PPK2 Play an Important Role in Mycobacterium tuberculosis Metabolism, Biofilm Formation, and Sensitivity to Isoniazid In Vivo) … p.7604

Oncology - Gastric Cancer. Studies Conducted at Shandong University on Gastric Cancer Recently Reported (NTRK2 is an oncogene and associated with microRNA–22 regulation in human gastric cancer cell lines) … p.7605

Oncology - Colon Cancer. Studies Conducted at Shanghai University of Traditional Chinese Medicine on Colon Cancer Recently Reported (Evodiamine Suppresses ABCG2 Mediated Drug Resistance by Inhibiting p50/p65 NF–kB Pathway in Colorectal Cancer) … p.7606

Herpesvirus Diseases and Conditions - Cytomegalovirus. Studies Conducted at Singapore General Hospital on Cytomegalovirus Recently Reported (Severe gastrointestinal cytomegalovirus disease in two patients with renal vasculitis after immunosuppression) … p.7607
Nervous System Diseases and Conditions - Familial Dysautonomia. Studies Conducted at Sloan Kettering Institute on Familial Dysautonomia Recently Reported (Capturing the biology of disease severity in a PSC–based model of familial dysautonomia) ... p.7608

Blood Diseases and Conditions - Sepsis. Studies Conducted at St. Boniface General Hospital on Sepsis Recently Reported (Multifaceted antibiotic treatment analysis of methicillin–sensitive Staphylococcus aureus bloodstream infections) ... p.7609

Pharmacogenetics. Studies Conducted at St. Jude Children's Research Hospital on Pharmacogenetics Recently Reported (Evidence and resources to implement pharmacogenetic knowledge for precision medicine) ... p.7610

Genetics. Studies Conducted at Stanford University on Genetics Recently Reported (Molecular Imaging Biosensor Monitors p53 Sumoylation in Cells and Living Mice) ... p.7611

Oncology - Glioblastomas. Studies Conducted at Timone Hospital on Glioblastomas Recently Reported (Changes in PlGF and MET–HGF expressions in paired initial and recurrent glioblastoma) ... p.7612

Genetics - Human Genetics. Studies Conducted at Tohoku University School of Medicine on Human Genetics Recently Reported (Recent advances in RASopathies) ... p.7613

Glutamic Acid. Studies Conducted at Tokyo University of Science on Glutamic Acid Recently Reported (Galacto–N–biose is neuroprotective against glutamate–induced excitotoxicity in vitro) ... p.7614

Oncology - Non-Small Cell Lung Cancer. Studies Conducted at University Hospital on Non–Small Cell Lung Cancer Recently Reported (Molecular Profiling of Circulating Tumour Cells Identifies Notch1 as a Principal Regulator in Advanced Non–Small Cell Lung Cancer) ... p.7615

Oncology - Gliomas. Studies Conducted at University Medical Center, Erlangen on Gliomas Recently Reported (MIF–CD74 signaling impedes microglial M1 polarization and facilitates brain tumorigenesis) ... p.7616

Lung Diseases and Conditions - Pneumonia. Studies Conducted at University of Amsterdam on Pneumonia Recently Reported (Comparative Analysis of the Host Response to Community–acquired and Hospital–acquired Pneumonia in Critically Ill Patients) ... p.7617

Drugs and Therapies - Chemotherapy. Studies Conducted at University of California on Chemotherapy Recently Reported (Postmastectomy radiation therapy after neoadjuvant chemotherapy: review and interpretation of available data) ... p.7618

Drugs and Therapies - Pharmacy Practice. Studies Conducted at University of California on Pharmacy Practice Recently Reported (Developing a process for expansion of community pharmacy residency sites) ... p.7618

Pharmacology. Studies Conducted at University of Copenhagen on Pharmacology Recently Reported (N–terminally and C–terminally truncated forms of glucose–dependent insulinotropic polypeptide are high–affinity competitive antagonists of the human GIP receptor) ... p.7619
Oncology - Breast Cancer. Studies Conducted at University of Delaware on Breast Cancer Recently Reported (Nanoshell–mediated photothermal therapy can enhance chemotherapy in inflammatory breast cancer cells) ... p.7621

Clinical Research - Clinical Trials and Studies. Studies Conducted at University of Iowa on Clinical Trials and Studies Recently Reported (Determining When to Add Nonstatin Therapy A Quantitative Approach) ... p.7622

Gram-Negative Bacteria - Escherichia coli. Studies Conducted at University of Lethbridge on Escherichia coli Recently Reported (RNA modification enzyme TruB is a tRNA chaperone) ... p.7623

Mycobacterium Infections - Tuberculosis. Studies Conducted at University of Liverpool on Tuberculosis Recently Reported (Methods for selecting regimen duration to prevent relapse in drug–susceptible and drug–resistant TB) ... p.7624

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies Conducted at University of Macau on Alzheimer Disease Recently Reported (The Protective Effects of Icarin against the Homocysteine–Induced Neurotoxicity in the Primary Embryonic Cultures of Rat Cortical Neurons) ... p.7625

Oncology - Liver Cancer. Studies Conducted at University of Medicine on Liver Cancer Recently Reported (DNA–PKcs: A promising therapeutic target in human hepatocellular carcinoma?) ... p.7626

Heart Disorders and Diseases - Heart Disease. Studies Conducted at University of Ottawa on Heart Disease Recently Reported (Transcriptomic Signature of Atherosclerosis in the Peripheral Blood: Fact or Fiction?) ... p.7627

Genetic Diseases and Conditions - Klinefelter Syndrome. Studies Conducted at University of Padova on Klinefelter Syndrome Recently Reported (The Klinefelter syndrome is associated with high recurrence of copy number variations on the X chromosome with a potential role in the clinical phenotype) ... p.7628

Aortic Stenosis. Studies Conducted at University of Texas Health Science Center on Aortic Stenosis Recently Reported (Natural history of 107 cases of fetal aortic stenosis from a European multicenter retrospective study) ... p.7629

Drugs and Therapies - Antiinfectives. Studies Conducted at University of Warmia & Mazury on Antiinfectives Recently Reported [Content of biogenic amines in Lemna minor (common duckweed) growing in medium contaminated with tetracycline] ... p.7630

Support Vector Machines. Studies Conducted at Wake Forest University on Support Vector Machines Recently Reported (Baseline Gray– and White–Matter Volume Predict Successful Weight Loss in the Elderly) ... p.7631

Oncology - Prostate Cancer. Studies Conducted at Washington State University on Prostate Cancer Recently Reported (Positive and Negative Cross–Talk between Lysophosphatidic Acid Receptor 1, Free Fatty Acid Receptor 4, and Epidermal Growth Factor Receptor in Human Prostate ...) ... p.7632

Skin Diseases and Conditions - Variegate Porphyria. Studies Conducted at Wroclaw University on Variegate Porphyria Recently Reported (Elective cholecystectomy performed on patient with variegate porphyria–Propofol–based total intravenous anesthesia with target–controlled infusion) ... p.7633
January 14, 2017

Heart Disorders and Diseases - Atrial Fibrillation. Studies Conducted by A. Pilotto et al on Atrial Fibrillation Recently Reported (Warfarin Treatment and All-Cause Mortality in Community-Dwelling Older Adults with Atrial Fibrillation: A Retrospective Observational Study) … p.7634

Gastroenterology - Hernias. Studies Conducted by D.S. Mous et al on Hernias Recently Reported (Clinically relevant timing of antenatal sildenafil treatment reduces pulmonary vascular remodeling in congenital diaphragmatic hernia) … p.7635

Proteomics. Studies Conducted by F. Tisato et al on Proteomics Recently Reported [Electrospray ionization in the study of the interactions between cytotoxic phosphino Cu(I) complexes and selected amino acids and GlyGlyHis peptide model] … p.7636

Genetics - Genetics and Cancer. Studies by A. Stengel and Co-Authors Describe New Findings in Genetics and Cancer (The 5q Deletion Size in Myeloid Malignancies Is Correlated to Additional Chromosomal Aberrations and to TP53 Mutations) … p.7640

Cardiovascular Diseases and Conditions - Thrombosis and Hemostasis. Studies by H. Cai and Co-Authors Describe New Findings in Thrombosis and Hemostasis (Usefulness of Flow Cytometric Mepacrine Uptake/Release Combined with CD63 Assay in Diagnosis of Patients with Suspected Platelet Dense Granule Disorder) … p.7641

Oncology - Cancer Research. Studies by M.J. Kilsdonk and Co-Authors Describe New Findings in Cancer Research (Two decades of external peer review of cancer care in general hospitals; the Dutch experience) … p.7642

Diabetes. Studies by T. Chita and Co-Authors Describe New Findings in Diabetes (Urinary tract infections in Romanian patients with diabetes: prevalence, etiology, and risk factors) … p.7643

Drugs and Therapies - Fluoxetine Therapy. Studies by X.Y. Wang and Co-Authors Describe New Findings in Fluoxetine Therapy (Repeated acupuncture treatments modulate amygdala resting state functional connectivity of depressive patients) … p.7644

Hematologic Diseases and Conditions - Sickle Cell Anemia. Studies from A.J. Marti-Carvajal et al Further Understanding of Sickle Cell Anemia (Antibiotics for treating osteomyelitis in people with sickle cell disease) … p.7645

Drugs and Therapies - Toxicology and Pharmacology. Studies from A.M. Saillenfait and Colleagues Provide New Data on Toxicology and Pharmacology (4-Week repeated dose oral toxicity study of N-ethyl-2-pyrrolidone in Sprague Dawley rats) … p.7646
January 14, 2017

Bone Disease. Studies from ATTIKON University Hospital Add New Findings in the Area of Bone Disease (Modern Palliative Treatments for Metastatic Bone Disease: Awareness of Advantages, Disadvantages, and Guidance) … p.7649

Clinical Research - Clinical Trials and Studies. Studies from Aarhus University Add New Findings in the Area of Clinical Trials and Studies (Anesthetic strategy during endovascular therapy: General anesthesia or conscious sedation? [GOLIATH – General or Local Anesthesia in Intra Arterial …] … p.7650

Oncology - Invasive Carcinoma. Studies from Aarhus University Add New Findings in the Area of Invasive Carcinoma (Co–expression of p16 and p53 characterizes aggressive subtypes of ductal intraepithelial neoplasia) … p.7651

Cardiology. Studies from Aarhus University in the Area of Cardiology Reported (Risk Associated With Surgery Within 12 Months After Coronary Drug–Eluting Stent Implantation) … p.7652

www.NewsRx.com

Central Nervous System Diseases and Conditions - Epilepsy. Studies from Actel Pharmaceuticals Yield New Information about Epilepsy (Structure–Activity Relationship, Drug Metabolism and Pharmacokinetics Properties Optimization, and in Vivo Studies of New Brain Penetrant Triple T–Type Calcium Channel …) … p.7653

Peptide Proteins - Proinsulin. Studies from Agency for Science, Technology and Research Further Understanding of Proinsulin (Brefeldin A–inhibited guanine nucleotide exchange protein 3 is localized in lysosomes and regulates GABA signaling in hippocampal neurons) … p.7654

Diabetes. Studies from Ajou University Reveal New Findings on Diabetes (Statins and risk for new–onset diabetes mellitus A real–world cohort study using a clinical research database) … p.7655

Apoptosis. Studies from Albert–Ludwigs–University Update Current Data on Apoptosis (The clerodane diterpene casearin J induces apoptosis of T–ALL cells through SERCA inhibition, oxidative stress, and interference with Notch1 signaling) … p.7656

Autosomal-Recessive Disease. Studies from Alfaisal University Yield New Data on Autosomal–Recessive Disease (Clinical genomics can facilitate countrywide estimation of autosomal recessive disease burden) … p.7657

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Studies from All India Institute of Medical Sciences Have Provided New Information about Myelodysplastic Syndromes (Value of Quantitative assessment of Myeloid Nuclear Differentiation Antigen expression and other flow cytometric parameters in …) … p.7658
January 14, 2017

Cardiovascular Research. Studies from Angers University Hospital Provide New Data on Cardiovascular Research (Effects of plantar stimulation on cardiovascular response to orthostatism) … p.7659

Oncology - Cancer Care. Studies from Ankara University Describe New Findings in Cancer Care (Severe drug interactions and potentially inappropriate medication usage in elderly cancer patients) … p.7660

Genetics. Studies from Asia University Update Current Data on Genetics (TRAF6 Restricts p53 Mitochondrial Translocation, Apoptosis, and Tumor Suppression) … p.7662

Drugs and Therapies - Pharmacology. Studies from AstraZeneca Yield New Data on Pharmacology (Effects of P2Y12 receptor antagonists beyond platelet inhibition—comparison of ticagrelor with thienopyridines) … p.7663

Pulmonary Vascular Resistance. Studies from Atlantic Health System Yield New Data on Pulmonary Vascular Resistance (Pulmonary Artery Acceleration Time Provides a Reliable Estimate of Invasive Pulmonary Hemodynamics in Children) … p.7664

Dysplasia. Studies from Austin Hospital Further Understanding of Dysplasia (Terminal osseous dysplasia with pigmentary defects; Case and brief review of filamin A–related disorders) … p.7665

www.NewsRx.com

Drugs and Therapies - Aspirin Therapy. Studies from Azienda Ospedaliera University Reveal New Findings on Aspirin Therapy (Statins and Aspirin use in HIV–infected people: gap between European AIDS Clinical Society guidelines and clinical practice: the results from HIV–HY study) … p.7666

Silicates. Studies from B. Li and Colleagues Yield New Information about Silicates (Esophagus cancer and occupational exposure to asbestos: results from a meta–analysis of epidemiology studies) … p.7667

Biotechnology - Biomaterials Research. Studies from B. Sanz et al Add New Findings in the Area of Biomaterials Research (Magnetic hyperthermia enhances cell toxicity with respect to exogenous heating) … p.7668

Drugs and Therapies - Antineoplastics. Studies from B.A. Cardoso and Co–Researchers in the Area of Antineoplastics Reported (The Bone Marrow–Mediated Protection of Myeloproliferative Neoplastic Cells to Vorinostat and Ruxolitinib Relies on the Activation of JNK and PI3K Signalling …) … p.7669

Nanotechnology - Nanohybrids. Studies from Banaras Hindu University Have Provided New Data on Nanohybrids (Superior biomaterials using diamine modified graphene grafted polyurethane) … p.7670

Liver Diseases and Conditions - Liver Cirrhosis. Studies from Baskent University Reveal New Findings on Liver Cirrhosis (High Dose Oral Furosemide with Salt Ingestion in the Treatment of Refractory Ascites of Liver Cirrhosis) … p.7671

Pregnancy Complications - Amniotic Fluid Embolism. Studies from Baylor University College of Medicine Update Current Data on Amniotic Fluid Embolism (3 Proposed diagnostic criteria for the case definition of amniotic fluid embolism in research studies)
Life Science Research - Reproduction and Fertility. Studies from Baylor University College of Medicine Update Current Data on Reproduction and Fertility (Correlation between Cyr61 expression and clinicopathologic parameters in adenomyosis) … p.7673

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Studies from Baylor University Reveal New Findings on Fabry Disease (Is it Fabry disease?) … p.7674

Biological Factors - Eicosanoids. Studies from Beijing Institute of Radiation Medicine Further Understanding of Eicosanoids (Timosaponin All induces antiplatelet and antithrombotic activity via Gq–mediated signaling by the thromboxane A2 receptor) … p.7675

Clinical Research - Clinical Trials and Studies. Studies from Bellvitge University Hospital Provide New Data on Clinical Trials and Studies (Cerebrospinal fluid and plasma lopinavir concentrations and viral response in virologically suppressed patients switching to lopinavir/ritonavir) … p.7676

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. Studies from Bhabha Atomic Research Center Provide New Data on Antineoplastic Monoclonal Antibodies [Doxorubicin enhances (131)I–rituximab induced cell death in Raji cells] … p.7677

Oncology - Cancer Epidemiology. Studies from Biomedical Research Foundation Have Provided New Data on Cancer Epidemiology (Effectiveness of patient–targeted interventions to promote cancer screening among ethnic minorities: A systematic review) … p.7678

Enzymes and Coenzymes - Steroid Hydroxylases. Studies from Boehringer Ingelheim Pharmaceuticals Have Provided New Data on Steroid Hydroxylases (Selectivity of BI 689648, a Novel, Highly Selective Aldosterone Synthase Inhibitor: Comparison with FAD286 and LCI699 in Nonhuman Primates) … p.7679

Pharmacokinetics. Studies from Brigham Young University Describe New Findings in Pharmacokinetics (How PEGylation influences protein conformational stability) … p.7680

Heart Disorders and Diseases - Atrial Fibrillation. Studies from Brigham and Women’s Hospital Provide New Data on Atrial Fibrillation (Impact of the US Food and Drug Administration’s Safety–Related Announcements on the use of Bisphosphonates After Hip Fracture) … p.7681

Oncology - Breast Cancer. Studies from Brigham and Women’s Hospital Yield New Information about Breast Cancer (Preserved vagus nerve stimulator function after radiation therapy) … p.7682

Oncology - Lung Cancer. Studies from C. Ambrogio and Co–Authors Have Provided New Information about Lung Cancer (Combined inhibition of DDR1 and Notch signaling is a therapeutic strategy for KRAS–driven lung adenocarcinoma) … p.7684
Capillary Electrophoresis. Studies from C. Varadi and Co–Authors Have Provided New Information about Capillary Electrophoresis [Quantitative twoplex glycan analysis using C–12(6) and C–13 (6) stable isotope 2–aminobenzoic acid labelling and capillary electrophoresis mass …] … p.7685

Blood Diseases and Conditions - Sepsis. Studies from C.D. Weber et al Have Provided New Data on Sepsis (Classification of soft–tissue injuries in open femur fractures: Relevant for systemic complications?) … p.7686

Cholesterol. Studies from C.M. Ballantyne et al in the Area of Cholesterol Described [Icosapent ethyl (eicosapentaenoic acid ethyl ester): Effects on remnant–like particle cholesterol from the MARINE and ANCHOR studies] … p.7687

Drugs and Therapies - Antiretrovirals. Studies from CHUM Reveal New Findings on Antiretrovirals [Antiretroviral therapy suppressed participants with low CD4(+) T–cell counts segregate according to opposite immunological phenotypes] … p.7689

Drugs and Therapies - Cancer Therapy. Studies from CSIR Yield New Information about Cancer Therapy (Reprogramming of Molecular Switching Events in UPR Driven ER Stress: Scope for Development of Anticancer Therapeutics) … p.7690

Oncology - Gynecologic Oncology. Studies from Cancer Center Describe New Findings in Gynecologic Oncology (The Value of Secondary Cytoreductive Surgery in Recurrent Ovarian Cancer and Application of a Prognostic Score) … p.7691

Oncology - Esophageal Cancer. Studies from Cancer Hospital Further Understanding of Esophageal Cancer (Long–term results of definitive concurrent chemoradiotherapy using paclitaxel plus oxaliplatin in unresectable locally advanced esophageal cancer: a prospective phase II …) … p.7692

Cardiovascular Diseases and Conditions - Hypertension. Studies from Capital Medical University Add New Findings in the Area of Hypertension (Salusin–beta contributes to vascular inflammation associated with pulmonary arterial hypertension in rats) … p.7693

Central Nervous System Diseases and Conditions - Moyamoya Disease. Studies from Capital Medical University Add New Findings in the Area of Moyamoya Disease (High–resolution Magnetic Resonance Imaging of Moyamoya Disease) … p.7694

Apoptosis. Studies from Capital Medical University Reveal New Findings on Apoptosis (Cardiac Specific Overexpression of Mitochondrial Omi/HtrA2 Induces Myocardial Apoptosis and Cardiac Dysfunction) … p.7695

Heart Disorders and Diseases - Heart Attack. Studies from Capital Medical University Update Current Data on Heart Attack (Atrial fibrillation is associated with an increased risk of myocardial infarction: Insights from a meta–analysis) … p.7696

Heart Disorders and Diseases - Heart Failure. Studies from Capital Medical University in the Area of Heart Failure Described (Analysis of Renal Artery Stenosis in Patients with Heart Failure: A RASHEF Study) … p.7698
January 14, 2017

Heart Disorders and Diseases - Hypertrophic Cardiomyopathy. Studies from Cardiovascular Institute Yield New Data on Hypertrophic Cardiomyopathy (Utility of Real Time 3D Echocardiography for the Assessment of Left Ventricular Mass in Patients with Hypertrophic Cardiomyopathy: Comparison with Cardiac ...) ... p.7699

Heart Disorders and Diseases - Heart Disease. Studies from Cardiovascular Research Foundation Yield New Data on Heart Disease (Gender Differences in Associations Between Intraprocedural Thrombotic Events During Percutaneous Coronary Intervention and Adverse Outcomes) ... p.7700

Numerical Analysis. Studies from Carleton University Yield New Data on Numerical Analysis (Nonuniform Deposition of Pressurized Metered–Dose Aerosol in Spacer Devices) ... p.7701

Surgery - Cesarean Section. Studies from Case Western Reserve University Describe New Findings in Cesarean Section (Maternal and neonatal outcomes of attempted vaginal compared with planned cesarean delivery in triplet gestations) ... p.7702

Therapeutics. Studies from Case Western Reserve University Reveal New Findings on Therapeutics (Female genital alteration: a compromise solution) ... p.7704

Oncology - Thyroid Cancer. Studies from Catholic University of Daegu School of Medicine in the Area of Thyroid Cancer Reported (Ultrasonographic Characteristics of the Follicular Variant Papillary Thyroid Cancer According to the Tumor Size) ... p.7704

Leiomyomas. Studies from Catholic University of Korea Provide New Data on Leiomyomas (Rapid enlargement of endometrial stromal sarcoma after uterine fibroid embolization for presumed adenomyosis: a case report and literature review) ... p.7705

Clinical Research - Clinical Trials and Studies. Studies from Catholic University of Korea in the Area of Clinical Trials and Studies Described (Efficacy and Safety of “URSA Complex” in Subjects with Physical Fatigue: A Multicenter, Randomized, Double–blind, Placebo–controlled Trial) ... p.7706

Drugs and Therapies - Olanzapine Therapy. Studies from Catholic University of Leuven Describe New Findings in Olanzapine Therapy (A sensitive capillary LC–UV method for the simultaneous analysis of olanzapine, chlorpromazine and their FMO–mediated N–oxidation products in brain ...) ... p.7707

Drugs and Therapies - Chemotherapy. Studies from Catholic University of Leuven Have Provided New Data on Chemotherapy (Modulation of the Substitution Pattern of 5–Aryl–2–Aminoimidazoles Allows Fine–Tuning of Their Antibiofilm Activity Spectrum and Toxicity) ... p.7708

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Catholic University of Louvain Yield New Information about Type 2 Diabetes [A Mechanistic Study on Nanoparticle–Mediated Glucagon–Like Peptide–1 (GLP–1) Secretion from Enteroendocrine L Cells] ... p.7710

Immunology - Immunoglobulins. Studies from Cedars–Sinai Heart Institute Add New Findings in the Area of Immunoglobulins (Do Prior Driveline Infections Increase the Risk of Infection in Heart Transplant Patients Treated With Rabbit Antithymocyte Globulin Induction Therapy?) ... p.7711

Lung Diseases and Conditions - Pneumonia. Studies from Cedars–Sinai Medical Center Yield New Data on Pneumonia [Results of the ICTuS 2 Trial (Intravascular Cooling in the Treatment of Stroke 2)] ... p.7712

Oncology - Liver Cancer. Studies from Central Hospital Describe New Findings in Liver Cancer (Diabetes mellitus may affect the long–term survival of hepatitis B virus–related hepatocellular carcinoma patients after liver transplantation) … p.7714

Oncology - Gastric Cancer. Studies from Central Hospital Provide New Data on Gastric Cancer (Surgical care quality and oncologic outcome after D2 gastrectomy for gastric cancer) … p.7715

Cardiovascular Diseases and Conditions - Hypertension. Studies from Central Manchester NHS Foundation Trust Have Provided New Data on Hypertension (How to Screen for Non–Adherence to Antihypertensive Therapy) … p.7716

Drugs and Therapies - Intron Therapy. Studies from Central South University Reveal New Findings on Intron Therapy (In situ genetic correction of F8 intron 22 inversion in hemophilia A patient–specific iPSCs) … p.7717

Drugs and Therapies - Mitotic Inhibitors. Studies from Central South University in the Area of Mitotic Inhibitors Reported (Genetic variation of CYP3A5 influences paclitaxel/carboplatin–induced toxicity in Chinese epithelial ovarian cancer patients) … p.7718

Oncology - Multiple Myeloma. Studies from Chang Gung Memorial Hospital Describe New Findings in Multiple Myeloma (Cyclophosphamide plus granulocyte–colony stimulating factor for hematopoietic stem cell mobilization in patients with multiple myeloma) … p.7719

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Chang Gung University College of Medicine Provide New Data on Type 2 Diabetes (Diabetic Retinopathy Is Strongly Predictive of Cardiovascular Autonomic Neuropathy in Type 2 Diabetes) … p.7720

Lung Diseases and Conditions - Asthma. Studies from Chang Gung University in the Area of Asthma Described (Association between cigarette smoking and interleukin–17A expression in nasal tissues of patients with chronic rhinosinusitis and asthma) … p.7721

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Chang Gung University in the Area of Type 2 Diabetes Reported (Rosuvastatin decreases testosterone levels but not sexual function in men with type 2 diabetes) … p.7722

Oncology - Colon Cancer. Studies from Shanghai Hospital in the Area of Colon Cancer Reported (Inhibition of Growth and Metastasis of Colon Cancer by Delivering 5–Fluorouracil–Loaded Pluronic P85 Copolymer Micelles) … p.7723

Lung Diseases and Conditions - Pulmonary Hypertension. Studies from Charles University Have Provided New Data on Pulmonary Hypertension (Depletion of Alveolar Macrophages Attenuates Hypoxic Pulmonary Hypertension but not Hypoxia–Induced Increase in Serum Concentration of MCP–1) … p.7724

Drugs and Therapies - Antiretrovirals. Studies from Charles University Have Provided New Information about Antiretrovirals (Role of ABC and Solute Carrier Transporters in the Placental Transport of Lamivudine) … p.7725
January 14, 2017

Nocardia. Studies from Chiba University Add New Findings in the Area of Nocardia (Clinical characteristics of pulmonary nocardiosis in immunocompetent patients) … p.7726

Liver Diseases and Conditions - Fatty Liver. Studies from Chiba University Graduate School of Medicine Update Current Data on Fatty Liver (Palmitate–induced Regulation of PPARg via PGC1a: a Mechanism for Lipid Accumulation in the Liver in Nonalcoholic Fatty Liver Disease) … p.7727

Heart Disorders and Diseases - Hypoplastic Left Heart Syndrome. Studies from Children's Hospital Update Current Data on Hypoplastic Left Heart Syndrome (Norwood Procedure for Palliation of Hypoplastic Left Heart Syndrome: Right Ventricle to Pulmonary Artery Conduit vs Modified Blalock–Taussig Shunt) … p.7728

Neurodegenerative Disease and Conditions - Alzheimer Disease. Studies from China Pharmaceutical University Further Understanding of Alzheimer Disease (Hypericin inhibits oligomeric amyloid beta 42–induced inflammation response in microglia and ameliorates cognitive deficits in an amyloid beta injection …) … p.7729

Hydrazines. Studies from China Pharmaceutical University Provide New Data on Hydrazines (Role of Inflammatory and Oxidative Stress, Cytochrome P450 2E1, and Bile Acid Disturbance in Rat Liver Injury Induced by Isoniazid and Lipopolysaccharide Cotreatment) … p.7731

www.NewsRx.com

Leukocyte Diseases and Conditions - Neutropenia. Studies from Chinese People's Liberation Army General Hospital Update Current Data on Neutropenia (Piperacillin–tazobactam vs. imipenem–cilastatin as empirical therapy in hematopoietic stem cell transplantation recipients with febrile …) … p.7732

Gram–Negative Bacteria - Uropathogenic Escherichia coli. Studies from Chongqing University in the Area of Uropathogenic Escherichia coli Described (Siderophore Biosynthesis Governs the Virulence of Uropathogenic Escherichia coli by Coordinate Modulating the Differential Metabolism) … p.7734

Peace and Conflict Management. Studies from City University of New York Reveal New Findings on Peace and Conflict Management (When risky decisions are not surprising: An application of prospect theory to the Israeli war decision in 2006) … p.7736

Drugs and Therapies - Antiretrovirals. Studies from City of Hope National Medical Center Reveal New Findings on Antiretrovirals (Tunneling nanotubes: an alternate route for propagation of the bystander effect following oncolytic viral infection) … p.7736

Thyroid Nodule. Studies from Cleveland Clinic Add New Findings in the Area of Thyroid Nodule (Utility Of Ultrasound Versus Gene Expression Classifier In Thyroid Nodules With Atypia Of Undetermined Significance) … p.7737
Drugs and Therapies - Chemotherapy.
Studies from Cleveland Clinic Provide New Data on Chemotherapy
(Preservation of gonadal function in women undergoing chemotherapy: a review of the potential role for gonadotropin–releasing hormone agonists) … p.7739

Surgery - Esophagectomy. Studies from Cleveland Clinic Update Current Data on Esophagectomy [Recommendations for pathologic staging (pTNM) of cancer of the esophagus and esophagogastric junction for the 8th edition AJCC/UICC staging manuals] … p.7740

Cardiovascular Diseases and Conditions - Thromboembolism. Studies from Columbia University College of Physicians and Surgeons Describe New Findings in Thromboembolism (A comparison of recommendations for pharmacologic thromboembolism prophylaxis after caesarean delivery from three major guidelines) … p.7741

Oncology - Gliomas. Studies from Columbia University Have Provided New Data on Gliomas (Safety, feasibility, and optimization of intra–arterial mitoxantrone delivery to gliomas) … p.7743

Oncology - Lymphoma. Studies from Columbia University Have Provided New Data on Lymphoma (High rate of complete responses to immune checkpoint inhibitors in patients with relapsed or refractory Hodgkin lymphoma previously exposed to epigenetic therapy) … p.7744

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies from Columbia University Yield New Information about Alzheimer Disease (Genomics of Alzheimer's disease: Value of high–throughput genomic technologies to dissect its etiology) … p.7745

Heart Disorders and Diseases - Cardiomyopathies. Studies from Comenius University Provide New Data on Cardiomyopathies (Ramipril restores PPAR beta/delta and PPAR gamma expressions and reduces cardiac NADPH oxidase but fails to restore cardiac function and accompanied myosin heavy chain ratio ...) … p.7746

Bone Research. Studies from Curtin University Further Understanding of Bone Research (Bone morphogenetic protein–2 and bone therapy: successes and pitfalls) … p.7748

Drugs and Therapies - Antimicrobials. Studies from Curtin University in the Area of Antimicrobials Described (Is There Potential for Repurposing Statins as Novel Antimicrobials?) … p.7749

Oncology - Small Cell Lung Cancer. Studies from D. Bernhardt and Co–Authors Have Provided New Information about Small Cell Lung Cancer (Outcome in patients with small cell lung cancer re–irradiated for brain metastases after prior prophylactic cranial irradiation) … p.7750
January 14, 2017

Autoimmune Diseases and Conditions - Multiple Sclerosis. Studies from D. D’Ambrosio et al Further Understanding of Multiple Sclerosis (Ponesimod, a selective S1P1 receptor modulator: a potential treatment for multiple sclerosis and other immune–mediated diseases) … p.7751

Oncology - Leukemia. Studies from Dana–Farber Cancer Institute Provide New Data on Leukemia (A PI3K p110b–Rac signalling loop mediates Pten–loss–induced perturbation of haematopoiesis and leukaemogenesis) … p.7752

Oncology - Melanoma. Studies from Dana–Farber Cancer Institute Yield New Data on Melanoma (Combined nivolumab and ipilimumab versus ipilimumab alone in patients with advanced melanoma: 2–year overall survival outcomes in a multicentre, randomised, controlled, phase …) … p.7753

Drugs and Therapies - Ibuprofen Therapy. Studies from De Montfort University in the Area of Ibuprofen Therapy Described (Development of aqueous ternary nanomatrix films: A novel ‘green’ strategy for the delivery of poorly soluble drugs) … p.7754

Neurofibromatosis. Studies from Department of Anaesthesia and Critical Care Provide New Data on Neurofibromatosis (Neurofibromatosis: Challenge for Anaesthetist) … p.7755

Cardiology. Studies from Department of Cardiology Describe New Findings in Cardiology (Cardiac resynchronisation therapy in 2015: keeping up with the pace) … p.7757

Heart Disorders and Diseases - Heart Attack. Studies from Department of Cardiology in the Area of Heart Attack Reported (Peak troponin I level predicts new–onset atrial fibrillation in patients with myocardial infarction) … p.7758

Drugs and Therapies - Antiemetic-Antivertigo Agents. Studies from Department of Chemistry Further Understanding of Antiemetic–Antivertigo Agents [Preparation, optimization by 2 (3) factorial design, characterization and in vitro release kinetics of lorazepam loaded PLGA nanoparticles] … p.7759

Transplant Medicine - Tissue Transplants. Studies from Department of Emergency Medicine Have Provided New Information about Tissue Transplants (The emergency medicine approach to abdominal vascular graft complications) … p.7760

Clinical Research - Clinical Trials and Studies. Studies from Department of Epidemiology in the Area of Clinical Trials and Studies Reported (Psychosocial interventions for psychostimulant misuse) … p.7761

Drugs and Therapies - Drug Monitoring. Studies from Department of Forensic Genetics and Forensic Toxicology Yield New Data on Drug Monitoring (The Toxicology of New Psychoactive Substances: Synthetic Cathinones and Phenylethylamines) … p.7763

Lung Diseases and Conditions - Lung Injury. Studies from Department of Intensive Care Medical Provide New Data on Lung Injury (Nur77 attenuates endothelin–1 expression via downregulation of NF–kappa B and p38 MAPK in A549 cells and in an ARDS rat model) … p.7764
January 14, 2017

Liver Diseases and Conditions - Hepatic Tuberculosis. Studies from Department of Internal Medicine Have Provided New Data on Hepatic Tuberculosis (Erythema induratum of Bazin and Pon'et's arthropathy as epiphenomena of hepatic tuberculosis) ... p.7765

Kidney Diseases and Conditions - Lupus Nephritis. Studies from Department of Medicine Have Provided New Information about Lupus Nephritis (Towards new avenues in the management of lupus glomerulonephritis) ... p.7766

Mycobacterium Infections - Tuberculosis. Studies from Department of Microbiology & Immunology Describe New Findings in Tuberculosis (Reconstitution of a Mycobacterium tuberculosis proteostasis network highlights essential cofactor interactions with chaperone DnaK) ... p.7767

Drugs and Therapies - Alkylating Agents. Studies from Department of Neurosciences Yield New Data on Alkylating Agents (Altered Expression of Cytoskeletal and Axonal Proteins in Oxaliplatin–Induced Neuropathy) ... p.7768

Hematologic Diseases and Conditions - Anemia. Studies from Department of Obstetrics and Gynecology Yield New Data on Anemia (Safety and Efficacy of Ferric Carboxymaltose in Anemic Pregnant Women: A Retrospective Case Control Study) ... p.7769

Science. Studies from Department of Oncology Yield New Data on Science (A CRISPR/Cas9 Functional Screen Identifies Rare Tumor Suppressors) ... p.7770

Oncology - Neuroblastomas. Studies from Department of Pediatric and Adolescent Oncology Update Current Data on Neuroblastomas (Tandem high–dose chemotherapy with thiopeta and busulfan–melphalan and autologous stem cell transplantation in very high–risk neuroblastoma ...) ... p.7771

Life Science Research. Studies from Department of Pharmacology–Toxicology Have Provided New Data on Life Science Research (Ticagrelor Does Not Inhibit Adenosine Transport at Relevant Concentrations: A Randomized Cross–Over Study in Healthy Subjects In Vivo) ... p.7772

Liver Diseases and Conditions - Hepatitis C Virus. Studies from Department of Pharmacy Have Provided New Data on Hepatitis C Virus (Pharmacist engagement within a hepatitis C ambulatory care clinic in the era of a treatment revolution) ... p.7773

Developmental Diseases and Conditions - Autism. Studies from Department of Psychology in the Area of Autism Described (Speculations on vitamin K, VKORC1 genotype and autism) ... p.7774

Cardiovascular Diseases and Conditions - Hypotension. Studies from Department of Surgery Yield New Information about Hypotension (Prophylactic Gentamicin Is Not Associated with Acute Kidney Injury in Patients with Open Fractures) ... p.7775

Oncology - Non-Small Cell Lung Cancer. Studies from Department of Surgery in the Area of Non–Small Cell Lung Cancer Described (The Quality of Staging Non–Small Cell Lung Cancer in the Netherlands: Data From the Dutch Lung Surgery Audit) ... p.7776

Drugs and Therapies - Radiation Therapy. Studies from Department of Urology Provide New Data on Radiation Therapy [Prostate Specific Antigen (PSA) as Predicting Marker for Clinical Outcome and Evaluation of Early Toxicity Rate after High–Dose Rate Brachytherapy (HDR–BT) in Combination ...] ... p.7777
January 14, 2017

Cardiovascular Diseases and Conditions - Hypertension. Studies from Dicle University Yield New Data on Hypertension (The Relationship of Fluid Overload as Assessed by Bioelectrical Impedance Analysis with Pulmonary Arterial Hypertension in Hemodialysis Patients) … p.7778

Neurodegenerative Diseases and Conditions - Spinocerebellar Ataxias. Studies from Discipline of Pediatrics Describe New Findings in Spinocerebellar Ataxias (Motor cortical dysfunction develops in spinocerebellar ataxia type 3) … p.7779

Nutritional and Metabolic Diseases and Conditions - Fabry Disease. Studies from Division of Nephrology Have Provided New Information about Fabry Disease (Targeted Screening of Fabry Disease in Male Hemodialysis Patients in Brazil Highlights Importance of Family Screening) … p.7780

Cardiology. Studies from Dokkyo Medical University Add New Findings in the Area of Cardiology (Pathological autopsy of a patient that underwent a successful ablation of an electrical storm from the left ventricular summit) … p.7781

Reactive Oxygen Species. Studies from Dongguk University Further Understanding of Reactive Oxygen Species [NADPH oxidase (NOX) 1 mediates cigarette smoke–induced superoxide generation in rat vascular smooth muscle cells] … p.7782

Drugs and Therapies - Pharmacology. Studies from Dongguk University in the Area of Pharmacology Described [Differential modulation of TWIK–related K+ channel (TREK) and TWIK–related acid–sensitive K+ channel 2 (TASK2) activity by pyrazole compounds] … p.7783

Oncology - Prostate Cancer. Studies from Duke University Reveal New Findings on Prostate Cancer (Treatment–related neuroendocrine prostate cancer resulting in Cushing’s syndrome) … p.7784

Gram-Negative Bacteria - Escherichia coli. Studies from E. Kennedy and Co–Authors Have Provided New Information about Escherichia coli (Live Bacterial Physiology Visualized with 5 nm Resolution Using Scanning Transmission Electron Microscopy) … p.7785

Oncology - Lung Cancer. Studies from Emory University Have Provided New Data on Lung Cancer (Socioeconomic Factors Are Associated With Readmission After Lobectomy for Early Stage Lung Cancer) … p.7787

Inflammation. Studies from Engineering Institute Describe New Findings in Inflammation (Mesoporous silica as multiple nanoparticles systems for inflammation imaging as nano–radiopharmaceuticals) … p.7788

Pick’s Disease. Studies from Eunice Kennedy Shriver National Institute of Child Health and Human Development Provide New Data on Pick’s Disease (Necroptosis in Niemann–Pick disease, type C1: a potential therapeutic target) … p.7789

Digestive System Diseases and Conditions - Functional Dyspepsia. Studies from Ewha Woman's University School of Medicine Have Provided New Data on Functional Dyspepsia [Efficacy of DA–9701 (Motilitone) in Functional Dyspepsia Compared to Pantoprazole: A Multicenter, Randomized, Double–blind, Non–inferiority …]
Transplant Medicine - Kidney Transplants. Studies from F. Mallamaci and Colleagues Reveal New Findings on Kidney Transplants (Nocturnal Hypertension and Altered Night–Day BP Profile and Atherosclerosis in Renal Transplant Patients) … p.7791

Oncology - Non-Small Cell Lung Cancer. Studies from Faculty of Medicine Provide New Data on Non–Small Cell Lung Cancer (Tumor volume determines the feasibility of cell–free DNA sequencing for mutation detection in non–small cell lung cancer) … p.7792

Skin Diseases and Conditions - Alopecia. Studies from Faculty of Medicine Reveal New Findings on Alopecia (Treatment of permanent chemotherapy–induced alopecia with low dose oral minoxidil) … p.7793

Biotechnology - Cancer Gene Therapy. Studies from Faculty of Medicine Yield New Data on Cancer Gene Therapy (Natural products against cancer angiogenesis) … p.7794

Drugs and Therapies - Antimicrobials. Studies from Federal University Further Understanding of Antimicrobials (Antimicrobial and cytotoxicity evaluation of colloidal chitosan – silver nanoparticles – fluoride nanocomposites) … p.7795

Pharmacology. Studies from Federal University Further Understanding of Pharmacology (Design, synthesis and pharmacological evaluation of new anti–inflammatory compounds) … p.7796

Heart Disorders and Diseases - Tachycardia. Studies from Federal University Have Provided New Data on Tachycardia (Diagnostic Accuracy of Several Electrocardiographic Criteria for the Prediction of Atrioventricular Nodal Reentrant Tachycardia) … p.7797

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from Federal University Provide New Data on Obesity (Food insecurity, overweight and obesity among low–income African–American families in Baltimore City: associations with food–related perceptions) … p.7798

Bone Research. Studies from Federal University Reveal New Findings on Bone Research (Bone Marrow–Derived Cells as a Therapeutic Approach to Optic Nerve Diseases) … p.7799

Pharmacology. Studies from Federal University Update Current Data on Pharmacology (Phytochemistry Profile, Nutritional Properties and Pharmacological Activities of Mauritia flexuosa) … p.7800

Flavivirus. Studies from Federal University Yield New Data on Flavivirus (The flavivirus capsid protein: Structure, function and perspectives towards drug design) … p.7801

Endocrine System Diseases and Conditions - Prolactinoma. Studies from Federal University Yield New Data on Prolactinoma (Whole–exome identifies RXRG and TH germline variants in familial isolated prolactinoma) … p.7802

Biotechnology - Pharmacogenomics. Studies from Federal University in the Area of Pharmacogenomics Reported (NAT2 gene diversity and its evolutionary trajectory in the Americas) … p.7803

Hela Cells. Studies from First Hospital Yield New Data on Hela Cells (Construction and analysis of the regulatory network disturbed by the silenced Sp1 transcription factor in HeLa cells) … p.7804
Pharmacogenetics. Studies from Food and Drug Administration Have Provided New Data on Pharmacogenetics (Clinical and regulatory considerations in pharmacogenetic testing) ... p.7805

Immunization - Vaccines. Studies from Food and Drug Administration Have Provided New Data on Vaccines (Human antibody repertoire after VSV–Ebola vaccination identifies novel targets and virus–neutralizing IgM antibodies) ... p.7806

Drugs and Therapies - Immunotherapy. Studies from Food and Drug Administration in the Area of Immunotherapy Described (Role of Clinical Pharmacology in the Development and Approval of Immunotherapies Targeting Immune Checkpoints) ... p.7807

Acupuncture Therapy. Studies from Fourth Military Medical University Add New Findings in the Area of Acupuncture Therapy (Electroacupuncture enhances rehabilitation through miR–181b targeting PirB after ischemic stroke) ... p.7808

Nervous System Diseases and Conditions - Hyperalgesia. Studies from Fourth Military Medical University Yield New Data on Hyperalgesia (Effects of Ginkgo Biloba Extract EGb–761 on Neuropathic Pain in Mice: Involvement of Opioid System) ... p.7809

Drugs and Therapies - Cancer Therapy. Studies from French National Institute of Health and Medical Research (INSERM) Add New Findings in the Area of Cancer Therapy (Computational oncology—mathematical modelling of drug regimens for precision medicine) ... p.7810

Oncology - Pancreatic Cancer. Studies from Fudan University Shanghai Cancer Center Yield New Information about Pancreatic Cancer (The clinical utility of CA125/MUC16 in pancreatic cancer: A consensus of diagnostic, prognostic and predictive updates by the Chinese Study Group ...) ... p.7811

Genetics. Studies from Fudan University Yield New Information about Genetics (Gene expression profiling analysis of the role of miR–22 in clear cell ovarian cancer) ... p.7812

Oncology - Breast Cancer. Studies from Fujian Medical University Add New Findings in the Area of Breast Cancer (Upconversion luminescence assay for the detection of the vascular endothelial growth factor, a biomarker for breast cancer) ... p.7813

Clinical Research - Clinical Trials and Studies. Studies from G. Carrick–Ranson et al in the Area of Clinical Trials and Studies Described (The effect of 1 year of Alagebrium and moderate–intensity exercise training on left ventricular function during exercise in seniors: a randomized ...) ... p.7814

Gram-Positive Bacteria - Clostridium difficile. Studies from G. Merlo and Colleagues Reveal New Findings on Clostridium difficile (Economic evaluation of fecal microbiota transplantation for the treatment of recurrent Clostridium difficile infection in Australia) ... p.7815

Oncology - Urothelial Cancer. Studies from G. Sonpavde and Colleagues Provide New Data on Urothelial Cancer (Impact of Prior Platinum–Based Therapy on Patients Receiving Salvage Systemic Treatment for Advanced Urothelial Carcinoma) ... p.7816

Heart Disorders and Diseases - Heart Attack. Studies from G.A. Westphal and Co–Researchers Yield New Data on Heart Attack (The effect of brain death protocol duration on potential donor losses due to cardiac arrest) ... p.7817
January 14, 2017

Drugs and Therapies - Pharmaceutical Research. Studies from Gabriele d'Annunzio University in the Area of Pharmaceutical Research Reported [Immobilization and delivery of biologically active Lipoxin A(4) using electrospinning technology] … p.7819

Nutritional and Metabolic Diseases and Conditions - Hypertriglyceridemia. Studies from Gachon University Add New Findings in the Area of Hypertriglyceridemia (Hypertriglyceridemia and Cardiovascular Diseases: Revisited) … p.7820

Immune System Diseases and Conditions - Severe Combined Immunodeficiency. Studies from Gadjah Mada University Have Provided New Data on Severe Combined Immunodeficiency (Follicular growth after xenotransplantation of cryopreserved/thawed human ovarian tissue in SCID mice: dynamics and molecular aspects) … p.7821

Biological Factors - Inflammation Mediators. Studies from Genentech, Inc. Further Understanding of Inflammation Mediators (G–rich DNA–induced stress response blocks type–I–IFN but not CXCL10 secretion in monocytes) … p.7822

Parkinson's Disease. Studies from General Hospital Add New Findings in the Area of Parkinson's Disease (Oral Inosine Persistently Elevates Plasma antioxidant capacity in Parkinson's disease) … p.7823

www.NewsRx.com

Chemistry - Clinical Biochemistry. Studies from General Hospital Further Understanding of Clinical Biochemistry (The evidence for clinically significant bias in plasma glucose between liquid and lyophilized citrate buffer additive) … p.7824

Oncology - Breast Cancer. Studies from Georgetown University Further Understanding of Breast Cancer (Metabolomic profiling of breast tumors using ductal fluid) … p.7826

Oncology - Breast Cancer. Studies from Georgia College and State University Update Current Data on Breast Cancer (Effects of resistance exercise in women with or at risk for breast cancer–related lymphedema) … p.7827

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Studies from German Cancer Consortium Update Current Data on Myelodysplastic Syndromes [Mammalian–target of rapamycin inhibition with temsirolimus in myelodysplastic syndromes (MDS) patients is associated with considerable toxicity: results of …] … p.7828

Musculoskeletal Disorders. Studies from Ghent University Have Provided New Data on Musculoskeletal Disorders (Loss of Type I Collagen Telopeptide Lysyl Hydroxylation Causes Musculoskeletal Abnormalities in a Zebrafish Model of Bruck Syndrome) … p.7829
January 14, 2017

Oncology - Cancer Care. Studies from Ghent University in the Area of Cancer Care Described (Hope dies last ... A qualitative study into the meaning of hope for people with cancer in the palliative phase) ... p.7830

Membrane Proteins - Vesicular Transport Proteins. Studies from Gifu Pharmaceutical University in the Area of Vesicular Transport Proteins Described (Hypotonic Stress–induced Down–regulation of Claudin–1 and–2 Mediated by Dephosphorylation and Clathrin–dependent Endocytosis in Renal Tubular ...) ... p.7831

Gram-Negative Bacteria - Neisseria gonorrhoeae. Studies from Gifu University Hospital Have Provided New Information about Neisseria gonorrhoeae (Remarkable increase of Neisseria gonorrhoeae with decreased susceptibility of azithromycin and increase in the failure of azithromycin therapy in ...) ... p.7832

Drugs and Therapies - Antiretrovirals. Studies from Gilead Sciences Inc. Reveal New Findings on Antiretrovirals (Pharmacokinetics and Safety of Tenofovir Alafenamide in HIV–Uninfected Subjects with Severe Renal Impairment) ... p.7833

Oncology - Glioblastomas. Studies from Government Medical College and Hospital Yield New Information about Glioblastomas (Concurrent therapy to enhance radiotherapeutic outcomes in glioblastoma) ... p.7834

Stem Cell Research - Hematopoietic Stem Cells. Studies from Graduate School of Biomedical Sciences Describe New Findings in Hematopoietic Stem Cells (Hematopoietic Stem Cells Count and Remember Self–Renewal Divisions) ... p.7835

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from Graduate School of Decision Science and Technology Further Understanding of Obesity (Effect of postprandial gum chewing on diet–induced thermogenesis) ... p.7836

Biphenyl Compounds. Studies from Guangdong Pharmaceutical University Reveal New Findings on Biphenyl Compounds (Simultaneous Determination of Hydrochlorothiazide and Losartan Potassium in Osmotic Pump Tablets by Microemulsion Liquid Chromatography) ... p.7837

Bone Research. Studies from Guangzhou Medical University Yield New Information about Bone Research (FANCD2 protects against bone marrow injury from ferroptosis) ... p.7838

Glycoconjugates. Studies from Guangzhou Medical University in the Area of Glycoconjugates Reported (Pregnane X receptors regulate CYP2C8 and P–glycoprotein to impact on the resistance of NSCLC cells to Taxol) ... p.7839

Environmental Polution. Studies from Guangzhou University in the Area of Environmental Polution Described (Risk assessment and vertical distribution of thallium in paddy soils and uptake in rice plants irrigated with acid mine drainage) ... p.7840

Thyroid Nodule. Studies from H. Gharib et al Add New Findings in the Area of Thyroid Nodule (American Association Of Clinical Endocrinologists, American College Of Endocrinology, And Associazione Medici Endocrinologi Medical Guidelines For Clinical Practice ...) ... p.7841

Oncology - Endometrial Cancer. Studies from Hacettepe University Have Provided New Data on Endometrial Cancer (Assessment of Cervicovaginal Cancer Antigen 125 Levels: A Preliminary Study for Endometrial Cancer Screening) ... p.7842
January 14, 2017

Cardiology. Studies from Hartford Hospital in the Area of Cardiology Reported (Myocardial Fibrosis in Athletes) … p.7843

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from Harvard School of Medicine Add New Findings in the Area of Atherosclerosis (Atherosclerotic plaque behind the stent changes after bare–metal and drug–eluting stent implantation in humans: Implications for late stent failure?) … p.7844

Genetics - Medical Genetics. Studies from Harvard School of Medicine Describe New Findings in Medical Genetics (Navigating highly homologous genes in a molecular diagnostic setting: a resource for clinical next–generation sequencing) … p.7846

Oncology. Studies from Harvard School of Medicine Describe New Findings in Oncology (Precision medicine for cancer with next–generation functional diagnostics) … p.7847

Cell Differentiation. Studies from Harvard School of Medicine Have Provided New Data on Cell Differentiation [Dedicator of cytokinesis 8 regulates signal transducer and activator of transcription 3 activation and promotes T(H)17 cell differentiation] … p.7848

Endocytosis. Studies from Harvard School of Medicine Reveal New Findings on Endocytosis (ILK and cytoskeletal architecture: an important determinant of AQP2 recycling and subsequent entry into the exocytotic pathway) … p.7849

Heart Disorders and Diseases - Heart Failure. Studies from Harvard School of Medicine Reveal New Findings on Heart Failure (Novel Heart Failure Biomarkers Predict Improvement of Mitral Regurgitation in Patients Receiving Cardiac Resynchronization Therapy–The BIOCRT Study) … p.7850

Oncology - Molecular Cancer and Carcinogenesis. Studies from Harvard School of Medicine Reveal New Findings on Molecular Cancer and Carcinogenesis (MUC1–C Represses the Crumbs Complex Polarity Factor CRB3 and Downregulates the Hippo Pathway) … p.7851

Drugs and Therapies - Ophthalmic Glaucoma Agents. Studies from Harvard School of Medicine Yield New Data on Ophthalmic Glaucoma Agents (Latanoprost–Eluting Contact Lenses in Glaucomatous Monkeys) … p.7852

Drugs and Therapies - Toxicology and Applied Pharmacology. Studies from Harvard School of Medicine Yield New Data on Toxicology and Applied Pharmacology (Application of small RNA sequencing to identify microRNAs in acute kidney injury and fibrosis) … p.7853

Gastroenterology - Hernias. Studies from Harvard School of Medicine in the Area of Hernias Described [De Novo Frameshift Mutation in COUP–TFII (NR2F2) in Human Congenital Diaphragmatic Hernia] … p.7854

Physical Fitness. Studies from Harvard University Describe New Findings in Physical Fitness (Physical Fitness Differences Between Rural and Urban Children from Western Kenya) … p.7855

Cardiovascular Diseases and Conditions - Aneurysm. Studies from Heart Center Have Provided New Information about Aneurysm (Giant left atrial appendage aneurysm compressing the left anterior descending coronary artery) … p.7856

www.NewsRx.com
Oncology - Gliomas. Studies from Hebei Medical University Have Provided New Data on Gliomas (Slit2 and Robo1 expression as biomarkers for assessing prognosis in brain glioma patients) … p.7857

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Studies from Heilongjiang University Yield New Information about Rheumatoid Arthritis (Quercetin promotes the apoptosis of fibroblast–like synoviocytes in rheumatoid arthritis by upregulating IncRNA MALAT1) … p.7858

Erythroid Cells. Studies from Heinrich–Heine–University Update Current Data on Erythroid Cells (Triggering of Erythrocyte Cell Membrane Scrambling by Emodin) … p.7859

Proteomics. Studies from Heinrich–Heine–University Update Current Data on Proteomics (Highly efficient transduction of primary adult CNS and PNS neurons) … p.7860

Erythroid Cells. Studies from Heinrich–Heine–University Yield New Information about Erythroid Cells (Stimulation of Suicidal Erythrocyte Death by Phosphatase Inhibitor Calyculin A) … p.7861

Hormones. Studies from Herlev University Hospital Provide New Data on Hormones (The analgesic effects of exogenous melatonin in humans) … p.7862

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from Hiroshima University Hospital Reveal New Findings on Atherosclerosis (Vascular Function and Intima–media Thickness of a Leg Artery in Peripheral Artery Disease: A Comparison of Buerger Disease and Atherosclerotic Peripheral Artery …) … p.7863

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from Hokkaido University Reveal New Findings on Obesity (Squalene modulates fatty acid metabolism: Enhanced EPA/DHA in obese/diabetic mice (KK–A(y)) model) … p.7864

Drugs and Therapies - Coumarins and Indandiones. Studies from Hokkaido University in the Area of Coumarins and Indandiones Described (Novel revelation of warfarin resistant mechanism in roof rats (Rattus rattus) using pharmacokinetic/pharmacodynamic analysis) … p.7865

Drugs and Therapies - Menthol Therapy. Studies from Hoshi University in the Area of Menthol Therapy Reported (Effect of Nerolidol and/or Levulinic Acid on the Thermotropic Behavior of Lipid Lamellar Structures in the Stratum Corneum) … p.7866

Aortic Stenosis. Studies from Hospital Center Describe New Findings in Aortic Stenosis (Comparison in Men Versus Women of Co–morbidities, Complications, and Outcomes After Transcatheter Aortic Valve Implantation for Severe Aortic Stenosis) … p.7867

Hearing Diseases and Conditions - Deafness. Studies from Hospital Center Have Provided New Data on Deafness (An Application of NGS for Molecular Investigations in Perrault Syndrome: Study of 14 Families and Review of the Literature) … p.7868

Oncology - Liver Cancer. Studies from Huazhong University of Science and Technology Have Provided New Data on Liver Cancer (A polyethylenimine–modified carboxyl–poly(styrene/acrylamide) copolymer nanosphere for co–delivering of CpG and TGF–beta receptor I inhibitor with …] … p.7869
Drugs and Therapies - Chemotherapy. Studies from Huazhong University of Science and Technology Provide New Data on Chemotherapy (Young Cervical Cancer Patients May Be More Responsive than Older Patients to Neoadjuvant Chemotherapy Followed by Radical Surgery) … p.7870

Central Nervous System - Brain Research. Studies from I. Muramatsu et al Provide New Data on Brain Research (Pharmacological evidence of specific acetylcholine transport in rat cerebral cortex and other brain regions) … p.7876

Liver Diseases and Conditions - Hepatitis C Virus. Studies from IKEM Have Provided New Information about Hepatitis C Virus (Efficacy and safety of elbasvir/grazoprevir and sofosbuvir/pegylated interferon/ribavirin: A phase III randomized controlled trial) … p.7878

Drugs and Therapies - Antiinflammatory Agents. Studies from ISCIII Update Current Data on Antiinflammatory Agents (Friedelane–type triterpenoids as selective anti–inflammatory agents by regulation of differential signaling pathways in LPS–stimulated macrophages) … p.7879

Aortic Dissection. Studies from Icahn School of Medicine Provide New Data on Aortic Dissection (Bowel in the pericardium: Spontaneous herniation mimicking acute aortic dissection) … p.7880

Mathematics - Mathematics in Medicine and Biology. Studies from Idaho State University Yield New Information about Mathematics in Medicine and Biology (Uncovering the natural history of cancer from post–mortem cross–sectional diameters of hepatic metastases) … p.7881
RNA Research. Studies from Imperial College Update Current Data on RNA Research (Biological marks of early-life socioeconomic experience is detected in the adult inflammatory transcriptome) ... p.7882

Bone Research. Studies from Imperial College Yield New Data on Bone Research (The anabolic action of intermittent parathyroid hormone on cortical bone depends partly on its ability to induce nitric oxide–mediated vasorelaxation in BALB/c mice) ... p.7883

Heart Disorders and Diseases - Heart Disease. Studies from Imperial College Yield New Information about Heart Disease (Randomised comparison of a bioresorbable everolimus–eluting scaffold with a metallic everolimus–eluting stent for ischaemic heart disease caused by de novo native coronary ...) ... p.7884

Enzymes and Coenzymes - Carboxy-Lyases. Studies from Indian Institute of Technology Provide New Data on Carboxy–Lyses [Novel Inhibitors of Ornithine Decarboxylase of Leishmania Parasite (LdODC): The Parasite Resists LdODC Inhibition by Overexpression of Spermidine Synthase] ... p.7885

Gram-Negative Bacteria - Campylobacter jejuni. Studies from Indian Institute of Technology Reveal New Findings on Campylobacter jejuni (Monomerization alters the dynamics of the lid region in Campylobacter jejuni CstII: an MD simulation study) ... p.7886

Hemorheology. Studies from Indian Institute of Technology in the Area of Hemorheology Reported (Pulsatile flow in a compliant stenosed asymmetric model) ... p.7887

Heart Disorders and Diseases - Atrial Fibrillation. Studies from Indiana University School of Medicine Further Understanding of Atrial Fibrillation (Ganglionated plexi and ligament of Marshall ablation reduces atrial vulnerability and causes stellate ganglion remodeling in ambulatory dogs) ... p.7888

Drugs and Therapies - Cancer Therapy. Studies from Institute for Biology Research Update Current Data on Cancer Therapy (Noncovalent Binding to DNA: Still a Target in Developing Anticancer Agents) ... p.7889

Oncology - Squamous Cell Carcinoma. Studies from Institute for Cancer Research and Treatment (IRCCS) Update Current Data on Squamous Cell Carcinoma (Prognostic Factors of Adjuvant Taxane, Cisplatin, and 5–Fluorouracil Chemotherapy for Patients With Penile Squamous Cell Carcinoma ...) ... p.7890

Cachexia. Studies from Institute for Cancer Research and Treatment (IRCCS) in the Area of Cachexia Described (Activation of the SDF1/CXCR4 pathway retards muscle atrophy during cancer cachexia) ... p.7892

Nephropathy. Studies from Institute for Health Sciences Further Understanding of Nephropathy (Synthetic ACTH in High Risk Patients with Idiopathic Membranous Nephropathy: A Prospective, Open Label Cohort Study) ... p.7893

Enzymes and Coenzymes - Cholinesterases. Studies from Institute for Medical Research and Occupational Health Add New Findings in the Area of Cholinesterases (HI–6 assisted catalytic scavenging of VX by acetylcholinesterase choline binding site mutants) ... p.7894
Health and Medicine - Palliative and Supportive Care. Studies from Institute of Child Health Provide New Data on Palliative and Supportive Care (Current understanding of decision–making in adolescents with cancer: A narrative systematic review) … p.7895

Surgery - Surgical Research. Studies from Institute of Physical Chemistry Describe New Findings in Surgical Research (No Effect of Rapamycin on Cardiac Adhesion Formation: A Drug–Loaded Biodegradable Poly lactone Patch in a Porcine Cardiac Surgical Model) … p.7896

Drugs and Therapies - Combination Therapy. Studies from Institute of Physics Further Understanding of Combination Therapy (Combination therapies with daclatasvir and asunaprevir on NS3–D168 mutated HCV in human hepatocyte chimeric mice) … p.7897

Oncology - Gastric Lymphoma. Studies from Institute of Radiology Further Understanding of Gastric Lymphoma (Prognostic value of SUVmax measured by pretreatment F–18–FDG PET/CT in patients with primary gastric lymphoma) … p.7898

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies from Institute of Rural Health Have Provided New Data on Alzheimer Disease (Homocysteine, antioxidant vitamins and lipids as biomarkers of neurodegeneration in Alzheimer’s disease versus non–Alzheimer’s dementia) … p.7899

Life Science Research - Neoplasma. Studies from Institute of Virology Describe New Findings in Neoplasma (Enhanced metabolism as a common feature of cancer plasticity) … p.7900

Respiratory Tract Diseases and Conditions - Whooping Cough. Studies from Instituto de Salud Carlos III Yield New Information about Whooping Cough (Effectiveness of acellular pertussis vaccination during childhood (< 7 years of age) for preventing pertussis in household contacts 1–9 years old in Catalonia …) … p.7901

Oncology - Lymphoma. Studies from International Agency for Research on Cancer Update Current Data on Lymphoma (Hodgkin lymphoma burden in Central and South America) … p.7902

Liver Diseases and Conditions - Hepatitis. Studies from Istanbul Medipol University Have Provided New Data on Hepatitis (Acute temozolomide induced liver injury: mixed type hepatocellular and cholestatic toxicity) … p.7903

Angiology. Studies from J. Castellanos et al in the Area of Angiology Described (Simultaneous right ventricular to pulmonary artery pressure gradient measurement using a single venous access technique) … p.7904

Heart Disorders and Diseases - Systolic Heart Failure. Studies from J. Kohlmeier and Colleagues Yield New Information about Systolic Heart Failure (Early improvement of symptoms using LCZ696 in a patient with systolic heart failure and a reduced ejection fraction: a case report) … p.7905

Oncology. Studies from J. Masliah–Planchn et al Further Understanding of Oncology (RAS–MAPK pathway epigenetic activation in cancer: miRNAs in action) … p.7906
Immune System Diseases and Conditions
- HIV/AIDS. Studies from J. Otis et al Provide New Data on HIV/AIDS (Beyond Condoms: Risk Reduction Strategies Among Gay, Bisexual, and Other Men Who Have Sex With Men Receiving Rapid HIV Testing in Montreal, Canada) ... p.7907

Oncology - Lung Cancer. Studies from J.C.H. Yang et al Provide New Data on Lung Cancer (Effect of dose adjustment on the safety and efficacy of afatinib for EGFR mutation–positive lung adenocarcinoma: post hoc analyses of the randomized LUX–Lung 3 and 6 trials) ... p.7908

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from J.N. Keith and Colleagues Provide New Data on Obesity (Pharmacotherapy in Treatment of Obesity) ... p.7909

Aldehydes. Studies from Jagiellonian University Reveal New Findings on Aldehydes (Influence of different fixation protocols on the preservation and dimensions of cardiac tissue) ... p.7910

Cardiology. Studies from Johns Hopkins University Add New Findings in the Area of Cardiology (A Bidirectional Neural Interface IC With Chopper Stabilized BioADC Array and Charge Balanced Stimulator) ... p.7911

Nervous System Diseases and Conditions - Headache and Migraine. Studies from Johns Hopkins University School of Medicine Further Understanding of Headache and Migraine [A Randomized Trial of Ketorolac vs. Sumatripan vs. Placebo Nasal Spray (KSPN) for Acute Migraine] ... p.7912

Drugs and Therapies - Combination Therapy. Studies from Johns Hopkins University in the Area of Combination Therapy Reported (Combination therapy in skin of color including injectables, laser, and light devices) ... p.7913

www.NewsRx.com

Cosmetics. Studies from Juntendo University Reveal New Findings on Cosmetics (Risk assessment of skin lightening cosmetics containing hydroquinone) ... p.7914

Mosquito-Borne Diseases - Zika Virus. Studies from K. Chan and Co–Researchers Update Current Data on Zika Virus (Rapid, Affordable and Portable Medium–Throughput Molecular Device for Zika Virus) ... p.7915

Alkanes. Studies from K. Gottlieb and Co–Researchers in the Area of Alkanes Reported (Review article: inhibition of methanogenic archaea by statins as a targeted management strategy for constipation and related disorders) ... p.7916

Cardiology. Studies from K. Karl and Colleagues Provide New Data on Cardiology (Intrathymic and other anomalous courses of the left brachiocephalic vein in the fetus) ... p.7917

Disease Attributes - Disease Progression. Studies from K. Kato et al in the Area of Disease Progression Described (Transient appearance of circulating tumor DNA associated with de novo treatment) ... p.7918

Immunology - Mononuclear Phagocyte System. Studies from Kakatiya University in the Area of Mononuclear Phagocyte System Reported (Intracellular zinc status influences cisplatin–induced endothelial permeability through modulation of PKC alpha, NF–kappa B and ICAM–1 expression) ... p.7919

Oncology - Colon Cancer. Studies from Kaohsiung Medical University Yield New Data on Colon Cancer (Patients with Metastatic Colorectal Cancer and Hyperbilirubinemia Treated with FOLFIRI plus Bevacizumab as First–Line Treatment) ... p.7920
January 14, 2017

Apoptosis. Studies from Keimyung University Have Provided New Information about Apoptosis (The multi–target drug BAI induces apoptosis in various human cancer cells through modulation of Bcl–xL protein) … p.7921

Drugs and Therapies - Alkylating Agents. Studies from Kermanshah University of Medical Sciences Yield New Data on Alkylating Agents (The simulation of UV spectroscopy and electronic analysis of temozolomide and dacarbazine chemical decomposition to their metabolites) … p.7921

Oncology - Breast Cancer. Studies from King Abdul–Aziz University Hospital Have Provided New Information about Breast Cancer (Lung dose analysis in loco–regional hypofractionated radiotherapy of breast cancer) … p.7923

Heart Disorders and Diseases - Brugada Syndrome. Studies from King Saud University Yield New Data on Brugada Syndrome (Near miss in a patient with undiagnosed Brugada syndrome: a case report and literature review) … p.7924

Immune System Diseases and Conditions - HIV/AIDS. Studies from King’s College Reveal New Findings on HIV/AIDS (Resistance of Transmitted Founder HIV–1 to IFITM–Mediated Restriction) … p.7924

Aging Research - Geriatrics and Gerontology. Studies from King’s College Yield New Information about Geriatrics and Gerontology (Kicking Back Cognitive Ageing: Leg Power Predicts Cognitive Ageing after Ten Years in Older Female Twins) … p.7925

Peptide Proteins - Proinsulin. Studies from Kobe Gakuin University in the Area of Proinsulin Described (Visualization and Quantitative Assessment of the Brain Distribution of Insulin through Nose–to–Brain Delivery Based on the Cell–Penetrating Peptide Noncovalent Strategy) … p.7926

www.NewsRx.com

Oncology - Liver Cancer. Studies from Kobe University Provide New Data on Liver Cancer (Efficacy of stereotactic body radiotherapy for hepatocellular carcinoma with portal vein tumor thrombosis/inferior vena cava tumor thrombosis: evaluation by comparison with ...) … p.7928

Proteins - DNA-Binding Proteins. Studies from Korea Research Institute of Chemical Technology Yield New Data on DNA–Binding Proteins (IinQ attenuates systemic inflammatory responses via selectively impairing the Myddosome complex formation upon TLR4 ligation) … p.7929

Transfusion Medicine. Studies from Korea University in the Area of Transfusion Medicine Reported (A simple method for activating the platelets used in microfluidic platelet aggregation tests: Stirring–induced platelet activation) … p.7930

Cardiology. Studies from Kumamoto University Further Understanding of Cardiology (Cardiac helical CT involving a low–radiation–dose protocol with a 100–kVp setting Usefulness of hybrid iterative reconstruction and display preset optimization) … p.7931

Gastroenterology - Splenic Artery. Studies from Kumamoto University Further Understanding of Splenic Artery (Salvage Splenic Artery Embolization for Saving Falling Living Donor Graft due to Portal Overflow: A Case Report) … p.7932

Oncology - Breast Cancer. Studies from Kyoto Sangyo University Yield New Information about Breast Cancer (Hyaluronan Production Regulates Metabolic and Cancer Stem–like Properties of Breast Cancer Cells via Hexosamine Biosynthetic Pathway–coupled HIF–1 Signaling) … p.7933
January 14, 2017

Oncology - Colon Cancer. Studies from Kyoto University Update Current Data on Colon Cancer (Metabolic Alterations Caused by KRAS Mutations in Colorectal Cancer Contribute to Cell Adaptation to Glutamine Depletion by Upregulation of Asparagine Synthetase) … p.7934

Therapeutics. Studies from Kyoto University in the Area of Therapeutics Reported (Enhanced engraftment, proliferation, and therapeutic potential in heart using optimized human iPSC–derived cardiomyocytes) … p.7935

Oncology - Lung Cancer. Studies from Kyushu University Add New Findings in the Area of Lung Cancer (Clinical Significance of PD–L1 Protein Expression in Surgically Resected Primary Lung Adenocarcinoma) … p.7937

Cardiovascular Diseases and Conditions - Thrombosis and Hemostasis. Studies from Kyushu University Yield New Data on Thrombosis and Hemostasis (Antiplatelet and Anticoagulant Activities of Angelica shikokiana Extract and Its Isolated Compounds) … p.7938

Life Science Research - Physiology. Studies from L. Fabre and Colleagues Provide New Data on Physiology (Structure of anthrax lethal toxin prepore complex suggests a pathway for efficient cell entry) … p.7939

Oncology - Gliomas. Studies from L. Lin and Co–Researchers Update Current Data on Gliomas (Analysis of expression and prognostic significance of vimentin and the response to temozolomide in glioma patients) … p.7940

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from L.M. Lopez and Co–Researchers Update Current Data on Obesity (Hormonal contraceptives for contraception in overweight or obese women) … p.7942

Goiter. Studies from L.M. Tang et al Have Provided New Data on Goiter (Recombinant human thyrotropin stimulated I–131 treatment for multinodular goiter) … p.7944

Stem Cell Research - Hematopoietic Stem Cells. Studies from LDS Hospital Yield New Data on Hematopoietic Stem Cells (Room contamination, patient colonization pressure, and the risk of vancomycin–resistant Enterococcus colonization on a unit dedicated to the treatment of hematologic ...) … p.7945

Von Willebrand Disease. Studies from Leiden University Medical Center Further Understanding of Von Willebrand Disease (Developments in the diagnostic procedures for von Willebrand disease) … p.7947

Autonomic Nervous System Diseases - Orthostatic Hypotension. Studies from Leiden University Medical Center Provide New Data on Orthostatic Hypotension (Effect of discontinuation of antihypertensive medication on orthostatic hypotension in older persons with mild cognitive impairment: the DANTE Study ...) … p.7948
RNA Viruses - Influenza A Virus. Studies from Leiden University in the Area of Influenza A Virus Described (Subtype–specific structural constraints in the evolution of influenza A virus hemagglutinin genes) … p.7949

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Lomonosov Moscow State University in the Area of Type 2 Diabetes Reported (The transcription factor Prep1 controls hepatic insulin sensitivity and gluconeogenesis by targeting nuclear localization of FOXO1) … p.7950

Peptide Proteins - Proinsulin. Studies from Loughborough University Provide New Data on Proinsulin (Effect of 24–h severe energy restriction on appetite regulation and ad libitum energy intake in lean men and women) … p.7951

Drugs and Therapies - Drug Targets. Studies from Louisiana State University Provide New Data on Drug Targets (Structure–Based Drug Discovery Accelerated by Many–Core Devices) … p.7952

Small Interference RNAs (siRNAs). Studies from Ludwig–Maximilians–University Have Provided New Information about Small Interference RNAs (siRNAs) (Homology directed repair is unaffected by the absence of siRNAs in Drosophila melanogaster) … p.7953

Apoptosis. Studies from Ludwig–Maximilians–University Yield New Information about Apoptosis (Sebaceous lipids are essential for water repulsion, protection against UVB–induced apoptosis and ocular integrity in mice) … p.7954

Cardiology. Studies from Lund University Yield New Information about Cardiology (Diagnostic Accuracy of High–Sensitivity Cardiac Troponin T at Presentation Combined With History and ECG for Ruling Out Major Adverse Cardiac Events) … p.7955

Oncology - Gastric Cancer. Studies from M. Ammendola and Colleagues Provide New Data on Gastric Cancer (Mast Cells Density Positive to Tryptase Correlate with Microvascular Density in both Primary Gastric Cancer Tissue and Loco–Regional Lymph Node Metastases from ...) … p.7956

Hematology - Plasma. Studies from M. De Meulder et al Add New Findings in the Area of Plasma (Development and validation of HILIC–ESI/MS/MS methods for simultaneous quantitation of several antipsychotics in human plasma and blood) … p.7957

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies from M. Gallucci et al Provide New Data on Alzheimer Disease (Predictors of Response to Cholinesterase Inhibitors Treatment of Alzheimer's Disease: Date Mining from the TREDEM Registry) … p.7958

Biotechnology - Antisense Oligonucleotides. Studies from M. Lim et al Further Understanding of Antisense Oligonucleotides (Osmolality of antisense oligonucleotide parenteral formulations: Implications on counterion dissociation and recommended osmometry techniques) … p.7959

Oncology - Lung Cancer. Studies from M. Phillips and Co–Authors Have Provided New Information about Lung Cancer (Blinded Validation of Breath Biomarkers of Lung Cancer, a Potential Ancillary to Chest CT Screening) … p.7961
Drugs and Therapies - Antiretrovirals.
Studies from M. Ramgopal et al Add New Findings in the Area of Antiretrovirals (Pharmacokinetics of Total and Unbound Etravirine in HIV–1–Infected Pregnant Women) … p.7962

Cardiology. Studies from M. Sevinc and Co–Authors Have Provided New Information about Cardiology (Ex Vivo Perfusion Characteristics of Donation After Cardiac Death Kidneys Predict Long–Term Graft Survival) … p.7963

Gram–Negative Bacteria - Yersinia enterocolitica. Studies from M.N. Dave et al Further Understanding of Yersinia enterocolitica (Yersinia enterocolitica YopH–Deficient Strain Activates Neutrophil Recruitment to Peyer's Patches and Promotes Clearance of the Virulent Strain) … p.7966

Central Nervous System Diseases and Conditions - Epilepsy. Studies from Maastricht University in the Area of Epilepsy Reported (Glutamate concentrations vary with antiepileptic drug use and mental slowing) … p.7967

Clinical Research - Clinical Trials and Studies. Studies from Mashhad University of Medical Sciences Have Provided New Information about Clinical Trials and Studies (Carvedilol Administration Can Prevent Doxorubicin–Induced Cardiotoxicity: A Double–Blind Randomized Trial) … p.7969

Musculoskeletal Diseases and Conditions - Aneurysmal Bone Cysts. Studies from Massachusetts General Hospital Add New Findings in the Area of Aneurysmal Bone Cysts (Treatment of aneurysmal bone cysts by percutaneous CT–guided injection of calcitonin and steroid) … p.7970

Hormones - Gastrointestinal Hormones. Studies from Massachusetts General Hospital Add New Findings in the Area of Gastrointestinal Hormones (Tumor cells can follow distinct evolutionary paths to become resistant to epidermal growth factor receptor inhibition) … p.7971

Salicylic Acids. Studies from Massachusetts General Hospital in the Area of Salicylic Acids Described (Aspirin Use in Women: Current Perspectives and Future Directions) … p.7973

Drugs and Therapies - Clinical Pharmacology and Therapeutics. Studies from Massachusetts Institute of Technology Add New Findings in the Area of Clinical Pharmacology and Therapeutics (Adaptive Biomedical Innovation: Evolving Our Global System to Sustainably and Safely Bring New Medicines to Patients in …) … p.7974
Fungal Diseases and Conditions - Coccidioidomycosis. Studies from Mayo Clinic Add New Findings in the Area of Coccidioidomycosis (Coccidioidomycosis in Patients with Selected Solid Organ Cancers: A Case Series and Review of Medical Literature) ... p.7975

Heart Disorders and Diseases - Atrial Fibrillation. Studies from Mayo Clinic Further Understanding of Atrial Fibrillation (Incidence and impact of postoperative atrial fibrillation after minimally invasive esophagectomy) ... p.7976

Oncology - Prostate Cancer. Studies from Mayo Clinic Provide New Data on Prostate Cancer (Contemporary Mapping of Post–Prostatectomy Prostate Cancer Relapse with C–11–Choline Positron Emission Tomography and Multiparametric Magnetic Resonance Imaging) ... p.7977

Heart Disorders and Diseases - Heart Attack. Studies from Mayo Clinic Yield New Data on Heart Attack (Cancer History Portends Worse Acute and Long–term Noncardiac (but Not Cardiac) Mortality After Primary Percutaneous Coronary Intervention for Acute ST–Segment Elevation Myocardial ...) ... p.7978

Oncology. Studies from Mayo Clinic Yield New Information about Oncology (HSulf–1 deficiency dictates a metabolic reprograming of glycolysis and TCA cycle in ovarian cancer) ... p.7979

Nutritional and Metabolic Diseases and Conditions - Celiac Disease. Studies from Mayo Clinic in the Area of Celiac Disease Described (Contemporary celiac disease diagnosis: is a biopsy avoidable?) ... p.7980

Pregnancy Complications - Preeclampsia. Studies from Mayo Clinic in the Area of Preeclampsia Reported (Pregnancy history and blood–borne microvesicles in middle aged women with and without coronary artery calcification) ... p.7981

Hematology - Plasma. Studies from McGill University Provide New Data on Plasma (The Effect of Dissolved Oxygen on the Relaxation Rates of Blood Plasma: Implications for Hyperoxia Calibrated BOLD) ... p.7982

Vaccination. Studies from Medical College of Wisconsin in the Area of Vaccination Reported (Epidermal Growth Factor Receptor Derived Peptide Vaccination to Prevent Lung Adenocarcinoma Formation: An In Vivo Study in a Murine Model of EGFR Mutant Lung Cancer) ... p.7983

Central Nervous System Diseases and Conditions - Epilepsy. Studies from Medical Research Council Further Understanding of Epilepsy (Structural brain abnormalities in a single gene disorder associated with epilepsy, language impairment and intellectual disability) ... p.7984

Immunology - Mononuclear Phagocyte System. Studies from Medical Research Institute Describe New Findings in Mononuclear Phagocyte System (Hepcidin independent iron recycling in a mouse model of –thalassaemia intermedia) ... p.7985

Health and Medicine - Oral Health. Studies from Medical University Have Provided New Data on Oral Health (Accuracy of commercial kits and published primer pairs for the detection of periodontopathogens) ... p.7986

Heart Disorders and Diseases - Atrial Fibrillation. Studies from Medical University Have Provided New Information about Atrial Fibrillation (Matrix Metalloproteinase Neutrophil Gelatinase–Associated Lipocalin Complex Predicts Atrial Fibrillation Recurrence after Electrical
Cardioversion in Obese ...) … p.7987

Life Science Research - Developmental Biology. Studies from Medical University Have Provided New Information about Developmental Biology (Restricting calcium currents is required for correct fiber type specification in skeletal muscle) … p.7988

Central Nervous System Diseases and Conditions - Encephalomyelitis. Studies from Medical University in the Area of Encephalomyelitis Reported (Transplantation of Neural Stem Cells Cotreated with Thyroid Hormone and GDNF Gene Induces Neuroprotection in Rats of Chronic Experimental Allergic Encephalomyelitis) … p.7989

Liver Diseases and Conditions - Viral Hepatitis. Studies from Medical University in the Area of Viral Hepatitis Described (Micro RNAs mir–106a, mir–122 and mir–197 are increased in severe acute viral hepatitis with coagulopathy) … p.7991

Oncology - Waldenstrom Macroglobulinemia. Studies from Memorial Sloan–Kettering Cancer Center Describe New Findings in Waldenstrom Macroglobulinemia (Clonal B cells in Waldenstr?m’s macroglobulinemia exhibit functional features of chronic active B–cell receptor signaling) … p.7993

Oncology - Non-Small Cell Lung Cancer. Studies from Memorial Sloan–Kettering Cancer Center in the Area of Non–Small Cell Lung Cancer Reported (Detection of Recurrence Patterns After Wedge Resection for Early Stage Lung Cancer: Rationale for Radiologic Follow–Up) … p.7994

Oncology - Carcinomas. Studies from Molecular Pharmacology Unit Describe New Findings in Carcinomas (PKC–alpha modulation by miR–483–3p in platinum–resistant ovarian carcinoma cells) … p.7995

Glutamic Acid. Studies from Monash University Add New Findings in the Area of Glutamic Acid (Positive Allosteric Modulation of the Muscarinic M–1 Receptor Improves Efficacy of Antipsychotics in Mouse Glutamatergic Deficit Models of Behavior) … p.7996

Sexually Transmitted Diseases and Conditions (STDs) - Gonorrhea. Studies from Monash University Provide New Data on Gonorrhea (Trends in gonorrhoea positivity by nucleic acid amplification test versus culture among Australian heterosexual men with a low prevalence of gonorrhea, 2007–2014) … p.7997

Cardiology. Studies from Montreal Heart Institute Update Current Data on Cardiology (Characteristics of premature ventricular contractions in healthy children and their impact on left ventricular function) … p.7998

Proteins - Nucleoproteins. Studies from Nagasaki University Provide New Data on Nucleoproteins (Histone H2A T120 Phosphorylation Promotes Oncogenic Transformation via Upregulation of Cyclin D1) … p.7999

Drugs and Therapies - Antimicrobial Agents and Chemotherapy. Studies from Nanjing Agricultural University Have Provided New Information about Antimicrobial Agents and Chemotherapy (Molecular Characterization of Escherichia coli Strains Isolated from Retail Meat That Harbor blaCTX–M and fosA3 Genes) … p.8000
January 14, 2017

Oncology - Gastric Cancer. Studies from Nanjing Medical University Provide New Data on Gastric Cancer (Increased expression of long noncoding RNA TUG1 predicts a poor prognosis of gastric cancer and regulates cell proliferation by epigenetically silencing of p57) ... p.8001

Connective Tissue Cells. Studies from Nanjing Medical University Yield New Data on Connective Tissue Cells (The Long Non–Coding RNA LncRNA8975–1 is Upregulated in Hypertrophic Scar Fibroblasts and Controls Collagen Expression) ... p.8002

Oncology - Squamous Cell Carcinoma. Studies from Nanjing Medical University Yield New Information about Squamous Cell Carcinoma (Long noncoding RNA, tissue differentiation–inducing nonprotein coding RNA is upregulated and promotes development of esophageal squamous cell carcinoma) ... p.8003

Adenomas. Studies from Nanjing University Reveal New Findings on Adenomas (Esophageal submucosal gland duct adenoma: a clinicopathological and immunohistochemical study with a review of the literature) ... p.8004

Lung Diseases and Conditions - Pneumonia. Studies from Nankai University Reveal New Findings on Pneumonia (Identification of a small molecule that simultaneously suppresses virulence and antibiotic resistance of Pseudomonas aeruginosa) ... p.8005

Oncology - Neuroblastomas. Studies from Nantong University Have Provided New Information about Neuroblastomas (An ITO electrode modified with electrodeposited graphene oxide and gold nanoclusters for detecting the release of H2O2 from bupivacaine–injured neuroblastoma ...) ... p.8006

www.NewsRx.com

Drugs and Therapies - Anticholinergics. Studies from Nantong University Yield New Data on Anticholinergics (Z–Guggulsterone Improves the Scopolamine–Induced Memory Impairments Through Enhancement of the BDNF Signal in C57BL/6J Mice) ... p.8007

Tumor Cell Line. Studies from Nantong University Yield New Information about Tumor Cell Line (Brusatol inhibits HIF–1 signaling pathway and suppresses glucose uptake under hypoxic conditions in HCT116 cells) ... p.8008

Lymphocytes. Studies from National Autonomous University Describe New Findings in Lymphocytes (An alternative mode of CD43 signal transduction activates pro–survival pathways of T lymphocytes) ... p.8009

Hydroxylamines. Studies from National Autonomous University Have Provided New Information about Hydroxylamines (Antiproliferative, Cytotoxic, and Apoptotic Activity of Steroidal Oximes in Cervicouterine Cell Lines) ... p.8010

Adenocarcinomas. Studies from National Cancer Center Have Provided New Information about Adenocarcinomas (Macroscopic features predict outcome in patients with pancreatic ductal adenocarcinoma) ... p.8011

Oncology - Prostate Cancer. Studies from National Cancer Institute Add New Findings in the Area of Prostate Cancer (The evolving role of enzalutamide on the treatment of prostate cancer) ... p.8012

Science - Climatology. Studies from National Center for Atmospheric Research in the Area of Climatology Reported (The Effects of Past Hurricane Experiences on Evacuation Intentions through Risk Perception and Efficacy Beliefs: A Mediation Analysis) ... p.8013
January 14, 2017

Oncology - Gliomas. Studies from National Center for Scientific Research (CNRS) Have Provided New Data on Gliomas (Integrin α5β1 and p53 convergent pathways in the control of anti-apoptotic proteins PEA-15 and survivin in high-grade glioma) ... p.8014

Gram-Positive Bacteria - Mycobacterium. Studies from National Center for Scientific Research (CNRS) Provide New Data on Mycobacterium (Insights into the smooth-to-rough transitioning in Mycobacterium bolletii unravels a functional Tyr residue conserved in all mycobacterial MmpL...) ... p.8015

Lipid Research. Studies from National Cerebral and Cardiovascular Center Have Provided New Information about Lipid Research [Developmental Endothelial Locus-1 (Del-1) Inhibits Oxidized Low-Density Lipoprotein Activity by Direct Binding, and Its Overexpression ...] ... p.8016

Heart Disorders and Diseases - Atrial Fibrillation. Studies from National Cerebral and Cardiovascular Center in the Area of Atrial Fibrillation Described (Traditional Cardiovascular Risk Factors for Incident Atrial Fibrillation) ... p.8017

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies from National Chung Cheng University in the Area of Alzheimer Disease Described (Rescuing cholinergic neurons from apoptotic degeneration by targeting of serotonin modulator— and apolipoprotein E—conjugated liposomes to the hippocampus) ... p.8018

Musculoskeletal Diseases and Conditions - Osteoporosis. Studies from National Defense Medical Center Yield New Information about Osteoporosis (Calcitonin alleviates hyperalgesia in osteoporotic rats by modulating serotonin transporter activity) ... p.8019

Focal Adhesion. Studies from National Heart Lung and Blood Institute Update Current Data on Focal Adhesion (FMN2 Makes Perinuclear Actin to Protect Nuclei during Confined Migration and Promote Metastasis) ... p.8020

Human Papillomavirus. Studies from National Institute for Infectious Disease Have Provided New Data on Human Papillomavirus (Cutaneous human papillomavirus genotypes in different kinds of skin lesions in Argentina) ... p.8021

Mosquito-Borne Diseases - Malaria. Studies from National Institute of Allergy and Infectious Diseases (NIAID) Yield New Information about Malaria (Clinical Chemistry of Patients With Ebola in Monrovia, Liberia) ... p.8022

Genetics - DNA Research. Studies from National Institute of Environmental Health Sciences Reveal New Findings on DNA Research (Human mitochondrial DNA replication machinery and disease) ... p.8023

Obsessive-Compulsive Disorders. Studies from National Institute on Alcohol Abuse and Alcoholism Provide New Data on Obsessive–Compulsive Disorders (Chronic EtOH effects on putative measures of compulsive behavior in mice) ... p.8024

Oncology - Colon Cancer. Studies from National Institutes of Health Add New Findings in the Area of Colon Cancer (Small Molecule Inhibition of the Ubiquitin–specific Protease USP2 Accelerates cyclin D1 Degradation and Leads to Cell Cycle Arrest in Colorectal Cancer and ...) ... p.8025

Hormones - Corpus Luteum Hormones. Studies from National Institutes of Health Chemical Genomics Center Have Provided New Data on Corpus Luteum Hormones (Structural Insights into the Activation of Human Relaxin Family Peptide Receptor 1 by Small–Molecule Agonists) ... p.8026
Nutritional and Metabolic Diseases and Conditions - Hypophosphatemia. Studies from National Institutes of Health in the Area of Hypophosphatemia Described (Cutaneous skeletal hypophosphatemia syndrome: clinical spectrum, natural history, and treatment) … p.8027

Autoimmune Diseases and Conditions. Studies from National Jewish Health Provide New Data on Autoimmune Diseases and Conditions (Targeting B cells in treatment of autoimmunity) … p.8029

Enzymes and Coenzymes - Mixed Function Oxygenases. Studies from National Pingtung University of Science and Technology Yield New Data on Mixed Function Oxygenases (Dopamine beta–hydroxylase participate in the immunoeendocrine responses of hypothermal stressed white shrimp, Litopenaeus vannamei) … p.8030

Liver Diseases and Conditions - Hepatitis C Virus. Studies from National Taiwan University Hospital Yield New Information about Hepatitis C Virus (Peginterferon alfa–2a plus Weight–Based or Flat–Dose Ribavirin for Treatment–Na?ve Hepatitis C Virus Genotype 2 Rapid Responders: A Randomized Trial) … p.8032

Clinical Research - Clinical Trials and Studies. Studies from National Taiwan University Reveal New Findings on Clinical Trials and Studies (Acute kidney injury as a risk factor for diagnostic discrepancy among geriatric patients: a pilot study) … p.8033

Oncology - Cancer Research. Studies from National Tsing Hua University Reveal New Findings on Cancer Research (Epigenetic Switch between SOX2 and SOX9 Regulates Cancer Cell Plasticity) … p.8034

Ischemia. Studies from National University of Singapore Provide New Data on Ischemia (Ischaemic conditioning and reperfusion injury) … p.8035

Oncology - Breast Cancer. Studies from National University of Singapore in the Area of Breast Cancer Described (Selective Accelerated Proliferation of Malignant Breast Cancer Cells on Planar Graphene Oxide Films) … p.8036

Adenocarcinomas. Studies from Netherlands Cancer Institute Describe New Findings in Adenocarcinomas (Biobanking of fresh–frozen endoscopic biopsy specimens from esophageal adenocarcinoma) … p.8037

Oncology - Lung Cancer. Studies from Netherlands Cancer Institute Have Provided New Data on Lung Cancer (Pre– and postoperative care for stage I–III NSCLC: Which quality of care indicators are evidence–based?) … p.8038

Clinical Research - Clinical Trials and Studies. Studies from Netherlands Cancer Institute Yield New Information about Clinical Trials and Studies (Quantification of patient–reported outcome measures of radiation–induced skin reactions for use in clinical trial design) … p.8039

Tropanes. Studies from Netherlands Organization for Applied Scientific Research Have Provided New Information about Tropanes (Increasing nerve agent treatment efficacy by P–glycoprotein inhibition) … p.8040
Nutritional and Metabolic Diseases and Conditions - Malnutrition. Studies from New York University Yield New Data on Malnutrition (Datafying microbes: Malnutrition at the intersection of genomics and global health) ... p.8041

Liver Diseases and Conditions - Hepatic Encephalopathy. Studies from Newcastle University in the Area of Hepatic Encephalopathy Reported (The impact on hospital resource utilisation of treatment of hepatic encephalopathy with rifaximin–alpha) ... p.8042

Lipoplysaccharides. Studies from Nihon University Yield New Information about Lipopolysaccharides (Differential Regulation of Lympho–Myelopoiesis by Stromal Cells in the Early and Late Phases in BALB/c Mice Repeatedly Exposed to Lipopolysaccharide) ... p.8043

Digestive System Diseases and Conditions - Sclerosing Cholangitis. Studies from Norfolk and Norwich University Hospital Provide New Data on Sclerosing Cholangitis (A review of the medical treatment of primary sclerosing cholangitis in the 21st century) ... p.8044

Nephrology. Studies from North Shore University Hospital in the Area of Nephrology Reported (Renal effects of BRAF inhibitors: a systematic review by the Cancer and the Kidney International Network) ... p.8045

Drugs and Therapies - Pharmaceutical Research. Studies from Northwest University Describe New Findings in Pharmaceutical Research (A novel systems pharmacology platform to dissect action mechanisms of traditional Chinese medicines for bovine viral diarrhea disease) ... p.8046

Oncology - Carcinomas. Studies from Northwestern University Feinberg School of Medicine in the Area of Carcinomas Reported (Adenoid cystic carcinoma: current therapy and potential therapeutic advances based on genomic profiling) ... p.8047

Heart Disorders and Diseases - Heart Disease. Studies from Odense University Hospital Describe New Findings in Heart Disease (Outcome with invasive versus medical treatment of stable coronary artery disease: influence of perfusion defect size, ischaemia, and ejection fraction) ... p.8048

Abdominal Aortic Aneurysm. Studies from Ohio State University Provide New Data on Abdominal Aortic Aneurysm (Quantification of abdominal aortic aneurysm stiffness using magnetic resonance elastography and its comparison to aneurysm diameter) ... p.8049

Bone Research. Studies from Oregon Health and Science University Have Provided New Information about Bone Research (Novel Genetic Variants Associated With Increased Vertebral Volumetric BMD, Reduced Vertebral Fracture Risk, and Increased Expression of SLC1A3 ...) ... p.8050

Drugs and Therapies - Pharmacy Practice. Studies from Oregon Health and Science University Update Current Data on Pharmacy Practice (Pharmacy density in rural and urban communities in the state of Oregon and the association with hospital readmission rates) ... p.8051

Oncology - Thyroid Cancer. Studies from Osaka City University Provide New Data on Thyroid Cancer (Growth arrest by activated BRAF and MEK inhibition in human anaplastic thyroid cancer cells) ... p.8052
January 14, 2017

Pediatrics - Pediatric Dermatology. Studies from Osaka General Medical Center Yield New Data on Pediatric Dermatology (A Case of Blau Syndrome with NOD2 E383K Mutation) ... p.8053

Surgery - Laparotomy. Studies from Oscar Lambret Center Yield New Information about Laparotomy (Single–port or Classic Laparoscopy Compared With Laparotomy to Assess the Peritoneal Cancer Index in Primary Advanced Epithelial Ovarian Cancer) ... p.8054

Oncology - Melanoma. Studies from Oslo University Hospital Add New Findings in the Area of Melanoma (Fibroblast–induced switching to the mesenchymal–like phenotype and PI3K/mTOR signaling protects melanoma cells from BRAF inhibitors) ... p.8055

Non-Steroidal Anti-Inflammatory Agents. Studies from Oslo University Hospital Further Understanding of Non–Steroidal Anti–Inflammatory Drugs on Patients Undergoing Anterior Cruciate Ligament Reconstruction) ... p.8056

Parasitic Diseases and Conditions - Cutaneous Leishmaniasis. Studies from Oswaldo Cruz Institute Describe New Findings in Cutaneous Leishmaniasis (Antileishmanial Activity of Ezetimibe: Inhibition of Sterol Biosynthesis, In Vitro Synergy with Azoles, and Efficacy in Experimental Cutaneous Leishmaniasis) ... p.8057

Heart Disorders and Diseases - Cardiomyopathies. Studies from PLA General Hospital Describe New Findings in Cardiomyopathies (Oncostatin M–induced cardiomyocyte dedifferentiation regulates the progression of diabetic cardiomyopathy through B–Raf/Mek/Erk signaling pathway) ... p.8058

Peptide Proteins - Proinsulin. Studies from Paris–Descartes University Provide New Data on Proinsulin (Leucine and Mammalian Target of Rapamycin–Dependent Activation of Muscle Protein Synthesis in Aging) ... p.8059

Nutritional and Metabolic Diseases and Conditions - Metabolic Syndrome. Studies from Peking Union Medical College Provide New Data on Metabolic Syndrome (Association between sleep duration and cardiac structure in youths at risk for metabolic syndrome) ... p.8060

Oncology - Gastric Cancer. Studies from Peking University Cancer Hospital and Institute Further Understanding of Gastric Cancer (Dynamic monitoring of circulating tumour cells to evaluate therapeutic efficacy in advanced gastric cancer) ... p.8061

Oncology - Liver Cancer. Studies from Peking University Provide New Data on Liver Cancer (Single–cell triple omics sequencing reveals genetic, epigenetic, and transcriptomic heterogeneity in hepatocellular carcinomas) ... p.8062

Health and Medicine - Perinatal Research. Studies from Peking University Update Current Data on Perinatal Research (Relationship of maternal birth weight on maternal and neonatal outcomes: a multicenter study in Beijing) ... p.8063

Mental Health Diseases and Conditions - Schizophrenia. Studies from Peking University in the Area of Schizophrenia Reported (Association of the manganese superoxide dismutase gene Ala–9Val polymorphism with age of smoking initiation in male schizophrenia smokers) ... p.8064

Clinical Research - Clinical Trials and Studies. Studies from Peking–Tsinghua Center for Life Sciences Yield New Data on Clinical Trials and Studies (Haplo–identical transplantation for acquired severe aplastic anaemia in a multicentre
prospective study) ... p.8065

Adolescence. Studies from Pennsylvania State University Reveal New Findings on Adolescence (The Double Standard at Sexual Debut: Gender, Sexual Behavior and Adolescent Peer Acceptance) ... p.8066

Mosquito-Borne Diseases - Malaria. Studies from Pennsylvania State University Update Current Data on Malaria (Metabolomic Profiling of the Malaria Box Reveals Antimalarial Target Pathways) ... p.8067

Science - Applied Clay Science. Studies from People's Hospital Add New Findings in the Area of Applied Clay Science (Smart montmorillonite–polypyrrole scaffolds for electro–responsive drug release) ... p.8069

Oncology - Lung Cancer. Studies from People's Hospital Add New Findings in the Area of Lung Cancer (Reduced SLC27A2 Induces Cisplatin Resistance in Lung Cancer Stem Cells by Negatively Regulating Bmi1–ABCG2 Signaling) ... p.8070

Oncology - Colon Cancer. Studies from People's Hospital Yield New Data on Colon Cancer (Differentially expressed long non–coding RNAs and the prognostic potential in colorectal cancer) ... p.8071

Heart Disorders and Diseases - Heart Attack. Studies from Petz Aladar County Teaching Hospital in the Area of Heart Attack Described (Effects of Angiotensin–Converting Enzyme Inhibitors and Angiotensin Receptor Blockers on Prothrombotic Processes and Myocardial Infarction Risk) ... p.8072

Nanotechnology - Nanovesicles. Studies from Pohang University of Science and Technology in the Area of Nanovesicles Described (Bacterial protoplast–derived nanovesicles for tumor targeted delivery of chemotherapeutics) ... p.8073

www.NewsRx.com

Nitrogen Oxides. Studies from Pontifical Catholic University Have Provided New Data on Nitrogen Oxides (Nitric oxide and pH modulation in gynaecological cancer) ... p.8074

Cardiovascular Diseases and Conditions - Hypotension. Studies from Poznan University of Medical Sciences Have Provided New Data on Hypotension (Impact of Controlled Induced Hypotension on Cognitive Functions of Patients Undergoing Functional Endoscopic Sinus Surgery) ... p.8075

Phenols. Studies from Poznan University of Medical Sciences Update Current Data on Phenols (Pharmacokinetics and pharmacodynamics of propofol and fentanyl in patients undergoing abdominal aortic surgery – a study of pharmacodynamic drug–drug interactions) ... p.8076

Central Nervous System Diseases and Conditions - Meningeal Neoplasms. Studies from Public Hospital System Have Provided New Data on Meningeal Neoplasms (Grade II meningiomas and Gamma Knife radiosurgery: analysis of success and failure to improve treatment paradigm) ... p.8077

Oncology - Breast Cancer. Studies from Pukyong National University Reveal New Findings on Breast Cancer (In Vitro Photodynamic Effect of Phycocyanin against Breast Cancer Cells) ... p.8078

Mycobacterium Infections - Tuberculosis. Studies from Pusan National University Further Understanding of Tuberculosis (Molecular Strain Typing of Mycobacterium tuberculosis: A Review of Frequently Used Methods) ... p.8079

Nanotechnology - Nanoparticles. Studies from Quaid–I–Azam University Yield New Information about Nanoparticles (Green synthesis of silver nanoparticles via plant extracts: beginning a new era in cancer theranostics) ... p.8080
January 14, 2017

Cardiology. Studies from Queen's University in the Area of Cardiology Described (Validation of a Novel Digital Tool in Automatic Scoring of an Online ECG Examination at an International Cardiology Meeting) … p.8081

Clinical Research - Clinical Trials and Studies. Studies from R.B. Verheijen and Co–Researchers Yield New Data on Clinical Trials and Studies (Individualized Pazopanib Dosing: A Prospective Feasibility Study in Cancer Patients) … p.8082

Hematologic Diseases and Conditions - Anemia. Studies from R.V. Boccia and Colleagues Yield New Information about Anemia (Efficacy and safety of darbepoetin alfa initiated at hemoglobin <= 10 g/dL in patients with stage IV cancer and chemotherapy–induced anemia) … p.8083

Science. Studies from RIKEN Reveal New Findings on Science (SARS–CoV 3CL protease cleaves its C–terminal autoprocessing site by novel subsite cooperativity) … p.8085

Eye Diseases and Conditions - Amblyopia. Studies from Radboud University Describe New Findings in Amblyopia (Ocular Manifestations of Noonan Syndrome A Prospective Clinical and Genetic Study of 25 Patients) … p.8086

Sexually Transmitted Diseases and Conditions (STDs) - Chronic Mucocutaneous Candidiasis. Studies from Radboud University Describe New Findings in Chronic Mucocutaneous Candidiasis (Th2 and Th9 responses in patients with chronic mucocutaneous candidiasis and hyper–IgE syndrome) … p.8087

Drugs and Therapies - Chemotherapy. Studies from Regina Elena Cancer Institute Add New Findings in the Area of Chemotherapy (DNA Damage and Repair Biomarkers in Cervical Cancer Patients Treated with Neoadjuvant Chemotherapy: An Exploratory Analysis) … p.8088

Science. Studies from Research Center Have Provided New Data on Science (High dose CD11c–driven IL15 is sufficient to drive NK cell maturation and anti–tumor activity in a trans–presentation independent manner) … p.8089

Cardiovascular Diseases and Conditions - Hypertension. Studies from Research Institute Have Provided New Data on Hypertension (Perindopril Attenuates Lipopolysaccharide–Induced Amyloidogenesis and Memory Impairment by Suppression of Oxidative Stress and RAGE Activation) … p.8090

Oncology - Basal Cell Cancer. Studies from Research Institute in the Area of Basal Cell Cancer Described (Inhibition of the hedgehog pathway in patients with basal–cell nevus syndrome: final results from the multicentre, randomised, double–blind, placebo–controlled, phase 2 …) … p.8092

Oncology - Lung Cancer. Studies from Research Institute in the Area of Lung Cancer Reported (Predicting Malignant Nodules from Screening CT Scans) … p.8094

www.NewsRx.com
Nervous System Diseases and Conditions

- Seizures. Studies from Royal College of Surgeons in Ireland in the Area of Seizures Described (microRNA targeting of the P2X7 purinoceptor opposes a contralateral epileptogenic focus in the hippocampus) … p.8095

Oncology - Sarcomas. Studies from Royal Marsden Hospitals NHS Foundation Trust Have Provided New Information about Sarcomas (Multivisceral resection of retroperitoneal sarcomas in the elderly) … p.8096

Oncology - Cervical Cancer. Studies from Rutgers State University Yield New Information about Cervical Cancer (Can chemotherapy boost the survival benefit of adjuvant radiotherapy in early stage cervical cancer with intermediate risk factors? A population based study) … p.8097

Oncology - Bladder Cancer. Studies from S. Tsuji et al Further Understanding of Bladder Cancer (Preclinical evaluation of VAX–IP, a novel bacterial minicell–based biopharmaceutical for nonmuscle invasive bladder cancer) … p.8098

Oncology - Acute Myeloid Leukemia. Studies from S. Weber and Co–Researchers in the Area of Acute Myeloid Leukemia Reported (Feasibility of BAALC gene expression for detection of minimal residual disease and risk stratification in normal karyotype acute myeloid leukaemia) … p.8099

Oncology - Prostate Cancer. Studies from S.P. Heng and Co–Authors Have Provided New Information about Prostate Cancer (The influence of the bowel and bladder preparation protocol for radiotherapy of prostate cancer using kilo–voltage cone beam CT: Our experience) … p.8100

Oncology - Sarcomas. Studies from Sahlgrenska University Reveal New Findings on Sarcomas (Profiling of potential driver mutations in sarcomas by targeted next generation sequencing) … p.8101

Oncology - Liver Cancer. Studies from Saitama Cancer Center Provide New Data on Liver Cancer (Complete response with sorafenib and transcatheter arterial chemoembolization in unresectable hepatocellular carcinoma) … p.8102

Drugs and Therapies - Antimicrobials. Studies from Sakarya University Yield New Data on Antimicrobials (A rare cause of infection, Raoultella planticola: emerging threat and new reservoir for carbapenem resistance) … p.8103

Stem Cell Research. Studies from Salk Institute for Biological Studies Have Provided New Data on Stem Cell Research (3D Culture Supports Long–Term Expansion of Mouse and Human Nephrogenic Progenitors) … p.8104

Heart Disorders and Diseases - Acute Coronary Syndrome. Studies from San Antonio Military Medical Center Add New Findings in the Area of Acute Coronary Syndrome (Best Clinical Practice: Current Controversies In Evaluation Of Low–risk Chest Pain–part 1) … p.8105

January 14, 2017

Drugs and Therapies - Genitourinary Tract Agents. Studies from Sao Paulo Federal University Update Current Data on Genitourinary Tract Agents (Quality of oxytocin available in low- and middle-income countries: a systematic review of the literature) … p.8107

Health and Medicine - Roentgenology. Studies from School of Medicine Describe New Findings in Roentgenology (Transradial Approach for Hepatic Radioembolization: Initial Results and Technique) … p.8109

Keloids. Studies from School of Medicine Have Provided New Data on Keloids (Endothelial dysfunction may play a key role in keloid and hypertrophic scar pathogenesis – Keloids and hypertrophic scars may be vascular disorders) … p.8110

Enzymes and Coenzymes - Cysteine Endopeptidases. Studies from School of Medicine Yield New Information about Cysteine Endopeptidases (Perioperative Bromelain Therapy after Wisdom Teeth Extraction – A Randomized, Placebo–Controlled, Double–Blinded, Three–Armed, Cross–Over Dose–Finding Study) … p.8111

Molecular Nutrition. Studies from School of Public Health Yield New Information about Molecular Nutrition (Influence of maternal hypercholesterolemia and phytosterol intervention during gestation and lactation on dyslipidemia and hepatic lipid metabolism in ...) … p.8112

Musculoskeletal Diseases and Conditions - Myotonic Dystrophy. Studies from Scripps Research Institute in the Area of Myotonic Dystrophy Reported (Development of pharmacophore models for small molecules targeting RNA: Application to the RNA repeat expansion in myotonic dystrophy type 1) … p.8113

Oncology - Gastric Cancer. Studies from Second Affiliated Hospital of Harbin Medical University Provide New Data on Gastric Cancer (Aberrant expression of the candidate tumor suppressor gene DAL–1 due to hypermethylation in gastric cancer) … p.8114

Oncology - Prostate Cancer. Studies from Second Military Medical University Further Understanding of Prostate Cancer (Prostate Specific Antigen and Prostate Cancer in Chinese Men Undergoing Initial Prostate Biopsies Compared with Western Cohorts) … p.8115

Heart Disorders and Diseases - Atrial Fibrillation. Studies from Second University of Naples Describe New Findings in Atrial Fibrillation (The Role of the Atrial Electromechanical Delay in Predicting Atrial Fibrillation in Myotonic Dystrophy Type 1 Patients) … p.8117

Biological Factors - Biological Toxins. Studies from Seoul National University College of Medicine Add New Findings in the Area of Biological Toxins (Staphylococcal enterotoxin IgE sensitization in late–onset severe eosinophilic asthma in the elderly) … p.8119

Myeloid Cells. Studies from Seoul National University Further Understanding of Myeloid Cells (GM–CSF Grown Bone Marrow Derived Cells Are Composed of Phenotypically Different Dendritic Cells and Macrophages) … p.8120

www.NewsRx.com
January 14, 2017

Chemistry - Biochemistry. Studies from Seoul National University in the Area of Biochemistry Described (Differentially expressed genes in iron–induced prion protein conversion) … p.8121

Enzymes and Coenzymes. Studies from Shaanxi University of Technology Describe New Findings in Enzymes and Coenzymes [Echinacoside and Cistanche tubulosa (Schenk) R. wight ameliorate bisphenol A–induced testicular and sperm damage in rats through gonad axis regulated …] … p.8122

Eye Diseases and Conditions - Age-Related Macular Degeneration. Studies from Shaheed Beheshti University of Medical Sciences Have Provided New Information about Age–Related Macular Degeneration (Evaluation of CC–cytokine ligand 2 and complementary factor H Y402H polymorphisms and their interactiveal …) … p.8123

Hematologic Diseases and Conditions - Thrombocytopenia. Studies from Shandong University Describe New Findings in Thrombocytopenia (Participation of B–cell–activating factor receptors in the pathogenesis of immune thrombocytopenia) … p.8124

Oncology - Kidney Cancer. Studies from Shandong University Have Provided New Data on Kidney Cancer (Silencing Livin induces apoptotic and autophagic cell death, increasing chemotherapeutic sensitivity to cisplatin of renal carcinoma cells) … p.8126

Life Science Research - Apoptosis and Cell Death. Studies from Shanghai Jiao–Tong University School of Medicine Yield New Data on Apoptosis and Cell Death (ANP32B deficiency impairs proliferation and suppresses tumor progression by regulating AKT phosphorylation) … p.8133
January 14, 2017

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Studies from Shanghai Jiao–Tong University in the Area of Type 1 Diabetes Mellitus Reported (Vessel Dilation Attenuates Endothelial Dysfunction Following Middle Cerebral Artery Occlusion in Hyperglycemic Rats) … p.8136

Enzymes and Coenzymes - Cysteine Endopeptidases. Studies from Shanghai University of Traditional Chinese Medicine Provide New Data on Cysteine Endopeptidases (Antiapoptotic effect of exercise training on ovariectomized rat hearts) … p.8137

Pentanoic Acids. Studies from Shengjing Hospital Yield New Information about Pentanoic Acids (Development and Validation of a Simple and Rapid UPLC–MS Assay for Valproic Acid and Its Comparison With Immunoassay and HPLC Methods) … p.8138

Gastroenterology - Pancreas Research. Studies from Shiga University of Medical Sciences Provide New Data on Pancreas Research [Eotaxin–3 (CCL26) Expression in Human Pancreatic Myofibroblasts] … p.8139

www.NewsRx.com

Science - Chromatography. Studies from Sichuan Agricultural University Yield New Information about Chromatography (Simultaneous Determination of beta–Cypermethrin and Its Metabolite 3–Phenoxybenzoic Acid in Microbial Degradation Systems by HPLC–UV) … p.8140

Lung Diseases and Conditions - Pulmonary Embolism. Studies from Sichuan University Yield New Data on Pulmonary Embolism (The Efficacy and Safety of Combination of Intravenous and Topical Tranexamic Acid in Revision Hip Arthroplasty: A Randomized, Controlled Trial) … p.8141

Cardiovascular Diseases and Conditions - Hypertension. Studies from Sichuan University in the Area of Hypertension Described (Hyperuricemia and the Prognosis of Hypertensive Patients: A Systematic Review and Meta–Analysis) … p.8142

Immune System Diseases and Conditions - HIV/AIDS. Studies from Simon Fraser University in the Area of HIV/AIDS Reported (Prevalence, type, and correlates of trauma exposure among adolescent men and women in Soweto, South Africa: implications for HIV prevention) … p.8143

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Studies from Singapore National University Update Current Data on Diabetic Angiopathies (Biomarkers of Diabetic Retinopathy) … p.8145

Lung Diseases and Conditions - Asthma. Studies from Singapore National University Yield New Data on Asthma (Blomia tropicalis–Specific TCR Transgenic Th2 Cells Induce Inducible BALT and Severe Asthma in Mice by an IL–4/IL–13–Dependent Mechanism) … p.8146
January 14, 2017

Amyotrophic Lateral Sclerosis. Studies from Soonchunhyang University Reveal New Findings on Amyotrophic Lateral Sclerosis (Imbalance of mitochondrial dynamics in Drosophila models of amyotrophic lateral sclerosis) … p.8147

Nursing - Clinical Nursing. Studies from Sophiahemmet University Yield New Information about Clinical Nursing (District nurses’ perspectives on detecting mental health problems and promoting mental health among community–dwelling seniors with multimorbidity) … p.8148

Oncology - Gliomas. Studies from Sorbonne University in the Area of Gliomas Described (Seizures and gliomas—towards a single therapeutic approach) … p.8149

Biological Factors - Mycotoxins. Studies from South Central University for Nationalities Have Provided New Data on Mycotoxins (Aflatoxin B1 impairs mitochondrial functions, activates ROS generation, induces apoptosis and involves Nrf2 signal pathway in primary broiler ...) … p.8150

Oncology - Colon Cancer. Studies from Southeast University Have Provided New Data on Colon Cancer (A tumor suppressive role of IncRNA GAS5 in human colorectal cancer) … p.8151

Science. Studies from Southern Medical University Provide New Data on Science (Prognostic Value of Ezrin in Various Cancers: A Systematic Review and Updated Meta–analysis) … p.8152

Oncology - Liver Cancer. Studies from Southern Medical University Reveal New Findings on Liver Cancer (Intraoperative Identification of Liver Cancer Microfoci Using a Targeted Near–Infrared Fluorescent Probe for Imaging–Guided Surgery) … p.8152

Oncology - Squamous Cell Carcinoma. Studies from Southern Medical University Update Current Data on Squamous Cell Carcinoma (FRMD4A: A potential therapeutic target for the treatment of tongue squamous cell carcinoma) … p.8153

Skin Diseases and Conditions - Psoriasis. Studies from Spanish National Research Council (CSIC) in the Area of Psoriasis Described [Overexpression of Glucocorticoid–induced Leucine Zipper (GILZ) increases susceptibility to Imiquimod–induced psoriasis and involves cutaneous activation of …] … p.8154

Nutritional and Metabolic Diseases and Conditions - Mevalonate Kinase Deficiency. Studies from St Vincents Clinical School Reveal New Findings on Mevalonate Kinase Deficiency (Mevalonate kinase deficiency leads to decreased prenylation of Rab GTPases) … p.8155

Ethanolamines. Studies from St. George's University of London in the Area of Ethanolamines Described (Kv7 Channel Activation Underpins EPAC–Dependent Relaxations of Rat Arteries) … p.8157

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from St. Josef Hospital Have Provided New Information about Type 2 Diabetes (Incretin therapies: highlighting common features and differences in the modes of action of glucagon–like peptide–1 receptor agonists and dipeptidyl peptidase–4 …) … p.8158

Transfusion Medicine - Blood Transfusion. Studies from St. Louis University Describe New Findings in Blood Transfusion (Transfusion Requirements in ESRD Patients Admitted with GI Hemorrhage Undergoing Inpatient Endoscopy) … p.8159
Oncology - Colon Cancer. Studies from St. Mark's Hospital Have Provided New Information about Colon Cancer (The potential impact of local excision for T1 colonic cancer in elderly and comorbid populations: a decision analysis) … p.8160

Arteriovenous Malformation. Studies from Stanford University Hospital Have Provided New Information about Arteriovenous Malformation (Headway Duo microcatheter for cerebral. arteriovenous malformation embolization with n–BCA) … p.8161

Peptide Proteins - Proinsulin. Studies from Stanford University School of Medicine Provide New Data on Proinsulin (Pterostilbene Ameliorates Streptozotocin–Induced Diabetes through Enhancing Antioxidant Signaling Pathways Mediated by Nrf2) … p.8162

Oncology - Ovarian Cancer. Studies from Sun Yat Sen University Describe New Findings in Ovarian Cancer (MiR–760 overexpression promotes proliferation in ovarian cancer by downregulation of PHLPP2 expression) … p.8163

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Sun Yat Sen University in the Area of Type 2 Diabetes Described (Associations of polymorphisms in TXNIP and gene–environment interactions with the risk of coronary artery disease in a Chinese Han population) … p.8164

Oncology - Gastric Cancer. Studies from Sungkyunkwan University Have Provided New Information about Gastric Cancer (Does the interval of screening endoscopy affect survival in gastric cancer patients? A cross–sectional study) … p.8165

Oncology - Non-Small Cell Lung Cancer. Studies from Sungkyunkwan University School of Medicine Further Understanding of Non–Small Cell Lung Cancer (Low EGFR/MET ratio is associated with resistance to EGFR inhibitors in non–small cell lung cancer) … p.8166

Cyclohexanes. Studies from Suny Downstate Medicine Center Describe New Findings in Cyclohexanes (Ketamine A Cause of Urinary Tract Dysfunction) … p.8167

Drugs and Therapies - Antimalarial Agents. Studies from T. Jeanson and Co–Researchers in the Area of Antimalarial Agents Reported (Potentiation of Amitriptyline Anti–Hyperalgesic–Like Action By Astroglial Connexin 43 Inhibition in Neuropathic Rats) … p.8169

Pharmacokinetics. Studies from Tata Memorial Hospital Further Understanding of Pharmacokinetics (Determination and Pharmacokinetic Study of Pirfenidone in Rat Serum by High–Performance Thin–Layer Chromatography) … p.8170

Liver Diseases and Conditions - Hepatitis B Virus. Studies from Tata Memorial Hospital in the Area of Hepatitis B Virus Reported (Hepatitis B–related serological events in hematopoietic stem cell transplant patients and efficacy of lamivudine prophylaxis against reactivation) … p.8171
January 14, 2017

Congenital Diseases and Conditions - Congenital Heart Disease. Studies from Technical University Add New Findings in the Area of Congenital Heart Disease (Interstitial 1q23.3q24.1 Deletion in a Patient with Renal Malformation, Congenital Heart Disease, and Mild Intellectual Disability) ... p.8172

Oncology - Bone Cancer. Studies from Technical University Further Understanding of Bone Cancer (WNT5A and Its Receptors in the Bone–Cancer Dialogue) ... p.8173

Drugs and Therapies - Antineoplastics. Studies from Technical University Provide New Data on Antineoplastics (Half generations magnetic PAMAM dendrimers as an effective system for targeted gemcitabine delivery) ... p.8174

Cardiovascular Diseases and Conditions - Vasculitis. Studies from Technical University Yield New Information about Vasculitis (Spotlight on rituximab in the treatment of antineutrophil cytoplasmic antibody–associated vasculitis: current perspectives) ... p.8175

Science. Studies from Tel Aviv University Further Understanding of Science (Maternal immune activation produces neonatal excitability defects in offspring hippocampal neurons from pregnant rats treated with poly I:C) ... p.8176

Nephrology. Studies from Tel Aviv University Yield New Data on Nephrology (Prenatal diagnosis of 17q12 deletion syndrome: from fetal hyperechogenic kidneys to high risk for autism) ... p.8177

Aorta. Studies from Texas A&M University Add New Findings in the Area of Aorta (Strain survey and genetic analysis of vasoreactivity in mouse aorta) ... p.8178

Gastroenterology - Colorectal Research. Studies from Texas A&M University Have Provided New Information about Colorectal Research (Plum polyphenols inhibit colorectal aberrant crypt foci formation in rats: potential role of the miR–143/protein kinase B/mammalian target of rapamycin ...) ... p.8179

Central Nervous System Diseases and Conditions - Brain Injuries. Studies from Third Military Medical University Update Current Data on Brain Injuries (MG53 permeates through blood–brain barrier to protect ischemic brain injury) ... p.8180

Oncology - Cancer Risk. Studies from Thomas Jefferson University Describe New Findings in Cancer Risk (Familial prostate cancer) ... p.8181

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from Toho University School of Medicine Reveal New Findings on Obesity (High–fat diet feeding alters olfactory–, social–, and reward–related behaviors of mice independent of obesity) ... p.8182

Lung Diseases and Conditions - Pneumococcal Pneumonia. Studies from Toho University Update Current Data on Pneumococcal Pneumonia (Efficacy of beta–Lactam–plus–Macrolide Combination Therapy in a Mouse Model of Lethal Pneumococcal Pneumonia) ... p.8183

Oncology - Breast Cancer. Studies from Tohoku Pharmaceutical University Update Current Data on Breast Cancer (Distinct effects of b1 integrin on cell proliferation and cellular signaling in MDA–MB–231 breast cancer cells) ... p.8184

Adrenal Gland Diseases and Conditions - Adrenocortical Adenoma. Studies from Tohoku University Add New Findings in the Area of Adrenocortical Adenoma (Expression of CYP11B2 in Aldosterone–Producing Adrenocortical Adenoma: Regulatory Mechanisms and Clinical Significance) ... p.8185

www.NewsRx.com
January 14, 2017

Immunology - Cytokine Receptors. Studies from Tohoku University Further Understanding of Cytokine Receptors [Brefeldin A–Inhibited Guanine Nucleotide–Exchange Factor 1 (BIG1) Governs the Recruitment of Tumor Necrosis Factor Receptor–Associated Factor 2 (TRAF2) to Tumor Necrosis ...] ... p.8186

Heart Disorders and Diseases - Heart Attack. Studies from Tokyo Metropolitan Bokutoh Hospital Provide New Data on Heart Attack (Prognostic effect of estimated glomerular filtration rate in patients with cardiogenic shock or cardiac arrest undergoing percutaneous veno–arterial ...) ... p.8187

Gram-Positive Bacteria - Staphylococcus epidermidis. Studies from Tokyo University of Pharmacy and Life Sciences Reveal New Findings on Staphylococcus epidermidis (Methicillin–Resistant Staphylococcus epidermidis Is Part of the Skin Flora on the Hands of Both Healthy Individuals and Hospital ...) ... p.8188

Truncus Arteriosus. Studies from Tokyo Women's Medical University Have Provided New Data on Truncus Arteriosus (Long–term Outcomes after Truncus Arteriosus Repair: A Single–center Experience for More than 40 Years) ... p.8189

Erythropoiesis. Studies from Tokyo Women's Medical University Have Provided New Information about Erythropoiesis (Modulation of circulating endothelial progenitor cells by erythropoiesis–stimulating agents in patients with chronic kidney disease stage G5 and 5D) ... p.8190

Surgery - Cardiovascular and Thoracic Surgery. Studies from Tokyo Women's Medical University in the Area of Cardiovascular and Thoracic Surgery Described (Arterial Switch Operation With and Without Coronary Relocation for Intramural Coronary Arteries)

www.NewsRx.com

Gram-Positive Bacteria - Staphylococcus aureus. Studies from Tripura University in the Area of Staphylococcus aureus Reported (3–Amino–4–aminoximidofurazan derivatives: small molecules possessing antimicrobial and antibiofilm activity against Staphylococcus aureus and Pseudomonas aeruginosa) ... p.8192

Central Nervous System Diseases and Conditions - Bacterial Meningitis. Studies from Triserv General Hospital Further Understanding of Bacterial Meningitis (Acute lethargy in a young woman due to latent disseminated cancer mimicking bacterial meningitis: a diagnostic pitfall) ... p.8194

Hemangiopericytomas. Studies from Tufts Medical Center Yield New Information about Hemangiopericytomas (Surgical resection of sinonasal hemangiopericytoma involving anterior skull base: Case reports and literature review) ... p.8195

Blood Pressure. Studies from Tulane University Have Provided New Information about Blood Pressure (Effects of early blood pressure reduction on cognitive function in patients with acute ischemic stroke) ... p.8196

Oncology - Acute Myeloid Leukemia. Studies from U. Reusch and Colleagues Yield New Information about Acute Myeloid Leukemia [Characterization of CD33/CD3 Tetravalent Bispecific Tandem Diabodies (TandAbs) for the Treatment of Acute Myeloid Leukemia] ... p.8197

Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia. Studies from U. Salvadori and Colleagues Provide New Data on Iron–Deficiency Anemia (Ferric carboxymaltose reduces the number of red blood cell units transfused and allows transfusion independence to be obtained in patients with iron deficiency
January 14, 2017

Drugs and Therapies - Anxiolytics 
Sedatives and Hypnotics. Studies from UFRGS Add New Findings in the Area of Anxiolytics Sedatives and Hypnotics (Prolonged Infusion of Dexmedetomidine in Critically−ill Children) ... p.8199

Drugs and Therapies - Anxiolytics 
Sedatives and Hypnotics. Studies from Umea University in the Area of Anxiolytics Sedatives and Hypnotics Described (Home alone−The effects of isolation on uptake of a pharmaceutical contaminant in a social fish) ... p.8200

Eye Diseases and Conditions - Retinitis Pigmentosa. Studies from University College Reveal New Findings on Retinitis Pigmentosa (Variant haploinsufficiency and phenotypic non−penetration in PRPF31−associated retinitis pigmentosa) ... p.8201

Mesotheliomas. Studies from University Health Network in the Area of Mesotheliomas Reported (SORORIN and PLK1 as potential therapeutic targets in malignant pleural mesothelioma) ... p.8201

Immune System Diseases and Conditions - HIV/AIDS. Studies from University Hospital 12 de Octubre Have Provided New Information about HIV/AIDS [Description and consequences of prescribing off−label antiretrovirals in the Madrid Cohort of HIV−infected children over a quarter of a century ...] ... p.8202

Cardiovascular Research. Studies from University Hospital Describe New Findings in Cardiovascular Research (Effects of perinatal, late foetal, and early embryonic insults on the cardiovascular phenotype in experimental animal models and humans) ... p.8203

www.NewsRx.com

Oncology - Lymphoma. Studies from University Hospital Further Understanding of Lymphoma (Dynamics of occurrence of refractory coeliac disease and associated complications over 25 years) ... p.8204

Peptide Proteins - Parathyroid Hormone. Studies from University Hospital Have Provided New Data on Parathyroid Hormone (Effects of teriparatide on bone mineral density and quality of life in Duchenne muscular dystrophy related osteoporosis: a case report) ... p.8205

Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia. Studies from University Hospital Have Provided New Information about Iron−Deficiency Anemia (Outcome of endoscopy−negative iron deficiency anemia in patients above 65 A longitudinal multicenter cohort) ... p.8206

Oncology - Breast Cancer. Studies from University Hospital Provide New Data on Breast Cancer (Exogenous FABP4 increases breast cancer cell proliferation and activates the expression of fatty acid transport proteins) ... p.8207

Oncology - Ewing Sarcoma. Studies from University Hospital Provide New Data on Ewing Sarcoma (Primary Epidural Lumbar Ewing Sarcoma: Case Report and Review of the Literature) ... p.8208

Oncology - Multiple Myeloma. Studies from University Hospital Provide New Data on Multiple Myeloma (Clinical features and survival of 338 multiple myeloma patients treated with hematopoietic stem cell transplantation or conventional chemotherapy) ... p.8209

Oncology - Prostate Cancer. Studies from University Hospital Update Current Data on Prostate Cancer (Gonadotropin−releasing hormone antagonists versus standard androgen suppression therapy for advanced prostate cancer A systematic review with meta−analysis) ... p.8210
Lung Diseases and Conditions - Pulmonary Edema. Studies from University Hospital Update Current Data on Pulmonary Edema (Delayed renal dysfunction and flash pulmonary edema post endovascular abdominal aneurysm repair) ... p.8212

Health and Medicine - Vascular Medicine. Studies from University Hospital Yield New Data on Vascular Medicine (Transarterial embolization of peripheral arteriovenous malformations with ethylenevinyl alcohol copolymer feasibility, technical outcomes, and clinical outcomes) ... p.8213

Neurodegenerative Diseases and Conditions - Amyotrophic Lateral Sclerosis. Studies from University Hospital Yield New Information about Amyotrophic Lateral Sclerosis (Interleukin–1 Antagonist Anakinra in Amyotrophic Lateral Sclerosis—A Pilot Study) ... p.8213

Nosocomial Diseases and Conditions - Ventilator-Associated Pneumonia. Studies from University Hospital Yield New Information about Ventilator–Associated Pneumonia (Clinical epidemiology, treatment and prognostic factors of extensively drug–resistant Acinetobacter baumannii ventilator–associated pneumonia in ...) ... p.8214

Heart Disorders and Diseases - Atrial Fibrillation. Studies from University Hospital in the Area of Atrial Fibrillation Described (Balance between sodium and calcium currents underlying chronic atrial fibrillation termination: An in silico intersubject variability study) ... p.8216

Onecology - Colon Cancer. Studies from University Hospital in the Area of Colon Cancer Reported (The evolving role. of microsatellite instability in colorectal cancer: A review) ... p.8217

Oncology - Liver Cancer. Studies from University Hospital in the Area of Liver Cancer Described (A possible role of microRNAs as predictive markers for the recurrence of hepatocellular carcinoma after liver transplantation) ... p.8218

beta-Lactams. Studies from University Hospital in the Area of beta–Lactams Described [Universal protocol for the rapid automated detection of carbapenem–resistant Gram–negative bacilli directly from blood cultures by matrix–assisted laser ...) ... p.8219

Oncology - Breast Cancer. Studies from University of Adelaide Add New Findings in the Area of Breast Cancer (Anticancer efficacy of the hypoxia–activated prodrug evofosfamide (TH–302) in osteolytic breast cancer murine models] ... p.8220

Oncology - Cancer Detection. Studies from University of Adelaide Yield New Data on Cancer Detection (Cancer Detection in Human Tissue Samples Using a Fiber–Tip pH Probe) ... p.8221

Lung Diseases and Conditions - Bronchopulmonary Dysplasia. Studies from University of Alabama Have Provided New Information about Bronchopulmonary Dysplasia (Of mice and men: correlations between microRNA–17 similar to 92 cluster expression and promoter methylation in severe bronchopulmonary dysplasia) ... p.8222

Central Nervous System Diseases and Conditions - Subarachnoid Hemorrhage. Studies from University of Alabama Update Current Data on Subarachnoid Hemorrhage (Association of nosocomial infections with delayed cerebral ischemia in aneurysmal subarachnoid hemorrhage) ... p.8223
January 14, 2017

Oncology - Breast Cancer. Studies from University of Alcalá Reveal New Findings on Breast Cancer (Growth hormone–releasing hormone induced transactivation of epidermal growth factor receptor in human triple-negative breast cancer cells) … p.8224

Pain Medicine - Anesthesiology. Studies from University of Arizona Further Understanding of Anesthesiology (Strategies to improve first attempt success at intubation in critically ill patients) … p.8225

Myelomas. Studies from University of Arkansas Have Provided New Information about Myelomas (The Spectrum and Clinical Impact of Epigenetic Modifier Mutations in Myeloma) … p.8226

Oncology - Glioblastomas. Studies from University of Arkansas for Medical Sciences Yield New Information about Glioblastomas (Kynurenine Signaling Increases DNA Polymerase Kappa Expression and Promotes Genomic Instability in Glioblastoma Cells) … p.8227

Gram-Negative Bacteria - Escherichia coli. Studies from University of Aveiro Describe New Findings in Escherichia coli (Characterization and in vitro evaluation of new bacteriophages for the biocontrol of Escherichia coli) … p.8228

Muscloskeletal Diseases and Conditions - Rheumatic Diseases and Conditions. Studies from University of Barcelona Update Current Data on Rheumatic Diseases and Conditions (IgG4–related disease: Advances in the diagnosis and treatment) … p.8229

Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia. Studies from University of Barcelona Yield New Data on Iron–Deficiency Anemia (Factors Associated with Hospitalization among Emergency Department Patients Referred for Quick Investigation of Iron–Deficiency Anemia) … p.8230

Congenital Diseases and Conditions - Congenital Heart Disease. Studies from University of Barcelona in the Area of Congenital Heart Disease Described [Usefulness of Lung Ultrasound in Neonatal Congenital Heart Disease (LUSNEHDI): Lung Ultrasound to Assess Pulmonary Overflow in Neonatal Congenital Heart …] … p.8231

Oncology - Melanoma. Studies from University of Bari Reveal New Findings on Melanoma [Detrimental effects of melanocortin–1 receptor (MC1R) variants on the clinical outcomes of BRAF V600 metastatic melanoma patients treated with BRAF inhibitors] … p.8232

Drugs and Therapies - Docetaxel Therapy. Studies from University of Basel Have Provided New Information about Docetaxel Therapy (A Cost–Effectiveness Analysis of Nivolumab versus Docetaxel for Advanced Nonsquamous NSCLC Including PD–L1 Testing) … p.8233

Cardiology. Studies from University of Bologna Update Current Data on Cardiology (Risk of 22q11.2 deletion in fetuses with right aortic arch and without intracardiac anomalies) … p.8234

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from University of Bordeaux Yield New Data on Atherosclerosis (Solid Lipid Nanoparticles for Image–Guided Therapy of Atherosclerosis) … p.8235

Life Science Research - Developmental Biology. Studies from University of Bristol Update Current Data on Developmental Biology (Hypoxia promotes production of neural crest cells in the embryonic head) … p.8236

Blood Diseases and Conditions - Sepsis. Studies from University of British Columbia Add New Findings in the Area of Sepsis (Increased Plasma PCSK9 Levels Are Associated with Reduced Endotoxin Clearance and the Development of Acute Organ Failures
Membrane Proteins - Immunologic Receptors. Studies from University of British Columbia Have Provided New Data on Immunologic Receptors (Activin B induces human endometrial cancer cell adhesion, migration and invasion by up-regulating integrin b3 via SMAD2/3 signaling) … p.8238

gamma-Aminobutyric Acid. Studies from University of British Columbia Reveal New Findings on gamma–Aminobutyric Acid (Differential effects of R–isovaline and the GABAB agonist, baclofen, in the guinea pig ileum) … p.8239

Cardiovascular Diseases and Conditions - Thrombosis. Studies from University of Buenos Aires Describe New Findings in Thrombosis (Neutrophil extracellular trap formation and circulating nucleosomes in patients with chronic myeloproliferative neoplasms) … p.8240

Liver Diseases and Conditions - Fatty Liver. Studies from University of California Add New Findings in the Area of Fatty Liver (In vivo bioluminescence imaging reveals copper deficiency in a murine model of nonalcoholic fatty liver disease) … p.8241

Musculoskeletal Diseases and Conditions - Kyphosis. Studies from University of California Add New Findings in the Area of Kyphosis (SHBG, Sex Steroids, and Kyphosis in Older Men: The MrOS Study) … p.8242

Drugs and Therapies - Clinical Pharmacology and Therapeutics. Studies from University of California Describe New Findings in Clinical Pharmacology and Therapeutics (Leveraging big data to transform target selection and drug discovery) … p.8243

Oncology - Prostate Cancer. Studies from University of California Describe New Findings in Prostate Cancer (Development and validation of a 24–gene predictor of response to postoperative radiotherapy in prostate cancer: a matched, retrospective analysis) … p.8244

Hematopoietic. Studies from University of California Further Understanding of Hematopoietic (Differential Role of Hematopoietic and Nonhematopoietic Cell Types in the Regulation of NK Cell Tolerance and Responsiveness) … p.8245

Oncology - Pancreatic Cancer. Studies from University of California Have Provided New Data on Pancreatic Cancer (Irinotecan Delivery by Lipid–Coated Mesoporous Silica Nanoparticles Shows Improved Efficacy and Safety over Liposomes for Pancreatic Cancer) … p.8246

Brachytherapy. Studies from University of California Reveal New Findings on Brachytherapy (A method for restricting intracatheter dwell time variance in high–dose–rate brachytherapy plan optimization) … p.8247

Mycobacterium Infections - Tuberculosis. Studies from University of California Yield New Information about Tuberculosis (Xpert MTB/RIF Assay Shows Faster Clearance of Mycobacterium tuberculosis DNA with Higher Levels of Rifapentine Exposure) … p.8248

Autoimmune Diseases and Conditions - Sjogren's Syndrome. Studies from University of California in the Area of Sjogren's Syndrome Reported (Epigenetic Signatures of Salivary Gland Inflammation in Sjogren's Syndrome) … p.8250
Mycobacterium Infections - Tuberculosis. Studies from University of Cambridge Further Understanding of Tuberculosis (Wild-Type and Non-Wild-Type Mycobacterium tuberculosis MIC Distributions for the Novel Fluoroquinolone Antofl oxacin Compared with Those for Ofloxacin, Levofl oxacin, and ...) … p.8251

Biotechnology - Liposomes. Studies from University of Cambridge Have Provided New Data on Liposomes (Controlling Self-Assembly Kinetics of DNA-Functionalized Liposomes Using Toehold Exchange Mechanism) … p.8252

Mycobacterium Infections - Tuberculosis. Studies from University of Cape Town Have Provided New Data on Tuberculosis (Selected questions and controversies about bedaquiline: a view from the field) … p.8253

Science. Studies from University of Chicago Have Provided New Data on Science (Gene expression in local stroma reflects breast tumor states and predicts patient outcome) … p.8254

Cytoplasmic Structures. Studies from University of Chicago in the Area of Cytoplasmic Structures Described (Role of IQGAP1 in endothelial barrier enhancement caused by OxPAPC) … p.8254

Oncology - Chronic Lymphocytic Leukemia. Studies from University of Cologne Provide New Data on Chronic Lymphocytic Leukemia (State-of-the-Art Treatment and Novel Agents in Chronic Lymphocytic Leukemia) … p.8256

Surgery - Cardiovascular and Thoracic Surgery. Studies from University of Colorado Have Provided New Information about Cardiovascular and Thoracic Surgery (Rapamycin Decreases the Osteogenic Response in Aortic Valve Interstitial Cells Through the Stat3 Pathway) … p.8257

Drugs and Therapies - Antiretrovirals. Studies from University of Colorado in the Area of Antiretrovirals Reported (Analysis of the Endogenous Deoxynucleoside Triphosphate Pool in HIV-Positive and -Negative Individuals Receiving Tenofovir-Emtricitabine) … p.8258

Right Ventricular. Studies from University of Colorado in the Area of Right Ventricular Reported (A Zero-Dimensional Model and Protocol for Simulating Patient-Specific Pulmonary Hemodynamics From Limited Clinical Data) … p.8259

Heart Disorders and Diseases - Atrial Fibrillation. Studies from University of Connecticut Add New Findings in the Area of Atrial Fibrillation (Meta-analysis of ascorbic acid for prevention of postoperative atrial fibrillation after cardiac surgery) … p.8260

Hematology - Perfusion Research. Studies from University of Copenhagen Provide New Data on Perfusion Research (Does depth of the frontal sinus affect near-infrared spectroscopy measurement?) … p.8261

Skin Diseases and Conditions - Rosacea. Studies from University of Copenhagen Reveal New Findings on Rosacea (Nationwide Assessment of Cause-Specific Mortality in Patients with Rosacea: A Cohort Study in Denmark) … p.8261

Health and Medicine - Cardiovascular Disease and Conditions. Studies from University of Douala Reveal New Findings on Cardiovascular Disease and Conditions (Prevalence and factors associated with hyperuricaemia in newly diagnosed and untreated hypertensives in a sub-Saharan African setting) … p.8263
Therapeutics. Studies from University of Dundee Reveal New Findings on Therapeutics (Current perceptions of the term Clinical Pharmacy and its relationship to Pharmaceutical Care: a survey of members of the European Society of Clinical Pharmacy) … p.8264

Cardiovascular Diseases. Studies from University of Edinburgh Have Provided New Information about Cardiovascular Diseases (Large animal models of cardiovascular disease) … p.8265

Drugs and Therapies - Antineoplastics. Studies from University of Edinburgh in the Area of Antineoplastics Described (Irinotecan metabolite SN38 results in germ cell loss in the testis but not in the ovary of prepubertal mice) … p.8266

Blood Pressure. Studies from University of Exeter Have Provided New Data on Blood Pressure (Improvement in blood pressure after short–term inorganic nitrate supplementation is attenuated in cigarette smokers compared to nonsmoking controls) … p.8267

Hormones. Studies from University of Extremadura Further Understanding of Hormones (Melatonin sensitizes human cervical cancer HeLa cells to cisplatin–induced cytotoxicity and apoptosis: effects on oxidative stress and DNA fragmentation) … p.8268

Neurologic Diseases and Conditions - Syncope. Studies from University of Florence in the Area of Syncope Reported (Safety and tolerability of Tilt Testing and Carotid Sinus Massage in the octogenarians) … p.8269

Drugs and Therapies - Antibiotics. Studies from University of Florida Describe New Findings in Antibiotics [Population pharmacokinetics of enrofloxacin in purple sea stars (Pisaster ochraceus) following an intracoelomic injection or extended immersion] … p.8270

Developmental Diseases and Conditions - Attention Deficit Hyperactivity Disorders. Studies from University of Florida Further Understanding of Attention Deficit Hyperactivity Disorders (Development of a refill pattern method to measure polypharmacy in administrative claims databases) … p.8272

Nutritional and Metabolic Diseases and Conditions - Obesity. Studies from University of Florida Further Understanding of Obesity (Dietary Patterns in Relation to General and Central Obesity among Adults in Southwest China) … p.8273

Pharmacogenetics. Studies from University of Florida in the Area of Pharmacogenetics Described (Implementation of inpatient models of pharmacogenetics programs) … p.8274

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). Studies from University of Fudan Have Provided New Information about Phosphotransferases (Alcohol Group Acceptor) (Pyruvate Kinase M2 Activates mTORC1 by Phosphorylating AKT1S1) … p.8275

Drugs and Therapies - Chemotherapy. Studies from University of Grenoble Have Provided New Information about Chemotherapy (Cryptosporidium and Toxoplasma Parasites Are Inhibited by a Benzoxaborole Targeting Leucyl–tRNA Synthetase) … p.8276

Mosquito-Borne Diseases - West Nile Fever. Studies from University of Haifa in the Area of West Nile Fever Described (Transmission Dynamics of the West Nile Virus in Mosquito Vector Populations under the Influence of
January 14, 2017

Weather Factors in the Danube Delta, Romania) … p.8278

Apoptosis. Studies from University of Heidelberg Have Provided New Information about Apoptosis (Inhibition of AXUD1 attenuates compression–dependent apoptosis of cementoblasts) … p.8279

Immune System Diseases and Conditions - HIV/AIDS. Studies from University of Heidelberg in the Area of HIV/AIDS Described (The structure and flexibility of conical HIV–1 capsids determined within intact virions) … p.8280

Drugs and Therapies - Tricyclic Antidepressants. Studies from University of Houston Describe New Findings in Tricyclic Antidepressants [Characterization of Multiple Pathways Modulating Aggression in the Male Clouded Leopard (Neofelis nebulosa)] … p.8281

Sensation Diseases and Conditions - Olfaction Disorders. Studies from University of Iceland Reveal New Findings on Olfaction Disorders (Sniffing out significant “Pee values”genome wide association study of asparagus anosmia) … p.8282

Phenylalanine. Studies from University of Illinois Yield New Information about Phenylalanine [Melphalan 200mg/m(2) in patients with renal impairment is associated with increased short–term toxicity but improved response and longer treatment–free survival] … p.8284

www.NewsRx.com

Oncology - Pancreatic Cancer. Studies from University of Kansas Medical Center Further Understanding of Pancreatic Cancer (Quinomycin A targets Notch signaling pathway in pancreatic cancer stem cells) … p.8285

Membrane Proteins - Immunologic Receptors. Studies from University of Kentucky Have Provided New Information about Immunologic Receptors (Talin2–mediated traction force drives matrix degradation and cell invasion) … p.8286

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Studies from University of Kentucky Yield New Data on Alzheimer Disease (Risk factors and global cognitive status related to brain arteriosclerosis in elderly individuals) … p.8287

Arthroplasty. Studies from University of Kentucky Yield New Information about Arthroplasty (The Location and Severity of Preoperative Subchondral Bone Marrow Lesions Were Not Associated With Inferior Postoperative Outcomes After Medial Unicompartmental Knee) … p.8288

Oncology - Non-Small Cell Lung Cancer. Studies from University of Leicester Describe New Findings in Non–Small Cell Lung Cancer (Mast cell phenotype, TNF alpha expression and degranulation status in non–small cell lung cancer) … p.8289

Cardiovascular Diseases and Conditions - Hypertension. Studies from University of Leipzig Have Provided New Information about Hypertension (Osmotic expression of aldose reductase in retinal pigment epithelial cells: involvement of NFAT5) … p.8290

Photodynamics. Studies from University of Leon Reveal New Findings on Photodynamics (Penetration of 630 nm laser and 5–aminolevulinic acid in tissue with intralesional photodynamic therapy) … p.8291
Bacterial Diseases and Conditions - Gardnerella vaginalis. Studies from University of Liege Further Understanding of Gardnerella vaginalis (Lysozyme as a cotreatment during antibiotics use against vaginal infections: An in vitro study on Gardnerella vaginalis biofilm models) … p.8292

Drugs and Therapies - Pharmacology. Studies from University of Liege Have Provided New Information about Pharmacology (Action of Pitolisant on the stimulant and rewarding effects of cocaine in mice) … p.8293

Oncology - Non-Small Cell Lung Cancer. Studies from University of Lille Add New Findings in the Area of Non–Small Cell Lung Cancer (High–MET status in non–small cell lung tumors correlates with receptor phosphorylation but not with the serum level of soluble form) … p.8294

DNA Research. Studies from University of Lisbon Further Understanding of DNA Research (Genetic variants involved in oxidative stress, base excision repair, DNA methylation, and folate metabolism pathways influence myeloid neoplasias susceptibility and ...) … p.8295

Oncology - Pancreatic Cancer. Studies from University of Liverpool Describe New Findings in Pancreatic Cancer (Chemoresistance in Pancreatic Cancer Is Driven by Stroma–Derived Insulin–Like Growth Factors) … p.8296

Central Nervous System Diseases and Conditions - Epilepsy. Studies from University of Liverpool Have Provided New Data on Epilepsy (Lamotrigine versus carbamazepine monotherapy for epilepsy: an individual participant data review) … p.8297

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from University of Malaya Yield New Data on Type 2 Diabetes [Giant Oyster Mushroom Pleurotus giganteus (Agaricomycetes) Enhances Adipocyte Differentiation and Glucose Uptake via Activation of PPARy and Glucose Transporters 1 and 4 in ...] … p.8299

Gram-Negative Bacteria - Pseudomonas putida. Studies from University of Manchester Provide New Data on Pseudomonas putida [Metabolomics reveals the physiological response of Pseudomonas putida KT2440 (UWC1) after pharmaceutical exposure] … p.8300

Cardiovascular Diseases and Conditions - Aortic Coarctation. Studies from University of Maryland Further Understanding of Aortic Coarctation (Retrospective case series examining the clinical significance of subjective fetal cardiac ventricular disproportion) … p.8301

Heart Disorders and Diseases - Heart Attack. Studies from University of Maryland Have Provided New Information about Heart Attack (Outcomes of extracorporeal cardiopulmonary resuscitation for refractory cardiac arrest in adult cardiac surgery patients) … p.8302

Neurodegenerative Diseases and Conditions - Amyotrophic Lateral Sclerosis. Studies from University of Maryland in the Area of Amyotrophic Lateral Sclerosis Reported (Motor neuron disease, TDP–43 pathology, and memory deficits in mice expressing ALS–FTD–linked UBQLN2 mutations) … p.8303

Oncology - B-Cell Lymphoma. Studies from University of Maryland in the Area of B–Cell Lymphoma Reported (Expression of HIV–1 matrix protein p17 and association with B–cell lymphoma in HIV–1 transgenic mice) … p.8304
Diarylheptanoids. Studies from University of Massachusetts Further Understanding of Diarylheptanoids (Effects of Stable Degradation Products of Curcumin on Cancer Cell Proliferation and Inflammation) ... p.8305

Nursing - Oncology Nursing. Studies from University of Massachusetts Yield New Information about Oncology Nursing (Pain and social processes for hospice cancer patients: An integrative review) ... p.8306

Drug Resistance. Studies from University of Massachusetts in the Area of Drug Resistance Described (Molecular Basis for Differential Patterns of Drug Resistance in Influenza N1 and N2 Neuraminidase) ... p.8307

Drugs and Therapies - Calcium Channel Blocking Agents. Studies from University of Medicine and Dentistry of New Jersey (UMDNJ) in the Area of Calcium Channel Blocking Agents Described (The utility of bolus intravenous nicardipine for hypertensive emergencies in the ED) ... p.8308

Heart Disorders and Diseases - Atrial Fibrillation. Studies from University of Melbourne in the Area of Atrial Fibrillation Described (Alcohol and Atrial Fibrillation A Sobering Review) ... p.8309

Angiology. Studies from University of Miami Jackson Memorial Hospital Describe New Findings in Angiology (Endovascular Coil Embolization in the Treatment of a Rare Case of Post–Traumatic Abdominal Aortic Pseudoaneurysms: Brief Report and Review of ...) ... p.8310

Liver Diseases and Conditions - Hepatitis C Virus. Studies from University of Miami Yield New Data on Hepatitis C Virus (STAT1 is essential for the inhibition of hepatitis C virus replication by interferon–lambda but not by interferon–alpha) ... p.8311

Biotechnology - Genomics. Studies from University of Michigan Have Provided New Information about Genomics (Selection–, age–, and exercise–dependence of skeletal muscle gene expression patterns in a rat model of metabolic fitness) ... p.8312

Acrylates. Studies from University of Michigan Reveal New Findings on Acrylates (Radical–Mediated End–Group Transformation of Amphiphilic Methacrylate Random Copolymers for Modulation of Antimicrobial and Hemolytic Activities) ... p.8313

Oncology - Breast Cancer. Studies from University of Michigan Yield New Data on Breast Cancer (Updates on breast cancer genetics: Clinical implications of detecting syndromes of inherited increased susceptibility to breast cancer) ... p.8314

Stem Cell Research. Studies from University of Milan Further Understanding of Stem Cell Research (Does the Bovine Pre–Ovulatory Follicle Harbor Progenitor Stem Cells?) ... p.8315

Drugs and Therapies - Mitotic Inhibitors. Studies from University of Milan Have Provided New Information about Mitotic Inhibitors (Palmitoylethanolamide Reverses Paclitaxel–Induced Allodynia in Mice) ... p.8316

Cardiology. Studies from University of Minnesota Have Provided New Data on Cardiology (Incidence of Undetectable, Measurable, and Increased Cardiac Troponin I Concentrations Above the 99th Percentile Using a High–Sensitivity vs a Contemporary Assay in ...) ... p.8317

Cardiology. Studies from University of Minnesota Provide New Data on Cardiology (An integrated statistical model for enhanced murine cardiomyocyte differentiation via optimized engagement of 3D extracellular matrices) ... p.8318
Heart Disorders and Diseases - Heart Attack. Studies from University of Minnesota Update Current Data on Heart Attack (Novel resuscitation devices facilitate complete neurologic recovery after prolonged cardiac arrest in postanesthesia care unit) … p.8319

Oncology - Cancer Risk. Studies from University of Minnesota in the Area of Cancer Risk Reported (Effects of green tea catechin extract on serum lipids in postmenopausal women: a randomized, placebo–controlled clinical trial) … p.8320

Cardiovascular Diseases and Conditions - Hypertension. Studies from University of Minnesota in the Area of Hypertension Described (Angiotensin II–Induced Hypertension Is Attenuated by Overexpressing Copper/Zinc Superoxide Dismutase in the Brain Organum Vasculosum of the Lamina Terminalis) … p.8321

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from University of Missouri Have Provided New Data on Atherosclerosis [TRAF3IP2 mediates atherosclerotic plaque development and vulnerability in ApoE(−/−) mice] … p.8323

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Studies from University of Montpellier Reveal New Findings on Rheumatoid Arthritis (X–Linked miRNAs Associated with Gender Differences in Rheumatoid Arthritis) … p.8324

Liver Diseases and Conditions - Hepatitis C Virus. Studies from University of Montreal in the Area of Hepatitis C Virus Described (Novel E2 Glycoprotein Tetramer Detects Hepatitis C Virus–Specific Memory B Cells) … p.8325

Musculoskeletal Diseases and Conditions - Osteoporosis. Studies from University of Nantes Have Provided New Data on Osteoporosis (Inhibition of BET proteins and epigenetic signaling as a potential treatment for osteoporosis) … p.8326

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from University of Naples Federico II Update Current Data on Atherosclerosis (A Prospective Natural History Study of Coronary Atherosclerosis Using Fractional Flow Reserve) … p.8327

Heart Disorders and Diseases - Heart Failure. Studies from University of Navarra Describe New Findings in Heart Failure (The personal experience of living with chronic heart failure: a qualitative meta–synthesis of the literature) … p.8328

Drugs and Therapies - Drug Delivery Systems. Studies from University of Navarra Have Provided New Data on Drug Delivery Systems (EGF–liposomes promote efficient EGFR targeting in xenograft colorectal carcinoma model) … p.8329

Behavior Research - Aggressive Behavior Research. Studies from University of Nebraska Yield New Data on Aggressive Behavior Research (Measuring Individual Differences in Responses to Date–Rape Vignettes Using Latent Variable Models) … p.8330

Immune System Diseases and Conditions - HIV/AIDS. Studies from University of North Carolina Further Understanding of HIV/AIDS (Recruiting the social contacts of patients with STI for HIV screening in Lilongwe, Malawi: process evaluation
Lung Diseases. Studies from University of North Carolina Have Provided New Data on Lung Diseases (Short Palate, Lung, and Nasal Epithelial Clone 1 Has Antimicrobial and Antibiofilm Activities against the Burkholderia cepacia Complex) … p.8332

Oncology - Cancer Care. Studies from University of North Carolina Yield New Data on Cancer Care (The influence of dyadic symptom distress on threat appraisals and self–efficacy in advanced cancer and caregiving) … p.8333

Clinical Research - Clinical Trials and Studies. Studies from University of North Carolina Yield New Information about Clinical Trials and Studies [The electronic medication complete communication (EMC2) study: Rationale and methods for a randomized controlled trial of a strategy to promote …] … p.8334

Proteins - Nucleoproteins. Studies from University of North Carolina Yield New Information about Nucleoproteins (Molecular Recognition of Lys and Arg Methylation) … p.8335

DNA Research. Studies from University of North Carolina in the Area of DNA Research Described (The Rb binding domain of HPV31 E7 is required to maintain high levels of DNA repair factors in infected cells) … p.8336

DNA Research. Studies from University of North Carolina in the Area of DNA Research Reported (Investigating the impacts of DNA binding mode and sequence on thermodynamic quantities and water exchange values for two small molecule drugs) … p.8337

Drugs and Therapies - Indomethacin Therapy. Studies from University of Nottingham Have Provided New Information about Indomethacin Therapy (Indomethacin–Kollidon VA64 Extrudates: A Mechanistic Study of pH–Dependent Controlled Release) … p.8338

Oncology - Gallbladder Cancer. Studies from University of Oklahoma Yield New Data on Gallbladder Cancer (MicroRNA aberrations: An emerging field for gallbladder cancer management) … p.8339

Heart Disorders and Diseases - Patent Foramen Ovale. Studies from University of Oregon Have Provided New Information about Patent Foramen Ovale (Physiological impact of patent foramen ovale on pulmonary gas exchange, ventilatory acclimatization, and thermoregulation) … p.8342

Blood Pressure. Studies from University of Oslo Further Understanding of Blood Pressure (Cardiac stroke volume variability measured non–invasively by three methods for detection of central hypovolemia in healthy humans) … p.8344

Oncology - Neuroendocrine Cancer. Studies from University of Oxford Provide New Data on Neuroendocrine Cancer (Changes in the Epidemiology of Neuroendocrine Tumours) … p.8344

Membrane Proteins - G-Protein-Coupled Receptors. Studies from University of Paris Yield New Information about G–Protein–Coupled Receptors (STR–324, a Stable Analog of Opiorphin, Causes Analgesia in Postoperative Pain by Activating Endogenous Opioid Receptor–dependent Pathways) … p.8344
Oncology - Germ Cell Cancer. Studies from University of Paris–Sud Add New Findings in the Area of Germ Cell Cancer (Predicting and preventing thromboembolic events in patients receiving cisplatin–based chemotherapy for germ cell tumours) … p.8346

Heart Disorders and Diseases - Arrhythmogenic Right Ventricular Dysplasia. Studies from University of Pavia Have Provided New Information about Arrhythmogenic Right Ventricular Dysplasia (Arrhythmogenic Right Ventricular Cardiomyopathy Clinical Course and Predictors of Arrhythmic Risk) … p.8347

Digestive System Diseases and Conditions - Barrett Esophagus. Studies from University of Pennsylvania in the Area of Barrett Esophagus Reported (Is Obesity Associated with Barrett's Esophagus and Esophageal Adenocarcinoma?) … p.8348

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from University of Pretoria Yield New Information about Type 2 Diabetes (Metformin and Vitamin B12 Deficiency: Where Do We Stand?) … p.8349

Oncology - Melanoma. Studies from University of Queensland in the Area of Melanoma Described (Heritability of naevus patterns in an adult twin cohort from the Brisbane Twin Registry: a cross–sectional study) … p.8350

Cholesterol. Studies from University of Regensburg Provide New Data on Cholesterol (High–fat diet prevents adaptive peripartum–associated adrenal gland plasticity and anxiolysis) … p.8351

Eye Diseases and Conditions - Choroidal Neovascularization. Studies from University of Regensburg Yield New Data on Choroidal Neovascularization (Epithelial–mesenchymal transition of the retinal pigment epithelium causes choriocapillaris atrophy) … p.8352

Central Nervous System Diseases and Conditions - Holoprosencephaly. Studies from University of Rennes in the Area of Holoprosencephaly Described (Mutational Spectrum in Holoprosencephaly Shows That FGF is a New Major Signaling Pathway) … p.8353

Oncology - Cancer Risk. Studies from University of Rhode Island in the Area of Cancer Risk Described (Polycyclic Aromatic Hydrocarbon Contamination in Soils of San Mateo Ixtatan, Guatemala: Occurrence, Sources, and Health Risk Assessment) … p.8354

Autoimmune Diseases and Conditions - Multiple Sclerosis. Studies from University of Rostock Have Provided New Information about Multiple Sclerosis (Disease–modifying therapies and infectious risks in multiple sclerosis) … p.8355

Life Science Research - Cell Endocrinology. Studies from University of Sao Paulo Have Provided New Data on Cell Endocrinology (Brain STAT5 signaling and behavioral control) … p.8356

Surgery - Nephrolithotomy. Studies from University of Sao Paulo Have Provided New Information about Nephrolithotomy (Percutaneous Nephrolithotomy in Immunocompromised Patients: Outcomes from a Matched Case–Control Study) … p.8357

Oncology - Liver Cancer. Studies from University of Science and Technology Update Current Data on Liver Cancer (Artemin is hypoxia responsive and promotes oncogenicity and increased tumor initiating capacity in hepatocellular carcinoma) … p.8359

Oncology - Colon Cancer. Studies from University of Shandong Reveal New Findings on Colon Cancer (Protein–protein interaction networks and modules analysis for colorectal cancer and serrated adenocarcinoma) … p.8360

Drugs and Therapies - Cancer Therapy. Studies from University of Shizuoka Add New Findings in the Area of Cancer Therapy (The use of surfactants to enhance the solubility and stability of the water–insoluble anticancer drug SN38 into liquid crystalline phase nanoparticles) … p.8361

Drugs and Therapies - Pharmaceutical Research. Studies from University of Shizuoka Have Provided New Data on Pharmaceutical Research (Oral sustained–release suspension based on a lauryl sulfate salt/complex) … p.8362

Drugs and Therapies - Pharmacoepidemiology and Drug Safety. Studies from University of Southampton Provide New Data on Pharmacoepidemiology and Drug Safety (Comparability of the age and sex distribution of the UK Clinical Practice Research Datalink and the total Dutch population) … p.8363

Cardiovascular Diseases. Studies from University of Southern Florida Yield New Data on Cardiovascular Diseases (Pregnancy as a window to future health: maternal placental syndromes and short-term cardiovascular outcomes) … p.8364

Heart Disorders and Diseases - Heart Disease. Studies from University of Strathclyde Add New Findings in the Area of Heart Disease (Daily milk consumption and all–cause mortality, coronary heart disease and stroke: a systematic review and meta–analysis of observational cohort studies) … p.8365

Mouth Disease and Conditions - Cleft Lip and Palate. Studies from University of Sydney Have Provided New Information about Cleft Lip and Palate (Recurrence of Split Hand/Foot Malformation, Cleft Lip/Palate, and Severe Urogenital Abnormalities due to Germline Mosaicism for TP63 Mutation) … p.8366

Oncology - Cancer Risk. Studies from University of Sydney Provide New Data on Cancer Risk (International survey of awareness of genetic risk in the clinical sarcoma community) … p.8367

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from University of Sydney Yield New Information about Atherosclerosis (The Role of CC–Chemokines in the Regulation of Angiogenesis) … p.8368

Drugs and Therapies - Antibiotics. Studies from University of Tasmania Have Provided New Information about Antibiotics (Antimicrobial drug use in primary healthcare clinics: a retrospective evaluation) … p.8370

Triterpenes. Studies from University of Technology Have Provided New Information about Triterpenes [Drug–eluting coating of ginsenoside Rg1 and Re incorporated poly (lactic–co–glycolic acid) on stainless steel 316L: Physicochemical and drug release analyses] … p.8371
Catheterization. Studies from University of Tennessee Have Provided New Data on Catheterization (Gaining a New Skill With the Risk of Losing One: The Effect of 195 Radial Catheterization) ... p.8372

Therapeutics. Studies from University of Tennessee in the Area of Therapeutics Described (Drug therapy problems and medication discrepancies during care transitions in super–utilizers) ... p.8373

Drugs and Therapies - Behavioural Pharmacology. Studies from University of Texas Health Science Center Describe New Findings in Behavioural Pharmacology (Effect of daily morphine administration and its discontinuation on delay discounting of food in rhesus monkeys) ... p.8375

Drugs and Therapies - Smoking Cessation Agents. Studies from University of Texas Health Science Center Further Understanding of Smoking Cessation Agents (Differential antagonism and tolerance/cross–tolerance among nicotinic acetylcholine receptor agonists: scheduled–controlled responding and ...) ... p.8376

Clinical Research - Clinical Trials and Studies. Studies from University of Texas Southwestern Describe New Findings in Clinical Trials and Studies (Glutathione Depletion, Pentose Phosphate Pathway Activation, and Hemolysis in Erythrocytes Protecting Cancer Cells from Vitamin C–induced ...) ... p.8377

www.NewsRx.com

Drugs and Therapies - Clopidogrel Therapy. Studies from University of Texas Southwestern Have Provided New Data on Clopidogrel Therapy [Oral P2Y(12) Receptor Inhibitors in Hemodialysis Patients Undergoing Percutaneous Coronary Interventions: Current Knowledge and Future Directions] ... p.8378

Palliative and Supportive Care. Studies from University of Texas Update Current Data on Palliative and Supportive Care (Referral criteria for outpatient specialty palliative cancer care: an international consensus) ... p.8379

Hematologic Diseases and Conditions - Polycythemia. Studies from University of Texas Update Current Data on Polycythemia (Drug Development Pipeline for Myeloproliferative Neoplasms: Potential Future Impact on Guidelines and Management) ... p.8380

Oncology - Bone Cancer. Studies from University of Tokyo Yield New Data on Bone Cancer (Dual Therapeutic Action of a Neutralizing Anti–FGF2 Aptamer in Bone Disease and Bone Cancer Pain) ... p.8381

Surgery - General Surgery. Studies from University of Tokyo in the Area of General Surgery Described (Anatomy of the middle rectal artery: a review of the historical literature) ... p.8381

Pancreatic Cysts. Studies from University of Tokyo in the Area of Pancreatic Cysts Reported (Pancreatic cysts in general population on ultrasonography: Prevalence and development of risk score) ... p.8382

Biotechnology - Molecular Pharmaceutics. Studies from University of Torino in the Area of Molecular Pharmaceutics Described (A Fast Chromatographic Method for Estimating Lipophilicity and Ionization in Nonpolar Membrane–Like Environment) ... p.8383
January 14, 2017

Immunology - Immunoproteins. Studies from University of Toronto Add New Findings in the Area of Immunoproteins (Use of intravenous immunoglobulin in neonates at a tertiary academic hospital: a retrospective 11-year study) … p.8384

Surgery - Nephrectomy. Studies from University of Toronto Add New Findings in the Area of Nephrectomy (Morbidity and Mortality of Radical Nephrectomy for Patients With Disseminated Cancer: An Analysis of the National Surgical Quality Improvement Program Database) … p.8385

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Studies from University of Toronto Have Provided New Data on Chronic Hepatitis B Virus [Prevalence and risk factors for viral blipping in chronic hepatitis B patients treated with nucleos (t) ide analogues] … p.8386

Oncology - Breast Cancer. Studies from University of Toronto Yield New Information about Breast Cancer (Clinical outcomes of modelling mammography screening strategies) … p.8387

Oncology - Osteosarcomas. Studies from University of Tsukuba Have Provided New Information about Osteosarcomas (Morphological and Mechanical Properties of Osteosarcoma Microenvironment Cells Explored by Atomic Force Microscopy) … p.8388

Women's Health - Obstetrics and Gynecology. Studies from University of Tubingen Update Current Data on Obstetrics and Gynecology (IRIS – An Internet Based Intervention as a Suitable Path to Addictive Substance Use Prevention and Counselling in Pregnancy? Beneficiary Profiles and User ...) … p.8389

Oncology - Cutaneous T-Cell Lymphoma. Studies from University of Turin Add New Findings in the Area of Cutaneous T-Cell Lymphoma (Human Endogenous Retrovirus Expression in Primary Cutaneous T-Cell Lymphomas) … p.8390

Oncology - Breast Cancer. Studies from University of Udine Update Current Data on Breast Cancer (A Simple and Effective Technique of Breast Remodelling After Conserving Surgery for Lower Quadrants Breast Cancer) … p.8391

Central Nervous System Diseases and Conditions - Epilepsy. Studies from University of Utah Yield New Information about Epilepsy (Transcranial magnetic stimulation for the treatment of epilepsy) … p.8392

Science. Studies from University of Utah in the Area of Science Described (A cloud-based workflow to quantify transcript-expression levels in public cancer compendia) … p.8394

Pharmacotherapy. Studies from University of Valencia Yield New Data on Pharmacotherapy (Neurochemical substrates of the rewarding effects of MDMA: implications for the development of pharmacotherapies to MDMA dependence) … p.8395

Lung Diseases and Conditions - Acute Lung Injury. Studies from University of Vienna Yield New Information about Acute Lung Injury (The total alkaloid fraction of bulbs of Fritillaria cirrhosa displays anti-inflammatory activity and attenuates acute lung injury) … p.8396

Eye Diseases and Conditions - Retinitis Pigmentosa. Studies from University of Virginia Reveal New Findings on Retinitis Pigmentosa [Palmitoylation of Progressive Rod–Cone Degeneration (PRCD) Regulates Protein Stability and Localization] … p.8397
Graphical Models. Studies from University of Virginia in the Area of Graphical Models Reported (Identifying gene regulatory network rewiring using latent differential graphical models) ... p.8398

Transplant Medicine - Cell Transplants. Studies from University of Washington Describe New Findings in Cell Transplants (Up-to-date tools for risk assessment before allogeneic hematopoietic cell transplantation) ... p.8399

Heart Disorders and Diseases - Atrial Fibrillation. Studies from University of Washington Provide New Data on Atrial Fibrillation (New perspectives on atrial fibrillation and stroke) ... p.8400

Oncology - Carcinomas. Studies from University of Washington Provide New Data on Carcinomas (Neoplastic cellularity is associated with clinical and molecular features of high-grade serous ovarian carcinoma) ... p.8401

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Studies from University of Washington Update Current Data on Venous Thromboembolism (Preventing Hospital–Acquired Venous Thromboembolism: Improving Patient Safety With Interdisciplinary Teamwork, Quality Improvement Analytics, and Data ...) ... p.8402

DNA Research. Studies from University of Washington in the Area of DNA Research Described (Biomarkers of Response and Resistance to DNA Repair Targeted Therapies) ... p.8403

Blood Pressure. Studies from University of Western Australia in the Area of Blood Pressure Reported (Effect of omega–3 fatty acid supplementation on arterial elasticity in patients with familial hypercholesterolaemia on statin therapy) ... p.8404

Nutritional and Metabolic Diseases and Conditions - Hypercholesterolemia. Studies from University of Western Ontario Have Provided New Data on Hypercholesterolemia (Polygenic Versus Monogenic Causes of Hypercholesterolemia Ascertained Clinically) ... p.8405

Drugs and Therapies - Cancer Therapy. Studies from University of Western Sydney Update Current Data on Cancer Therapy (Transition Metal Intercalators as Anticancer Agents–Recent Advances) ... p.8406

beta-Lactams. Studies from University of Witwatersrand in the Area of beta–Lactams Reported (Molecular detection of carbapenemase–producing genes in referral Enterobacteriaceae in South Africa: A short report) ... p.8407

Drugs and Therapies - Toxicology and Pharmacology. Studies from University of Wurzburg in the Area of Toxicology and Pharmacology Reported (Assessment of reproductive and developmental effects of DINP, DnHP and DCHP using quantitative weight of evidence) ... p.8408

Autoimmune Diseases and Conditions - Psoriatic Arthritis. Studies from University of York Describe New Findings in Psoriatic Arthritis (A discrete choice experiment to explore patients' willingness to risk disease relapse from treatment withdrawal in psoriatic arthritis) ... p.8409

Cardiovascular Diseases and Conditions - Aneurysm. Studies from University of Zurich Provide New Data on Aneurysm (Safety and effectiveness of large volume coils in the treatment of small aneurysms) ... p.8410

Gram-Positive Bacteria - Staphylococcus aureus. Studies from University of Zurich in the Area of Staphylococcus aureus Described (Modulation of Staphylococcus aureus Biofilm Matrix by Subinhibitory Concentrations of Clindamycin) ... p.8411
Oncology - Breast Cancer. Studies from University of the Pacific Add New Findings in the Area of Breast Cancer (Expanding the view of breast cancer metabolism: Promising molecular targets and therapeutic opportunities) … p.8412

Cardiovascular Diseases. Studies from Uppsala University Yield New Information about Cardiovascular Diseases (Effects of cigarette smoking on cardiovascular–related protein profiles in two community–based cohort studies) … p.8412

Mental Health Diseases and Conditions - Postpartum Depression. Studies from Uppsala University in the Area of Postpartum Depression Described [Associations between a polymorphism in the hydroxysteroid (11–beta) dehydrogenase 1 gene, neuroticism and postpartum depression] … p.8414

Pelvic Organ Prolapse. Studies from Vanderbilt University Provide New Data on Pelvic Organ Prolapse (Genetic Determinants of Pelvic Organ Prolapse among African American and Hispanic Women in the Women's Health Initiative) … p.8416

Drugs and Therapies - Chemotherapy. Studies from Vesalius Research Center in the Area of Chemotherapy Described (Inhibition of the Glycolytic Activator PFKFB3 in Endothelium Induces Tumor Vessel Normalization, Impairs Metastasis, and Improves Chemotherapy) … p.8417

www.NewsRx.com

Oncology - Liver Cancer. Studies from Veterans Affairs Medical Center Add New Findings in the Area of Liver Cancer (Effectiveness of surveillance for hepatocellular carcinoma in clinical practice: A United States cohort) … p.8418

Heart Disorders and Diseases - Bradycardia. Studies from Veterans Affairs Medical Center Have Provided New Data on Bradycardia (Sleep–disordered breathing and daytime cardiac conduction abnormalities on 12–lead electrocardiogram in community–dwelling older men) … p.8419

Alcohol-Induced Diseases and Conditions - Alcoholic Hepatitis. Studies from Veterans Affairs Medical Center in the Area of Alcoholic Hepatitis Described (Effects of Age, Sex, Body Weight, and Quantity of Alcohol Consumption on Occurrence and Severity of Alcoholic Hepatitis) … p.8420

Silicon. Studies from Voronezh State University in the Area of Silicon Reported (Study of the deposition process of vinpocetine on the surface of porous silicon) … p.8421

Surgical Procedures - Gastrointestinal Endoscopy. Studies from W. Dolak and Co–Researchers Yield New Data on Gastrointestinal Endoscopy (A retrospective study on the safety, diagnostic yield, and therapeutic effects of endoscopic unroofing for small gastric subepithelial tumors) … p.8422

Drugs and Therapies - Pharmacology. Studies from W.B. Shen and Co–Researchers Yield New Data on Pharmacology (Discovery of a new structural class of competitive hDHODH inhibitors with in vitro and in vivo anti–inflammatory, immunosuppressive effects) … p.8423
January 14, 2017

Gram-Negative Bacteria - Enterobacteriaceae. Studies from Wageningen University Reveal New Findings on Enterobacteriaceae (Molecular Characterization of Extended–Spectrum–Cephalosporin–Resistant Enterobacteriaceae from Wild Kelp Gulls in South America) … p.8424

Cardiovascular Research. Studies from Washington University Further Understanding of Cardiovascular Research (Knowledge Gaps in Cardiovascular Care of Older Adults: A Scientific Statement from the American Heart Association, American College of Cardiology, and American ...) … p.8425

Oncology - Acute Myeloid Leukemia. Studies from Washington University School of Medicine Yield New Information about Acute Myeloid Leukemia (Targeting the leukemia–stroma interaction in acute myeloid leukemia: rationale and latest evidence) … p.8426

Drugs and Therapies - Immunotherapy. Studies from Washington University School of Medicine in the Area of Immunotherapy Described (Improving natural killer cell cancer immunotherapy) … p.8427

Life Science Research - Plant Physiology. Studies from Wayne State University Reveal New Findings on Plant Physiology (Evolutionary Fates and Dynamic Functionalization of Young Duplicate Genes in Arabidopsis Genomes) … p.8428

Drugs and Therapies - Antifungals. Studies from Wayne State University Update Current Data on Antifungals (Adverse effects of voriconazole: Over a decade of use) … p.8429

Life Science Research - Cell Biology. Studies from Wayne State University in the Area of Cell Biology Described (GAPDH binds Akt to facilitate cargo transport in the early secretory pathway) … p.8430

www.NewsRx.com

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies from Weill Cornell Medical College Have Provided New Data on Type 2 Diabetes (Novel Anti–glycemic Drugs and Reduction of Cardiovascular Risk in Diabetes: Expectations Realized, Promises Unmet) … p.8431

Drugs and Therapies - Chemotherapy. Studies from Weill Cornell Medical College Update Current Data on Chemotherapy (Intraperitoneal chemotherapy after interval debulking surgery for advanced–stage ovarian cancer: Feasibility and outcomes at a comprehensive cancer center) … p.8432

Oncology - Gliomas. Studies from Weill Cornell Medical College Yield New Information about Gliomas (Repeat surgery for recurrent low–grade gliomas should be standard of care) … p.8433

Membrane Proteins - Porins. Studies from Wenzhou Medical University Describe New Findings in Porins (Differential Expression of Aquaporins in Cervical Precursor Lesions and Invasive Cervical Cancer) … p.8434

Drugs and Therapies - Bosentan Therapy. Studies from Wenzhou Medical University Provide New Data on Bosentan Therapy (Simultaneous Determination of Bosentan, Glimepiride, HYBOS and M1 in Rat Plasma by UPLC–MS–MS and its Application to Pharmacokinetic Study) … p.8435

Science. Studies from West China Second University Hospital Have Provided New Data on Science (Irisin promotes osteoblast proliferation and differentiation via activating the MAP kinase signaling pathways) … p.8436

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from Western University Have Provided New Information about Atherosclerosis (Trimethylamine–N–oxide: a link between the gut microbiome, bile acid metabolism, and atherosclerosis)
Nutritional and Metabolic Diseases and Conditions - Dyslipidemias. Studies from Western University Have Provided New Information about Dyslipidemias (Proprietary Considerations in the Use of Cardiovascular Genetic Data) … p.8438

Cardiovascular Diseases and Conditions - Atherosclerosis. Studies from Wroclaw University Yield New Data on Atherosclerosis [Iridoid–loganic acid versus anthocyanins from the Cornus mas fruits (cornelian cherry): Common and different effects on diet–induced atherosclerosis, PPARs expression and …] … p.8439

Cardiovascular Diseases and Conditions - Hypertension. Studies from Xi'an Jiao Tong University Describe New Findings in Hypertension (Exercise training attenuates renovascular hypertension partly via RAS–ROS–glutamate pathway in the hypothalamic paraventricular nucleus) … p.8441

Oncology - Liver Cancer. Studies from Xi'an Jiao Tong University Further Understanding of Liver Cancer [Preoperative aspartate aminotransferase–to–platelet ratio index (APRI) is a predictor on postoperative outcomes of hepatocellular carcinoma] … p.8442

Biological Factors - Endotoxins. Studies from Xi'an Jiao Tong University Have Provided New Data on Endotoxins (Esculin attenuates endotoxin shock induced by lipopolysaccharide in mouse and NO production in vitro through inhibition of NF–kappa B activation) … p.8443

Drugs and Therapies - Drug Delivery Systems. Studies from Xi'an Medical University Have Provided New Data on Drug Delivery Systems (Rapid and efficient crossing, blood–brain barrier: Hydrophobic drug delivery system based on propionylated amylose helix nanoclusters) … p.8444

Necroptosis. Studies from Xiamen University Yield New Information about Necroptosis (Hsp90 modulates the stability of MLKL and is required for TNF–induced necroptosis) … p.8445

Health and Medicine - Medicinal Chemistry. Studies from Y. Manse et al Have Provided New Data on Medicinal Chemistry (Melanogenesis inhibitory activity of a 7–O–9 –linked neolignan from Alpinia galanga fruit) … p.8446

Gram-Negative Bacteria - Enterobacter cloacae. Studies from Y.Y. Cai et al in the Area of Enterobacter cloacae Described (In Vitro Activity of Polymyxin B in Combination with Various Antibiotics against Extensively Drug–Resistant Enterobacter cloacae with Decreased Susceptibility to …) … p.8447

Cardiovascular Diseases. Studies from Yale University Have Provided New Data on Cardiovascular Diseases (Comprehensive Strategies to Reduce Readmissions in Older Patients With Cardiovascular Disease) … p.8449

Prostheses. Studies from Yang Ming National University Yield New Information about Prostheses (Risk of infection is associated more with drain duration than daily drainage volume in prosthesis–based breast reconstruction A cohort study) … p.8450
Clinical Research - Clinical Trials and Studies. Studies from Yeditepe University School of Medicine Yield New Data on Clinical Trials and Studies (Effects of a fentanyl–propofol mixture on propofol injection pain: a randomized clinical trial) ... p.8451

Drugs and Therapies - Antimicrobials. Studies from Yeungnam University Describe New Findings in Antimicrobials (Antimicrobial bioactive compounds from marine algae: A mini review) ... p.8452

Heart Disorders and Diseases - Heart Attack. Studies from Yokohama City University Further Understanding of Heart Attack (Association between epicardial adipose tissue volume and myocardial salvage in patients with a first ST–segment elevation myocardial infarction: An epicardial adipose ...) ... p.8452

Oncology - Colon Cancer. Studies from Yokohama City University Update Current Data on Colon Cancer (Anticancer effect of linalool via cancer–specific hydroxyl radical generation in human colon cancer) ... p.8453

Drugs and Therapies - Antineoplastic Monoclonal Antibodies. Studies from Yonsei University Yield New Data on Antineoplastic Monoclonal Antibodies (Treatment preferences of advanced ovarian cancer patients for adding bevacizumab to first–line therapy) ... p.8455

Leukocyte Diseases and Conditions - Leukocytosis. Studies from Yonsei University Yield New Information about Leukocytosis (Tumor–related leukocytosis is associated with poor radiation response and clinical outcome in uterine cervical cancer patients) ... p.8456

Oncology - Lung Cancer. Studies from Z.B. Song and Colleagues Yield New Information about Lung Cancer (Clinicopathologic characteristics, genetic variability and therapeutic options of RET rearrangements patients in lung adenocarcinoma) ... p.8457

Oncology - Ovarian Cancer. Studies from Z.H. Wang and Colleagues Provide New Data on Ovarian Cancer (Research Progress of MicroRNA in Early Detection of Ovarian Cancer) ... p.8458

Oncology - Gastric Cancer. Studies from Zhejiang Chinese Medical University Reveal New Findings on Gastric Cancer [Deacetylisonovaltratum disrupts microtubule dynamics and causes G (2)/M–phase arrest in human gastric cancer cells in vitro] ... p.8459

Proteins - DNA-Binding Proteins. Studies from Zhejiang University Add New Findings in the Area of DNA–Binding Proteins (Activation of liver X receptor attenuates lysophosphatidylcholine–induced IL–8 expression in endothelial cells via the NF–kappa B pathway and SUMOylation) ... p.8460

Oncology - Breast Cancer. Studies from Zhejiang University Update Current Data on Breast Cancer (The Role of E–cadherin–160C/A Polymorphism in Breast Cancer) ... p.8462

Drugs and Therapies - Docetaxel Therapy. Studies from Zhejiang University Update Current Data on Docetaxel Therapy (Sequentially dual–targeting vector with nano–in–micro structure for improved docetaxel oral delivery in vivo) ... p.8463
Inflammation. Studies from Zhejiang University of Technology in the Area of Inflammation Described (From the Cover: Exposure to Oral Antibiotics Induces Gut Microbiota Dysbiosis Associated with Lipid Metabolism Dysfunction and Low–Grade Inflammation in Mice) … p.8463

Hela Cells. Studies from Zhengzhou University Describe New Findings in Hela Cells (Inhibition of Cervical Cancer by Promoting IGFBP7 Expression Using Ellagic Acid from Pomegranate Peel) … p.8465

Heart Disorders and Diseases - Tetralogy of Fallot. Studies from Zhengzhou University Have Provided New Data on Tetralogy of Fallot (Application of array–comparative genomic hybridization in tetralogy of Fallot) … p.8466

Oncology - Esophageal Cancer. Studies from Zhengzhou University Provide New Data on Esophageal Cancer (Human papillomavirus–related esophageal cancer survival A systematic review and meta–analysis) … p.8467

Gynecology. Studies from Zhengzhou University Yield New Information about Gynecology (Effect of Pregnane X Receptor*1B genetic polymorphisms on postoperative analgesia with fentanyl in Chinese patients undergoing gynecological surgery) … p.8467

Drugs and Therapies - Antibiotics. Studies from Zunyi Medical University Describe New Findings in Antibiotics (NQO1 and CYP450 reductase decrease the systemic exposure of rifampicin–quinone and mediate its redox cycle in rats) … p.8468

Oncology - Acute Myeloid Leukemia. Studies in the Area of Acute Myeloid Leukemia Reported from Peking University (IGK with conserved IGKV/IGKJ repertoire is expressed in acute myeloid leukemia and promotes leukemic cell migration) … p.8470

Oncology - Adult T-Cell Leukemia-Lymphoma. Studies in the Area of Adult T–Cell Leukemia–Lymphoma Reported from University of Tokyo (Dysregulation of c–Myb Pathway by Aberrant Expression of Proto–oncogene MYB Provides the Basis for Malignancy in Adult T–cell Leukemia/lymphoma Cells) … p.8471

Anions. Studies in the Area of Anions Reported from Harvard School of Medicine (Acute Phosphate Restriction Impairs Bone Formation and Increases Marrow Adipose Tissue in Growing Mice) … p.8473

Membrane Proteins - Antimicrobial Cationic Peptides. Studies in the Area of Antimicrobial Cationic Peptides Reported from Wayne State University (Are there any ways around the exposure–limiting nephrotoxicity of the polymyxins?) … p.8474

Atorvastatin. Studies in the Area of Atorvastatin Reported from Istanbul University (Atorvastatin acutely reduces the reactivity to spasmogens in rat aorta: implication of the inhibition of geranylgeranylation and MYPT–1 phosphorylation) … p.8477

Heart Disorders and Diseases - Atrial Fibrillation. Studies in the Area of Atrial Fibrillation Reported from Department of Biophysics (Treatment Planning Studies in Patient Data With Scanned Carbon Ion Beams for Catheter–Free Ablation of Atrial Fibrillation) … p.8478

Heart Disorders and Diseases - Atrial Fibrillation. Studies in the Area of Atrial Fibrillation Reported from Kumamoto University (Prevalence and mechanism of rotor activation identified during atrial fibrillation by noncontact mapping: Lack of evidence for a role in the maintenance of atrial ...) … p.8479

Heart Disorders and Diseases - Atrial Fibrillation. Studies in the Area of Atrial Fibrillation Reported from Virginia Commonwealth University (Factors Influencing Diaphragmatic Compound Motor Action Potentials During Cryoballoon Ablation for Atrial Fibrillation) … p.8480

Transfusion Medicine - Blood Transfusion. Studies in the Area of Blood Transfusion Reported from University of Tel Aviv (How Long Is Safe? Setting the Cutoff for Uncomplicated Third Stage Length: A Retrospective Case–Control Study) … p.8482

Oncology - Breast Cancer. Studies in the Area of Breast Cancer Reported from Institute of Clinical Oncology (The phenomenon of acquired resistance to metformin in breast cancer cells: The interaction of growth pathways and estrogen receptor signaling) … p.8483

Biotechnology - Cancer Gene Therapy. Studies in the Area of Cancer Gene Therapy Reported from University of Nice Sophia–Antipolis (Pathologists and liquid biopsies: to be or not to be?) … p.8484

Oncology - Cancer Prevention. Studies in the Area of Cancer Prevention Reported from University of Massachusetts (Health literacy–listening skill and patient questions following cancer prevention and screening discussions) … p.8485

Drugs and Therapies - Cardiovascular Agents. Studies in the Area of Cardiovascular Agents Reported from University of Bern [Antiarrhythmic Action of Flecainide in Polymorphic Ventricular Arrhythmias Caused by a Gain–of–Function Mutation in the Na(v) 1.5 Sodium Channel] … p.8487

Cardiovascular Diseases. Studies in the Area of Cardiovascular Diseases Reported from University of Western Ontario [Emerging Therapeutic Options for Lowering of Lipoprotein(a): Implications for Prevention of Cardiovascular Disease] … p.8488

Life Science Research - Cell Biology. Studies in the Area of Cell Biology Reported from Baylor University College of Medicine (Circadian Homeostasis of Liver Metabolism Suppresses Hepatocarcinogenesis) … p.8490
January 14, 2017

Life Science Research - Cell Biology. Studies in the Area of Cell Biology Reported from Charles University (Shikonin regulates C–MYC and GLUT1 expression through the MST1–YAP1–TEAD1 axis) … p.8491

Drugs and Therapies - Clinical Pharmacology. Studies in the Area of Clinical Pharmacology Reported from Maastricht University Hospital (A comparison of the intrasubject variation in drug exposure between generic and brand–name drugs: a retrospective analysis of replicate design trials) … p.8493

Clinical Research - Clinical Trials and Studies. Studies in the Area of Clinical Trials and Studies Reported from University of Bordeaux (Targeted therapy and elderly people: A review) … p.8494

Oncology - Colon Cancer. Studies in the Area of Colon Cancer Reported from Fujian Medical University (Correlational research of Golgi phosphorylation protein 3 expression in colorectal cancer) … p.8495

Herpesvirus Diseases and Conditions - Cytomegalovirus. Studies in the Area of Cytomegalovirus Reported from Chang Gung University (The clinical characteristics and manifestations of cytomegalovirus esophagitis) … p.8496

Drugs and Therapies - Drug Resistance. Studies in the Area of Drug Resistance Reported from Kangwon National University (Histone Deacetylase–3/CAGE Axis Targets EGFR Signaling and Regulates the Response to Anti–Cancer Drugs) … p.8498

Dysplasia. Studies in the Area of Dysplasia Reported from Baylor University College of Medicine (Phenotypic Expansion of TBX4 Mutations to Include Acinar Dysplasia of the Lungs) … p.8499

Hormones - Estradiol Congeners. Studies in the Area of Estradiol Congeners Reported from University of Cape Town (Anthropometric Measurements, Serum Reproductive Hormonal Levels and Sexual Development among Boys in the Rural Western Cape, South Africa) … p.8500

Membrane Proteins - GABA Receptors. Studies in the Area of GABA Receptors Reported from University of Leipzig [The alpha 2 beta 3 gamma 2 GABA(A) receptor preferring agonist NS11394 aggravates dystonia in the phenotypic dt (sz) model] … p.8501

Oncology - Gastric Cancer. Studies in the Area of Gastric Cancer Reported from Zhejiang University (Role of Prognostic Nutritional Index in patients with gastric cancer: a meta–analysis) … p.8502

Biotechnology - Gene Therapy. Studies in the Area of Gene Therapy Reported from University of California (DNA Nanotechnology for Precise Control over Drug Delivery and Gene Therapy) … p.8502

www.NewsRx.com
Heart Disorders and Diseases - Heart Disease. Studies in the Area of Heart Disease Reported from Washington University (Effect of Statin Therapy on Mortality in Older Adults Hospitalized with Coronary Artery Disease: A Propensity–Adjusted Analysis) ... p.8504

Surgery - Heart Surgery. Studies in the Area of Heart Surgery Reported from Children's Hospital (Preoperative and Intraoperative Predictive Factors of Immediate Extubation After Neonatal Cardiac Surgery) ... p.8505

Cardiovascular Diseases and Conditions - Hypertension. Studies in the Area of Hypertension Reported from Lanzhou University Second Hospital (Clinical Practice Guidelines for Hypertension: Evaluation of Quality Using the AGREE II Instrument) ... p.8506

Cardiovascular Diseases and Conditions - Hypertension. Studies in the Area of Hypertension Reported from University of Portsmouth (Utilisation and Tolerability of Aliskiren in the Primary Care Setting in England) ... p.8508

Immunology - Immunoglobulins. Studies in the Area of Immunoglobulins Reported from Technical University (Spontaneous Isopeptide Bond Formation as a Powerful Tool for Engineering Site–Specific Antibody–Drug Conjugates) ... p.8509

Oncology - Kidney Cancer. Studies in the Area of Kidney Cancer Reported from University of Cambridge (A randomised, phase II study of nintedanib or sunitinib in previously untreated patients with advanced renal cell cancer: 3–year results) ... p.8509

Transplant Medicine - Kidney Transplants. Studies in the Area of Kidney Transplants Reported from Royal Devon and Exeter NHS Foundation Trust (Prevention of recurrence of atypical hemolytic uremic syndrome post renal transplant with the use of higher–dose eculizumab) ... p.8510

www.NewsRx.com

Transplant Medicine - Kidney Transplants. Studies in the Area of Kidney Transplants Reported from University of Amsterdam (Effect of TREM–1 blockade and single nucleotide variants in experimental renal injury and kidney transplantation) ... p.8511

Oncology - Lobular Cancer. Studies in the Area of Lobular Cancer Reported from University Medical Center (p120–Catenin Is Critical for the Development of Invasive Lobular Carcinoma in Mice) ... p.8512

Oncology - Lung Cancer. Studies in the Area of Lung Cancer Reported from McMaster University (Comprehensive Clinical Staging for Resectable Lung Cancer: Clinicopathological Correlations and the Role of Brain MRI) ... p.8513

Oncology - Lymphoma. Studies in the Area of Lymphoma Reported from J. Gayoso and Co–Researchers (Busulfan–based reduced intensity conditioning regimens for haploidentical transplantation in relapsed/refractory Hodgkin lymphoma: Spanish multicenter experience) ... p.8515

Cytoskeletal Proteins - Microfilament Proteins. Studies in the Area of Microfilament Proteins Reported from University of California (AMP–Activated Protein Kinase and Sirtuin 1 Coregulation of Cortactin Contributes to Endothelial Function) ... p.8516

Microscopy and Microanalysis. Studies in the Area of Microscopy and Microanalysis Reported from Chungbuk National University (Analysis of Ferrous on Ten–Eleven Translocation Activity and Epigenetic Modifications of Early Mouse Embryos by Fluorescence Microscopy) ... p.8517

Surgery - Necrosectomy. Studies in the Area of Necrosectomy Reported from Weil Cornell Medical College (Endoscopic Therapy With Lumen–apposing Metal Stents Is Safe and Effective for Patients With Pancreatic Walled–off Necrosis)
Oncology - Non-Small Cell Lung Cancer. Studies in the Area of Non-Small Cell Lung Cancer Reported from University of Texas (Local consolidative therapy versus maintenance therapy or observation for patients with oligometastatic non–small–cell lung cancer without progression after ...) ... p.8519

Eye Diseases and Conditions - Open-Angle Glaucoma. Studies in the Area of Open–Angle Glaucoma Reported from Anhui Medical University (Identification of Mutations in Myocilin and Beta–1,4–galactosyltransferase 3 Genes in a Chinese Family with Primary Open–angle Glaucoma) ... p.8521

Oncology - Oral Squamous Cell Carcinoma. Studies in the Area of Oral Squamous Cell Carcinoma Reported from Department of Oral Pathology (Immunohistochemical expression of Bcl–2 in oral epithelial dysplasia and oral squamous cell carcinoma) ... p.8522

Oncology - Pancreatic Cancer. Studies in the Area of Pancreatic Cancer Reported from Ernst–Moritz–Arndt–University (TRAIL Promotes Tumor Growth in a Syngeneic Murine Orthotopic Pancreatic Cancer Model and Affects the Host Immune Response) ... p.8523

Oncology - Prostate Cancer. Studies in the Area of Prostate Cancer Reported from Far Eastern Memorial Hospital (Increased Fall Risk in Patients Receiving Androgen Deprivation Therapy for Prostate Cancer) ... p.8524

Drugs and Therapies - Radiation Therapy. Studies in the Area of Radiation Therapy Reported from Rotterdam Eye Hospital (Malignant pleural mesothelioma with lacrimal gland metastasis) ... p.8525

Eye Diseases and Conditions - Refractive Errors. Studies in the Area of Refractive Errors Reported from Erasmus University Medical Center (When do myopia genes have their effect? Comparison of genetic risks between children and adults) ... p.8527

Science. Studies in the Area of Science Reported from National Research Institute (STRAP Acts as a Scaffolding Protein in Controlling the TLR2/4 Signaling Pathway) ... p.8528

Science. Studies in the Area of Science Reported from University of California (ATR inhibitors as a synthetic lethal therapy for tumours deficient in ARID1A) ... p.8529

Heart Disorders and Diseases - Tetralogy of Fallot. Studies in the Area of Tetralogy of Fallot Reported from University of Ulsan (Systemic–Pulmonary Shunt Facilitates the Growth of the Pulmonary Valve Annulus in Patients With Tetralogy of Fallot) ... p.8529

Mycobacterium Infections - Tuberculosis. Studies in the Area of Tuberculosis Reported from Imperial College (Hypoxia and tissue destruction in pulmonary TB) ... p.8531

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Studies in the Area of Type 2 Diabetes Reported from Baylor University College of Medicine (Mitochondrial Activity in Human White Adipocytes Is Regulated by the Ubiquitin Carrier Protein 9/microRNA–30a Axis) ... p.8532
Vascular Diseases. Studies in the Area of Vascular Diseases Reported from Fourth Military Medical University (Adult lead exposure increases blood–retinal permeability: A risk factor for retinal vascular disease) … p.8533

Surgery - Visceral Surgery. Studies in the Area of Visceral Surgery Reported from University Hospital (Indications for embolization in a French level 1 trauma center) … p.8534

Drugs and Therapies - Antifungals. Study Data from A. Farkas et al Provide New Insights into Antifungals (Comparative Evaluation of the Predictive Performances of Three Different Structural Population Pharmacokinetic Models To Predict Future Voriconazole Concentrations) … p.8535

Cardiovascular Diseases and Conditions - Atherosclerosis. Study Data from A.K. Patel and Co–Authors Update Knowledge of Atherosclerosis (A Review on Atherosclerotic Biology, Wall Stiffness, Physics of Elasticity, and Its Ultrasound–Based Measurement) … p.8536

Oncology - Breast Cancer. Study Data from Amirkabir University of Technology Update Understanding of Breast Cancer (Novel alginate–stabilized doxorubicin–loaded nanodroplets for ultrasounic theranosis of breast cancer) … p.8537

Medical Imaging - Cardiovascular Imaging. Study Data from Amrita University Update Knowledge of Cardiovascular Imaging (Isolated rheumatic severe tricuspid regurgitation) … p.8538

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Data from Attikon University Hospital Provide New Insights into Obesity (Body mass index in acute heart failure: association with clinical profile, therapeutic management and in–hospital outcome) … p.8538

Therapeutics. Study Data from Augustana College Update Understanding of Therapeutics [Tissue–specific variation in nonsense mutant transcript level and drug–induced read–through efficiency in the Cln1(R151X) mouse model of INCL] … p.8540

Heart Disorders and Diseases - Heart Attack. Study Data from B. DeVoe and Co–Authors Update Knowledge of Heart Attack (Correlation of the predictive ability of early warning metrics and mortality for cardiac arrest patients receiving in–hospital Advanced Cardiovascular Life Support) … p.8541

Drug Administration Routes. Study Data from Beijing University Provide New Insights into Drug Administration Routes (Simultaneous Analysis of Quercetin and Naringenin in Rat Plasma by Liquid Chromatography–Tandem Mass Spectrometry: Application to a Pharmacokinetic Study ...) … p.8542

Liver Diseases and Conditions - Hepatitis C Virus. Study Data from Binzhou Medical College Update Knowledge of Hepatitis C Virus (Correlation of interferon–lambda 4 ss469415590 with the hepatitis C virus treatment response and its comparison with interleukin 28b polymorphisms in predicting a ...) … p.8543

Blood Pressure. Study Data from CHUM Provide New Insights into Blood Pressure (The role of GRIP1 and ephrin B3 in blood pressure control and vascular smooth muscle cell contractility) … p.8545
January 14, 2017

Oncology - Bladder Cancer. Study Data from Cancer Center Update Understanding of Bladder Cancer (Upregulated expression of BCL2, MCM7, and CCNE1 indicate cisplatin–resistance in the set of two human bladder cancer cell lines: T24 cisplatin sensitive and T24R2 cisplatin ...) … p.8546

Cardiovascular Diseases and Conditions - Takayasu’s Arteritis. Study Data from Capital Medical University Provide New Insights into Takayasu's Arteritis (IL–9–producing Th9 cells may participate in pathogenesis of Takayasu’s arteritis) … p.8547

Cardiovascular Diseases and Conditions - Aneurysm. Study Data from Capital Medical University Update Knowledge of Aneurysm (Effect of hemodynamics on outcome of subtotally occluded paraclinoid aneurysms after stent–assisted coil embolization) … p.8548

Oncology - Liver Cancer. Study Data from Capital Medical University Update Knowledge of Liver Cancer (Cytokine levels contribute to the pathogenesis of minimal hepatic encephalopathy in patients with hepatocellular carcinoma via STAT3 activation) … p.8549

Guanidines. Study Data from Center for Research and Advanced Studies of the National Polytechnic Institute (CINVESTAV) Provide New Insights into Guanidines (Pharmacological analysis of the cardiac sympatho–inhibitory actions of moxonidine and agmatine in ...) … p.8550

Cell Proliferation. Study Data from Central Hospital Update Understanding of Cell Proliferation (Long non–coding RNA MALAT1 is up–regulated in ovarian cancer tissue and promotes SK–OV–3 cell proliferation and invasion) … p.8551

www.NewsRx.com

Liver Diseases and Conditions - Hepatomas. Study Data from Changchun Institute of Applied Chemistry Update Understanding of Hepatomas (Self–Targeted Polysaccharide Prodrug Suppresses Orthotopic Hepatoma) … p.8552

Drugs and Therapies - Antiretrovirals. Study Data from Chiang Mai University Update Knowledge of Antiretrovirals (Therapeutic Drug Monitoring of Lopinavir in HIV–Infected Children on Second–Line Antiretroviral Therapy in Asia) … p.8553

Hemophilia. Study Data from Children’s Hospital Provide New Insights into Hemophilia (National needs assessment of patients treated at the United States Federally–Funded Hemophilia Treatment Centers) … p.8554

Pharmacology. Study Data from China Pharmaceutical University Provide New Insights into Pharmacology (Overview of Oroxylin A: A Promising Flavonoid Compound) … p.8555

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Study Data from Chulalongkorn University Update Knowledge of Chronic Hepatitis B Virus (Association of interferon–gamma inducible protein 10 polymorphism with treatment response to pegylated interferon in HBeAg–positive chronic hepatitis B) … p.8556

Oncology - Colon Cancer. Study Data from Chungbuk National University Update Understanding of Colon Cancer (Muscarinic acetylcholine receptors mediate eIF4B phosphorylation in SNU–407 colon cancer cells) … p.8557

Kidney Diseases and Conditions - Chronic Kidney Disease. Study Data from Churchill Hospital Update Knowledge of Chronic Kidney Disease (Interventions for chronic kidney disease–associated restless legs syndrome) … p.8558
January 14, 2017

Drugs and Therapies - Antibiotics. Study Data from College of Pharmacy Update Understanding of Antibiotics (Aerobic Exercise Training as a Potential Cardioprotective Strategy to Attenuate Doxorubicin–Induced Cardiotoxicity) … p.8560

Drugs and Therapies - Mitotic Inhibitors. Study Data from Cumhuriyet University Provide New Insights into Mitotic Inhibitors (The effects of intraperitoneal chemotherapeutic agents on adhesion formation) … p.8561

Drugs and Therapies - Amiodarone Therapy. Study Data from D.C. Millard and Colleagues Update Understanding of Amiodarone Therapy (Identification of Drug–Drug Interactions In Vitro: A Case Study Evaluating the Effects of Sofosbuvir and Amiodarone on hiPSC–Derived Cardiomyocytes) … p.8561

Oncology - Non-Small Cell Lung Cancer. Study Data from Dalian Medical University Provide New Insights into Non–Small Cell Lung Cancer (Novel Selective and Potent EGFR Inhibitor that Overcomes T790M–Mediated Resistance in Non–Small Cell Lung Cancer) … p.8562

Life Science Research - Molecular Biology. Study Data from Dana–Farber Cancer Institute Provide New Insights into Molecular Biology (PKM2, cancer metabolism, and the road ahead) … p.8563

Oncology - Carcinomas. Study Data from Dana–Farber Cancer Institute Update Understanding of Carcinomas (Outcomes with volume–based dose specification in CT–planned high–dose–rate brachytherapy for stage I–II cervical carcinoma: A 10–year institutional experience) … p.8564

www.NewsRx.com

Cardiology. Study Data from Department of Cardiology Update Knowledge of Cardiology (Risk Factors Associated with Left–Sided Cardiac Valve Calcification: A Case Control Study) … p.8565

Transfusion Medicine - Blood Transfusion. Study Data from Department of Hematology Provide New Insights into Blood Transfusion (Lenalidomide with or without erythropoietin in transfusion–dependent erythropoiesis–stimulating agent–refractory lower–risk MDS without 5q deletion) … p.8566

Stem Cell Research - Hematopoietic Stem Cells. Study Data from Department of Infectious Disease Update Understanding of Hematopoietic Stem Cells (Chlorhexidine bathing for the prevention of colonization and infection with multidrug–resistant microorganisms in a hematopoietic stem cell ...) … p.8567

Leukocyte Diseases and Conditions - Neutropenia. Study Data from Department of Pediatrics Provide New Insights into Neutropenia (Hydroxyurea for reducing blood transfusion in non–transfusion dependent beta thalassaemias) … p.8568

Hormones. Study Data from Duke University Update Knowledge of Hormones (Thyroid hormone use during cardiac transplant organ procurement) … p.8570

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Data from Durham University Update Understanding of Alzheimer Disease (ImmunoPEGliposome–mediated reduction of blood and brain amyloid levels in a mouse model of Alzheimer's disease is restricted to aged animals) … p.8571
January 14, 2017

Angiology. Study Data from Dwight D. Eisenhower Army Medical Center Update Understanding of Angiology (Aortic Dissection as a Cause of Pulsus Biferiens: A Case Report and Review) … p.8572

Cardiovascular Diseases and Conditions - Fibromuscular Dysplasia. Study Data from Eastern Michigan University Provide New Insights into Fibromuscular Dysplasia (Diagnosed and living with fibromuscular dysplasia: A qualitative inquiry) … p.8573

Drugs and Therapies - Antiarrhythmic Agents. Study Data from Eskisehir Osmangazi University Provide New Insights into Antiarrhythmic Agents (Treatment with propranolol for infantile hemangiomas: single–center experience) … p.8574

Peptides and Proteins. Study Data from Eskisehir Osmangazi University Update Knowledge of Peptides and Proteins (The Effects of Beta Amyloid Peptide 1–42 on Isolated Rat Hearts and Ileum Smooth Muscle) … p.8575

Herpesvirus Diseases and Conditions - Herpes Simplex Virus. Study Data from Eye Institute Update Understanding of Herpes Simplex Virus (Oral antivirals for preventing recurrent herpes simplex keratitis in people with corneal grafts) … p.8576

Oncology - Melanoma. Study Data from Faculty of Sciences Update Knowledge of Melanoma (Innate immunity based cancer immunotherapy: B16–F10 murine melanoma model) … p.8577

Oncology - Ovarian Cancer. Study Data from First Affiliated Hospital Provide New Insights into Ovarian Cancer (Comprehensive analysis of IncRNA–mRNA co–expression patterns identifies immune–associated IncRNA biomarkers in ovarian cancer malignant progression) … p.8578

Lipid Research. Study Data from French National Institute of Health and Medical Research (INSERM) Update Knowledge of Lipid Research (Expression profile of hepatic genes related to lipid homeostasis in LSR heterozygous mice contributes to their increased ...) … p.8579

Immunology - Immune System. Study Data from Friedrich–Alexander–University Provide New Insights into Immunoglobulins (Physiologically based pharmacokinetic models of small molecules and therapeutic antibodies: a mini–review on fundamental concepts and applications) … p.8581

Neurologic Manifestations - Pain. Study Data from General Hospital Provide New Insights into Pain (Use of Methadone as an Adjuvant Medication to Low–Dose Opioids for Neuropathic Pain in the Frail Elderly: A Case Series) … p.8582

Hepatosteatosis. Study Data from George Washington University Update Knowledge of Hepatosteatosis (Protective Role of Dietary Curcumin in the Prevention of the Oxidative Stress Induced by Chronic Alcohol with respect to Hepatic Injury and Antiatherogenic Markers) … p.8583

Central Nervous System Diseases and Conditions - Cerebral Hemorrhage. Study Data from Harbin Medical University Update Understanding of Cerebral Hemorrhage [Cerebroprotection by the neuronal PGE (2) receptor EP2 after intracerebral hemorrhage in middle–aged mice] … p.8594
Phenols. Study Data from Harbin Medical University Update Understanding of Phenols (Effects of Propofol on Several Membrane Characteristics of Cervical Cancer Cell Lines) ... p.8585

Heart Disorders and Diseases - Ventricular Fibrillation. Study Data from Hiroshima University Provide New Insights into Ventricular Fibrillation (Risk stratification of ventricular fibrillation in Brugada syndrome using noninvasive scoring methods) ... p.8586

Nutritional and Metabolic Diseases and Conditions - Diabetic Angiopathies. Study Data from Hong Kong Eye Hospital Update Understanding of Diabetic Angiopathies (Associations between diabetic retinopathy and systemic risk factors) ... p.8587

Drugs and Therapies - Antibiotics. Study Data from Huazhong Agricultural University Provide New Insights into Antibiotics (Characterization of Spectinomycin Resistance in Streptococcus suis Leads to Two Novel Insights into Drug Resistance Formation and Dissemination Mechanism) ... p.8588

Eye Diseases and Conditions - Macular Edema. Study Data from I.P. Chatziralli and Colleagues Update Understanding of Macular Edema (Hyperreflective Foci As An Independent Visual Outcome Predictor In Macular Edema Due To Retinal Vascular Diseases Treated With Intravitreal Dexamethasone Or ...) ... p.8589

Parasitic Diseases and Conditions - Cutaneous Leishmaniasis. Study Data from INPA Provide New Insights into Cutaneous Leishmaniasis [Topical treatment of experimental cutaneous leishmaniasis in golden hamster (Mesocricetus auratus) with formulations containing pentamidine] ... p.8590

Drugs and Therapies - Chemotherapy. Study Data from Indiana University Provide New Insights into Chemotherapy (2016 updated MASCC/ESMO consensus recommendations: prevention of nausea and vomiting following multiple–day chemotherapy, high–dose chemotherapy, and breakthrough nausea ...) ... p.8591

Connective Tissue Cells. Study Data from Inner Mongolia University Update Understanding of Connective Tissue Cells (Isolation and characterization of white and brown adipocytes in Kunming mice) ... p.8592

Genetics - Medical Genetics. Study Data from Institute for Cancer Research and Treatment (IRCCS) Update Knowledge of Medical Genetics [Sprengel anomaly in deletion 22q11.2 (DiGeorge/Velo–Cardio–Facial) syndrome] ... p.8593

Nematodes. Study Data from K.S. Kim and Colleagues Update Understanding of Nematodes (Advancements in breeding, genetics, and genomics for resistance to three nematode species in soybean) ... p.8594

Oncology - Breast Cancer. Study Data from Kaohsiung Medical University Provide New Insights into Breast Cancer (Gallic acid–capped gold nanoparticles inhibit EGF–induced MMP–9 expression through suppression of p300 stabilization and NF kappa B/c–Jun activation in breast ...) ... p.8595

Quality of Life. Study Data from Karolinska University Hospital Update Knowledge of Quality of Life (Health–related quality of life 10 years after oesophageal cancer surgery) ... p.8596

Heart Disorders and Diseases - Dilated Cardiomyopathy. Study Data from Kitasato University Update Knowledge of Dilated Cardiomyopathy (Clinical significance of endomyocardial biopsy in conjunction with cardiac magnetic resonance imaging to predict left
ventricular reverse remodeling in idiopathic ...) ... p.8597

Nutritional and Metabolic Diseases and Conditions - Iron-Deficiency Anemia. Study Data from Klinikum Coburg GmbH Update Knowledge of Iron–Deficiency Anemia (A prospective observational study of effectiveness and safety of iron isomaltoside in patients with chronic renal failure and iron deficiency anemia) … p.8598

Stem Cell Research - Mesenchymal Stem Cells. Study Data from Konkuk University Provide New Insights into Mesenchymal Stem Cells (Human adipose mesenchymal stem cell–derived exosomal–miRNAs are critical factors for inducing anti–proliferation signalling to A2780 and SKOV–3 ovarian cancer ...) … p.8599

Science. Study Data from Korea University Update Knowledge of Science (Measurement of the Nucleus Area and Nucleus/Cytoplasm and Mitochondria/Nucleus Ratios in Human Colon Tissues by Dual–Colour Two–Photon Microscopy Imaging) … p.8600

Oncology - Breast Cancer. Study Data from Kumamoto University Update Knowledge of Breast Cancer (Prognostic role of PIK3CA mutations of cell–free DNA in early–stage triple negative breast cancer) … p.8601

Glycoconjugates. Study Data from Kyung Hee University Update Understanding of Glycoconjugates [Decursin in Angelica gigas Nakai (AGN) Enhances Doxorubicin Chemosensitivity in NCI/ADR–RES Ovarian Cancer Cells via Inhibition of P–glycoprotein Expression] … p.8602

Parkinson’s Disease. Study Data from Kyungpook National University Update Knowledge of Parkinson’s Disease (Induction of microglial toll–like receptor 4 by prothrombin kringle–2: a potential pathogenic mechanism in Parkinson’s disease) … p.8603

Oncology - Liver Cancer. Study Data from Kyushu University Update Knowledge of Liver Cancer (Sarcopenia is a poor prognostic factor following hepatic resection in patients aged 70 years and older with hepatocellular carcinoma) … p.8604

Heart Disorders and Diseases - Heart Attack. Study Data from L.J. Lambert et al Provide New Insights into Heart Attack (Outcomes of Patients With ST–Elevation Myocardial Infarction Receiving and Not Receiving Reperfusion Therapy: The Importance of Examining All Patients) … p.8605

Oncology - Osteosarcomas. Study Data from Leiden University Update Understanding of Osteosarcomas (MEK inhibition induces apoptosis in osteosarcoma cells with constitutive ERK1/2 phosphorylation) … p.8606

Liver Diseases and Conditions - Acute Hepatitis. Study Data from M. Dirchwolf et al Provide New Insights into Acute Hepatitis (Clinical epidemiology of acute hepatitis C in South America) … p.8607

Bacterial Infections and Mycoses - Aspergillosis. Study Data from M. Shirley et al Provide New Insights into Aspergillosis (Isavuconazole: A Review in Invasive Aspergillosis and Mucormycosis) … p.8608

Membrane Proteins - Immunologic Receptors. Study Data from M.D. Anderson Cancer Center Update Understanding of Immunologic Receptors (The microRNA–200/Zeb1 axis regulates ECM–dependent b1–integrin/FAK signaling, cancer cell invasion and metastasis through CRKL) … p.8609
Oncology - Chronic Myeloid Leukemia. Study Data from M.E. Gaudiano and Co–Authors Update Knowledge of Chronic Myeloid Leukemia (About the discrete–continuous nature of a hematopoiesis model for Chronic Myeloid Leukemia) … p.8610

Science. Study Data from Max–Planck–Institute for Molecular Plant Physiology Update Understanding of Science (Gene regulatory network inference using fused LASSO on multiple data sets) … p.8611

Heart Disorders and Diseases - Heart Attack. Study Data from Mayo Clinic Update Understanding of Heart Attack (Improving Survival From Cardiac Arrest: A Review of Contemporary Practice and Challenges) … p.8612

Angiogenesis. Study Data from Medical University Update Knowledge of Angiogenesis (Effects of calcitriol on random skin flap survival in rats) … p.8613

Granulocytes. Study Data from Medical University Update Understanding of Granulocytes (NETs in cancer) … p.8614

Musculoskeletal Diseases and Conditions - Osteoarthritis. Study Data from Medical University Update Understanding of Osteoarthritis (Galectin–3 Induces a Pro–degradative/inflammatory Gene Signature in Human Chondrocytes, Teaming Up with Galectin–1 in Osteoarthritis Pathogenesis) … p.8615

www.NewsRx.com

Genetics - Genetics and Cancer. Study Data from Molecular Genetics Laboratory Update Knowledge of Genetics and Cancer (BRCA1–2 Diagnostic Workflow from Next–Generation Sequencing Technologies to Variant Identification and Final Report) … p.8616

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Data from Monash University Update Understanding of Obesity (Disrupted functional connectivity in adolescent obesity) … p.8617

Heart Disorders and Diseases - Tachycardia. Study Data from Murdoch Children's Research Institute Update Understanding of Tachycardia (Long–term outcomes after first–onset arrhythmia in Fontan physiology) … p.8618

Mental Health Diseases and Conditions - Depression. Study Data from N. Aarts and Co–Authors Update Knowledge of Depression (Use of Selective Serotonin Reuptake Inhibitors and Sleep Quality: A Population–Based Study) … p.8619

Liver Diseases and Conditions - Hepatitis C Virus. Study Data from NUST Update Knowledge of Hepatitis C Virus (Ionotropic Purinergic Receptors P2X4 and P2X7: Proviral or Antiviral? An Insight into P2X Receptor Signaling and Hepatitis C Virus Infection) … p.8620

Oncology - Liver Cancer. Study Data from Nanjing Medical University Update Understanding of Liver Cancer (The incidence and outcome of major complication following conventional TAE/TACE for hepatocellular carcinoma) … p.8621

Intercellular Signaling Peptides and Proteins - Cytokines. Study Data from National Center for Scientific Research (CNRS) Provide New Insights into Cytokines (Spatiotemporal control of interferon–induced JAK/STAT signalling and gene transcription by the retromer complex) … p.8622
Nutritional and Metabolic Diseases and Conditions - Obesity. Study Data from National Institute of Diabetes and Digestive and Kidney Diseases Update Understanding of Obesity (How Strongly Does Appetite Counter Weight Loss? Quantification of the Feedback Control of Human Energy Intake) ... p.8623

Mental Health Diseases and Conditions - Depression. Study Data from National Institute of Neuroscience Update Knowledge of Depression (Blood–based gene expression signatures of medication–free outpatients with major depressive disorder: integrative genome–wide and candidate gene analyses) ... p.8624

Drugs and Therapies - Central Nervous System Agents. Study Data from National Institutes of Health Update Understanding of Central Nervous System Agents [Novel and High Affinity 2–[(Diphenylmethyl)sulfinyl]acetamide (Modafinil) Analogues as Atypical Dopamine Transporter Inhibitors] ... p.8625

Ebola Virus. Study Data from National Institutes of Health Update Understanding of Ebola Virus (Ebola Virus Replication and Disease Without Immunopathology in Mice Expressing Transgenes to Support Human Myeloid and Lymphoid Cell Engraftment) ... p.8626

Oncology - Cancer Epidemiology. Study Data from New York State Department of Health Update Knowledge of Cancer Epidemiology (Effects of the length of central cancer registry operations on identification of subsequent cancers and on survival estimates) ... p.8627

Transplant Medicine - Heart Transplants. Study Data from Ohio State University Provide New Insights into Heart Transplants (The impact of length and weight on survival after heart transplantation in children less than 24 months of age) ... p.8628

Vaccination. Study Data from Oregon State University Update Understanding of Vaccination (Preventive Services Use Among African American and Latino Adult Caregivers in South Los Angeles) ... p.8629

Oncology - Lymphoma. Study Data from Osaka University School of Medicine Update Knowledge of Lymphoma (Optical coherence tomography manifestations of primary vitreoretinal lymphoma) ... p.8630

Disease Attributes - Disease Progression. Study Data from Pennsylvania State University Update Knowledge of Disease Progression (Changes in Bone Turnover Marker Levels and Clinical Outcomes in Patients with Advanced Cancer and Bone Metastases Treated with Bone Antiresorptive Agents) ... p.8632

Oncology - Squamous Cell Carcinoma. Study Data from R. Bueno and Co–Authors Update Knowledge of Squamous Cell Carcinoma (HOX genes: potential candidates for the progression of laryngeal squamous cell carcinoma) ... p.8634
January 14, 2017

Genetics - Medical Genetics. Study Data from Radboud University Medical Center Update Understanding of Medical Genetics (Clinical delineation of the PACS1–related syndrome—Report on 19 patients) … p.8635

Rotavirus. Study Data from Rega Institute for Medical Research Update Understanding of Rotavirus (Comparative analysis of pentavalent rotavirus vaccine strains and G8 rotaviruses identified during vaccine trial in Africa) … p.8636

Transplant Medicine - Liver Transplants. Study Data from Regional Hospital Update Understanding of Liver Transplants (Acute Liver Failure Caused by Primary Non–Hodgkin’s Lymphoma of the Liver) … p.8637

Drugs and Therapies - In Vivo Diagnostic Biologicals. Study Data from Research Institute Update Knowledge of In Vivo Diagnostic Biologicals (L–Arginine L–Glutamate Enhances Gastric Motor Function in Rats and Dogs and Improves Delayed Gastric Emptying in Dogs) … p.8638

Immunology - Antigen-Presenting Cells. Study Data from Research Institute Update Understanding of Antigen–Presenting Cells (Dendritic Cells and Cancer Immunity) … p.8639

Drugs and Therapies - Antirheumatics. Study Data from Royal Perth Hospital Update Knowledge of Antirheumatics (Abatacept experience in steroid and rituximab–resistant focal segmental glomerulosclerosis) … p.8640

Pregnancy Complications - Twin-to-Twin Transfusion Syndrome. Study Data from Royal Women’s Hospital Provide New Insights into Twin-to-Twin Transfusion Syndrome [The Outcome of Monochorionic Diamniotic Twins Discordant at 11 to 13(+6) Weeks’ Gestation] … p.8641

Neurodegenerative Diseases and Conditions - Huntington Disease. Study Data from Ruhr University Update Understanding of Huntington Disease (The search for modifier genes in Huntington disease Multifactorial aspects of a monogenic disorder) … p.8642

Immunology - CD Antigens. Study Data from S. Wang and Colleagues Update Understanding of CD Antigens [Intratumoral injection of a CpG oligonucleotide reverts resistance to PD–1 blockade by expanding multifunctional CD8(+) T cells] … p.8643

Immunology - Mononuclear Phagocyte System. Study Data from S. Wang et al Provide New Insights into Mononuclear Phagocyte System (Serum Amyloid a Promotes Visfatin Expression in Macrophages) … p.8644

Gram-Negative Bacteria - Klebsiella. Study Data from S.K. Singh et al Provide New Insights into Klebsiella (blaOXA–48 carrying clonal colistin resistant–carbapenem resistant Klebsiella pneumoniae in neonate intensive care unit, India) … p.8645

Heart Disorders and Diseases - Acute Coronary Syndrome. Study Data from Shaheed Beheshti University of Medical Sciences Provide New Insights into Acute Coronary Syndrome (Genetic variants and expression study of FOXP3 gene in acute coronary syndrome in Iranian patients) … p.8645

Surgery - Plastic Surgery. Study Data from Shanghai Jiao–Tong University Update Knowledge of Plastic Surgery (Intravenous Hyaluronidase with Urokinase as Treatment for Rabbit Retinal Artery Hyaluronic Acid Embolism) … p.8647

www.NewsRx.com
January 14, 2017

Oncology - Glioblastomas. Study Data from Shantou University Update Understanding of Glioblastomas (Histone Deacetylase Inhibitor RGFP109 Overcomes Temozolomide Resistance by Blocking NF–kappa B–Dependent Transcription in Glioblastoma Cell Lines) ... p.8648

Oncology - Gastric Cancer. Study Data from Shengjing Hospital Provide New Insights into Gastric Cancer (Parity and gastric cancer risk: a systematic review and dose–response meta–analysis of prospective cohort studies) ... p.8649

Oncology - Liver Cancer. Study Data from Sichuan University Update Knowledge of Liver Cancer (Cost–effectiveness analysis of antiviral therapy in patients with advanced hepatitis B virus–related hepatocellular carcinoma treated with sorafenib) ... p.8650

Dentistry. Study Data from Sichuan University Update Understanding of Dentistry (Epigenetic regulation in dental pulp inflammation) ... p.8651

Mental Health Diseases and Conditions - Depression. Study Data from Southeast University Update Knowledge of Depression (Divergent topological architecture of the default mode network as a pretreatment predictor of early antidepressant response in major depressive disorder) ... p.8652

Systemic Lupus Erythematosus. Study Data from Southern Medical University Update Understanding of Systemic Lupus Erythematosus (Suppression of interleukin 17 contributes to the immunomodulatory effects of adipose–derived stem cells in a murine model of systemic lupus ...) ... p.8653

Cardiopulmonary Bypass. Study Data from St. George Hospital Update Understanding of Cardiopulmonary Bypass (Simulator Teaching of Cardiopulmonary Bypass Complications: A Prospective, Randomized Study) ... p.8654

Drugs and Therapies - Influenza Therapy. Study Data from St. Jude Children’s Research Hospital Update Knowledge of Influenza Therapy (A Novel Endonuclease Inhibitor Exhibits Broad–Spectrum Anti–Influenza Virus Activity In Vitro) ... p.8655

Immune System Diseases and Conditions - HIV/AIDS. Study Data from St. Louis University Update Knowledge of HIV/AIDS (Geographic Variation in Condom Availability and Accessibility) ... p.8656

Health and Medicine - Endocrinology. Study Data from State University of Campinas Update Knowledge of Endocrinology (408 Cases of Genital Ambiguity Followed by Single Multidisciplinary Team during 23 Years: Etiologic Diagnosis and Sex of Rearing) ... p.8657

Gram-Negative Bacteria - Pseudomonas aeruginosa. Study Data from State University of New York Update Understanding of Pseudomonas aeruginosa (Chemical Inhibition of Kynureninase Reduces Pseudomonas aeruginosa Quorum Sensing and Virulence Factor Expression) ... p.8658

Oncology - Liver Cancer. Study Data from Sungkyunkwan University Update Knowledge of Liver Cancer (Preoperative depressed mood and perioperative heart rate variability in patients with hepatic cancer) ... p.8659

Kidney Diseases and Conditions - Chronic Kidney Disease. Study Data from Taipei Medical University Hospital Update Understanding of Chronic Kidney Disease (Risk of liver injury after α–glucosidase inhibitor therapy in advanced chronic kidney disease patients) ... p.8660
Autoimmune Diseases and Conditions - Multiple Sclerosis. Study Data from Tarbiat Modares University Update Understanding of Multiple Sclerosis (Association study of two functional single nucleotide polymorphisms of neuropeptide y gene with multiple sclerosis) … p.8661

Gram-Negative Bacteria - Salmonella. Study Data from Trinity College Update Knowledge of Salmonella (Re-engineering cellular physiology by rewiring high-level global regulatory genes) … p.8662

Intercellular Signaling Peptides and Proteins - Cytokines. Study Data from Tzu Chi University Provide New Insights into Cytokines (Slow infusion rate of doxorubicin induces higher pro-inflammatory cytokine production) … p.8663

Digestive System Diseases and Conditions - Crohn’s Disease. Study Data from University College Provide New Insights into Crohn’s Disease (Genetic Complexity of Crohn’s Disease in Two Large Ashkenazi Jewish Families) … p.8664

Oncology. Study Data from University College Update Knowledge of Oncology (ALK Immunohistochemistry in NSCLC: Discordant Staining Can Impact Patient Treatment Regimen) … p.8665

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Data from University Hospital Update Understanding of Alzheimer Disease (The Vitamin A Derivative All-Trans Retinoic Acid Repairs Amyloid–b-Induced Double–Strand Breaks in Neural Cells and in the Murine Neocortex) … p.8666

Gram-Negative Bacteria - Escherichia coli. Study Data from University of Agriculture Provide New Insights into Escherichia coli [Emergence of NDM–5–and MCR–1–Producing Escherichia coli Clones ST648 and ST156 from a Single Muscovy Duck (Cairina moschata)] … p.8667

Heart Disorders and Diseases - Acute Coronary Syndrome. Study Data from University of Amsterdam Update Understanding of Acute Coronary Syndrome (Invasive strategies and outcomes for non-ST segment elevation acute coronary syndromes: a twelve-year experience from SWEDGEHEART) … p.8668

Immune System Diseases and Conditions - HIV/AIDS. Study Data from University of Amsterdam Update Understanding of HIV/AIDS (CRISPR–Cas9 Can Inhibit HIV–1 Replication but NHEJ Repair Facilitates Virus Escape) … p.8669

Health and Medicine - Medicinal Chemistry. Study Data from University of Bayreuth Update Knowledge of Medicinal Chemistry (Halogenated naphthochalcones and structurally related naphthopyrazolines with antitumor activity) … p.8670

Oncology - Acute Myeloid Leukemia. Study Data from University of Bergen Provide New Insights into Acute Myeloid Leukemia (The Complexity of Targeting PI3K–Akt–mTOR Signalling in Human Acute Myeloid Leukaemia: The Importance of Leukemic Cell Heterogeneity, Neighbouring ...) … p.8671

Coronaviridae Infections - Coronavirus Infections. Study Data from University of Bonn Update Understanding of Coronavirus Infections (Viral Shedding and Antibody Response in 37 Patients With Middle East Respiratory Syndrome Coronavirus Infection) … p.8672

Hematologic Diseases and Conditions - Thrombocytopenic Purpura. Study Data from University of California Provide New Insights into Thrombocytopenic Purpura (Thrombotic thrombocytopenic purpura in a postoperative patient taking cephalixin responding to plasmapheresis: A case report and review of ...) … p.8673
January 14, 2017

Physics - Biophysics. Study Data from University of Cambridge Update Understanding of Biophysics (The Significance of the Location of Mutations for the Native–State Dynamics of Human Lysozyme) … p.8674

Transplant Medicine - Cell Transplants. Study Data from University of Chicago Update Understanding of Cell Transplants (Identification of high–risk amino–acid substitutions in hematopoietic cell transplantation: a challenging task) … p.8675

DNA Research. Study Data from University of Dundee Provide New Insights into DNA Research (Olaparib, Monotherapy or with Ionizing Radiation, Exacerbates DNA Damage in Normal Tissues: Insights from a New p21 Reporter Mouse) … p.8676

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Data from University of Edinburgh Update Understanding of Alzheimer Disease (METACOHORTS for the study of vascular disease and its contribution to cognitive decline and neurodegeneration: An initiative of the Joint Programme for ...) … p.8677

Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Study Data from University of Florida Provide New Insights into Arteriovenous Fistula (Onyx extrusion through the scalp after embolization of dural arteriovenous fistula) … p.8678

Heart Disorders and Diseases - Cardiomyopathies. Study Data from University of Gothenburg Provide New Insights into Cardiomyopathies (Experiences of health care in women with Peripartum Cardiomyopathy in Sweden: a qualitative interview study) … p.8679

www.NewsRx.com

Heart Disorders and Diseases - Heart Attack. Study Data from University of Gothenburg Update Understanding of Heart Attack (Women's help–seeking behaviour during a first acute myocardial infarction) … p.8680

Endothelial Cells. Study Data from University of Hawaii Provide New Insights into Endothelial Cells (Anti–inflammatory activity of Barleria lupulina: Identification of active compounds that activate the Nrf2 cell defense pathway, organize cortical actin, reduce ...) … p.8681

Oncology - Head and Neck Cancer. Study Data from University of Illinois Update Knowledge of Head and Neck Cancer (Weekly versus every–three–weeks platinum–based chemoradiation regimens for head and neck cancer) … p.8682

Oncology - Breast Cancer. Study Data from University of Iowa Update Knowledge of Breast Cancer (Effect of Body Mass Index– and Actual Weight–Based Neoadjuvant Chemotherapy Doses on Pathologic Complete Response in Operable Breast Cancer) … p.8683

Drugs and Therapies - Antibiotics. Study Data from University of Libre de Bruxelles Provide New Insights into Antibiotics (Individualized antibiotic strategies) … p.8684

Clinical Research - Clinical Trials and Studies. Study Data from University of Liverpool Update Understanding of Clinical Trials and Studies (Nitrous oxide–based versus nitrous oxide–free general anaesthesia and accidental awareness during general anaesthesia in surgical patients) … p.8685

Science. Study Data from University of Maryland Update Understanding of Science (A Role of the FUZZY ONIONS LIKE Gene in Regulating Cell Death and Defense in Arabidopsis) … p.8687
January 14, 2017

Hydrochloric Acid. Study Data from University of Medicine Update Knowledge of Hydrochloric Acid (Trospium chloride is absorbed from two intestinal "absorption windows" with different permeability in healthy subjects) … p.8688

Heart Disorders and Diseases - Cardiomyopathies. Study Data from University of Medicine and Dentistry of New Jersey (UMDNJ) Provide New Insights into Cardiomyopathies (Mitochondrial autophagy in cardiomyopathy) … p.8688

Herpesvirus Diseases and Conditions - Cytomegalovirus. Study Data from University of Minnesota Update Understanding of Cytomegalovirus (Cytomegalovirus Vaccines: Current Status and Future Prospects) … p.8689

Drugs and Therapies - Immunotherapy. Study Data from University of Minnesota Update Understanding of Immunotherapy (Induced Pluripotent Stem Cell–Derived Natural Killer Cells for Treatment of Ovarian Cancer) … p.8690

Mitomycins. Study Data from University of Monastir Update Understanding of Mitomycins (Genotoxic and anti–genotoxic effects of esculin and its oligomer fractions against mitomycin C–induced DNA damages in mice) … p.8692

Eye Diseases and Conditions - Myopia. Study Data from University of New South Wales Provide New Insights into Myopia (An examination of the relation between intraocular pressure, fundal stretching and myopic pathology) … p.8693

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. Study Data from University of North Carolina Update Understanding of Epstein–Barr Virus (Karyotypic abnormalities associated with Epstein–Barr virus status in classical Hodgkin lymphoma) … p.8694

Hematologic Diseases and Conditions - Thrombocytopenia. Study Data from University of Paris Provide New Insights into Thrombocytopenia (Long–term complications of splenectomy in adult immune thrombocytopenia) … p.8695

Pharmacology. Study Data from University of Pittsburgh Update Knowledge of Pharmacology [New perspectives on mTOR inhibitors (rapamycin, rapalogs and TORKinibs) in transplantation] … p.8696

Cardiovascular Diseases and Conditions - Thrombosis. Study Data from University of Pittsburgh Update Knowledge of Thrombosis (Intracranial venous injury, thrombosis and repair as hallmarks of mild blast traumatic brain injury in rats: Lessons from histological and immunohistochemical studies of ...) … p.8697

Mosquito-Borne Diseases - Dengue Hemorrhagic Fever. Study Data from University of Science Malaysia Update Understanding of Dengue Hemorrhagic Fever [Allelic variants of cytochrome P450 monooxygenases: Constitutive and insecticide–mediated expression in a Malaysian strain of the dengue vector, ...] … p.8698

Blood Diseases and Conditions - Sepsis. Study Data from University of South Carolina Update Understanding of Sepsis (Effectiveness of oral antibiotics for definitive therapy of Gram–negative bloodstream infections) … p.8699

Bovine Diseases and Conditions - Bovine Tuberculosis. Study Data from University of Stellenbosch Update Knowledge of Bovine Tuberculosis (Disease Control in Wildlife: Evaluating a Test and Cull Programme for Bovine Tuberculosis in African Buffalo) … p.8700
January 14, 2017

Gram-Positive Bacteria - Enterococcus faecalis. Study Data from University of Tehran Provide New Insights into Enterococcus faecalis (The in vitro effect of antimicrobial photodynamic therapy with indocyanine green on Enterococcus faecalis: Influence of a washing vs non–washing procedure) … p.8701

Oncology - Melanoma. Study Data from University of Texas Provide New Insights into Melanoma (Tumor–Intrinsic PD–L1 Signals Regulate Cell Growth, Pathogenesis, and Autophagy in Ovarian Cancer and Melanoma) … p.8703

Cardiovascular Research. Study Data from University of Texas Southwestern Update Knowledge of Cardiovascular Research [SCCT guidelines for the performance and acquisition of coronary computed tomographic angiography: A report of the society of Cardiovascular Computed] … p.8704

Measles. Study Data from University of Tokyo Provide New Insights into Measles (Development of new therapy for canine mammary cancer with recombinant measles virus) … p.8705

Oncology - Breast Cancer. Study Data from University of Toronto Update Understanding of Breast Cancer (Total cost–effectiveness of mammography screening strategies) … p.8706

Pediatrics - Pediatric Nephrology. Study Data from University of Toronto Update Understanding of Pediatric Nephrology (C3 Glomerulopathy) … p.8706

Immunology - Granulocytes. Study Data from University of Utah Provide New Insights into Granulocytes (P–Selectin Sustains Extramedullary Hematopoiesis in the Gata1 low Model of Myelofibrosis) … p.8707

www.NewsRx.com

Heart Disorders and Diseases - Heart Failure. Study Data from University of Virginia Provide New Insights into Heart Failure (Decreased Pulmonary Arterial Proportional Pulse Pressure After Pulmonary Artery Catheter Optimization for Advanced Heart Failure Is Associated With Adverse Clinical) … p.8708

Heart Disorders and Diseases - Heart Attack. Study Data from University of Washington Update Knowledge of Heart Attack (Determining witnessed status for out–of–hospital cardiac arrest) … p.8710

Drugs and Therapies - Antifungals. Study Data from V. Ong and Co–Authors Update Knowledge of Antifungals (Preclinical Evaluation of the Stability, Safety, and Efficacy of CD101, a Novel Echinocandin) … p.8711

Immune System Diseases and Conditions - HIV/AIDS. Study Data from V.R. Gutlapalli et al Provide New Insights into HIV/AIDS (High levels of plasma interferon gamma and+874T/A gene polymorphism is associated with HIV–TB co–infection) … p.8712

Drugs and Therapies - Antibiotics. Study Data from VIT University Update Knowledge of Antibiotics (Effect of chitosan molecular weight of chitosan–citrate film on site specific in vitro release of Ofloxacin) … p.8713

Congenital Diseases and Conditions - Congenital Generalized Lipodystrophy. Study Data from Vanderbilt University Update Knowledge of Congenital Generalized Lipodystrophy (Characterization of a caveolin–1 mutation associated with both pulmonary arterial hypertension and congenital generalized lipodystrophy) … p.8714
January 14, 2017

Central Nervous System Diseases and Conditions - Brain Injuries. Study Data from Veterans Affairs Medical Center Provide New Insights into Brain Injuries [Microglial Activation Induced by the Alarmin S100B is Regulated by Poly(ADP–ribose) Polymerase–1] … p.8715

Immunology - Immunoglobulins. Study Data from Virginia University Medical Center Provide New Insights into Immunoglobulins (Monoclonal antibodies targeting CD38 in hematological malignancies and beyond) … p.8716

Nutritional and Metabolic Diseases and Conditions - Acidosis. Study Data from Wake Forest University Provide New Insights into Acidosis (Deletion of proton–sensing receptor GPR4 associates with lower blood pressure and lower binding of angiotensin II receptor in SFO) … p.8717

Environmental Health. Study Data from Washington State University Provide New Insights into Environmental Health (Retest of a Principal Components Analysis of Two Household Environmental Risk Instruments) … p.8718

Cyclohexanes. Study Data from Washington University Provide New Insights into Cyclohexanes (A Clickable Analogue of Ketamine Retains NMDA Receptor Activity, Psychoactivity, and Accumulates in Neurons) … p.8719

Cyclohexanes. Study Data from Washington University Update Knowledge of Cyclohexanes (Role of Cytochrome P4502B6 Polymorphisms in Ketamine Metabolism and Clearance) … p.8720

Oncology - Liver Cancer. Study Data from Wenzhou Medical University Update Knowledge of Liver Cancer (AKT/mTOR signaling pathway is involved in salvianolic acid B–induced autophagy and apoptosis in hepatocellular carcinoma cells) … p.8721

Fibroblasts. Study Data from Wuhan University Update Knowledge of Fibroblasts (MicroRNA221–3p modulates Ets–1 expression in synovial fibroblasts from patients with osteoarthritis of temporomandibular joint) … p.8722

Oncology. Study Data from X.H. Zhao et al Provide New Insights into Oncology (MiR–203 promotes the growth and migration of ovarian cancer cells by enhancing glycolytic pathway) … p.8723

Lipopolysaccharides. Study Data from Xuzhou Medical College Update Knowledge of Lipopolysaccharides (Induction of heat shock protein 27 by bicyclo attenuates D–galactosamine/lipopolysaccharide–induced liver injury) … p.8724

Cardiovascular Diseases and Conditions - Vasculitis. Study Data from Y. Ito and Co–Authors Update Knowledge of Vasculitis (Successful treatment of Bordetella bronchiseptica pneumonia by minocycline in anti–neutrophil cytoplasmic antibodies–associated vasculitis patient) … p.8725

Oncology - Lung Cancer. Study Data from Yale University Update Knowledge of Lung Cancer (Outcomes of a Highly Selective Surgical Approach to Oligometastatic Lung Cancer) … p.8726

Drugs and Therapies - Aminoglycosides. Study Data from Yamaguchi University Provide New Insights into Aminoglycosides (Quercetin protects against hair cell loss in the zebrafish lateral line and guinea pig cochlea) … p.8727

Oncology - Colon Cancer. Study Data from Yang Ming National University Update Knowledge of Colon Cancer (Serum CA125 concentration as a predictor of peritoneal dissemination of colorectal cancer in men and women) … p.8728
Oncology - Thyroid Cancer. Study Data from Yonsei University Update Knowledge of Thyroid Cancer c–Met–Mediated Reactivation of PI3K/AKT Signaling Contributes to Insensitivity of BRAF(V600E) Mutant Thyroid Cancer to BRAF Inhibition … p.8729

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Data from Z. Sayeed and Co–Authors Update Knowledge of Obesity (Comparing In–Hospital Total Joint Arthroplasty Outcomes and Resource Consumption Among Underweight and Morbidly Obese Patients) … p.8730

Oncology - Liver Cancer. Study Data from Zhejiang University Provide New Insights into Liver Cancer (Synchronous occurrence of a hepatic myelolipoma and two hepatocellular carcinomas) … p.8731

Oncology - Gliomas. Study Findings from Aligarh Muslim University Provide New Insights into Gliomas (Potential role of Shh–Gli1–BMI1 signaling pathway nexus in glioma chemoresistance) … p.8733

Dermatology - Cosmetic Dermatology. Study Findings from Autonomous University Broaden Understanding of Cosmetic Dermatology (Relationship between transient receptor potential vanilloid–1 expression and the intensity of sensitive skin symptoms) … p.8734

Immunology - Immunoglobulins. Study Findings from B. Liu et al Provide New Insights into Immunoglobulins [A Novel Fusion of ALT–803 (Interleukin (IL)–15 Superagonist) with an Antibody Demonstrates Antigen–specific Antitumor Responses] … p.8735

Clinical Research - Clinical Trials and Studies. Study Findings from Baylor University College of Medicine Provide New Insights into Clinical Trials and Studies (Pilot study of chronic maternal hyperoxygenation and effect on aortic and mitral valve annular dimensions in fetuses with left ...) … p.8736

Drugs and Therapies - Niclosamide Therapy. Study Findings from Beckman Institute for Advanced Science and Technology Provide New Insights into Niclosamide Therapy (Defined Host–Guest Chemistry on Nanocarbon for Sustained Inhibition of Cancer) … p.8737

Genetic Diseases and Conditions - Down Syndrome. Study Findings from California Department of Public Health Provide New Insights into Down Syndrome (Observed Rate of Down Syndrome in Twin Pregnancies) … p.8738

Shellfish Immunology. Study Findings from Cancer Research Institute Broaden Understanding of Shellfish Immunology [Identification and characteristic of three members of the Clq/TNF–related proteins (CTRP) superfamily in Eudontomyzon morii] … p.8739

Cardiovascular Diseases and Conditions - Hypertension. Study Findings from Center for Disease Control and Prevention Provide New Insights into Hypertension (Improved Blood Pressure Control to Reduce Cardiovascular Disease Morbidity and Mortality: The Standardized Hypertension Treatment and ...) ... p.8741

Embryo Transfer. Study Findings from Chaim Sheba Medical Center Provide New Insights into Embryo Transfer (Clinical pregnancy rate following frozen embryo transfer is higher with blastocysts vitrified on day 5 than on day 6) ... p.8742

Oncology - Pancreatic Cancer. Study Findings from Charles University Broaden Understanding of Pancreatic Cancer (Early detection of pancreatic cancer: impact of high-resolution imaging methods and biomarkers) ... p.8743

Cytoplasmic Structures. Study Findings from China Pharmaceutical University Broaden Understanding of Cytoplasmic Structures (Triptolide disrupts the actin–based Sertoli–germ cells adherens junctions by inhibiting Rho GTPases expression) ... p.8744

Silicon Dioxide. Study Findings from Chinese Academy of Sciences Provide New Insights into Silicon Dioxide [Treatment of groundwater containing Mn(II), Fe(II), As(III) and Sb(III) by bioaugmented quartz–sand filters] ... p.8745

Bone Research. Study Findings from Chinese University of Hong Kong Provide New Insights into Bone Research (Osthole Promotes Endochondral Ossification and Accelerates Fracture Healing in Mice) ... p.8746

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. Study Findings from Chonbuk National University Provide New Insights into Epstein–Barr Virus (Splenic infarction associated with acute infectious mononucleosis due to Epstein–Barr virus infection) ... p.8747

Cardiovascular Diseases and Conditions - Atherosclerosis. Study Findings from Chung Ang University Broaden Understanding of Atherosclerosis (Relation of serum homocysteine levels to cerebral artery calcification and atherosclerosis) ... p.8748

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings from Deakin University Provide New Insights into Obesity (Whole of Systems Trial of Prevention Strategies for Childhood Obesity: WHO STOPS Childhood Obesity) ... p.8749

Genetics. Study Findings from Department of Biochemistry & Molecular Biology Broaden Understanding of Genetics (Immunomodulatory Function of the Tumor Suppressor p53 in Host Immune Response and the Tumor Microenvironment) ... p.8750

Mycobacterium Infections - Latent Tuberculosis. Study Findings from Department of Respiratory Medicine Provide New Insights into Latent Tuberculosis (Baseline abnormal liver function tests are more important than age in the development of isoniazid–induced hepatotoxicity for patients receiving ...) ... p.8751

Oncology - Lung Cancer. Study Findings from Department of Thoracic Surgery Broaden Understanding of Lung Cancer (Video–assisted thoracoscopic lobectomy for elderly nonsmall cell lung cancer: Short–term and long–term outcomes) ... p.8752
Macrolides. Study Findings from Emory University Broaden Understanding of Macrolides (Phosphatase inhibition increases AQP2 accumulation in the rat IMCD apical plasma membrane) … p.8753

Drugs and Therapies - Antifungals. Study Findings from Faculty of Pharmaceutical Sciences Provide New Insights into Antifungals (Activation of p38 Mitogen–Activated Protein Kinase by Clotrimazole Induces Multidrug Resistance–Associated Protein 3 Activation through a Novel ...) … p.8754

Surgery - Bariatric Surgery. Study Findings from Federal University Provide New Insights into Bariatric Surgery (The FKBP5 polymorphism rs1360780 is associated with lower weight loss after bariatric surgery; 26 months of follow-up) … p.8755

Cardiovascular Diseases and Conditions - Hypertension. Study Findings from Federal University Provide New Insights into Hypertension (Prognostic Importance of Ambulatory Blood Pressure Monitoring in Resistant Hypertension: Is It All that Matters?) … p.8756

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings from Fred Hutchinson Cancer Research Center Broaden Understanding of Obesity (Subjective mood and energy levels of healthy weight and overweight/obese healthy adults on high–and low–glycemic load experimental diets) … p.8757

Drugs and Therapies - Adrenal Cortical Steroids. Study Findings from Free University Broaden Understanding of Adrenal Cortical Steroids (Ethyl cellulose nanocarriers and nanocrystals differentially deliver dexamethasone into intact, tape–stripped or sodium lauryl sulfate–exposed ex vivo human ...) … p.8758

Gram-Negative Bacteria - Helicobacter pylori. Study Findings from French National Institute of Health and Medical Research (INSERM) Broaden Understanding of Helicobacter pylori (Role of the N–Acetylmuramoyl–L–Alanyl Amidase, AmiA, of Helicobacter pylori in Peptidoglycan Metabolism, ...) … p.8760

Dysostosis. Study Findings from French National Institute of Health and Medical Research (INSERM) Provide New Insights into Dysostosis (Mandibular Dysostosis without Microphthalmia Caused by OTX2 Deletion) … p.8761

Obstructive Sleep Apnea. Study Findings from G. Ernst et al Provide New Insights into Obstructive Sleep Apnea (Difference between apnea–hypopnea index (AHI) and oxygen desaturation index (ODI): proportional increase associated with degree of obesity) … p.8762

Mycobacterium Infections - Tuberculosis. Study Findings from Global Health Institute Provide New Insights into Tuberculosis (Characterization of DprE1–Mediated Benzothiazinone Resistance in Mycobacterium tuberculosis) … p.8763

Oncology - Pancreatic Cancer. Study Findings from Guangdong General Hospital Provide New Insights into Pancreatic Cancer (Association and Intragenic Single–Nucleotide Polymorphism Interactions of the XRCC1 Polymorphisms for Pancreatic Cancer Susceptibility) … p.8764

Oncology. Study Findings from Harvard School of Medicine Provide New Insights into Oncology (Acquired Resistance to First–Line Afatinib and the Challenges of Prearranged Progression Biopsies) … p.8765
Heart Disorders and Diseases - Heart Failure. Study Findings from Heart and Vascular Institute Broaden Understanding of Heart Failure (Increased mortality with elevated plasma endothelin–1 in acute heart failure: an ASCEND–HF biomarker substudy) … p.8766

Oncology - Esophageal Cancer. Study Findings from Hiroshima University Broaden Understanding of Esophageal Cancer (Role of definitive chemoradiotherapy using docetaxel and 5–fluorouracil in patients with unresectable locally advanced esophageal squamous cell carcinoma: a …) … p.8767

Oncology - Colon Cancer. Study Findings from Hong Kong Baptist University Broaden Understanding of Colon Cancer [Determination of amino acids in colon cancer cells by using UHPLC–MS/MS and [U–C–13(5)] –glutamine as the isotope tracer] … p.8768

Oncology - Bladder Cancer. Study Findings from Huazhong University of Science and Technology Provide New Insights into Bladder Cancer (Pre–instillation of tumor microparticles enhances intravesical chemotherapy of nonmuscle–invasive bladder cancer through a lysosomal …) … p.8769

Cardiovascular Diseases and Conditions - Hypertension. Study Findings from Indiana University School of Medicine Broaden Understanding of Hypertension (Treating hypertension in hemodialysis improves symptoms seemingly unrelated to volume excess) … p.8770

Gram-Positive Bacteria - Staphylococcus aureus. Study Findings from Indiana University School of Medicine Broaden Understanding of Staphylococcus aureus (Topical Prostaglandin E Analog Restores Defective Dendritic Cell–Mediated Th17 Host Defense Against Methicillin–Resistant Staphylococcus …) … p.8771

Drugs and Therapies - Zoledronate Therapy. Study Findings from Indiana University–Purdue University Provide New Insights into Zoledronate Therapy (Zoledronate treatment has different effects in mouse strains with contrasting baseline bone mechanical phenotypes) … p.8772

Science. Study Findings from International Center for Genetic Engineering and Biotechnology Provide New Insights into Science (Stabilization of SIRT7 deacetylase by viral oncoprotein HBx leads to inhibition of growth restrictive RPS7 gene and …) … p.8773

Gram-Positive Bacteria - Streptococcus. Study Findings from Islamic Azad University Broaden Understanding of Streptococcus (Effect of photodynamic therapy with two photosensitizers on Streptococcus mutants: In vitro study) … p.8774

Bone Research. Study Findings from J. Plummer et al Provide New Insights into Bone Research (Methionine–Restricted Diet Increases miRNAs That Can Target RUNX2 Expression and Alters Bone Structure in Young Mice) … p.8775

Diarylheptanoids. Study Findings from Jamia Millia Islamia Provide New Insights into Diarylheptanoids (Characterization and anti–proliferative activity of curcumin loaded chitosan nanoparticles in cervical cancer) … p.8776

Blood Pressure. Study Findings from Jena University Hospital Broaden Understanding of Blood Pressure (Dysautonomia in prodromal a–synucleinopathy; peripheral versus central autonomic degeneration) … p.8777

Hematologic Diseases and Conditions - Thrombocytopenic Purpura. Study Findings from Johannes Gutenberg–University Provide New Insights into Thrombocytopenic Purpura (Idiopathic thrombotic thrombocytopenic purpura: strongest risk factor for relapse
January 14, 2017

Mental Health. Study Findings from Johns Hopkins School of Nursing Broaden Understanding of Mental Health (Reproductive coercion, sexual risk behaviours and mental health symptoms among young low–income behaviourally bisexual women: implications for nursing ...) ... p.8779

Drugs and Therapies - Drug Delivery Systems. Study Findings from Justus–Liebig–University Provide New Insights into Drug Delivery Systems [Innovative formulations for controlled drug delivery to the lungs and the technical and toxicological challenges to overcome(,) ...] ... p.8780

Drugs and Therapies - Toxicology and Pharmacology. Study Findings from K. Stanton et al Broaden Understanding of Toxicology and Pharmacology (Quantifying the benefits of using read–across and in silico techniques to fulfill hazard data requirements for chemical categories) ... p.8781

Adrenal Gland Diseases and Conditions - Hyperaldosteronism. Study Findings from Kanazawa University Broaden Understanding of Hyperaldosteronism (Comparison of eplerenone and spironolactone for the treatment of primary aldosteronism) ... p.8782

Skin Diseases and Conditions - Erythema Multiforme. Study Findings from Kinki University School of Medicine Provide New Insights into Erythema Multiforme (Phase I/II Study of Sorafenib in Combination with Hepatic Arterial Infusion Chemotherapy Using Low–Dose Cisplatin and 5–Fluorouracil) ... p.8783

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Findings from Ludwig–Maximilians–University Provide New Insights into Alzheimer Disease (sTREM2 cerebrospinal fluid levels are a potential biomarker for microglia activity in early–stage Alzheimer's disease and associate with neuronal ...) ... p.8784

Cardiology. Study Findings from Maastricht University Broaden Understanding of Cardiology (Abnormal Ventricular and Aortic Wall Properties Can Cause Inconsistencies in Grading Aortic Regurgitation Severity: A Computer Simulation Study) ... p.8786

Bone Research. Study Findings from Mayo Clinic Broaden Understanding of Bone Research (Deletion of Estrogen Receptor Beta in Osteoprogenitor Cells Increases Trabecular but Not Cortical Bone Mass in Female Mice) ... p.8787

Cardiovascular Diseases and Conditions - Hereditary Hemorrhagic Telangiectasia. Study Findings from Mayo Clinic Broaden Understanding of Hereditary Hemorrhagic Telangiectasia (Effect of Center Volume on Outcomes in Hospitalized Patients With Hereditary Hemorrhagic Telangiectasia) ... p.8788

Oncology - Multiple Myeloma. Study Findings from Mayo Clinic Provide New Insights into Multiple Myeloma (IAP antagonists induce anti–tumor immunity in multiple myeloma) ... p.8789

Mosquito-Borne Diseases - Malaria. Study Findings from Medical Research Institute Provide New Insights into Malaria (The Impact of Established Immunoregulatory Networks on Vaccine Efficacy and the Development of Immunity to Malaria) ... p.8791
Life Science Research - Molecular Biology. Study Findings from Medical University Broaden Understanding of Molecular Biology [Synthesis and In Vitro Antiproliferative Activity of Novel Phenyl Ring–Substituted 5–Alkyl–12(H) –quino[3,4–b][1,4]benzothiazine Derivatives] … p.8792

Cardiology. Study Findings from Memorial Sloan–Kettering Cancer Center Broaden Understanding of Cardiology (Roadmap for biomarkers of cancer therapy cardiotoxicity) … p.8793

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Study Findings from Mossakowski Medical Research Center Provide New Insights into Type 2 Diabetes (SIRT1–AMPK crosstalk is involved in high glucose–dependent impairment of insulin responsiveness in primary rat podocytes) … p.8794

Drugs and Therapies - Gamma-aminobutyric Acid Analogs. Study Findings from Okayama University Provide New Insights into Gamma–aminobutyric Acid Analogs (Activation of Antioxidative Functions by Radon Inhalation Enhances the Mitigation Effects of Pregabalin on Chronic Constriction Injury–Induced …) … p.8795

Oncology - Carcinomas. Study Findings from Oscar Lambret Center Broaden Understanding of Carcinomas [Fluorescence–assisted sentinel (SND) and pelvic node dissections by single–port transvaginal laparoscopic surgery, for the management of an endometrial carcinoma (EC) …] … p.8796

Mycobacterium Infections - Tuberculosis. Study Findings from Otsuka Pharmaceutical Development & Commercialization, Inc. Provide New Insights into Tuberculosis (Delamanid Coadministered with Antiretroviral Drugs or Antituberculosis Drugs Shows No Clinically Relevant Drug–Drug …)

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Study Findings from PLA General Hospital Provide New Insights into Type 2 Diabetes (Human umbilical cord–derived mesenchymal stem cells elicit macrophages into an anti–inflammatory phenotype to alleviate insulin resistance in type 2 diabetic …) … p.8799

Cardiovascular Diseases and Conditions - Atherosclerosis. Study Findings from Pennsylvania State University Provide New Insights into Atherosclerosis (High fructose–mediated attenuation of insulin receptor signaling does not affect PDGF–induced proliferative signaling in vascular smooth muscle cells) … p.8800

Oncology - Prostate Cancer. Study Findings from Peter MacCallum Cancer Center Provide New Insights into Prostate Cancer (Restoration of tumor suppression in prostate cancer by targeting the E3 ligase E6AP) … p.8801

January 14, 2017

Oncology - Chronic Myeloid Leukemia. Study Findings from Pondicherry University Provide New Insights into Chronic Myeloid Leukemia (Hsp90 Inhibitors for the Treatment of Chronic Myeloid Leukemia) … p.8803

Oncology - Rhabdomyosarcomas. Study Findings from Postgraduate Institute of Medical Education and Research Provide New Insights into Rhabdomyosarcomas (Adult rhabdomyosarcoma: Clinical presentation, treatment, and outcome) … p.8804

Gram-Negative Bacteria - Helicobacter pylori. Study Findings from Qingdao University Broaden Understanding of Helicobacter pylori (Association of Endoscopic Features of Gastric Mucosa with Helicobacter pylori Infection in Chinese Patients) … p.8805

Skin Diseases and Conditions - Psoriasis. Study Findings from R. Nguyen et al Broaden Understanding of Psoriasis (Five–year experience with infliximab: Follow up of the product familiarisation program) … p.8806

Speech, Language and Learning Diseases and Conditions. Study Findings from Radboud University Broaden Understanding of Speech, Language and Learning Diseases and Conditions (Functional characterization of rare FOXP2 variants in neurodevelopmental disorder) … p.8807

Hematology - Laboratory Hematology. Study Findings from S. Buoro et al Provide New Insights into Laboratory Hematology (Mindray BC–6800 body fluid mode, performance of nucleated cells, and differential count in ascitic and pleural fluids) … p.8808

Nervous System Diseases and Conditions - Normal Pressure Hydrocephalus. Study Findings from S. Yamada et al Provide New Insights into Normal Pressure Hydrocephalus (Choroidal fissure acts as an overflow device in cerebrospinal fluid drainage: morphological comparison between idiopathic and secondary normal–pressure ...) … p.8809

Oncology - Burkitt Lymphoma. Study Findings from Safdarjang Hospital Provide New Insights into Burkitt Lymphoma (Disseminated Renal Burkitt Lymphoma With Malignant Inferior Vena Caval Thrombosis in a Child) … p.8810

Oncology - Gastric Cancer. Study Findings from Saga University Broaden Understanding of Gastric Cancer (Impaired mitophagy activates mtROS/HIF–1a interplay and increases cancer aggressiveness in gastric cancer cells under hypoxia) … p.8811

Angiology. Study Findings from Shengjing Hospital Broaden Understanding of Angiology (Progranulin and short–term outcome in patients with acute ischaemic stroke) … p.8813

Eye Diseases and Conditions - Persistent Hyperplastic Primary Vitreous. Study Findings from Shiraz University of Medical Sciences Broaden Understanding of Persistent Hyperplastic Primary Vitreous (Severe hemophilia in a girl infant with mosaic Turner syndrome and persistent hyperplastic primary vitreous) … p.8814

Mosquito-Borne Diseases - Malaria. Study Findings from Singapore National University Broaden Understanding of Malaria (Ex Vivo Maturation Assay for Testing Antimalarial Sensitivity of Rodent Malaria Parasites) … p.8815
January 14, 2017

Surgery - Endarterectomy. Study Findings from St. George's Vascular Institute Broaden Understanding of Endarterectomy (Editor's Choice – Delays to Surgery and Procedural Risks Following Carotid Endarterectomy in the UK National Vascular Registry) … p.8816

Information Technology - Electronic Medical Records. Study Findings from St. Jude Children's Research Hospital Provide New Insights into Electronic Medical Records (Integrating pharmacogenomics into electronic health records with clinical decision support) … p.8817

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Study Findings from Sungkyunkwan University Broaden Understanding of Type 2 Diabetes [Inhibitory Effect of Methyl 2–(4′–Methoxy–4′–oxobutanamide) Benzoate from Jerusalem Artichoke (Helianthus tuberosus) on the Inflammatory Paracrine Loop …] … p.8818

Drugs and Therapies - Dopaminergic Antiparkinsonism Agents. Study Findings from Suven Life Sciences Ltd Broaden Understanding of Dopaminergic Antiparkinsonism Agents (Development and Validation of a RP–HPLC Method for Determination of Related Substances and Degradants in Entacapone) … p.8819

Nutritional and Metabolic Diseases and Conditions - Type 1 Diabetes Mellitus. Study Findings from Swiss Federal Institute of Technology Broaden Understanding of Type 1 Diabetes Mellitus (beta–cell–mimetic designer cells provide closed–loop glycemic control) … p.8820

DNA Research. Study Findings from Tabriz University of Medical Sciences Provide New Insights into DNA Research (DNA damage response regulation by microRNAs as a therapeutic target in cancer) … p.8821

Heart Disorders and Diseases - Heart Attack. Study Findings from Tabriz University of Medical Sciences Provide New Insights into Heart Attack (The Value of Lead aVR ST Segment Changes in Localizing Culprit Lesion in Acute Inferior Myocardial Infarction and Its Prognostic Impact) … p.8822

Central Nervous System Diseases and Conditions - Progressive Multifocal Leukoencephalopathy. Study Findings from Temple University Provide New Insights into Progressive Multifocal Leukoencephalopathy (Diagnostic assays for polyomavirus JC and progressive multifocal leukoencephalopathy) … p.8823

Nervous System Diseases and Conditions - Neurofibromatosis Type 1. Study Findings from Tongji University Broaden Understanding of Neurofibromatosis Type 1 (Novel mutations in one allele in a Chinese family with neurofibromatosis type 1: Including a complex insertion–deletion mutation) … p.8824

Antioxidants. Study Findings from Trakia University Broaden Understanding of Antioxidants (Protective effect of two essential oils isolated from Rosa damascena Mill. and Lavandula angustifolia Mill, and two classic antioxidants against L–dopa oxidative …) … p.8825

Heart Disorders and Diseases - Heart Attack. Study Findings from Tulane University Provide New Insights into Heart Attack (Multivessel Revascularization Does Not Increase Contrast–Induced Acute Kidney Injury Incidence in Acute Myocardial Infarction: A Meta–Analysis) … p.8826

Biomedical Engineering - Regenerative Medicine. Study Findings from Tulane University School of Medicine Provide New Insights into Regenerative Medicine (Human Adipose Stromal/Stem Cells from Obese Donors Show Reduced Efficacy in Halting Disease Progression in the
Experimental Autoimmune ...) … p.8827

Granulocytes. Study Findings from University Hospital Provide New Insights into Granulocytes (Ascites' neutrophil function is significantly impaired in patients with decompensated cirrhosis but can be restored by autologous plasma incubation) … p.8828

Inflammation. Study Findings from University Medical Center Broaden Understanding of Inflammation (miR–146a–mediated suppression of the inflammatory response in human adipocytes) … p.8829

Mental Health. Study Findings from University of Abertay Provide New Insights into Mental Health (Predictive validity of the HCR–20 for violent and non–violent sexual behaviour in a secure mental health service) … p.8830

Health and Medicine - Medical Hypotheses. Study Findings from University of Amsterdam Provide New Insights into Medical Hypotheses (Wound scabs protect regenerating tissue against harmful ultraviolet radiation) … p.8831

Oncology - Pancreatic Cancer. Study Findings from University of California Broaden Understanding of Pancreatic Cancer (Molecular network, pathway, and functional analysis of–time dependent gene changes associated with pancreatic cancer susceptibility to oncolytic vaccinia ...) … p.8832

Oncology - Prostate Cancer. Study Findings from University of Colorado Broaden Understanding of Prostate Cancer (Survival outcomes of combined external beam radiotherapy and brachytherapy vs. brachytherapy alone for intermediate–risk prostate cancer patients using the ...) … p.8833

Transfusion Medicine - Blood Transfusion. Study Findings from University of Heidelberg Broaden Understanding of Blood Transfusion (Neuronal HIF–1 alpha and HIF–2 alpha deficiency improves neuronal survival and sensorimotor function in the early acute phase after ischemic stroke) … p.8834

Oncology - Cancer Care. Study Findings from University of Jaen Provide New Insights into Cancer Care (Coping strategies and anxiety in caregivers of palliative cancer patients) … p.8835

Hearing Diseases and Conditions - Tinnitus. Study Findings from University of Klagenfurt Broaden Understanding of Tinnitus (Differential tinnitus–related neuroplastic alterations of cortical thickness and surface area) … p.8836

Oncology - Prostate Cancer. Study Findings from University of Louisville Provide New Insights into Prostate Cancer (Inhibition of AKT promotes FOXO3a–dependent apoptosis in prostate cancer) … p.8837

Nephrology. Study Findings from University of Manchester Broaden Understanding of Nephrology (Novel minimal physiologically–based model for the prediction of passive tubular reabsorption and renal excretion clearance) … p.8838

Respiratory Tract Diseases and Conditions - Thoracic Aortic Aneurysm. Study Findings from University of Miami Jackson Memorial Hospital Broaden Understanding of Thoracic Aortic Aneurysm (TEVAR for Flash Pulmonary Edema Secondary to Thoracic Aortic Aneurysm to Pulmonary Artery Fistula) … p.8839

Oncology - Colon Cancer. Study Findings from University of Michigan Broaden Understanding of Colon Cancer (Transcription Factor ZBP–89 Drives a Feedforward Loop of beta–Catenin Expression in Colorectal Cancer) … p.8840
January 14, 2017

Fungal Diseases and Conditions - Candida. Study Findings from University of Milan Broaden Understanding of Candida [CAND–LO 2014–15 study: changing epidemiology of candidemia in Lombardy (Italy)] … p.8841

Cardiovascular Diseases and Conditions - Arteriovenous Fistula. Study Findings from University of New Mexico Provide New Insights into Arteriovenous Fistula (Transverse Sinus Dural Arteriovenous Fistula Presenting with Acute Hydrocephalus from Cerebellar Venous Engagement Resolving with Endovascular ...) … p.8842

Oncology - Brain Cancer. Study Findings from University of Paris Broaden Understanding of Brain Cancer (The multidimensional burden of informal caregivers in primary malignant brain tumor) … p.8843

Peptide Proteins - Peptide Hormones. Study Findings from University of Paris Provide New Insights into Peptide Hormones (Hypothalamic regulation of body growth and appetite by ghrelin–derived peptides during balanced nutrition or undernutrition) … p.8844

Oncology. Study Findings from University of Paris–Sud Broaden Understanding of Oncology (Fertility–sparing surgery in epithelial ovarian cancer: a systematic review of oncological issues) … p.8845

Mental Health Diseases and Conditions - Psychosis. Study Findings from University of Pennsylvania Hospital Broaden Understanding of Psychosis (Disrupted anatomic networks in the 22q11.2 deletion syndrome) … p.8846

Tumors. Study Findings from University of Pittsburgh Broaden Understanding of Tumors (Targeting regulatory T cells in tumors) … p.8847

Drugs and Therapies - Antineoplastics. Study Findings from University of Rochester Broaden Understanding of Antineoplastics (Fetal Myelomeningocele After Maternal Methotrexate Administration A Case Report) … p.8849

Drugs and Therapies - Carbamazepine Therapy. Study Findings from University of Rostock Broaden Understanding of Carbamazepine Therapy (A Case Report of a Carbamazepine Overdose With Focus on Pharmacokinetic Aspects) … p.8850

Digestive System Diseases and Conditions - Colitis. Study Findings from University of Sao Paulo Broaden Understanding of Colitis (Amelioration of experimental colitis after short–term therapy with glucocorticoid and its relationship to the induction of different regulatory markers) … p.8850

Disease Attributes - Chronic Disease. Study Findings from University of Sao Paulo Provide New Insights into Chronic Disease (Patterns of regional gray matter loss at different stages of schizophrenia: A multisite, cross–sectional VBM study in first–episode and chronic illness) … p.8852

Drugs and Therapies - Pharmacy Practice. Study Findings from University of Saskatchewan Provide New Insights into Pharmacy Practice (Evaluation of a refill synchronization program in two community pharmacies) … p.8853
January 14, 2017

Science. Study Findings from University of Sunshine Coast Provide New Insights into Science (Concordance between somatic copy number loss and down-regulated expression: A pan-cancer study of cancer predisposition genes) … p.8854

Propiophenones. Study Findings from University of Texas Medical Branch Broaden Understanding of Propiophenones (Bupropion therapy during pregnancy: the drug and its major metabolites in umbilical cord plasma and amniotic fluid) … p.8855

Genetics. Study Findings from University of Texas Provide New Insights into Genetics (LncPRESS1 is a p53-Regulated LncRNA that Safeguards Pluripotency by Disrupting SIRT6-Mediated De-acetylation of Histone H3K56) … p.8856

Oncology - Liver Cancer. Study Findings from University of Thessaly Broaden Understanding of Liver Cancer (HIF-2 alpha phosphorylation by CK1 delta promotes erythropoietin secretion in liver cancer cells under hypoxia) … p.8857

Blood Pressure. Study Findings from University of Tokyo Provide New Insights into Blood Pressure (Potassium depletion stimulates Na-Cl cotransporter via phosphorylation and inactivation of the ubiquitin ligase Kelch-like 3) … p.8858

Enzymes and Coenzymes - One-Carbon Group Transferases. Study Findings from University of Toronto Broaden Understanding of One-Carbon Group Transferases (Structural Chemistry of Human RNA Methyltransferases) … p.8859

Diseases and Conditions - Substance Withdrawal Syndrome. Study Findings from University of Toronto Provide New Insights into Substance Withdrawal Syndrome (Electronic Cigarettes for Smoking Cessation: A Systematic Review) … p.8860

www.NewsRx.com

Heart Disorders and Diseases - Cardiomyopathies. Study Findings from University of Tsukuba Provide New Insights into Cardiomyopathies (J Waves Are Associated With the Increased Occurrence of Life-Threatening Ventricular Tachyarrhythmia in Patients With Nonischemic Cardiomyopathy) … p.8862

Nutritional and Metabolic Diseases and Conditions - Obesity. Study Findings from University of Wollongong Provide New Insights into Obesity (Sleep Quality Subtypes and Obesity) … p.8863

Blood Pressure. Study Findings from University of Yuzuncu Yi Broaden Understanding of Blood Pressure (The effect of low-sodium dialysate on ambulatory blood pressure measurement parameters in patients undergoing hemodialysis) … p.8864

Science. Study Findings from Uppsala University Broaden Understanding of Science (Iron chelators target both proliferating and quiescent cancer cells) … p.8865

Diabetic Neuropathy. Study Findings from Xi’an Jiao Tong University Provide New Insights into Diabetic Neuropathy (Identification of genes and signaling pathways associated with diabetic neuropathy using a weighted correlation network analysis A consort study) … p.8865

Oncology - Leukemia. Study Findings from Y.N. Wang et al Provide New Insights into Leukemia (Changes in cellular glycosylation of leukemia cells upon treatment with acridone derivatives yield insight into drug action) … p.8867

Algorithms. Study Findings from Zhejiang University Provide New Insights into Algorithms (Recent Advances in Protein-Protein Docking) … p.8868
Nanotechnology - Nanoparticles. Study Findings from Zhejiang University Provide New Insights into Nanoparticles (Chitosan nanoparticles and their Tween 80 modified counterparts disrupt the developmental profile of zebrafish embryos) … p.8868

Enzymes and Coenzymes - Acyltransferases. Study Findings on Acyltransferases Are Outlined in Reports from Emory University (Tetrameric Acetyl-CoA Acetyltransferase 1 Is Important for Tumor Growth) … p.8869

Algorithms. Study Findings on Algorithms Are Outlined in Reports from University of Patras (Breast tomosynthesis using the multiple projection algorithm adapted for stationary detectors) … p.8870

Drugs and Therapies - Antibiotics. Study Findings on Antibiotics Are Outlined in Reports from Medical University (Understanding the Activity of Antibiotics in Cerebrospinal Fluid in vitro) … p.8871

Drugs and Therapies - Antibiotics. Study Findings on Antibiotics Are Outlined in Reports from Shaanxi Normal University (Combination of enzymatic degradation by chloroperoxidase with activated sludge treatment to remove sulfamethoxazole: performance, and eco-toxicity assessment) … p.8872

Drugs and Therapies - Antibiotics. Study Findings on Antibiotics Are Outlined in Reports from State University (Synergistic combinations of polymyxins) … p.8873

Drugs and Therapies - Antifungals. Study Findings on Antifungals Are Outlined in Reports from IMIM (Comparative Population Plasma and Tissue Pharmacokinetics of Micafungin in Critically Ill Patients with Severe Burn Injuries and Patients with Complicated Intra-Abdominal Infection) … p.8874

Drugs and Therapies - Antihyperlipidemic Agents. Study Findings on Antihyperlipidemic Agents Are Outlined in Reports from Temple University (Intracellular Unbound Atorvastatin Concentrations in the Presence of Metabolism and Transport) … p.8875

Drugs and Therapies - Antiretrovirals. Study Findings on Antiretrovirals Are Outlined in Reports from Johns Hopkins University Bloomberg School of Public Health (Detectable Tenofovir Levels in Breast-Feeding Infants of Mothers Exposed to Topical Tenofovir) … p.8876

Drugs and Therapies - Antiretrovirals. Study Findings on Antiretrovirals Are Outlined in Reports from State University (The Initial Months of Antiretroviral Therapy and Its Influence on AGEs, HMGB1, and sRAGE Levels in Asymptomatic HIV-Infected Individuals) … p.8877

Central Nervous System Diseases and Conditions - Arachnoid Cysts. Study Findings on Arachnoid Cysts Are Outlined in Reports from University of Washington (Prenatal Diagnosis of Chudley-McCullough Syndrome) … p.8878

Arterial Occlusive Disease. Study Findings on Arterial Occlusive Disease Are Outlined in Reports from National Taiwan University (Association between peripheral arterial occlusive disease and cardiothoracic ratio in patients on chronic hemodialysis) … p.8879

Cardiovascular Diseases and Conditions - Atherosclerosis. Study Findings on Atherosclerosis Are Outlined in Reports from University of Texas [Hemodynamic Correlates of Blood Pressure in Older Adults: The Atherosclerosis Risk in Communities (ARIC) Study] … p.8880
Heart Disorders and Diseases - Atrial Flutter. Study Findings on Atrial Flutter Are Outlined in Reports from Medical College (Improved Ventricular Function after TEE–guided Cardioversion of Atrial Arrhythmias in Patients after the Fontan Operation) … p.8881

Bioluminescence. Study Findings on Bioluminescence Are Outlined in Reports from George Washington University (A synthetic luciferin improves in vivo bioluminescence imaging of gene expression in cardiovascular brain regions) … p.8882

Hematology - Blood Coagulation Factors. Study Findings on Blood Coagulation Factors Are Outlined in Reports from University of Utah (Synergy Between Tissue Factor and Exogenous Factor XIa in Initiating Coagulation) … p.8884

Oncology - Breast Cancer. Study Findings on Breast Cancer Are Outlined in Reports from A. Simbrich and Colleagues (Trends in advanced breast cancer incidence rates after implementation of a mammography screening program in a German population) … p.8885

Oncology - Breast Cancer. Study Findings on Breast Cancer Are Outlined in Reports from Cancer Hospital (A nomogram to predict the probability of axillary lymph node metastasis in early breast cancer patients with positive axillary ultrasound) … p.8886

Oncology - Breast Cancer. Study Findings on Breast Cancer Are Outlined in Reports from University of Birmingham (Comparison of quadrant–specific breast cancer incidence trends in the United States and England between 1975 and 2013) … p.8887

Diagnostics and Screening - Breast Cancer Screening. Study Findings on Breast Cancer Screening Are Outlined in Reports from University of California (Inter–reader Variability in the Use of BI–RADS Descriptors for Suspicious Findings on Diagnostic Mammography: A Multi–institution Study of 10 …) … p.8888

Oncology - Cancer Prevention. Study Findings on Cancer Prevention Are Outlined in Reports from Harvard School of Medicine (Molecular Liver Cancer Prevention in Cirrhosis by Organ Transcriptome Analysis and Lysophosphatidic Acid Pathway Inhibition) … p.8889

Oncology - Cancer Risk. Study Findings on Cancer Risk Are Outlined in Reports from McMaster University (Biennial lung cancer screening in Canada with smoking cessation outcomes and cost–effectiveness) … p.8890

Drugs and Therapies - Cancer Therapy. Study Findings on Cancer Therapy Are Outlined in Reports from University of New South Wales (PEGylated Albumin–Based Polyion Complex Micelles for Protein Delivery) … p.8891

Carcinomas. Study Findings on Carcinomas Are Outlined in Reports from Ghent University Hospital [Pretreatment with VEGF(R)–inhibitors reduces interstitial fluid pressure, increases intraperitoneal chemotherapy drug penetration, and impedes tumor growth in a …] … p.8892

Oncology - Carcinomas. Study Findings on Carcinomas Are Outlined in Reports from Sapienza University (Clinical experience with everolimus in the second–line treatment of advanced renal cell carcinoma) … p.8893

Cardiology. Study Findings on Cardiology Are Outlined in Reports from Institute for Cardiovascular Diseases (Successful surgical repair of a triple cardiac rupture using modified cohesive double patch technique) … p.8894

Cardiovascular Diseases. Study Findings on Cardiovascular Diseases Are Outlined in Reports from University of Queensland School of Medicine (The Association between HbA1c and Cardiovascular Disease Markers in a Remote Indigenous Australian Community with and without …)

Chemical Research. Study Findings on Chemical Research Are Outlined in Reports from AstraZeneca (Reactive Metabolites: Current and Emerging Risk and Hazard Assessments) … p.8897

Oncology - Cholangiocarcinoma. Study Findings on Cholangiocarcinoma Are Outlined in Reports from People's Hospital (Profiling of downregulated blood–circulating miR–150–5p as a novel tumor marker for cholangiocarcinoma) … p.8898

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Study Findings on Chronic Hepatitis B Virus Are Outlined in Reports from Mahidol University (Treatment outcomes and validation of the stopping rule for response to peginterferon in chronic hepatitis B: A Thai nationwide cohort study) … p.8899

Kidney Diseases and Conditions - Chronic Kidney Disease. Study Findings on Chronic Kidney Disease Are Outlined in Reports from Federal University (Protein–Bound Uremic Toxins from Gut Microbiota and Inflammatory Markers in Chronic Kidney Disease) … p.8900

Digestive System Diseases and Conditions - Colitis. Study Findings on Colitis Are Outlined in Reports from Guangzhou University (Huangqin–tang ameliorates dextran sodium sulphate–induced colitis by regulating intestinal epithelial cell homeostasis, inflammation and immune response) … p.8901

Oncology - Colon Cancer. Study Findings on Colon Cancer Are Outlined in Reports from Mayo Clinic (Stool DNA Analysis is Cost–Effective for Colorectal Cancer Surveillance in Patients With Ulcerative Colitis) … p.8902

Oncology - Colon Cancer. Study Findings on Colon Cancer Are Outlined in Reports from University Medical Center (Significant increase of synchronous disease in first–line metastatic colorectal cancer trials: Results of a systematic review) … p.8903

Biology - Computational Biology. Study Findings on Computational Biology Are Outlined in Reports from University of Oviedo (Impact of Microarray Preprocessing Techniques in Unraveling Biological Pathways) … p.8904

Diseases and Conditions - Coxsackievirus. Study Findings on Coxsackievirus Are Outlined in Reports from Harbin Medical University (Coxsackievirus B3 induces the formation of autophagosomes in cardiac fibroblasts both in vitro and in vivo) … p.8905

DNA Research. Study Findings on DNA Research Are Outlined in Reports from University of Copenhagen (SCAI promotes DNA double–strand break repair in distinct chromosomal contexts) … p.8907

Nutritional and Metabolic Diseases and Conditions - Diabetes and Obesity. Study Findings on Diabetes and Obesity Are Outlined in Reports from Children's Hospital (Genomic insights into growth and its disorders: an update) … p.8908

Health and Medicine - Diet and Nutrition. Study Findings on Diet and Nutrition Are Outlined in Reports from German Institute of Human Nutrition (Effect of diet on mortality and cancer recurrence among cancer survivors: a systematic review and meta–analysis of cohort studies) … p.8908
January 14, 2017

Drug Development. Study Findings on Drug Development Are Outlined in Reports from Hebrew University (Importance of ABC Transporters in Drug Development) ... p.8909

Edema. Study Findings on Edema Are Outlined in Reports from Peking University (Heterogeneous Characteristics Of Mri Changes Of Thigh Muscles In Patients With Dystrophinopathy) ... p.8910

Environmental Health - Environmental Research and Public Health. Study Findings on Environmental Research and Public Health Are Outlined in Reports from Chosun University (Association between Family and Friend Smoking Status and Adolescent Smoking Behavior and E–Cigarette Use in Korea) ... p.8911

Hormones - Estradiol Congeners. Study Findings on Estradiol Congeners Are Outlined in Reports from Shanghai Jiao–Tong University (Different effect of testosterone and oestrogen on urinary excretion of metformin via regulating OCTs and MATEs expression in the kidney of mice) ... p.8912

Genetics - Genetic Epidemiology. Study Findings on Genetic Epidemiology Are Outlined in Reports from School of Public Health (Validity of using ad hoc methods to analyze secondary traits in case–control association studies) ... p.8913

Oncology - Gliomas. Study Findings on Gliomas Are Outlined in Reports from Y.F. Gao and Colleagues (A critical overview of long non–coding RNA in glioma etiology 2016: an update) ... p.8914

Immunology - Granulocytes. Study Findings on Granulocytes Are Outlined in Reports from University of Wisconsin (Rac2 Functions in Both Neutrophils and Macrophages To Mediate Motility and Host Defense in Larval Zebrafish) ... p.8915

www.NewsRx.com

Heart Disorders and Diseases - Heart Attack. Study Findings on Heart Attack Are Outlined in Reports from Cardiovascular Outcomes Research (Predicting Likelihood for Coronary Artery Bypass Grafting After Non–ST–Elevation Myocardial Infarction: Finding the Best Prediction Model) ... p.8916

Heart Disorders and Diseases - Heart Failure. Study Findings on Heart Failure Are Outlined in Reports from University of Groningen (Optimizing clinical use of biomarkers in high–risk acute heart failure patients) ... p.8917

Drugs and Therapies - Hesperetin Therapy. Study Findings on Hesperetin Therapy Are Outlined in Reports from Warsaw University of Life Sciences (Antispasmodic effect of selected Citrus flavonoids on rat isolated jejunal specimens) ... p.8918

Genetics - Human Genetics. Study Findings on Human Genetics Are Outlined in Reports from Leibniz University (Content Analysis of Informed Consent for Whole Genome Sequencing Offered by Direct–to–Consumer Genetic Testing Companies) ... p.8919

Human Papillomavirus. Study Findings on Human Papillomavirus Are Outlined in Reports from Research Institute (Intravaginal Administration of Fc–Fused IL7 Suppresses the Cervicovaginal Tumor by Recruiting HPV DNA Vaccine–Induced CD8 T Cells) ... p.8920

Cardiovascular Diseases and Conditions - Hyperemia. Study Findings on Hyperemia Are Outlined in Reports from Sahlgrenska University (Effects of nitroglycerine on coronary flow velocity before and during adenosine provoke) ... p.8921
January 14, 2017

Cardiovascular Diseases and Conditions - Hypertension. Study Findings on Hypertension Are Outlined in Reports from Imperial College (Associations of night-time road traffic noise with carotid intima–media thickness and blood pressure: The Whitehall II and SABRE study cohorts) … p.8922

Oncology - Lung Cancer. Study Findings on Lung Cancer Are Outlined in Reports from Leibniz University (Treatment–related experiences and preferences of patients with lung cancer: a qualitative analysis) … p.8924

Lung Diseases and Conditions - Lung Injury. Study Findings on Lung Injury Are Outlined in Reports from University of California (Cigarette smokers have exaggerated alveolar barrier disruption in response to lipopolysaccharide inhalation) … p.8925

Nutritional and Metabolic Diseases and Conditions - Malnutrition. Study Findings on Malnutrition Are Outlined in Reports from University of Toronto (Malnutrition–associated liver steatosis and ATP depletion is caused by peroxisomal and mitochondrial dysfunction) … p.8926

www.NewsRx.com

Science - Operations Science. Study Findings on Operations Science Are Outlined in Reports from National Chengchi University (On the risk prediction and analysis of soft information in finance reports) … p.8929

Drugs and Therapies - Pharmacoepidemiology. Study Findings on Pharmacoepidemiology Are Outlined in Reports from McGill University (Conditions for confounding of interactions) … p.8930

Gram-Negative Bacteria - Pseudomonas aeruginosa. Study Findings on Pseudomonas aeruginosa Are Outlined in Reports from G. Torrens and Colleagues (Activity of Ceftazidime–Avibactam against Clinical and Isogenic Laboratory Pseudomonas aeruginosa Isolates Expressing Combinations of Most Relevant …) … p.8931

Lung Diseases and Conditions - Pulmonary Hypertension. Study Findings on Pulmonary Hypertension Are Outlined in Reports from Peking Union Medical College (Glycoprotein 130 Inhibitor Ameliorates Monocrotaline–Induced Pulmonary Hypertension in Rats) … p.8932

Autoimmune Diseases and Conditions - Rheumatoid Arthritis. Study Findings on Rheumatoid Arthritis Are Outlined in Reports from Department of Rheumatology (The development of a questionnaire to evaluate rheumatoid arthritis patient's knowledge about methotrexate) … p.8933

Mental Health Diseases and Conditions - Schizophrenia. Study Findings on Schizophrenia Are Outlined in Reports from Tsinghua University (Variants in TERT influencing telomere length are associated with paranoid schizophrenia risk) … p.8934
Heart Disorders and Diseases - Sick Sinus Syndrome. Study Findings on Sick Sinus Syndrome Are Outlined in Reports from Tokyo Women's Medical University (Long–Term Outcome of Arterial Switch Operation Conversion After Failed Senning/Mustard Procedure) … p.8936

Oncology - Small Cell Lung Cancer. Study Findings on Small Cell Lung Cancer Are Outlined in Reports from Salamanca University Hospital (Stereotactic ablative radiotherapy for early stage non–small cell lung cancer: a word of caution) … p.8936

Oncology - Squamous Cell Carcinoma. Study Findings on Squamous Cell Carcinoma Are Outlined in Reports from University of Rochester [Systemic Therapy in Advanced Cutaneous Squamous Cell Carcinoma (CSCC) The Roswell Park Experience and a Review of the Literature] … p.8937

Therapeutics. Study Findings on Therapeutics Are Outlined in Reports from University of Girona (Psychostimulant drugs for cocaine dependence) … p.8938

Drugs and Therapies - Toxicology and Pharmacology. Study Findings on Toxicology and Pharmacology Are Outlined in Reports from D. Poddalgoda and Colleagues (Derivation of biomonitoring equivalent for inorganic tin for interpreting population–level urinary biomonitoring data) … p.8939

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. Study Findings on Type 2 Diabetes Are Outlined in Reports from F. Haenen and Colleagues (Roux–en–Y gastric bypass for obesity after Belsey–Mark IV for large hiatus hernia and intrathoracic stomach, in combination with gastroesophageal reflux ...) … p.8940

Health and Medicine - Urology. Study Findings on Urology Are Outlined in Reports from Children’s Hospital (Pathologic Risk Factors for Metastatic Disease in Postpubertal Patients With Clinical Stage I Testicular Stromal Tumors) … p.8941

Oncology - Urothelial Cancer. Study Findings on Urothelial Cancer Are Outlined in Reports from Medical University (Development of a Preoperative Nomogram Incorporating Biomarkers of Systemic Inflammatory Response to Predict Nonorgan–confined Urothelial Carcinoma of the ...) … p.8942

Vaccination. Study Findings on Vaccination Are Outlined in Reports from Institute of Child Health (Epidemiology and risk factors for pneumonia severity and mortality in Bangladeshi children < 5 years of age before 10–valent pneumococcal conjugate vaccine ...) … p.8943

Immunization - Vaccines. Study Findings on Vaccines Are Outlined in Reports from Institute of Molecular Genetics (Dendritic cells pulsed with tumor cells killed by high hydrostatic pressure induce strong immune responses and display therapeutic effects both in murine ...) … p.8944

Cardiovascular Diseases and Conditions - Venous Thromboembolism. Study Findings on Venous Thromboembolism Are Outlined in Reports from George Washington University (Incidence of Venous Thromboembolism in Transgender Women Receiving Oral Estradiol) … p.8945

Heart Disorders and Diseases - Atrial Fibrillation. Study Results from A.L. Ross et al Provide New Insights into Atrial Fibrillation (Comparison Of Weight–based Dose Vs. Standard Dose Diltiazem In Patients With Atrial Fibrillation Presenting To The Emergency Department) … p.8946
Drugs and Therapies - Heparin Therapy. Study Results from Ain Shams University Provide New Insights into Heparin Therapy (Buccal delivery of low molecular weight heparin by cationic polymethacrylate nanoparticles) … p.8947

Oncology - Pancreatic Cancer. Study Results from Albert Einstein Medical Center Broaden Understanding of Pancreatic Cancer (Metastatic pancreatic cancer presenting as linitis plastica of the stomach) … p.8949

Heart Disorders and Diseases - Tachycardia. Study Results from All India Institute of Medical Sciences Update Understanding of Tachycardia (Systemic Inflammatory Response Syndrome Following Percutaneous Nephrolithotomy; Assessment of Risk Factors and Their Impact on Patient Outcomes) … p.8949

Pregnancy Complications - Spontaneous Abortion. Study Results from Amiens University Hospital Broaden Understanding of Spontaneous Abortion (Antibodies directed against annexin A2 and obstetric morbidity) … p.8950

Connective Tissue Cells. Study Results from Anhui Medical University Provide New Insights into Connective Tissue Cells (Inhibitory effect of recombinant human endostatin on the proliferation of hypertrophic scar fibroblasts in a rabbit ear model) … p.8951

Oncology - Breast Cancer. Study Results from Army General Hospital Broaden Understanding of Breast Cancer (The Expression and Clinical Outcome of pCHK2–Thr68 and pCDC25C–Ser216 in Breast Cancer) … p.8953

Oncology - Gastric Cancer. Study Results from AstraZeneca Provide New Insights into Gastric Cancer (Intra–Tumoral Heterogeneity of HER2, FGFR2, CMET and ATM in Gastric Cancer: Optimizing Personalized Healthcare through Innovative Pathological and Statistical Analysis) … p.8954

Oncology - Lymphoma. Study Results from Banaras Hindu University Provide New Insights into Lymphoma (Chelerythrine delayed tumor growth and increased survival duration of Dalton’s lymphoma bearing BALB/c H(2d) mice by activation of NK cells in vivo) … p.8955

Cardiovascular Diseases and Conditions - Atherosclerosis. Study Results from Beth Israel Deaconess Medical Center Provide New Insights into Atherosclerosis (Circulating Des–gamma–carboxy prothrombin is not associated with cardiovascular calcification or stiffness: The Multi–Ethnic Study of …) … p.8956

Immunology - Immunoglobulins. Study Results from Boehringer Ingelheim Pharmaceuticals Provide New Insights into Immunoglobulins (Unexpected Potency Differences between B–Cell–Activating Factor (BAFF) Antagonist Antibodies against Various Forms of BAFF: Trimer, 60–Mer, and …) … p.8957

Oncology - Chronic Myeloid Leukemia. Study Results from CONICET Update Understanding of Chronic Myeloid Leukemia (GSTM1 and GSTP1, but not GSTT1 genetic polymorphisms are associated with chronic myeloid leukemia risk and treatment response) … p.8958

Biotechnology - Molecular Pharmaceutics. Study Results from CSIRO Update Understanding of Molecular Pharmaceutics (Modeling the Influence of Fatty Acid Incorporation on Mesophase Formation in Amphiphilic Therapeutic Delivery Systems) … p.8959

Oncology - Non-Small Cell Lung Cancer. Study Results from Cancer Institute Provide New Insights into Non–Small Cell Lung Cancer (Erlotinib, cabozantinib, or erlotinib plus cabozantinib as second–line or third–line treatment of patients with EGFR wild–type advanced non–small–cell lung …] … p.8960
Oncology - Prostate Cancer. Study Results from Cancer Institute Update Understanding of Prostate Cancer (Simple diagrammatic method to delineate male urethra in prostate cancer radiotherapy: an MRI based approach) … p.8961

Oncology - Gastric Cancer. Study Results from Capital Medical University Provide New Insights into Gastric Cancer (Prognostic significance of tumor–associated macrophages density in gastric cancer: a systemic review and meta–analysis) … p.8962

Oncology - Liver Cancer. Study Results from Capital Medical University Provide New Insights into Liver Cancer (Combination of transcatheter arterial chemoembolization and CT–guided percutaneous segment ablation for hepatocellular carcinoma therapy A retrospective study) … p.8963

Oncology - Pancreatic Cancer. Study Results from Charles University in the Area of Pancreatic Cancer Reported (Mutation analysis of the PALB2 gene in unselected pancreatic cancer patients in the Czech Republic) … p.8967

Congenital Diseases and Conditions - Congenital Heart Disease. Study Results from Chelsea and Westminster Hospital NHS Trust in the Area of Congenital Heart Disease Reported (Anaesthetic management of parturients with univentricular congenital heart disease and the Fontan operation) … p.8968

Drugs and Therapies - Cancer Therapy. Study Results from Chengdu Medical College in the Area of Cancer Therapy Reported (Mono–PEGylation of Alpha–MMC and MAP30 from Momordica charantia L.: Production, Identification and Anti–Tumor Activity) … p.8969

Drugs and Therapies - Cancer Therapy. Study Results from China Pharmaceutical University Update Understanding of Cancer Therapy (Design, Synthesis, and Biological Evaluation of Novel Cholesteryl Peptides with Anticancer and Multidrug Resistance–Reversing Activities) … p.8970

Nanotechnology - Nanoparticles. Study Results from Chongqing Key Lab of Agricultural Resources and Environment Broaden Understanding of Nanoparticles (The effect of different TiO2 nanoparticles on the release and transformation of mercury in sediment) … p.8971

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Results from Chung Shan Medical University Broaden Understanding of Alzheimer Disease (miR–302 Attenuates Amyloid–b–Induced Neurotoxicity through Activation of Akt Signaling) … p.8972
Biotechnology. Study Results from Cleveland Clinic Broaden Understanding of Biotechnology [Recommendations for neoadjuvant pathologic staging (ypTNM) of cancer of the esophagus and esophagogastric junction for the 8th edition AJCC/UICC staging manuals] ... p.8974

Life Science Research - Cryobiology. Study Results from Council of Scientific and Industrial Research (CSIR) Update Understanding of Cryobiology (Replacement of serum with ocular fluid for cryopreservation of immature testes) ... p.8975

Drugs and Therapies - Phytotherapy. Study Results from Creighton University Broaden Understanding of Phytotherapy (Hepatoprotective Effects of a Proprietary Glycyrrhizin Product during Alcohol Consumption: A Randomized, Double-Blind, Placebo-Controlled, Crossover Study) ... p.8976

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Results from D. Scarabino and Colleagues Broaden Understanding of Alzheimer Disease (Influence of family history of dementia in the development and progression of late-onset Alzheimer's disease) ... p.8977

Gram-Positive Bacteria - Streptomyces coelicolor. Study Results from DZIF German Center for Infection Research in the Area of Streptomyces coelicolor Reported [The VanRS Homologous Two-Component System VnlRS(Ab) of the Glycopeptide Producer Amycolatopsis balhimycina Activates Transcription of ...] ... p.8978

Cardiovascular Research. Study Results from Daiichi Sankyo Pharma Development Provide New Insights into Cardiovascular Research (Assessment of the Cardiovascular Risk of Olmesartan Medoxomil-Based Treatment: Meta-Analysis of Individual Patient Data) ... p.8979

Oncology - Prostate Cancer. Study Results from Dalian Institute of Chemical Physics in the Area of Prostate Cancer Reported (Integration of lipidomics and transcriptomics unravels aberrant lipid metabolism and defines cholesteryl olate as potential biomarker of prostate ...) ... p.8980

Cardiovascular Diseases and Conditions - Aneurysm. Study Results from Democritus University Update Understanding of Aneurysm (Estimating the influence of aortic-stent grafts after endovascular aneurysm repair: Are we missing something?) ... p.8981

Vessel Disease. Study Results from Department of Cardiology Update Understanding of Vessel Disease (Comparison of first- and second-generation drug-eluting stent efficacies for treating left main and/or three-vessel disease: a propensity matched study) ... p.8982

Angiology. Study Results from Department of Neurology in the Area of Angiology Reported (Factors associated with timing of early neurological improvement after thrombolysis for ischaemic stroke) ... p.8984

Women's Health - Obstetrics and Gynecology. Study Results from Department of Obstetrics & Gynecology Broaden Understanding of Obstetrics and Gynecology (Rupture risk factors of fallopian tubal pregnancy) ... p.8985

www.NewsRx.com
January 14, 2017

Genetics - Genetics and Cancer.  Study Results from Department of Pathology Update Understanding of Genetics and Cancer ( Secondary EWSR1 Gene Abnormalities in SMARC B1–Deficient Tumors with 22q11–12 Regional Deletions: Potential Pitfalls in Interpreting EWSR1 FISH Results) … p.8986

Drugs and Therapies - Immunotherapy.  Study Results from Department of Veterans Affairs in the Area of Immunotherapy Reported (Interleukin 2 Activates Brain Microvascular Endothelial Cells Resulting in Destabilization of Adherens Junctions) … p.8987

Amyotrophic Lateral Sclerosis.  Study Results from Division of Neurosciences Provide New Insights into Amyotrophic Lateral Sclerosis (Unraveling gene expression profiles in peripheral motor nerve from amyotrophic lateral sclerosis patients: insights into pathogenesis) … p.8988

Drugs and Therapies - Antiinfectives.  Study Results from Drexel University Broaden Understanding of Antiinfectives (Local delivery of minocycline from metal ion–assisted self–assembled complexes promotes neuroprotection and functional recovery after spinal cord injury) … p.8989

Membrane Proteins - Arrestins.  Study Results from Duke University Broaden Understanding of Arrestins (beta–Arrestin mediates the Frank–Starling mechanism of cardiac contractility) … p.8990

Oncology - Lung Cancer.  Study Results from Fox Chase Cancer Center in the Area of Lung Cancer Reported (End–of–Life Care in Patients with Metastatic Lung Cancer Harboring Epidermal Growth Factor Receptor Mutations) … p.8994

Oncology - Prostate Cancer.  Study Results from Fox Chase Cancer Center in the Area of Prostate Cancer Reported (The impact of trainee involvement on outcomes in low–dose–rate brachytherapy for prostate cancer) … p.8995

Drugs and Therapies - Drug Delivery Systems.  Study Results from Free University in the Area of Drug Delivery Systems Reported (Development of biodegradable hyperbranched core–multishell nanocarriers for efficient topical drug delivery) … p.8996

Genetics.  Study Results from French National Institute of Health and Medical Research (INSERM) in the Area of Genetics Reported (Constitutive p53 heightens mitochondrial apoptotic priming and favors cell death induction by BH3 mimetic inhibitors of BCL–xL) … p.8997

Oncology - Bladder Cancer.  Study Results from E.V. Filonenko et al Provide New Insights into Bladder Cancer [5–Aminolevulinic acid in intraoperative photodynamic therapy of bladder cancer (results of multicenter trial)] … p.8991

Cardiovascular Diseases and Conditions - Atherosclerosis.  Study Results from Fudan University Provide New Insights into Atherosclerosis (Exosomes derived from mature dendritic cells increase endothelial inflammation and atherosclerosis via membrane TNF–alpha mediated NF–kappa B
pathway) ... p.8998

Human Herpesvirus Diseases and Conditions - Epstein-Barr Virus. Study Results from Fudan University Update Understanding of Epstein–Barr Virus (Acute viral hepatitis presenting as cytomegalovirus, hepatitis E and Epstein–Barr virus IgM antibody positive) ... p.8999

Proteins - DNA-Binding Proteins. Study Results from Fudan University in the Area of DNA–Binding Proteins Reported (Dihydroartemisinin inhibits catabolism in rat chondrocytes by activating autophagy via inhibition of the NF–kappa B pathway) ... p.8999

Myeloid Cells. Study Results from Fukuoka University Provide New Insights into Myeloid Cells (IL–1 beta promotes tubulointerstitial injury in MPO–ANCA–associated glomerulonephritis) ... p.9000

Drugs and Therapies - Drug Delivery Systems. Study Results from Genentech, Inc. Broaden Understanding of Drug Delivery Systems (Targeted drug delivery through the traceless release of tertiary and heteroaryl amines from antibody–drug conjugates) ... p.9002

Oncology - Gastric Cancer. Study Results from Genome Institute in the Area of Gastric Cancer Reported (ADAR–Mediated RNA Editing Predicts Progression and Prognosis of Gastric Cancer) ... p.9003

Disease Attributes - Chronic Disease. Study Results from German Cancer Research Center Broaden Understanding of Chronic Disease (The effects of intermittent calorie restriction on metabolic health: Rationale and study design of the HELENA Trial) ... p.9004

Gram-Negative Bacteria - Acinetobacter baumannii. Study Results from Grand Valley State University Broaden Understanding of Acinetobacter baumannii (Clinical Variants of the Native Class D beta–Lactamase of Acinetobacter baumannii Pose an Emerging Threat through Increased Hydrolytic Activity ...) ... p.9005

Hematologic Diseases and Conditions - Myelodysplastic Syndromes. Study Results from Grigore T. Popa University of Medicine and Pharmacy in the Area of Myelodysplastic Syndromes Reported (Using Iron Chelators – deferasirox in the Treatment of Hypersiderosis) ... p.9006

Oncology - Lung Cancer. Study Results from Guangdong General Hospital Provide New Insights into Lung Cancer (Leptomeningeal Metastases in Patients with NSCLC with EGFR Mutations) ... p.9007

Oncology - Oral Cancer. Study Results from Guangzhou Medical University Provide New Insights into Oral Cancer (Overexpression of HOXB7 protein reduces sensitivity of oral cancer cells to chemo–radiotherapy) ... p.9008

Oncology - Osteosarcomas. Study Results from Guangzhou Medical University Provide New Insights into Osteosarcomas (Long non–coding RNA TUG1 contributes to tumorigenesis of human osteosarcoma by sponging miR–9–5p and regulating POU2F1 expression) ... p.9009

Hemodialysis. Study Results from Harvard School of Medicine Provide New Insights into Hemodialysis (Factors associated with the receipt of antimicrobials among chronic hemodialysis patients) ... p.9010
January 14, 2017

Oncology - Gliomas. Study Results from Harvard School of Medicine Update Understanding of Gliomas (Phase I study of low–dose metronomic temozolomide for recurrent malignant gliomas) … p.9011

Genetics - Medical Genetics. Study Results from Harvard School of Medicine in the Area of Medical Genetics Reported (Family health history reporting is sensitive to small changes in wording) … p.9012

Influenza A Virus Subtype H1N1. Study Results from Haukeland Hospital Provide New Insights into Influenza A Virus Subtype H1N1 [Pulmonary changes in Norwegian fatal cases of pandemic influenza H1N1 (2009) infection: a morphologic and molecular genetic study] … p.9013

Peptide Proteins - Proinsulin. Study Results from Helwan University Update Understanding of Proinsulin (Selenium Nanoparticles Attenuate Oxidative Stress and Testicular Damage in Streptozotocin–Induced Diabetic Rats) … p.9015

Drugs and Therapies - Vancomycin Resistance. Study Results from Henry Ford Hospital Update Understanding of Vancomycin Resistance (Vancomycin–Resistant Enterococci Epidemiology, Infection Prevention, and Control) … p.9016

Enzymes and Coenzymes. Study Results from Hokkaido University Broaden Understanding of Enzymes and Coenzymes [Alternative Selection of beta–Site APP–Cleaving Enzyme 1 (BACE1) Cleavage Sites in Amyloid beta–Protein Precursor (APP) Harboring Protective and Pathogenic …] … p.9017

Autoinflammatory Diseases and Conditions - Cryopyrin-Associated Periodic Syndromes. Study Results from Hospital Clinic Update Understanding of Cryopyrin–Associated Periodic Syndromes (Late–Onset Cryopyrin–Associated Periodic Syndrome Due to Myeloid–Restricted Somatic NLRP3 Mosaicism) … p.9018

Oncology - Rhabdoid Tumors. Study Results from Hospital for Sick Children Provide New Insights into Rhabdoid Tumors [Integrated (epi)–Genomic Analyses Identify Subgroup–Specific Therapeutic Targets in CNS Rhabdoid Tumors] … p.9019

Nutritional and Metabolic Diseases and Conditions - Vitamin A Deficiency. Study Results from Howard Hughes Medical Institute Broaden Understanding of Cystic Fibrosis (Atomic Structure of the Cystic Fibrosis Transmembrane Conductance Regulator) … p.9021

Lung Diseases and Conditions - Cystic Fibrosis. Study Results from Howard Hughes Medical Institute Broaden Understanding of Cystic Fibrosis (Atomic Structure of the Cystic Fibrosis Transmembrane Conductance Regulator) … p.9021

Myeloid Cells. Study Results from Huazhong Agricultural University Update Understanding of Myeloid Cells (Surfactin inducing mitochondria–dependent ROS to activate MAPKs, NF–kappa B and inflammasomes in macrophages for adjuvant activity) … p.9022

Digestive System Diseases and Conditions - Gastrointestinal Neoplasms. Study Results from Huazhong University of Science and Technology in the Area of Gastrointestinal Neoplasms Reported (KIT over–expression by p55PIK–PI3K leads to Imatinib–resistance in patients
January 14, 2017

Oncology - Acute Myeloid Leukemia. Study Results from IDIBAPS Update Understanding of Acute Myeloid Leukemia (The expression level of BAALC–associated microRNA miR–3151 is an independent prognostic factor in younger patients with cytogenetic intermediate–risk acute myeloid ...) … p.9024

Oncology - Multiple Myeloma. Study Results from Indiana University School of Medicine in the Area of Multiple Myeloma Reported (Cell Adhesion Molecule CD166 Drives Malignant Progression and Osteolytic Disease in Multiple Myeloma) … p.9025

Oncology - Chronic Lymphocytic Leukemia. Study Results from Institute for Cancer Research and Treatment (IRCCS) Broaden Understanding of Chronic Lymphocytic Leukemia (TCL1 transgenic mouse model as a tool for the study of therapeutic targets and microenvironment in human B–cell ...) … p.9026

Environmental Research. Study Results from Institute of Clinical Physiology Broaden Understanding of Environmental Research (Risk perception and access to environmental information in four areas in Italy affected by natural or anthropogenic pollution) … p.9027

Central Nervous System. Study Results from Institute of Gerontology Provide New Insights into Central Nervous System (Importance of P–gp PET Imaging in Pharmacology) … p.9028

Health and Medicine - Integrated Care. Study Results from Institute of Technology in the Area of Integrated Care Reported (Discharge Planning: Screening Older Patients for Multidisciplinary Team Referral) … p.9029

www.NewsRx.com

Oncology - Non-Hodgkin Lymphoma. Study Results from International Agency for Research on Cancer Broaden Understanding of Non–Hodgkin Lymphoma (The burden of non–Hodgkin lymphoma in Central and South America) … p.9030

Cardiovascular Diseases and Conditions - Thrombosis. Study Results from Istanbul University Broaden Understanding of Thrombosis (Behcet's disease: How to diagnose and treat vascular involvement) … p.9031

Drugs and Therapies - Cancer Therapy. Study Results from JSS University in the Area of Cancer Therapy Reported (Nanosponge Carriers– An Archetype Swing in Cancer Therapy: A Comprehensive Review) … p.9032

Transplant Medicine - Kidney Transplants. Study Results from Jikei University in the Area of Kidney Transplants Reported (Subclinical antibody–mediated rejection due to anti–human–leukocyteantigen–DR53 antibody accompanied by plasma cell–rich acute rejection in a patient with cadaveric ...) … p.9033

Oncology - Lung Cancer. Study Results from Jilin University Broaden Understanding of Lung Cancer (The proceedings of brain metastases from lung cancer) … p.9034

Cell Research - Blood Cells. Study Results from Juntendo University Broaden Understanding of Blood Cells [Leukocyte concentration and composition in platelet–rich plasma (PRP) influences the growth factor and protease concentrations] … p.9034

Drugs and Therapies - Antiretrovirals. Study Results from K.G. Bhavani et al Provide New Insights into Antiretrovirals (Determination of genotoxic impurity in atazanavir sulphate drug substance by LC–MS) … p.9036
Cardiovascular Diseases. Study Results from Kaohsiung Medical University Update Understanding of Cardiovascular Diseases (Angiopoietin–2, Angiopoietin–1 and subclinical cardiovascular disease in Chronic Kidney Disease) … p.9036

Oncology - Esophageal Cancer. Study Results from Karolinska Institute in the Area of Esophageal Cancer Reported (Prevalence and predictors of anxiety and depression among esophageal cancer patients prior to surgery) … p.9037

Immunology - Immunoglobulins. Study Results from Karolinska University Hospital Provide New Insights into Immunoglobulins (Targeting Receptor Tyrosine Kinases Using Monoclonal Antibodies: The Most Specific Tools for Targeted–Based Cancer Therapy) … p.9038

Health and Medicine - Dermatology. Study Results from Kawasaki Medical University in the Area of Dermatology Reported (Numerous intertriginous xanthomas in infant: A diagnostic clue for sitosterolemia) … p.9039

RNA Viruses - Influenza A Virus. Study Results from Korea Advanced Institute of Science and Technology (KAIST) Provide New Insights into Influenza A Virus (Structural features of influenza A virus panhandle RNA enabling the activation of RIG–I independently of 5’–triphosphate) … p.9040

Peptide Proteins - Posterior Pituitary Hormones. Study Results from L. Gebauer and Colleagues Broaden Understanding of Posterior Pituitary Hormones (Oxytocin improves synchronisation in leader–follower interaction) … p.9041

Butyric Acids. Study Results from L. Giampietro and Colleagues in the Area of Butyric Acids Reported (Synthesis of Naphthyl–, Quinolin– and Anthracenyl Analogues of Clofibric Acid as PPARα Agonists) … p.9042

Psychosocial. Study Results from La Timone Hospital Update Understanding of Psychosocial (Disclosure of research results: a randomized study on GENEPSO–PS cohort participants) … p.9044

Heart Disorders and Diseases - Heart Disease. Study Results from Lanzhou University in the Area of Heart Disease Reported (Efficacy and safety of long–term treatment with statins for coronary heart disease: A Bayesian network meta–analysis) … p.9045

Oncology - Breast Cancer. Study Results from Laval University in the Area of Breast Cancer Reported (Evaluation of human epidermal growth factor receptor 2 (HER2) single nucleotide polymorphisms (SNPs) in normal and breast tumor tissues and their link with breast cancer …] … p.9046

Cytokines. Study Results from Lomonosov Moscow State University Update Understanding of Cytokines (Myeloid–derived suppressor cells and proinflammatory cytokines as targets for cancer therapy) … p.9047

Oncology - Breast Cancer. Study Results from London School of Hygiene and Tropical Medicine Broaden Understanding of Breast Cancer (No 'cure' within 12 years of diagnosis among breast cancer patients who are diagnosed via mammographic
screening: women diagnosed in the ...) ... p.9048

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Study Results from Lund University Broaden Understanding of Chronic Obstructive Pulmonary Disease (Oxygen for breathlessness in patients with chronic obstructive pulmonary disease who do not qualify for home oxygen therapy) ... p.9049

Drugs and Therapies - Female Contraceptive Agents. Study Results from M. Rotermann et al Provide New Insights into Female Contraceptive Agents (Oral contraceptive use among women aged 15 to 49: Results from the Canadian Health Measures Survey) ... p.9050

Transmission Electron Microscopy. Study Results from M.C. Rusu and Colleagues Update Understanding of Transmission Electron Microscopy (Subsets of telocytes: Myocardial telocytes) ... p.9051

Immune System Diseases and Conditions - HIV/AIDS. Study Results from Maastricht University Update Understanding of HIV/AIDS (Comparison of urine samples and penile swabs for detection of human papillomavirus in HIV–negative Dutch men) ... p.9052

Oncology - Breast Cancer. Study Results from Mahidol University Update Understanding of Breast Cancer (5–Acetyl goniothalamin suppresses proliferation of breast cancer cells via Wnt/beta–catenin signaling) ... p.9053

Oncology - Gastric Cancer. Study Results from Mashhad University of Medical Sciences Broaden Understanding of Gastric Cancer (Circulating microRNAs as Potential Diagnostic Biomarkers and Therapeutic Targets in Gastric Cancer: Current Status and Future Perspectives) ... p.9054

www.NewsRx.com

Oncology - Multiple Myeloma. Study Results from Massachusetts General Hospital Update Understanding of Multiple Myeloma (Phase 1 Study of Tabalumab, a Human Anti–B–Cell Activating Factor Antibody, and Bortezomib in Patients with Relapsed/Refractory Multiple Myeloma) ... p.9055

Lymphoproliferative Diseases and Conditions - Granuloma. Study Results from Matsumoto Dental University Broaden Understanding of Granuloma (Pathological Analysis of Cell Differentiation in Cholesterol Granulomas Experimentally Induced in Mice) ... p.9057

Heart Disorders and Diseases - Heart Failure. Study Results from Mayo Clinic Provide New Insights into Heart Failure (Multimorbidity in Heart Failure: Effect on Outcomes) ... p.9058

Neurologic Diseases and Conditions - Neurodevelopmental Disorders. Study Results from McMaster University in the Area of Neurodevelopmental Disorders Reported (Wnt signaling networks in autism spectrum disorder and intellectual disability) ... p.9059

Oncology - Breast Cancer. Study Results from Medical University Provide New Insights into Breast Cancer (Dihydroartemisinin prevents breast cancer–induced osteolysis via inhibiting both breast cancer cells and osteoclasts) ... p.9060

Drugs and Therapies - Central Nervous System Depressants. Study Results from Medical University Provide New Insights into Central Nervous System Depressants (Continuous intra–articular local anesthetic drug instillation versus discontinuous sciatic nerve block after total knee arthroplasty) ... p.9061
January 14, 2017

Cardiovascular Diseases and Conditions - Carotid Stenosis. Study Results from Medical University in the Area of Carotid Stenosis Reported (Combined Effects of Inflammatory Status and Carotid Atherosclerosis A 12-Year Follow-Up Study) … p.9062

Health and Medicine - Prenatal Research. Study Results from Mercy Hospital for Women in the Area of Prenatal Research Reported (Measuring circulating placental RNAs to non-invasively assess the placental transcriptome and to predict pregnancy complications) … p.9063

Musculoskeletal Diseases and Conditions - Osteoporosis. Study Results from Mie University Broaden Understanding of Osteoporosis (Ginger hexane extract suppresses RANKL-induced osteoclast differentiation) … p.9064

Mosquito-Borne Diseases - Malaria. Study Results from Monash University Broaden Understanding of Malaria (Metabolomics-Based Screening of the Malaria Box Reveals both Novel and Established Mechanisms of Action) … p.9065

Respiratory Tract Diseases and Conditions - Human Influenza. Study Results from N. Gijjar et al Provide New Insights into Human Influenza [Co-expression of sialic acid receptors compatible with avian and human influenza virus binding in emus (Dromaius novaehollandiae)] … p.9066

Fatigue. Study Results from N. Strenzke and Colleagues Broaden Understanding of Fatigue (Hair cell synaptic dysfunction, auditory fatigue and thermal sensitivity in otoferlin ile515Thr mutants) … p.9067

Pheochromocytomas. Study Results from N. Sundahl and Colleagues in the Area of Pheochromocytomas Reported (A rare case of clinically and biochemically silent giant right pheochromocytoma: case report and review of literature) … p.9068

www.NewsRx.com

Heart Disorders and Diseases - Heart Failure. Study Results from N.M. Orr and Colleagues Broaden Understanding of Heart Failure (Skilled Nursing Facility Care for Patients With Heart Failure: Can We Make It "Heart Failure Ready?.") … p.9068

Oncology - Breast Cancer. Study Results from Nanjing Medical University Broaden Understanding of Breast Cancer [miR–222 induces Adriamycin resistance in breast cancer through PTEN/Akt/p27(kip1) pathway] … p.9069

Drugs and Therapies - Cromolyn Therapy. Study Results from Nanjing Medical University Broaden Understanding of Cromolyn Therapy (Cerebral Mast Cells Participate In Postoperative Cognitive Dysfunction by Promoting Astrocyte Activation) … p.9070

Oncology - Osteosarcomas. Study Results from Nanjing Medical University Provide New Insights into Osteosarcomas (Down-regulation of RBP–J mediated by microRNA–133a suppresses dendritic cells and functions as a potential tumor suppressor in osteosarcoma) … p.9071

Immune System Diseases and Conditions - Graft-Versus-Host Disease. Study Results from Nanjing Medical University Update Understanding of Graft–Versus–Host Disease (The impact of P2X7 receptor antagonist, brilliant blue G on graft–versus–host disease in mice after allogeneic hematopoietic stem cell ...) … p.9072

Musculoskeletal Diseases and Conditions - Arachnodactyly. Study Results from Nanjing University Broaden Understanding of Arachnodactyly (y The clinical application of preimplantation genetic diagnosis for the patient affected by congenital contractural arachnodactyly and spinal and bulbar muscular ...) … p.9073
Immune System Diseases and Conditions - HIV/AIDS. Study Results from National Cancer Institute Provide New Insights into HIV/AIDS (Role of APOBEC3F Gene Variation in HIV–1 Disease Progression and Pneumocystis Pneumonia) … p.9074

Genetics. Study Results from National Heart Lung and Blood Institute in the Area of Genetics Reported [Forkhead Box O3A (FOXO3) and the Mitochondrial Disulfide Relay Carrier (CHCHD4) Regulate p53 Protein Nuclear Activity in Response to Exercise] … p.9075

Hormones - Gastrointestinal Hormones. Study Results from National Taiwan University in the Area of Gastrointestinal Hormones Reported (Update on recent preclinical and clinical studies of T790M mutant–specific irreversible epidermal growth factor receptor tyrosine kinase inhibitors) … p.9076

Periodontal Diseases and Conditions - Gingival Overgrowth. Study Results from Nihon University Provide New Insights into Gingival Overgrowth (Possible pharmacotherapy for nifedipine–induced gingival overgrowth: 18α–glycyrrhetinic acid inhibits human gingival fibroblast growth) … p.9077

Oncology - Prostate Cancer. Study Results from Northwest A&F University Broaden Understanding of Prostate Cancer (Triptolide induces protective autophagy through activation of the CaMKKb–AMPK signaling pathway in prostate cancer cells) … p.9079

Hormones. Study Results from Northwestern University in the Area of Hormones Reported (Alcohol, cigarette smoking, and ovarian reserve in reproductive–age African–American women) … p.9080

Health and Medicine - Health and Society. Study Results from Norwegian University of Science and Technology (NTNU) in the Area of Health and Society Reported (The impact of neighborhood social capital on life satisfaction and self–rated health: A possible pathway for health promotion?) … p.9081

Oncology - Liver Cancer. Study Results from Ogaki Municipal Hospital Update Understanding of Liver Cancer (Utility of combined gray–scale and perflubutane contrast–enhanced ultrasound for diagnosing early hepatocellular carcinomas: Comparison of well differentiated and …) … p.9082

Biomedical Engineering - Tissue Engineering. Study Results from Okayama University Hospital Update Understanding of Tissue Engineering (Challenges to success in heart failure: Cardiac cell therapies in patients with heart diseases) … p.9083

Drugs and Therapies - Central Nervous System Agents. Study Results from Ordu University Provide New Insights into Central Nervous System Agents (Haemodynamic Responses to Tracheal Intubation Using Propofol, Etomidate and Etomidate–Propofol Combination in Anaesthesia Induction) … p.9084

Business - Small Business. Study Results from P. Westhead and Colleagues in the Area of Small Business Reported (Entrepreneurship education and entrepreneurial intention: Do female students benefit?) … p.9085

Oncology - Neuroblastomas. Study Results from P.Y. Liu and Colleagues Broaden Understanding of Neuroblastomas (NCYM is upregulated by lncUSMycN and modulates N–Myc expression) … p.9085

Epithelial Cells. Study Results from Pacific Dental College and Hospital Broaden Understanding of Epithelial Cells (Nuclear anomalies in exfoliated buccal epithelial cells of petrol station attendants in Udaipur, Rajasthan) … p.9086
Oncology - Basal Cell Cancer. Study Results from Peking University Update Understanding of Basal Cell Cancer (Heterozygous PTCH1 Mutations Impact the Bone Metabolism in Patients With Nevoid Basal Cell Carcinoma Syndrome Likely by Regulating SPARC Expression) … p.9087

Human Immunodeficiency Virus. Study Results from Pennsylvania State College Update Understanding of Human Immunodeficiency Virus [A non–cleavable hexahistidine affinity tag at the carboxyl–terminus of the HIV–1 Pr55(Gag) polyprotein alters nucleic acid binding properties] … p.9088

Platinum Compounds. Study Results from Q. Xie et al Provide New Insights into Platinum Compounds (ABT737 reverses cisplatin resistance by regulating ER–mitochondria Ca2+ signal transduction in human ovarian cancer cells) … p.9090

Nanotechnology - Biochips. Study Results from Queen’s University Broaden Understanding of Biochips (Genetic diagnosis of familial hypercholesterolaemia using a rapid biochip array assay for 40 common LDLR, APOB and PCSK9 mutations) … p.9090

Epithelial Cells. Study Results from Queensland University of Technology Provide New Insights into Epithelial Cells (Promotion of a cancer–like phenotype, through chronic exposure to inflammatory cytokines and hypoxia in a bronchial epithelial cell line model) … p.9092

Drugs and Therapies - Coagulants. Study Results from R. Sinha and Colleagues Broaden Understanding of Coagulants [The use of hemostatic spray as an adjunct to conventional hemostatic measures in high–risk nonvariceal upper GI bleeding (with video)] … p.9093

Myeloid Cells. Study Results from Radboud University in the Area of Myeloid Cells Reported (beta–Glucan Reverses the Epigenetic State of LPS–Induced Immunological Tolerance) … p.9094

Oncology - Penile Cancer. Study Results from Research Institute Update Understanding of Penile Cancer (Management of Penile Cancer) … p.9095

Mouth Diseases and Conditions - Stomatitis. Study Results from Research Institute in the Area of Stomatitis Reported (N–Myc expression enhances the oncolytic effects of vesicular stomatitis virus in human neuroblastoma cells) … p.9095

Clinical Research - Clinical Trials and Studies. Study Results from Royal Brisbane and Women’s Hospital Broaden Understanding of Clinical Trials and Studies [A tiered multidisciplinary approach to the psychosocial care of adult cancer patients integrated into routine care: the PROMPT study (a …] … p.9096

Cardiovascular Diseases and Conditions - Aneurysm. Study Results from Royal Oldham Hospital Update Understanding of Aneurysm (Meta–analysis of posterior versus medial approach for popliteal artery aneurysm repair) … p.9097

Carrier Proteins - Membrane Transport Proteins. Study Results from Rutgers State University in the Area of Membrane Transport Proteins Reported (Mechanism of gating by calcium in connexin hemichannels) … p.9099

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease. Study Results from S.P. Iupati and Colleagues Broaden Understanding of Chronic Obstructive Pulmonary Disease (Do community hospice programmes reduce hospitalisation rate in patients with advanced chronic obstructive pulmonary disease?) … p.9100
Lung Diseases and Conditions - Interstitial Lung Disease. Study Results from S.de B. Cobra and Colleagues in the Area of Interstitial Lung Disease Reported (Usefulness of the second heart sound for predicting pulmonary hypertension in patients with interstitial lung disease) … p.9101

Women's Health - Obstetrics and Gynecology. Study Results from School of Public Health in the Area of Obstetrics and Gynecology Reported (Childhood abuse and suicidal ideation in a cohort of pregnant Peruvian women) … p.9102

Digestive System Diseases and Conditions - Colitis. Study Results from Second Affiliated Hospital Provide New Insights into Colitis (Protective effect of melatonin on myenteric neuron damage in experimental colitis in rats) … p.9103

Cardiovascular Diseases and Conditions - Aneurysm. Study Results from Seoul National University Broaden Understanding of Aneurysm (The incidence of and risk factors for ischemic complications after microsurgical clipping of unruptured middle cerebral artery aneurysms and the efficacy of ...) … p.9104

Heart Disorders and Diseases - Atrial Fibrillation. Study Results from Shanghai Jiao–Tong University Update Understanding of Atrial Fibrillation (Concomitant Maze IV Ablation Procedure Performed Entirely by Bipolar Clamp Through Right Lateral Minithoracotomy) … p.9105

Drugs and Therapies - Central Nervous System Agents. Study Results from Shire Update Understanding of Central Nervous System Agents (Relative Bioavailabilities of Lisdexamfetamine Dimesylate and D–Amphetamine in Healthy Adults in an Open–Label, Randomized, Crossover Study After Mixing ...) … p.9106

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Study Results from Sichuan University Provide New Insights into Chronic Hepatitis B Virus (Quantitative intrahepatic HBV cccDNA correlates with histological liver inflammation in chronic hepatitis B virus infection) … p.9107

Stem Cell Research - Mesenchymal Stem Cells. Study Results from Sichuan University Update Understanding of Mesenchymal Stem Cells (g–Secretase inhibitor reverts the Notch signaling attenuation of osteogenic differentiation in aged bone marrow mesenchymal stem cells) … p.9108

Heart Disorders and Diseases - Heart Attack. Study Results from Sorbonne University Broaden Understanding of Heart Attack (Venoarterial extracorporeal membrane oxygenation for refractory cardiogenic shock post–cardiac arrest) … p.9109

Oncology - Lung Cancer. Study Results from Southern Medical University Update Understanding of Lung Cancer (Is it feasible to detect epidermal growth factor receptor mutations in circulating tumor cells in nonsmall cell lung cancer? A meta–analysis) … p.9110

Congenital Diseases and Conditions - Congenital Heart Disease. Study Results from St. George's University of London Provide New Insights into Congenital Heart Disease (Prevalence of prenatal brain abnormalities in fetuses with congenital heart disease: a systematic review) … p.9111

Skin Diseases and Conditions - Psoriasis. Study Results from State University of New York in the Area of Psoriasis Reported (The psoriasis–associated deletion of late cornified envelope genes LCE3B and LCE3C has been maintained under balancing selection since Human Denisovan divergence) … p.9112
Oncology. Study Results from T. Aasen and Colleagues Broaden Understanding of Oncology (Gap junctions and cancer: communicating for 50 years) … p.9113

Cardiology. Study Results from T. Cole–Hunter et al. Provide New Insights into Cardiology (Impact of traffic-related air pollution on acute changes in cardiac autonomic modulation during rest and physical activity: a cross-over study) … p.9114

Drugs and Therapies - Pharmacy and Pharmaceutical Sciences. Study Results from Tabriz University of Medical Sciences Broaden Understanding of Pharmacy and Pharmaceutical Sciences (Crystal–liquid Fugacity Ratio as a Surrogate Parameter for Intestinal Permeability) … p.9115

Percutaneous Coronary Intervention. Study Results from Technical University Broaden Understanding of Percutaneous Coronary Intervention (High–Sensitivity Troponin T and Mortality After Elective Percutaneous Coronary Intervention) … p.9117

Aortic Valve Replacement. Study Results from Tenri Hospital Update Understanding of Aortic Valve Replacement (Pre– and Postoperative Predictors of Long–Term Prognosis After Aortic Valve Replacement for Severe Chronic Aortic Regurgitation) … p.9118

Oncology - Pancreatic Cancer. Study Results from Third Military Medical University Update Understanding of Pancreatic Cancer (MiR–377 inhibits the proliferation of pancreatic cancer by targeting Pim–3) … p.9119

www.NewsRx.com

Oncology - Liver Cancer. Study Results from Tianjin Medical University Provide New Insights into Liver Cancer (Phase–contrast CT: Qualitative and Quantitative Evaluation of Capillarized Sinusoids and Trabecular Structure in Human Hepatocellular Carcinoma Tissues) … p.9120

Bone Research. Study Results from Tohoku University Broaden Understanding of Bone Research (Biomechanical and histological evaluation of the osseointegration capacity of two types of zirconia implant) … p.9122

Oncology - Prostate Cancer. Study Results from Tongji University School of Medicine Update Understanding of Prostate Cancer (Quantitative proteomic study of human prostate cancer cells with different metastatic potentials) … p.9123

Heart Disorders and Diseases - Atrial Fibrillation. Study Results from Tsuchiura Kyodo General Hospital Provide New Insights into Atrial Fibrillation (Pulmonary Vein Isolation Using a Second–Generation Cryoballoon in Patients With Paroxysmal Atrial Fibrillation: One–Year Outcome Using a Single ...) … p.9124

Drugs and Therapies - Antibiotics. Study Results from Tufts University in the Area of Antibiotics Reported (Colistin loading dose: evaluation of the published pharmacokinetic and clinical data) … p.9125

Immune System Diseases and Conditions - HIV/AIDS. Study Results from Tulane University Broaden Understanding of HIV/AIDS (In vitro effects of the small–molecule protein kinase C agonists on HIV latency reactivation) … p.9126
Hematology - Plasma. Study Results from Tulane University in the Area of Plasma Reported (Quantification of intact plasma AGT consisting of oxidized and reduced conformations using a modified ELISA) … p.9127

Life Science Research - Bat Biology. Study Results from University College Update Understanding of Bat Biology [The effects of human–mediated habitat fragmentation on a sedentary woodland–associated species (Rhinolophus hipposideros) at its range margin] … p.9128

Liver Diseases and Conditions - Chronic Hepatitis B Virus. Study Results from University Health Network Provide New Insights into Chronic Hepatitis B Virus (Flares during long–term entecavir therapy in chronic hepatitis B) … p.9129

Hematologic Diseases and Conditions - Thrombocytopenia. Study Results from University Hospital Broaden Understanding of Thrombocytopenia (Procoagulant profile in patients with immune thrombocytopenia) … p.9130

Heart Disorders and Diseases - Atrial Fibrillation. Study Results from University Hospital Provide New Insights into Atrial Fibrillation (Catheter ablation using the third–generation cryoballoon provides an enhanced ability to assess time to pulmonary vein isolation facilitating the ablation …) … p.9131

Oncology - Cervical Cancer. Study Results from University Hospital in the Area of Cervical Cancer Reported [Barriers to Cervical Cancer Screening in Geneva (DEPIST Study)] … p.9132

Oncology - Glioblastomas. Study Results from University Medical Center Provide New Insights into Glioblastomas (Differential expression of CXCR4 and CXCR7 with various stem cell markers in paired human primary and recurrent glioblastomas) … p.9133

Genetics - Human Genetics. Study Results from University Medical Center Provide New Insights into Human Genetics (Am I My Family’s Keeper? Disclosure Dilemmas in Next–Generation Sequencing) … p.9134

Lung Diseases and Conditions - Pneumococcal Pneumonia. Study Results from University of Alberta Broaden Understanding of Pneumococcal Pneumonia (Prognostic factors associated with mortality and major in–hospital complications in patients with bacteremic pneumococcal pneumonia Population–based study) … p.9135

Cell Research - Cell Adhesion Molecules. Study Results from University of Alcala Update Understanding of Cell Adhesion Molecules (TGF beta Induces Epithelial–Mesenchymal Transition of Thyroid Cancer Cells by Both the BRAF/MEK/ERK and Src/FAK Pathways) … p.9136

Health and Medicine - Peripheral Nervous System Research. Study Results from University of Angers Provide New Insights into Peripheral Nervous System Research (Increased mitochondrial fusion in a autosomal recessive CMT2A family with mitochondrial GTPase mitofusin 2 mutations) … p.9137

Nutritional and Metabolic Diseases and Conditions - Cerebrotendinous Xanthomatosis. Study Results from University of Antioquia Broaden Understanding of Cerebrotendinous Xanthomatosis (Novel cerebrotendinous xanthomatosis mutation causes familial early dementia in Colombia) … p.9138

Cytokines. Study Results from University of Basel Update Understanding of Cytokines (Permissive roles of cytokines interleukin–7 and Flt3 ligand in mouse B–cell lineage commitment) … p.9139
January 14, 2017

Hematology - Plasma. Study Results from University of Basel Update Understanding of Plasma (Single–Ascending–Dose Pharmacokinetic Study of Tribendimidine in Opisthorchis viverrini–Infected Patients) … p.9140

Risk Management. Study Results from University of Bologna in the Area of Risk Management Reported (Knowledge, Risk Perceptions, and Xenophobic Attitudes: Evidence from Italy During the Ebola Outbreak) … p.9141

Cardiovascular Diseases and Conditions - Embolism. Study Results from University of Bordeaux Update Understanding of Embolism (Direct observation and modelling of embolism spread between xylem conduits: a case study in Scots pine) … p.9142

Genetics - Human Genetics. Study Results from University of British Columbia in the Area of Human Genetics Reported (The Impact of Gender on Anthropometric Measures of Twins) … p.9144

Oncology - Cancer Epidemiology. Study Results from University of California Provide New Insights into Cancer Epidemiology [Cancer burden in four countries of the Middle East Cancer Consortium (Cyprus; Jordan; Israel; Izmir (Turkey)) with comparison to the United States …] … p.9145

www.NewsRx.com

Congenital Diseases and Conditions - Congenital Heart Disease. Study Results from University of California Provide New Insights into Congenital Heart Disease (Evaluation of Impedance Cardiography for Measurement of Stroke Volume in Congenital Heart Disease) … p.9146

Drugs and Therapies - Antiretrovirals. Study Results from University of California Update Understanding of Antiretrovirals (Neurological Response to cART vs. cART plus Integrase Inhibitor and CCR5 Antagonist Initiated during Acute HIV) … p.9147

Clinical Research - Clinical Trials and Studies. Study Results from University of California Update Understanding of Clinical Trials and Studies (Interventions for tobacco use cessation in people in treatment for or recovery from substance use disorders) … p.9148

Enzymes and Coenzymes. Study Results from University of California Update Understanding of Enzymes and Coenzymes (Liberating Chiral Lipid Mediators, Inflammatory Enzymes, and LIPID MAPS from Biological Grease) … p.9150

Sexually Transmitted Diseases and Conditions (STDs) - Gonorrhea. Study Results from University of California Update Understanding of Gonorrhea (A prospective assessment of pelvic infection risk following same–day sexually transmitted infection testing and levonorgestrel intrauterine system placement) … p.9151

Lung Diseases and Conditions - Cystic Fibrosis. Study Results from University of California in the Area of Cystic Fibrosis Reported (External Zn2+ binding to cysteine–substituted cystic fibrosis transmembrane conductance regulator constructs regulates channel gating and curcumin potentiation) … p.9152
Mycobacterium Infections - Tuberculosis. Study Results from University of Cape Town Provide New Insights into Tuberculosis (Amikacin Optimal Exposure Targets in the Hollow–Fiber System Model of Tuberculosis) … p.9154

Central Nervous System Diseases and Conditions - Encephalitis. Study Results from University of Catania in the Area of Encephalitis Reported [The chitinases expression is related to Simian Immunodeficiency Virus Encephalitis (SIVE) and in HIV encephalitis (HIVE)] … p.9155

Oncology - Prostate Cancer. Study Results from University of Colorado School of Medicine Provide New Insights into Prostate Cancer (Improved survival with the addition of radiotherapy to androgen deprivation: questions answered and a review of current controversies in ...) … p.9156

Oncology - Melanoma. Study Results from University of Debrecen Provide New Insights into Melanoma (PP2B and ERK1/2 regulate hyaluronan synthesis of HT168 and WM35 human melanoma cell lines) … p.9157

Neurons. Study Results from University of Edinburgh Update Understanding of Neurons (E11/Podoplanin Protein Stabilization Through Inhibition of the Proteasome Promotes Osteocyte Differentiation in Murine in Vitro Models) … p.9158

Pharmacology. Study Results from University of Florida in the Area of Pharmacology Reported (Improving drug safety with a systems pharmacology approach) … p.9159

Central Nervous System Diseases and Conditions - Brain Injuries. Study Results from University of Gothenburg Broaden Understanding of Brain Injuries (Long–term treatment with methylphenidate for fatigue after traumatic brain injury) … p.9160

Central Nervous System Diseases and Conditions - Cerebral Hemorrhage. Study Results from University of Helsinki Central Hospital Update Understanding of Cerebral Hemorrhage (Symptomatic post–thrombolytic intracerebral hemorrhage is not related to the cause of stroke) … p.9161

Proteins - Glycoproteins. Study Results from University of Helsinki Central Hospital in the Area of Glycoproteins Reported (Abnormal Proteoglycan Synthesis Due to Gene Defects Causes Skeletal Diseases with Overlapping Phenotypes) … p.9162

Cardiovascular Physiological Processes. Study Results from University of Kentucky in the Area of Cardiovascular Physiological Processes Reported (Arterial hemodynamics are impaired at rest and following acute exercise in overweight young men) … p.9163

Oncology - Lymphoma. Study Results from University of Lausanne Hospital Broaden Understanding of Lymphoma (Primary pituitary lymphoma: an update of the literature) … p.9164

Cardiology. Study Results from University of Leeds Broaden Understanding of Cardiology (Impact of latest generation cardiac interventional X–ray equipment on patient image quality and radiation dose for trans–catheter aortic valve implantations) … p.9165

Oncology - Glioblastomas. Study Results from University of Lorraine Provide New Insights into Glioblastomas (A quantitative study of shape descriptors from glioblastoma multiforme phenotypes for predicting survival outcome) … p.9166

Oncology - Ovarian Cancer. Study Results from University of Medicine and Dentistry of New Jersey (UMDNJ) Provide New Insights into Ovarian Cancer (Racial/Ethnic Disparities in Ovarian Cancer Treatment and Survival) … p.9167
January 14, 2017

Oncology - Prostate Cancer. Study Results from University of Miami Provide New Insights into Prostate Cancer (Is It Time to Revisit the Role of Prostate–specific Antigen Kinetics in Active Surveillance for Prostate Cancer?) … p.9168

Neoplasia Research. Study Results from University of Michigan Broaden Understanding of Neoplasia Research [Fbxw7 Deletion Accelerates Kras (G12D)–Driven Pancreatic Tumorigenesis via Yap Accumulation] … p.9169

Surgery - Heart Surgery. Study Results from University of Michigan Provide New Insights into Heart Surgery (Congenital Heart Surgery Case Mix Across North American Centers and Impact on Performance Assessment) … p.9170

Transplant Medicine - Kidney Transplants. Study Results from University of Minnesota Update Understanding of Kidney Transplants (Genotype–guided tacrolimus dosing in African–American kidney transplant recipients) … p.9171

Proteins - Extracellular Matrix Proteins. Study Results from University of Munich Provide New Insights into Extracellular Matrix Proteins (New View on Endothelial Cell Migration Switching Modes of Migration Based on Matrix Composition) … p.9172

Hematologic Diseases and Conditions - Beta Thalassemia. Study Results from University of Naples Provide New Insights into Beta Thalassemia (Electrocardiographic Presentation, Cardiac Arrhythmias, and Their Management in beta–Thalassemia Major Patients) … p.9173

Aromatic Amino Acids. Study Results from University of Nevada in the Area of Aromatic Amino Acids Reported (Acid sphingomyelinase is required for cell surface presentation of Met receptor tyrosine kinase in cancer cells) … p.9174

Aromatic Amino Acids. Study Results from University of Nice Sophia–Antipolis in the Area of Aromatic Amino Acids Reported (An Evolution–Guided Analysis Reveals a Multi–Signaling Regulation of Fas by Tyrosine Phosphorylation and its Implication in Human Cancers) … p.9175

Heart Disorders and Diseases - Heart Failure. Study Results from University of North Carolina Broaden Understanding of Heart Failure (Evolving therapies for the management of chronic and acute decompensated heart failure) … p.9176

Oncology - Prostate Cancer. Study Results from University of Oxford Broaden Understanding of Prostate Cancer (Altered expression of epithelial–to–mesenchymal transition proteins in extraprostatic prostate cancer) … p.9177

Nervous System Diseases and Conditions - Polyneuropathies. Study Results from University of Paris in the Area of Polyneuropathies Reported (Current and Future Treatment Approaches in Transthyretin Familial Amyloid Polyneuropathy) … p.9178

Immune System Diseases and Conditions - Allergies. Study Results from University of Paris–Sud Provide New Insights into Allergies (Bioinspired Design and Oriented Synthesis of Immunogenic Site–Specifically Penicilloylated Peptides) … p.9179

Graves' Disease. Study Results from University of Pavia Update Understanding of Graves' Disease (Gender Influences The Clinical Presentation And Long–term Outcome Of Graves Disease) … p.9180

Liver Diseases and Conditions - Hepatitis C Virus. Study Results from University of Pennsylvania in the Area of Hepatitis C Virus Reported (Hepatitis C virus therapy with peg–interferon and ribavirin in Myanmar: A resource–constrained country) … p.9181
Connective Tissue Cells. Study Results from University of Rochester Update Understanding of Connective Tissue Cells (Human lung fibroblasts produce proresolving peroxisome proliferator–activated receptor–gamma ligands in a cyclooxygenase–2–dependent manner) ... p.9183

Clinical Research - Clinical Trials and Studies. Study Results from University of Rochester in the Area of Clinical Trials and Studies Reported (Efficacy of periimplant mechanical debridement with and without adjunct antimicrobial photodynamic therapy in the treatment of periimplant diseases ...) ... p.9184

Lung Diseases and Conditions - Cystic Fibrosis. Study Results from University of Saarland Update Understanding of Cystic Fibrosis (Optimization of ciprofloxacin complex loaded PLGA nanoparticles for pulmonary treatment of cystic fibrosis infections: Design of experiments approach) ... p.9185

Cardiology. Study Results from University of Sydney Broaden Understanding of Cardiology (Effect of corticosteroids on cardiac function in growth–restricted fetuses) ... p.9186

Transplant Medicine - Kidney Transplants. Study Results from University of Sydney Broaden Understanding of Kidney Transplants (Normal saline versus lower–chloride solutions for kidney transplantation) ... p.9187

Oncology - Oral Cancer. Study Results from University of Technology Update Understanding of Oral Cancer (Lymph node management in the treatment of oral cancer: Analysis of a standardized approach) ... p.9188

Immunology - Cellular Immunology. Study Results from University of Tehran Provide New Insights into Cellular Immunology (Cellular and molecular mechanisms of immune dysregulation and autoimmunity) ... p.9189

Drugs and Therapies - Antidiabetic Agents. Study Results from University of Texas Broaden Understanding of Antidiabetic Agents [PPAR Modulation of Cytokine–Stimulated MUC16 (CA125) Expression in Breast and Ovarian Cancer–Derived Cells] ... p.9190

Genetics - Genetic Epidemiology. Study Results from University of Texas Provide New Insights into Genetic Epidemiology (Mendelian randomization analysis of a time–varying exposure for binary disease outcomes using functional data analysis methods) ... p.9191

Hematology - Plasma. Study Results from University of Texas Southwestern Medical Center Broaden Understanding of Plasma (Can an anti–Xa assay for low–molecular–weight heparin be used to assess the presence of rivaroxaban?) ... p.9192

Gastroenterology. Study Results from University of Tokyo Broaden Understanding of Gastroenterology (Long–term human primary hepatocyte cultures in a microfluidic liver biochip show maintenance of mRNA levels and higher drug metabolism compared with Petri cultures) ... p.9193

Oncology - Gastric Cancer. Study Results from University of Tokyo Update Understanding of Gastric Cancer (Histologic intestinal metaplasia and endoscopic atrophy are predictors of gastric cancer development after Helicobacter pylori eradication) ... p.9194

Enzymes and Coenzymes - Cysteine Endopeptidases. Study Results from University of Tokyo in the Area of Cysteine Endopeptidases Reported (Drosophila SETDB1 and caspase cooperatively fine–tune cell fate determination of sensory organ precursor) ... p.9195
January 14, 2017

Oncology - Prostate Cancer. Study Results from University of Toronto Provide New Insights into Prostate Cancer (Cardiovascular and Skeletal–related Events Following Localized Prostate Cancer Treatment: Role of Surgery, Radiotherapy, and Androgen Deprivation) … p.9196

Liver Diseases and Conditions - Liver Fibrosis. Study Results from University of Twente Provide New Insights into Liver Fibrosis (Clinical Advancements in the Targeted Therapies against Liver Fibrosis) … p.9197

DNA Research. Study Results from University of Ulsan Broaden Understanding of DNA Research (DNA Strand Breaks in Mitotic Germ Cells of Caenorhabditis elegans Evaluated by Comet Assay) … p.9198

Oncology - Breast Cancer. Study Results from University of Ulsan in the Area of Breast Cancer Reported (Correlation Between MRI and the Level of Tumor–Infiltrating Lymphocytes in Patients With Triple–Negative Breast Cancer) … p.9199

Lung Diseases and Conditions - Asthma. Study Results from University of Verona Provide New Insights into Asthma (PARP inhibition treatment in a nonconventional experimental mouse model of chronic asthma) … p.9200

Genetic Diseases and Conditions - Down Syndrome. Study Results from University of Vigo in the Area of Down Syndrome Reported (Reliability and Validity of Physical Fitness Field–Based Tests in Down Syndrome: A Systematic Review) … p.9201

Peptides - Cyclic Peptides. Study Results from University of Warmia & Mazury Broaden Understanding of Cyclic Peptides (Intraperitoneal exposure of whitefish to microcystin–LR induces rapid liver injury followed by regeneration and resilience to subsequent exposures) … p.9202

www.NewsRx.com

Nitrogen. Study Results from University of Warmia & Mazury Provide New Insights into Nitrogen (Microbial structure and nitrogen compound conversions in aerobic granular sludge reactors with non–aeration phases and acetate pulse feeding) … p.9203

Algorithms. Study Results from University of Wisconsin Provide New Insights into Algorithms (PTENpred: A Designer Protein Impact Predictor for PTEN–related Disorders) … p.9204

Digestive System Diseases and Conditions - Gastritis. Study Results from V. Bespalov and Colleagues in the Area of Gastritis Reported (Conifer Green Needle Complex in Patients with Precancerous Gastric Lesions: An Observational Pilot Study) … p.9205

Oncology - Melanoma. Study Results from V. Lucarini et al Provide New Insights into Melanoma (Combining Type I Interferons and 5–Aza–2 ‘–Deoxycytidine to Improve Anti–Tumor Response against Melanoma) … p.9206

Oncology - Breast Cancer. Study Results from VIT University Provide New Insights into Breast Cancer (Identification and targeting of microRNAs modulating acquired chemotherapy resistance in Triple negative breast cancer (TNBC): A better strategy to combat chemoresistance] … p.9207

Heart Disorders and Diseases - Heart Failure. Study Results from Veterans Affairs Medical Center Update Understanding of Heart Failure [Chronic Oral Study of Myosin Activation to Increase Contractility in Heart Failure (COSMIC–HF): a phase 2, pharmacokinetic, randomised, placebo–controlled …] … p.9208
Oncology - Melanoma. Study Results from Veterans Affairs Medical Center in the Area of Melanoma Reported (Genetic predisposition to melanoma) … p.9209

Blood Diseases and Conditions - Sepsis. Study Results from Veterans General Hospital Broaden Understanding of Sepsis (Daptomycin antibiotic lock therapy for hemodialysis patients with Gram–positive bloodstream infections following use of tunneled, cuffed hemodialysis catheters: ...) … p.9210

Oncology - Lung Cancer. Study Results from Virginia Commonwealth University Update Understanding of Lung Cancer (Promising Approaches From Behavioral Economics to Improve Patient Lung Cancer Screening Decisions) … p.9211

Neuroglia. Study Results from Washington State University Update Understanding of Neuroglia (Antiprion Activity of DB772 and Related Monothiophene– and Furan–Based Analogs in a Persistently Infected Ovine Microglia Culture System) … p.9212

Drugs and Therapies - Antidiuretic Hormones. Study Results from X. Cao and Colleagues in the Area of Antidiuretic Hormones Reported (Comparison of anti–anginal effect of cilnidipine with those of nicardipine and nifedipine in the vasopressin–induced angina model of rats) … p.9213

Neurodegenerative Diseases and Conditions - Alzheimer Disease. Study Results from Xiamen University Broaden Understanding of Alzheimer Disease (F–18–Labeled Benzylidine Derivatives as Novel Flexible Probes for Positron Emission Tomography of Cerebral beta–Amyloid Plaques) … p.9214

Oncology - Breast Cancer. Study Results from Y. Su and Colleagues in the Area of Breast Cancer Reported (Development and characterization of two human triple–negative breast cancer cell lines with highly tumorigenic and metastatic capabilities) … p.9215

Kidney Diseases and Conditions - Chronic Kidney Disease. Study Results from Yang Ming National University Broaden Understanding of Chronic Kidney Disease (Abnormal Thyroid–Stimulating Hormone and Chronic Kidney Disease in Elderly Adults in Taipei City) … p.9216

Pharmacokinetics. Study Results from Yonsei University in the Area of Pharmacokinetics Reported (Quantitative determination of xanthorrhizol in rat plasma by HPLC–MS/MS and its application to a pharmacokinetic study) … p.9217

Oncology - Squamous Cell Carcinoma. Study Results from Zhejiang Cancer Hospital Update Understanding of Squamous Cell Carcinoma (Prechemotherapy neutrophil : lymphocyte ratio is superior to the platelet : lymphocyte ratio as a prognostic indicator for locally advanced esophageal ...) … p.9218

Heart Disorders and Diseases - Brugada Syndrome. Study Results from Zhejiang University Broaden Understanding of Brugada Syndrome (Characterization of the epicardial substrate for catheter ablation of Brugada syndrome) … p.9219

Oncology - Prostate Cancer. Study Results from Zhejiang University Provide New Insights into Prostate Cancer (Reduced risk of prostate cancer in childless men as compared to fathers: a systematic review and meta–analysis) … p.9220
January 14, 2017

Drugs and Therapies - Drug Resistance.
Study unmasks the genetic complexity of cancer cells within the same tumor … p.9221

Lung Diseases and Conditions - Chronic Obstructive Pulmonary Disease.
Sugar element of keratan sulfate halts the progress of emphysema … p.9223

Drugs and Therapies - Cell Therapy.
Synthetic stem cells could offer therapeutic benefits, reduced risks … p.9224

Musculoskeletal Diseases and Conditions - Hypokalemic Periodic Paralysis.
Taro Announces Sale of U.S. Rights to Keveyis(R) to Strongbridge Biopharma plc … p.9225

Autoimmune Diseases and Conditions - Rheumatoid Arthritis.
Technical University Describes Findings in Rheumatoid Arthritis [Milk Fat Globule–Epidermal Growth Factor 8 (MFG–E8) Is a Novel Anti–inflammatory Factor in Rheumatoid Arthritis in Mice and Humans] … p.9226

Drugs and Therapies - Antipsychotics.
Technical University Details Findings in Antipsychotics (Preparation and evaluation of ziprasidone–phospholipid complex from sustained–release pellet formulation with enhanced bioavailability and no food effect) … p.9227

Heart Disorders and Diseases - Heart Attack.
The neighborhood effect: Sicker patients draw on shared resources … p.9228

Peptides and Proteins.
Tohoku University Describes Findings in Peptides and Proteins (Effects of N–Methylated Amyloid–b30–40 Peptides on the Fibrillation of Amyloid–b1–40) … p.9229

Biotechnology - Cancer Gene Therapy.
Tongji University Details Findings in Cancer Gene Therapy (Elderly male smokers with right lung tumors are viable candidates for KRAS mutation screening) … p.9230

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes.
Treating cancer with drugs for diabetes and hypertension … p.9231

Neurodegenerative Diseases and Conditions.
UTSW identify process cells use to destroy damaged organelles, with links to diseases … p.9232

Gram-Negative Bacteria - Acinetobacter baumannii.
United States Navy Reports Findings in Acinetobacter baumannii (Personalized Therapeutic Cocktail of Wild Environmental Phages Rescues Mice from Acinetobacter baumannii Wound Infections) … p.9233

Nervous System Diseases and Conditions - Ataxia.
University Hospital Details Findings in Ataxia (Mini–Exome Coupled to Read–Depth Based Copy Number Variation Analysis in Patients with Inherited Ataxias) … p.9234

Cardiovascular Diseases and Conditions - Hypertension.
University Hospital Details Findings in Hypertension (Recent Developments and Controversies in the Treatment of Resistant Hypertension) … p.9235

Health and Medicine - Public Health.
University Hospital Details Findings in Public Health (Secular trends and correlates of physical activity: The Tromso Study 1979–2008) … p.9236

Gram-Positive Bacteria - Staphylococcus epidermidis.
University Hospital Details Findings in Staphylococcus epidermidis (Efficacy of ceftaroline versus vancomycin in an experimental foreign–body and systemic infection model caused by biofilm–producing methicillin–resistant Staphylococcus ...) … p.9237
January 14, 2017

Oncology - Head and Neck Cancer. University Hospital Reports Findings in Head and Neck Cancer (Cytotoxic effects of SMAC–mimetic compound LCL161 in head and neck cancer cell lines) … p.9238

Nutritional and Metabolic Diseases and Conditions - Obesity. University Medical Center Reports Findings in Obesity (Performance of the 1 mg dexamethasone suppression test in patients with severe obesity) … p.9239

Proteins - Armadillo Domain Proteins. University of Aberdeen Details Findings in Armadillo Domain Proteins (Tissue– and stage–specific Wnt target gene expression is controlled subsequent to beta–catenin recruitment to cis–regulatory modules) … p.9240

Oncology - Cholangiocarcinoma. University of Amsterdam Reports Findings in Cholangiocarcinoma (Inhibition of hypoxia inducible factor 1 and topoisomerase with acriflavine sensitizes perihilar cholangiocarcinomas to photodynamic therapy) … p.9241

Cardiovascular Diseases and Conditions - Atherosclerosis. University of Antwerp Reports Findings in Atherosclerosis (Potential therapeutic effects of mTOR inhibition in atherosclerosis) … p.9242

Oncology - Acute Lymphoblastic Leukemia. University of Bologna Reports Findings in Acute Lymphoblastic Leukemia (Synergistic cytotoxic effects of bortezomib and CK2 inhibitor CX–4945 in acute lymphoblastic leukemia: turning off the prosurvival ER chaperone BIP/Grp78 and turning on the ...) … p.9243

www.NewsRx.com

Cardiology. University of British Columbia Reports Findings in Cardiology (Assessment of Paramedic Ultrasound Curricula: A Systematic Review) … p.9246

Digestive System Diseases and Conditions - Inflammatory Bowel Disease. University of Calgary Details Findings in Inflammatory Bowel Disease (Pregnane X Receptor Activation Attenuates Inflammation–Associated Intestinal Epithelial Barrier Dysfunction by Inhibiting Cytokine–Induced Myosin Light–Chain Kinase ...) … p.9247

Pharyngeal Diseases and Conditions - Pharyngitis. University of Cape Town Details Findings in Pharyngitis (Rationale and design of the African group A streptococcal infection registry: the AFROStrep study) … p.9250

Oncology - Colon Cancer. University of Cape Town Reports Findings in Colon Cancer (The incidence and histo–pathological characteristics of colorectal cancer in a population based cancer registry in Zimbabwe) … p.9251

Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. University of Copenhagen Reports Findings in Type 2 Diabetes [Review of head–to–head comparisons of glucagon–like peptide–1 receptor agonists] … p.9253

Oncology - Germ Cell Cancer. University of Heidelberg Reports Findings in Germ Cell Cancer (Cisplatin–Based Chemotherapy for Testicular Germ Cell Tumors: Complication Rates of Peripheral versus Central Venous Administration) … p.9254

Vascular Diseases and Conditions - Giant Cell Arteritis. University of Melbourne Details Findings in Giant Cell Arteritis (Giant cell arteritis: ophthalmic manifestations of a systemic disease) … p.9257

Life Science Research - Chemical Biology. University of Michigan Describes Findings in Chemical Biology (Metal–dependent Deacetylases: Cancer and Epigenetic Regulators) … p.9258

Biotechnology - Molecular Pharmaceutics. University of Michigan Reports Findings in Molecular Pharmaceutics (Mechanistic Analysis of Cocrystal Dissolution as a Function of pH and Micellar Solubilization) … p.9259

Enzymes and Coenzymes - Protein–Tyrosine Kinases. University of Nebraska Reports Findings in Protein–Tyrosine Kinases [Generation of Janus kinase 1 (JAK1) conditional knockout mice] … p.9260

Clinical Research - Clinical Trials and Studies. University of New Mexico Details Findings in Clinical Trials and Studies (How Much Is Too Much? Patterns of Drinking During Alcohol Treatment and Associations With Post–Treatment Outcomes Across Three Alcohol Clinical Trials) … p.9260

DNA Research. University of New Mexico Details Findings in DNA Research [Editor's Highlight: Interactive Genotoxicity Induced by Environmentally Relevant Concentrations of Benzo(a) Pyrene Metabolites and Arsenite in Mouse Thymus Cells] … p.9262

Ecology - Molecular Ecology. University of Notre Dame Reports Findings in Molecular Ecology (Chromosomal inversions and ecotypic differentiation in Anopheles gambiae: the perspective from whole–genome sequencing) … p.9264

Oncology - Cancer Care. University of Ostrava Details Findings in Cancer Care (Assessing needs of family members of inpatients with advanced cancer) … p.9266

Cardiovascular Diseases and Conditions - Aneurysm. University of Pennsylvania Hospital Reports Findings in Aneurysm (Bicuspid Aortic Insufficiency With Aortic Root Aneurysm: Root Reimplantation Versus Bentall Root Replacement) … p.9267

Oncology - Lung Cancer. University of Pennsylvania Reports Findings in Lung Cancer (Detection of Therapeutically Targetable Driver and Resistance Mutations in Lung Cancer Patients by Next-Generation Sequencing of Cell-Free Circulating Tumor DNA) … p.9268

Oncology - Colon Cancer. University of Sherbrooke Details Findings in Colon Cancer (Subcellular proteomics analysis of different stages of colorectal cancer cell lines) … p.9269

Adenocarcinomas. University of Siena Details Findings in Adenocarcinomas (Recurrence after surgery in esophago–gastric junction adenocarcinoma: Current management and future perspectives) … p.9270

Cardiology. University of Siena Reports Findings in Cardiology (Correlation of Left Atrial Strain and Doppler Measurements with Invasive Measurement of Left Ventricular End–Diastolic Pressure in Patients Stratified for Different Values of Ejection Fraction) … p.9271

Clinical Research - Clinical Trials and Studies. University of Texas Southwestern Details Findings in Clinical Trials and Studies (Statins in Primary Prevention: Uncertainties and Gaps in Randomized Trial Data) … p.9272

Bacterial Infections and Mycoses - Wound Infections. University of Texas Southwestern Details Findings in Wound Infections (Risk factors for deep sternal wound infection after cardiac surgery: Influence of red blood cell transfusions and chronic infection) … p.9273

Enzymes and Coenzymes - Prostate-Specific Antigen. University of Tokyo Details Findings in Prostate–Specific Antigen (Porous silicon microarray for simultaneous fluorometric immunoassay of the biomarkers prostate–specific antigen and human glandular kallikrein 2) … p.9274

Cyclohexanes. University of Verona Describes Findings in Cyclohexanes (The ketamine analogue methoxetamine generalizes to ketamine discriminative stimulus in rats) … p.9275

Oncology - Mantle Cell Lymphoma. University of Wisconsin Details Findings in Mantle Cell Lymphoma (FBXO10 deficiency and BTK activation upregulate BCL2 expression in mantle cell lymphoma) … p.9277

Hematologic Diseases and Conditions - Anemia. Uppsala University Hospital Reports Findings in Anemia (A Randomized Noninferiority Trial of Intravenous Iron Isomaltoside versus Oral Iron Sulfate in Patients with Nonmyeloid Malignancies and Anemia Receiving Chemotherapy: The PROFOUND Trial) … p.9278
January 14, 2017

Ethylamines. Urmia University Details
Findings in Ethylamines (The role of histamine H–1, H–2 and H–3 receptors of ventral posteromedial nucleus of thalamus in modulation of trigeminal pain) … p.9279

Immunology - Immune System. Vanderbilt University Details Findings in Immune System (Biogenesis and Transcriptional Regulation of Long Noncoding RNAs in the Human Immune System) … p.9280

Lung Diseases and Conditions - Pulmonary Hypertension. Vanderbilt University Reports Findings in Pulmonary Hypertension (Clinical and Biological Insights Into Combined Post-and Pre-Capillary Pulmonary Hypertension) … p.9281

Oncology - Colon Cancer. Virginia University Medical Center Details Findings in Colon Cancer (89Zr–cetuximab PET imaging in patients with advanced colorectal cancer) … p.9282

Membrane Proteins - Porins. Visualizing gene expression with MRI … p.9283

Lymphocytes. Wayne State University leads groundbreaking research on preterm birth … p.9285

Nutritional and Metabolic Diseases and Conditions - Obesity. Weight loss reduces psoriasis symptoms … p.9286

Whitestone Feeds, Inc. Whitestone Feeds, Inc. Announces Voluntary Recall of all JES Premium 40 Tubs due to Potential Health Risk … p.9287

Heart Disorders and Diseases - Heart Failure. With $8.6 million grant from NIH, UCLA–led consortium will map the heart's nervous system … p.9287

Enzymes and Coenzymes - Phosphotransferases (Alcohol Group Acceptor). Yeungnam University Reports Findings in Phosphotransferases (Alcohol Group Acceptor) (Activated protein C prevents methylglyoxal–induced endoplasmic reticulum stress and cardiomyocyte apoptosis via regulation of the AMP–activated protein kinase …) … p.9288

Hematologic Diseases and Conditions - Anemia. Yonsei University Reports Findings in Anemia [Albuminuria as a Risk Factor for Anemia in Chronic Kidney Disease: Result from the KoreaN Cohort Study for Outcomes in Patients With Chronic Kidney Disease (KNOW–CKD)] … p.9290

AndroScience Corporation. Patent
Application Titled "Compositions
Including Androgen Receptor
Degradation (ARD) Enhancers and
Methods of Prophylactic Or Therapeutic
Treatment of Skin Disorders and Hair
Loss" Published Online (USPTO
20160367513) ... p.9316

Patents. Patent Application Titled "Delivery of
Particles Using Hygroscopic Excipients"
Published Online (USPTO 20160368181) ... p.9322

Patents. Patent Application Titled "Detecting
MicroRNA and Iso–MicroRNA to
Evaluate Vascular and Cardiac Health"
Published Online (USPTO 20160369344) ... p.9326

Mico-tech (nanjing) Co., Ltd. Patent
Application Titled "Hemostatic Clip"
Published Online (USPTO 20160367258) ... p.9329

Patents. Patent Application Titled "Instrumentation with Embedded
Imaging Systems" Published Online
(USPTO 20160367311) ... p.9331

Diagnosing, Quantifying, Treating,
Monitoring Or Evaluating Conditions,
Diseases Or Disorders Associated with
Human Papilloma Virus (Hpv) Infection"
Published Online (USPTO
20160369357) ... p.9335

Pharmaceutical Companies. Patent
Application Titled "Method of Inhibiting
Mutant C–Kit" Published Online (USPTO
20160367545) ... p.9340

"Methods of Creating and Screening
Dna–Encoded Libraries" Published
Online (USPTO 20160369267) ... p.9343

"Methods of Creating and Screening
Dna–Encoded Libraries" Published
Online (USPTO 20160369267) ... p.9343

Rowan University. Patent Application Titled
"Modulation of Cellular Localization of
Cyclin C" Published Online (USPTO
20160367630) ... p.9349

www.NewsRx.com

Anti–Transferrin Receptor Antibody That
Passes through Blood–Brain Barrier"
Published Online (USPTO
20160369001) ... p.9354

Pharmaceutical Companies. Patent
Application Titled "Process" Published
Online (USPTO 20160368970)
... p.9358

and Method for Passive Event Detection
System for Traumatic Event" Published
Online (USPTO 20160367201)
... p.9363

HeartFlow, Inc. Patent Application Titled
"Systems and Methods for Reporting
and Displaying Blood Flow
Characteristics" Published Online
(USPTO 20160371456) ... p.9365

Patents. Patent Application Titled
"Treprostinil Derivative Compounds and
Methods of Using Same" Published
Online (USPTO 20160368889) ...
... p.9368

Patents. Patent Application Titled "Unitary
Endoscopic Vessel Harvesting Devices"
Published Online (USPTO
20160367279) ... p.9373

Patents. Patent Application Titled "Use of
Chemical Compounds That Can Inhibit
the Toxic Activity of Sphingomyelinase
D from Venoms of Loxosceles Spiders
and Pharmaceutical Composition
Comprising Said Compounds"
Published Online (USPTO
20160367533) ... p.9376

Brigham Young University. Patent
Application Titled "Vascular Stents and
Related Methods" Published Online
(USPTO 20160367388) ... p.9381

Zhejiang Hisun Pharmaceutical Co., Ltd.
Patent Issued for
4–Benzyl–l–Phenethyl–Piperazine–2,6–
Dione Preparation Method, and
Intermediate and Preparation Method
(USPTO 9527804) ... p.9383
January 14, 2017

St. Jude Medical, Atrial Fibrillation Division, Inc. Patent Issued for Ablation Catheter Electrode Having Multiple Thermal Sensors and Method of Use (USPTO 9526574) ... p.9386

SORIN CRM SAS. Patent Issued for Active Implantable Medical Device for Atrial Stimulation for the Treatment of Heart Failure with Preserved Ejection Fraction (USPTO 9526901) ... p.9390

Temple University of the Commonwealth System of Higher Education. Patent Issued for Administration of Angiocidin for Arresting the Growth of a Tumor Cell (USPTO 9526758) ... p.9394

SAMSUNG ELECTRONICS CO., LTD. Patent Issued for Ang–2 Specific Antibodies and Uses (USPTO 9527910) ... p.9397

COVIDIEN LP. Patent Issued for Apparatus, System and Method for Performing an Electrosurgical Procedure (USPTO 9526577) ... p.9398

ALKERMES PHARMA IRELAND LIMITED. Patent Issued for Aripiprazole Formulations Having Increased Injection Speeds (USPTO 9526726) ... p.9399

KOREA INSTITUTE OF SCIENCE AND TECHNOLOGY. Patent Issued for Aster Glehni Extracts, Fractions Or Compounds Isolated Therefrom for the Treatment Or Prevention of Hyperuricemia Or Gout (USPTO 9527879) ... p.9402

H. Lee Moffitt Cancer Center and Research Institute, Inc. Patent Issued for Bad Phosphorylation Determines Ovarian Cancer Chemo–Sensitivity and Patient Survival (USPTO 9528982) ... p.9404

KUN SHAN UNIVERSITY. Patent Issued for Biosensor Chip Having Precise Count Function and Method of Sensing Amount of Cells (USPTO 9528954) ... p.9409

www.NewsRx.com

Biotechnology Companies. Patent Issued for Blood Separation and Concentration System (USPTO 9526821) ... p.9411

TECHNION RESEARCH AND DEVELOPMENT FOUNDATION LTD. Patent Issued for Breath Analysis of Pulmonary Nodules (USPTO 9528979) ... p.9417

Massachusetts Institute of Technology. Patent Issued for Cancer–Related Extracellular Matrix Signatures and Related Methods and Products (USPTO 9526800) ... p.9423

Siemens PLC. Patent Issued for Composite Microneedle Array Including Nanostructures Thereon (USPTO 9526883) ... p.9435

THE JOHNS HOPKINS UNIVERSITY. Patent Issued for Compounds for Treating Peripheral; Neuropathies and Other Neurodegenerative; Disorders (USPTO 9527817) ... p.9437

Pharmaceutical Companies. Patent Issued for Controlled Release Hydrocodone Formulations (USPTO 9526724) ... p.9439

Ethicon Endo-Surgery, LLC. Patent Issued for Detachable End Effector and Loader (USPTO 9526516) ... p.9443

Janssen Biotech, Inc. Patent Issued for Differentiation of Human Embryonic Stem Cells (USPTO 9528090) ... p.9445

SUNNYBROOK RESEARCH INSTITUTE. Patent Issued for Electrode Designs for Efficient Neural Stimulation (USPTO 9526890) ... p.9448
COVIDIEN LP. Patent Issued for Electrosurgical Instrument (USPTO 9526569) … p.9450

HITACHI METALS, LTD. Patent Issued for External Fixation Device and Fixation Device Set (USPTO 9526523) … p.9453

NYXOAH SA. Patent Issued for External Resonance Matching between an Implanted Device and an External Device (USPTO 9526906) … p.9456

Ochser Clinic Foundation. Patent Issued for Fusion Proteins of Collagen–Binding Domain and Parathyroid Hormone (USPTO 9528099) … p.9462

WASHINGTON UNIVERSITY. Patent Issued for Glycoengineered Outer Membrane Vesicles and Use Thereof as Vaccines (USPTO 9526775) … p.9465

PHARMED ARTIS GmbH. Patent Issued for Granzyme B Protease Variants (USPTO 9528101) … p.9468

Development Center for Biotechnology. Patent Issued for Humanized Alpha–Enolase Specific Antibodies and Methods of Uses in Cancer Therapy (USPTO 9527922) … p.9471

DANA-FARBER CANCER INSTITUTE, INC. Patent Issued for Humanized Monoclonal Antibodies and Methods of Use (USPTO 9527924) … p.9477

LAZURE SCIENTIFIC, INC. Patent Issued for Immune Mediated Cancer Cell Destruction, Systems and Methods (USPTO 9526911) … p.9478

Teva Pharmaceuticals Industries Ltd. Patent Issued for Inhalers and Housing Caps for Inhalers (USPTO 9526858) … p.9480

Vitae Pharmaceutical, Inc. Patent Issued for Inhibitors of Beta–Secretase (USPTO 9526727) … p.9486

Biotechnology Companies. Patent Issued for Injectable Biodegradable Particles (USPTO 9526804) … p.9488

SpineCore, Inc. Patent Issued for Intervertebral Disc and Insertion Methods Therefor (USPTO 9526634) … p.9490

MicroVention, Inc. Patent Issued for Intracorporeal Occlusive Device and Method (USPTO 9526505) … p.9496

Cook Medical Technologies LLC. Patent Issued for Introducer Assembly Extension and Method of Use (USPTO 9526872) … p.9501

THE REGENTS OF THE UNIVERSITY OF COLORADO, A BODY CORPORATE. Patent Issued for LEDGF Peptides and Formulations Thereof for Treatment of Degenerative Disorders (USPTO 9526760) … p.9502

TEL-AVIV UNIVERSITY FUTURE TECHNOLOGY DEVELOPMENT L.P. Patent Issued for Lipidated Glycosaminoglycan Particles and Their Use in Drug and Gene Delivery for Diagnosis and Therapy (USPTO 9526705) … p.9505

Arrowhead Pharmaceuticals, Inc. Patent Issued for Low Density Lipoprotein Receptor–Mediated siRNA Delivery (USPTO 9526799) … p.9508

SEIKO EPSON CORPORATION. Patent Issued for Magnetic Sensor for Measuring a Magnetic Field Using Optical Pumping Method That Has a Probe Light and Magnetic Field Generators (USPTO 9529061) … p.9509
January 14, 2017

THE BOARD OF TRUSTEES OF THE UNIVERSITY OF ILLINOIS. Patent Issued for Mandelic Acid Condensation Polymers (USPTO 9527793) … p.9512

The University of Toledo. Patent Issued for Materials and Methods for Quality-Controlled Two-Color RT-QPCR Diagnostic Testing of Formalin Fixed Embedded And/Or Fresh-Frozen Samples (USPTO 9528161) … p.9515

Ecolink Intelligent Technology, Inc. Patent Issued for Method and Apparatus for Detecting a Hazard Alarm Signal (USPTO 9530298) … p.9518

Silk Road Medical, Inc. Patent Issued for Method and Apparatus for Treating a Carotid Artery (USPTO 9526504) … p.9520

APERIAM MEDICAL, INC. Patent Issued for Method and Device for Treatment of Hypertension and Other Maladies (USPTO 9526572) … p.9523

DANISCO US INC. Patent Issued for Method for Amplifying Locus in Bacterial Cell (USPTO 9528114) … p.9524

St. Jude Children's Research Hospital. Patent Issued for Method for Detection of Adenosine and Metabolites (USPTO 9528976) … p.9526

Patents. Patent Issued for Method for Diagnosing Glaucoma by Observing Connective Tissue of Lamina Cribrosa (USPTO 9526414) … p.9535

www.NewsRx.com

Shubin, Inc. Patent Issued for Method for Producing Heterogeneous Catalysts Containing Metal Nanoparticles (USPTO 9527068) … p.9541

Nuvecra Corporation. Patent Issued for Method of Making a Braided Lead with Imbedded Fixation Structures (USPTO 9526887) … p.9543

New York University. Patent Issued for Methods and Agents for Preventing and Treating Plasma Cell Dyscrasias (USPTO 9526712) … p.9546

ABBOTT LABORATORIES. Patent Issued for Methods and Reagents for Diagnosing Rheumatoid Arthritis (USPTO 9528998) … p.9550

Quest Diagnostics Investments Incorporated. Patent Issued for Methods for Detecting Lacosamide by Mass Spectrometry (USPTO 9530635) … p.9552

Quest Diagnostics Investments Incorporated. Patent Issued for Methods for Detecting Vitamin D Metabolites by Mass Spectrometry (USPTO 9529004) … p.9558

Yeda Research and Development Co. Ltd. Patent Issued for Methods of Isolating Distinct Pancreatic Cell Types (USPTO 9526749) … p.9562

CARDIAC DIMENSIONS PTY. LTD. Patent Issued for Mitral Valve Annuloplasty Device with Twisted Anchor (USPTO 9526616) … p.9570

Annam Biosciences, LLC. Patent Issued for N–BOC–Dendrimers and Their Conjugates (USPTO 9526795) … p.9572

Macau University of Science and Technology. Patent Issued for Oncogenic ROS1 Kinase Inhibitor (USPTO 9526722) … p.9579

ForSight Vision4, Inc. Patent Issued for Ophthalmic Implant for Delivering Therapeutic Substances (USPTO 9526654) … p.9580

NEUROPORE THERAPIES, INC. Patent Issued for Phenyl–Urea and Phenyl–Carbamate Derivatives as Inhibitors of Protein Aggregation (USPTO 9527852) … p.9586

Duchesnay Inc. Patent Issued for Plurimodal Release Formulation of Doxylamine and Pyridoxine And/Or Metabolites Or Salts (USPTO 9526703) … p.9589

Universitaet Leipzig. Patent Issued for Polymutant Tau Protein Variants and Their Use for Recapitulating Human Tauopathies (USPTO 9527894) … p.9595

Merck Sharp & Dohme Corp. Patent Issued for Protective Vaccine Based on Staphylococcus Aureus SA2451 Protein (USPTO 9527892) … p.9597

Array BioPharma Inc. Patent Issued for Quinazoline Analogs as Receptor Tyrosine Kinase Inhibitors (USPTO 9527865) … p.9599

Siemens Healthcare Diagnostics Inc. Patent Issued for Reagents and Methods for Detecting HCV (USPTO 9528163) … p.9605

Glycotope GmbH. Patent Issued for Recombinant Human Follicle–Stimulating Hormone (USPTO 9527899) … p.9606

Data from Affiliated Hospital Advance Knowledge in Obesity (Maternal obesity in mice not only affects fresh embryo quality but also aggravates injury due to vitrification)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Researchers detail new data in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news originating from Guangdong, People's Republic of China, by NewsRx correspondents, research stated, "The aims of the present study are to identify the mechanism(s) whereby obesity impairs fresh embryos and to clarify the effects of vitrification on lipid droplet content within embryos from maternally obese mice. The diet-induced obesity mouse model was established, and the zygotes were captured and cultured to day 3. The eight-cell embryos were selected and divided into fresh and vitrified groups."

Financial support for this research came from The National Natural Science Foundation of China.

Our news journalists obtained a quote from the research from Affiliated Hospital, "The blastocysts derived from fresh embryos were used as a control. The expression profiles of endoplasmic reticulum (ER) stress genes (Atf4, Grp78, and Hsp70) and other genes (MnSOD, p53, Gadd45g, caspase-3, IGF-II, ZO-1, and E-cadherin) on day-3 fresh and post-warming eight-cell embryos from obese and control groups were determined. For day-5 fresh blastocysts and blastocysts previously vitrified on day 3, the expression profiles for all of the above genes were also determined."

According to the news editors, the research concluded: "For the fresh group, obesity significantly upregulated Hsp70, p53, IGF-II, and ZO-1 expression in embryos on day 3 and notably upregulated Atf4, MnSOD, Gadd45g, caspase-3, ZO-1, and E-cadherin expression in blastocysts on day 5. For vitrified ones, obesity significantly upregulated Atf4, MnSOD, and Gadd45g expression in embryos on day 3 and notably upregulated Hsp70 expression and downregulated MnSOD in day 5 blastocysts previously vitrified on day 3. Obesity impairs fresh embryos and aggravates embryonic vitrification injury at a molecular level."

For more information on this research see: Maternal obesity in mice not only affects fresh embryo quality but also aggravates injury due to vitrification. Journal of Assisted Reproduction and Genetics, 2016;33(11):1515-1523. Journal of Assisted Reproduction and
**Data on Obesity Detailed by Researchers at National Taiwan University (Piceatannol Exerts Anti-Obesity Effects in C57BL/6 Mice through Modulating Adipogenic Proteins and Gut Microbiota)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Data detailed on Nutritional and Metabolic Diseases and Conditions - Obesity have been presented. According to news originating from Taipei, Taiwan, by NewsRx correspondents, research stated, "Obesity is a global health concern. Piceatannol (Pic), an analog of resveratrol (Res), has many reported biological activities."

Our news journalists obtained a quote from the research from National Taiwan University, "In this study, we investigated the anti-obesity effect of Pic in a high-fat diet (HFD)-induced obese animal model. The results showed that Pic significantly reduced mouse body weight in a dose-dependent manner without affecting food intake. Serum total cholesterol (TC), low-density lipoprotein (LDL), high-density lipoprotein (HDL) levels, and blood glucose (GLU) were significantly lowered in Pic-treated groups. Pic significantly decreased the weight of liver, spleen, perigonadal and retroperitoneal fat compared with the HFD group. Pic significantly reduced the adipocyte cell size of perigonadal fat and decreased the weight of liver. Pic-treated mice showed higher phosphorylated adenosine 5'-monophosphate-activated protein kinase (pAMPK) and phosphorylated acetyl-CoA carboxylase (pACC) protein levels and decreased protein levels of CCAAT/enhancer-binding protein C/EBP alpha, peroxisome proliferator-activated receptor PPAR gamma and fatty acid synthase (FAS), resulting in decreased lipid accumulation in adipocytes and the liver. Pic altered the composition of the gut microbiota by increasing Firmicutes and Lactobacillus and decreasing Bacteroidetes compared with the HFD group."

According to the news editors, the research concluded: "Collectively, these results suggest that Pic may be a candidate for obesity treatment."

For more information on this research see: Piceatannol Exerts Anti-Obesity Effects in C57BL/6 Mice through Modulating Adipogenic Proteins and Gut Microbiota. *Molecules,*
Data on Obesity Reported by Researchers at Massey University
(Efficacy of Exercise Intervention for Weight Loss in Overweight and Obese Adolescents: Meta-Analysis and Implications)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Current study results on Nutritional and Metabolic Diseases and Conditions - Obesity have been published. According to news reporting originating in Wellington, New Zealand, by NewsRx journalists, research stated, "The global rise in obesity prevalence among children and adolescents has been linked to modifiable lifestyle factors, including lack of physical activity. However, no known meta-analysis has been conducted on the effects of exercise intervention on body composition and cardiometabolic risk factors in overweight and obese adolescents."

The news reporters obtained a quote from the research from Massey University, "The aim of this study was to (1) estimate whether exercise intervention meaningfully improves body composition and cardiometabolic risk factors in overweight and obese adolescents; and (2) discuss the implications of the findings in terms of primary healthcare provision and public health policy, using New Zealand as an exemplar context. Electronic databases (PubMed, Web of Science, SPORTDiscus, Google Scholar) from inception to May 2015. The reference lists of eligible articles and relevant reviews were also checked. Inclusion criteria were (1) randomized controlled trial; (2) structured exercise intervention, alone or combined with any other kind of intervention; (3) control group received no structured exercise or behavioural modification designed to increase physical activity; (4) participants overweight or obese (body mass index [BMI] >= 85th percentile); and (5) participants aged between 10 and 19 years. Appraisal and Synthesis Methods Initially, 1667 articles were identified. After evaluation of study characteristics, quality and validity, data from 13 articles (15 trials) involving 556 participants (176 male, 193 female, 187 unknown) were extracted for meta-analysis. Meta-analyses were completed on five body composition parameters and ten cardiometabolic parameters. Effect sizes (ESs) were calculated as mean differences, as well as standardized mean differences in order to determine effect magnitude. Exercise intervention reduced BMI (mean 2.0 kg/m 2, 95 % CI 1.5-2.5; ES moderate), body weight (mean 3.7 kg, 95 % CI 1.7-5.8; ES small), body fat percentage (3.1 %, 95 % CI 2.2-4.1; ES small), waist circumference (3.0 cm, 95 % CI 1.3-4.8; ES small), but the increase (improvement) in lean mass was trivial (mean 1.6 kg, 95 % CI 0.5-2.6). The response to an oral glucose tolerance test following exercise intervention was for a
decrease in the area under the curve for insulin (mean 162 μU/ml, 95 % CI 93-231; ES large) and blood glucose (mean 39 mg/dl, 95 % CI 9.4-69; ES moderate). Improvements in the homeostatic model assessment were also noted (mean 1.0, 95 % CI 0.7-1.4; ES moderate) and systolic blood pressure (mean 7.1 mmHg, 95 % CI 3.5-10.7; ES moderate). The effects of exercise on total cholesterol, low-density lipoprotein cholesterol, high-density lipoprotein cholesterol, fasting insulin and fasting blood glucose were inconclusive. Limitations Most of the included trials were short term (6-36 weeks) and 13 had methodological limitations. Additionally, the meta-analyses for some of the secondary outcomes had a small number of participants or substantial statistical heterogeneity. The current evidence suggests that exercise intervention in overweight and obese adolescents improves body composition, particularly by lowering body fat.

According to the news reporters, the research concluded: "The limited available evidence further indicates that exercise intervention may improve some cardiometabolic risk factors."

Our news correspondents report that additional information may be obtained by contacting L. Stoner, Massey University, Sch Sport & Exercise, Wellington, New Zealand. Additional authors for this research include D. Rowlands, A. Morrison, D. Credeur, M. Hamlin, K. Gaffney, D. Lambrick and A. Matheson.

**FITNESCITY Unveils its Wellness Management Program of the Future**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- FITNESCITY will formally unveil its lifestyle management program at the Consumer Electronics Show in Las Vegas on Tuesday, January 3, 2017, kicking off a new era in wellness coaching: a data-driven, 360-view approach that uses a wide range of digital health devices, along with the human element of one-on-one coaching, to help individuals improve wellness outcomes.

Rather than relying on one-size-fits-all solutions, HYPERLINK "http://www.fitnescity.com/" \nFITNESCITY gets to know the individual's wellness at the deepest level. The company uses connected devices such as wearables, wirelessly connected scales, glucometers, and heart rate and blood pressure monitors. These devices collect a large set of physiological measurements such as body composition, weight, metabolism, body shape, posture, heart rate and blood pressure. FITNESCITY then integrates these biomarkers with lifestyle data: nutrition habits, sleep patterns and stress levels, which are all collected through online assessments. The company combines those assessment data with medical history and
health risks, forming its signature FITNESCITY "Wellness Profile" for each individual. FITNESCITY then matches the client with a personal coach who helps them implement lifestyle changes in a customized 16-week program.

Get early access by requesting an invite.

Founded by a team from Stanford and MIT, FITNESCITY LABS helps clients and their coaches make more informed decisions. "FITNESCITY aims at bridging the gap between data collection and behavior change," says Co-founder & CEO Laila Zemrani. "Eighty percent of some of the most common and costly health conditions could be prevented through lifestyle changes. While digital health devices generate revenues of $15B, they have yet to create meaningful outcomes. For instance, consumer research shows that one out of two users abandons their wearable device within six months. Behavior change requires a holistic view and a deep understanding of the individual's physiology, history and lifestyle."

Fitness training, nutrition counseling, sleep monitoring and stress reduction are all part of the 16-week coaching program. The service targets both the general population and individuals with special conditions such as diabetes or injuries. (FITNESCITY does not offer medical advice.)

FITNESCITY will be available in a private Beta launch in New York, N.Y., in 2017. The company plans to expand its operations to other locations (TBA) later that year.

Heart Disorders and Diseases - Heart Attack

Findings from G. Geri et al Update Understanding of Heart Attack (Influence of body mass index on the prognosis of patients successfully resuscitated from out-of-hospital cardiac arrest treated by therapeutic hypothermia)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Research findings on Heart Disorders and Diseases - Heart Attack are discussed in a new report. According to news reporting originating in Le Chesnay, France, by NewsRx journalists, research stated, "Obesity prevalence has dramatically increased over recent years and is associated with cardiovascular diseases, but data are lacking on its prognostic impact in out-of-hospital cardiac arrest (OHCA) patients. Data of all consecutive OHCA patients admitted in two cardiac arrest centers from Paris and suburbs between 2005 and 2012 were prospectively collected."

The news reporters obtained a quote from the research, "Patients treated by therapeutic hypothermia (TH) were included in the analysis. Logistic and Cox regression analyses were used to quantify the association between body mass index (BMI) at hospital admission and day-30 and 1-year mortality respectively. 818 patients were included in the study (median age 60.9 [50.8-72.7] year, 70.2% male). Obese patients (BMI > 30 kg m(-2)) were older, more frequently male and evidenced more frequently cardiovascular risk factors than normally (18.5 < BMI < 25 kg m(-2)) or overweight patients (25 < BMI < 30 kg m(-2)). Post-resuscitation shock and therapeutic hypothermia failure were more frequent in obese patients. Overall mortality at day-30 and one-year was 63.8 and 67.2%, respectively. After multivariate
adjustment, BMI > 30 kg m(-2) was independently associated with day-30 mortality (Odds ratio [OR] in comparison with normally weight patients 2.45; 95% confidence interval [95% CI: 1.32-4.56; p< 0.01]). Obesity was not associated with one-year mortality (Hazard ratio [HR] 0.99, 95% CI 0.21,4.67; p = 0.99) while underweight was associated with one-year mortality in this subgroup of patients (Hazard ratio [HR] 3.94, 95% CI 1.11,14.01; p = 0.03). In the present study, obesity was independently associated with day-30 mortality in successfully resuscitated ICU TH OHCA patients."

According to the news reporters, the research concluded: "Further studies are needed to understand the mechanisms that underpin this finding."

For more information on this research see: Influence of body mass index on the prognosis of patients successfully resuscitated from out-of-hospital cardiac arrest treated by therapeutic hypothermia. Resuscitation, 2016;109():49-55. Resuscitation can be contacted at: Elsevier Ireland Ltd, Elsevier House, Brookvale Plaza, East Park Shannon, Co, Clare, 00000, Ireland. Findings from Ghent University Hospital Yields New Findings on Obesity (Reduced Expression of Chemerin in Visceral Adipose Tissue Associates with Hepatic Steatosis in Patients with Obesity)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Research findings on Nutritional and Metabolic Diseases and Conditions - Obesity are discussed in a new report. According to news reporting originating in Ghent, Belgium, by NewsRx journalists, research stated, "This study aimed to evaluate whether circulating levels and/or visceral adipose tissue (VAT) expression of recently described adipokines associate with histopathological severity of nonalcoholic fatty liver disease (NAFLD), independent of obesity and insulin resistance. Serum levels of adiponectin, omentin, chemerin, monocyte chemoattractant protein-1, and secreted frizzled-related protein 4 were measured using enzyme-linked immunosorbent assay in 81 patients with obesity and NAFLD and 18 lean control subjects."

The news reporters obtained a quote from the research from Ghent University Hospital, "Expression in VAT was measured using real-time PCR and histopathological grading was scored using the NAFLD activity score (NAS). When NAFLD patients were subdivided into groups with simple steatosis, borderline nonalcoholic steatohepatitis (NASH), and NASH, adiponectin serum levels and omentin expression were lower in NASH versus simple steatosis patients. Serum adiponectin was generally lower with higher histopathological grading. Chemerin VAT expression was negatively associated with NAS (r = -0.331, P = 0.022) and steatosis score (r = -0.335, P = 0.020), independent of age, BMI, and HOMA-IR. In addition, adjusting for chemerin VAT expression in a multivariate model explained part of the association between NAS and HOMA-IR."

According to the news reporters, the research concluded: "These findings suggest that lower VAT expression of chemerin in patients with obesity may be involved in the pathophysiology of hepatic steatosis, potentially by modulating the link between insulin resistance and NAFLD."

For more information on this research see: Reduced Expression of Chemerin in Visceral Adipose Tissue Associates with Hepatic Steatosis in Patients with Obesity. Obesity, 2016;24(12):2544-2552. Obesity can be contacted at: Wiley-Blackwell, 111 River St, Hoboken..."

**Nutritional and Metabolic Diseases and Conditions** - …

**Findings from University of Ottawa Reveals New Findings on Obesity (The mediating role of energy intake on the relationship between screen time behaviour and body mass index in adolescents with obesity: The HEARTY study)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators publish new report on Nutritional and Metabolic Diseases and Conditions - Obesity. According to news originating from Ottawa, Canada, by NewsRx correspondents, research stated, "Adolescents spend up to 6-8 h/day in sedentary screen behaviour and screen time is an independent risk factor for obesity. However, the mechanisms by which screen time confers obesity risk remain unclear."

Funders for this research include Children's Hospital of Eastern Ontario (CHEO), Ontario Graduate Scholarships, University of Ottawa Research Chair, Canadian Institutes of Health Research, Alberta Heritage Foundation for Medical Research.

Our news journalists obtained a quote from the research from the University of Ottawa, "Via community level recruitment this study examined whether the relationship between screen time behaviours and body mass index (BMI: kg/m(2)) was mediated by total energy intake or macronutrient consumption. In a cross-sectional study of post-pubertal adolescents (N = 283: 86M, 197F) with overweight or obesity at baseline of an intervention for weight control, we examined self-reported total energy intake (mean Calories from 3 day food
diary), macronutrient intake (grams/day of carbohydrate, fat, protein) and total screen time (aggregate of hours/day watching TV, playing seated video games, and recreational computer use). BMI was objectively measured and converted to standardized scores (z-BMI). Simple and multiple mediation analyses were conducted using the bootstrapping approach described by Preacher and Hayes. Covariates included age, sex, ethnicity, parental education, Tanner stage, and self reported physical activity. The relationship between screen time and z-BMI was significantly mediated by energy intake. Higher levels of carbohydrate intake, but not fat or protein intake, significantly mediated the relationship between screen time and z-BMI (95% bias-corrected and accelerated confidence interval [0.0004, 0.0074]). Higher carbohydrate intake mediated the relationship between TV viewing and z-BMI, and video gaming and z-BMI.

According to the news editors, the research concluded: "The relationship between screen time and BMI appears to be mediated by increased energy intake, primarily in the form of higher carbohydrate intake. It is possible that reducing time spent watching TV and playing video games may reduce food intake and help promote dietary adherence needed for weight management in obese adolescents."

The news correspondents report that additional information may be obtained from G.S. Goldfield, University of Ottawa, Sch Psychol, Ottawa, ON, Canada. Additional authors for this research include D. Maras, R.J. Sigal, G.P. Kenny, M.M. Borghese, J.P. Chaput, A.S. Alberga and G.S. Goldfield.

The direct object identifier (DOI) for that additional information is: http://dx.doi.org/10.1016/j.appet.2016.08.101. This DOI is a link to an online electronic document that is either free or for purchase.

The news reporters obtained a quote from the research from the University of Palermo, "As many as 1133 subjects were enrolled in two phases and followed for 25 years (859 subjects) or 11 years (274 subjects) and incident cancer was registered in the follow-up period. Anthropometric measures and biochemical parameters were filed at baseline and evaluated as predictors of incident cancer by measuring hazards ratios (HR) using multivariate Cox parametric hazards models. Best predictive threshold for metabolic parameters and metS criteria were recalculated by ROC analysis. Fasting Blood Glucose >5.19 mmol/L [HR = 1.58 (1.0-2.4)] and the TG/HDL ratio (log(10)) (Males > 0.225, Females > 0.272) [HR = 2.44 (1.3-4.4)] resulted independent predictors of survival free of cancer with a clear additive effect together with age classes [45-65 years, HR = 2.47 (1.3-4.4), 65-75 years HR = 3.80 (2.0-7.1)] and male gender [HR = 2.07 (2.3-3.1)]. Metabolic disturbances are predictive of cancer in a 25 years follow-up of a Mediterranean population following a traditional Mediterranean diet."

According to the news reporters, the research concluded: "The high prevalence of obesity and metS and the observed underlying condition of insulin resistance expose this population to an increased risk of cardiovascular disease and cancer despite the healthy nutritional habits."

Our news correspondents report that additional information may be obtained by contacting M.R. Averna, University of Palermo, Dept. of Biomed Internal Med & Specialties Di Bi MIS, Palermo, Italy. **Findings from University of Queensland Yields New Findings on Obesity (Effect of Obesity on the Population Pharmacokinetics of Fluconazole in Critically Ill Patients)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Current study results on Nutritional and Metabolic Diseases and Conditions - Obesity have been published. According to news originating from Brisbane, Australia, by NewsRx correspondents, research stated, "Our objective was to describe the
population pharmacokinetics of fluconazole in a cohort of critically ill nonobese, obese, and morbidly obese patients. Critically ill patients prescribed fluconazole were recruited into three body mass index (BMI) cohorts, nonobese (18.5 to 29.9 kg/m(2)), obese (30.0 to 39.9 kg/m(2)), and morbidly obese (>= 40 kg/m(2))."

Funders for this research include Saudi Arabian Cultural Mission, Department of Health | National Health and Medical Research Council (NHMRC), Intensive Care Foundation (ICF).

Our news journalists obtained a quote from the research from the University of Queensland, "Serial fluconazole concentrations were determined using a validated chromatographic method. Population pharmacokinetic analysis and Monte Carlo dosing simulations were undertaken with Pmetrics. Twenty-one critically ill patients (11 male) were enrolled, including obese (n = 6) and morbidly obese (n = 4) patients. The patients mean +/- standard deviation (SD) age, weight, and BMI were 54 +/- 15 years, 90 +/- 24 kg, and 31 +/- 9 kg/m(2), respectively. A two-compartment linear model described the data adequately. The mean +/- SD population pharmacokinetic parameter estimates were clearance (CL) of 0.95 +/- 0.48 liter/h, volume of distribution of the central compartment (V-c) of 15.10 +/- 11.78 liter, intercompartmental clearance from the central to peripheral compartment of 5.41 +/- 2.28 liter/h, and intercompartmental clearance from the peripheral to central compartment of 2.92 +/- 4.95 liter/h. A fluconazole dose of 200 mg daily was insufficient to achieve an area under the concentration-time curve for the free, unbound drug fraction/MIC ratio of 100 for pathogens with MICs of >= 2 mg/liter in patients with BMI of >30 kg/m(2). A fluconazole loading dose of 12 mg/kg and maintenance dose of 6 mg/kg/day achieved pharmacodynamic targets for higher MICs."

According to the news editors, the research concluded: "A weight-based loading dose of 12 mg/kg followed by a daily maintenance dose of 6 mg/kg, according to renal function, is required in critically ill patients for pathogens with a MIC of 2 mg/liter."

The news correspondents report that additional information may be obtained from J.A. Roberts, University of Queensland, Sch Pharm, Brisbane, Qld, Australia. Additional authors for this research include S.C. Wallis, P. Jarrett, T. Starr, J. Stuart, M. Lassig-Smith, J.L.O. Mejia, M.S. Roberts, M.G. Sinnollareddy, C. Roger, J. Lipman and J.A. Roberts.

Findings from University of Sao Paulo Yields New Data on Tooth Wear (Nutritional status, tooth wear and quality of life in Brazilian schoolchildren)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators publish new report on Dental Diseases and Conditions - Tooth Wear. According to news reporting from Bauru, Brazil, by NewsRx journalists, research stated, "To evaluate the correlation among nutritional status, tooth wear and quality of life in Brazilian schoolchildren. The study followed a cross-sectional design."

The news correspondents obtained a quote from the research from the University of Sao Paulo, "Nutritional status was measured via anthropometry using BMI and tooth wear was measured using the Dental Wear Index; both these assessments were carried out by a trained recorder according to standard criteria. A modified version of the Child Oral Impacts on Daily Performances was used to assess quality of life. City of Bauru, in Brazil. A cluster sample of 396 schoolchildren (194 boys and 202 girls) aged 7-10 years. The anthropometric assessment showed similar situations for both sexes regarding underweight (31.40 % in boys and 30.20 % in girls) and overweight/obesity (33.96 % in boys and 33.17 % in girls). The underweight children showed a greater severity of tooth wear in the primary teeth (OR= 0.72; CI 0.36, 1.42), although in the permanent dentition the obese children had a greater severity of tooth wear (OR= 1.42; 95 % CI 0.31, 6.55). The tooth wear was correlated with age for both dentitions. Tooth wear in the primary and permanent dentition may be related to nutritional status."

According to the news reporters, the research concluded: "Tooth wear and obesity did not have a significant impact on the schoolchildren's perception of quality of life."

Our news journalists report that additional information may be obtained by contacting S.H.D. Sales-Peres, University of Sao Paulo, Bauru Sch Dental, Dept. of Pediat Dental Orthodont & Public Hlth, Bauru, SP, Brazil. Additional authors for this research include A.D. Sales-Peres, P.G. de Moura-Grec, M.A.A. Mapengo, A. Sales-Peres and S.H.D. Sales-Peres.

Findings from Washington State University Yields New Data on Obesity (Emotion regulation strategies and childhood obesity in high risk preschoolers)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators discuss new findings in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting out of Pullman, Washington, by NewsRx editors, research stated, "The current study examined the relationships between the specific strategies that preschool children use to regulate their emotions and childhood weight status to see if emotion regulation strategies would predict childhood weight status over and above measures of eating self-regulation. 185 4- to 5-year-old Latino children were recruited through Head Start centers in a large city in the southeastern U.S. Children completed both a delay of gratification task (emotion regulation) and an eating in the absence of hunger task (eating regulation)."

Funders for this research include National Institute of Child Health and Human Development, U.S. Department of Agriculture, Children's Nutrition Research Center, Baylor College of Medicine.

Our news journalists obtained a quote from the research from Washington State University, "Eating regulation also was assessed by maternal reports. Four emotion regulation strategies were examined in the delay of gratification task: shut out stimuli, prevent movement, distraction, and attention to reward. Hierarchical linear regressions predicting children's weight status showed that both measures of eating regulation negatively predicted child obesity, and the use of prevent movement negatively predicted child obesity. Total wait time during the delay of gratification tasks was not a significant predictor. The current findings are consistent with studies showing that for preschool children, summary measures of emotion regulation (e.g., wait time) are not concurrently associated with child obesity. In contrast, the use of emotion regulation strategies was a significant predictor of lower child weight status."

According to the news editors, the research concluded: "These findings help identify emotion regulation strategies that prevention programs can target for helping children regulate their emotions and decrease their obesity risk."

The direct object identifier (DOI) for that additional information is: http://dx.doi.org/10.1016/j.appet.2016.09.008. This DOI is a link to an online electronic document that is either free or for purchase.

Findings from Washington University Yields New Data on Obesity (Obesity Epidemiology Worldwide)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Research findings on Nutritional and Metabolic Diseases and Conditions - Obesity are discussed in a new report. According to news reporting from St. Louis, Missouri, by NewsRx journalists, research stated, "Obesity continues to be a public health concern across the globe. Obesity has a demonstrated association with health behaviors and health outcomes, such as diabetes, hypertension, and cancer."

The news correspondents obtained a quote from the research from Washington University, "Over the past 2 decades, obesity has increased worldwide and remains highest in the United States. It is critical to understand the definition of obesity, using body mass index appropriately, recent estimates, and risk factors as a framework within which clinicians should work to help reduce the burden of obesity."

According to the news reporters, the research concluded: "This framework, including the Healthy People 2020 place based approach to social determinants of health, is described in this article."

Our news journalists report that additional information may be obtained by contacting C. Arroyo-Johnson, Washington University, Sch Med, Dept. of Surg, Div Public Hlth Sci, St Louis, MO 63110, United States.

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators discuss new findings in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting out of Fullerton, California, by NewsRx editors, research stated, "This study aims to examine adolescent level of knowledge concerning obesity risk. Qualitative and quantitative data were collected using a staged process."

Our news journalists obtained a quote from the research from California State University. "Data collected with (a) Obesity Risk Knowledge Scale (ORK-10), (b) focus groups, © scientific advisory group input, and (d) the Adolescent Obesity Risk Knowledge Scale (AORK). The AORK is tailored from the ORK-10 (a=.53) to capture adolescents' knowledge of obesity complications and/or risks (a=.68)."

According to the news editors, the research concluded: "The AORK integrates questions for assisting practitioners to initiate discussions about obesity and lifestyle choices with adolescents and their families."

Our news journalists report that additional information may be obtained by contacting E.M. Rutkowski, School of Nursing, California State University, Fullerton, California, United States.

Nutritional and Metabolic Diseases and Conditions -…

Findings on Obesity Reported by G.K. Lam et al (Obesity and the Critical Care Pregnant Patient)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Researchers detail new data in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting out of Chattanooga, Tennessee, by NewsRx editors, the research stated, "The rise of obesity among gravid women has been tracked and documented in many first-world countries, but a dramatic rise has been noted over the last 15 years. Definitions of 'normal-weight, overweight and obese' have been defined; however, new terms are used to describe more severe degrees of obesity."

Our news journalists obtained a quote from the research, "Obesity in any form or degree increases morbidities in mothers. The unique physiologic characteristics of the obese
gravida set up unique challenges in her management, especially in an acute setting such as labor.

According to the news editors, the research concluded: "The definitions, trends, and management decisions pertaining to the obese parturient will be described in this review."

Our news journalists report that additional information may be obtained by contacting G.K. Lam, Reg Obstet Consultants Chattanooga, Chattanooga, TN, United States.

The direct object identifier (DOI) for that additional information is: http://dx.doi.org/10.1016/j.ogc.2016.07.012. This DOI is a link to an online electronic document that is either free or for purchase.

Nutritional and Metabolic Diseases and Conditions -

Investigators at Griffith University Zero in on Obesity [ADding negative pRESSure to improve healING (the DRESSING trial): a RCT protocol]

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Researchers detail new data in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting originating in Gold Coast, Australia, by NewsRx journalists, research stated, "Obese women are more likely to develop a surgical site infection (SSI) following caesarean section (CS) than non-obese women. Negative pressure wound therapy (NPWT) is increasingly being used to reduce SSI with limited evidence for its effectiveness."

The news reporters obtained a quote from the research from Griffith University, "To determine the clinical and cost-effectiveness of using NPWT in obese women having elective and semiurgent CS. A multisite, superiority parallel pragmatic randomised controlled trial with an economic evaluation. Women with a body mass index (BMI) of (>=) 30, booked for elective and semiurgent CS at 4 Australian acute care hospitals will be targeted. A total of 2090 women will be enrolled. A centralised randomisation service will be used with participants block randomised to either NPWT or standard surgical dressings in a 1:1 ratio, stratified by hospital. The primary outcome is SSI; secondary outcomes include type of SSI, length of stay, readmission, wound complications and health-related quality of life. Economic outcomes include direct healthcare costs and cost-effectiveness, which will be evaluated using incremental cost per quality-adjusted life year gained. Data will be collected at baseline, and participants followed up on the second postoperative day and weekly from the day of surgery for 4 weeks. Outcome assessors will be masked to allocation. The primary statistical analysis will be based on intention-to-treat. Ethics approval has been obtained from the ethics committees of the
According to the news reporters, the research concluded: "The findings of the trial will be disseminated through peer-reviewed journals, national and international conference presentations."

For more information on this research see: ADdding negative pRESSure to improve healING (the DRESSING trial): a RCT protocol. Bmj Open, 2016;6(2):e010287. (BMJ Publishing Group - group.bmj.com/; Bmj Open - bmjopen.bmj.com/)

Our news correspondents report that additional information may be obtained by contacting B.M. Gillespie, NHMRC Centre for Research Excellence in Nursing, Centre for Health Practice Innovation (HPI), Menzies Health Institute Qld (MHIQ), Griffith University, Gold Coast, Queensland, Australia. **Nutritional and Metabolic Diseases and Conditions -**

**Investigators at Medical University Report Findings in Obesity (Nutritional interventions or exposures in infants and children aged up to 3 years and their effects on subsequent risk of overweight, obesity and body fat: a systematic review of ...)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Research findings on Nutritional and Metabolic Diseases and Conditions - Obesity are discussed in a new report. According to news originating from Warsaw, Poland, by NewsRx correspondents, research stated, "This study, performed as part of the international EarlyNutrition research project (http://www.project-earlynutrition.eu), provides a systematic review of systematic reviews on the effects of nutritional interventions or exposures in children (up to 3 years of age) on the subsequent risk of obesity, overweight and adiposity. Electronic databases (including MEDLINE, Embase and Cochrane Library) were searched up until September 2015."

Our news journalists obtained a quote from the research from Medical University, "Forty systematic reviews were included. A consistent association of breastfeeding with a modest reduction in the risk of later overweight and obesity in childhood and adulthood was found (the odds decreased by 13% based on high-quality studies), but residual confounding cannot be excluded. Lowering the protein content of infant formula is a promising intervention to reduce the risk of later overweight and obesity in children. There is no consistent evidence of an association of the age of introducing complementary foods, sugar-sweetened beverage or energy intake in early childhood with later overweight/obesity, but there are some indications of an association of protein intake during the complementary feeding period with later overweight/obesity."

According to the news editors, the research concluded: "There was inadequate
Investigators at National Institute on Alcohol Abuse and Alcoholism Report New Data on Type 2 Diabetes (Endocannabinoid regulation of b-cell functions: implications for glycaemic control and diabetes)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators publish new report on Nutritional and Metabolic Diseases and Conditions - Type 2 Diabetes. According to news originating from Bethesda, Maryland, by NewsRx correspondents, research stated, "Visceral obesity is a major risk factor for the development of insulin resistance which can progress to overt type 2 diabetes (T2D) with loss of b-cell function and, ultimately, loss of b-cells. Insulin secretion by b-cells of the pancreatic islets is tightly coupled to blood glucose concentration and modulated by a large number of blood-borne or locally released mediators, including endocannabinoids."

Financial supporters for this research include National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health.

Our news journalists obtained a quote from the research from National Institute on Alcohol Abuse and Alcoholism, "Obesity and its complications, including T2D, are associated with increased activity of the endocannabinoid/CB1 receptor (CB1 R) system, as indicated by the therapeutic effects of CB1 R antagonists. Similar beneficial effects of CB1 R antagonists with limited brain penetrance indicate the important role of CB1 R in peripheral tissues, including the endocrine pancreas. Pancreatic b-cells express all of the components of the endocannabinoid system, and endocannabinoids modulate their function via both autocrine and paracrine mechanisms, which influence basal and glucose-induced insulin secretion and also affect b-cell proliferation and survival."

According to the news editors, the research concluded: "The present brief review will survey available information on the modulation of these processes by endocannabinoids and their receptors, with an attempt to assess the contribution of such effects to glycaemic control in
T2D and insulin resistance."

The news correspondents report that additional information may be obtained from T. Jourdan, Laboratory of Physiologic Studies, National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health, Bethesda, MD, United States. Additional authors for this research include G. Godlewski and G. Kunos.

The direct object identifier (DOI) for that additional information is: http://dx.doi.org/10.1111/dom.12646. This DOI is a link to an online electronic document that is either free or for purchase.

Keywords for this news article include: Bethesda, Maryland, Proinsulin, United States, Article Review, Hyperinsulinism, Type 2 Diabetes, Endocannabinoids, Peptide Hormones, Peptide Proteins, Insulin Resistance, Drugs and Therapies, Risk and Prevention, North and Central America, Glucose Metabolism Disorders, Non Insulin Dependent Diabetes Mellitus.

**Health and Medicine - Diet and Nutrition**

**Investigators at University of Bath Describe Findings in Diet and Nutrition (Is breakfast the most important meal of the day?)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Fresh data on Health and Medicine - Diet and Nutrition are presented in a new report. According to news reporting originating from Bath, United Kingdom, by NewsRx correspondents, research stated, "The Bath Breakfast Project is a series of randomised controlled trials exploring the effects of extended morning fasting on energy balance and health. These trials were categorically not designed to answer whether or not breakfast is the most important meal of the day."

Our news editors obtained a quote from the research from the University of Bath, "However, this review will philosophise about the meaning of that question and about what questions we should be asking to better understand the effects of breakfast, before summarising how individual components of energy balance and health respond to breakfast v. fasting in lean and obese adults. Current evidence does not support a clear effect of regularly consuming or skipping breakfast on body mass/composition, metabolic rate or diet-induced thermogenesis. Findings regarding energy intake are variable, although the balance of evidence indicates some degree of compensatory feeding later in the day such that overall energy intake is either unaffected or slightly lower when breakfast is omitted from the diet. However, even if net energy intake is reduced, extended morning fasting may not result in expected weight loss due to compensatory adjustments in physical activity thermogenesis. Specifically, we report that both lean and obese adults expended less energy during the morning when remaining in the fasted state than when consuming a prescribed breakfast."

According to the news editors, the research concluded: "Further research is required to examine whether particular health markers may be responsive to breakfast-induced responses of individual components of energy balance irrespective of their net effect on energy balance.
Investigators at University of North Carolina Report Findings in Obesity
(The interaction between physical activity and obesity gene variants in association with BMI: Does the obesogenic environment matter?)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Current study results on Nutritional and Metabolic Diseases and Conditions - Obesity have been published. According to news reporting from Chapel Hill, North Carolina, by NewsRx journalists, research stated, "Little is known about how obesity susceptibility single nucleotide polymorphisms (SNPs) interact with moderate to vigorous physical activity (MVPA) in relation to BMI during adolescence, once obesogenic neighborhood factors are accounted for. In race stratified models, including European (EA; N=4977), African (AA; N=1726), and Hispanic Americans (HA; N=1270) from the National Longitudinal Study of Adolescent to Adult Health (1996; ages 12-21), we assessed the evidence for a SNPxMVPA interaction with BMI-for-age Z score, once accounting for obesogenic neighborhood factors including physical activity amenities, transportation and recreation infrastructure, poverty and crime."

Funders for this research include National Institutes of Health, Eunice Kennedy Shriver National Institute of Child Health and Human Development.

The news correspondents obtained a quote from the research from the University of North Carolina, "Eight SNPxMVPA interactions with suggestive significance (p < 0.10; three in each EA, and AA, two in HA) were observed showing attenuation on BMI-for-age Z score in adolescents with ≥ 5 versus < 5 bouts/week MVPA, except for rs10146997 (near NRXIV3). Findings were robust to the inclusion of neighborhood-level variables as covariates."

According to the news reporters, the research concluded: "These findings suggest that any attenuation from MVPA on a genetic susceptibility to obesity during adolescence is likely not operating through obesogenic neighborhood factors."

For more information on this research see: The interaction between physical activity...

Our news journalists report that additional information may be obtained by contacting M. Graff, University of North Carolina, Gillings Sch Global Public Hlth, Dept. of Epidemiol, Chapel Hill, NC 27514, United States. Additional authors for this research include A.S. Richardson, K.L. Young, A.L. Mazul, H. Highland, K.E. North, K.L. Mohlke, L.A. Lange, E.M. Lange, K.M. Harris and P. Gordon-Larsen.

**Intercellular Signaling Peptides and Proteins -...**

**Investigators at University of Oregon Report Findings in Adipokines (Adiponectin, Hemoglobin, and Cardiovascular Risk in an Indigenous Siberian Population)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Fresh data on Intercellular Signaling Peptides and Proteins - Adipokines are presented in a new report. According to news originating from Eugene, Oregon, by NewsRx correspondents, research stated, "Adipose tissue hypoxia appears to play a role in promoting chronic inflammation and the development of obesity-related cardiovascular and metabolic diseases, yet the underlying mechanisms are not well understood. The aim of the present research is to examine whether adiponectin levels (an adipocyte-derived hormone with anti-inflammatory properties) are inversely correlated with hemoglobin levels in an indigenous Siberian population."

Our news journalists obtained a quote from the research from the University of Oregon, "The study was conducted among 252 Yakut adults (>= 18 years; 135 females) from Berdyigestiakh, Sakha Republic, Russia. Measurements included anthropometric dimensions (body mass index [BMI], waist circumference [WC], and percent body fat) and blood levels of hemoglobin and adiponectin. Yakut females had higher adiponectin concentrations than males (15.1 +/- 9.8 vs. 11.7 +/- 10.6 mu g/ml; P< 0.001), whereas males had higher hemoglobin levels (14.4 +/- 1.4 vs. 12.6 +/- 1.5 g/dL; P< 0.001). Body composition measures in both sexes were negatively associated with adiponectin and positively associated with hemoglobin. After adjusting for central adiposity and smoking, adiponectin levels were negatively correlated with hemoglobin levels in men (P < 0.05), but not in women (P = 0.511)."

According to the news editors, the research concluded: "This investigation provides some support for the involvement of hypoxia-related dysregulation of adiponectin associated with obesity and potentially cardiovascular disease."

The news correspondents report that additional information may be obtained from J.J. Snodgrass, University of Oregon, Dept. of Anthropol, Eugene, OR 97403, United States. Additional authors for this research include E.C. Squires, W.R. Leonard, L.A. Tarskaia, T.M. Klimova, V.I. Fedorova, M.E. Baltakhinova, V.G. Krivoshapkin and J.J. Snodgrass.

Keywords for this news article include: Eugene, Oregon, United States, North and Central America, Intercellular Signaling Peptides and Proteins, Cardiovascular, Blood Proteins, Hemoglobins, Adiponectin, Cardiology, Adipokines, Globins, University of Oregon.

**Nutritional and Metabolic Diseases and Conditions** …

**Investigators from Indiana University School of Medicine Have Reported New Data on Obesity (Does Body Mass Index Modify Memory, Reasoning, and Speed of Processing Training Effects in Older Adults)**

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Current study results on Nutritional and Metabolic Diseases and Conditions - Obesity have been published. According to news originating from Indianapolis, Indiana, by NewsRx correspondents, research stated, "To describe 10-year trajectories of cognitive performance by body mass index (BMI) class and to investigate BMI differences in response to memory, reasoning, and speed of processing training in older adults. This is a secondary analysis of the multisite, randomized trial Advanced Cognitive Training for Independent and Vital Elderly."

Our news journalists obtained a quote from the research from the Indiana University School of Medicine, "There were 701 older adults with normal weight, 1,081 with overweight, and 902 with obesity (mean age 73.6) randomized to memory training, reasoning training, speed of processing training, or no-training control group. Participants completed memory, reasoning, and speed of processing tests. Baseline sociodemographic, health, and chronic disease measures were included as covariates in analyses. The 10-year trajectories of memory, reasoning, or speed of processing performance did not differ by BMI status among the participants randomized to the untrained control arm. The training effect on the reasoning and speed of processing outcomes did not differ by BMI status. The training effect on the memory outcome in participants with a BMI indicating obesity, however, was just 38% of that observed in participants with normal-weight BMI."

According to the news editors, the research concluded: "These analyses of data from the largest trial of cognitive training ever conducted suggest that older adults with obesity may be less responsive to memory training."

For more information on this research see: Does Body Mass Index Modify Memory, Reasoning, and Speed of Processing Training Effects in Older Adults. *Obesity*, 2016;24
Investigators from Research Hospital Have Reported New Data on Obesity (The assessment of maternal and umbilical cord homocysteine levels in obese pregnant women)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Fresh data on Nutritional and Metabolic Diseases and Conditions - Obesity are presented in a new report. According to news reporting originating in Ankara, Turkey, by NewsRx journalists, research stated, "The aim of this study was to compare the maternal plasma and umbilical cord blood homocysteine levels in obese and non-obese pregnant women. One hundred-ten term pregnant women, who completed their 37th gestational weeks and were not in active labor, were enrolled in the study."

The news reporters obtained a quote from the research from Research Hospital, "While 41 out of them were obese (BMI > 30 kg/m(2)), 69 were non-obese (BMI < 30 kg/m(2)). The maternal plasma and umbilical cord homocysteine levels and umbilical cord pH values were compared between the groups. The statistical analyses were performed using t-test, Mann Whitney test, and Chi-square test. Ap < 0.05 value was set as statistically significant. The mean of age was higher in obese group in borderline significance (26.8 +/- 5.4 vs. 28.8 +/- 5.1, p = 0.049). The mean of gestational weeks, birthweight, the mode of delivery, and umbilical cord pH values were similar between the groups (p > 0.05). The maternal plasma homocysteine levels [median (interquartile range); 7.6 (4.1) vs. 7.1 (4.9)] and umbilical cord homocysteine values were not statistically different [8.6 (4.2) vs. 8.8 (4.5)] between the groups (p > 0.05)."

According to the news reporters, the research concluded: "The maternal and umbilical cord blood homocysteine levels are not different in obese and non-obese pregnant women."

Our news correspondents report that additional information may be obtained by contacting B. Kaya, Ankara Ataturk Educ & Res Hosp, Dept. of Obstet & Gynecol, Ankara,
Turkey. Additional authors for this research include S. Kaya, H.L. Keskin, S. Aydogmus, G.A. Yegin, A. Ekiz and A.F. Avsar.

Nutritional and Metabolic Diseases and Conditions -…

Investigators from Soonchunhyang University Hospital Release New Data on Obesity (Association between obesity and lower urinary tract symptoms: propensity score matching study between healthy controls and obese patients seeking bariatric surgery)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators publish new report on Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting originating in Seoul, South Korea, by NewsRx journalists, research stated, "To date, the association between obesity and lower urinary tract symptoms (LUTS) is controversial. To overcome the current inconsistent results regarding the association between obesity and LUTS and to investigate the association between obesity and LUTS using propensity score matching analysis."

The news reporters obtained a quote from the research from Soonchunhyang University Hospital, "Bariatric center of excellence and health promotion center at university hospital. From August 2012 to December 2014, a total of 260 obese patients (77 men and 180 women) visited to our bariatric center to undergo bariatric surgery. Patients' International Prostate Symptom Score (IPSS) and overactive bladder symptom score were compared with those of 844 healthy controls who had visited our health center during the same period. To control for the effects of age, 1:1 propensity score matching was used. After matching propensity score for age, 73 male patients and 176 female patients were included in our study. In men, all IPSS items except 'frequency' were significantly different between obese patients and controls; median scores were higher in the obese group. In women, all IPSS items except 'feeling of incomplete emptying' were significantly different between the 2 groups. Both voiding and storage subscores also had marked differences in both genders (P < .001). Total rpss, quality of life, and total overactive bladder symptom score were significantly different in both genders (P < .001). There were marked differences in LUTS between obese and nonobese patients, including in voiding and storage symptoms."

According to the news reporters, the research concluded: "Considering the relatively young age of both groups, this case-control study supports the hypothesis of a relationship between obesity and bladder pathophysiology."

For more information on this research see: Association between obesity and lower urinary tract symptoms: propensity score matching study between healthy controls and obese patients seeking bariatric surgery. Investigators from University of California Report New Data on Obesity (The Effects of Patient Obesity on Early Postoperative Complications After Shoulder Arthroscopy)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Investigators discuss new findings in Nutritional and Metabolic Diseases and Conditions - Obesity. According to news reporting out of San Francisco, California, by NewsRx editors, research stated, "To report the prevalence of obesity in shoulder arthroscopy, determine a body mass index (BMI) threshold most predictive of complication within 30 days, and evaluate obesity as an independent risk factor for medical and surgical complications. Using the National Surgical Quality Improvement Program database, we reviewed all patients who underwent shoulder arthroscopy during 2011 to 2013."

Our news journalists obtained a quote from the research from the University of California, "Receiver operating characteristic and Youden coefficient were calculated to find an optimal BMI cutoff to predict complications within 30 days of surgery. A case-control matched analysis was then performed by stratifying patient BMI by this cutoff and matching patients one to one according to age, sex, type of shoulder arthroscopy, American Society of Anesthesiology rating, surgical setting, and 8 comorbidities. Operating time, complications, and readmissions were also compared. Of the 15,589 patients who underwent shoulder arthroscopy, 6,684 (43%) were classified as obese when using the optimal cutoff point of BMI = 30 according to the Youden coefficient. Obese patients had a higher risk of superficial site infection than nonobese patients (0.3% vs 0.0%; odds ratio [OR]: 6.00; 95% confidence interval [CI], 1.3 to 26.8; P = .015). Obese patients did not have significantly increased risk for overall early postoperative complication (1.2% compared with nonobese 0.8%; OR: 1.54; 95% CI, 1.0 to 2.4), readmissions (OR: 0.85; 95% CI, 0.5 to 1.5), or increased operating time (P = .068). Up to 43% of patients undergoing shoulder arthroscopy can be classified as obese, but early perioperative complications are uncommon."

According to the news editors, the research concluded: "Higher patient BMI is associated with increased risk of superficial site infection but not an overall risk for complication, readmission, or increased operating time."

Investigations from University of Medicine and Dentistry of New Jersey (UMDNJ) Release New Data on Obesity (Early postnatal amylin treatment enhances hypothalamic leptin signaling and neural development in the selectively bred diet-induced obese ...)

2017 JAN 14 (NewsRx) -- By a News Reporter-Staff News Editor at Obesity, Fitness & Wellness Week -- Data detailed on Nutritional and Metabolic Diseases and Conditions - Obesity have been presented. According to news reporting out of Newark, New Jersey, by NewsRx editors, research stated, "Selectively bred diet-induced obese (DIO) rats become obese on a high-fat diet and are leptin resistant before becoming obese. Compared with diet-resistant (DR) neonates, DIO neonates have impaired leptin-dependent arcuate (ARC) neuropeptide Y/agouti-related peptide (NPY/AgRP) and alpha-melanocytestimulating hormone (alpha-MSH; from proopiomelanocortin (POMC) neurons) axon outgrowth to the paraventricular nucleus (PVN)."

Funders for this research include American Heart Association (AHA), HHS | NIH | National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), Swiss National Science Foundation (Schweizerische Nationalfonds).

Our news journalists obtained a quote from the research from the University of Medicine and Dentistry of New Jersey (UMDNJ), "Using phosphorylation of STAT3 (pSTAT3) as a surrogate, we show that reduced DIO ARC leptin signaling develops by postnatal day 7 (P7) and is reduced within POMC but not NPY/AgRP neurons. Since amylin increases leptin signaling in adult rats, we treated DIO neonates with amylin during postnatal hypothalamic development and assessed leptin signaling, leptin-dependent ARC-PVN pathway development, and metabolic changes. DIO neonates treated with amylin from P0-6 and from P0-16 increased ARC leptin signaling and both AgRP and alpha-MSH ARC-PVN pathway development, but increased only POMC neuron number. Despite ARC-PVN pathway correction, P0-16 amylin-induced reductions in body weight did not persist beyond treatment cessation. Since amylin..."
